**UFOs and Intelligence: A Timeline**

May 31, 2022

Aggregation by George M. Eberhart ©2022

After an effort of many years, I have prepared a comprehensive timeline of UFO history that will be useful to UFO researchers and historians. “UFOs and Intelligence” is an up-to-date retrospective of UFO history (from Agobard of Lyons to the newly appointed US investigation agency UAPTF), intertwined with events in US and world history concerning military and civilian intelligence agencies and the cult of secrecy. It is now 906 pages and more than 814,000 words (including a substantial “Sources and Further Reading” appendix). Readers will discover or rediscover many events, people, and UFO cases they may not be familiar with. Some will find it useful for current or planned research projects. Military cases, those involving commercial aircraft, close encounters involving physical traces and other evidence, reports involving occupants or entities, and events surrounding military and sensitive nuclear sites are emphasized, but this timeline covers the full spectrum of UFO history, from contactee experiences to misidentifications of mundane phenomena and notorious hoaxes. Links to online sources are given, and links to biographical information are provided when available. A timeline like this allows us to view events from a different perspective, letting us make connections we might not otherwise see. It forces us to view the big picture, amid the grand flow of UFO cases, military security decisions, a vast swathe of personalities, and world history. **NEW:** As of 2022, all references have proper bibliographical citations with embedded links; if you have a version with raw URL links, it is an earlier version.

812

812 — Agobard, the archbishop of Lyon, France, writes De Grandine et Tonitruis (“On Hail and Thunder”), in which he condemns pagan folk beliefs, such as the notion of a “certain region called Magonia, from which ships, navigating on clouds, set sail to transport back to this same region the fruits of the earth ruined by hail and destroyed by the storm.” He cites an episode in which some foolish peasants capture “three men and one woman who they said had fallen from these ships.” Brought out in front of an enraged mob, Agobard intervenes and prevents their lynching, persuading the crowd that the charges are false and absurd. Some ufologists interpret this as a visitation from an alternate reality or an abduction case, while Jean-Louis Brodú observes that in the 9th century the atmosphere was likened to an ocean in which aerial ships could navigate from spot to spot on the earth. Miceal Ross argues that Magonia is a corruption of Magonianus, relating to the city of Mahón, the port of the island of Menorca, Spain. (Jean-Louis Brodú, “Magonia: A Re-Evaluation,” *Fortean Studies* 2 (1995): 198–215; Miceal Ross, “Anchors in a Three-Decker World,” *Folklore* 109 (1998): 63–75; Vallée, *Magonia*, pp. 23–24; Clark III 1213–1214; Vallée and Aubeck, *Wonders in the Sky*, Tarcher, 2009, pp. 70–73; Pierre Chambert-Protat, “Florus de Lyon et les Extra-terrestres.” Florus de Lyon, November 4, 2014; Pierre Lagrange, “Agobard, la Magonie et les ovnis,” *Actualité*, no. 440 (October 2017): 28–29; Wikipedia, “Magonia (mythology)”)

1547

December 15 — Mariners in the port of Hamburg, Germany, see a fireball moving to the south. Its rays are so hot that passengers cannot remain inside the ships. Thinking the vessels are about to burn, they hide and take cover. (Simon Goulart, *Thrésor d’histoires admirables et mémorables de nostre temps*, Geneva, 1600, *vol. 1*, p. 55)

1561

April 4 — Dusk. A “frightening vision” is seen in the sky above Nuremberg, Germany, said to be observed by many. Printer Hans Glaser describes in his broadside many blood-red, blue, and black balls or discs near the Sun. “They were three alongside each other, sometimes four in a square, and several alone, and between these balls blood-colored crosses” are seen. Two “great pipes” (cannon) are also observed, and everything starts to “fight against each other.” The battle lasts about one hour, then the burning balls fall to the earth and vanish on the ground. Although cited as a possible early UFO report, the narrative is simply about a battle in the sky by phantom armies told as an allegory of what awaits an unrepentant humanity on Judgment Day. (Hans Glaser, *Himmelserscheinung*
1638

1638 — English clergyman and philosopher John Wilkins writes The Discovery of a World in the Moone, in which he highlights the similarities of the Earth and the Moon (seas, mountains, atmosphere) and concludes that the Moon is likely to be inhabited by living beings, whom the calls “Selenites.” (Maria Avxentevskaya, “How 17th Century Dreamers Planned to Reach the Moon,” Real Clear Science, December 2, 2017)

1638 — Night. John Everett and two companions are crossing the Muddy River near Boston, Massachusetts, in a boat when a “great light” appears above them. It darts back and forth across the river, sometimes hovering and “flaming up,” for about 2–3 hours. After they stop watching it, they discover that their boat has moved about one mile against the current to the place where they had embarked. (John Winthrop, The History of New England from 1630 to 1649, Little, Brown, 1853, vol. 1, pp. 349–350)

1663

August 15 — 12:00 noon. The faithful gathered in a church in a village near Lake Zarobozero, Vologda Oblast, Russia, hear a loud noise outside and see a large ball of fire descend from the north and then head south following the lake, low over its surface. The fireball seems to measure about 140 feet across and has blue smoke issuing from its sides. Two fiery rays extend from its front part. Less than an hour later, a similar fireball reappears over the same lake. Moving from south to west, the object again disappears. It reappears a third time a short while later, this time larger than before, and stays over the lake for an hour and a half. Peasants in a boat try to get close to it, but the heat is too intense. The water of the lake is illuminated to a depth of 30 feet, and fish are seen swimming away from the object, which then flies off to the west. (Akty istoricheskie, sobranye i izdanye Arkheograficheskai Kommissii, Vol. 4, Saint Petersburg, 1842, pp. 331–332; Hobana and Weverbergh 54–61; Jacques Vallée and Chris Aubeck, Wonders in the Sky, Tarcher, 2009, pp. 215–217; Thomas E. Bullard, “Defending UFOs,” IUR 34, no. 2 (March 2012): 31; Stonehill and Mantle, Russia’s USO Secrets, Flying Disk, 2020, pp. 157–161)

1665

April 8 — 6:00 p.m. Numerous wonders are seen in the sky over Stralsund, Germany, including ships, large flocks of birds, fire, and smoke, as well as a dark “round flat form like a plate and like a big man’s hat” that hovers above St. Nicholas Church for one hour. Witnesses include several fishermen who later complain of tremors in their hands and feet. (Eine abgebildete Beschreibung von dem wunderbarlichen Stralsundischen Luft-Kriege und Schiff-streite, Leipzig, 1665; Chris Aubeck and Martin Shough, Return to Magonia: Investigating UFOs in History, Anomalist, 2015, pp. 23–38)

1686

1686 — French philosopher Bernard le Bovier de Fontenelle writes Conversations on the Plurality of Worlds, in which he speculates on extraterrestrial life. He imagines Venusians to be “little black people, scorched with the Sun, full of fire, very amorous.” (Wikipedia, “Conversations on the Plurality of Worlds”)

1737

December 5 — 5:00 p.m. Physician Thomas Short witnesses a blood-red luminous display in the sky around Sheffield, England, which moves from west to north and then to the east. The cause seems to be one or more clouds in which are embedded brilliant lights as bright as the full moon that give off slow-moving streamers or rays. The
display is accompanied by unseasonable heat and lasts until 10:30 p.m. Short hears that a similar phenomenon is seen at the same time in Venice, Italy, and Kilkenny, Ireland, where it appears as a bursting fireball. (Thomas Short, “An Account of Several Meteors,” Philosophical Transactions of the Royal Society 41 (1741): 625–627)

December 6 — Afternoon. A large, blood-red object is seen in the western sky at Bucharest, Wallachia [now Romania]. It lingers for two hours before splitting up then reuniting once again. The phenomenon is said to have occurred at night in the Banat region. (Hobana and Weverbergh 222; Romania 4)

1741

September 21 — Dawn. Parson-naturalist Gilbert White wakes up at his vicarage in Selborne, Hampshire, England, and finds the neighboring clover fields matted all over with a thick coat of cobwebs, laced with dew. The dogs are blinded by it when they attempt to hunt. At 9:00 a.m. more cobwebs fall from the sky and continue until dusk. They are “perfect flakes or rags; some near an inch broad, and five or six long, which fell with a degree of velocity that showed they were considerably heavier than the atmosphere.” The fall extends to the neighboring villages of New Alresford and Bradley. (Gilbert White, The Natural History and Antiquities of Selborne (1789), Letter XXIII)

1742

December 16? — 8:40 p.m. Physician Cromwell Mortimer, secretary of the Royal Society, is walking through St. James’s Park in Westminster, London, England, when he sees a light ascend from behind the trees and houses in the southwest. When it reaches 20° against the sky, it takes a horizontal path with an undulating motion before disappearing in the northeast after a full 30 seconds. The front part is luminous with a frame-like structure behind it, and it has a faint trail. The date is questionable since Mortimer calls this a “Thursday” and December 16 was a Sunday. ([A Note by Cromwell Mortimer], Philosophical Transactions of the Royal Society 43 (1745): 524–525)

1745

1749

November 4 — 11:50 a.m. The crew of the HMS Montagu watches a large blue fireball, apparently low on the water, head directly toward them from the northeast and explode some 150 feet away from the ship, causing some damage to the mast, before it continues on toward the southwest. The incident takes place in the North Atlantic Ocean some 240 miles west of Cape Finisterre, Spain. (Chalmers, “An Account of an Extraordinary Fireball Bursting at Sea,” Philosophical Transactions of the Royal Society 46 (1752): 366–367; Chris Aubeck and Martin Shough, Return to Magonia: Investigating UFOs in History, Anomalist, 2015, pp. 67–75; Martin Shough and Wim van Utrecht, Redemption of the Damned, vol. 2, Anomalist, 2021, pp. 105–114)

1755

March — German philosopher Immanuel Kant publishes Universal Natural History and Theory of the Heavens, in which he theorizes that distance from the Sun determines the intelligence level of a world’s inhabitants; thus, the people who live on Mercury are the stupidest, and the Venuseans are only dimly brighter—making any Jupiterians and Saturnians much smarter than earthlings. (Wikipedia, “Universal Natural History and Theory of the Heavens”)
1756

1758

1758 — Swedish theologian and mystic Emanuel Swedenborg writes in *The Earths in the Universe* that that he has conversed with spirits from Jupiter, Mars, Mercury, Saturn, Venus, and the Moon, as well as spirits from planets beyond the solar system. From these encounters, he concludes that the planets are all inhabited and that such an enormous undertaking as the universe cannot have been created for just one race on one planet. (Emanuel Swedenborg, *The Earths in the Universe*, London, 1875; Richard Smoley, “Is There Really Life on Other Planets?” Swedenborg Foundation, February 15, 2019)

1759

April 27 — 4:00 p.m. Following a clap of thunder, a flat, pale object is seen “dancing” in the sky over Longdon, Somerset, England. It is joined by three similar objects, all of which move from west to east for 30 seconds and disappear in a cloud. (London *Universal Chronicle*, May 5, 1759; Chris Aubeck and Martin Shough, *Return to Magonia: Investigating UFOs in History*, Anomalist, 2015, pp. 83–96)

1762

August 9 — 12:00 noon. An amateur astronomer named de Rostan is observing the Sun at Lausanne, Switzerland, when he notices a large, spindle-shaped body moving across the solar disc from east to west at a slower rate of speed than sunspots move. It is surrounded by a thin “nebulosity.” An observer named Croste in Solothurn, Switzerland, also observes the object, but French astronomer Charles Messier, who is also taking solar measurements in Paris, France, does not see it. It remains visible until September 7, when it passes the Sun’s western limb. (“Observation Astronomique,” *Histoire de l’Academie Royale des Sciences*, 1766, pp. 106–107; “An Account of a Very Singular Phaenomenon Seen in the Disk of the Sun,” *Annual Register*, 1766, pp. 120–122; Martin Shough and Wim van Utrecht, *Redemption of the Damned*, vol. 2, Anomalist, 2021, pp. 33–45)

1767

September 9 — A cloud “like a house on fire” that soon takes on a pyramidal form is seen traveling along the course of the River Isla near Coupar Angus, Perth, Scotland. It moves northeast to the confluence of the River Erich and follows that stream to the west toward Blairgowrie where it disappears. It is accompanied by strong winds that destroy two houses. (*Annual Register* 1767, pp. 127–128)

1777

June 17 — 11:46 a.m. French astronomer Charles Messier views a large number of round, dark-brown globules passing in front of the disc of the sun for 5 minutes from west-southwest to east-northeast. He sees them through an achromatic refractor at the naval observatory located in the Hôtel de Cluny in Paris, France. His estimate of their size (one-600th the size of the solar disc) puts them near the limit of resolution for his telescope, but Messier claims the objects are far away and in focus. (Charles Messier, “Observation singulaire d’une prodigieuse quantité de petits globules qui ont passé devant le disque du soleil, le 17 juin 1777,” *Mémoires de l’Academie Royale des Sciences*...)
**1783**

1783 — British astronomer William Herschel has been observing the lunar surface since the mid-1770s in Bath, England, and writes journal entries in which he details sightings of immense trees, forests, and pastures, comparing it to the English countryside. By 1778, he is seeing circular formations that he thinks are towns and villages. He also notes canals, roads, and patches of vegetation, but never writes about it publicly, since he knows that telescopic observations can be tricky. (George Basalla, *Civilized Life in the Universe*, Oxford University, 2006, pp. 51–52)

August 18 — 9:15–9:30 p.m. An unusually bright bolide is observed in the British Isles on a clear, dry night. Analysis indicates that the meteor has entered the Earth’s atmosphere over the North Sea, before passing over the east coast of Scotland, England, and the English Channel; it finally breaks up, after a passage within the atmosphere of around 1,000 miles, over southwestern France or northern Italy. Perhaps the most prominent witness is Tiberius Cavallo, an Italian natural philosopher who happens to be among a group of people on the terrace at Windsor Castle, Berkshire, England, at the time the meteor appears. (Wikipedia, “1783 Great Meteor”; Tiberius Cavallo, “Description of a Meteor, Observed Aug. 18, 1783,” *Philosophical Transactions of the Royal Society* 74 (1784): 108–111; Charles Blagden, “An Account of Some Late Fiery Meteors,” *Philosophical Transactions of the Royal Society* 74 (1784): 202–232; Martin Beech, “The Great Meteor of 18th August 1783,” *Journal of the British Astronomical Association* 99 (1989): 130–134; Kaushik Patowary, “The Great Meteor of 1783,” *Amusing Planet*, September 8, 2021)

**1790**

June 12 — 5:00 a.m. Several farmers in Alençon, Normandy, France, see a large globe surrounded by flames and making a whistling sound. The object slows, oscillates, and moves toward the top of a hill, unearthing some plants along the slope. The heat is so intense that grass and small trees start burning. In the evening the sphere is still warm. Witnesses include two mayors, a doctor, and three other authorities in addition to the dozens of peasants who are present. A kind of door opens and a person emerges. He is dressed in a tight-fitting suit and, seeing all the people, says some words that are not understood. He runs into the woods. The sphere explodes silently, throwing pieces everywhere, and these pieces burn until they are powder. The original source is allegedly from a June 17 report by a Police Inspector Liabeuf and forwarded to the French Academy of Sciences. However, the Academy reported in 2006 that it has no knowledge of such a report in its archives. Probable hoax. (Alberto Penoglio, “Antichi Visitatori dal Cielo,” *Cybeus* 3, n. 3 (1966): 13–14; Vallée, *Magonia*, pp. 60–61; “1790 UFO Crash or Time Traveller?” *Cool Interesting Stuff*, June 1, 2014)

**1798**

September 10 — Before midnight. Schoolmaster Alexander Campbell and one other person observe a “remarkable comet, or meteor” at Alnwick, Northumberland, England. It rapidly increases in brightness, changing from a star-like object to a shape like “two half-moons, back to back, having a short luminous stream between the two backs” over the course of 5 minutes. (*Annual Register* 1798, p. 83)

**1803**

February 22 (or March 24) — An attractive young woman aged 18–20 years old arrives on a beach aboard a “hollow ship” (*Utsuro-bune*) that looks like a rice cooking pot or incense burner in Hitachi province, Japan. Fishermen bring her inland to investigate further, but the woman is unable to communicate in Japanese. She is dressed in a foreign fashion made of unknown fabrics and is clutching an ornate box also marked with the unknown script. The vessel is covered in hieroglyphs that no one can decipher. The fishermen return her and her vessel to the sea,

### 1808

May 16 — 4:00 p.m. Swedish lichenologist [Erik Acharius](https://en.wikipedia.org/wiki/Erik_Acharius) watches a stream of dark-brown spherical objects moving slowly through the sky in a straight line over Biskopsberga, near Skänninge, Sweden. Some hover temporarily and speed up, while others fall to earth. The objects appear in the western sky and stream to the east for 2 hours. Some are apparently linked together in groups of three, six, or eight, and all of them have some kind of trail. A few of them fall in the vicinity of K. G. Wettermark, who has also been observing. They resemble soap bubbles and dissipate quickly, leaving a film like cobweb. (Erik Acharius, “Besynderligt Meteor-Phænomén,” *Konglige Svenska Vetenskapsakademiens Handlighar*, ser. 2, vol. 29 (July/September 1808): 215–218; “Account of an Extraordinary Meteoric Phenomenon,” *North American Review* 3 (1816): 320–322; Martin Shough and Wim van Utrecht, *Redemption of the Damned*, vol. 1, Anomalist, 2019, pp. 18–29)

### 1819

August 13 — 8:00–9:00 p.m. A brilliant white fireball streaks across the sky at Amherst, Massachusetts. The next morning, Erastus Dewey finds a strange substance 20 feet from his front door and assumes it is residue from the meteorite. It is about 8 inches in diameter, resembles an upside-down salad dish, and consists of buff-colored pulpy substance with an overwhelmingly bad smell. It is covered with a nap that, when removed, causes the interior to liquefy and form a starchy substance. A couple days later, it largely dissipates. Geologist [Edward Hitchcock](https://en.wikipedia.org/wiki/Edward_Hitchcock) thinks it is some kind of “gelatinous fungus” common to the area in the late summer. (Rufus Graves, “Account of a Gelatinous Meteor,” *American Journal of Science* 2 (1820): 335–337; Edward Hitchcock, “On the Meteors of Nov. 13, 1833,” *American Journal of Science* 25 (1834): 354, 362–363)

### 1820

### 1824

1824 — Bavarian astronomer [Franz von Gruithuisen](https://en.wikipedia.org/wiki/Franz_von_Gruithuisen) of Munich, Germany, writes *Discovery of Many Distinct Traces of Lunar Inhabitants, Especially of One of their Colossal Buildings*, in which he announces his discovery of a city on the Moon in the rough terrain to the north of Schröter crater that he names the Wallwerk. This region contains a series of somewhat linear ridges that have a fishbone-like pattern, and, with the small refracting telescope he is using, can be perceived as resembling buildings complete with streets. His claims are readily refuted using more powerful instruments. Gruithuisen also thinks that the mysterious “ashen light” observed on Venus’s dark side is due to a festival of fire in honor of the “ascension of a new emperor to the throne of the planet.” Later, he speculates that the illumination is caused by burning jungles to create new farmland. (“Gruithuisen’s Lunar City,” [whatsupinthesky.com](https://whatsupinthesky.com); David Dunér, *Venusians: The Planet Venus in the 18th-Century Extraterrestrial Life* [Flying Disk Press, 2019]
1826

April 1 — 4:00 p.m. Stone mason Johannes Becker hears a noise resembling thunder at Rastpfuhl, northwest of Saarbrücken, Germany, and sees a grayish object “like two pieces of tin” approaching the earth with lightning speed and expanding itself like a sheet before falling to earth, apparently not far away. After one minute there is another sound like thunder and a strong whirlwind, as if coming from an impact. Pastor Köllner collects testimony from other nearby witnesses and visits the supposed landing site but finds no burn marks or meteoritic stones. (Ernst Chladni, “Über eine merkwürdige meteorische Erscheinung, am 1 April 1826, nicht weit von Saarbrücken,” Annalen der Physik und Chemie 7 (1826): 373–377; Martin Shough and Wim van Utrecht, Redemption of the Damned, vol. 1, Anomalist, 2019, pp. 31–38)

1829

August 20 — 11:00 p.m. A man on the York Road east of Leeds, England, sees a moon-like object split into two halves, the upper half of which gives off an apparent shaft of light. He sees two human figures visible to the waist, one of which has a red cloth around its head. The object is visible for more than one hour and is seen by others, during which time a cloud passes in front of it. (“Celestial Phenomena,” York Herald, August 22, 1829, p. 2; Chris Aubeck and Martin Shough, Return to Magonia: Investigating UFOs in History, Anomalist, 2015, pp. 111–125)

1835

May 11 — At the Palermo Observatory in Italy, astronomer Niccolò Cacciatore detects a starlike object in the Southern sky between the constellations Virgo and Crater moving at a slow rate that might indicate a planet beyond Uranus. It is nowhere to be seen during his next observation on May 14. (“Supposed New Planet,” American Journal of Science 31 (1837): 158–159)

August 25–31 — The New York Sun publishes a series of six articles on the alleged discovery by English astronomer John Herschel of plants, animals, and winged people on the lunar surface. Using a huge and powerful telescope, Herschel supposedly sees herds of bison-like quadrupeds, a spherical amphibious creature, and a bipedal beaver that lives in huts. The humans are man-bats “covered, except on the face, with short and glossy copper-colored hair, and had wings composed of a thin membrane, without hair, lying snugly upon their backs.” The article is an elaborate hoax. Herschel hasn’t observed life on the moon at all, nor is Herschel even aware of the story until much later. The announcement causes enormous excitement throughout America and Europe. Authorship of the article is usually attributed to Richard Adams Locke, a reporter who is working for The Sun at the time. Locke publicly admits to being the author in 1840, in a letter to the weekly paper New World, although his intent is satire, not misinformation. (Wikipedia, “Great Moon Hoax”; Richard Adams Locke, The Moon Hoax, Gowans, 1859)

1838

1838 — Scottish minister and science writer Thomas Dick publishes Celestial Scenery: The Wonders of the Planetary System Displayed, in which he suggests that every planet in the Solar System is inhabited. At his home in Broughty Ferry, Dundee, he computes that the Solar System contains 21.9 trillion inhabitants, 53.5 billion of them on Venus. This is done comparing the surface area of each planet and the population density of England. (Thomas Dick, Celestial Scenery, Harper, 1838)
1845

June 18 — 10:30 p.m. The British brig *Victoria*, captained by George Henry Caithness, is becalmed in the Strait of Sicily about 30 miles southwest of Licata, Sicily, Italy, when a huge wind suddenly blows from the east for two hours. Then the wind suddenly stops, and the crew feels an overpowering heat and smells a sulfuric stench. At this moment three “luminous bodies” emerge from the sea about one-half mile away and remain visible for 10 minutes. Shortly thereafter the wind picks up again. (This could be a magma plume from an undersea volcanic vent.) Around 7:10 p.m., at Ainab, Lebanon, two objects five times as large as the moon, joined by “streamers or appendages,” are observed in the west and remain visible for one hour, moving slowly on an easterly course. The objects are so bright they are painful to look at. A possible outgassing event from the Madrepore subsea vent. (“Atmospherical Phenomena,” London *Morning Chronicle*, August 8, 1845, p. 5; *The Athenaeum*, August 19, 1848, p. 833; James Glaisher, et al., “Report on Observations of Luminous Meteors, 1860–61,” *Report of the British Association for the Advancement of Science*, 1861, pp. 30–31; Chris Aubeck and Martin Shough, *Return to Magonia: Investigating UFOs in History*, Anomalist, 2015, pp. 139–152; Martin Shough and Wim van Utrecht, *Redemption of the Damned*, vol. 2, Anomalist, 2021, pp. 115–126)

1847

March 19 — 8:30 p.m. A woman and her companion are in Highbury East, London, England, when they notice what seems to be a fire balloon ascending slowly in the west, seemingly over Hampstead. It shoots out “several fiery coruscations” and turns into an intensely radiant cloud, which moves on further west. Its light shines down on the houses below. Suddenly another bright cloud appears above the first. After 2–3 minutes, a fiery ball drops from the upper cloud to the lower one, followed by two others. Soon after this, both clouds disappear. (“Meteoric Stones,” *Littell’s Living Age* 56 (1858): 503)

1850

September 15 — 6:20 p.m. Senior medical officer Elisha Kent Kane and other crew members of the USS Advance, participating in the First Grinnell Expedition to the Arctic to determine the fate of the lost Franklin Northwest Passage expedition, watch a balloon-like object over the Wellington Channel between Cornwallis and Devon islands, Nunavut, Canada. It is floating slowly northward and appears to be 2 feet long by 18 inches wide. After a short time, a small object appears below it. (Elisha Kent Kane, *The U.S. Grinnell Expedition in Search of Sir John Franklin*, Harper and Brothers, 1854, p. 190)

1854

March 21 — 9:30 p.m. People in Washington, D.C., see a brilliant light in the sky overhead “like a coal of fire glowing,” red in color and stationary. It is visible for 20–30 minutes before it fades away. (“Atmospherical Phenomenon,” *Gettysburg (Pa.) Adams Sentinel*, March 27, 1854, p. 1)

1855

January 22 — 10:00 p.m. A witness walking in the public square in New Haven, Connecticut, sees a brilliant red fireball in the sky near the star Gamma Draconis. At first it is stationary but after 15 seconds it moves slowly toward the east with a slight undulatory motion. It passes below the star Eta Ursae Majoris and disappears not far from Denebola in the constellation Leo. The object is visible for 10 minutes. (“Meteoric Phenomenon,” *New York Times*, January 25, 1855, p. 1)
1857

June 19 or 20 — Sunset. A large cloud moves in over Carbondale, Pennsylvania, from the northwest, accompanied by considerable wind. It emits a dark-looking substance that falls to the ground, where it becomes highly luminous. It moves toward a large barn and passes through its center, setting it on fire, and continues on in a straight course for the woods, burning up the underbrush. It makes a path about 16 feet wide for a distance of 3 miles, and it finally stops against an outcrop of anthracite coal 60 feet in thickness. It leaves a sulfurous mass behind. ("Extraordinary Meteoric Phenomenon," Baltimore (Md.) Sun, June 27, 1857, p. 1)

1860

July 20 — 9:40 p.m. A poem by Brooklyn, New York, poet Walt Whitman, “Year of Meteors (1859-60),” published in a later edition of Leaves of Grass, describes a “strange huge meteor-procession dazzling and clear shooting over our heads.” For many years, no one could identify the event. Then in 2000, Texas State University–San Marcos physicist Donald W. Olson discovered a painting by Hudson River artist Frederic Edwin Church depicting two large meteors streaming across the sky and dated July 20, 1860. An examination of contemporary newspapers revealed that this was probably Whitman’s meteor procession. Around 9:40 p.m., two meteors with trails, one behind another, are seen in New York, Philadelphia, Washington, D.C., Baltimore, Norfolk, and other locations in the East, proceeding slowly from northwest to southeast for nearly one minute. They are as bright as Venus. A rare event, and little understood until 1913, a meteor procession occurs when an earth-grazing meteor breaks apart and the fragments travel across the sky in the same horizontal path. Olson and his colleagues finally publish their discovery in the July 2010 issue of Sky & Telescope. ("The Wonders of the Heavens: The Meteor Train," Brooklyn (N.Y.) Evening Star, July 21, 1860, p. 2; "The Meteor of Friday Night," New York Herald, July 22, 1860, p. 1; “Texas State Astronomers Solve Walt Whitman Meteor Mystery,” Office of Media Relations, Texas State University, May 28, 2010; David Dickinson, “Remembering the Great Meteor Procession of 1860,” Universe Today, July 20, 2013)

August 2 — 11:00 p.m. Another seeming procession of two meteors is observed in Norfolk, Virginia, moving with an undulating motion in the western sky in a northerly direction. One of the lights is clear red and the other is greenish, and they both emit flashes of light, leaving a sparkling trail. The phenomenon is also seen in Pittsburgh, Pennsylvania. Some unnamed contemporary scientists compare it to the July 20 meteor procession. ("Another Splendid Meteor," Baltimore (Md.) Sun, August 6, 1860, p. 1)

1862

November — Early morning. Magistrate Osman Edward Middleton hears a “peculiar rushing noise” at Morpeth, New South Wales, and looks up to see a dark object traveling rapidly toward the southeast. It appears to be revolving on its axis. ([Letter], Sydney (N.S.W.) Morning Herald, November 20, 1866, p. 5; Chris Aubeck and Martin Shough, Return to Magonia: Investigating UFOs in History, Anomalist, 2015, pp. 167–173)

1865

1865 — French novelist Jules Verne publishes From the Earth to the Moon. It tells the story of the Baltimore Gun Club, a post–American Civil War society of weapons enthusiasts, and their attempts to build an enormous Columbiad space gun and launch three people—the Gun Club’s president, his Philadelphian armor-making rival, and a French poet—in a projectile with the goal of a lunar landing. (Wikipedia, "From the Earth to the Moon")

December — The British Board of Trade asks Trinity House to investigate the “false lights” of the Durham, England, coast, mysterious revolving lights seen above a rocky headland at Whitburn by mariners negotiating a hazardous stretch of the northeast coast. Between 1860 and 1870, more than 150 ships are wrecked on the rocks near Whitburn after following a light or lights in the sky that they wrongly believe are from a lighthouse at the mouth of the Tyne. A commission led by Rear Admiral Richard Collinson meets in Sunderland on December 28 to
interview witnesses and determine whether salvagers are responsible for the lights that are causing shipwrecks. Although the commission decides that the false lights are not deliberately lit, they are puzzled about the true cause. The lights and wrecks continue until January 1871 when the Souter Lighthouse is erected on Lizard Point. (“False Lights on the Durham Coast,” Newcastle Weekly Courant, January 12, 1866, p. 5; David Clarke, “Britain’s First X-File?” August 14, 2010; David Clarke, “The False Lights of Durham,” Fortean Times 266 (October 2010): 40–42; Martin Shough and Wim van Utrecht, Redemption of the Damned, vol. 1, Anomalist, 2019, pp. 77–79)

1866

June 21 — The US Hydrographic Office is established by Congress. It is assigned to the Navy Bureau of Navigation and collects reports from ships’ officers on observations of various marine phenomena, hazards, and other activities. Among the reports collected are meteors, ball lightning, and other celestial and meteorological phenomena. (Wikipedia, “United States Hydrographic Office”)

1867

November 4 — 3:00–4:00 p.m. James E. Beveridge is passing the mill by the Waterworks Reservoir in Chatham, England, when he and the miller see numerous black discs moving in the air to the west, some in groups, others scattered. They are visible for more than 20 minutes. In passing in front of the sun they appear like large cannon shot. Several groups pass over his head, disappearing suddenly, and leaving puffs of grayish brown smoke. (“Three Strange Stories,” Symons’s Monthly Meteorological Magazine 2 (1867): 130)

1868

June 8 — 9:50 p.m. John Lucas Sr., an observer at Radcliffe Observatory, Oxford University, England, notices a comet-like object with a trail a bit west of Polaris. As he is pointing it out to some others, it begins moving west. It moves in a straight line at first, then moves south for a bit, then continues to the north. They watch it for 4 minutes until it disappears below the northwestern horizon. (“Remarkable Meteor,” English Mechanic 7 (July 10, 1868): 351)

July 25 — Engineer Frederick William Birmingham of Parramatta, New South Wales, watches a bizarre procession of the faces of two prominent Australians (Archbishop of Sydney Frederic Barker and New South Wales Premier James Martin) through the air as well as a vessel he calls an “ark.” He hears a voice suggesting that “That’s a machine to go through the air.” The voice comes from a “spirit” whom he describes as “like a neutral tint shade and the shape of a man in his usual frock dress.” After the ark maneuvers for a while in the air, the spirit says, “Have you a desire or do you wish to enter upon it?” He is then lifted up and carried through the air into the object about 60 feet away. The spirit guides him into the “pilot house” of the machine where he is given some papers with formulas on them that will help him construct a flying machine. He observes another UFO-like craft on March 9, 1873, and later attempts to build a mechanical replica of what he has seen. (Bill Chalker, “The Mystery of a Machine to Go through the Air: A UFO Vision?” 1998; Clark III 60–65; “Did Frederick William Birmingham Build a Flying Machine Based on His Bizarre 1868 UFO ‘Vision’ in Parramatta, NSW, Australia?” TheOzFiles, November 30, 2013; Chris Aubeck and Martin Shough, Return to Magonia: Investigating UFOs in History, Anomalist, 2015, pp. 185–190)

1869

1869 — French poet and inventor Charles Cros is convinced that pinpoints of light observed on Mars and Venus are the lights of large cities on those planets. He spends years petitioning the French government to build a giant mirror to communicate with the Martians and Venusians by burning giant lines on the deserts of those planets. (Alissa Walker, “A French Inventor Once Proposed a Giant Mirror to Burn a Message on Mars,” Gizmodo, October 16, 2014)
August 7 — 12:00 noon. Four or five witnesses watch a luminous object land in a vacant lot about 200 yards north of the village of Adamstown, Pennsylvania. It is originally square-shaped but shoots up into a column about 3–4 feet high and 2 feet thick. The object glitters like a “column of burnished silver.” It gradually fades away and disappears after 10 minutes. No unusual traces are found on the lot. (“Singular Phenomenon,” Lancaster (Pa.) Daily Evening Express, August 10, 1869, pp. 2–3)

August 7 — About 4:45 p.m. During a total solar eclipse, four amateur observers in St. Paul’s Junction [possibly a railroad stop between Maynard and West Union], Iowa, both with and without instruments independently notice a bright object below the lunar disc and just outside the solar corona. There are no visible stars in that position in the sky. (“Was It the Intra-Mercurial Planet?” Astronomical Register 7 (1869): 227–228; John Russell Hind, “Stellar Objects Seen during the Eclipse of 1869,” Nature 18 (1878): 663–664)

1870

March 22 — 6:30 p.m. Capt. Frederick William Banner, master of the barque Lady of the Lake, is sailing in the North Atlantic 400 miles north of the Equator and 860 miles from the coast of West Africa when he sees a “curious-shaped” light-gray cloud in the south-southeast. It is circular, with four rays or arms extending from the center to the edge, and a curved tail. It is visible for about 50 minutes until it is too dark to see. (Frederick William Banner, “Extract from Log of Barque ‘Lady of the Lake,’” Quarterly Journal of the Royal Meteorological Society 1 (1873): 157; Martin Shough and Wim van Utrecht, Redemption of the Damned, vol. 1, Anomalist, 2019, pp. 89–109)

1871

1871 — English astronomer Richard A. Proctor writes Other Worlds Than Ours, in which he discusses the question of the plurality of worlds in the light of new facts. He suspects that Venus is likely the “abode of living creatures not unlike the inhabitants of earth.” (Richard A. Proctor, Other Worlds Than Ours, Appleton, 1871)

August 1 — 10:43 p.m. Astronomer Jérôme Eugène Coggia at Marseille Observatory, France, watches a slow, blood-red fireball move across the sky and change course twice before falling to the earth. He sees it for 20 minutes and 20 seconds. Possible earth-grazing meteor or a candle balloon. (Jérôme Eugène Coggia, “Observation d’un bolide, faite à Observatoire de Marseille le 1er août,” Comptes rendus hebdomadaires des séances de l’Académie des Sciences 73 (1871): 397–399; Martin Shough and Wim van Utrecht, Redemption of the Damned, vol. 1, Anomalist, 2019, pp. 117–119)

1873

1873 — English-American geologist and psychometrist William Denton of Wellesley, Massachusetts, publishes volume 3 of The Soul of Things, in which he describes his astral visit to Mars along with his sister Anna Cridge and wife Elizabeth. He finds it harbors a thriving civilization with a technology based on aluminum. He reports that they soar above traffic on their individual fly-cycles and seem particularly fond of air travel, with as many as 30 Martians occupying some of the large flying conveyances. (William Denton, Soul of Things, Wellesley, Mass.: Elizabeth M. F. Denton, 1873, vol. 3, pp. 171–267)

Late March — Evening. Thomas Inman and his son are traveling home from the village of Taylorsville [now Philo], Ohio, and are possibly in Bristol Township when they see a bright light descending swiftly with a roaring noise. It strikes a short distance in the road [probably Lawrence Road] ahead of them, flickers and flares, then fades. A
man dressed in a suit of black carrying a lantern emerges from the object. He walks a few paces and steps into a buggy, which Inman has not noticed before. The buggy begins to move silently and quickly, even though there is no horse attached to it, until it reaches a deep gully, into which it plunges and disappears. Historian William Alexander Taylor, who supplies the story to the New York Herald, vouches for the witnesses. (“Very Like a Whale,” New York Herald, April 8, 1873, p. 7; Clark III 1123–1124; Chris Aubeck and Martin Shough, Return to Magonia: Investigating UFOs in History, Anomalist, 2015, pp. 175–191)

1874

April 24 — 3:30 p.m. Chemist and astronomer Vojtěch Šafařík of Prague [now in the Czech Republic] sees “an object of so peculiar a character that I do not know what to make of it.” It is a dazzling white object slowly crossing the moon. He first sees it in front of the moon, then watches it against the “deep blue sky like Sirius or Vega in daylight.” (Vojtěch Šafařík, “Telescopical Meteors,” Astronomical Register 23 (1885): 205–211)

August 13 — 11:00 p.m. A large, “luminous electric cloud” flies over the western edge of Pascagoula, Mississippi, from the northwest to the southeast. It illuminates the ground and emits heat so intense that some witnesses think their houses are about to ignite. When last seen over the Gulf of Mexico, it renders the spars and rigging of a ship “distinctly visible.” (“Singular Phenomenon,” Pascagoula (Miss.) Star, August 22, 1874, p. 2)

1876

December 21 — 8:30–8:45 p.m. A bright bolide that explodes and breaks up into a group of 20–100 smaller balls is seen over a wide swath of the US from Topeka, Kansas, to western Pennsylvania. Over Columbus, Ohio, it is described as “a cluster or flock of meteors seemingly huddled together, like a flock of wild geese, and moving with the same velocity and grace of regularity. The color of their light was a yellowish red, like red rocket-balls.” A stony chondrite falls 3 miles northwest of Rochester, Indiana, at the same time. (James Glaisher, et al., “Report on Observations of Luminous Meteors during the Year 1876–77,” Report of the British Association for the Advancement of Science 47 (1877): 98, 149–152; Martin Shough and Wim van Utrecht, Redemption of the Damned, vol. 1, Anomalist, 2019, pp. 144–145)

1877

October — Astronomer Giovanni Schiaparelli reports seeing canali on the Martian surface from Brera Observatory in Milan, Italy, during the Great Opposition. While the term “canals” indicates an artificial construction, its proper translation as “channels” implies that the observed features are natural configurations of the planetary surface. From the incorrect translation into the term “canals,” various assumptions are made about life on Mars; as these assumptions are popularized, the canals become famous, giving rise to waves of hypotheses, speculation, and fiction about the possibility of intelligent life on Mars—the Martians. (Wikipedia, “Martian canal”)

1878

January 22 — John Martin is out hunting near his ranch 6 miles north of Dallas, Texas, when he notices a dark object high in the southern sky. It is so bright it hurts his eyes as it moves with great speed to directly over his head. The object is “about the size of a large saucer” and looks like a large balloon. It speeds away rapidly. (“A Strange Phenomena,” Dallas Daily Herald, January 23, 1878, p. 4; Patrick Gross, “The First Publicized Flying ‘Saucer’ Report?”; “Dallas 1878,” Texas UFO Museum and Research Library, February 5, 2014)

July 29 — About 12:30 p.m. Astronomers James Craig Watson, director of the Ann Arbor (Mich.) Observatory, and Lewis Swift, an amateur from Rochester, New York, both claim to see a planet-like object close to the Sun during the total solar eclipse. Watson, observing from Separation, Wyoming, places the object about 2.5° southwest of the Sun and estimates its magnitude at 4.5. Swift, observing from a location near Denver, Colorado, sees what he takes to be an intra-mercurial planet about 3° southwest of the Sun. He estimates its brightness to be
the same as that of Theta Cancri, a fifth-magnitude star which is also visible during totality, about six or seven minutes from the object. Both Watson and Swift describe the object as red in color. Watson says it has a definite disc, unlike stars, which appear as shimmering pinpoints of light. (James C. Watson, “On the Discovery of an Intra-Mercurial Planet,” American Journal of Science, ser. 3, 16 (1878): 230–233; Lewis Swift, “Letter from Mr. Lewis Swift, Relating to the Discovery of Intra-Mercurial Planets,” American Journal of Science, ser. 3, 16 (1878): 313–315; Richard Baum and William Sheehan, In Search of Planet Vulcan: The Ghost in Newton’s Clockwork Universe, Plenum, 1997, pp. 185–223)

1880

March 22 — About 6:00 a.m. A large number of brilliantly luminous bodies are seen to rise from the horizon and pass from east to west at Kattenau, East Prussia [now Furmanovka, Kaliningrad Oblast, Russia]. They move through space “like a string of beads.” Possible meteor procession. (“A Remarkable Phenomenon,” Nature 22 (May 20, 1880): 64; Martin Shough and Wim van Utrecht, Redemption of the Damned, vol. 1, Anomalist, 2019, pp. 169–170)

March 26 — Night. The train depot operator and a few friends are walking at Galisteo, New Mexico, when they hear loud voices and laughter coming from a “large balloon” shaped like a fish approaching from the west. A flower is dropped from the car of the balloon to which is attached a slip of silk-like paper on which Chinese characters are written. The next morning, searchers find a cup of peculiar workmanship, but both artifacts are purchased by a “wealthy young Chinaman” and a “collector of curiosities” who visits town on March 28, although this part of the tale seems facetious and racist. The yarn is typical of sensational newspaper hoaxes that have no basis in reality. (“Galisteo’s Apparition,” Santa Fe Weekly New Mexican, March 29, 1880, p. 3; “Solved at Last,” Santa Fe Weekly New Mexican, April 5, 1880, p. 4; Clark III 69–70, 592; Patrick Gross, URECAT, December 3, 2007)

June? — David Muckle and W. R. McKay of East Kent [now Chatham-Kent], Ontario, are in a field on Muckle’s farm when they hear a loud explosion and see a cloud of stones flying upward. They go to the spot and find a circular area, 16 feet across, that has been swept clean of vegetation. (“A Curious Phenomenon,” Rock Hill (S.C.) Herald, July 7, 1880, p. 4)

Early July — A train is running on the Chattanooga Railroad near Murfreesboro, Tennessee, in a thunderstorm when the engineer sees a large ball of fire rushing down the rails to the engine. As it passes under the locomotive, he feels a shock that jars the entire train. There is a loud explosion “opposite the ladies’ car” and a telegraph pole is splintered from top to bottom. (“Passengers Shocked by Lightning,” Memphis (Tenn.) Public Ledger, July 15, 1880, p. 2; Mark Rodeghier, “UFO/Vehicle Very Close Encounters,” IUR 27, no. 1 (Spring 2002): 5)

July 28 — 6:00 p.m. C. A. Youngman and Ben Flexner are looking out a drugstore window at 2nd and Chestnut streets in Louisville, Kentucky, when they see something in the air coming from the direction of the Ohio River bridge. As it approaches them, it appears to be a man surrounded by machinery, which he is working with his hands and feet. The object is too high to make out the details of its construction. The man moves off to the south, pedaling constantly. Around 8:00 p.m., the Royster family of Madisonville, Kentucky, watches a circular flying object with a ball at each end moving above the train depot. (“More Monkeying,” Louisville (Ky.) Courier-Journal, July 29, 1880, p. 4; “The Flying Machine,” Louisville (Ky.) Courier-Journal, August 6, 1880, p. 4)

September 30 — 9:45 p.m. A brilliant object is seen crossing the sky in Columbus, Georgia, at a very low altitude. Coming from the south, it heads northeasterly in a horizontal line. It appears made of three perfectly developed balls of an equal size and equidistant from each other. The first ball emits a tail that envelops the two following and extends behind them. The tail is luminous except at the far end, where it is indistinct and nebulous. It is visible for a full 50 seconds and continues on its course without falling. (“Wonders of a Meteor,” Marion (Ohio) Star, October 5, 1880, p. 3)

1881

Late October — An unusual fall of spider web occurs near the coast of Lake Michigan at Milwaukee, Green Bay, Fort Howard, Sheboygan, and Ozaukee County, Wisconsin. The webs seem to come from “over the lake” and fall
from a great height. The strands are from 2 feet to several yards long, strong in texture, and very white. No spiders are seen. ("A Rain of Spider Webs," *Scientific American* 45 (1881): 337)

### 1882

July 6 — 10:30 p.m. Amateur astronomer N. S. Drayton in Jersey City Heights, New Jersey, watches a red object without a trail move across the sky from the constellation of Ursa Minor to Capricorn in 45 seconds. (N. S. Drayton, "A Supposed Meteor," *Scientific American* 47 (July 22, 1882): 53)

### 1883

February 5 — 6:45 p.m. A witness at Lake Glasfjorden, near Arvika, Sweden, spots a meteor-like object high on the horizon moving from southeast to northwest. It makes several minor course changes, varies its color from white to yellow, and emits some sparks. After 18 seconds, it changes its course to the southeast and is so low to the ground that its light is reflected in the lake. By this time, it has a distinct tail. Total duration is 50 seconds. ("On February 5, at 6.45 p.m.," *Nature* 27 (March 1, 1883): 423)

August 12–13 — Astronomer José Árbol y Bonilla, director of the El Cerro de la Bufa Meteorological Observatory in Zacatecas, Mexico, is observing the sun by eyepiece projection when he and an assistant see a large number of small bodies crossing the solar disc. Over the course of two days, they count a total of 447 dark objects. They seem bright as they approach the sun but are dark as they move across its face. He takes several photographs and suspects that they are relatively near the earth. Mexican astronomers in 2011 suggested that a comet may have split into several pieces; these objects were estimated to have had a size of between 150 and 3,350 feet, and to have passed only 334 to 5,000 miles from the Earth; they thought a fragmented Comet 12P/Pons-Brooks was one possibility, in which case Earth barely avoided multiple Tunguska events or even a mass extinction; this was reported in the media and disputed in October 2011; but the source of these objects could also have been comet C/1883 D1 (Brooks-Swift) or even a third, unknown comet that year; the event also coincided with the annual Perseid meteor shower; even migrating birds cannot be ruled out. (José Á. y Bonilla, “Passage sur le disque solaire d’un essaim de corpuscles,” *L’Astronomie* 4 (1885): 347–350; Hector Javier Durand Manterola, Maria de la Paz Ramos Lara, and Guadalupe Cordero, “Interpretation of the Observations Made in 1883 in Zacatecas (Mexico): A Fragmented Comet That Nearly Hits the Earth,” *Earth and Planetary Astrophysics* (2011); “Billion-Ton Comet May Have Missed Earth by a Few Hundred Kilometers in 1883,” MIT Technology Review, October 17, 2011; “Did a Massive Comet Almost Wipe Out Humans in 1883?,” *The Week*, January 8, 2015; “OT-1883 Zacatecas Observation of Objects before Sun Were Not 12P-Pons-Brooks Fragments,” October 17, 2011; Phil Plait, “Did a Fragmenting Comet nearly Hit the Earth in 1883? Color Me Very Skeptical,” *Bad Astronomy*, October 17, 2011; Martin Shough and Wim van Utrecht, *Redemption of the Damned*, vol. 1, Anomalist, 2019, pp. 189–207)

### 1884

June 6 — 1:00 p.m. Rancher John W. Ellis and some of his ranch hands in south-central Dundy County, Nebraska, allegedly see a blazing object fall from the sky and crash into many pieces, burning the grass and fusing the sand. The light is so intense it blinds one of them. The newspaper suggests it is a “vessel belonging originally to some
other planet.” The remains of the object are said to have dissolved in a rainstorm. However, the tale is actually a fictional story written by a correspondent in Benkelman. (“A Celestial Visitor,” Lincoln (Neb.) Daily State Journal, June 8, 1884, p. 5; “The Magical Meteor,” Lincoln (Neb.) Daily State Journal, June 10, 1884, p. 4; Jerome Clark, “Spaceship and Saltshaker,” IUR 11, no. 6 (Nov./Dec. 1986): 12, 21; Clark III 593)

July 3 — 8:30 p.m. L. C. Yale of Norwood, New York, watches an object with a long tail move slowly from east to west. It has a “nucleus like a globe, as large as the moon, surrounded by a bright ring, two dark lines crossing the nucleus in vertical direction, the lines larger in the middle, straight on inside, curved on outside, tapering both ways to points.” The general appearance is of a “gigantic sword of fire, moving handle first.” (“A Great Meteor,” Illustrated Science Monthly 2 (1884): 136)

1885

February 16 — Night. During a severe snowstorm, a bright light suddenly flashes in the high rocks on the Pennsylvania side of the Delaware River some five miles northwest of Port Jervis, New York. The snow-covered hill glows like red-hot iron for several feet around, gleaming through the storm for several minutes, then growing dim and disappearing. (“Mysterious Light,” Wichita (Kan.) Beacon, March 25, 1885, p. 1)

February 25 — 5:00 a.m. Sailing in the North Pacific some 800 miles west of Victoria, British Columbia, Captain John Waters of the barque Innerwick and his mate see the sky turning fiery red. Suddenly a large fireball appears above the ship and falls hissing into the sea about 150 feet away from them, causing a wave of water to impact the ship. Electrical discharges run through the rigging and the masts. (“Frightful Experience at Sea,” Sacramento (Calif.) Record-Union, March 3, 1885, p. 1; “Notes and News,” Science 5 (1885): 242–243; Martin Shough and Wim van Utrecht, Redemption of the Damned, vol. 2, Anomalist, 2021, pp. 177–199)

1886

1886 — French novelist Jules Verne publishes Robur the Conqueror, which describes the appearance of mysterious objects and strange lights in the sky all over the world. It turns out that the sightings are of a flying machine, invented by the novel’s anti-hero Robur, who kidnaps people and takes them on board the airship. (Wikipedia, “Robur the Conqueror”)

October 24 — Night. Nine persons who are sleeping in a hut some 10 miles from Maracaibo, Venezuela, are awakened by a loud humming noise and a dazzling light that illuminates the interior. The people begin to pray but they start vomiting as extensive swellings appear on the upper part of their bodies, especially around the face and lips. They feel no heat, although the light has a smoky appearance and a peculiar smell. The next morning, the swellings subside but leave black blotches. By November 2, the skin peels off and the blotches are round sores. Portions of their hair falls off. Trees around the hut show no damage until November 2, when they suddenly wither. The symptoms are similar to those of ionizing radiation syndrome. (Warner Cowgill, “Curious Phenomenon in Venezuela,” letter, Scientific American 55 (December 18, 1886): 389; Clark III 949; Patrick Gross, UFO Reports from the Past)

1887

March 19 — 5:00 p.m. Captain Cornelis Dirks Swart of the Dutch bark J.P.A. sees a “meteor in the shape of two balls” during a storm in the North Atlantic about 590 miles northeast of Bermuda. One ball is black and the other is luminous and oblong. The luminous object descends with a roar and lights up the ship and surrounding water. The crew feels heat from the object even as solid lumps of ice fall on the deck and the rigging becomes iced. The side of the ship where it falls turns partially black and the copper plating is blistered. The wind increases to “hurricane force.” (“Rare Electrical Phenomenon at Sea,” American Meteorological Journal 4 (July 1887): 98–99; Chris Aubeck and Martin Shough, Return to Magonia: Investigating UFOs in History, 2015, pp. 205–217; Martin Shough and Wim van Utrecht, Redemption of the Damned, vol. 2, Anomalist, 2021, pp. 201–210)
November 12 — Midnight. Captain R. F. Moore of the English steamer SS Siberian, sailing 10 nautical miles off Cape Race, Newfoundland, watches an enormous fireball rising from the sea to the height of 15 feet. It travels against the strong wind and come close to the ship, then turns to the southeast and disappears. The object is seen for about 2 minutes. Moore says he has seen this phenomenon before and considers it a sign of stormy weather. ("Globular Lightning," Science 10 (1887): 324; Thomas Corwin Mendenhall, "On Globular Lightning," American Meteorological Journal 6 (February 1890): 437, 442–443; Theo Paijmans, "Fiery Objects Rising from the Oceans," Charles Fort Institute Blogs, July 6, 2007; Martin Shough and Wim van Utrecht, Redemption of the Damned, vol. 2, Anomalist, 2021, pp. 151–174)

1888

Early September — 3:15 p.m. During a severe thunderstorm, after a flash of lightning and a peal of thunder, witnesses see a huge flame at Highland Lake, near Winsted, Connecticut. The water is parted for yards by a huge ball of fire at least 10 feet in diameter, and billows rise on either side to a height of 20 feet. The light moves toward the head of the lake with great velocity. When it is within 100 yards of the shore, another flash of lightning strikes, and the fireball disappears. The waters of the lake remain disturbed for hours. ("A Ball of Fire on a Lake," Hagerstown (Ind.) Exponent, September 12, 1888, p. 3)

1889

February 7 — 6:00 p.m. A cylindrical luminous object passes over Oella, Maryland, at only several hundred feet altitude. It lights up the village "as brilliantly as if by a strong electric lamp." It curves and appears to descend to the ground one mile away. It follows the course of the Patapsco River to the north for several seconds. ("A Brilliant Meteor," Washington (D.C.) Evening Star, February 9, 1889, p. 6)

1891

June 13 — Day. An unnamed witness claims to see a “meteor” explode with a loud noise over the Wasson & Miller flour mill and cotton gin in Dublin, Texas. The object looks like “a bale of cotton suspended in the air after having been saturated in kerosene oil and ignited, except that it created a much brighter light” that dazzles people standing several hundred feet away. The object shatters into pieces before it hits the ground, the fragments setting the grass and weeds on fire. In addition to the fragments is a scrap of paper with writing in a strange language. ("Dublin 1891," Texas UFO Museum and Research Library, February 5, 2014)

July 12 — 7:00 p.m. Residents of Theodore Street in Ottawa, Ontario, see over the rifle range a cigar-shaped balloon with a bright light on one end and a fan on the other traveling from south to north. (MacLeod (Ont.) Gazette, July 16, 1891; Clark 45)

September 2 — 8:00 p.m. Alonzo M. Swan and L. D. Dodson (an equestrian recovering from an illness) are camped in Coyote Canyon [now within the Sandia National Laboratory complex], New Mexico, to benefit from the mineral springs there when they see a brilliant light rise above a mountain to the south. As it moves closer against the wind, they see it has a series of “electric arc lights” around it and a “pole” or rudder that is similarly lit. The object is in view for nearly two hours. Another lighted object appears from the southwest and approaches the first object, but clouds prevent any further observation. Swan sees a lighted object again on September 4, although this time it could be a star. ("Strange Mid Air Ships," Albuquerque (N.Mex.) Weekly Citizen, September 12, 1891, p. 3; Chris Aubeck and Martin Shough, Return to Magonia: Investigating UFOs in History, Anomalist, 2015, pp. 219–237)

1892

January? — George W. Crusselle and S. D. Cuthereil from the USS Thetis are wandering among the salt water lagoons on the west coast of Baja California, Mexico, when they see a luminous object with smooth edges about 30 feet in
diameter approaching from the ocean at an altitude of 50 feet. It changes shape from circular to an hourglass and moves swiftly to the surface of a lagoon, covering it with a “brilliant halo of light.” It rises moments later, changing its shape frequently, and moving swiftly in a zigzag fashion. After 15 minutes it disappears inland. (George W. Crusselle, “The Coast Survey,” Atlanta Constitution, April 10, 1892, p. 9)

March 23 — Evening—1:00 a.m. Residents of Warsaw, Poland, watch a balloon over the city that casts rays of light from an electrical apparatus. It remains stationary until 1:00 a.m., then it takes off to the west. Other supposed balloons are seen March 22 or earlier over Kaunas Fortress, Lithuania; and Modlin Fortress (in Nowy Dwór Mazowiecki), Sosnowiec, Dąbrowa Górnicza, and Dąbrowice, Poland. As they remain stationary for as long as 40 minutes, some assume they are piloted by German spies. (“Spying by Balloon,” New York Evening World, March 25, 1892, p. 1; “Balloons As German Spies,” New York Times, March 26, 1892, p. 3; “Steering Military Balloons,” Birmingham Daily Post, March 31, 1892, p. 8; Clark 45; Brett Holman, “The Phantom Balloon Scare of 1892,” Airminded, July 11, 2009)

April 16 — Witnesses at Przemyśl Fortress, Poland, see a bright point of light in the north that seems to be a sphere emitting searchlight beams above and below it. The object is hovering at an altitude of 2,100 feet and begins circling. (Poland 7–8)

June 1 — Night. A large balloon carrying a searchlight and four passengers passes over Newark, New Jersey, descending as low as 20 feet from the ground. (Trenton (N.J.) Times, June 2, 1892; Clark III 70)

June 19 — Night. J. L. Shaw of Conyers, Georgia, sees a mysterious light in the sky from which balls of fire fall to the ground near him. (“Saw Balls of Fire,” Atlanta Constitution, June 21, 1892, p. 10)

August 30 — 11:00 p.m. Several people in Waxahachie, Texas, see a “kind of balloon” with colored lights passing over the northern part of the city after hearing a man shouting a greeting. (“What Was It?” Galveston (Tex.) Daily News, September 2, 1892, p. 6; Clark III 70)

September 20 — Large quantities of a white, thread-like substance fall from the sky during a rainstorm at Gainesville, Florida. Samples are sent to arachnologist George Marx of the US Department of Agriculture, who performs a chemical analysis that shows it to be from migrating spiders. (“Spider Web from the Clouds,” Scientific American 67 (1892): 325)

1893

February 24–25 — 10:00 p.m. Charles James Norcock, captain of the corvette HMS Caroline, is sailing about 16 miles south of Jeju Island, South Korea, in the Korea Strait when the officer of the watch observes some round lights resembling “Chinese lanterns festooned between the masts of a lofty vessel.” They are moving slowly north and appear to be in the air between the ship and the Hallasan volcano on Jeju. They are visible until roughly 12:00 midnight, sometimes appearing as a mass, other times strung out more in an irregular line. The ship’s crew observes them again the next night as they are sailing east from Port Hamilton [now the Korean islands of Geomundo]. This time they are visible until dawn. Although there are some odd characteristics of this observation, the likeliest explanation is that they are inferior mirages of distant fishing boats, as atmospheric conditions are favorable on these dates. (Charles J. Norcock, “An Atmospheric Phenomenon in the North China Sea,” Nature 48 (1893): 76–77; Martin Shough and Wim van Utrecht, Redemption of the Damned, vol. 1, Anomalist, 2019, pp. 253–281)

August 18 — Sunrise. People living near the small hamlet of Leslie in Cumberland County, Kentucky, notice that the sun has a peculiar color. Thousands of small discs, seemingly about the size of a wagon wheel, appear in the sky, all of them in motion. They appear round in shape from far away, but when closer to the ground they change to triangles, squares, or odd forms. Their colors vary: Some are bright red, others green or black, but when they are close to the ground they are all a deep purple color. All are silent. The phenomenon lasts about one hour, during which time the villagers fear it is judgment day. (“Judgment Day,” St. Louis Globe-Democrat, August 20, 1893, p. 9)
1894

February? — Capt. Corning of the British schooner *W. and H. Witherspoon* sees several lights rise from the Gulf of Mexico off the west coast of Florida. They ascend to a height of 25 feet, explode, and disappear. ("Cum Grano Salis,” *Lowell (Mass.) Daily Sun*, February 8, 1894, p. 1)

May — During the opposition of Mars, the idea that Schiaparelli’s *canali* are really irrigation canals made by intelligent beings is first hinted at, and then adopted as the only intelligible explanation, by American astronomer Percival Lowell in Flagstaff, Arizona, and a few others. The visible seasonal melting of Martian polar icecaps fuels speculation that an advanced alien race indigenous to Mars has built the canals to transport the water to drier equatorial regions. Newspaper and magazine articles about Martian canals and “Martians” capture the public imagination. Lowell publishes his views in three books: *Mars* (1895), *Mars and Its Canals* (1906), and *Mars As the Abode of Life* (1908). He remains a strong proponent for the rest of his life of the idea that the canals were built for irrigation by an intelligent civilization. (Wikipedia, “Martian canal”)

June 7 — Astronomers Percival Lowell and William H. Pickering at Lowell Observatory in Flagstaff, Arizona, see two “dazzling white specks” for a few moments on the south polar cap of Mars. The most likely explanation is the reflection of sunlight from ice on the surface or ice crystals in clouds. (Percival Lowell, *Mars*, Houghton, Mifflin, 1897 ed., pp. 86–87)

July 20 — Sunset. Bernard Parry and his wife are near Marriott [now Marriott-Slaterville], Utah, when they see a “small black cloud” in the northeast quickly approaching them. It grows bigger, then smaller, as they watch it. When it is only 450 feet away, it stops and hovers. Its sides seem to be folded up toward the center. Many small black-and-white objects (birds?) are moving in its center. Suddenly the object pivots to the east and moves away toward Ogden. (*Ogden (Utah) Standard*, July 26, 1894)

Late November — 11:00 p.m.–2:00 a.m. Mennonite farmers Henry W. J. Smith and Benjamin W. Blue see a luminous ball in the northeastern sky about 30° above the horizon some 3 miles west of Manchester, Kansas. The object, in the shape of a “casket,” shoots toward the west 3° then returns to its original position. As it maneuvers near them, it opens several times, revealing various entities each time, from a crowned man to a “haughty woman” and a military leader. The original report appears in the *Evangelical Visitor*. (“Battle in the Heavens,” *Wilkes-Barre (Pa.) Times*, October 6, 1894, p. 6)

1895

1895 — French parapsychologist Albert de Rochas is asked to hypnotize a family friend, “Mireille,” who is suffering from some ailment. In one of her sessions, Mireille describes how she is rising in space, which she describes as luminous and peopled with phantoms. Subsequent sessions reveal that she has visited Mars and other planets in astral form. Mars has canals, of course, but also Martians who are less intelligent than earthlings. (Hilary Evans, “Martians of the 1890s,” *IUR* 11, no. 5 (Sept./Oct. 1986): 8–9)

August — US psychical researcher James Hyslop begins investigating a case of automatic writing by Sarah Harper Cleaveland (“*Mrs. Smead*)” in Onondaga County, New York. She keeps records of her planchette experiments and puts them at Hyslop’s disposal. In August, she makes several references to the planet Mars and Jupiter. She provides a crude map of Jupiter’s surface, and the planet is said to be the “babies’ heaven.” At the next sitting, she draws a map of Mars, the different zones named in the Martian language; she gives several communications about the inhabitants and the canals. Martian revelations cease for another 5 years until September 1900, when the communications return in a developed state. She draws men, boats, houses, and flowers, named in Martian and written in hieroglyphic characters. Some of the sketches (a self-winding double clock) are very ingenious, while others (a Martian airship) are peculiar but unconvincing. (Hilary Evans, “Martians of the 1890s,” *IUR* 11, no. 5 (Sept./Oct. 1986): 6–7)

August 31 — 8:00 p.m. *Oxford English Dictionary* lexicographer James Murray watches a “brilliant luminous body” move slowly over the Oxford University campus in Oxford, England, toward the east. At roughly the same time, other observers in London see a similar meteor pass over slowly for about 5 minutes, and A. Warren Melhuish
1896

July 1 — 6:00 p.m. A mysterious balloon passes over Winnipeg, Manitoba, to the east at an estimated 2,000 feet. It is lost to view after 20 minutes (“A Mysterious Balloon,” Winnipeg Manitoba Morning Free Press, July 2, 1896, p. 4; “They Think It’s Andreé’s,” Chicago Tribune, July 2, 1896, p. 1; Clark III 70)

July 3 — The chief of the Kispiox people and a group of Canadian trappers see a brightly lit balloon traveling north near Blackwater Lake, British Columbia. The same day, a First Nations boy sees something similar at the Skeena River, British Columbia. (“It Was No Dream,” Winnipeg Manitoba Morning Free Press, August 13, 1896, p. 2; Brett Holman, “Believing Is Seeing,” Airminded, May 2, 2010)

Mid-July — Night. Chester N. Crotzenburg, a postal clerk on the Chicago, Rock Island, and Pacific Railway, is on a train heading north from Princeton, Missouri, when he notices a round, dull-rose-colored light low on the western horizon. It then rises in height to 45°, and appears to be pacing the train, keeping a half-mile or one mile distance. After the train reaches Lineville, Iowa (13.7 miles away), it passes out of sight behind buildings. Possibly the moon. (“Ball Lightning,” Monthly Weather Review 26 (August 1898): 358; Martin Shough and Wim van Utrrecht, Redemption of the Damned, vol. 1, Anomalist, 2019, pp. 291–304)

August 11 — Charles Abbott Smith of San Francisco, California, is granted a patent for a cylindrical airship with a cone-shaped bow, “two wings hinged at the upper part of the vessel,” and a compartment for machinery and passengers. (US Patent, “Air-ship,” granted August 11, 1896)

October — Evening. A Miss Hagstrom is riding a bicycle on Telegraph Avenue in Oakland, California, when she notices an object with a powerful headlight moving toward the west and gradually descending. (“Saw the Mystic Flying Light,” San Francisco Call, November 22, 1896, p. 13)

Late October — Fruit rancher Constant T. Musso and his family in Bowman, California, watch three bright lights moving toward the east at about 100 mph. (“Mission of the Aerial Ship,” San Francisco Call, November 25, 1896, p. 1)

Early November? — Evening. Some of the employees at the Sutro Heights estate [now Sutro Heights Park in the Richmond District] of San Francisco, California, Mayor Adolph Sutro watch a brilliant light approaching from the sea at a height of 500 feet. Two lights are visible, one a “misty-looking mass” and the other a searchlight. The object disappears in the direction of the city and turns to the north just before it passes from view. Another report suggests that the object passe over Seal Rocks and shone its searchlight on the seals. (“The Apparition of the Air,” San Francisco Call, November 24, 1896, p. 1)

Early November — 8:00 p.m. Louis Charmak and one other person in Woodland, California, notice three bright lights in the southwestern sky moving toward the northeast. As they reach Main Street, they rise another 100 feet in the air. They are close together and followed by a white trail of light. (“Was It an Airship?” Woodland (Calif.) Daily Democrat, November 24, 1896, p. 3)

November 17 — Afternoon and evening. A mystery airship wave begins in California when residents of the Oak Park neighborhood of Sacramento see a high-flying object moving slowly in a circle, leaving a trail of smoke. Around 6:30 p.m., a light resembling an electric arc lamp appears in the night sky above Sacramento. Horse trainer David Carl notices it close to the ground and hears a voice saying, “We are too low down here. Send her up higher.” Hundreds watch as it passes at low altitude for 30 minutes, avoiding buildings and hills. Some people claim to hear voices, either arguing or singing. R. L. Lowry sees four men pushing the vessel by its wheels. The witnesses include streetcar workers Charles Lusk and Granville C. Snider, who watch the object rise and fall as it moves southwest. (Wikipedia, “Mystery airship”; “Voices in the Sky,” Sacramento (Calif.) Evening Bee, November 18, 1896, p. 1; “Strange Craft of the Sky,” San Francisco Call, November 19, 1896, p. 1; Loren E. Gross, UFOs: A History, 1896, The Author, 1974; Thomas E. Bullard, The Airship File, The author, 1982; Clark III 70–75)

November 20 — Afternoon. D. H. Risdon is working in an orchard near Tagus, California, when he spots an object “like an immense sheet” moving against the wind at a “considerable elevation.” (“Saw the Mystic Flying Light,” San Francisco Call, November 22, 1896, p. 13)

November 20 — 5:30 p.m. Passengers on a streetcar in Oakland, California, notice a “peculiar-looking contrivance” high in the sky and moving in a westerly direction toward San Francisco. It has a powerful headlight and another light
on the bottom. It is also seen over Folsom, San Francisco, Sacramento, Modesto, Manteca, Sebastopol, and several other cities later in the evening and is reportedly viewed by hundreds of witnesses. ("Saw the Mystic Flying Light," San Francisco Call, November 22, 1896, p. 13; Wikipedia, “Mystery airship"

November 22 — San Francisco attorney George D. Collins announces that he represents the airship inventor, a “very wealthy man who has been studying the subject of flying machines for fifteen years” and who moved to California from Maine in 1889. He claims the airship is a 150-foot metal contraption with two canvas wings 18 feet wide and shaped like a bird’s tail. It has been built in Oroville and is now hidden in the San Francisco, California, area as the inventor deals with technical problems. However, people in Oroville sense a hoax, as they know of no such inventor. On November 24, Collins complains to the San Francisco Call that another newspaper, the San Francisco Examiner, has been printing falsehoods about him, including an interview with another attorney, Frederick Bradley. Suspicion falls on an itinerant dentist from Maine, Elmer H. Benjamin, who insists his only inventions are dental fittings. A prominent citizen of Oakland, George H. Carleton, claims to know the inventor but has been sworn to secrecy. Former California Attorney General William H. H. Hart soon claims to represent the mystery inventor, who has fired Collins for talking too much. But Hart is also babbling prolifically, saying that two or three airships exist (a second built in an eastern state) and his role is to “consolidate both interests.” Hart asserts that the airship can carry four men and 1,000 pounds of dynamite for dropping on Havana, Cuba. (Clark III 71–73; “A Lawyer’s Word for That Airship,” San Francisco Chronicle, November 22, 1896, p. 36; “Collins Sticks to His Airship Story;” San Francisco Chronicle, November 23, 1896, p. 12; San Francisco Chronicle, November 24, 1896, p. 9; “Have We Got ‘Em Again?” Sacramento Bee, November 23, 1896, p. 1; “Coy Mr. Collins and His Airship,” San Francisco Chronicle, November 24, 1896, p. 9; “The Apparition of the Air,” San Francisco Call, November 24, 1896, p. 1; “Mission of the Aerial Ship;” San Francisco Call, November 25, 1896, p. 1; “Hart Stands by His Ship;” “Hart Confirms the Story from Sacramento,” San Francisco Call, November 26, 1896, p. 1; “Three Airships, Says Hart,” San Francisco Call, November 29, 1896, p. 1; Michael Busby, Solving the 1897 Airship Mystery, Pelican, 2003, pp. 249–315)

November 22 — 5:30 p.m. Another mystery light moving in a wavering fashion toward the southwest is seen in Sacramento, California, by many people. At times it disappears, then flashes out again with renewed brilliance. Edward Carragher, owner of the Saddle Rock Restaurant, views the light through binoculars and is able to see a large object supporting an arc lamp. Cigar store vendor Jacob Zemansky watches the undulating light through a telescope until it fades into nothingness. ("Have We Got ‘Em Again?" Sacramento Bee, November 23, 1896, p. 1; “A Winged Ship in the Sky,” San Francisco Call, November 23, 1896, p. 1)

November 22 — 7:05 p.m. M. H. Cohen, a conductor on the Hayes Street line, sees an aerial light at about 300–400 feet altitude when he is at Market and 8th streets in San Francisco, California. Other people on the streetcar also watch the light, which is moving across the Golden Gate and flashing periodically. When the streetcar disembarks at 1st Street at 7:13 p.m., Cohen and the others see the light over the Twin Peaks downtown. At the top of Pierce Street hill, Cohen sees it returning from Twin Peaks, and at 7:51 p.m. he watches it from Ashbury Street. Airships are seen later at Oakland, Alameda, San Leandro, San Jose, California, and Tacoma, Washington. ("The Apparition of the Air," San Francisco Call, November 24, 1896, p. 1)

November 23 — 7:00 p.m. A bright light is seen west of Chico, California, traveling to the northwest. The same or similar light is seen west of Red Bluff, California flying west at about 2,000 feet. After a few minutes it descends to 1,000 feet. It disappears over the Coast Range. ("Mission of the Aerial Ship;" San Francisco Call, November 25, 1896, p. 1)

November 24 — 6:45 p.m. Several passengers on a train crossing the bay from San Francisco to Oakland, California, see an airship alternately stop, hover, and move on. Minutes later, 6th Street in Oakland is overflowing with onlookers as the object passes above Broadway, flashing its light. One spectator is watching through binoculars and says the airship’s turns causes the searchlight to shine in different directions. Among the witnesses are Col. Thomas F. Garrity, city electrician George H. Carleton, George Hatton of the Oakland Tribune, and Melvin Holmes. (“Mission of the Aerial Ship," San Francisco Call, November 25, 1896, p. 1)

November 25 — Evening. A mystery light flies in circular patterns around Sacramento, California, at a rapid rate of speed. Observers include Deputy Secretary of State George A. McCalvy, District Attorney Frank D. Ryan, and E. D. McCabe, the governor’s personal secretary. It is three times as large as Venus, also visible. The light is observed for 20 minutes then reappears later in the evening. A Professor Dodge of Galt, California, claims he can make out the “outlines of a dark body” just above the light. (Clark III 73; “Hart Confirms the Story from Sacramento," San Francisco Call, November 26, 1896, p. 1)

November 25 — 6:00 p.m. Col. H. G. Shaw and Camille Spooner are riding in a carriage near Lodi, California, when their horse stops suddenly. Looking up, they see three slender beings about 7 feet tall. Shaw walks up to them and asks them where they are from; they reply in an odd warbling language. He notes that they are hairless and wear no
apparent clothing. The eyes are large and lustrous, and they each seem to be carrying and egg-shaped light and a breathing apparatus under the left arm. Shaw claims the beings try to lift him but they are not strong enough. They then notice a 150-foot airship hovering 20 feet above the water close to a bridge. The three beings float to the craft, open a door in the side, and disappear inside. The ship flies quickly out of sight. Shaw speculates that the beings are from Mars. (“Three Strange Visitors,” Stockton (Calif.) Evening Mail, November 27, 1896, p. 1; Patrick Gross, UFOs in the Daily Press)

November 26 — 7:00 p.m. Farmer John Bawl and his family see an airship moving to the southwest over his residence on Monroe Street near Franklin Street in San Jose, California. It is lunging sharply from side to side and has a pair of flapping wings and a red light on the bottom. Musician and President of the University of the Pacific Moses Smith Cross also sees the strange aerial light when he is visiting a colleague two blocks away. (“It Flitted over San Jose,” San Francisco Call, November 28, 1896, p. 1; “Three Airships, Says Hart,” San Francisco Call, November 29, 1896, p. 1)

November 26 — 8:00 p.m. Electrician Case Gilson and three other men see an unlighted airship in a clear sky 1,000 feet over Oakland, California. It is flying northward against the wind and looks like a “great black cigar with a fishlike tail.” The body is at least 100 feet long and looks as if it is made of darkened aluminum. It is seen again at 8:30 p.m. and disappears in the direction of San Francisco. (Clark III 73; “Says He Saw It,” Oakland (Calif.) Tribune, December 1, 1896, p. 1; “Saw the Airship at Close Range,” San Francisco Call, December 2, 1896, p. 14)

November 27 — 10:00 p.m. A prominent attorney and others in Woodland, California, see a cluster of lights attached to an apparent airship moving at an altitude of about 500 feet at about 25 mph. It remains visible for an hour. (“More Airship Stories,” Woodland (Calif.) Daily Democrat, November 29, 1896, p. 2)

November 28 — Percy Drew watches an enormous airship with a red light over Oakland, California. (“Says He Saw It,” Oakland (Calif.) Tribune, December 1, 1896, p. 1)

December 1 — Harry Lytle watches an airship as it flies toward the southwest over the Coast Ranges 3 miles north of Rumsey, California. He claims to recognize it as an “aircycle,” kind of a winged balloon with a pedal-driven propeller, plans for which he submitted to E. W. Brown of Davis, California, and which they constructed in 1893. He calls it the Nonesuch. On an alleged test flight to Los Angeles on March 2, 1893, the device was stolen by some “hoboes.” He assumes the airship is his stolen invention. (“The Mystery Solved,” Woodland (Calif.) Daily Democrat, December 8, 1896, p. 3)

December 4 — 6:30 p.m. Travelers on a freight train between Dixon and Elmira, California, see two large, bright lights moving parallel with them at about 1,000 feet altitude. The lights outdistance the train and disappear to the southwest. (Clark III 74; “The Airship Again,” Woodland (Calif.) Daily Democrat, December 7, 1896, p. 3)

December 26 — Early morning. Dairy farmer Ezekiel Sergeant and a hired man have just finished milking their cows near Wilmington, Delaware, when they hear strains of music in the air. Then a bottle falls at Sergeant’s feet and breaks into pieces. He sees an enormous, fish-shaped airship with extended wings, a large tail, and a bright searchlight. Amid the shattered glass he finds a slip of paper allegedly written by Capt. James Dashiel and Thomas Murphy on the airship Icarus that is sailing from Salt Lake City to Cuba. (“Saw an Air-Ship,” Philadelphia (Pa.) Times, December 28, 1896, p. 5)

1897

Mid-January — Just after sunset. People in Acampo, California, see an airship the size of a small house, seemingly built of canvas, and moving to the southeast. It looks “like a cigar box with a spark of fire in it.” (“Airship Reported Again,” Stockton (Calif.) Evening Mail, January 22, 1897, p. 5)

January 31 — 9:30 p.m. A “large, glaring light,” apparently from an airship, is seen for nearly 30 minutes west of Hastings, Nebraska, hovering, ascending, descending, and moving at a “most remarkable speed.” (“See an Air Ship at Hastings,” Omaha (Neb.) Daily Bee, February 2, 1897, p. 2)

February–July — The mystery airship wave continues, from Nebraska and Colorado to Texas and Ohio. Hoaxes and pranks pollute the information pool in a major way during this era and the planet Venus and other celestial objects undoubtedly play a major role, but many airship reports emanate from manifestly sober, puzzled citizens, and they continue long after the initial excitement subsides. To all appearances, they are objects of some kind, but since newspapers rarely question witnesses critically about details at this time, little can be deduced from the mass of reports. (Loren E. Gross, The Mystery of Unidentified Flying Objects—A Prelude, 1896–1949, The author, 1971; Roger L. Welsch, This Mysterious Light Called an Airship: Nebraska Saucer Sightings, 1897, Nebraska
February 4 — Night. A bright fireball appears in the west over North Loup, Nebraska, moving up and down erratically. It occasionally throws out sparks. (“That Strange Light Again,” Lincoln Nebraska State Journal, March 16, 1897, p. 5)

March 13 — Night. A bright fireball appears in the west over North Loup, Nebraska, moving up and down erratically. It occasionally throws out sparks. (“That Strange Light Again,” Lincoln Nebraska State Journal, March 16, 1897, p. 5)

March 14 — 9:30 p.m. An object with a “big engine headlight” flies over South Omaha, Nebraska, and remains visible for 30–40 minutes. It is moving to the west and disappears behind some buildings. One of the witnesses is Isaac J. Copenhagen, a compositor for the Omaha Bee. (“Visions of an Air Ship,” Omaha (Neb.) Daily Bee, March 16, 1897, p. 7)

March 23–26 — Night. Residents of Belleville, Kansas, watch a lighted airship moving at 75 mph and “lighting up the houses and city like an immense meteor.” It hovers for 20–30 minutes, changes direction, and is seen on four nights in succession. At 9:20 p.m. on March 25, workers at the Chicago, Rock Island, and Pacific Railroad depot and others in Belleville watch a bright light pass above the city for 45 minutes. It disappears to the northwest and reappears two more times. (“Say They Saw an Air-Ship,” Kansas City (Mo.) Times, March 27, 1897, p. 5; “It Flies at Night,” Kansas City (Mo.) Journal, March 28, 1897, p. 2)

March 27 — 8:30 p.m. A blood-red light appears in the western sky over Topeka, Kansas, moving northward parallel with the horizon until after 20 minutes it disappears “with a flicker.” Among the witnesses is Kansas Gov. John W. Leedy, who describes it as a “very strange light.” Harold T. Chase, editor of the Topeka Capital, is on the State House steps with Leedy and says the object is a large, oblong shape. (“Strange Light in the Sky,” Topeka (Kan.) Daily Capital, March 28, 1897, p. 1; “Neither Star Nor Planet,” Kansas City (Mo) Times, March 29, 1897, p. 1; “Airship Is Seen by Gov. Leedy,” Chicago Tribune, March 29, 1897, p. 4)

April 1 — 8:00 p.m. Strange lights appear in the sky south of Kansas City, Kansas, zigzagging and crossing the horizon. (“Air Ship Headed toward Omaha,” Omaha (Neb.) Daily Bee, April 3, 1897, p. 9)

April 1 — 9:00 p.m. J. E. Gunn, proprietor of the Commercial Hotel, and other residents of Everest, Kansas, watch a 30-foot-long object that looks like a canoe suspended from a balloon. Two wings are visible on each side. Its light appears to dim when the object is moving and glows brightly when hovering. (“Air Ship Headed toward Omaha,” Omaha (Neb.) Daily Bee, April 3, 1897, p. 9)

April 1 — Night. Residents of Galesburg, Michigan, see a brilliant white light passing overhead. It is attached to a black object that emits a crackling sound. Human voices are heard distinctly. (“The Airship Story Spreads,” Cedar Rapids (Iowa) Evening Gazette, April 2, 1897, p. 1)

April 2 — Evening. People in Wesley, Iowa, view a cone-shaped object with windows in the side through which light is visible. It is traveling slowly toward the northwest. (“Wesley Saw the Air Ship,” Algona (Iowa) Republican, April 7, 1897, p. 8)

April 4 — 12:15 a.m. Dairy farmer Dick Butler is returning to his farm in Wolf Creek Township, Iowa, after delivering milk in Sioux City when he notices an electric-like light on his right about 200 feet away in a cornfield. He can
see a dark object with light coming through its windows. It appears to be a “long, narrow car, resembling a corset box in shape,” some 30–35 feet long and 6–7 feet high. Above the car floats a cigar-shaped bag about the same length and 8–10 feet thick. When his horses see the object, they bolt and tumble his wagon into the ditch. By the time Butler recovers, the object is moving briskly in a descent to the south. He watches it as it moves out of sight. (“Air Ship Again,” Marshalltown (Iowa) Evening Times-Republican, April 9, 1897, p. 3)

Early April — An airship allegedly lands near Elburn, Illinois, where some farmers run across it. It is made of “some light substance like aluminum.” Two aeronauts are repairing the vehicle and will only say that they are flying from the Pacific to the Atlantic by following the Chicago and North Western Railway. (“That Blooming Ship,” Rockford (Ill.) Daily Republic, April 12, 1897, p. 1)

April 6 — 2:00 a.m. James Southard gets lost on his ranch near Peru, Nebraska, looking for strayed cattle. He notices a light on a bar in the Missouri River, and it turns out to be on a landed airship 200 feet long, whose crew are apparently repairing its searchlight. The aeronauts answer all of Southard’s questions, telling him that “the craft is loaded with several tons of dynamite and is bound for Cuba” to bomb Spanish ships. (“Boarded the Airship,” Auburn (Neb.) Granger, April 9, 1897, p. 3)

April 8 — 8:00 p.m. Many people in towns along the Burlington, Cedar Rapids, and Northern Railroad from West Liberty to Cedar Rapids, Iowa, see an object with a “bright glaring headlight,” a glistening steel body, and wings on either side. It makes a hissing noise as it glides through the air. By 10:00 p.m., it fades from view to the north of Cedar Rapids. (“Airship Appears in Iowa,” Chicago Record, April 9, 1897, p. 1)

April 9 — 8:30 p.m. Hundreds of people in Chicago, Evanston, Niles Center, and Schermerville, Illinois, see an airship earing multicolored lights and swinging a huge white searchlight from side to side. Nearly 800 witnesses on Davis Street in Evanston watch the object, estimated to be 400 feet in length. Using binoculars, the outline of a structure can be seen behind the powerful light. By 9:30 p.m., the airship is last seen over South Chicago. Northwestern University astronomer George W. Hough, director of the Dearborn Observatory, tells the newspapers he is sure the airship is the star Alpha Orionis (Betelgeuse). (“See Airship or a Star,” Chicago Tribune, April 10, 1897, pp. 1–2; “California Airship on the Wing,” Chicago Tribune, April 11, 1897, p. 1)

April 10 — Evening. Witnesses in Marshfield, Wisconsin, see a cone-shaped airship with a bright headlight moving south of town. (“Hides in the Woods,” Chicago Chronicle, April 11, 1897, p. 3)

April 10 — 10:00 p.m. A noise draws residents of Platte City, Missouri, outside where they can see a hovering object 100 feet long and 20 feet wide. Two immense wings on either side are moving up and down. Greenish light beams shine down on Main Street from its back and front. Suddenly there is a hissing sound and explosions and the object moves away to the northeast. (“Saw the Airship,” Buffalo (N.Y.) Enquirer, April 12, 1897, p. 1)

April 10 — 10:30 p.m. Policemen, firemen, and many other residents of Jacksonville, Illinois, see a bright light moving swiftly from east to west a few hundred feet in the air. The light sways from side to side and throws out beams several hundred feet in length. When it is above the city, the object the light is attached to can be seen as metallic and long with possible wings. Some witnesses can hear voices. The object reverses direction over Jacksonville, throwing its searchlight in all directions, and disappears to the east. (“The Airship over Quincy,” Quincy (Ill.) Morning Whig, April 11, 1897, p. 8)

April 10 — 11:00 p.m. A bright white light with red and green lights on either side of it is observed by many residents of Quincy, Illinois, flying low above the Mississippi River on the city’s west side. At one point it is no more than 400–500 feet above the ground. The light is attached to a metallic cigar-shaped object. Two wings extend from the sides and on top is some kind of superstructure. Witnesses estimate its length to be 50–100 feet. The object ascends, moves east, then south, then west, hovers above South Park for a few minutes, then moves north and stops again. It reverses direction and leaves toward the south at “tremendous speed.” (“The Airship over Quincy,” Quincy (Ill.) Morning Whig, April 11, 1897, p. 8)

April 11 — 12:30 a.m. John Peterson, E. K. Rowley, George Moody, Bayard Taylor French, and other residents of Hawarden, Iowa, see a conical object about 60 feet long with four sets of 15-foot wings. It is flying so low (about 600 feet) that they can hear machinery, voices, and laughter. Two red lights are positioned on the tail end and a large searchlight is in the front. After three minutes it moves off to the north. (“Another Wonderful Tale,” Des Moines (Iowa) Leader, April 13, 1897, p. 3)

April 11 — 5:30 a.m. An alleged photo of an airship is taken at 4356 East Ravenswood Park in Rogers Park, Chicago, Illinois, by an ex-policeman named Walter R. McCann and George A. Overrocker, who provide copies to several newspapers. The Chicago Tribune photo editor pronounces it a fake because it looks like it is taken by a Kodak with a small lens that cannot achieve a panoramic view. A later report claims that McCann has photographed a piece of canvas on which an airship is painted. (“Airship Myth Yet Soars,” Chicago Tribune, April 12, 1897, p. 5; “Airship Is All a Joke,” Chicago Chronicle, April 13, 1897, p. 2; Wautauga (N.C.) Democrat, April 27, 1897, p. 1; Clark III 78; Wikimedia Commons, “Mystery airship 1897”)
April 11 — 12:15 p.m. Gary Carlton Jr. watches a flat object looking like a “big piece of yellow canvas” pass over Bloomington, Illinois, at a high altitude toward the northeast. (“The Air Ship,” Bloomington (Ill.) Daily Pantagraph, April 12, 1897, p. 5)

April 11 — 7:45 p.m. John Lee and others in Benton Harbor, Michigan, watch an airship rapidly moving north-northwest for 15 minutes. With the naked eye it looks like a huge ball of fire, but through opera glasses it resembles a cluster of soft yellow lights. (“Air Ship Seen Here,” Benton Harbor (Mich.) Evening News, April 12, 1897, p. 1)

April 11 — 8:00 p.m. R. G. Adams and his parents at 3126 Fourth Avenue South in Minneapolis, Minnesota, watch a lighted, cigar-shaped object flying low toward the southwest. Through binoculars it appears to be 18–20 feet long. A square light that changes from white to green to red, depending apparently on its speed, is on top. Hundreds of other people also see the object over the next four hours, maneuvering above Lake Minnetonka and eventually receding into the northeast. (“Does He Hail from Mars?” St. Paul (Minn.) Pioneer Press, April 12, 1897, p. 4; “Wonder! Mysterious Airship Seen by Stuart Mackroth,” Minneapolis Tribune, April 13, 1897, p. 1)

April 11 — 9:00 p.m. An airship approaches Milwaukee, Wisconsin, from the northeast over Lake Michigan and heads toward the southwest. It stops and hovers 1,000 feet above City Hall for 15 minutes. (“Airship Myth Yet Soars,” Chicago Tribune, April 12, 1897, p. 5)

April 11 — After 10:30 p.m. Stuart Mackroth is riding a bicycle just east of Minnetonka Mills, Minnesota, when a flying machine “shaped like an ordinary boat” passes overhead. It has red and green lights on each side and a powerful electric light in front. Inside he can see men, women, and children, all moving about “as if very busy.” (“Wonder! Mysterious Airship Seen by Stuart Mackroth,” Minneapolis Tribune, April 13, 1897, p. 1)

April 11 — 11:15 p.m. A bank clerk in Decatur, Illinois, sees an object “like two monster cigars with three bright headlights” moving to the north. (“Saw the Air Ship,” Decatur (Ill.) Evening Republican, April 12, 1897, p. 8)

April 12 — Morning. F. L. Bullard, engineer on the Fast Mail train on the Chicago, Burlington, and Quincy Railroad, says he caught sight of an airship moving parallel with the train shortly after his Engine 950 left downtown Chicago. The train is moving at 70 mph, and by the time it reaches Lisle, Illinois, the object is far ahead. Bullard estimates it is moving at 100–150 mph. (“Air-Ship Distances a Train,” St. Louis (Mo.) Globe-Democrat, April 13, 1897, p. 6)

April 12 — 8:00 p.m. During a rainstorm in Lincoln, Illinois, more than 50 people stand on Pulaski Street to watch a light moving to the northeast. John Fitzgerald sees a V-shaped object with a bright searchlight moving rapidly toward Lincoln. It changes course, the light changes from white to green, and the object disappears behind clouds. (“Was It the Airship?” Lincoln (Ill.) Weekly Courier, April 13, 1897, p. 8)

April 13 — Before sunrise. Augustus Rodgers, a farmer living two miles south of Louisville, Kentucky, goes outside to attend to his livestock. He sees an oblong object, some 40 feet long by 15 feet tall, flying about 400 feet in the air at 100 mph. His wife comes out to watch it with him, and they both see “a form like that of a man” standing in the front and directing its course. (“Airship Passed in the Night,” Louisville (Ky.) Evening Post, April 13, 1897, p. 6)

April 13 — Night. Mayor Charles Merritt Seely and other people in Canton, South Dakota, watch a winged airship passing to the north over the town with a red light in front and a green light in back. (“Airship Is Seen by Moonlight,” Omaha (Neb.) Daily Bee, April 15, 1897, p. 1)

April 13 — 11:15 p.m. Frederick Chamberlain and O. L. Jones are riding one mile west of Lake Elmo, Minnesota, when they notice a figure in a clearing, walking around as if he is looking for something. They turn off the road to investigate and hear a cracking sound followed by a rushing noise. A moment later they notice a gray-white object that looks like the top of a covered wagon. It has two rows of four red or green lights. The object rises quickly at a sharp angle to clear the treetops. They can make out no machinery or wings or rudders or even an outline of the object. In the mud, Chamberlain finds 14 footprints, each 2 feet long, 6 inches wide, “arranged seven on each side, and in an oblong pattern.” Adam Thielen, a nearby farmer, independently sees a dark object with red and green lights flying overhead about the same time. (“Adam Saw the Airship Light,” St Paul (Minn.) Pioneer Press, April 15, 1897, p. 5)

April 14 — Early morning. Marble merchant David W. Paul is traveling with a party of workmen from Burlington to Frankfort, Indiana. When they are at the middle fork of Wildcat Creek, they hear a “swishing, roaring sound” and see an object with a blinding white searchlight and smaller green and yellow lights. The object is cigar-shaped with wings or fins. It descends to just above the treetops, hovers there for a moment, then rises and noisily shoots off to the southwest. (“That Mysterious Airship,” Indianapolis Sentinel, April 15, 1897, p. 6)

April 14 — 4:30 a.m. Farmers see an airship land about 3 miles northwest of Howard City, Michigan, and some go to investigate. Inside the craft is a “strange man” dressed in heavy furs although he seems “to have no use for them, as he was almost naked and seemed to be suffering from the heat.” The man is 9.5 feet tall and speaks in a musical language that, however, sounds like bellowing. One farmer gets too close, and the giant kicks him severely enough to break his hip. (“Trip of the Airship,” Saginaw (Mich.) Courier-Herald, April 17, 1897, p. 5)
April 14 — 3:00 p.m. An airship looking like an “immense bird” approaches Gas City, Indiana, from the northwest. As it draws nearer, witnesses see that it is cigar-shaped and “propelled by broad canvas wings.” The object lands briefly one mile from town, terrifying some farm animals. As a crowd rushes toward it, it takes off and vanishes to the east. (“In Daylight,” Cincinnati (Ohio) Enquirer, April 15, 1897, p. 1)

April 14 — 3:00 p.m. A brownish cigar-shaped object with wings passes south of Marion, Indiana, coming from the northwest. Six passengers can be seen on board. (“Six Men Seen in the Airship,” Cincinnati (Ohio) Enquirer, April 15, 1897, p. 1)

April 14 — 7:30 p.m. An airship 100 feet long and 20 feet high in the center lands in a meadow three-quarters of a mile west of Birmingham, Iowa. A large crowd of men and boys sets out to examine the object, but when they are within several hundred feet, it rises with a loud whirring sound and moves away to the northwest. Two men can be distinctly seen inside, one carrying a lantern that he waves as the airship ascends. (“Airship Positively Seen,” Burlington (Iowa) Hawk-Eye, April 16, 1897, p. 2)

April 14 — 8:00 p.m. James McKensie is feeding hogs on his farm north of Casstown, Ohio, when he hears an odd noise like a flock of geese passing overhead. Looking up, he sees an object with wings and a rudder flying slowly along about 150 feet in the air, and he distinctly hears music. As it disappears, he thinks he hears a human voice, and something large and white is thrown overboard. (“Talking Heard by the Citizens,” Cincinnati (Ohio) Enquirer, April 16, 1897, p. 1)

April 14 — Just after 9:00 p.m. Farmhand John Halley and vintner Adolf Wenke see an airship land on Jefferson Street three miles west of Springfield, Illinois. They supposedly converse with one of its occupants, a bearded scientist who is outside the craft. Inside, they can see another man and a woman. The scientist says little other than “as soon as Congress recognizes Cuban belligerency his air ship would be heard from.” (“Mystery Solved,” Springfield (Ill.) News, April 15, 1897, p. 1)

April 14 — Night. Many persons in Mount Vernon, Illinois, including Mayor Barton C. Wells, allegedly see an object “resembling the body of a huge man swimming through the air with an electric light on his back.” (“Airship’s Travels,” Cincinnati (Ohio) Commercial Tribune, April 16, 1897, p. 1)

April 14 — Night. A man in Denton, Texas, is watching the stars with binoculars when he notices a shadow crossing the Moon. It is caused by a large cigar-shaped object with wings moving slowly to the southeast. In the front it has a powerful searchlight, and along the side appear a row of lighted windows. It remains in sight for 20 minutes. A woman also sees possibly the same object “bounding along through space like a balloon.” (“The Air Ship Again,” Dallas (Tex.) Morning News, April 15, 1897, p. 4)

April 14 — Night. The Rio Grande Railroad operator at Cresson, Texas, sees an object about 60 feet long and “resembling the top of a passenger coach in shape” with a powerful searchlight in the front and several smaller lights on the sides. It is moving to the southwest at a “terrific rate of speed” and has wings “something like that of a bat.” It turns to the southeast after passing the station and disappears in the clouds after a few minutes. (“Sighting the Air Ship,” Dallas (Tex.) Morning News, April 16, 1897, p. 5)

April 15 — Late evening. Telegraph repairman Patrick C. Byrnes is operating a railroad handcar about 7 miles west of Cisco, Texas, when he sees a light a little distance from the track on the south side. Knowing there is no farmhouse in the area, he goes to investigate. It is a landed cigar-shaped airship about 200 feet long and 50 feet across at its widest point. Several men are repairing its searchlight, and they tell him that the craft is loaded with several tons of dynamite for bombing Spanish troops and ships in Cuba. (“Oft-Seen Air Ship,” Fort Worth (Tex.) Register, April 18, 1897, p. 11)

April 15 — Night. An airship with red, green, and white lights lands on a farm near Eau Claire, Wisconsin. Five witnesses see an odd-looking man in a fur coat emerge and walk to a farmhouse belonging to Melvin Bannister, whose dogs are barking fiercely. The stranger points a lantern-like device at them and sends them running. Bannister answers the door and converses awkwardly with the man, who is speaking an odd language, but loans him a hammer, some nails, and a can of skim milk. The man returns the tools, along with a strange coin. The airship takes off with a whizzing sound. (“Brunswick and Drammen,” Eau Claire (Wis.) Leader, April 17, 1897, p. 7)

April 15 — 8:15 p.m. Willie Mahon, ex-Marshal French, and other residents of Dunkirk, Ohio, watch a winged object “as large as a wagon bed” pass over the town toward the east. It has propellers on each end, a red light in front, and a greenish-yellow light on the tail. Voices can be heard coming from the object. (“Seen at Dunkirk,” Kenton (Ohio) News-Republican, April 16, 1897, p. 4)

April 15 — 9:00 p.m. Residents of Farmersville, Texas, notice a dim light traveling toward the city from the south at 60–80 mph. Thinking it might be a meteor heading toward the Earth, more people gather outside to watch. City Marshal Brown is in the western part of town making his rounds, and the “ship or balloon” passes overhead about 200 feet in the air. Brown can see two men in the object and something like a large Newfoundland dog. He can
April 15 — Between 9:00 and 10:00 p.m. A cigar-shaped airship with a row of red lights along the sides passes above Emerson, South Dakota. (“That Ubiquitous Airship,” Sioux City (Iowa) Journal, April 17, 1897, p. 6)

Mid-April — 3:00 p.m. Railroad conductor Capt. Jim Hooton is hunting near Homan, Arkansas, when he hears a loud mechanical sound like an air brake. Investigating, he discovers an airship undergoing repairs. The aeronauts are not very communicative, so once the repairs are complete, they reenter the airship and take off with a loud hissing sound. (“Saw the Air Ship,” Little Rock Arkansas Gazette, April 22, 1897, p. 3)

Mid-April — Early evening. J. W. Lansing sees a cigar-shaped airship twice in Grinnell, Iowa. It moves in various directions, sometimes against a strong wind. (“He Saw It,” Springfield (Ill.) News, April 26, 1897, p. 1)

Mid-April – Night. F. Crocker is sitting near the window of his apartment on Barr Street in Fort Wayne, Indiana, when he notices a yellowish light coming from the west. It seems attached to a pear-shaped object with the apex pointed downward. Two yellow rays of light come from its sides as it sways to and fro in the air. He calls R. J. (or R. T.) and J. L. Tretheway, who live in the apartment below his, and they also glimpse the object, which is in sight for 20 minutes. (“Sighted Here,” Fort Wayne (Ind.) Weekly Gazette, April 15, 1897, p. 1)

Mid-April — Between 9:00 and 10:00 p.m. A man in Eldridge, North Dakota, sees an airship that looks like a car attached to a large, kite-shaped structure with wings. It stops and changes course. At one point the man is close enough to hear a humming sound. Some of the time it displays colored lights; at other times it is completely dark. (“He Saw the Air Ship,” Jamestown (N. Dak.) Weekly Alert, April 22, 1897, p. 8)

April 16 — 12:03 a.m. An airship and a smaller “trailer which followed it very closely” are seen by residents of Danvers, Illinois. The objects are made of aluminum-like material, and its “occupants were dressed in western style.” (“The Aerial Mystery,” Bloomington (Ill.) Daily Pantograph, April 17, 1897, p. 5)

April 16 — 12:30 a.m. A group of people returning home from a lodge meeting in Bay City, Michigan, notice a large conical object approaching from the south and slowly descending to about 50 feet altitude above Center Avenue. A red light appears at either end of a body that is apparently 50–75 feet long. It shines with a dull red glow, as if there are lights on its upper side. The object moves away to the northeast. (“Air Ship a Reality,” Saginaw (Mich.) Courier-Herald, April 16, 1897, p. 1)

April 16 — Morning. A large object passes slowly over Linn Grove, Iowa, heading north. Five men—James Evans, F. G. Ellis, Ben Buland, David Evans, and Joe Croskey—jump into a rig and follow it 4 miles north of town where it has landed. But when the pursuers get within 2,100 feet of the airship, it spreads out and four massive wings and ascends again. The two occupants have extremely long beards and make desperate efforts to conceal themselves. They toss two enormous boulders “of unknown composition” out of the airship. (“More Air Ship Fakes,” Indianapolis Journal, April 17, 1897, p. 1)

April 16 — While wandering in the hills east of Springfield, Missouri, W. H. Hopkins, a traveling insurance agent, spots a landed airship in a clearing. Next to it is a nude female with hair down to her waist. As she picks flowers, she speaks in an unknown language with a musical voice and fans herself as if the day is hot. In the shade cast by the craft lies a naked man with shoulder-length hair and a long beard. After a few minutes, Hopkins approaches the woman, who shrieks and runs toward the man. Hopkins speaks soothingly and the two aeronauts relax. Hopkins asks where they come from, and they point upward, pronouncing a word that sounds like “Mars.” The two examine Hopkins’s clothing, hair, and watch with great curiosity. They show him the interior of the ship but take off shortly afterward, “laughing and waving their hands.” (“Golden Haired Girl Is in It,” St. Louis (Mo.) Post-Dispatch, April 19, 1897, p. 1)

April 16 — 8:00 p.m. Howard R. Bolander, superintendent of the Ohio Bicycle Works in Marion, Ohio, is looking at the night sky when he sees the light from a cigar-shaped object moving to the southwest. Its light looks like an incandescent lamp. (“Is Your Credulity in Condition for the Only True Airship Story?” Marion (Ohio) Daily Star, April 17, 1897, p. 9)

April 16 — Night. Judge John Spencer Bounds is riding in a buggy in Hillsboro, Texas, when his horse whirls around in fright. A brilliant light as if from an arc lamp shines on him for less than a minute and then moves over to a nearby field. The light suddenly ascends to an altitude of 1,000 feet. As he watches, the searchlight blinks out and smaller lights surrounding a dark object become visible. The object moves slowly to the south and disappears. (“Seen near Hillsboro,” Dallas (Tex.) Morning News, April 17, 1897, p. 8)

April 16 — 12:00 midnight. C. G. Williams is walking across a field two miles south of Greenville, Texas, when he comes across a brilliant light and a large, cigar-shaped object resting on the ground. Three aeronauts emerge from it; two go to work on the ship, and the third approaches Williams and asks him to mail some letters. The man tells him that the airship runs on electricity and that his invention was perfected in a small town in New York State. (“C. G. Williams Saw It,” Dallas (Tex.) Morning News, April 19, 1897, p. 5)
April 17 — 1:30 a.m. R. E. Draughon, a night watchman at a lumber plant in Beaumont, Texas, sees a “globular” object with a bright light the size of a star in one end. It is moving to the northwest at a high altitude. (“Seen at Beaumont,” Dallas (Tex.) Morning News, April 18, 1897, p. 4)

April 17 — 6:00 a.m. An airship is said to collide with the tower of Judge James Spencer Proctor’s windmill in Aurora, Texas, causing it to explode and strewn debris over several acres. The pilot (reportedly “not of this world,” or a “Martian” according to an alleged Army Signal Service officer named Thomas Jefferson Weems from nearby Fort Worth), does not survive the crash and is buried “with Christian rites” at the Aurora Cemetery. Wreckage from the crash site is either dumped into a nearby well located under the damaged windmill or ends up with the alien in the grave. Adding to the mystery is the story of Brawley Oates, who purchases Judge Proctor’s property around 1935. Oates cleans out the debris from the well in order to use it as a water source, but later develops an extremely severe case of rheumatoid arthritis, which he claims is the result of contaminated water from the wreckage dumped into the well. As a result, Oates seals up the well with a concrete slab and places an outbuilding on the spot in 1945. The entire yarn is widely regarded as a hoax, although Proctor’s windmill apparently did exist. (Wikipedia, “Aurora, Texas, UFO incident”; “A Windmill Demolishes It,” Dallas Morning News, April 19, 1897, p. 5; Donald B. Hanlon, “Texas Odyssey of 1897,” Flying Saucer Review 12, no. 5 (Sept./Oct. 1966): 9–10; H. Michael Simmons, Once upon a Time in the West, Magonia, no. 20 (August 1985); Wallace O. Chariton, The Great Texas Airship Mystery, Wordware, 1991; Thomas E. Bullard, “Defending UFOs,” IUR 34, no. 2 (March 2012): 8–10; Clark III 316–318, 592–593; “Aurora 1897,” Texas UFO Museum and Research Library, February 5, 2014; Mutual UFO Network, “Aurora, TX Crash, 1897,” May 14, 2021)

April 17 — 8:30 p.m. A large white light attached to a cigar-shaped object passes over Trenton, Tennessee, at an altitude of about 1,500 feet. It has a red light on the east side and a green light on the right. The object remains in sight for 5 minutes then disappears to the east. (“Trenton Has ‘Em,” Memphis (Tenn.) Commercial Appeal, April 18, 1897, p. 4)

April 17 — 9:00 p.m. George Alverson, Alex Oxford, and Charley Hunter are walking on Manchester Street near the Cincinnati Southern Railway trestle bridge in Lexington, Kentucky. An airship lands and settles in a vacant lot about 600 feet away. They hurry forward but are stopped by a man who has just emerged from the machine. He is carrying a bucket, which he fills with water from a nearby spring. He declines to answer any of their questions, reenters the airship, and flies away to the southeast. (“Talked with the Airship Man,” Cincinnati (Ohio) Enquirer, April 19, 1897, p. 5)

April 18 — 8:30 p.m. W. E. Roe, captain of the Ohio River packet T. M. Barnsdall, as well as watchman Elmer Hardy and engineer Litus Kinnard, sees a light high in the air above the river as the riverboat is lying at Sistersville, West Virginia. It seems to be moving to the northwest but at other times it retraces its course. Around 12:00 midnight it disappears over a hill to the west. (“The Airship Seen near Marietta,” Marietta (Ohio) Daily Register, April 19, 1897)

April 18 — 9:30 p.m. An object with lights on both ends is seen southeast of Lyons, Nebraska, traveling to the northwest. Some young observers estimate it is moving at 4–6 mph. When the object is south of Bancroft it makes 2–3 large circles and then moves to the southwest. (“Airship’s Lamp Is Lighted,” Omaha (Neb.) Daily Bee, April 20, 1897, p. 5)

April 19 — 1:30 a.m. As people are returning from a party at the Armory Hall in Natchitoches, Louisiana, they see a bright light attached to a massive airship in the form of a balloon with a cigar-shaped undercar. The light dims while it is over the city and intensifies again when it has passed beyond it. It moves in undulations and is visible for 30 minutes. (“The Airship Seen in Louisiana,” New Orleans Daily Picayune, April 21, 1897, p. 6)

April 19 — 2:00 a.m. A man in El Paso, Texas, sees a cigar-shaped object with lighted portholes on each side. The object approaches from the east and passes overhead at 500 feet. Voices from the craft are heard. (“The Air Ship Seen in El Paso,” El Paso (Tex.) Herald, April 20, 1897, p. 4)

April 19 — 12:00 noon. George Dunlap, a man known to Davis H. Tucker, physician at the Harlem Prison Farm [now the Jester State Prison Farm] in Fort Bend County, Texas, is riding in the country near Lake Charles, Louisiana, when he sees an airship moving toward him about half a mile distant. It makes a loud whistling noise, scaring his horses and causing him to be thrown from the buggy. As the horses flee, the ship lands, a rope comes down, and two men rush over to apologize. They are the owner Mr. Wilson (formerly of Fort Worth, Texas) and his friend Scott Warren. The man is taken into the airship and introduced to two others, a Mr. Waters and a Hispanic man. Wilson tells him the airship is sustained by a gas, and that several of them have been built. (“Was Aboard an Airship,” Dallas (Tex.) Morning News, May 16, 1897, p. 18)

April 19 — 9:00 p.m. A bright light moves from the northwest over Cochranville [now a ghost town], Monroe County, Ohio, where it hovers for 20 minutes, flashing red, white, and green lights. Through binoculars a cone-shaped
object with large fins on either side can be discerned. It is apparently 180 feet long. (“Hovered over the Town,” Cincinnati (Ohio) Commercial Tribune, April 20, 1897, p. 2)

April 19 — 10:30 p.m. Rancher Alexander Hamilton, his son Will, and his hired hand Gid Heslip are awakened by a noise in the cattle pen of their ranch at Yates Center, Kansas. They watch as a 300-foot-long, cigar-shaped airship with a carriage underneath descends to about 30 feet above the ground. Two men, a woman, and three children are heard talking in the carriage. They see a calf caught in a nearby fence with a cable knotted around its neck that connects to the airship above. They cut the cable and the airship floats away. A few weeks later, Hamilton admits he made the story up. (Clark III 130, 593; Jerome Clark, “The Great Airship Hoax,” Fate 30, no. 2 (February 1977): 94–97; Jerome Clark, “The Leroy, Kansas, Calfnapping Hoax of 1897,” Flying Saucer Review 22, no. 6 (April 1977): 26; Daniel Cohen, The Great Airship Mystery, Dodd, Mead, 1981, pp. 92–102)

April 19 — After 11:00 p.m. John R. Ligon, an agent for a brewery in Houston, and his son Charley notice lights in a pasture a few hundred yards away near Beaumont, Texas. They walk over and discover four men moving around a large dark object, who ask for water. They accompany Ligon to his house, each bringing two baskets, which they fill and return. One of the men identifies himself as “Wilson” and says they are traveling in a flying machine that has been over the Gulf of Mexico and is now headed toward Iowa. Ligon says the airship is 130 feet long and 20 feet wide, propelled by four large wings and powered by electricity. Wilson gives Ligon a tour of the ship and says it is one of five built in a small Iowa town. Rabbi Aaron Levy of Beaumont also claims to have met aeronauts from a landed airship near the city around the same time. (“Inspected the Air Ship,” Houston (Tex.) Daily Post, April 21, 1897, p. 2; “The Airship,” New Orleans Daily Picayune, April 25, 1897, p. 7; Jerome Clark, “Mystery Aeronauts of Texas,” IUR 33, no. 3 (December 2010): 5–6; Clark III 81–82)

April 20 — Henry Heintz of Elkton, South Dakota, patents an airship consisting of a cigar-shaped balloon and a structure for passengers beneath it. At some point he allegedly brings his invention out for a test flight in front of the Elkton blacksmith shop. The airship rises 8 feet into the air before plopping to the ground. (US Patent, “Air Ship,” granted April 20, 1897; Ruth Becken, A History of Elkton, [City of Elkton,] 2000, p. 94)

April 20 — 10:00 p.m. Sheriff Henry W. Baylor of Uvalde, Texas, sees a bright light and hears strange voices behind his house. He finds a landed airship and its crew of three men, one of whom is named “Wilson” (from Goshen, New York), who inquires after an acquaintance. C. C. Akers of Eagle Pass, Texas. After procuring water from a hydrant in Baylor’s yard, the men board the airship, which speeds away northward toward San Angelo. County Clerk Henry J. Bowles sees the airship as it passes over Getty Street in Uvalde. Akers tells a reporter in Galveston that he knew a New Yorker named Wilson when he lived in Fort Worth in 1876–1877. Baylor’s seemingly compelling testimony disintegrates after he confesses in late May to making the whole story up, possibly in collusion with Akers. (“The Airship in West Texas,” Galveston (Tex.) Daily News, April 24, 1897, p. 3; “The Airship at Uvalde,” Weimar (Tex.) Mercury, May 1, 1897, p. 6; “Airship Story Exploded,” Weimar (Tex.) Mercury, May 22, 1897, p. 7; Jerome Clark, “Mystery Aeronauts of Texas,” IUR 33, no. 3 (December 2010): 6–7; Clark III 82–83)

April 21 — 12:30 a.m. An employee of the Picayune newspaper in New Orleans, Louisiana, steps outside the office and sees an airship, 50–60 feet long and bearing a powerful searchlight. He returns to tell his colleagues, but by the time they come out, the airship is gone. (“The Airship,” New Orleans Picayune, April 21, 1897, p. 9)

April 21? — 8:00 p.m. A man is riding his horse between Lancaster and Baltimore, Ohio, when something scares his horse. He sees an object with two brilliant white lights on either end landing in a nearby field. He tethers his horse and approaches the object, which seems as large as a house. Inside he can see two men conversing, so he walks up to ask them questions. One of the aeronauts seems to be Japanese and the other speaks English with a British accent. The craft is called the Aeribarque, and they are on a test flight. The aeronaut says that they often land in remote areas and come to nearby towns for supplies or mechanical parts, posing either as tourists or “harmless cranks trying to invent perpetual motion.” After giving the witness a demonstration of the electrical lighting system, they take off into the sky. (“Aeribarque, That’s It’s Official Name,” Cincinnati (Ohio) Enquirer, April 25, 1897, p. 9)

April 21 — 11:00 p.m. Confectioner John S. Scheer, Frank King, and Frank Mulick of Erie, Pennsylvania, watch a cigar-shaped, winged object moving north at a relatively high rate of speed. It has a large propeller on its tail end, but it flies silently and disappears over Lake Erie. (“Passed over Erie,” Erie (Pa.) Daily Times, April 22, 1897, p. 8)

April 22 — 7:30 p.m. Prominent citizens, including the mayor, observe a low-flying airship heading slowly southwest above Kenly, North Carolina. Its sails “resembled mosquito netting to the naked eye.” The outlines of two people aboard are plainly visible. (“Men Seen in the Airship,” Raleigh (N.C.) News and Observer, April 25, 1897, p. 4)

April 22 — 10:10 p.m. A ball of fire is seen moving slowly and horizontally from southwest to northeast over Kokomo, Indiana. Some people can distinguish the faint outlines of a cigar-shaped object and wings. The light is white with a reddish tint and no more than 300 feet in altitude. The witnesses include Harry M. Grimes, William E.
May 4, 1897, p. 4)

April 22 — 11:00 p.m. John M. Barclay wakes up when he hears a whirring noise that causes his dogs to bark wildly outside his home near Rockland, Texas. He goes outside and sees an oblong airship with wings and brilliant lights. When he first sees it, the object is hovering 150 feet above the ground. It circles a few times then lands in a nearby pasture. Barclay goes down to investigate with his Winchester rifle, but the lights go out as he gets closer. Some 90 feet away from the airship he is stopped by a man who asks him to put his rifle down. He identifies himself as “Smith” and gives Barclay $10 to purchase lubricating oil, two chisels, and bluestone. When Barclay returns with the materials, the aeronaut will only say he is from “anywhere,” adding that “we will be in Greece tomorrow.” (“Supplies for Airship,” Houston (Tex.) Post, April 25, 1897, p. 13)

April 22 — 12:00 midnight. Frank Nichols, a farmer living 2 miles east of Josserand, Texas, is awakened by a whirring noise. Outside, he sees a huge airship in his cornfield. Before he can get close, two men with buckets ask him if they can draw water from his well. Nichols consents and in return they give him a tour of the vessel, whose motive power is “highly condensed electricity.” One aeronaut tells him that five airships have been built in an Iowa town. (“That Airship,” Houston (Tex.) Post, April 26, 1897, p. 2)

April 23 — Night. Henry A. Hooks and A. W. Hodges of Kountze, Texas, allegedly meet two aeronauts named Wilson and Jackson when their airship suffers a gas leak and lands. (“That Airship,” Houston (Tex.) Post, April 25, 1897, p. 5)

April 24 — An airship in need of repairs lands near Stringers Ridge on the other side of the river from Chattanooga, Tennessee. An unnamed journalist talks to one of the aeronauts, who identifies himself as Prof. Charles Davidson of Sacramento, California, the inventor of the airship, which can travel as fast as 93 mph. (“Is This a Reality?” Knoxville (Tenn.) Morning Tribune, April 25, 1897, p. 1)

April 24 — 11:00 p.m. Howard Warn is outside his home in Toledo, Ohio, when he notices bright, multicolored lights moving rapidly toward the southwest. The lights are attached to a cigar-shaped object at an altitude of 500 feet. He calls his father, Milo S. Warn, and they watch the lights until the object disappears into heavy clouds to the southwest. (“Say They Saw the Airship,” Cleveland (Ohio) Plain Dealer, April 28, 1897, p. 5)

April 25 — Evening. As some residents of Merkel, Texas, are leaving a church service, they notice a heavy, anchor-shaped object being dragged by a large rope that is attached to an airship in the sky not far above them. After 10 minutes, a small figure dressed in a blue sailor suit starts climbing down the rope. But when he sees people watching him, he cuts the rope and returns to the airship, which moves away to the northeast. The anchor goes on exhibit at a local blacksmith shop. (“Anchor of the Airship,” Houston (Tex.) Post, April 28, 1897, p. 5)

April 25 — Night. William F. Whittier, editor of the Sunbury (Ohio) News-Item, sets up his camera in the printing office to take lightning photographs. He manages to take a photo of a nearby lightning strike and develops it the following morning. The negative shows not only the lightning but the outline of what seems to be an airship. Whittier makes many copies of the photo and sells them to Sunbury residents. (“Fairy Story: A Sunbury Editor Takes a Photograph,” Dayton (Ohio) Daily Journal, April 28, 1897)

April 28? — 8:00 p.m. Hiram C. LaGrone hears a disturbance among his horses on his ranch at Deadwood, Texas. Stepping outside, he sees a brilliant, multicolored light approaching from the southwest. It slows, hovers, then lands in a field. LaGrone walks up and discovers five men, two of whom take rubber bags and procure water from his well. The other three tell him that this is one of five airships touring the country (and the same one that landed in Beaumont on April 19). (“The Airship,” Houston (Tex.) Post, April 30, 1897, p. 7)

May 2 — 1:00 a.m. Edwin Shaffer is driving a rig about one-half mile west of Cassville, Indiana, when he encounters a landed airship 40 feet long. The object spooks his horse, which will not run past it. Shaffer claims the airship is crewed by midgets who speak no English. (“The Air Ship at Cassville,” Kokomo (Ind.) Daily Tribune, May 4, 1897, p. 8)

May 4 — 9:00 p.m. Louis Dumhoff, a physician living at 112 Garfield Place in Cincinnati, Ohio, sees a red, egg-shaped light, “the rays escaping in the center and at each end.” It passes to the southeast in about 5 minutes, moving in a zigzag, up-and-down course. Conductor J. C. Gaupel and attorney W. J. Klein also see the light in the same neighborhood. (“Airship,” Cincinnati (Ohio) Enquirer, May 5, 1897, p. 7)

May 6 — During a rainstorm five miles west of Hot Springs, Arkansas, Deputy Sheriff John McLemore and Constable John J. Sumpter Jr. see a light in the sky descend behind a hill one half-mile away. After seeing two persons carrying lights, they draw their rifles and demand to know who is there. A man with a long, dark beard tells them that he and two others are traveling around the country in an airship and hope to end up in Nashville, Tennessee. He invites the officers to take a ride and transport them to somewhere dry, but they tell him they prefer to get wet.
They return to the spot 40 minutes later and the airship is gone. ("Swore They Saw It," Little Rock Arkansas Gazette, May 9, 1897, p. 1; "Swear They Saw It," Arkadelphia (Ark.) Southern Standard, May 14, 1897, p. 2)

May 9 — 8:00 p.m. Abe Parker of Norwalk, Ohio, sees an object with 10–12 bright white and red lights moving slowly over the town for about 10 minutes. Other witnesses report hearing music coming from it. An unnamed young witness, who follows the object out of town for about one mile after it passes over Main Street, says the shadow cast by the object is round. ("That Airship Again," Cleveland (Ohio) Plain Dealer, May 11, 1897, p. 3)

May 11 — 10:00 a.m. John E. Hopley is one of a small group of people in Sandusky, Ohio, who watch a “fleecy white bulk” floating far away to the west. Through binoculars the object looks like a white bird with long black wings. Hopley guesses that it is 1–2 miles high, 20 miles away, and 60–80 feet long. ("The Air Ship: John E. Hopley Sees This Modern Invention," Bucyrus (Ohio) Evening Telegraph, May 11, 1897, p. 4)

July 4 — 7:45 p.m. Hundreds of witnesses in Lexington, Kentucky, see a lighted object silhouetted against a storm cloud in the southwest moving to the north at 500 feet altitude. When it nears the city, the light goes out and it disappears after passing over the western part of the city. ("The Air Ship or Its Twin Brother Passes over Lexington," Lexington (Ky.) Morning Herald, July 5, 1897, p. 5)

July 29 — Sunset. Farmer Andrew Henderson sees a large, unlighted, oblong object with a suspended car and a huge sail drifting to the northeast over his farm three miles from Whitemouth, Manitoba. He estimates it is only a half-mile away. ("Could It Be Andree?" Winnipeg Manitoba Free Press, July 31, 1897, p. 1; "Big Balloon Story," Winnipeg Manitoba Free Press, August 2, 1897, p. 1)

August 26 — 6:45 p.m. An airship with an attached car is seen moving steadily southwest above Asheville, North Carolina, by Dr. Willard P. Whittington and two other men who are standing on Grove Street. It is about one mile in altitude. ("Maybe It Was Andree on His Return?" Charlotte (N.C.) Observer, August 27, 1897, p. 3)

August 28 — 3:00 a.m. Luther Myers hears dogs barking outside his home in Carlisle, Pennsylvania. When he looks through the window, he sees a rapidly moving airship with a light on each end. It has a propeller and rotates as it moves forward. ("Our Closeby Neighbors," Chambersburg (Pa,) Valley Spirit, September 1, 1897, p. 5)

September 7 — 2:00 p.m. V. H. Hollingsworth and his family in Ellsworth (between Sherman and Denison), Texas, see an unusual object approaching from the east. It has a fan-like wheel on front and fin-like projections on the side. ("The Air Ship," Marshall (Tex.) Evening Messenger, September 9, 1897, p. 2)

November 2 — 12:45 p.m. Engineer Charles W. West sees a balloon of unusual size passing southwest above Dartmouth, Nova Scotia. It looks like an inclined cylinder with rounded ends and has a car suspended from it. After 20 minutes it passes out of sight. ("Saw the Man Who Saw the Ship," Boston Daily Globe, November 5, 1897, p. 3)

November 19 — 11:00 p.m. A telegraph operator in Kellogg, Iowa, sees a bright, bluish light moving rapidly to the southwest. He notifies the operator at Colfax, Iowa, and people in the depot there also see it. ("See the Airship," Chicago (Ill.) Chronicle, November 20, 1897, p. 2)

December 5 — Early morning. Engineer John J. Hussey and fireman John Henderson of the Great Northern Railroad in northern Minnesota see a “large, white long light which seemed surrounded by some dark objects” near Deerwood. Other employees of the Great Northern and Northern Pacific railways also view the light ("Was It an Air-Ship," Saint Paul (Minn.) Globe, December 7, 1897, p. 2)

1898

1898 — English author H. G. Wells publishes The War of the Worlds, one of the earliest stories to portray a conflict between humans and an extraterrestrial race. The novel is the first-person narrative of both an unnamed protagonist in Surrey and his younger brother in London as southern England is invaded by Martians. (Wikipedia, "The War of the Worlds")

January 10 — 9:00 p.m. Residents of Rome, Georgia, watch a blue light “attached to some dark and indistinguishable object” as it flies from the northwest to the east. ("Star-Gazing in Rome," Atlanta (Ga.) Constitution, January 11, 1898, p. 4)
February 4 — Mid-day. The postmaster of Greifswald, Mecklenburg-Vorpommern state, Germany, and 11 other persons see an object crossing the Sun’s disk. They watch the object approach the Sun for 15 minutes, take one hour to pass, and stay visible for another hour until clouds obscure it. (Martin Brendel, “Ueber ein 1898 Febr. 4 in Greifswald beobachtetes Phänomen,” Astronomische Nachrichten 145 (1898): 333–334)

May 2 — Dusk. Bystanders in front of the Pearson building in downtown New Castle, Pennsylvania, notice a bright arc light moving in from the southwest just below the clouds and remaining visible for 5 minutes. (“A Mysterious Light,” New Castle (Pa.) News, May 4, 1898, p. 10)

June 1 — 8:30 p.m. Harry McCandliss is riding in the country near Emporia, Kansas, when he sees a cigar-shaped object flying toward the northwest at about 300 feet. It is suspended from a balloon and is peppered with electrical lights. At one point the lights go out then reappear. A searchlight beam in the front skitters in different directions. It ascends to 600 feet and is lost to view. ([News note], Emporia (Kan.) Gazette, June 2, 1898, p. 4)

October 4 — 9:00 p.m. A brilliant object passes over Italy, Greenville, Garland, and Blossom, Texas. Initially moving in an easterly direction, it seems to change course and shoot upwards then burst, throwing out three distinct objects, one red, the other white, and the last one blue. The red and blue lights die out, but the white one continue a few seconds before it too bursts, emitting a shower of sparks. Blossom merchant Dick Moore says the light is so glaring that he thinks his “house was falling on him.” About 2.5 miles north of Sherman, 12-year-old George Campbell is riding with his father when they see the fireball descending, apparently coming as close as 3 feet above the ground before moving upward; they can hear a buzzing noise and think the object is about 10 feet in diameter. (“Aerial Phenomena in Texas,” Dallas (Tex.) Morning News, October 5, 1898; “The Meteor,” Dallas Morning News, October 7, 1898; Theo Paijmans, “High Strangeness in Texas,” Fortean Times 286 (May 2012): 30)

October 4 (or 3) — Night. At Fort Washita, Oklahoma, Mrs. William Peveto (possibly Mary Peveto) watches a fireball (probably the same one as October 4) descend. A few minutes later, distracted by the meteor, she is standing in her kitchen when a “female ghost” appears and chats with her for a few minutes, saying that if she would follow her, she will lead her to a fortune. Peveto becomes terrified, and the entity flees through a closed door. The entity visits her again on other nights, again talking about treasure in the basement. They continue until February 1899 when they occur nightly. At one point the ghost claims to have been murdered years ago in Fort Washita and shows her strangle marks around her neck. Poltergeist phenomena (tables moving) occur and a male ghost also talks to her. Peveto becomes ill and apparently moves away from the place. (“Ghosts at Old Fort Washita,” Dallas (Tex.) Morning News, October 20, 1898; “Old Fort Washita Ghosts: Mrs. Peveto Contributes Another Uncanny Chapter to the Record,” Dallas (Tex.) Morning News, March 26, 1899; Theo Paijmans, “High Strangeness in Texas,” Fortean Times 286 (May 2012): 30–31)

1899

1899 — Serbian-American inventor Nikola Tesla is working in his laboratory near Colorado Springs, Colorado, when he observes unusual signals from his receiver that he speculates are communications from another planet. He mentions them in a letter to a reporter in December 1899 and to the Red Cross Society in December 1900. Reporters treat it as a sensational story and jump to the conclusion Tesla is hearing signals from Mars. In 1901, Tesla writes that it has not been immediately apparent to him that he is hearing “intelligently controlled signals” and that the signals could have come from Mars, Venus, or other planets. It is possible that he is intercepting Guigliermo Marconi’s European experiments in July 1899—Marconi may have transmitted the letter S (dot dot dot) in a naval demonstration, the same three impulses that Tesla hinted at hearing in Colorado—or signals from another experimenter in wireless transmission. Brian Dunning of the Skeptoid podcast attributes Tesla’s signals to pulsars, which are not identified until 1968. (Nikola Tesla, “Talking with the Planets,” Colliers Weekly 26 (February 9, 1901): 4–5; Margaret Cheney, Tesla: Man Out of Time, Dorset Press, 1989 ed., pp. 111–113; Daniel Blair Stewart, Tesla: The Modern Sorcerer, Frog, 1999, p. 372; Michael D. Swords, “Radio Signals from Space, Alien Probes, and Betty Hill,” IUR 29, no. 4 (July 2005): 11; W. Bernard Carlson, Tesla: Inventor of the Electrical Age, Princeton University, 2013, p. 315; Brian Dunning, “The Black Knight Satellite,” Skeptoid podcast, no. 365, June 4, 2013)

1899 — Swiss psychologist Carl Jung investigates his 15-year-old cousin, Hélène Preiswerk (“S.W.”), in Basel, Switzerland, who claims to be a spiritualist medium. Her trances frequently involve journeys to other planets. She
claims that Martians have flying machines, and they irrigate the land with canals and artificial lakes. (Hilary Evans, “Martians of the 1890s,” IUR 11, no. 5 (Sept./Oct. 1986): 7–8)

Mid-January — Late night. People returning from a dance near McMahan, Texas, see a group of stars in formation, moving in one direction. A few miles further east, hunters camping on a hilltop see the full outline of an airship with headlights and windows. (Dallas (Tex.) News, January 25, 1899; Clark III 86)

January 26 — 11:00 p.m. People outside the opera house in McAlester, Oklahoma, watch an airship “like a railway car suspended from a large balloon-like arrangement” pass overhead. It shines a bright searchlight along the ground. ([News note], Garfield County (Okla.) Democrat, February 9, 1899, p. 4)

June 1 — Late evening. Observers in Kamen-Rybolov, Primorsky Krai, Russia, see a blue sphere about 28 inches in diameter flying silently from south to north near the steamboat Kazak Ussuriyskiy moored on Lake Khanka. It is seen for 20 minutes, then it returns later in the evening flying north to south at greater speed, disappearing 11 minutes later. (Stonehill and Mantle, Russia’s USO Secrets, Flying Disk, 2020, p. 113)

July 4 — 4:30 p.m. A mystery balloon floats across the sky in Spokane, Washington, from southwest to northeast. Before it disappears, it ascends so high that “nothing but a small black ball far up in the heavens could be discerned.” (“Who Owns the Big Balloon?” Spokane (Wash.) Chronicle, July 5, 1899, p. 2)

October — Midnight. Physician Malcom McKinnon is driving home to Fosston, Minnesota, in his carriage when a dazzling ball of white light crosses the road ahead about one-quarter of a mile away, lighting up the road like daylight. It resembles an electric arc lamp and moves slowly from north to southeast about 3 feet above the ground, throwing the field furrows into visible relief. As it passes closer, McKinnon sees that it is clearly “disk shaped, about the size of an umbrella.” It is in sight for 30 minutes. (Minneapolis Minnesota Journal, October 25, 1899; Chris Aubeck and Martin Shough, Return to Magonia: Investigating UFOs in History, Anomalist, 2015, pp. 239–251)

1900

1900 — Psychic medium Catherine-Elise Müller (under the pseudonym “Hélène Smith”) of Geneva, Switzerland, becomes famous with the publication of Des Indes à la Planete Mars (From India to the Planet Mars) by Théodore Flournoy, professor of psychology at the University of Geneva. The medium and the psychologist remain very close until 1900, when the book is first published, documenting her various series of somnambulatory trances in which she experiences a civilization on Mars and her former lives: the “Martian” cycle, “Ultramartian” cycle, “Hindu,” “Oriental,” and “royal” cycles. She writes out the Martian communications on paper and translates them into French, popularizing automatic writing. (Society for Psychical Research, PSI Encyclopedia, “Hélène Smith”; Hilary Evans, “Martians of the 1890s,” IUR 11, no. 5 (Sept./Oct. 1986): 4–6)

Summer — Dusk. A 12-year-old girl is walking back to her farm from Cadwst, Denbighshire, Wales, when a large disc-shaped object about 14 feet in diameter silently passes above her and over a nearby meadow. (Lorenzen, UFOs: The Whole Story, Signet, 1969, pp. 13–14)

Mid-summer — 3:00 a.m. Perrian A. McGilvra, 14, is returning on horseback from a dance near Reedsburg, Wisconsin, when his horse begins acting up. He sees a large, dark, dirigible-shaped object passing over a grove of poplar trees. The trees bend like they are in a strong windstorm, but he notices no wind. The object flies over his head with a whoshing sound. The horse remains frightened even after the object leaves. (Clark III 1161)

December — Percival Lowell at Lowell Observatory in Flagstaff, Arizona, records a shaft of light that projects from a “well-known geographical point” on Mars for 70 minutes. (“Science Notes,” Scientific American 84 (1901): 179)

1901

Summer — Day. A 10-year-old boy is walking home to Bourndbrook, West Midlands, England, through a path behind his family’s garden when he comes upon a large box-shaped device with a small, centrally placed turret. The only opening is a door, through which two small men (less than 4 feet tall) in military uniforms (but no insignia), each

1902

May 13 — 8:00 p.m. A blue-colored fireball appears over Austin, Texas, and ascends into the sky until it disappears. (Austin (Tex.) Daily Tribune, May 14, 1902; Clark III 1168)

1903

March 17 — Mid-evening, Madge Brosius, 12, and her father Charles see a “huge object like a gigantic ripe cucumber with slightly tapered ends” over the family farm in Helmer, Indiana. Its inside is illuminated, and it has 8 windows in two rows of four each. Her father estimates it is 100 feet long. It begins moving away from him as he moves toward it, zigzagging like a child’s balloon losing air. (Madge Brosius Allyn, “The Flying Cucumber of 1903,” Fate 24, no. 3 (March 1971): 45–47; Clark III 1162)

September 29–October 3 — An implement dealer named U. G. Griffith is on his way home in Van Meter, Iowa. As he approaches, he notices a strange point of light like a spotlight emanating from the top of the Mather & Gregg’s building. He approaches cautiously, but the light sails across the street. He tells others about the experience, and over the next few days several people report a half-human, half-animal entity with large bat-like wings. The townsfolk chase the creature to a local mine shaft, down which it disappears, never to be seen again. (Clark III 1216–1218; Craig Woolheater, “The Van Meter Visitor,” Cryptomundo, May 9, 2013; Chad Lewis, Noah Voss, and Kevin Lee Nelson, The Van Meter Visitor, On the Road, 2013)

December 17 — Inventors Orville and Wilbur Wright make the first controlled, sustained flight of a powered, heavier-than-air aircraft with the Wright Flyer 4 miles south of Kitty Hawk, North Carolina. (Wikipedia, “Wright Flyer”)

1904

1904 — Late afternoon. Wirt M. Covert, 17, and Arthur B. Eldert are returning on horseback from a grocery store in Dixboro, Michigan, when they see a large object in the air moving west behind the steeple of the Dixboro United Methodist Church. He compares its shape to the Confederate ironclad Virginia and it has a thick mast sticking up from its center and orange light shining through some windows. Suddenly it rises at about a 60° angle over the hills, tipping its mast back, and disappears. (NICAP case file)

February 28 — Mid-evening. The steamer USS Supply is transporting the ill Governor of Guam, William Elbridge Sewell, from Guam to San Francisco, California. About 300 miles west-southwest of San Francisco, commanding Lt. Frank Herman Schofield observes three objects “beneath the clouds, their color a rather bright red.” As they approach the ship they appear to soar, passing above the broken clouds. After rising above the clouds, they appear to “be moving directly away from the earth. The largest had an apparent area of about six suns. It was egg-shaped, the larger end forward. The second was about twice the size of the sun, and the third, about the size of the sun. Their near approach to the surface appeared to be most remarkable.” The objects are in sight for over two minutes by three people. Barry Greenwood thinks they are meteors, but Bruce Maccabee is not so sure. (Frank H. Schofield, “Remarkable Meteors,” Monthly Weather Review 32 (March 1904): 115; Bruce Maccabee, “Even More Remarkable,” IUR 9, no. 5 (Sept./Oct. 1984): 14–15; Bruce Maccabee, “Meteors? Even More Remarkable,” 2005; NICAP, “Three Red Objects Sighted from USS Supply”; Barry Greenwood, “The USS Supply Sighting of 1904,” UFO Historical Revue, no. 2 (September 1998): 2–6; Martin Shough and Wim van Utrecht, Redemption of the Damned, vol. 1, Anomalist, 2019, pp. 329–351)
June — 10:00 p.m. When Tony Darby goes outside to the well on his farm 5 miles north of Rolling Prairie, Indiana, he notices two round, orange-colored, silent objects hovering 5–6 feet from the ground near the barn. He estimates they are the size of wagon wheels. One of the objects is 2 feet behind and to the left of the other. Running back to the house, he calls for his mother and brother, and all three walk toward the objects, which move away slightly then stop when the witnesses stop. Soon the objects move steadily away to the northeast, still maintaining their relative positions, at about the speed of a man walking. They pause briefly in a small hollow, then continue over a small hill and out of sight. (Lore and Deneault, pp. 91–92)

1905

1905 — Frederick Spencer Oliver’s book A Dweller on Two Planets is published posthumously. It is a narrative channeled by Oliver in Yreka, California, through automatic writing and mental dictations by a spirit calling itself Phyllos the Tibetan, an Atlantean who reveals his story from 1883 to 1886. The book deals with deep esoteric subjects including karma and reincarnation and describes Phyllos’s final incarnation in 19th century America where his Atlantean karma plays itself out. In that incarnation (as Walter Pierson, gold miner and occult student of the Theo-Christic Adepts) he travels to Venus in an astral body while his physical form remains at a temple inside Mount Shasta, California. (Wikipedia, “A Dweller on Two Planets”; Frederick Spencer Oliver, A Dweller on Two Planets, Baumgardt, 1905)

August 3 — 1:30 a.m. Farmer John A. Jackson is driving a herd of hogs from Silsbee (a former settlement 6 miles southwest of El Centro) to Imperial, California, when a bright light flashes on him from above. He is momentarily blinded, and the hogs start running away. Jackson sees it is a searchlight from an airship about 100 feet long and propelled by wings that move up and down. It has smaller lights along the sides. Jackson wakes up W. E. Wilsie, who lives nearby, and they watch it disappear to the northeast. Another farmer, A. J. Morey, also glimpses the airship. (“Aerial Navigation in Imperial Valley,” Imperial (Calif.) Press, August 5, 1905, p. 4)

1906

1906 — Herbert Vern DeMott, 10, watches an object come down near his family’s water well in Mitchell, South Dakota. As he approaches it, a door rolls back and he is welcomed inside by two human-like occupants who are sitting inside on camp stools. They converse with him fluently, but he does not know where they come from. He sees a lever that apparently can cut off the earth’s “magnetism,” allowing the object to rise. The occupants take water from the farm’s horse trough to be “used in making electricity.” (“DeMott Rock Study Crosses Continents,” Albany (Oreg.) Democrat-Herald, August 27, 1973, p. 11; Clark III 261; Patrick Gross, URECAT, July 22, 2009)

January 4 — Night. Martin Meyerson is on the beach at Paia, Maui, Hawaii, when he sees a green object with the shape and diameter of the full moon appear from behind the southern slopes of the Wailuku Mountains. It is so bright it illuminates the cane fields below, then travels like a “slow-pitched baseball” and disappears behind Mount Haleakala to the southeast. (Clark III 1168)

September 16 — Late afternoon. Hundreds of people in Indianapolis, Indiana, see a “cigar-shaped object” like an airship pass over the city. It is seen first in Irvington and then floats over the southern side of the business district where it is distinctly seen from downtown. Some estimate it to be 2,000 feet in the air; the watchman at the courthouse tower looks at it through binoculars but cannot see any detail. It disappears to the west. (“Ship Founders in Air,” Indianapolis Star, September 17, 1906, p. 1)

October 7 — 5:00 p.m. An airship again floats over the southeastern portion of Indianapolis, Indiana, and is seen by many as it turns northeast and disappears in the distance. (“Ship Floats over City: Hundreds See It in Flight,” Indianapolis Star, October 8, 1906, p. 3)

November — Dusk. Roy Russell and four other cotton-pickers are taking a brief respite from work 10 miles southeast of Anadarko, Oklahoma, when they see a fiery object shaped like a stovepipe. From an initial altitude of 60 feet, the object sinks down, comes toward them, and passes within 16 feet at eye level. Then it seems to flatten out and just
1907

April 20–26 — The Nashville American prints some tall tales about encounters with occupants of a balloon who land briefly in various places (usually near a spring) around central Tennessee. The witnesses include a farmer named W. A. Smith, Walter Stephenson, Herman Schubert, Asa Hickerson, and A. Mollycoddle. The aeronauts are dressed strangely, play music, and speak a foreign language. (Nashville (Tenn.) Sunday American, April 21–23, 28, 1907; “Here’s a Weird Tale,” Cincinnati (Ohio) Enquirer, April 25, 1907, p. 6; Theo Paijmans, “The Tennessee Aeronaut Flap of 1907,” Fortean Times 313 (May 2014): 28–29)

Summer — While playing along the shore of a lake near Vilppula [now Mänttä-Vilppula], Finland, a group of boys see a light come from over the water and settle on the beach nearby. A door opens, and human-like beings emerge, sending the youths running. Searchers who come to the site later find traces and footprints. (Clark III 261; Center for UFO Studies, HUMCAT Index 1900-1909, p. 7)

July 2 — Just before 12:00 noon. Bishop John Stephen Michaud is talking with Vermont ex-governor Urban A. Woodbury at the corner of Church and College streets in Burlington, Vermont, when they hear a loud explosion and see a torpedo-shaped object about 6 feet long and 8 inches in diameter suspended in the air about 300 feet away. It is dark, with several tongues of flame issuing from it at various points, as if its covering is ruptured. It slowly begins to move to the southeast. The explosion has either knocked down or stunned a horse in College Street. A strong downpour of rain ensues shortly afterward. Although described as a “possible case of ball lightning,” the object appears more likely to have been an exploded balloon that someone has attached fireworks to in preparation for a Fourth of July celebration. (William H. Alexander, “A Possible Case of Ball Lightning,” Monthly Weather Review 35 (July 1907): 310–311; Martin Shough and Wim van Utrecht, Redemption of the Damned, vol. 1, Anomalist, 2019, pp. 354–372, reprinted in “Revisiting the Bishop’s Torpedo,” Fortean Times 387 (Christmas 2019): 44–51)

July 7 — 6:40 p.m. W. E. Thomas is watching a vivid sunset in Phoenix, Arizona, when he sees a “blue disk floating in the heavens apparently close to the sun.” It passes in front of the sun, completely covering it. Other discs appear until there are seven of them. His wife also sees the objects, which are constantly in motion, changing directions and sometimes moving in a straight-line formation. The disks are visible for another hour until sunset, when they are last seen as blue blotches. (“Phoenix Man Sees Blue Stars,” Tucson (Ariz.) Citizen, July 11, 1907, p. 4)

1908

March 30 — 10:15 p.m. F. W. Longbottom in Queens Park, Chester, England, is photographing the Whirlpool Galaxy (NGC 5194) in Canes Venacti with a 12.25-inch reflector. When the plate is developed, it shows an unknown nebulous object some 25 minutes of arc northeast of the galaxy. He does not see the object when he examines the same spot again on April 6. (F. W. Longbottom, “Comet or ______?” The Observatory 31 (1908): 215–216)

May — Late evening. Helen C. Peterson sees a string of lighted beads in the sky over Great River, Long Island, New York. The first light stops and as the others reach it, they seem to bump into it. It grows a little bigger, appearing like a large star. Suddenly it begins to spin like a pinwheel, but without sparks. The motion stops and what looks like a very bright star takes off at great speed toward the southeast. (Clark III 1168–1169)

June 30 — 7:14 a.m. A large explosion takes place near the Podkamennaya Tunguska River in Yeniseysk Governorate [now Krasnoyarsk Krai], Russia. Evenki natives and Russian settlers in the hills northwest of Lake Baikal observe a column of bluish light, nearly as bright as the sun, moving across the sky. About 10 minutes later, there is a flash and a sound similar to artillery fire. Eyewitnesses closer to the explosion report that the source of the sound moves from the east to the north of them. The sounds are accompanied by a shock wave that knocks people off their feet and breaks windows hundreds of kilometers away. The explosion over the sparsely populated eastern Siberian taiga flattens 770 square miles of forest and possibly causes up to three human casualties. The event is generally attributed to the air burst of a meteoroid. It is classified as an impact event, even though no impact crater has been found. The object disintegrates at an altitude of 3–6 miles rather than hitting the surface of the Earth. The

area is so remote that the site is not inspected until 1927 by a team led by Russian mineralogist Leonid Kulik, who finds a zone about 5 miles across where trees are scorched and devoid of branches but still standing upright. More exotic explanations for the event include a black hole impact, antimatter, a UFO crash (as recently as 2004 by Russian ufologist Yuri Labvin), a nuclear explosion, and an inadvertent experiment by Nikola Tesla. (Wikipedia, “Tunguska event”; Hobana and Weverbergh 10–30; John Baxter and Thomas Atkins, The Fire Came By: The Riddle of the Great Siberian Explosion, Doubleday, 1976; Surendra Verma, The Mystery of the Tunguska Fireball, Thrilplok, 2005; Vladimir Rubtsov, The Tunguska Mystery, Springer, 2009; Phil Plait, “Aliens Saved Tunguska!” Bad Astronomy, May 29, 2009; Mark Peplow, “Rock Samples Suggest Meteor Caused Tunguska Blast,” Nature, June 10, 2013)

Summer — Repeated sightings of unidentified airships, sometimes flying against the wind, take place in Denmark. They usually have wings and searchlights; on one occasion, an antenna is seen jutting from the front end. Other reports are of oddly shaped clouds from which a searchlight emanates, sweeping the ground. (Willy Wegner, “The Mystery ‘Airship’ over Denmark in 1908,” The UFO Register 8, no. 1 (November 1977): 3–8; Clark III 1163)

July 25 — About 6:00 p.m. A “large airship sailing very high” is seen passing from north to south over the Forestville neighborhood of Bristol, Connecticut. It seems to be an elongated gas bag under which a framework with a propeller is suspended. After “maneuvering” a while, it stops and circles over Lake Compounce then changes course toward the southwest. An East Bristol man named Wilson later claims it was a pig-shaped balloon he had sent up for his daughter’s birthday party, but “balloon” sightings continue in Massachusetts through December. (“Large Airship Seen Sailing over East Part of Bristol, Ct.,” Boston Herald, July 26, 1908, p. 16; “The Lake Compounce Airship,” Willimantic (Conn.) Daily Chronicle, July 29, 1908, p. 26; Clark III 1163)

July 26 — A special agent force in the Department of Justice, forerunner of the FBI, is created by Attorney General Charles Bonaparte. Its first chief is Stanley Finch. Attorney General George W. Wickersham renames the force the Bureau of Investigation in March 1909. (Federal Bureau of Investigation, Timeline, March 31, 2002)

October — Skipper J. H. Stockman of the smack Superb is fishing in the North Sea 35 miles out of Lowestoft, Suffolk, England, when he sees a large “star” rise out of the water and approach his ship. He signals it with a red flare, and to his surprise he is immediately answered with a red flare above him. He then shows a white flare and receives a blue flare in response. The object appears sausage-shaped and carries a single light. It disappears in the direction of the Netherlands. (East Anglian Daily Times, May 20, 1909; Norfolk News, May 22, 1909; Clark III 1163; David Clarke, “Scareships over Britain: The Airship Wave of 1909,” Fortean Studies 6 (1999); Patrick Gross, URECAT, August 17, 2013)

1909

1909 — Night. Frederick G. Hehr sees a bright white light executing a “curious dance” over a village one mile away in East Frisia, Lower Saxony, Germany. A minute later the light suddenly streaks in his direction, coming within 300 feet as it passes by at 60 feet altitude. Three seconds later it is gone. (“Report from the Readers,” Fate 4, no. 5 (July 1951): 95–96; Clark III 1169)

May 9 — 11:20 p.m. Miss H. M. Boville notices from her bedroom window at Southend-on-Sea, Essex, England, a “large dark object looming out of the sky” and traveling slowly from the east. After a few seconds it remains nearly stationary for a few minutes in front of her window, and she sees the outline of a torpedo-shaped airship about

May 16 — 1:30 a.m. A Mrs. Wigg, who lives near Belle Vue Park on Yarmouth Road, Lowestoft, Suffolk, England, wakes up to an engine-like sound. She looks out her window and sees a long, dark, bottle-shaped object pass by at a low altitude. She thinks she can see a man in front, steering the craft. Other people in Lowestoft hear engine sounds and flashes of light around the same time. (East Anglian Daily Times, May 18–19, 1909; Norfolk News, May 19, 1909, p. 13; David Clarke, “Scareships over Britain: The Airship Wave of 1909,” Fortean Studies 6 (1999))

May 17 — The subject of mystery airships is brought up in a debate in the House of Commons. Arthur Fell, MP for Great Yarmouth, England, had asked Secretary of State for War Richard Haldane if he could give the number of dirigibles, either built or in progress of being built, in Germany. Haldane replies that 7 dirigible airships have been built and another 5 are under construction. Horatio Myer, MP for Lambeth North, follows up by asking Haldane: “Will the honourable gentleman, in any report he may circulate, tell us about a certain dirigible supposed to be hovering about our coast?” The question is greeted with laughter and Haldane does not reply. (Neil R. Storey, Zeppelin Blitz: The German Air Raids on Great Britain during the First World War, History Press, 2015)

May 18 — 11:00 p.m. Charles Lethbridge (part-time dock worker and Punch-and-Judy showman) is traveling on a “spring cart” from Senghenydd on his way home to Cardiff, South Wales. At the summit of Caerphilly Mountain he sees a long, tube-shaped object sitting on the grass by the roadside, with two men busily working on something. They are wearing heavy fur coats and fur caps that fit tightly over the heads. Lethbridge proceeds to about 60 feet of them when they notice him and start jumping up and jabbering in a foreign language. They quickly pick up something from the ground, then jump into a little carriage suspended from the object (with wheels at the bottom), which rises into the air in a zig-zag fashion. When it clears the telegraph wires, two electric lights shine out and the craft heads toward the southeast. Lethbridge returns to the site with a newspaper reporter and they find signs of trampling in the grass for about 45 feet. They also pick up a small red French military label, letterhead from a London stockbroker, many newspaper clippings with references to airships or the German army, and a tin box with paste for polishing metal. (“Airship Mystery,” The Guardian (London), May 20, 1909, p. 7; “Mystery of the Air,” London Daily Express, May 20, 1909, p. 1; Nick Redfern, “UFOs over Wales: A 1909 Wave,” Mysterious Universe, May 23, 2016; Brett Holman, “What the Showman Saw,” Airminded, November 17, 2014)

May 19 — 1:15 a.m. Robert Westlake, railroad signalman at King’s Junction in the Queen Alexandra Dock at Cardiff, Wales, sees a cigar-shaped object flying swiftly at perhaps 2,600 feet and making a whizzing noise. It has two lights and is moving eastward. Some dock workers who are loading the SS Arndale also see the object for “a minute or two.” It passes over the Bristol Channel towards Weston-super-Mare. Aeronaute Percival G. Spencer says that he recently sold several of his “man-lifting” 25-foot-long model airships to advertising firms in the UK, one of them in Cardiff. (London Globe, May 19, 1909; Brett Holman, “Wednesday, 19 May 1909,” Airminded, May 19, 1909; London Standard, May 21, 1909; Brett Holman, “Friday, 21 May 1909,” Airminded, May 21, 2009)

May 19 — 12:00 midnight. A Mr. Chatten, grocer’s assistant, is cycling home to Tharston, Norfolk, England, when he is dazzled by a bright light with a bluish tinge overhead. It switches off for a few seconds, and Chatten can see a

July 23 — 12:00 noon. Mrs. James Russell and several schoolchildren in Kelso, New Zealand, see an airship shaped like a boat that flies toward them from the east, circles above the school, and returns in the same direction. It seems to have a propeller. (Bill Chalker, “Early Australian Historical Encounters,” 1997; Bryan Dickeson, “The ‘1909 Kelso Airships’ of New Zealand,” Ufocus NZ, July 22, 2020)

July 30 — 5:00 a.m. Two men working on a dredge on the Mataura River north of Gore, New Zealand, see a lighted object descend out of the mist. It appears to be a narrow, boat-shaped craft that circles the dredge over a period of several minutes, rising and falling like a bird, and varying its speed. Two figures can be seen inside. It disappears into the mist, leaving behind a yellow glare. (Bill Chalker, “Early Australian Historical Encounters,” 1997; Tony Brunt, “The New Zealand UFO Wave of 1909,” Ufocus NZ, July 22, 2020)

August 3 — Night. A man is riding in Waipawa, New Zealand, when his horse becomes nervous. He sees a large, gray, torpedo-shaped object passing overhead. Three persons are visible in it, one of whom shouts to him in an unknown language. The object rises to a great height, showing lights fore and aft. After circling around, it disappears behind a hill. (Clark III 261; Hawkes Bay Herald, August 6, 1909; Tony Brunt, “The New Zealand UFO Wave of 1909,” Ufocus NZ, July 22, 2020)

August 7 — 10:30 p.m. Four young men at brick kilns near the railway station in Goulburn, New South Wales, see a bright, pale blue light arise from behind some hills to the east. After ascending, it circles back in the direction it came from. The object is said to be visible every night from August 5–10. (“The Goulburn ‘Airship,’” Sydney (N.S.W.) Morning Herald, August 11, 1909, p. 10; Bill Chalker, “Historical Australian UFO Reports,” UFO Research Australia Newsletter 4, no. 3 (Nov.–Dec. 1983): 27)

August 9 — 7:30–8:00 p.m. A flying object with lights on its front and back sails at a great altitude from west to east over Concord, New Hampshire, eventually disappearing into a cloud. Capt. Lyman Jackman at first thinks it is a balloon, but its estimated speed of 45–50 mph against the wind leads him to think otherwise. (“Air Ship or Meteor,” Concord (N.H.) Evening Monitor, August 10, 1909, p. 3) At about the same time, Bertha Niles of Vale Perkins, Quebec, watches a similar lighted object moving west to east. (“Air Ship or What?” Concord (N.H.) Evening Monitor, August 13, 1909, p. 7)

August 9 — Night. Residents of Moss Vale, New South Wales, watch a large lighted object like an airship float over the town. (“Is It an Airship?” Sydney (N.S.W.) Morning Herald, August 10, 1909, p. 7)

August 18 — 2:30 a.m. Four men (Capt. Edward P. Sisson, Ernest T. Newton, Prentice Lanphear, and Edward M. Knapp) at the Coast Guard life-saving station on the south side of Fishers Island, New York, see a winged airship 60 feet long and 20 feet wide. Moving swiftly against the wind, it moves in from the northeast, its engines whirring and a dazzling white light at its head. Two dark figures can be seen in the center of the object. Visible for 3 minutes, the object moves off to the west. (“Fishers Islanders See Big Aeroplane,” Providence (R.I.) Journal, August 19, 1909, p. 1)

September — 7:30 p.m. E. B. Hanna of South Windham, Connecticut, watches a high-flying, meandering “searchlight” along Windham Center Road for about an hour. After heading toward him, it changes direction and moves southward. (“What Mr. Hanna Saw May Have Been the Worcester Airship,” Willimantic (Conn.) Chronicle, December 14, 1909, p. 8)
September 3 — 9:00 a.m. Several hundred residents of Bloomingdale, Indiana, see a “dirigible balloon” pass over the city for 15 minutes. The car beneath the gas bag is plainly visible. (“Sights Strange Airship,” Indianapolis Star, September 4, 1909, p. 5)

September 20 — During the opposition of Mars, astronomer Eugène Antoniadi uses the 83cm aperture telescope at Meudon Observatory in Paris, France, to observe Mars. He sees no canals. The outstanding photos of Mars taken at the new Baillaud dome at the Pic du Midi Observatory in the French Pyrenees also bring formal discredit to the Martian canal theory, and the notion of canals begins to fall out of favor. Around this time, spectroscopic analysis also begins to show that no water is present in the Martian atmosphere. (Wikipedia, “Martian canal”)

September 30 — Evening. A balloon “supposed to be from Chicago” passes over Edinburgh, Indiana. Its anchor somehow gets entangled in high-tension wires of the traction station for the Indianapolis, Columbus, and Southern interurban rail. It moves south to Taylorsville a few minutes later, and it is so low to the ground that the occupants are able to talk to passersby. (“Tramp Balloon Snaps Wires,” Indianapolis Star, October 1, 1909, p. 9)

October — 10:30 p.m. Rev. Ruth Smith and some church members are riding in a wagon in La Porte, Indiana, when the horses rear and a blinding light splashes across the road. A large structure resembling two inverted bowls, separated by a row of lights, is hovering, with several phosphorescent beams extending to the ground. It is encircled in a corona of light and begins moving slowly. After 15 minutes, it blinks out. (Lore and Deneault, p. 97; Clark III 1169)

December 13 — 10:00 p.m. A. W. Norris of Mabelvale, Arkansas, sees a bright, bobbling light moving through the air about 300 feet above him from the south. (“Airship Flies near Little Rock, Perhaps,” Little Rock Arkansas Gazette, December 15, 1909, p. 7)

December 22 — 6:30 p.m. Many residents of Worcester, Massachusetts, see a “brilliant ray” emitted by a large black object 1,000 feet high in the southwestern sky. After circling over the town, the object heads to the west, where it is seen over Marlboro. It returns to Worcester between 7:00 and 7:30 p.m., flying at low altitude and sporting a searchlight. One policeman thinks he sees enormous wings; others detect one or two figures inside. The airship is attributed to a Worcester businessman named Wallace E. Tillinghast, who has told the Boston Herald on December 12 that he has invented a heavier-than-air monoplane and has made more than 100 test flights at night to Boston and New York City. But Tillinghast never offers his aircraft for public viewing, and people gradually realize it is a hoax. (“Tells of Flight 300 Miles in Air,” Boston Herald, December 13, 1909, p. 1; “Airship Seen in Two Cities,” Boston Globe, December 23, 1909, p. 1; Clark III 1165; Stephen Whalen and Robert E. Bartholomew, “The Great New England Airship Hoax of 1909,” New England Quarterly 75, no. 3 (September 2002) :466–376; Hilary Evans and Robert E. Bartholomew, Outbreak!, Anomalist, 2009, pp. 483–486)

December 23 — 10:00 p.m. Thousands of citizens of Boston, Massachusetts, and neighboring communities see an airship with lights flying at an altitude of around 400 feet. Alex Randall of Revere reports wings, tail, and propeller, but other observers only see a cylindrical shape at most. (“Skyship of Mystery Flies above Boston,” Boston Journal, December 24, 1909, p.1; Clark III 1165)

1910

January 12 — 4:30 p.m. An unknown airship flies high over Huntsville, Alabama, against the wind, from southwest to northeast, disappearing over the crest of Chapman Mountain. (“Strange Airship,” Huntsville (Ala.) Journal, January 13, 1910, p. 1)

January 14 — 6:55 p.m. Two men on Summit Hill in Knoxville, Tennessee, see a large airship moving south. Its outlines are distinct. The men hear a hum of machinery and see sparks from “its motors.” (“Positive That They Saw an Airship,” Knoxville (Tenn.) Journal, January 15, 1910, p. 7)
Summer — Morning. Lawrence J. Crone is playing on a baseball field in the Violetville neighborhood of Baltimore, Maryland, when he sees a metallic, brown, blimplike object, more than 100 feet long, hovering above a pine tree 200 feet away. It has a row of colored, rectangular windows. Through one he can see as many as 20 strange entities taking turns looking at him. Their heads are pointed, and they are dressed in light-colored garments with a fur-like texture. Each has small dots for eyes and a slit for a mouth. Two other young men also see the object and are badly frightened. (Clark III 262; Patrick Gross, URECAT, February 20, 2013)

Summer — Night. Carl H. Darden is riding near Vernal, Utah, when he notices that his horse is acting strangely. He dismounts and walks the horse into a clearing, where he sees a row of lights a few feet above the ground. They are attached to a huge, hovering disc. After watching it a while, he steps toward it, and it makes a buzzing sound as if in warning. As he advances, it rises slowly into the sky until it reaches an altitude of several hundred feet, when it suddenly streaks off to the north. (Clark III 1169)

October 25 — 5:30 p.m. A mystery airship is seen at Minderoo Station, Western Australia, by Mrs. A. J. Roe, wife of the station manager. She says it “looked compact, like a dirigible balloon, but it appeared to be squarer and more like an aeroplane. The sun shone on it, and flashes came from it, as though reflected from something revolving, or from metal work.” Three station hands also see the object. (“Mysterious Airship Sighted at Onslow,” Sydney (N.S.W.) Morning Herald, December 5, 1910, p. 9; Bill Chalker, “Early Australian Historical Encounters,” 1997; Brett Holman, “Scareships over Australia—IV,” Airminded, October 27, 2010)

October 27 — 1:10 a.m. An airship with a powerful headlight and red and green taillights is seen flying at 600 feet above Swift Current, Saskatchewan. Observers at Irvine, Alberta, see it at 4:45 a.m. going west. It is also seen at Medicine Hat, Alberta, flying southwest. (“Unknown Aeronaut in Alberta,” Calgary (Alberta) Herald, October 27, 1910, p. 1)

October 29 — 5:30 a.m. Two objects flying at a great altitude are seen over East Providence, Rhode Island, by newspaper workers and others up early. They are too distant to be recognized as dirigibles or balloons, but they resemble luminous pumpkins. One is far ahead of the other, but both are “cutting pigeon wings, looping aerial loops, circling and diving like birds and generally doing skylark stunts.” (“Aviators Seen High Up in Air near City,” Providence Journal, October 30, 1910, p. 1)

1911

January 9 — Harvard astronomer William H. Pickering tells the Boston Post that he believes Venus is populated by “huge monsters and lizards such as roamed the earth ages ago.” He adds that “If human life exists on Venus, the people do not live as we do.” (“Olden Monsters Inhabit Venus?” Chicago Tribune, January 9, 1911, p. 8)

May 5 — 5:00 p.m. William Nixon is working at his father’s sawmill 18 miles from St. George, Queensland, Australia, when he sees a flying machine carrying two men, one of whom is dressed in dark clothing. He estimates it is traveling from south to northwest at about 1,000 feet. (“Mysterious Airships,” Perth West Australian, May 15, 1911, p. 5)

July 22 — Evening. A ball of fire the size of the full moon is seen for several hours at Durango, Colorado. For a time it grows even larger, then diminishes in size until it disappears entirely. (“Large Ball of Fire Is Seen in the Sky,” Reno (Nev.) Evening Gazette, July 25, 1911, p. 1)

August 3 — 9:00 p.m. Adam H. McCullough and his wife Carrie are driving on Brinkerhoff Avenue in Mansfield, Ohio, when they notice a light, as brilliant as an arc light, in the northern sky. It has an apparent size of 6 inches and looks to be about 50 feet up. It remains visible for several minutes then fizzles out. (“A Phenomenon,” Mansfield (Ohio) News, August 4, 1911, p. 10)

1912

April 8 — Sunset. Charles Tilden Smith at Little Bedwyn, Wiltshire, England, observes the apparent fan-shaped shadow of a stationary object 45° in the sky against the altostratus cloud layer. The dark patch remains stationary against the moving clouds and is visible for 30 minutes. Meteorologist Charles John Philip Cave suspects the object is a
Fall — About 2:30 p.m. C. F. Rowling, 15, and two friends see three perfectly round, pale-green objects less than a mile away in the northern sky over Alameda, California. They are traveling in parallel with the horizon in a vertical formation (one atop the other) and heading west. They are completely silent and 75–100 feet in diameter. He watches them for 10 seconds before they pass behind some trees. (Clark III 1170)

October 14 — 7:00 p.m. Noise from an unseen aircraft startles the residents of Sheerness, Kent, England. Nearby at Eastchurch, residents light flares to guide the craft in case it needs to land. The incident comes up in a debate in Parliament on November 21. MP William Joynson-Hicks asks First Lord of the Admiralty Winston Churchill whether the government has any zeppelins capable of traveling at 60 mph, but Churchill answers no. However, some authorities conclude that the incident is caused by the intrusion of the LZ 13 Hansa Zeppelin over British airspace. (“The Alleged Visit of a Foreign Airship,” London Times, November 22, 1912, p. 8; Brett Holman, “The Sheerness Incident,” Airminded, October 14, 2007; Brett Holman, “Secrets of the German Aërial Fleet—I,” Airminded, May 29, 2013; Hilary Evans and Robert E. Bartholomew, Outbreak!, Anomalist, 2009, pp. 486–487; UFOFiles2, p. 6)

1913

January 4 — 5:00 a.m. Council worker John Hobbs hears aerial motors at Dover, England, and sees a light speeding toward him from the sea in a northeasterly direction. It is moving steadily despite a gale-force wind. Two other people, tradesman Mr. Langley and Police Constable Pierce, hear the noise but do not see the object. (“Unknown Aircraft over Dover,” London Times, January 6, 1913, p. 6; “Mysterious Airship,” London Daily Telegraph, January 6, 1913; Brett Holman, “Monday, 6 January 1913,” Airminded, January 6, 2013)

January 6 — 10:00 p.m. Two lights “thought to be the lamps of an airship” maneuver in the sky over Lavernock Battery, Vale of Glamorgan, Wales. (“Mystery Airships,” London Daily Express, January 7, 1913, p. 5; Brett Holman, “Friday, 10 January 1913,” Airminded, January 10, 1913)

January 17 — 4:45 p.m. Capt. Lionel Lindsay, chief constable of Glamorganshire, watches a large, fast-moving object above Cardiff, Wales, leaving in its wake a dense volume of smoke. Other witnesses see the light moving west from Cardiff at considerable speed. (“An Airship over Cardiff,” London Times, January 21, 1913, p. 10; Brett Holman, “Tuesday, 21 January 1913,” Airminded, January 21, 2013)

January 25 — 7:00–8:30 p.m. Several people see a mysterious aircraft over the Clubmoor neighborhood of Liverpool, England. It is traveling about 25 mph and carries a brilliant light. (“Aircraft over Liverpool,” London Times, January 28, 1913, p. 13; Brett Holman, “Tuesday, 28 January 1913,” Airminded, January 28, 2013)

January 27 — 9:00 p.m. A resident of Stretford, Greater Manchester, England, sees an aircraft “like a huge ball” passing silently overhead in a southerly direction. He estimates its speed at 40 mph and its altitude as 700 feet. It has a yellowish light that later turns light red. When it is over Eccles, it turns westward in the direction of Liverpool. (“Is It a German Airship?” London Daily Express, January 31, 1913, p. 5; Brett Holman, “Friday, 31 January 1913,” Airminded, January 31, 2013)

January 29 — 8:00 p.m. An airplane with a powerful searchlight is seen over Iași, Romania, coming from the direction of Russia. It maneuvers over the town and then moves toward the barracks. Troops are mustered out and signals are given for the aviator to land. Two warning shots are fired, but the lights go out and the object disappears. Other mystery aircraft are seen this month at military barracks in Focșani, Brăila, and Târgoviște. (“‘Russian Aeroplane’ Scare in Roumania,” Manchester Guardian, January 31, 1913, p. 9; Romania 8–9)

February 1 — Evening. A Russian airplane equipped with a searchlight is seen maneuvering over Lvov, Ukraine. Another mystery plane, making signals, is spotted over Ternopil, Ukraine. (London Globe, February 4, 1913, p. 3; “Airplane Fired at,” London Daily Express, February 3, 1913, p. 7)

February 2 — 7:30 p.m. Police Constable Church at Aberavon, Wales, watches an airship flying for an hour over Swansea Bay and the Mumbles. (“Another Mysterious Airship,” London Times, February 3, 1913, p. 6; Brett Holman, “Monday, 3 February 1913,” Airminded, February 3, 2013)
February 2 — 8:45 p.m. Mr. Trubshaw of East Croydon, England, sees an airship come in from the southeast and disappear rapidly to the northwest. Rays of light stream from it on the right and the left and downward. Others see the object, said to be moving with the wind. (“Mysterious Fly-by-Night,” London Daily Express, February 3, 1913, p. 7)

February 5 — Evening. Numerous witnesses in Newport, Cardiff, and Neath, South Wales, watch a “dirigible” carrying a bright light pass in a northwesterly direction. (“The ‘Mysterious Airship’,” Manchester Guardian, February 6, 1913, p. 9; Brett Holman, “Thursday, 6 February 1913,” Airminded, February 6, 2013)

February 9 — 9:00 p.m. An earth-grazing meteor procession is seen from locations across Canada, the northeastern United States, and Bermuda, and from many ships at sea, including eight off Brazil, giving a total recorded ground track of over 7,000 miles. The meteors are particularly unusual in that there is no apparent radiant—no point in the sky from which the meteors appear to originate. Witnesses are surprised to see a procession of between 40 and 60 bright, slow-moving fireballs moving from horizon to horizon in a practically identical path. Individual fireballs are visible for at least 30 to 40 seconds, and the entire procession takes some 5 minutes to cross the sky. Subsequent observers also note a large, white, tailless body bringing up the rear, but the various bodies making up the procession continue to disintegrate and travel at different rates throughout their course, so that by the time observations are made in Bermuda, the leading bodies are described as “like large arcs in appearance, slightly violet in colour,” followed closely by yellow and red fragments. Research carried out in the 1950s by Alexander D. Mebane uncovers a handful of reports from newspaper archives in the northern United States. At Escanaba, Michigan, the Press states the “end of the world was apprehended by many” as numerous meteors travel across the northern horizon. In Batavia, New York, a few observers see the meteors and many people hear a thundering noise, while other reports are made in Nunda and Dansville, New York (where several residents again think the world is ending) and Osceola, Pennsylvania. The observations are analyzed in detail later in 1913 by the astronomer Clarence Chant, leading him to conclude that as all accounts are positioned along a great circle arc, the source is a small, short-lived natural satellite of the Earth. One curious feature of the reports, highlighted by Mebane, is that several appear to indicate a second meteor procession on the same course around 5 hours later, although the Earth’s rotation means that there is no obvious mechanism to explain this. One observer, A. W. Brown from Thamesville, Ontario, reports seeing both the initial meteor procession and a second one on the same course at 2:20 a.m. the next day. Chant’s original report also refers to a series of three groups of “dark objects” that pass on the same course as the previous meteors from west to east over Toronto on the afternoon of February 10, which he suggests are “something of a meteoric nature.” (Wikipedia, “1913 Great Meteor Procession”; Clarence A. Chant, “An Extraordinary Meteoric Display,” Journal of the Royal Astronomical Society of Canada 7 (1913): 145–191; Alexander D. Mebane, “Observations of the Great Fireball Procession of 1913 February 9, Made in the United States,” Meteoritics 1, no. 4 (1956): 406–421; Condon, pp. 570–571; Chris Rutkowski and Geoff Dittman, The Canadian UFO Report, Dundurn Press, 2006, pp. 31–35; “Sample Press Coverage of the 1913 Meteor Procession,” UFO Historical Revue, no. 12 (September 2006): 7; Martin Shough and Wim van Utrecht, Redemption of the Damned, vol. 1, Anomalist, 2019, pp. 383–385)

February 25 — 8:00 p.m. Coast guards at Hornsea, Yorkshire, England, see a bright light traveling to the west and report it to the Admiralty. Robert Falconer Jameson watches it through binoculars and sees that the lights are attached to a cone-shaped craft. A little later, the object appears over Hull, seen by crowds in the city center and Paragon Interchange for over an hour. It alters its course frequently and hovers occasionally. (“Airship Mystery,” London Daily Telegraph, February 26, 1913, p. 11; Brett Holman, “Wednesday, 26 February 1913,” Airminded, February 26, 2013)

March 13 — 6:00 p.m. Two women walking along a forest road by the Schwilowsee between Caputh and Ferch, Brandenburg, Germany, observe an airship catch fire and explode. The fire brigades of three villages, 40 riflemen from a local garrison, and several police officers and medical attendants rush to the scene. They search the woods south of Potsdam until early morning but find nothing. Though the women are considered trustworthy, they are
April 8 — 8:23 p.m. An airship reappears over Cardiff, Wales, once again seen traveling at high speed to the southwest by Chief Constable Lionel Lindsay. (“The Cardiff Aerial Mystery Again,” Manchester Guardian, April 9, 1913, p. 9; Brett Holman, “Wednesday, 9 April 1913,” Airminded, April 9, 2013)

May (or May 1914) — Morning. Silbie J. Latham, 12, is working with his brothers Sid and Clyde on a cotton farm 2.5 miles west of Farmersville, Texas. Their two dogs, on the other side of a picket fence 50–75 feet away, begin barking and howling. The boys stop work and go to investigate. They see a little man, dark green in color and 18 inches high, who “looked like he was sitting on something.” His arms are hanging down by his sides. He has a Mexican-looking hat on, but no other clothes. Right after the boys get there, the two dogs jump him and tear him to pieces. Blood and internal organs spew out, but it doesn’t cry out. The boys go back and check the spot the next day, but the remains are gone. (Clark III 262; Patrick Gross, URECAT, October 19, 2006)

June 29 — Sunset. An aerial object passes over Lansing, Michigan, from southeast to northwest at a great height. It moves swiftly, taking only 3 minutes. (“Strange Aircraft Passes over Lansing at Great Rate of Speed Sunday,” Lansing (Mich.) State Journal, June 30, 1913, p. 3; Clark III 1167)

October — Swiss astronomer Fritjof Le Coultre at the Geneva Observatory in Switzerland reports seeing “bluish-white flashes” on Mars for 17 consecutive nights. Lowell Observatory in Flagstaff, Arizona, also observes them. However, astronomer Guillaume Bigourdan at the Paris Observatory thinks the flashes are merely “auto-suggestion.” (“Is Mars Trying to Signal Us?” Santa Cruz (Calif.) Evening News, November 24, 1913, p. 1)

1914

1914 — 3:00 p.m. Hans M. Schnitzler, 7, is sitting in his front yard in Pawtucket, Rhode Island, when he hears a musical humming sound and sees a 30-foot domed object about 25 feet away hovering about 10 feet above the ground across the street in front of a church. An opening appears and eight small entities emerge and begin singing a melody over and over again. Then they return inside. The object rises slowly and disappears behind the church. He remembers the melody and plays it on his harmonica years later. (“Correspondence,” CUFOS Associate Newsletter 3, no. 6 (Dec. 1982/Jan. 1983): 3)

March — Twilight. A farmer is returning to his house at Lajoumard, Haute-Vienne, France, when he sees a round, green, luminous object hovering just above a hilltop. Several small beings emerge, walk around the machine, and go back inside. The object takes off. (Clark III 262; Patrick Gross, URECAT, March 3, 2013)

Summer — Mid-afternoon. For about 60 minutes at Mount Lyndhurst Station, South Australia, an unusual substance floats by at a constant altitude. Some pieces, 6–8 inches long, fall to earth and leave no trace. (Keith Basterfield, “Angel Hair: An Australian Perspective,” IUR 27, no. 1 (Spring 2002): 6)

June — 4:00 a.m. Gustav Herwagen sees a cigar-shaped object with luminous portholes in a field next to his house in Hamburg, Germany. Near it are 4–5 dwarfs about 4 feet tall. He walks toward them, but they flee inside the ship, which ascends and disappears. (Clark III 262; Patrick Gross, URECAT, November 28, 2007)

August — William J. Kiehl, 18, is with seven others in a small cove along the shore of Georgian Bay, Ontario. They see a strange machine on the surface of the lake. Two little men wearing square masks and purple-green coveralls are working with a hose leading from the water to inside the UFO. Three other figures, dressed in khaki, are adjusting some rods that are pulsating with various colors. The beings notice the group watching them and run into the machine, which starts vibrating with colors. It starts to ascend, but one being has not made it inside and is hanging on. After hovering 12 feet in the air to balance itself, it rapidly accelerates upward. A likely hoax. (“Old-Timer Tells of Outer Spacemen in Letter to Wanake Police Officer,” Paterson (N.J.) News, August 15, 1966, p. 9; Clark III 262; Lorenzen, Encounters with UFO Occupants, Berkley Medallion, 1976)
August 10–11 — Night. Maj. Becke, commander of defenses at Barrow-in-Furness, Cumbria, England, reports that two or three cigar-shaped airships are seen above the Vickers shipyard. Soldiers fire upon them with machine guns and the only anti-aircraft battery on the west coast. (UFOFiles2, p. 7–8)

August 11–September 9 — Many British residents in South Africa observe a mystery monoplane that is assumed to be on a German reconnaissance mission. Most of the sightings are at night and at a distance. The government issues a statement on August 29 that there are no Union airplanes in South Africa, so any mystery aircraft are assumed to be enemies and should be fired upon. (“The Aeroplane,” Cape Times, August 21, 1914; “Aeroplanes in the Union,” Cape Times, August 22, 1914, p. 7; “Mysterious Airship at Sanday,” Pretoria News, August 24, 1914, p. 5; “Aeroplane Mystery,” Johannesburg Star, August 26, 1914, p. 4; “The Mysterious Aeroplane,” Cape Argus, August 27, 1914, p. 5; “Aviator Discusses Air Visitors,” Cape Times, September 5, 1914, p. 5; Hilary Evans and Robert E. Bartholomew, Outbreak! Anomalist, 2009, pp. 487–489)

August 14 — Afternoon. A large ball of fire sweeps over the southeast portion of Montpelier, Vermont, seen by employees of the C. P. Gill stone cutting plant near the Winooosi River. It is accompanied by a loud noise. One man says the heat of the object has scorched his hands. The plant motor stops as the object passes over, and insulation from some electrical wires is found burned off. (“Great Ball of Fire,” Rutland (Vt.) Daily Herald, August 18, 1914, p. 5)

Autumn (or 1915) — Dusk. A man is having an outdoor meal with his family in Bujoreanca, Romania, when they see a reddish object moving to the east 60 feet above the ground, causing trees to bend from its movement, and making a whistling noise. It leaves a trail of glowing sparks and reappears for 6–7 days in the same position. (Hobana and Weverbergh 224)

September — Two schoolboys named Uden and Hopkins are wandering along Caerphilly Mountain, South Wales, when they encounter an unexpected mist. Two white humanoid figures with piercing eyes and unusually tall hats are standing at the edge of it. They approach, and the boys take off. (Clark III 262–263; Patrick Gross, URECAT, March 5, 2013; Center for UFO Studies, HUMCAT Index 1910–1939, p. 9)

September 9 — Mid-day. Amateur astronomer William Herbert Steavenson points his 3-inch refracting telescope in West Norwood, south London, England, at the planet Mercury, then about 8° distant from the Sun, when a round, luminous object the apparent size of the planet, but brighter, speeds across his field, passing centrally from south to north in about 3 seconds. A few seconds later, another appears going in the same direction. More follow, and the display continues until at least 3:00 p.m. when the sky becomes overcast. He watches several hundred bodies pass; about half are perfectly round and the rest are dumbbell shaped. All the objects are well defined and intrinsically brighter than Venus. The prevailing color is yellowish white. Steavenson sends a telegram to the Rev. T. E. R. Phillips at Ashstead, Surrey, but the sky is now overcast and he cannot confirm the observation. Steavenson thinks high-altitude seeds are the most likely explanation. (W. H. Steavenson, “Bright Objects Observed near the Sun,” Journal of the British Astronomical Association 25 (1914): 36–38)

October 10 — Afternoon. Albert Alfred Buss is observing the sun using a spectrographic telescope at Manchester, England, when he sees an “absolutely black spindle-shaped object” against the sun. (Albert Alfred Buss, “Cosmic and Terrestrial Flotsam and Jetsam,” English Mechanic 100 (October 14, 1914): 256)

November 21 — Some 20–30 people watch an airship flying at 2,300 feet descend to about 1,300 feet and shine a searchlight on a passing ship near Skjærsvær lighthouse on the island of Mindlandet, Nordland, Norway. (“Airship at Tjølta,” Morgenbladet, November 25, 1914, p. 2; Clark III 1167–1168)

December 15 — 4:10 p.m. The crew of a Hull trawler, the SS Ape, is streaming toward Great Yarmouth, Norfolk, England, when they see a “black object astern” which gradually approaches them. It turns and heads for the Lincolnshire coast where it vanishes in the fog. (UFOFiles2, p. 8)
1915

February 14 — 9:15 p.m. The mayor and three city constables of Brockville, Ontario, see the lights of unknown aircraft crossing the St. Lawrence River heading for Ottawa. They can hear the sound of motors. A second flying machine is heard as it crosses the river from the direction of Morristown, New York. Three balls of fire drop from it into the river. Two more objects pass from the east and west ends of Brockville. The mayor, who has seen one of the planes flash a searchlight beam that lights up a city block, tells the police chief to alert the mayor and police chief in Ottawa. At 9:30 p.m., the mayor of Gananoque, Ontario, reports that two invisible aircraft are heard flying over his town. Prime Minister Robert Borden hears about the reports and orders the lights on Parliament Hill to be turned off at 11:15 p.m. The entire city follows suit 5 minutes later. The airplanes do not reappear, but Ottawa is placed on high alert. Later, Brockville police find two paper balloons that might explain the sightings. (“Ottawa in Darkness Awaits Airplane Raid,” Toronto Globe, February 15, 1915, pp. 1–2; “Scare in Ottawa over an Air Raid,” New York Times, February 15, 1915, p. 1; Brett Holman, “The Air Raid That Didn’t,” Airminded, February 13, 2014; Hilary Evans and Robert E. Bartholomew, Outbreak! Anomalist, 2009, pp. 492–493; Chris Rutkowski and Geoff Dittman, The Canadian UFO Report, Dundurn Press, 2006, pp. 36–38)

February 15 — Early morning. Residents in a Toronto, Ontario, suburb notify police of a “strange aeroplane” hovering above their homes. Later, a man in Guelph sees “three moving lights passing over” the Ontario Agricultural College. He alerts other residents in his boarding house and they watch the silent lights until dawn. (Chris Rutkowski and Geoff Dittman, The Canadian UFO Report, Dundurn Press, 2006, pp. 37–38)

Late June — Just before dawn. Cecilia Peel Yates of Ashburton, Devon, England, is awakened by her dogs barking. She sees outside her bedroom window a bright light in the sky bearing north. It disappears in the direction of Haytor rocks on Dartmoor. This incident is followed by others at Hexworthy and Dartington in July and August, so much so that British Naval Intelligence sends two officers out to investigate. (Nick Redfern, “UFOs and the Military, 1915: Pt. 1,” Mysterious Universe, May 7, 2014; Nick Redfern, “UFOs and the Military, 1915: Pt. 2,” Mysterious Universe, May 8, 2014)

September 4 — 9:30 p.m. Two British Naval Intelligence officers, Lt. Col. William Price Drury and Lt. C. Brownlow, on Dartmoor, Devon, England, watch a “bright white light, considerably larger in appearance than a planet” ascend steadily from a meadow to a height of 50–60 feet. It then swings 300 feet or so to the left and suddenly vanishes. The officers have been investigating reports of similar lights seen in the region during the summer. In December, GHQ Home Forces issues a 16-page confidential report on the investigation and concludes there is “no evidence on which to base a suspicion that this class of enemy activity ever existed” and that 89% of the reports are explained. Some “moving lights in the air” are attributed to marsh gas. (Nick Redfern, “UFOs and the Military, 1915: Pt. 1,” Mysterious Universe, May 7, 2014; UFOFiles2, pp. 11–12)

1916

January 31 — 8:25 p.m. Royal Flying Corps Lieut. Reginald Maxwell is cruising his B.E.2c biplane at 10,000 feet near Romford, Essex, England, patrolling for German Zeppelins. He sees an “artificial light” to the north. He follows it northeast for 20 minutes, but it moves higher and he loses it in the clouds. At the same time, Royal Flying Corps pilot Sub-Lieut. J. Eric Morgan, also flying a B.E.2c at 5,000 feet near Rochford, Essex, and looking for Zeppelins, sees an object about 100 feet away with a row of windows “like a railway carriage with the blinds drawn.” He tries to close on it, but his engine is malfunctioning. When he fires his pistol at it, the lights rise and rapidly disappear. Morgan is forced to make a crash landing. (Capt. Joseph Morris, *The German Air Raids on Great Britain, 1914–1918*, Sampson, Low, Marston, 1925, pp. 81–82; David Clarke, “Britain’s First Military UFO Encounter?” *Part 1* and *Part 2*, The Real UFO Project, 2004; UFOFiles2, p. 10; Patrick Gross, “Pilots UFO Sightings,” August 10, 2021, and “Near Rochford,” August 2, 2021)

February 29 — 4:30 a.m. John Tullyson, head watchman at Globe Elevators, and John Gustavson at the Carnegie Coal Dock in Superior, Wisconsin, hear an engine noise and see a large flying object “50 feet wide and 100 feet long,” with three lights, “one on each end and one in the middle.” Moving swiftly at 600 feet altitude, the object carries a long rope trailing behind it with a large object attached to it. Three “men” are inside the craft, one of them sitting in the front of the machine. The other two seem to be looking around. Possible Chinese lantern or airplane. (“Mysterious Aeroplane Continues Nocturnal Trips over Superior,” *Superior (Wis.) Telegram*, February 29, 1916, p. 5; Clark III 263; Patrick Gross, *URECAT*, March 16, 2013)

March 12 — Early evening. Claude D. McGee is walking home from a trip to a ranch outside Lowry, South Dakota, when he sees a strange glowing light in the hills ahead of him. Suddenly the light swings in a huge arc down into the valley but stays close to the wall of hills where it comes to rest. It stays there a few moments then swings back to where it had been about 2 miles away. It repeats the action twice then disappears. (Clark III 1171)

May 4 — Evening. Astronomers Charles Dillon Perrine and Anna Estelle Glancy observe an object resembling a comet at the National Observatory in Córdoba, Argentina. It is moving remarkably fast, moving 10° toward the sun within an hour and passes below the horizon. It has a prominent tail of 8°–10° in length. (“Comet or Meteor?” *Scientific American* 115 (1916): 493)

December 17 — On the Western front in Europe, Canadian soldier Maurice Philipp Tuteur and two sergeant majors watch a Zeppelin-like object rise into the clouds in the rear of their lines. It darts ahead at an estimated speed of 200 mph, turns around, darts backward, and shoots up and disappears. (“I Saw a Flying Saucer,” *Flying Saucers*, May 1959, pp. 6–18, 78; Clark III 1170)

1917

April 13 — Early morning. Two National Guardsmen from Company L of the Sixth Massachusetts Infantry are stationed on the bridge linking Portsmouth, New Hampshire, and Kittery, Maine, when they hear the noise of an airplane. They see an unidentified aircraft circling near the bridge. When it descends, apparently to make a pass at the bridge, one of the guardsmen panics and fires his rifle at it. It moves off and disappears in the distance. Other vague reports continue through April 30. (“Hunt for Aircraft Base,” *Manchester (N.H.) Union*, April 14, 1917, pp. 1, 3; Hilary Evans and Robert E. Bartholomew, *Outbreak! Anomalist*, 2009, pp. 496–497)

May 13 — Three shepherd children at the Cova da Iria in Fátima, Portugal—Lúcia dos Santos and her cousins Francisco and Jacinta Marto—report seeing a woman “brighter than the sun, shedding rays of light clearer and stronger than a crystal goblet filled with the most sparkling water and pierced by the burning rays of the sun.” The woman
wears a white mantle edged with gold and holds a rosary in her hand. She asks them to devote themselves to the Holy Trinity and to pray “the Rosary every day.” The children had seen an “angel” at the cove since the spring of 1916. (Wikipedia, “Our Lady of Fátima”)

June 13 — The three children at Fátima, Portugal, again see the lady, who reveals that Francisco and Jacinta will be “taken to heaven” soon, but Lúcia will live longer to spread the message. The lady also purportedly reveals to the children a vision of hell and entrusts a secret to them, described as “good for some and bad for others.” (Wikipedia, “Our Lady of Fátima”)

August 13 — Some 18,000 people have been flocking to Fátima and nearby Aljustrel, Portugal, drawn by reports of visions and miracles. The assembled multitude hears thunder and witnesses lightning in a clear blue sky. Then the sun grows pale and a cloud hovers above the oak tree where the apparitions usually appear. Provincial administrator Artur de Oliveira Santos, believing that these events are politically disruptive, takes the children into custody, jailing them before they can reach the Cova da Iria. Santos interrogates and threatens the children to get them to divulge the contents of the secrets.

August 19 — Instead of the promised apparition in the Cova da Iria on August 13, the children see the Virgin Mary at nearby Valinhos, Portugal. She asks them again to pray the rosary daily, speaks about the miracle coming in October, and asks them “to pray a lot.”

Late Summer — 12:30 p.m. John Boback is walking along railroad tracks in Youngstown, Pennsylvania, when he hears a swishing sound and sees an elliptical object about 100 feet away on the ground in a pasture. It has portholes emitting light from the interior and a smooth surface. Moments later the object ascends smoothly in a gradual climb and flies away to the east. (Lore and Deneault, pp. 104–105)

Early September — Witnesses at Salida, Colorado, watch distant moving lights flocking on and off over a period of several days. Through a telescope, one light appears to be a revolving wheel with lights on it. (Arlene Shovald, “Edwards’ UFO Sighting Not Salida’s First,” Salida (Colo.) Mountain Mail, September 7, 1995; Clark III 1171)

September 13 — With the three children in attendance, the crowd at the Cova da Iria, Portugal, see a “luminous globe” sail across the sky. A white cloud envelops the children and the oak tree. A rain of white roses is said to have fallen out of the heavens but dissolves just before landing. Behind the cloud, the crow can see Lúcia talking to the invisible lady.

October — Seven-year-old Elizabeth Klarer and her older sister Barbara have their first alleged encounter with a UFO on their parents’ farm Connington in the KwaZulu-Natal midlands, South Africa. While playing outside the farmhouse, Elizabeth claims to witness a giant orange-red wheel rolling across the sky. The plummeting object, also described as a fiery pockmarked meteor or planetoid, is intercepted by a silver disc bathed in a pearly luster. Around this time Elizabeth begins receiving occasional telepathic messages from a friendly space alien named Akon. (Clark III 657; Elizabeth Klarer, Beyond the Light Barrier, Howard Timmins, 1980)

October 13 — After some newspapers report that the Virgin Mary has promised a miracle for the last of her apparitions, a huge crowd, possibly between 30,000 and 100,000, including reporters and photographers, gathers at Cova da Iria, Portugal. What happens then becomes known as the “Miracle of the Sun.” Various claims are made as to what really happened. The three children report seeing a panorama of visions during the event, including those of Jesus, Our Lady of Sorrows, Our Lady of Mount Carmel, and Saint Joseph blessing the people. Father John de Marchi, an Italian Catholic priest and researcher who wrote several books on the subject, included descriptions by witnesses who believe they observed a miracle created by Mary, the mother of Jesus. After a period of rain, the dark clouds break and the Sun appears as an opaque, spinning disc in the sky. It appears significantly duller than normal and casts multicolored lights across the landscape, the people, and the surrounding clouds. The Sun then seems to careen towards the earth before zigzagging back to its normal position. Witnesses report that their previously wet clothes become “suddenly and completely dry, as well as the wet and muddy ground that had been previously soaked because of the rain that had been falling.” Not all witnesses report seeing the Sun “dance.” Some people only see the radiant colors, and others, including some believers, see nothing at all. The only known picture of the Sun taken during the event does not show anything unusual. No unusual solar phenomena are observed by scientists. Some theologians, scientists, and skeptics have offered alternative explanations that include psychological suggestibility of the witnesses, temporary retinal distortion caused by staring at the intense light of the Sun, a sundog, and optical effects caused by natural meteorological phenomena. The Miracle of the Sun is interpreted by others as a UFO event. Investigator Joe Nickell thinks that the effects are “a combination of factors, including optical effects and meteorological phenomena, such as the sun being seen through thin clouds,

1918

March 1 — Early morning. A woman at Tahunanui Beach, Nelson, New Zealand, sees two distinct “seaplanes” flying together near the surface of the water. They soon diverge, one going in the direction of the eastern hills and both getting lost in the clouds. (“Seaplanes over Tasman Bay,” Nelson Colonist, March 2, 1918, p. 4; Brett Holman, “The Mystery Aeroplane Scare in New Zealand—I,” Airminded, August 28, 2013)

Summer — 7:30 p.m. At an isolated ranch 60 miles from Malta, Montana, 9-year-old Theodore Warren sees a cigar-shaped “airship” with windows that shine with greenish light. It flies in from the mountains in the east and hovers above the ranch house. He watches it for a while, and then it “whooshes” away to the northwest. (Ione Warren Conway, “A UFO(?) from the Past,” IUR 7, no. 6 (Nov./Dec. 1982): 16)

August 12 — After 5:00 p.m. Two women at Durie Hill, Whanganui, New Zealand, see an airplane moving swiftly off the South Spit heading toward the south. It disappears behind Landguard Bluff. Other witnesses come forward to corroborate the sighting. (“Aeroplane off Wanganui,” Wanganui Chronicle, August 13, 1918, p. 4; Brett Holman, “The Mystery Aeroplane Scare in New Zealand—I,” Airminded, October 26, 2013)

August 13 — Evening. Mr. C. Rawlinson is cycling to a dance on Carrington Road, New Plymouth, New Zealand, when he sees a bright star against some mountains about 6 miles away. It starts flashing red and white and moves closer and downward, then rises to 400–500 feet and performs other maneuvers. He rides home to tell his sisters, who also see the light until about 8:30 p.m., when it moves off to the sea. (“Local and General,” Wellington Dominion, August 14, 1918, p. 4; Brett Holman, “The Mystery Aeroplane Scare in New Zealand—I,” Airminded, October 26, 2013)

October — During operations against the Bolshevik Army in Tulgas, Arkhangelsk Oblast, Russia, soldiers of the US 339th Infantry Regiment watch a round object the color of burnished copper, with a faint light and vapor obscuring much of its shape. (Letter to J. Allen Hynek; Jan Aldrich)

1919

1919 — Wireless inventor Guglielmo Marconi claims that he has detected large-wavelength radio signals from Mars. He claims the most frequent signal is the Morse code for “S,” or three short dots. The signals, however, are subsequently traced to an experiment conducted by chemist Irving Langmuir at the General Electric Laboratories in Schenectady, New York. (‘‘Hello, Earth! Hello!’’ White Earth (Minn.) The Tomahawk, March 18, 1920, p. 6)

January 22 — After 10:00 p.m. A brilliant light the size of a tennis ball appears in a garden at Shuttlewood, Derbyshire, England. When the witness approaches it, it moves away at a leisurely pace and passes through wire netting. It follows the top of a hedge, turns right, and ascends until it finds a break in the high branches of a tree, where it hovers for 3 minutes before flying on. The witness then notices his neighbor’s farm is illuminated with bright white light. Several minutes later, the sphere returns to the garden, hovers another 3 minutes, then approaches the witness. As it does so, it turns from white to orange. It moves away, stops above a neighbor’s garden, travels
along a hedge, traverses a field, and circles a row of houses before soaring into the sky and disappearing. The light is seen for 40 minutes. (Mark Ian Birdsall, “The Luminous Pearl of 1919,” *Quest International* 10, no. 2 (1991): 26–27; Clark III 1171)

June 2 — 9:30 a.m. A tiny circular cloud appears in an otherwise cloudless sky over Ottertail, Minnesota. Suddenly it expands to several times its size. Seconds later, the window that the witness is watching through starts to shake and creak. By the time it stops, the cloud has expanded more and now has a ragged appearance, bending toward the earth. A black object shoots out of the bottom of the cloud, leaving a vapor trail, and begins making 6–7 barrel rolls. It then peels off in a straight line, headed north. (Clark III 1170; “Supersonic Jet in 1919?” *IUR/Frontiers of Science* 3, no. 6 (Jan./Feb. 1982): 14–15)

July — 11:00 a.m. A young brother and sister who live on a farm near Webster City, Iowa, hear a strange chirping sound while out playing. They turn and see a brown-green object under a tree near a creek 75 feet from them. They notice a similarly colored figure standing in a door that has been lowered down. It makes strange guttural sounds. They see another figure running toward the stream leading to a pond. This smaller one dips up some water into a can. The larger figure seems to be hurrying the smaller figure back into the object. The door slams shut with a metallic sound, and the vehicle rises up quickly with its three legs still out and goes over a hill. The soil where the object had been is covered with round spots that resemble cane marks. (Clark III 263; Patrick Gross, *URECAT*, July 23, 2009)

Late summer — 10:00 p.m. Harry Anderson, 13 (or 16), is out riding with his family and two friends when their car runs out of oil east of Barron, Wisconsin. A passing farmer offers to give them some oil, and Harry accompanies him 2 miles away to his farmhouse. Harry walks back to the car alone and sees 20 little men walking in single file towards him. Their heads are bald, and the figures are dressed in leather “knee pants” held up by suspenders. They are mumbling but pay no attention to him. Terrified, he continues and does not look back. ([Jerome Clark], “Encounters with Little Men,” *Fate* 31, no. 11 (November 1978): 83–86; Clark III 263; Patrick Gross, *URECAT*, July 24, 2009)

**1920**

1920 — Day. Stanley Clason, 10, is walking across his uncle’s pasture in northern Montana when he sees an object traveling from northwest to southeast. It has a “long, slim, pointed shape” and appears “silvery in color.” (“Report from the Readers,” *Fate* 7, no. 4 (April 1954): 115–116; Clark III 1171)

Summer — 11:00 p.m. A group of young people, including sisters Louise and Marie Grasset, returning from a dance at Nontron, Dordogne, France, observe small beings in the air above a wooded area. Luminous balls surround the figures, who are giving off “musical sounds.” (Clark III 264; Patrick Gross, *URECAT*, October 3, 2017)

June 3 — Day. Jesse Clark Linch is fishing on a pond near Mount Pleasant, Iowa, when he sees a soundless, blue, dish-shaped object emerge from behind a grove of 100-foot-high maple trees. It flies across the pond and lands 15 feet away. Linch gets up and walks toward it, but it rises up, slowly moves over some trees to the west, and disappears. (“Mini UFO Landed near Mt. Pleasant in 1920,” *The UFO Examiner* 2, no. 2 (June 1978): 8, 19; “Man Visited by Strange Object While Fishing in Iowa in 1920,” *MUFON UFO Journal*, no. 382 (February 2000): 12; Clark III 1170)
Late October — 3:00 a.m. C. B. Alves sees four flying discs 50 miles north of Freeport, Texas, when he is out fishing with some friends. They look like two big silver plates set edge to edge. Each appears to be about 25 feet in diameter and 10 feet thick at the center. (“Report from the Readers,” Fate 8, no. 2 (February 1955): 122–123; Clark III 1170)

**1921**

1921 — An 8-year-old is playing in the hillocks near a canal in Marseille, France. He is suddenly accosted by two tall, slender men wearing apparent diving suits who drag him into a strange looking “tank.” After a while, an opening appears in the ceiling, and in a few moments he finds himself back on the ground. He must walk all afternoon to get back to the place where the UFO picked him up 5 minutes earlier. (Clark III 264; [Letter], “J’ai voyage en soucoupe,” Paris-Match, no. 291, October 23, 1954; Patrick Gross, URECAT, September 7, 2006)

Late July — 2:00 a.m. Annie Baker of 39 Highland Road, Southsea, Portsmouth, England, sees a “strange looking bladder like monster the shape of an airship only much wider” during a thunderstorm. It is luminous and remains stationary for several minutes but moves away and disappears quickly. (UFOFiles2, pp. 13–15)

July 29 — The Council on Foreign Relations is incorporated. Founded by corporate lawyer Elihu Root, the organization brings diplomats, high-level government officials, and academics together with lawyers, bankers, and industrialists to engineer foreign policy. The first issue of Foreign Affairs is published in September 1922. (Wikipedia, “Council on Foreign Relations”)

September — The British Air Ministry has asked the public to submit reports on observations of ball lightning to its Meteorological Office. The results are summarized by geophysicist Harold Jeffreys, who notes very little uniformity in the observations, with little agreement on size, duration, color, or shape. (Harold Jeffreys, “Results of the Ball Lightning Inquiry,” Meteorological Magazine 56 (September 1921): 208–211; UFOFiles2, pp. 13–16)

September 1 — J. H. C. Macbeth of the Marconi Wireless Telegraph Company announces that inventor Guglielmo Marconi is convinced he has intercepted wireless signals from Mars while cruising in the Mediterranean Sea on his mobile laboratory and yacht, the Electra. The signals are regular and “produced high in the meter band.” One of them resembles the letter “V” in the Marconi Code. (“Marconi Sure Mars Flashes Messages,” New York Times, September 2, 1921, p. 1; Michael D. Swords, “Radio Signals from Space, Alien Probes, and Betty Hill,” IUR 29, no. 4 (July 2005): 11)

October 9 — Harvard University astronomer William Henry Pickering claims that he has discovered, through two years of observation, vegetation growing in lunar craters that contain water and a source of heat. They seem to form strips or “canals” that vary according to season. (“Says 2 Crops a Day Grow on the Moon,” New York Times, October 9, 1921, p. 6)

**1922**

1922 — Starting this year, ghost lights are seen every year until 1932 in the desert near the Oregon Canyon Ranch, McDermott, Nevada. They look like lanterns or car headlights in the distance. More than 50 of the sheepherders in the area have seen the lights, including Tito Bengoa, the brother of Frank and Christopher Bengoa of the King’s River Ranch near Orovada. (Kenneth Arnold, “Phantom Lights in Nevada,” Fate 1, no. 3 (Fall 1948): 96–98)

Summer — A teenage couple, William O’Brien and Irma (later married surname is Hinz), walking home from a movie in Detroit, Michigan, see a large disc-shaped object hovering above a vacant lot on South Dragoon Street. Rectangular windows surround the perimeter of the UFO’s base. Seated at those windows are 20 or so bald-headed beings with close-set eyes. They stare at the witnesses, who become unnerved and leave. (Clark III 264; Center for UFO Studies, HUMCAT Index 1910–1939, p. 21)

Summer — Many witnesses in Warsaw, Poland, see a silvery object, shaped like two hemispheres divided by a rotating ring, that shoots a beam of light and ascends with a loud noise. (Bronislaw Rzepecki, “UFOs and Ufologists in Poland,” IUR 11, no. 2 (Mar./Apr. 1986): 15; Poland 8)
1923

Two DePauw University college students, Andrew Wallace Crandall and Herrick Greenleaf, watch a revolving red object pass over Greencastle, Indiana. The object, round and glowing, moves silently from northeast to southwest, then vanishes. (Lore and Deneault, p. 106)

A photograph shows a domed disc hovering near the church tower in Sebeș, Romania. (Romania 10-11)

October — Boni & Liveright publishes New Lands by Charles Fort, who writes about odd aerial and astronomical observations: “It seems no more incredible that up in the seemingly unoccupied sky there should be hosts of living things than that the seeming blank of the ocean, should swarm with life.” (Wikipedia, “New Lands”; Jim Steinmeyer, Charles Fort: The Man Who Invented the Supernatural, Tarcher, 2008, pp. 198–199; Clark III 507, 1098)

1924

Perry G. Powers and Duncan Miller are returning to a ranch when they see a beam of light shining on the snow in the Osage Hills, Oklahoma. It emanates from a large oval-shaped object with white dots of light on the side and blue flame at the trailing end. It makes a slight hissing noise and moves out of sight over the horizon in less than 3 minutes. (UFOEv, p. 129; “1924 Sighting,” Civilian Saucer Investigation Quarterly Bulletin 1, no. 4 (Winter 1954): 10)

Mars enters an opposition closer to Earth than at any time in the century before. In the US, a National Radio Silence Day is promoted during a 36-hour period in August 21–23, with all radios quiet for 5 minutes on the hour, every hour, just in case the Martians take the opportunity to communicate with Earth. At the US Naval Observatory in Washington, D.C., an SE-950 radio receiver is lifted 1.9 miles above the ground in a dirigible tuned to a wavelength between 8 and 9 kilometers, using a “radio photo message continuous transmission machine” recently invented by Amherst College and Charles Francis Jenkins of Washington. The program is led by retired astronomer David Peck Todd with the military assistance of Chief of Naval Operations Adm. Edward Walter Eberle, with William F. Friedman (US Army chief cryptographer), assigned to translate any potential Martian messages. The device records radio signals on chemically treated film. One signal consists of a “fairly regular arrangement of dots and dashes along one side” and on the other “at almost evenly spaced intervals … curiously jumped groups each taking the forms of a crudely drawn human face.” Todd tells a reporter, “It may not be a message from Mars, but if it isn’t from Mars, where is it from?” Astronomer Frederick E. Fowle of the Smithsonian thinks they are “disturbances introduced by solar or terrestrial causes not yet understood.” Other scientists suggest the images are caused by static discharge from a passing trolley car, malfunctioning radio equipment, or the natural symphonic radio waves produced by Jupiter. (Jerome Clark, “Conversations with Martians,” IUR 29, no. 3 (Fall 2004): 20; Michael D. Swords, “Radio Signals from Space, Alien Probes, and Betty Hill,” IUR 29, no. 4 (July 2005): 11–12; Kristen Gallerneau, “Reaching for Mars,” Past Forward, August 23, 2016; Jessica Leigh Hester, “Everybody Shut Up! We’re Listening for Mars,” Atlas Obscura, August 3, 2018)

Fall — Dusk. A hunter in a rowboat on Okanagan Lake, British Columbia, sees a faint blue light moving from northeast to southwest. It temporarily disappears behind a mountain but reappears and approaches the boat, passing it at a distance of 200 feet and a speed of 30–40 mph. The object is pearly silver in color with faint dark blue light at the rear. After moving a quarter mile away, it ascends and disappears at terrific speed. (Clark III 1171–1172)

1925

Thomas Green is riding with another young man on a farm near Moora, Western Australia, when they come across an object “like two saucers placed edge on edge” resting on a paddock. Some oval-shaped windows are visible, and it is resting on four legs splayed outwards. The two decide to return home. Several days later they return and find the earth “scuffed about” on the spot. (Bill Chalker, “Historical Australian UFO Reports,” UFO Research Australia Newsletter 4, no. 3 (Nov./Dec. 1983): 28)
June — 2:30 a.m. A driver stops his Ford Model T to watch a 300-foot-long, cigar-shaped object flying south toward Chicago, Illinois. Red sparks are peeling away from its nose and it has multicolored lights. As it passes in front, the driver feels a heat wave. *(San Diego (Calif.) Evening Tribune, August 12, 1965; Clark III 1171)*

---

1926

1926 (or 1927) — 3:00 p.m. A 14-year-old girl is tending cows in a meadow between Brzezie and Ujazd, Poland. Suddenly the cows become agitated and pull on their halters. She notices three cement-colored spherical objects some 650 feet away in a field to the north. In front of each is a small entity dressed in greenish uniforms. (Poland 9)

January — Aviator Bert Acosta is flying somewhere between Wichita, Kansas, and Colorado Springs, Colorado, when he notices 6 or so objects that look like manhole covers flying off his starboard wing 600 feet away. They keep pace with his plane for 5 minutes. Finally they turn, change course, and fly away. (Jacques Vallée, *Anatomy of a Phenomenon*, Ace ed., 1965, p. 49; Patrick Gross, *Pilots UFO Sightings,* August 6, 2021)

June — After midnight. Farmer Ion Bunescu is with his horses on the Leurda plateau near Colun, Romania, when he sees a light ascend from the village of Cârta. An illuminated globe moves toward him with a light so strong that it brightens the River Olt some 2.5 miles away. Hobana and Weverbergh 224–225; Romania 9–11)

August — Dusk. Frank Tezky and his father watch 6 disc-shaped objects in Westmont, Illinois. Five smaller discs are trailing in a straight line behind a much larger one, moving west beneath cirrus clouds, which reflect the light cast by the objects. (Clark III 1170)

Late September — 11:00 p.m. An Air Mail pilot named Colin Murphy is repeatedly buzzed by a huge glowing object one hour after he takes off in his DH-4 biplane from Salt Lake City, Utah. The object is a 90-foot-long cylinder with no wings or propeller. Every time the object approaches closer than 150 feet, his engine sputters and misfires. He is forced to land in a sheep pasture, whereupon the object shoots away to the south. Possible hoax. (Patrick Gross, *Pilots UFO Sightings,* August 5, 2021)

October 27 — Attorney and “telepathist” Hugh Mansfield Robinson, who has been in contact with a female Martian entity named Oomaruru since 1918, convinces the central radio office in London, England, to send out a message, “MMM opesti nipitta secomba” over the airwaves. He intends for it to be picked up by Martian wireless. The next day, he claims that Oomaruru telepathically told him that only the first three letters had been received. Robinson describes the Martians as 7–8 feet tall with large ears, a wealth of black hair, and almond eyes. Over the years he continues receiving messages from Oomaruru while in a trance and attempting to send signals to Mars. Psychic investigator Nandor Fodor, who has attended some of Robinson’s séances, calls him “as slippery as a human eel.” (Earl J. Johnson, “Imagination Runs Wild about Visit of Martian Realm,” Pomona (Calif.) Bulletin, October 28, 1926, p. 1; “Doctor Files Mars Message by Radio ‘At Sender’s Risk,’” Vancouver (B.C.) Sun, October 28, 1926, p. 18; Nandor Fodor, *The Haunted Mind,* Garrett, 1959, pp. 259–269; Clark III 1018–1019; Marc Hartzman, “Earth to Mars in the 1920s: The Strange Case of the Man Who Tried to Contact Martians via Radio,” Weird Historian, February 22, 2018)

November — Early evening. Playing hide-and-seek with friends in Bolton, Lancashire, England, Henry Thomas slips into a backyard and finds three figures dressed in odd suits made of silvery gray rubber tubes. They are looking into a window in the back of a house. A tube extends from their helmets into a tank on each figure’s back. They turn to look at him and he sees their heads are pale and “shaped like lightbulbs” and they have slits for mouths. Thomas runs away. (“1926: Humanoid Hide and Seek,” ThinkAboutIt; Clark III 264)

---

1927

1927 — For a few weeks, 10-year-old Cecil “Danny” McGann, his family, and other farmers in the area of Fernvale, New South Wales, are terrorized by dancing aerial lights during the night, the unusual deaths of their cattle and pigs, mystery intruders, apparitions, circular areas of scorched grass, large and unfamiliar birds, bizarre noises, and
strange men in odd suits. McGann is still terrified of this series of events when he relates them to UFO investigator Bill Chalker in 1985. (Clark III 485–491; Bill Chalker, “Physical Traces,” UFOs 1947–1987, Fortean Tomes, 1987, p. 190)

Summer — Reece Andrew Lacey, 9, sees a large fish-like object with “big fins extended outward near the front, and small, short ones near the rear” in Wolfe County, Kentucky. (“Report from the Readers,” Fate 11, no. 2 (December 1958): 111–112; Clark III 1171)

July — Agricultural engineer Gheorghe Achimescu sees a smoke-gray, cylindrical object fly silently from west to east over the village of Nicolae Bălcescu, Romania, at an altitude of 650–950 feet. He estimates it is about 50 feet long with a diameter of 10 feet. (Hobana and Weverbergh 152–153)

August 5 — Explorer Nicholas Roerich and others in his caravan observe a UFO near Qinghai Lake, Tibet. “We all saw, in the direction north to south, something big and shiny reflecting sun, like a huge oval moving at great speed. Crossing our camp this thing changed in its direction from south to southwest, and we saw how it disappeared in the intense blue sky. We even had time to take our field glasses and saw quite distinctly the oval form with the shiny surface, one side of which was brilliant from the sun.” (Nicholas Roerich, Altai-Himalaya, Frederick A. Stokes, 1929, pp. 361–362; Brad Sparks, “Analysis: Roerich Case, Aug. 5, 1927”)

Late summer — Long delayed echoes—radio echoes that return to the sender several seconds after a radio transmission has occurred—are first observed by civil engineer and amateur radio operator Jørgen Hals from his home near Oslo, Norway. The cause of LDEs remains unknown, although A. G. Shlionsky has proposed 15 different explanations. (Wikipedia, “Long delayed echo”; Carl Størmer, “Short Wave Echoes and the Aurora Borealis,” Nature 122 (1928): 681; Sverre Holm, “The Five Most Likely Explanations for Long Delayed Echoes,” March 16, 2004; Sverre Holm, “15 Possible Explanations for Long Delayed Echoes,” November 6, 2007)

October 18 — Richard Sweed is driving west on the outskirts of Bakersfield, California, when he sees a bluish-gray metallic disc with portholes take off from the ground at a 45° angle. It is about 60 feet in diameter and makes a whining sound. He examines the spot where the object had rested and finds the sand “fused like glass crystals.” (Lorenzen, UFOs: The Whole Story, Signet, 1969, p. 18)

1928

January 3 — Kansas journalist Charles Benedict Driscoll begins writing about ball lighting in his syndicated column, “The World and All,” keeping the subject alive for many years. (Charles B. Driscoll, “The World and All,” Lexington (Ky.) Herald, January 3, 1928, p. 4)

May — Mystic and white supremacist William Dudley Pelley claims he has an out-of-body experience in which he travels to other planes of existence devoid of corporeal souls. He describes his experience in an American Magazine article titled “My Seven Minutes in Eternity,” expanded to a book 1933 as Seven Minutes in Eternity. In later writings, he describes the experience as “hypo-dimensional.” During this event, he meets with God and Jesus, who instruct him to undertake the spiritual transformation of America. He later claims that the experience gives him the ability to levitate, see through walls, and have out-of-body experiences at will. (William Dudley Pelley, “Seven Minutes in Eternity” with Their Aftermath, Robert Collier, 1929; Clark III 1285)

Summer — A 6-year-old girl sees a black, faceless, 5-foot-high figure with a large head and dangling arms in a field off Anstey Lane, Leicester, England. She thinks it is a scarecrow but notices a “large globe on legs” near the figure. She wakes up her father (who is resting in the open air) but when she turns around, the scarecrow and the globe are gone. (Pauline Berger, “The Disappearing Scarecrow,” Flying Saucer Review 15, no. 1 (Jan./Feb. 1969): 29; Clark III 264)

June 13 — 9:00–10:00 p.m. Something like a “great blurred electric light” appears over Miami, Florida, for more than 30 minutes. One witness, amateur astronomer R. C. Fahrion, describes it as a comet without a tail, but it does not move, is of an “enormous size,” and disappears very suddenly. (“Miami Astronomers Unable to Identify Light in Sky,” Miami Herald, June 14, 1928, p. 1; “Miamians Watch Sky Mystery, Mistaken for Tailless Comet,” Miami News, June 14, 1928, p. 12; Clark III 1172)
Early November — 10:30 p.m. Norman H. Sabie and Thorsten Sabie are driving cattle near Milton, North Dakota, watch a round, metallic object, like a “soup bowl turned upside down,” speed by at a low altitude (15–20 feet), emitting 4–5 rays of light that illuminate the ground and startle cattle. It makes a sound like air pouring through a tube. (UFOEv, p. 129; Clark III 1170)

November 28 — French diplomatic scholar Henri Pensa writes that a silvery object trailing fire is seen in Rodez, Aveyron, France, coming from the “direction of Mars.” He says that in the winter of 1927–1928, he has seen a bright light, usually between 8:00 and 11:00 p.m., that brightens the landscape. (Giuseppe Stilo, “Francia, 1928: Marte Attacca?” Cielo Insolito, October 2, 2019)

1929

1929 — In Hertford, England, a 5-year-old girl and her 8-year-old brother have such an unsettling experience that they do not talk about it themselves until about 1960, and the woman herself does not reveal it to outsiders until 1970. They are playing in a garden when they hear engine sounds and see a tiny (12 or 15 inches wide) biplane coming over the fence from the direction of an orchard. It swoops down, nearly hitting a trash can, and lands for a few seconds before resuming its flight. While it is stationary, the girl can see a “perfectly proportioned tiny pilot wearing a leather flying helmet, who waved to us as he took off.” (Gordon Creighton, “A Weird Case from the Past,” Flying Saucer Review 16, no. 4 (July/Aug. 1970): 30; Clark III 1173)

June 12 — 11:00 p.m. As he is driving home at Ferme-Neuve, Quebec, Levis Brosseau, 20, sees something like a black cloud with a yellow light resting on a hillside. He gets out to investigate and discerns a structured object 50 feet in diameter. Outside of it, 4–5 small men of yellowish color are moving quickly about. Soon the object flies overhead, “purring like a milk separator,” and he hears two voices arguing. (Center for UFO Studies, HUMCAT Index 1910–1939, p. 31; Clark III 264)

September — Medical student William Walton is crossing a street in Oak Park, Illinois, when he sees a very bright yellowish-white light like two saucers pressed together. It approaches his position, and he hears a humming sound like the throbbing of a turbine and feels heat and pressure. The object passes over him at about 100 feet altitude, but the force knocks him to his knees. After it passes, he detects an odor of sulfur. (Linda Zimmerman, More Hudson Valley UFOs, Eagle Press, 2017)

1930

1930 — 10:00 a.m. A woman is driving the family car in an isolated hilly area of Texas when she rounds a curve and sees a huge object about 100 feet across by the side of the road. A small door is open with steps leading down to the ground. One side of the object is braced up by two slender legs with round plates for feet. A man of normal size comes walking toward her and forces her to stop. He seems to speak to her telepathically, telling her to leave the road and make a shortcut through a gully. Some 8–10 other figures walk forward, much smaller and with slanted eyes. They are wearing tan coveralls and tight caps. Despite potential damage to her car, she drives through the gully as the larger man walks alongside. The next thing she remembers is walking up to her porch at her home 15 miles away. It is around 12:00 midnight. In March 1968, having read Interrupted Journey about the Betty and Barney Hill case, she writes to the Colorado project and offers herself for hypnosis and research. Edward Condon files the letter under “psychological” and does not respond. (Michael D. Swords, “Too Close for Condon: Close Encounters of the 4th Kind,” IUR 28, no. 3 (Fall 2003): 4–5; Patrick Gross, URECAT, August 29, 2019)

1930 — 9:30 p.m. Two men walking along a lane at Tomintoul, Scotland, see a white light “like a meteor.” When it gets brighter, they can see figures moving inside it. The witnesses think it is a ghost light. (Clark III 264; Patrick Gross, URECAT, September 20, 2018)

Spring (or spring 1931) — 7:00 p.m. As he walks down a country road near Newberry, Michigan, high school student Ralph Newman sees a “distinctly green fireball” in the low eastern sky that moves from south to north. About the size of the full moon, its light brightens the countryside, then it vanishes. (Clark III 1175)
May — Day. A top-shaped object 40 feet wide lands in a garden in Greensboro, North Carolina. Mr. and Mrs. J. T. Rankin and their two daughters can see the head and shoulders of a figure inside wearing a tight-fitting outfit and helmet. Some 5–10 minutes later the object ascends quietly and is gone. (Center for UFO Studies, HUMCAT Index 1910–1939, p. 33; Clark III 264; Patrick Gross, URECAT, September 15, 2018)

1931

January 1 — 1:00 a.m. J. Stewart Childerhose and his brother, two farmers of Cobden, Ontario, see an object with a brilliant white light on its front illuminating treetops on the shore of Muskrat Lake. Green and white lights twinkle on its tail end. It moves in a rectangular path, then speeds up suddenly and climbs out of sight. (Lore and Deneault, p. 108)

January 26 — Author Tiffany Thayer founds the Fortean Society during a dinner with Charles Fort in the Savoy-Plaza Hotel in New York City in order to promote his books and ideas. (Wikipedia, “Fortean Society”; Jim Steinmeyer, Charles Fort: The Man Who Invented the Supernatural, Tarcher, 2008, pp. 239–241)

February — Charles Fort writes in Lo!, published this month, that “Unknown, luminous things, or beings, have often been seen, sometimes close to this earth, and sometimes high in the sky. It may be that some of them were living things that occasionally come from somewhere else.” (Wikipedia, “Lo!”; Jim Steinmeyer, Charles Fort: The Man Who Invented the Supernatural, Tarcher, 2008, pp. 235–243; Clark III 507–508, 1098)

May — 4:30 p.m. Pasquale Masala is out riding his horse with a friend a few miles southeast of Paulilatino, Sardinia, Italy. When they reach a megalithic tomb known as Nuraghe Trudumeddu, they dismount to enjoy the view. Suddenly, a strange object the size and shape of a football emerges from the partially blocked entrance of the tomb. It travels at a height of about 3 feet above the ground at a constant speed of about 10–15 mph and enters a thick patch of undergrowth. Marsala runs after it for about a half mile and notices that the bushes part in front of the object and close up after it passes. His companion is frightened and insists on returning to the village. (Mary Boyd, “An Early Italian Cross-Country Case,” Flying Saucer Review 20, no. 3 (December 1974): 21; IPinotti 13–14)

June 6 — Aviator Francis Chichester sees a dull gray-white “airship” as he is making the first solo flight in a Gypsy Moth seaplane from New Zealand to Australia over the Tasman Sea. (Francis Chichester, The Lonely Sea and the Sky, Hodder and Stoughton, 1964, p. 165; Keith Basterfield, “Aviator Francis Chichester’s Classic Sighting: Is the Date Wrong?” Unidentified Aerial Phenomena—Scientific Research, May 29, 2018; Patrick Gross, “Francis Chichester Sighting, 1931”)

Summer — Alice May Williams of Auckland, New Zealand, begins writing letters over a two-year period to Edison Pettit and Seth Barnes Nicholson, astronomers at the Mount Wilson Observatory in Pasadena, California, describing her encounters with telepathic aliens who fly in a circular machine “like a great big lamp.” She writes that “The Planet mars is inhabited by human spirits like us can talk eat & drink wear clothes, but have great power. They are something people of this earth have never seen.” Their ships “are round like the moon with airtight shutter at the front, glass. The machine must be built with some light material, airproof fireproof, waterproof. The inside must be like a room, 2 beds tables & chairs.” Much of her information seems to be derived from articles in the Auckland Star about conditions elsewhere in the solar system. (David Herkt, “Who No: Letters from Alice May Williams,” Speaker: Public Address, September 3, 2012)

1932

1932 — Danish pilots Lt. Col. Peter Grunnet and Lt. Tage Andersen are flying an H.M.II (Heinkel HE 8) seaplane over eastern Greenland as part of a photogrammetric survey. Suddenly, Andersen notices they are being followed by a hexagonal metallic object about a mile behind them. (Rufus Drake, “UFO Crisis over Greenland,” Saga, October 1976, pp. 36–38, 54, 60; Patrick Gross, “Pilots UFO Sightings,” August 8, 2021)

April or May — Terry F. Lapeza sees an aluminum-like disc with yellowish lights or “portholes” on the underside, about 100 feet in diameter over Durham, New York. It is moving north at about 300 mph. (UFOEv, p. 129)
Early summer (or early summer 1933)— 7:30 p.m. Teenager Fred W. Van Sant and his brother Milton see 7–8 “meteors flying in a bunch” over hills east of Oakland, California. They maintain the same altitude from east to west in a great arc. The objects are silent and are so bright they seem to be emitting their own light. (NICAP case file; Clark III 1175)

June — Evening. Reuben D. Knight is standing on the porch of his farmhouse near Wattsburg, Pennsylvania, when he notices a bright speck of light approaching from some woods to the south. Growing in size, it comes to within 4 feet of him and appears as a silvery-blue ball about 14 inches in diameter. It travels in a loop and circles back to the woods in a steady path of 35–40 mph. After it circles past him again, he calls his wife and she sees the ball make a final loop before it disappears in the woods. (NICAP case file; Clark III 1175; Patrick Gross, URECAT, August 19, 2018)

1933

1933 — Earl J. Duncan and a Native American boy are in a truck near Fort Washakie, Wyoming, on the Wind River Indian Reservation. As they reach the crest of a hill, they see three perfectly round, pulsating, orange-red balls about 900 feet away. They are moving “in absolute alignment” about 20 feet from the ground toward the nearest mountain range. After 5 minutes of silent movement they disappear over a nearby mountain. (NICAP case file; Clark III 1175)

Summer — For weeks, strange lights in the sky are reported around Tobin Lake, Saskatchewan. Curious about the reports, two young men and a woman drive to the lake from Napawin. On their way they see a glow near the horizon, so they park and trek a quarter mile into the woods where they can see a large, oval-shaped craft sitting on legs. From an open central doorway shines a bright orange glow; a ladderlike stairway extends downward with a dozen figures dressed in silver suits moving up and down the steps. They appear to be repairing the craft. The witnesses watch for 30 minutes when they decide to return to their truck and get closer. Two nights later they return and find imprints and burn marks, which they photograph. Two of them write an article that they submit to magazines, which refuse to publish what they consider outlandish fiction. (John Brent Musgrave, “Saskatchewan, 1933: UFO Repairs,” Flying Saucer Review 22, no. 6 (April 1977): 16–17; Clark III 264; Patrick Gross, URECAT, July 15, 2009)

Summer — 2:30 a.m. A man who still insists on anonymity in 1964 is driving near Cherryville, Pennsylvania, when his car gets a flat tire. As he is jacking it up, he sees a faint violet light in the field on his right. Curious, he walks about 200 feet towar

Dec 1 — English mountaineer Frank Smythe, during the British Mount Everest Expedition in the Himalaya Mountains of Nepal, is heading for camp at 27,500 feet when he sees two dark objects floating in the blue sky. In shape they resemble kite balloons, except that one appears to possess short squat wings. As they hover motionless, they seem to pulsate in and out as though they are breathing. A minute or two later they disappear behind mountain mist. (Frank S. Smythe, Camp Six: An Account of the 1933 Mount Everest Expedition, Hodder and Stoughton, 1937, pp. 264–265; Barry Greenwood, “UFOs on Mt. Everest in 1933,” UFO Historical Revue, no. 5 (July 1999): 2–3)

June 13 — An unknown aircraft allegedly crashes at Magenta, just west of Milan, Italy. The Italian government establishes a top-secret group, Gabinetto Ricerche Speziale/33, to examine the craft. It is headed by Prime Minister Benito Mussolini, Foreign Minister Galeazzo Ciano, and Air Marshal Italo Balbo, with scientific support from Guglielmo Marconi and astronomer Gino Cecchini. Debris is reportedly stored in the hangars of the SIAI-Marchetti aircraft company in Vergiate, Varese. Journalists are ordered to keep silent about the incident due to
national security. (Good Need, pp. 12–15; Roberto Pinotti and Alfredo Lissoni, Gli “X-Files” del Nazifascismo, 2001; 2Pinotti 179–197)

July 31 (or August 1) — 9:15 p.m. Somewhere between Butt Valley Reservoir and Humbug Valley, California, high-school science teacher Paul M. Barry Jr. is skywatching when he sees two objects shoot across the sky. They are solid, prolate spheroids with a green luminescence. Their brightness changes considerably as they approach the zenith and diminish as they approach the horizon. He thinks they are 8–10 miles distant. The two objects disappear and are followed by a third. (Clark III 1175)

Fall — 11:45 p.m. A chemist in Contra Costa County, California, hears a humming sound outside coming from the northeast. Looking out the window, he sees the yard bathed in a steady blue-purple light. Suddenly the light goes out and the humming ends with a “pow” sound. (Lorenzen, UFOs; The Whole Story, Signet, 1969, p. 19)

Late November — After sunset. A lone observer sees what appears to be an aircraft land on ice-covered lake Fjosokken, Sorsele, Sweden. It takes off and circles the lake for one hour, during which time it projects a powerful searchlight on the lake’s surface. However, local police interview the witness and suspect that he was looking at Venus. (Swords 361)

December 24 — 6:00 p.m. Witnesses in Kalix, Norrbotten, Sweden, see beams of light coming from a machine that seems to be searching the ground below. The beams are “blinding.” The sighting is part of a wave of “ghost flier” reports of gray monoplanes without identifying markings that are reported over rural areas of Scandinavia from November 15, 1933, through February 11, 1934. The Swedish Military Record Office accumulates 96 reports from Sweden, 234 from Norway, and 137 from Finland, and the Swedish Air Force undertakes at least two reconnaissance missions in search of the mystery planes. More than 50% of the reports take place between 5:00 p.m. and 7:00 p.m., when Venus is low over the horizon. (Strange Company 7; Hilary Evans and Robert E. Bartholomew, Outbreak! Anomalist, 2009, pp. 497–499; Swords 361–363; Anders Liljegren, “Ghost Flier Mystery Still Unresolved,” AFU Newsletter 41 (September 2001): 1–3)

December 30 — Swedish customs sends a request for air support to Gen. Eric Virgin, head of the Swedish Air Force, to help apprehend the ghost fliers who could be smuggling liquor into Sweden. However, he is cautious and wants more information to evaluate. (Swords 361–362; Good Above, p. 13)

1934

January — George Adamski, who has been a lecturer and counselor on spiritual topics since about 1928, opens the Monastery of the Royal Order of Tibet at 758 Manzanita Drive, Laguna Beach, California. The monastery serves as his home and headquarters until 1940. (George M. Eberhart, “George Adamski—New Age Meets the Space Age,” IUR 21, no. 2 (Summer 1996): 20; “Laguna Beach, 1932–1940: From Temple to Ranch,” The Adamski Case, September 27, 2019)

January 2 — 3:45 a.m. Olof Hedlund is taking a walk in Sorsele, Västerbotten, Sweden, when he hears an engine above him. There is a full moon and visibility is good. He sees an airplane fly over the city from the west, passing directly above the train station. It turns three times in wide circles, then it takes off to the north, following the railroad tracks. It is at about 1,300 feet altitude and visible for 15 minutes. (John A. Keel, “Mystery Aeroplanes of the 1930s, Part 2,” Flying Saucer Review 16, no. 4 (July/Aug. 1970): 12)

January 9 — A mystery airplane is seen again over Västerbotten province, Sweden. The Swedish Air Force loses two aircraft trying to discover where the plane is based. (“Mystery Plane Reported,” New York Times, January 10, 1934, p. 11; Strange Company 7–8)
January 10 — Gen. Pontus Reuterswärd, chief of armed forces in Upper Norrland, Sweden, recommends to officials of Norrbotten County that they request assistance from the Air Force to deal with the ghost fliers. Norrbotten administrator Bernard Gärde is skeptical of the “vague and unreliable” reports at first. (Swords 361–362)

January 22 — A mystery aircraft flies over the military fortress at Boden, Norrbotten, Sweden, seen by 30 soldiers, and Reuterswärd alerts the press that planes had flown over restricted military areas. (John A. Keel, “Mystery Aeroplanes of the 1930s, Part III—The Landings,” Flying Saucer Review 17, no. 4 (July/Aug. 1971): 17; Swords 362)

January 27 — Swedish MP Arvid Lindman puts a question to Prime Minister Per Albin Hansson, asking what action the government plans to take about the ghost fliers. (Swords 362)

February 1 — Night. A mystery aircraft flies in circles for two hours over central London, England. Its engine is noisy, and its course can be clearly seen by its lights. On February 6, Under-Secretary of State for Air Philip Sassoon claims that it was an RAF plane carrying out a training exercise in coordination with ground forces. (John A. Keel, “Mystery Aeroplanes of the 1930s, Part 2,” Flying Saucer Review 16, no. 4 (July/Aug. 1970): 13)

February 2 — Prime Minister Hansson tells the Swedish Parliament that most ghost flier sightings are misidentifications or fantasy, while others are unsolved. (Swords 362)

February 2 — Night. A large unidentified airplane is seen over eastern Finland close to the Russian frontier, apparently scouting the district. Flights of ghost planes and mysterious lights have been seen for the past month over Helsinki and Vyborg, Finland, as well as Sweden and Norway. The Scandinavian mystery fliers continue to be seen into 1935. (“Finnish Alarm Grows over ‘Ghost’ Planes,” New York Times, February 4, 1934, p. 9; Strange Company 8–9)

February 12 — Norrbotten, Sweden, administrator Bernard Gärde officially requests assistance of the Air Force with the ghost fliers. But air surveillance has actually been taking place since early January. (Swords 362)

March 4 — Night. Two mystery airplanes circle around London, England: “The machines were low enough for their outlines, as well as their navigation lights, to be clearly visible against the sky.” Regulations prohibit RAF planes from flying over London at less than 5,000 feet. (John A. Keel, “Mystery Aeroplanes of the 1930s, Part 2,” Flying Saucer Review 16, no. 4 (July/Aug. 1970): 13)

April 30 — Gen. Reuterswärd tells the press that several ghost flier reports in January had been of real, unidentified aircraft involved in a violation of Sweden’s airspace. MP Elof Lindberg accuses him of not being competent enough to draw such a conclusion. (Good Above, p. 13; Swords 363)

June 11 — Night. Two mystery airplanes circle around London, England: “The machines were low enough for their outlines, as well as their navigation lights, to be clearly visible against the sky.” Regulations prohibit RAF planes from flying over London at less than 5,000 feet. (John A. Keel, “Mystery Aeroplanes of the 1930s, Part 2,” Flying Saucer Review 16, no. 4 (July/Aug. 1970): 13)

Summer — Day. 9-year-old Coral E. Lightner and two friends watch a white object “like an open umbrella without the ribs or spurs” glide silently through the sky from the west-southwest to the northwest over Barron, Wisconsin. It moves silently with a slight undulation before it disappears after 20 seconds. (Lorenzen, FS Hoax, pp. 15–16; “The Wisconsin Flying Saucer That Changed UFO Research Forever,” Wisconsin Frights, September 20, 2018)

August 9 — Around 5:00 a.m. Musician Leon M. Thompson is boating on Keuka Lake in western New York when he notices an odd cloud on the west side of the lake. It is in the form of an elongated cone some 60–75 feet in length and 10–15 feet in diameter at its largest point. Suddenly the sky lights up in a flash and the cloud emits a fireball that arcs across the lake to the east and leaves a fiery train. It falls on a cottage and throws up a cloud of mist or steam that slowly dissipates. (“Ball of Fire Brings Thrill to Fisherman,” Elmira (N.Y.) Star-Gazette, August 4, 1934, p. 5; Chris Aubeck and Martin Shough, Return to Magonia: Investigating UFOs in History, Anomalist, 2015, pp. 315–328)

1935

1935 — 10:00 p.m. Edward Winters of the US 4th Coast Artillery Regiment watches a dull-red, Zeppelin-shaped object flying over the Panama Canal Zone at high speed from the Pacific to the Atlantic for about 30 minutes. Later it returns, moving in the opposite direction farther away. (NICAP case file)
1935 — Astronomer Arthur M. Harding writes that “Surely there must be some forms of life on Venus that are not so very different from what we find on earth.” (Arthur M. Harding, Astronomy: The Splendor of the Heavens Brought Down to Earth, Garden City Publishing, 1935, p. 408)

January 10 — Charles Spayde, the operator of a telegraph station west of Lima, Ohio, claims that he has been receiving a “series of strange, unintelligible signals” that are broad in wavelength and “come in all over the dial.” He is convinced they are not static or mechanical disturbances and they do not originate on this planet. (Jerome Clark, “Conversations with Martians,” IUR 29, no. 3 (Fall 2004): 20)

January 22 or 23 — 8:00 p.m. A woman in Vienna, Virginia, sees a lightning-like flash in the southwest that flares up several times then dies down. It seems to come from a “great blazing light, almost a ball of fire,” that is moving around the horizon. It is lost to view in the southeast. (“A correspondent from Vienna, Va., writes,” Science 81 (1935): 294)

Spring — Night. A Mr. Aerts sees a brilliant circular object “like aluminum” in the sky above the roofs of nearby houses in Mechelen, Belgium. It lands and he sees two small occupants come out of the rear; they wear square helmets with short antennas and are apparently examining the exterior surface. (Center for UFO Studies, HUMCAT Index 1910–1939, p. 42; Clark III 265)

April 5 — Dusk. A farmer named Mora sees a large, round, brilliant object descend and hover just above the ground near his property in Aznalcázar, Seville, Spain. Several small beings appear and stroll around it. (Clark III 264–265; Patrick Gross, URECAT, April 9, 2007)

May — Radu Popescu and his cousin are walking by the Olt River near Drăgășani, Romania, when they come upon what seems to be a Romany wagon. They see five figures—one next to the object, two farther away, and another two next to a boat on the shore. Suddenly the figures run toward the object, something black covers it, an antenna appears, and it rises up above the river. It turns to a white color as it moves away. (Romania 121–122)

July 1 — The US Division of Investigation officially becomes the Federal Bureau of Investigation. (Federal Bureau of Investigation, Timeline, March 31, 2002)

July 8 — The Swedish Chief of Staff releases its final report on ghost fliers. After concluding that 42 of the 487 reports investigated by Sweden, Norway, and Finland are of actual aircraft violating borders, the military admits the phenomenon is at least partially real. (Swords 363)

1936

1936 — Atmospheric physicist William Jackson Humphreys, after examining 280 cases, argues that ball lightning is caused by persistence of vision, meteorites, will-o’-the-wisp, brush discharge, and other natural phenomena. (W. J. Humphreys, “Ball Lightning,” Proceedings of the American Philosophical Society 76 (1936): 613–626)

1936 — Late evening. Mrs. E. P. Higgins and another member of the Canal Zone Astronomical Society observe a moving orange-red star passing from north to south near Miraflores Lake, Panama. Suddenly it halts and travels in three small circles from right to left. (Lore and Deneault, pp. 112–113; Clark III 1176)

January — George Adamski’s Royal Order of Tibet publishes Universal Jewels of Life as a free monthly newsletter for those attending his meetings in Laguna Beach, California. Besides Adamski, talks are also given by Marguerite Weir, Alice Wells, and others. Beginning in May, the Royal Order has a weekly 15-minute slot on local radio stations KFOX in Long Beach and KMPC in Los Angeles. He also publishes Wisdom of the Masters of the Far East, a summary of his “ageless wisdom” teachings. (“Laguna Beach, 1932–1940: From Temple to Ranch,” The Adamski Case, September 27, 2019)

August 17 — A metallic disc with a diameter of 33–40 feet is seen flying soundlessly near Venice, Italy. It has windows and alternating white and red lights. Two fighters from a nearby air base attempt to intercept it but cannot reach it. After maneuvering for an hour and passing above Mestre, Veneto, it appears more like a torpedo-shaped object. Two other smaller, domed discs are also seen following it. A report on the incident is sent to Foreign Minister Galeazzo Ciano. (Good Need, p. 12; Roberto Pinotti and Alfredo Lissoni, Gli “X-Files” del Nazifascismo, 2001)
Fall — Before 12:00 midnight. Louie R. Lindblad and five companions from Texarkana, Arkansas, are fox hunting in Bowie County, Texas [around the current site of the Red River Army Depot] when they observe numerous star-like objects in a circular formation. Occasionally a light would fly across the circle and take up another position until they all seem to relocate. They watch the display for about 30–40 minutes. (MUFON UFO Journal, no. 150, August 1980, p. 12)

October — Night. Holger Berg and another worker at the Civilian Conservation Corps in Eklutna, Alaska, are walking south toward Anchorage when the see a light approaching them from the south. It is attached to a cigar-shaped object embedded in a blue-green haze and making a strange buzzing noise. As the object passes directly overhead, they notice it actually has a triangular shape and multicolored lights on its tail end. Frightened, they dive into a nearby snowbank then run back to Eklutna. (Marler 64–66)

October 10 — 4:15 a.m. Capt. Mario Rossi, flight instructor at the airfield at Orbetello, Grosseto, Italy, is flying a Savoia-Marchetti SM.62 at 12,465 feet over Talamone, Italy, when he sees an unusual light ahead of his plane. He follows the light, which is at a slightly higher altitude and moving at nearly 440 mph. Rossi loses it after flying into a cloud for 12 minutes and finding himself over Elba. (Ernesto Thayaht, “Three Sightings in Italy,” Flying Saucer Review 1, no. 3 (July/Aug. 1955): 6; 1Pinotti 15–16; “Pilots UFO Sightings,” August 7, 2021)

Winter — Robert Damion, an astronomer of Nice, Alpes-Maritimes, France, who has a private observatory in the Alps, claims that for several nights a “certain portion of the sky in the vicinity of Mars” has been lit up with a deep bluish tint for 40 seconds each time. He is convinced that Mars is trying to signal Earth. (“Strange Light from Mars Called Signal to Earth,” Ogden (Utah) Standard-Examiner, March 11, 1936, p. 12)

1937

January 1 — Noon. Pilot Howard S. Behr is flying a Curtiss-Wright CW-15 Sedan at 3,000 feet over Virginia on his way to Raleigh, North Carolina. Suddenly he sees an object beginning to cross his flight path about 1,000 feet below him. It looks like a gondola, gun-metal gray in color, with both of its ends turned up. He estimates it is about 35–40 feet long and traveling at 150 mph. It moves off to his left and disappears. (Jerome Clark, Strange Skies: Pilot Encounters with UFOs, Citadel, 2003, p. 6; Patrick Gross, “Pilots UFO Sightings,” August 7, 2021)

January 4 — New ghost flier sightings around the fortress at Boden, Norrbotten, Sweden, have prompted Gen. Pontus Reuterswärd to alert Minister of Defence Janne Nilsson about the possibility of foreign spies. (Swords 363)

Late January — Ghost fliers return to Västerbotten, Sweden. A light is seen wandering near the horizon east of Umeå. A light brighter than a headlight is reported from a community near Dorotea. A light similar to position lights on an aircraft flies over a village outside Stensele. (Swords 363)

February 11 — 9:00 p.m. The crew of the fishing vessel Fram is departing Kvalsvik, Norway, when they notice a “large aeroplane” with red and green glowing lights resting on top of the water. The captain turns the boat around to offer assistance, but the object’s lights go out and it is cloaked in a “cloud of smoke” and vanishes. (Strange Company 11)

February 15 — MP Elof Lindberg demands in the Swedish Parliament that a commission with civil experts, not military, should investigate the ghost flier intrusions. He suspects the military has embellished the reports to direct more resources to the northern region and to the Air Force in general. (Swords 363)

May 19 — Lindberg’s request for a civilian ghost flier investigation is rejected by Swedish Minister of Defence Janne Nilsson, who explains that no new facts have surfaced and few new observations have been reported. (Swords 363)

May 30 — Amateur astronomer Latimer J. Wilson of Nashville, Tennessee, is observing Mars through a 12-inch reflector when he sees a series of intermittent bright flashes across the south polar cap. A line of tiny white spots seems to extend across the cap, some coalescing to swell in a brilliant white spot that quickly becomes yellow, then red-yellow, the “phenomenon passing from left to right across the polar cap.” (Latimer J. Wilson, “Apparent Flashes Seen on Mars,” Popular Astronomy 45 (1937): 430; Walter H. Haas, “Flashes on Mars Observed in 1937 and Some Random Remarks,” The Strolling Astronomer 45, no. 1 (Winter 2003): 43–45)
Summer — An object allegedly falls from the sky in Langenau [now Czernica, Poland] into a field belonging to Eva Braun’s family and is retrieved by German soldiers. It supposedly winds up in Wernher von Braun’s laboratory, but the story is probably mythical. (Poland 116–117)

September — Tiffany Thayer publishes the first issue of the Fortean Society Magazine (retitled Doubt in 1944) in New York City. (Fortean Society Magazine 1, no. 1 (September 1937); Clark III 516)

September 10–12 — George Adamski’s Royal Order of Tibet organizes a festival in Laguna Beach, California, dramatizing the “teachings of the universal masters” and a round-table discussion focusing on the “present day needs in unifying all mankind.” (“Laguna Beach, 1932–1940: From Temple to Ranch,” The Adamski Case, September 27, 2019)

1938

1938 — The Ford Foundation and Rockefeller Foundation begin contributing large amounts of money to the Council on Foreign Relations. They create various Committees on Foreign Relations throughout the country, which later become governed by the American Committees on Foreign Relations in Washington, D.C., funded by a grant from the Carnegie Corporation. Influential men are chosen in several cities and are brought together for discussions in their own communities as well as participating in an annual conference in New York. These local committees serve to influence local leaders and shape public opinion to build support for the council’s policies, while also acting as “useful listening posts” through which the Council and US government can “sense the mood of the country.” (Wikipedia, “Council on Foreign Relations”)

1938 — Harvey L. Sperry, 13, sees a white, vapor-like object moving at 5–10 mph at less than 100 feet altitude from north to south in Minneapolis, Minnesota. Its rim seems to be “composed of two interwoven parts revolving and moving in opposite directions.” (Lore and Deneault, p. 136; Clark III 1176)

February — Raymond A. Palmer is hired as editor of Amazing Stories magazine, owned by Ziff-Davis in Chicago, Illinois. He immediately sets out to enliven the periodical, which is close to folding. Concentrating on “space opera” stories, he expands its size to more than 200 pages and encourages readers to contribute content. (Wikipedia, “Raymond A. Palmer”)

Summer — Midnight. Artist Malcolm B. Perry sees what looks like a Navy blimp moving east to west over Somerville, Massachusetts. It has apparent portholes in the sides, and he can see the silhouette of someone looking at him. Other figures are taking turns looking through portholes. It disappears below some low clouds. (Lorenzen, UFOs: The Whole Story, Signet, 1969, pp. 20–21; “1938: Perry’s Alien,” UFO Roundup 5, no. 37 (September 4, 2000); Clark III 265)

July 25 — 11:30 p.m. A lieutenant and his aide see a strong light coming from a hovering lens-shaped object near Guadalajara, Spain. It is over 35 feet in diameter and 15 feet high. A platform with two moving figures is lowered from underneath. A blue beam from the object shines on the witnesses, who feel a sudden chill. The platform rises back up, and the object glows with an intense white light and flies away. (Vicente-Juan Ballester Olmos, A Catalogue of 200 Type I UFO Events in Spain and Portugal, CUFOS, 1976, p. 2; Clark III 265)

October — Dusk. A man is in a cornfield with his father near Alger, Ohio, when an object moves up and hovers about 500 feet above the field. The tractor motor stops running. The object is about 100 feet in diameter and has a ring of pulsating, multicolored lights around it. Soon it makes a right-angle turn and vanishes in the sky, after which they get the tractor working again. (Michael D. Swords, “The Timmerman Files,” IUR 26, no. 4 (Winter 2001–2002): 14)

October 22 — Italian Lt. Col. Mario Pezzi reaches a record altitude of 56,850 feet in a Caproni Ca.161. It is still the highest a manned, propeller-driven biplane has gone. (Wikipedia, “Mario Pezzi (aviator)"

October 30 — 8:00 p.m. “The War of the Worlds” episode of the American radio drama anthology series The Mercury Theatre on the Air, directed and narrated by actor and future filmmaker Orson Welles, is an adaptation of H. G. Wells’s novel The War of the Worlds (1898). It is performed and broadcast live in New York City as a Halloween episode over the Columbia Broadcasting System radio network. The episode becomes famous for allegedly causing panic among its listening audience, though the scale of that panic is disputed as the program has relatively few listeners. In the days after the adaptation, widespread outrage is expressed in the media. The program’s news-
December 17 — The process of nuclear fission is discovered by chemist Otto Hahn and his assistant Fritz Strassmann at the Kaiser Wilhelm Institut für Chemie in Berlin, Germany, producing barium by bombarding uranium with neutrons. (Atomic Heritage Foundation, “Atomic Timeline”)

1939

1939? — Sisters Lucile and Allene Holt, daughters of Rev. Turner Hamilton Holt, claim they are separately told by their father, a cousin of Secretary of State Cordell Hull, that Hull personally showed Holt a wrecked circular craft of some kind and glass jars holding unknown creatures. These are stored in a sub-basement of the US Capitol building in Washington, D.C. Both sisters are told the story when Holt is a minister at the Shenandoah Christian Church in Greenwich, Ohio, before 1947, but researchers can find no confirmation in any of Hull’s papers or memoirs. (William E. Jones and Eloise G. Watson, “Pre–World War II ‘Creature’ Retrieval?” IUR 26, no. 4 (Winter 2001–2002): 6–9, 12)

January 13 — The process of nuclear fission is explained theoretically in Stockholm, Sweden, by Lise Meitner and her nephew Otto Robert Frisch, who compares it to the biological fission of living cells. (Atomic Heritage Foundation, “Atomic Timeline”)

January 25 — A Columbia University team conducts the first nuclear fission experiment in the US in the basement of Pupin Hall on the south side of 120th Street in New York City. The experiment involves placing uranium oxide inside an ionization chamber and irradiating it with neutrons, then measuring the energy released. The results confirm that fission is occurring and hints strongly that it is the isotope uranium-235 that is undergoing fission. (Richard Rhodes, The Making of the Atomic Bomb. Simon & Schuster, 1986, pp. 267–270)

January 26 — The Carnegie Institution of Washington holds a press conference at the Fifth Washington Conference on Theoretical Physics in D.C. to announce the discovery of nuclear fission. (Atomic Heritage Foundation, “Atomic Timeline”)

Late summer — A girl sleeping in the back yard of her home in Fort Worth, Texas, is awakened by a whirring noise. She sees a small object approaching from the east at an altitude of 20–30 feet. When it gets close, it descends to the level of her bed and hovers briefly at the foot, so close that she can touch it. It has the shape of an “old-time Mississippi steamboat with a deck around the bottom.” Strata or veins run through it, and a soft, blue-green glow surrounds it. It is 3 feet and 1 foot high. It rises suddenly and disappears. (“Woman Says Strange Object Flew by Her Bed in Yard,” Fort Worth (Tex.) Star-Telegram, March 24, 1950, p. 23; Clark III 1176)

Early August — George Pârvu and four other schoolchildren are playing in an open field in Armășești, Romania, when they see a bright light in the sky moving in a zigzag fashion. It circles a few times then descends in their direction, getting bigger and brighter. The egg-shaped object hovers silently at an altitude of 230–260 feet. Suddenly it becomes a dull coppery color and lands about 140 feet away. Two of the children flee but Pârvu and two others remain. The bottom of the object has a ring of small turbine blades that look like paddles in a water mill. It seems to be 16 feet high. A hatch opens and two little men about 4 feet tall come out, dressed in gray diving suits. They walk toward the children, one of them holding a rectangular box pointing at the ground. The children approach them, holding hands, but when they are about 23 feet away the other man points a thick stick-like device at them and they are no longer able to move forward. The little men bow in their direction, waist deep, then turn around and reenter the object, which takes off. The children find a circular area of yellowed grass where the object had been. Pârvu feels energized, but one of the other boys is temporarily sick. Pârvu encounters what he perceives to be the same object in August 1944, August 1949, and the summer of 1954 (in the center of Bucharest). (George Pârvu, La voia destinului, CNI Coresi, 2011; Romania 124–128)
August 2 — Hungarian-American physicist Leo Szilárd writes a confidential letter to President Roosevelt, in consultation with fellow Hungarian physicists Edward Teller and Eugene Wigner. He has persuaded Albert Einstein to sign it as well. The letter warns that Germany might develop atomic bombs and suggests that the United States should start its own nuclear program. It results in the establishment of research into nuclear fission by the US government, and ultimately to the creation of the Manhattan Project. Delayed by the outbreak of war in Europe, the letter is eventually hand-delivered to Roosevelt by economist Alexander Sachs on October 11. Roosevelt gives the letter to his aide, Brig. Gen. Edwin “Pa” Watson with the instruction: “Pa, this requires action!” (Wikipedia, “Einstein–Szilárd letter”; Atomic Heritage Foundation, “Atomic Timeline”)

October — An egg-shaped object with 8 spots like portholes is observed through an astronomical reflector telescope at Wisconsin Rapids, Wisconsin. (Richard H. Hall, From Airships to Arnold, UFO Research Coalition, 2007, p. 17) October 21 — After reading Szilárd’s letter, Roosevelt creates an Advisory Committee on Uranium, which meets for the first time at the National Bureau of Standards in Washington, D.C. The committee consists of NBS Director Lyman James Briggs, Army Lt. Col. Keith F. Adamson, and Navy Cmdr. Gilbert C. Hoover. It is attended by physicists Fred L. Mohler from the National Bureau of Standards and Richard Brooke Roberts from the Carnegie Institution of Washington, and Szilárd, Wigner, and Teller. Einstein is invited but declines to attend. Adamson is skeptical about the prospect of building an atomic bomb, but is willing to authorize $6,000 (equivalent to $107,000 in 2018 dollars) for the purchase of uranium and graphite for Szilárd and Enrico Fermi’s experiments into producing a nuclear chain reaction at Columbia University. (Wikipedia, “S-1 Executive Committee”)

November 13 — 7:00 a.m. A building foreman is driving past a deserted farm near Brockworth, Gloucester, England, when he hears a high-pitched humming sound. He watches a gray, bell-shaped object hovering about 20 feet above a field 100 feet away. He estimates it is about 25 feet across. Dark window-like patches are visible on the side. A “curtain” of blue-green light emanates from the underside. After about two minutes, the green light retracts into the base of the object. The object then tilts to an angle of about 80° and moves away without a sound. (Jenny Randles and Peter Warrington, Science and the UFOs, Basil Blackwell, 1985, p. 3; Jenny Randles, “Beam Me Up,” Fortean Times 381 (July 2019): 29–30)

1940

1940 — Astronomer Royal Harold Spencer Jones publishes Life on Other Worlds, an essay on the cosmos, the possibility of life arising, science’s tools, the development of the Earth, solar system bodies without atmospheres, the giant gas planets, Venus, Mars, the origin of solar systems, and possibilities for life beyond the solar system. (H. Spencer Jones, Life on Other Worlds, Macmillan, 1940; Michael D. Swords, “SETI/ETI and UFOs,” JUFOS 5 (1994): 141–142)

March — George Adamski moves from Laguna Beach to a property along the Star Route in Valley Center, California, about 9 miles from where Palomar Observatory is under construction to set up a spiritual retreat. He acquires a 15-inch telescope to create an interest in astronomy. (“Palomar Mountain, 1940–1960: From Obscurity to World Fame,” The Adamski Case, September 22, 2019)

March — US physicist John R. Dunning and colleagues at Columbia University verify the hypothesis of Danish physicist Niels Bohr that fission is more readily produced in the rare uranium-235 isotope than the abundant uranium-238 isotope. Dunning begins investigating gaseous diffusion as a process for enriching uranium. (Atomic Heritage Foundation, “Atomic Timeline”)

March — Otto Robert Frisch and Rudolf Peierls, two researchers at the University of Birmingham in England—who ironically have been assigned to investigate nuclear weapons by Australian physicist Mark Oliphant because, as enemy aliens in Britain, they are ineligible to participate in secret war work—issue the Frisch-Peierls memorandum. It contradicts the common thinking of the time that many tons of uranium would be needed to make a bomb, requiring delivery by ship. The calculation in the memorandum shows that a bomb might be possible using as little as 1–10 kilograms of pure uranium-235, which would be quite practical for aircraft to carry. (Wikipedia, “Frisch–Peierls memorandum”; Atomic Heritage Foundation, “Atomic Timeline”)

March 22 — Franklin D. Roosevelt signs Executive Order 8381, creating the three security levels for the most important documents: Restricted, Confidential, and Secret. (US President, Executive Order No. 8381, “Defining Certain Vital Military and Naval Installations and Equipment,” March 22, 1940)
Spring — Afternoon. Walking down a street in Hinsdale, Illinois, William T. Powers sees five disc-shaped objects in the northern sky. They are traveling together at 100–200 mph and disappear into a cloud. (Clark III 1177)

April 10 — The first meeting of the MAUD Committee in England, established in response to the Frisch-Peierls memorandum to determine if an atomic bomb is feasible, meets in the Royal Society committee room in Burlington House, London. The original members are physicists George Paget Thomson, James Chadwick, John Cockcroft, Mark Oliphant, and Philip Burton Moon; physicists Patrick Blackett, Charles Drummond Ellis, and chemist Norman Haworth are subsequently added, along with a representative of the Director of Scientific Research at the Ministry of Aircraft Production (MAP). (Wikipedia, “MAUD Committee”)

Mid-May — 9:00 a.m. Lavern P. Zewiske and his father Paul are checking some recently planted corn on their farm near Fairbank, Iowa. A gray object with multiple hooked “hairs or tentacles” moving around on the bottom passes overhead at 500–1,000 feet. (“Out of the Past,” CUFOS Associate Newsletter 5, no. 5 (Oct./Nov. 1984): 6)

May 21 — President Franklin D. Roosevelt authorizes the FBI to conduct electronic surveillance and wiretapping on US spies, saboteurs, or suspicious individuals. (“Warrantless FBI Electronic Surveillance,” US Senate, Select Committee to Study Governmental Operations with Respect to Intelligence Activities, Final Report, April 23, 1976, pp. 271–351)

Summer (or summer 1941) — Near St. Clair, Pennsylvania, as he is walking along a country road, young Frank Sever hears a loud noise in the nearby woods. He sees something like an “aluminum building” partly concealed in the trees. A short distance from it he sees “six small men milling about or looking for something on the ground.” Thinking they are ghosts, he runs. Later he comes back and confirms there is no building on the spot. (Clark III 265)

August 11 — The RAF Bomber Command issues a report on “Phenomena Connected with Enemy Night Tactics” concerning unidentified aircraft observed by bombing crews over the coast of Holland and the Ruhr Valley of Germany. The report suggests the sightings are either due to observer strain or German “experimental apparatus.” (Strange Company 16–17)

1941

1941 — A physicist and his wife are traveling north on US Highway 99 north of Bakersfield, California, and pull off to the side to watch a long, slender object of a blazing red, green, and yellow color moving about 8 miles east of them. It is traveling at about 50 mph at an altitude of 200–300 feet and is clearly outlined against the foothills. It seems to be several times longer than a bomber. (“Recent Sightings,” APRO Bulletin, January 1957, p. 5)

Early spring — 9:00–9:30 p.m. Rev. William Guy Huffman of the Red Star Baptist Church in Cape Girardeau, Missouri, is summoned to an apparent airplane crash one Saturday. When he arrives at the scene, about 15 miles from town, he finds a weird-looking craft “broken and scattered all around,” but smooth and rounded without edges or seams. A cockpit with a chair facing an instrument panel remains intact. Police officers, military men, and plain-clothes individuals are sifting through the wreckage. He also sees three non-human bodies about 4 feet tall with long human bodies about 4 feet tall with long arms, oversized heads, and large eyes. He says a prayer for them, and afterward sees someone take a photo of an alien propped up by the arms between two plainclothesmen. (Clark III 343–344; Paul Blake Smith, MO41: The Bombshell before Roswell, W&B Publishers, 2015; Billy Booth, “1941 Cape Girardeau, Missouri Crash,” liveabout.com, February 5, 2019; Kevin Randle, “Cape Girardeau UFO Crash, 1941,” A Different Perspective, December 5, 2019)

March — The Chain Home radars placed around the English coastline detect a formation of blips moving across the English Channel. RAF fighters are sent to intercept, but their crews see nothing and the blips fade. The radar returns are characterized as radar “angels,” invisible targets in the clear atmosphere. (David Clarke, “The Radar Angels,” Fortean Times 195 (May 2005): 36–37)

March 17 — The Western Defense Command is established as the command formation of the US Army responsible for coordinating the defense of the Pacific Coast and training soldiers prior to their deployment overseas. (Wikipedia, “Western Defense Command”)
May — With the help of the American Legion, volunteers are recruited into the Aircraft Warning Service, the civilian arm of the Army’s Ground Observer Corps. On the east coast, the AWS is under the auspices of the Army Air Force’s 1st Interceptor Command based at Mitchel Field near Uniondale, New York. On the west coast, the AWS is under the auspices of the 4th Interceptor Command based in Riverside, California. On both coasts, observation posts, information centers, and filter centers are established. (Wikipedia, “Aircraft Warning Service”; Project 1947, “Aircraft Warning Service (AWS): Freeman Observation Post #52”)

June 20 — The Army Air Corps becomes the US Army Air Forces to provide the air arm greater autonomy. (Wikipedia, “United States Army Air Forces”)

June 26 — The first draft of the final report of the MAUD Committee is written by George Paget Thomson and circulates among committee members. It concludes that an atomic bomb is feasible. Vannevar Bush receives a copy. Without the help of the MAUD Committee the Manhattan Project would have started months behind. Instead, they are able to begin thinking about how to create a bomb, not whether it is possible. (Wikipedia, “MAUD Committee”)

June 28 — Roosevelt establishes the Office of Scientific Research and Development; Vannevar Bush is appointed director. It subsumes the National Defense Research Committee, whose Uranium Committee becomes the Uranium Section of the OSRD, soon renamed the S-1 for security reasons. To the S-1 Section, Vannevar Bush adds American physicist Samuel King Allison, Russian-American physicist Gregory Breit, American physicist Edward Condon, physicist Lloyd P. Smith, and Henry DeWolf Smyth. American physicist Ross Gunn is dropped in line with an NDRC policy not to have Army or Navy personnel in the sections. Lyman James Briggs remains the chairman, with American physicist George B. Pegram as the vice chairman. (Wikipedia, “Office of Scientific Research and Development”)

Late June — About 5:30 p.m. Helen Michailoff and her mother are in Odessa, Ukraine, when they see a raspberry-red object slowly moving east and emitting smoke. Thinking it is a bomb, they rush to the basement, but there is no explosion. (“Out of the Past,” CUFOS Associate Newsletter 4, no. 5 (Oct./Nov. 1983): 4)

July 3 — The Northrop N-1M, an experimental “flying wing” aircraft with a 38-foot wingspan, is first flown at Baker Dry Lake in the Mojave Desert, California, by test pilot Vance Breese for several hundred yards. He reports that the aircraft can fly no higher than 5 feet. After this is corrected, the N-1M takes another 28 flights through November. (Wikipedia, “Northrop N-1M”)

July 11 — Roosevelt establishes the Office of the Coordinator of Information, a forerunner of the Office for Strategic Services, headed by lawyer William J. Donovan. It is tasked with collecting and analyzing national security information. (Wikipedia, “Office of the Coordinator of Information”)

September — Night. Seaman Mar Doroba, Anthony Kornilak, and others on the British troopship SS Pulaski in the Mozambique Channel see a “strange globe glowing with greenish light, about half the size of the full moon.” They watch it for more than an hour before it disappears. (Strange Company 17; Lore and Deneault, pp. 130–131)

October 2 — German test pilot Heini Dittmar attains an unofficial airspeed record of 623 mph in a rocket-powered Messerschmidt Me 163A at Peenemünde, Germany. (Wikipedia, “Heini Dittmar”)

October 9 — Roosevelt approves an atomic weapons program after meeting with Office of Scientific Research and Development Director Vannevar Bush and Vice President Henry A. Wallace. On Bush’s advice, Roosevelt chooses the US Army to run the project rather than the Navy, although the Navy has shown far more interest in the field, and is already conducting research into atomic energy for powering ships. Bush’s negative experiences with the Navy has convinced him that it would not listen to his advice and cannot handle large-scale construction projects. (Cameron Reed, “Manhattan Project Mystery,” Forum on the History of Physics, Spring 2012)
Early December — Army Lt. Walter Hanson and his wife are stranded in the Georgia countryside when they run out of gas. They see a star-like object that swiftly moves in circles counterclockwise. Suddenly it stops and takes off obliquely. (Strange Company 17–18; Lore and Deneault, p. 140)

December 8 — Around noon. Red Cross volunteer Yoshio Taketa is resting on the lawn of the Kuhio School in Honolulu, Hawaii, with 9 others. The smoke is still rising from the Pearl Harbor attack to the west. One of them notices a round white object at about 20,000 feet overhead. It floats away slowly. (Clark III 501)

December 18 — With the US at war, funding for an atomic bomb is now available in amounts undreamed of the year before. At the S-1 Section meeting, American physicist Ernest Lawrence asks for $400,000 for electromagnetic separation, and the section immediately recommends granting it. MIT physicist Karl Taylor Compton is allocated $340,000 for nuclear reactor research at Columbia and Princeton, and $278,000 at the University of Chicago. Another $500,000 is earmarked for raw materials. His proposed schedule is no less breathtaking: to produce a nuclear chain reaction by July 1942, and an atomic bomb by January 1945. In January 1942, he creates the Metallurgical Laboratory, centralizing the work at the University of Chicago. (Wikipedia, “S-1 Executive Committee”)

December 22 — Electrical engineer George Bogner stops his car at the corner of St. Agnes Avenue and Pleasant Street in Utica, New York, to watch a round, metallic object speed silently across the sky. He estimates it at 100 feet in diameter and moving at 300 mph. (Strange Company 18; Lore and Deneault, pp. 140–141)

1942

1942 — Naval Intelligence Officer Bernard M. Baruch Jr. develops a submarine reporting network, Communication Instruction for Reporting Enemy Sightings on which CIRVIS is modeled in 1948. (US Naval War College, Master Script for “Communication Instruction for Reporting Enemy Sightings,” undated; NICAP, “Capt. Bernard Baruch Jr.”)

1942 — 1:00 a.m. A woman returning home in Prouvy, Nord, France, finds herself face-to-face with three small entities with large round heads and short beards. They have large, luminous yellow eyes and wear tight, one-piece suits with a metallic sheen that leave only their faces exposed. The beings stare at her without moving, so she goes inside to get her husband, but by the time they return the entities have gone. (Center for UFO Studies, HUMCAT Index 1940–1949, p. 3; Clark III 265; Patrick Gross, URECAT, September 26, 2007)

February 24–25 — The Battle of Los Angeles takes place, a rumored enemy attack and subsequent anti-aircraft barrage over Los Angeles, California. Air raid sirens sound throughout Los Angeles County on the night of February 24. A total blackout is ordered, and thousands of air raid wardens are summoned to their positions. At 3:16 a.m., the 37th Coast Artillery Brigade begins firing .50 caliber machine guns and 12.8-pound anti-aircraft shells into the air at reported aircraft; more than 1,400 shells are eventually fired. Pilots of the 4th Interceptor Command are alerted, but their aircraft remain grounded. The artillery fire continues sporadically until 4:14 a.m. The “all clear” is sounded and the blackout order lifted at 7:21 a.m. Several buildings and vehicles are damaged by shell fragments, and five civilians die as an indirect result of the anti-aircraft fire. Three are killed in car accidents in the ensuing chaos and two die of heart attacks attributed to the stress of the hour-long action. The incident is front-page news along the Pacific coast and earns some mass media coverage. Within hours of the end of the air raid, Secretary of the Navy Frank Knox holds a press conference, saying the entire incident was a false alarm due to anxiety and “war nerves.” Knox’s comments are followed by statements from the Army on February 26 that reflect General George C. Marshall’s belief that the incident was caused by commercial airplanes used as a psychological warfare campaign to generate panic. Some contemporary press outlets suspect a cover-up. Rep. Leland M. Ford (R-Calif.) calls for a congressional investigation, saying, “none of the explanations so far offered removed the episode from the category of ‘complete mystification’ … this was either a practice raid, or a raid to throw a scare into 2,000,000 people, or a mistaken identity raid, or a raid to lay a political foundation to take away Southern California’s war industries.” The Japanese government, after the war ended, declares that they had flown no airplanes over Los Angeles during the war. In 1983, the US Office of Air Force History attributes the event to a case of “war nerves” triggered by a lost weather balloon and exacerbated by stray flares and shell bursts from adjoining batteries. A number of fake documents about this incident have been circulated by Timothy S. Cooper. (Wikipedia, “Battle of Los Angeles”; Clark III 1176–1177; NICAP, “Battle of Los Angeles”; Lore and Deneault, pp. 74–87; Good Above, pp. 15–17; Good Need, pp. 17, 31; “No Bombs Dropped, No Planes Shot Down,” Los Angeles Herald Express, February 25, 1942, p. 1; “Japanese Carry War to California Coast,” Life, March 9, 1942, pp. 19–23; Brett Holman, “New Light on the Battle of Los Angeles,” Airminded, April 20, 2011; David Marler, “The Battle of LA
February 26 — Army Chief of Staff George C. Marshall writes Roosevelt that as many as 15 unknown commercial aircraft, flying at various speeds up to 200 mph and at elevations from 9,000 to 18,000 feet, were responsible for the Battle of Los Angeles. (presidentialufo.com, “General George Marshall Secret Memo to President Roosevelt about the Unidentified Objects over Los Angeles on February 25, 1942”; Good Above, pp. 17, 446)

February 26 — Royal Netherlands Navy cruiser HNLMS Tromp, returning to Australia after the Battle of Badung Strait (off Bali in Indonesia), reports a large, aluminum disc speeding above it in the Timor Sea and maneuvering for nearly 4 hours. It departs at an estimated 3,500 mph. (“Australasia,” Flying Saucer Review 3, no. 6 (Nov./Dec. 1957): 6)

March 5 — Benjamin Smith, formerly of the Army Air Corps, sees several blinking lights moving slowly over the Middle River adjacent to Essex, Maryland. They circle the river two or three times then disappear. Smith reports the incident to local police, who then inform Naval Intelligence. (Towson (Md.) Union News, March 6, 1942; Jan Aldrich)

March 9 — The Air Service Command becomes a major Army Air Forces unit to support logistical functions. (Wikipedia, “Air Materiel Command”)

Spring — Rev. Robert H. Moore and six other persons attending the Seabury-Western Theological Seminary in Evanston, Illinois, watch a small, light-gray, rectangular object over the northern part of town for 10 minutes. (Lore and Deneault, p. 142)

April 1 — The Materiel Division of the Air Service Command assumes responsibility for R&D and procurement and is redesignated as the Air Corps Materiel Command. (Wikipedia, “Air Materiel Command”)

May — 3:00 p.m. Abdon Gonzales Tello, 13, and other boys see a silvery, cigar-shaped object in the sky to the west of Miraflores, Peru. Its ends are cut off at sharp angles, and it takes 20 seconds to proceed to the south and out of sight. (Lorenzen, UFOs: The Whole Story, Signet, 1969, p. 22)

June — Col. James C. Marshall is selected to head the Manhattan Project. (Wikipedia, “Manhattan Project”)

June 13 — Roosevelt establishes the Office of Strategic Services, a wartime intelligence agency, with Gen. William J. Donovan at its head. (Wikipedia, “Office of Strategic Services”)

June 19 — Roosevelt abolishes the S-1 Section and replaces it with the S-1 Executive Committee, tasked with the technical and contractual aspects of producing an atomic bomb, while the Army handles engineering, construction, and site selection. American chemist James B. Conant is appointed as its chairman, and Lyman James Briggs, Karl Taylor Compton, Ernest Lawrence, and American chemists Eger V. Murphree and Harold C. Urey as its other members. Roosevelt approves the committee’s recommendation to move to the pilot plant stage and build piles to produce plutonium and electromagnetic, centrifuge, and gaseous diffusion plants to produce uranium-235. (Wikipedia, “S-1 Executive Committee”)

June 25 (or March 25) — Midnight. Flight Lt. Roman (Ray) Sabinski of the 301 Polish Bomber Squadron is flying an RAF Wellington bomber after returning from a run on the Ruhr Valley, Germany; he sees a bright copper-colored light the “size of the moon” following the aircraft over the Zuiderzee in Holland. When it gets within 200 yards, the rear gunner shoots at it with all four machine guns. After two minutes, it moves at terrific speed to the port side, and the front gunner starts firing at it. Sabinski takes evasive action, but the object keeps pacing him. Finally, it moves in front of the bomber, stays there a while, then takes off at fantastic speed. (Strange Company 23–25; Gordon W. Creighton. “Foo Fighters,” Flying Saucer Review 8, no. 2 (March/April 1962): 15; Patrick Gross. “Pilot Reports”)

Late 1942? — According to records released in August 2010, Prime Minister Winston Churchill supposedly classifies for 50 years an alleged UFO incident because of fears it could create mass panic. The incident allegedly involves an
RAF reconnaissance plane returning from a mission in Europe. The aircraft is over or near the English coastline when it is allegedly intercepted by a strange metallic object that matches the aircraft’s course and speed for a time before shooting away. The plane’s crew photograph the object, which “hovered noiselessly” near the aircraft before moving off. According to the documents, details of the cover-up emerge when a man writes to the government in 1999 seeking to find out more about the incident. He describes how his grandfather, who served with the RAF, was present when Churchill and Gen. Dwight Eisenhower discussed how to deal with the encounter. However, the evidence is hearsay and somewhat questionable. (UFOFiles2, pp. 20–21)

Summer — 5:50 p.m. An RAAF pilot is on flying patrol off the Tasman Peninsula, Tasmania, following reports by fishermen of strange lights on the waters of Bass Strait. A “singular airfoil of glistening bronze color” appears out of a cloudbank. It’s about 150 feet long, 50 feet in diameter, and has a dome on top. It accompanies his plane for a few minutes before departing at “a hell of a pace.” It turns again and dives into the ocean, throwing up a “whirlpool of waves.” (Bill Chalker, “Australian A.F. UFO Report Files,” APRO Bulletin 30, no. 10 (October 1982): 6–7)

Late summer — Pvt. Albert Lancashire, 27, is standing guard at Cresswell radar station near Newbiggin-by-the-Sea, Northumberland, England, when he sees a cloud-enshrouded light approaching from the North Sea. As it descends, he is drawn up into it by a beam. Small men grab him and carry him into the craft, where he sees other human figures of normal height, including an apparent captain with dark hair and goggles. He is made to lie down on a couch or table. He has only vague memories of what happens next, but he thinks a medical exam is performed. He wakes up back at his sentry post. (Center for UFO Studies, HUMCAT Index 1940–1949, p. 4; “New Time Lapse Case from England Uncovered,” MUFON UFO Journal 107 (October 1976): 1–18; Clark III 265)

August — Evelyn M. Howell and two other adults see a huge cigar-shaped object hovering near them between Lafayette Township and Newton, New Jersey. It has “two rows of windows” that give off blue, green, white, and red fluorescent lights. They watch it for 10 minutes, after which it silently and slowly takes off. Howell and her husband see a similar object on the drive home to Ogdensburg, New Jersey. (Clark III 1178)

August 5 — Early morning. The Navy destroyer USS Helm is on its way to the Solomon Islands in preparation for the Guadalcanal landings. A radio blackout is in effect. An aircraft approaches, a full alert is sounded, and three cruisers (Vincennes, Quincy, Astoria) and seven other ships open fire on it. The object is not hit and proceeds to circle around the fleet. An anonymous sailor on security detail on the Helm watches it through binoculars and sees it as 90 feet in diameter, oval, with a round dome on top. The ships continue to fire on the UFO, which attains extremely high speeds. Commanding Officer Chester Edward Carroll later hears that the aircraft is neither German nor Japanese. (Strange Company 27–28)

August 12 — Day. Sgt. Stephen J. Brickner of the 1st Marine Division on Tulagi in the Solomon Islands is cleaning his rifle when an air-raid warning is sounded. He dives into his foxhole looking to the sky. He hears a roaring sound unlike that of an aircraft. Soon he sees a formation of more than 150 silvery objects, in straight lines of 10 or 12. The objects seem to wobble slightly. They are flying faster than Japanese planes and are soon out of sight. (Good Above, p. 18; Strange Company 28–29)

August 29 — Army Air Corps control tower operator Pvt. Michael Solomon sees two small reddish objects descend near the AAC Advanced Flying School at Columbus, Mississippi, then speed away. He later contacts government officials and officers from the school in attempting to confirm his sighting. (Clark III 1177; Jan Aldrich)

September 23 — Col. Leslie Groves is promoted to brigadier general and becomes director of the Manhattan Project. The Military Policy Committee, consisting of Vannevar Bush (with James B. Conant as his alternative), Maj. Gen. Wilhelm D. Styer, and Rear Adm. William R. Purnell, is created to oversee the project. (Wikipedia, “Manhattan Project”)

September 25 — RAF Bomber Command’s Operational Research Section releases a report titled “A Note on Pyrotechnic Activity over Germany.” An unnamed Flak Liaison Officer has coordinated the reports from No. 3 and No. 5 Groups and determines there are two types of phenomena: a ball of fire that is shot from the ground and drips multicolored fragments, and multi-part flares. Another type involves “small coloured balls” that climb to 7,000 feet. (Strange Company 32)

September 29 — US Under Secretary of War Robert P. Patterson authorizes the Corps of Engineers to acquire 56,000 acres in Tennessee for Site X, which will become the Oak Ridge, Tennessee, laboratory and production site. (Wikipedia, “Oak Ridge, Tennessee”)
October 7 — Land at Oak Ridge, Tennessee, is acquired by eminent domain for Clinton Engineer Works. (Wikipedia, “Clinton Engineer Works”)

October 19 — Leslie Groves approves J. Robert Oppenheimer to coordinate the scientific research of the Manhattan Project at the Site Y laboratory in Los Alamos, New Mexico. (Wikipedia, “Manhattan Project”)

November 15 — Teams under physicists Herbert L. Anderson and Walter Zinn have constructed 16 experimental nuclear reactors under the Stagg Field stands at the University of Chicago. (Wikipedia, “Metallurgical Laboratory”)

November 25 — The Los Alamos site in New Mexico is acquired for Project Y. (Wikipedia, “Project Y”)

November 28 — 10:40–10:45 p.m. Capt. Lever and the No. 61 Squadron crew of an RAF Lancaster are returning from a bombing raid on Turin, Italy, when about 10–15 miles southwest of the city they see an object 200–300 feet long traveling southeast at a speed of 500 mph. It has four pairs of red lights spaced along its body and is flying on a level course. Five minutes later, as the Lancaster approaches the Alps at 14,000 feet, the crew sees the object again traveling southwest up a valley. It disappears when the red lights go out. (UFOFiles2, pp. 25–26; Strange Company 34–35; Good Need, pp. 18–19, 32)

December — A Technical Data Laboratory is established at Wright Field near Dayton, Ohio, as part of the Army Materiel Command. Its operations include the evaluation of foreign aircraft and related equipment. (US Air Force, “National Air and Space Intelligence Center Heritage,” July 31, 2015)

December — 8:00 p.m. RAAF Lt. Bruce Clyde Lumsden is flying a Hawker Hurricane heading for the French coast. About 7,000 feet over the mouth of the River Somme, France, he observes two orange lights climbing, one slightly above the other. He completes a full turn, putting the lights behind him on the port side. They now appear brighter and larger. When they reach his altitude, they stop climbing and stay at his altitude. He makes another full turn, but the objects stay with him. Lumsden dives to 4,000 feet, but the lights match his maneuvers. He increases his speed to 260 mph and gradually leaves them behind. His squadron mates do not believe him, but the next night another squadron member has a similar encounter with a green light. (Strange Company 36)

December 2 — Chicago Pile-1, the first nuclear reactor, goes critical at the University of Chicago under the leadership and design of Enrico Fermi, achieving a self-sustaining reaction just one month after construction was started. (Wikipedia, “Chicago Pile-1”)

December 27 — The Northrop N-9M, a prototype flying wing bomber with a wingspan of 60 feet, makes its first test flight at Jack Northrop Field [now Hawthorne (Calif.) Municipal Airport] with pilot John Wescott Myers. Through May, 44 more flights are made, nearly all terminated by mechanical failures. (Wikipedia, “Northrop N-9M”)

1943

January 15 — During a US bombing raid over Cherbourg, Manche, France, several crews see “large numbers of projectiles resembling ‘schools of flying fish,’ about a foot long and similar to incendiary bombs, coming up from a direction of the town.” (Strange Company 38)

February 9 — Land for a plutonium production complex is acquired at Hanford, Washington. (Wikipedia, “Hanford Site”)

February 18 — Construction begins for Y-12, a massive electromagnetic separation plant for enriching uranium at Oak Ridge, Tennessee. (Wikipedia, “Y-12 National Security Complex”)

April 1 — Los Alamos Laboratory is established in New Mexico and begins operations. (Wikipedia, “Project Y”)

April 5 — 9:50 a.m. Flight instructor Gerry A. Casey and a student pilot in a Boeing-Stearman Model 75 watch a radiant-orange, elliptical disc dive at their aircraft near Long Beach, California. There is no propellor and it has a rounded hump above and below. It hovers alongside with a slight wobble, then accelerates, turns from orange to white, and climbs out of sight in 2 seconds. (Project 1947, “UFO Reports, 1943”; Gerry A. Casey, “UFO: The Time for the Telling Has Come,” Tacoma (Wash.) Western Flyer, July 7, 1989, via UFO Newslipping Service 241 (August 1989), p. 3; Patrick Gross, “Observation at Long Beach, 1943”)

April 9 — 5:00 p.m. Kazimierz Bzowski and other resistance fighters are monitoring a fire in the Warsaw Ghetto in Poland. They notice a flying object approaching them at about 60 mph. Through binoculars it appears to be a sphere colored with tangled strips of both raspberry and blue-green colors. Bzowski estimates it is at an elevation
of 200 feet and is about 25 feet in diameter. They observe German and Lithuanian snipers on Bonifraterska street shooting at it, although the bullets seem to pass through it. The object alters course and heads toward Old Town, then stops dead and shoots away at great speed. (Poland 13)

May — Capt. Gordon W. Cammell is flying an RAF Lancaster bomber back over the English Channel when he and his entire crew see a “huge orange ball on or near the sea” 7,000–8,000 feet below them. Over the next 10 minutes, they watch it project a bright and constant light. (Strange Company 41)

May 19 — The Northrop N-9M flying wing bomber prototype crashes 12 miles west of Muroc Army Air Base [now Edwards AFB], California, killing its pilot Max Constant. (Wikipedia, “Northrop N-9M”)

May 26 — Late night. Capt. Ray Smith and copilot Sgt. Gordon N. Cockcroft are flying at 18,000 feet in a Halifax bomber on a run near Essen, Germany, when they see a silvery-gold cylindrical object, larger than their aircraft, on the port side. It has several evenly spaced portholes. It is hovering at a 45° angle. After 20–30 seconds it climbs away at high speed. (“Correspondence,” CUFOS Associate Newsletter 3, no. 5 (Oct./Nov. 1982): 4–6; Strange Company 40; Project 1947, “UFO Reports, 1943”; John Hanson and Dawn Holloway, Haunted Skies: The Encyclopaedia of British UFOs: Volume 1, 1940–1959, Fortean Words, 2010)

June — The Army Air Force’s Air Tactical Service Command meets with Lockheed Aircraft Corporation in Burbank, California, to ask them to develop a jet fighter. (Wikipedia, “Skunk Works”)

June 2 — Construction begins on K-25, the gaseous diffusion plant at Oak Ridge, Tennessee. (Wikipedia, “K-25”)

July — Lockheed Engineer Kelly Johnson and other associate engineers hand-deliver a proposal for the XP-80 jet fighter to the Air Tactical Service Command. Two days later, the go-ahead is given to Lockheed to start development, and the Skunk Works is born in Burbank, California, with Johnson at the helm. The name supposedly comes from the L’il Abner comic strip, which has a place called “Skon Works” where a strong beverage is brewed from skunks, old shoes, and other ingredients. (Wikipedia, “Skunk Works”)

July 18 — A French prisoner in a German labor camp near Gdynia, Poland, is walking to work along the Baltic Sea when he sees a flat, metallic object embedded in the sand. A human figure is standing next to it, apparently trying to dig it up. When he passes by, the figure, apparently an Asian woman with long blonde hair and dressed in a tight-fitting overall, turns in his direction. The witness assumes she is the famous German aviator Hanna Reitsch and helps her dig the experimental aircraft out of the sand. The object is 20 feet in diameter and looks like two metallic saucers put together. The woman touches the witness’s chest with her hand and points to the sky. She touches her belt and a door in the object opens. She crawls inside, the door closes, and the object ascends and departs at a tremendous speed. (Jean Sider, Ultra Top-Secret: Ces OVNI qui font peur, Axis Mundi, 1990)

September — During an air battle between the Germans and Russians, a member of the Spanish Blue Division fighting with the Germans near Pushkin outside Leningrad [now Saint Petersburg], Russia, notices a disc-shaped object above the planes. It appears to be observing the battle, then disappears at a fantastic speed. (Antonio Ribera, Platillos Volantes en Iberoamerica y España, Santiago Pomaire, 1968, pp. 411–412)

September — Ray Palmer, editor of Amazing Stories magazine, receives a letter from a reader named Richard S. Shaver, who claims to have discovered “Mantong,” a proto-language that is the source of all earthly languages. In Mantong, each sound has a hidden meaning, and by applying this formula to any word in any language, one can decode the secret meaning. Palmer applies the formula to several words and realizes Shaver might be onto something. (Wikipedia, “Richard Sharpe Shaver”; Clark III 609; Walter Kafton-Minkel, Subterranean Worlds, Loompanics, 1989, p. 136)

September 6 — 9:50 a.m. During an aerial fight over Stuttgart, Germany, the crews of two aircraft of the 384th Bomb Group, commanded by Capt. Raymond P. Ketelson, observe two round objects “resembling silvery discs” floating downward through the aircraft formation. One hits the wing of a B-17 bomber, setting it on fire. The bomber does not return from the mission. (Strange Company 43)

Autumn — A Polish bomber unit based in England claims that silver-blue balls of fire appeared near their wing on six missions when they raided the Nazi V-1 weapons plant in Peenemünde, Germany. RAF intelligence officer Michael Bentine debriefs them later and asks, “But what did it do to you?” They reply, “Nothing.” Bentine points out, “Well it was not a very effective weapon, was it?” (UFOFiles2, p. 20; David Clarke and Andy Roberts, “The Foo Fighters: The RAF Experience,” The Real UFO Project, January 2003)

October — 9:00 p.m. Wilberta Finley, an air spotter for the Civil Air Patrol, notices a “huge dark aerial object approaching” her home in Santa Barbara, California, facing the Goleta Valley. Moving low and soundlessly, it
barely skims over a nearby hill. From its front a beam of light shoots down, and at intervals it swings from side to side as if scanning the hills and homes below. (“Report from the Readers,” Fate 11, no. 11 (November 1958): 116–118; Clark III 1178)

October 14 — Night. A group of B-17s from the 384th Bombardment Group are returning from a mission over Germany when they see a cluster of silver-colored discs in the path of their formation and closing with the bombers. The crews talk back and forth, discussing and confirming the sight before them. They describe the objects as “about one inch thick and three inches in diameter…gliding down slowly in a very uniform cluster.” One of the bombers goes directly through the cluster “with absolutely no effect on engines or plane surface,” even though one is heard to strike the tail assembly. A mass of black debris about 3-4 feet long is also observed. (Clark III 502; Martin Caidin, Black Thursday, Dell, 1962, pp. 188–190; Frank Edwards, Flying Saucers—Here and Now! Lyle Stuart, 1967, pp. 77–78)

October or November — 11:00 p.m. 2Lt Thomas J. Duzynski is stationed at Camp Ibis on the west side of the Dead Mountains Wilderness northwest of Needles, California. Taking a stroll outside his tent, he notices an elliptical-shaped object traveling to the south at high speed parallel to the ground between himself and the mountains. It banks sharply, almost on edge, and gains altitude, disappearing in seconds. (Lorenzen, UFOs: The Whole Story, Signet, 1969, pp. 22–23)

November — Ray Palmer publishes an article, “An Ancient Language?” on the language of Mantong in the January 1944 issue of Amazing Stories and enters into correspondence with Richard S. Shaver, who responds with a 10,000-word document titled “A Warning to Future Man.” Shaver writes of advanced prehistoric races who built underground cities before abandoning Earth for another planet because of damaging radiation from the Sun. Those ancients also abandoned some of their own offspring here, a minority of whom remained noble and human “Teros,” while most degenerate over time into a population of mentally impaired sadists known as “Deros”—short for “detrimental robots.” Shaver’s robots are not mechanical constructs, but robot-like due to their savage behavior. These Deros still live in the cave cities, according to Shaver, kidnapping surface-dwelling people by the thousands for meat or torture. Deros can be blamed for nearly all misfortunes, from minor “accidental” injuries or illnesses to airplane crashes and catastrophic natural disasters. Though generally confined to their caves, the Deros sometimes travel in spaceships or rockets, and have dealings with equally evil extraterrestrials. Shaver claims to possess first-hand knowledge of the Deros and their caves, insisting he had been their prisoner for several years. The article stirs considerable reader interest, and the pages of Amazing Stories are soon filled with stories and articles about the “Shaver mystery.” (Wikipedia, “Richard Sharpe Shaver”; [Richard] S. Shaver, [Letter], “An Ancient Language?” Amazing Stories 18, no. 1 (January 1944): 206–207; [Ray Palmer,] “Mantong: The Language of Lemuria,” Amazing Stories 19, no. 1 (March 1945): 71, 206; Walter Kaufton-Minkel, Subterranean Worlds, Loompanics, 1989, pp. 136–137; Clark III 872; Richard Toronto, War over Lemuria: Richard Shaver, Ray Palmer, and the Strangest Chapter of 1940s Science Fiction, McFarland, 2013)

November 4 — The X-10 Graphite Reactor at Oak Ridge, Tennessee, goes critical. The Y-12 plant is separating uranium-235 from natural uranium, which is 99.3% uranium-238, by using calutrons to perform electromagnetic isotope separation. (Wikipedia, “X-10 Graphite Reactor”)
information is available about what is causing the symptoms, because US military command want to keep the
presence of chemical munitions secret from the Germans. By the end of the month, 83 of the 628 hospitalized
military victims have died. The number of civilian casualties, thought to have been even greater, cannot be
accurately gauged since most have left the city to seek shelter with relatives. (Wikipedia, “Air raid on Bari”)

December 11 — US bombers conduct a daylight raid on Emden, Germany, and observe an unknown object about the size
of a Thunderbolt aircraft over the target area. It passes below the bombers in a straight line and at terrific speed,
leaving a vapor trail that persists. (Strange Company 51–52)

December 14 — Night. British 255 Night Fighter Squadron leader Patrick Hardy Vesey Wells is flying his Bristol
Beaufighter on a patrol mission around Naples, Italy, when he and his navigator notice a small bright light behind
them. It stays on their tail, moving from side to side. After 1–2 minutes it goes off in another direction. (Strange
Company 52)

Winter — Day. While on a bombing mission over central Germany, Sgt. Louis Kiss, a tail gunner on the Phyllis Marie, a
B-17 of the 390th Bombardment Group, sees an odd-looking sphere approach the plane from behind and below. It
seems to be the size of a basketball and shimmery gold. The object hovers just above one wing, then passes over
the top to the other wing where it hovers again. Soon it moves to the rear and gets caught in the B-17’s backwash
and disappears. (“First Official Foo-Fighter Records Discovered,” Just Cause, no. 32 (June 1992): 4–5)

Winter — 3:00 p.m. Harry G. Barnes, a member of the Washington, D.C., Metropolitan Police Department stationed at
No. 1 Precinct, sees three oval-shaped objects in V-formation speeding eastward across the northeast sky. The
objects have pulsating, greenish-red exhausts that occasionally flare and curl around them. (UFOEv, p. 64; Clark
III 1177)

1944

1944 — During a mission to bomb oil fields in Romania, a Russian Tupolev Tu-2 piloted by Maj. Bajenov and Boris
Surikov are flying over southwest Ukraine at an altitude of 3 miles when a large, elliptical object approaches
them. The bomber starts shaking, the oil pressure rises, and Surikov feels a strong electrostatic charge. Even after
the object passes, the bomber’s wings are covered with glowing discharges. (Good Need, pp. 21–22)

1944 — George Adamski and his followers move closer to Palomar Mountain, California, along the Road to the Stars
where his long-time associate Alice K. Wells sets up a roadside café, Palomar Gardens. According to coworker
Charlotte Blodget, “Each member of the group shared in the manual labor that went into this effort, and since
heavy restrictions were still in effect regarding materials [in the war’s aftermath], anything available had to
serve.” Adamski builds a “small observatory” to house his 15-inch telescope to study the skies. (“Palomar
Mountain, 1940–1960: From Obscurity to World Fame,” The Adamski Case, September 22, 2019; George M.

February — 2:30 a.m. An Australian Beaufort bomber is flying at 4,500 feet over Bass Strait, Australia, when it is joined
by an object like a “dark shadow” with a flickering flame coming out of its rear. It appears only 100–150 feet
away and stays with the bomber for 18–20 minutes, during which time its radio and direction-finding instruments
fail. It shoots away at 700 mph. (Bill Chalker, “Australian A.F. UFO Report Files,” APRO Bulletin 30, no. 10
(October 1982): 7)

February 9 — RAF No. 5 Group issues a report of its investigation on “Rocket Phenomena,” concluding that the air crews
are seeing either rockets fired from aircraft, parachute rockets, or high-explosive projectiles at maximum altitudes
of 18,000 feet. Reports of objects changing their course are either defects causing erratic flight or light flak tracers
reaching their highest point and descending. (Strange Company 57–58)

February 20 — 2:30 a.m. Two guards of the 3rd Marine Division on Guadalcanal in the Solomon Islands see what they
first assume are the headlight beams of a truck coming from a swamp about three-quarters of a mile from their
position. It moves laterally about 50 feet and they see it is a circular light about 50–60 feet long and 20 feet high.
It then rises into the air about 25 feet and heads in the direction of the guards at about 45 mph. It makes a 45° turn
and passes about 100 feet above the trees of a coconut grove. Several days later, a 200-foot cut in the reeds is
discovered in the approximate spot where the light originated. (Alvin G. McNish, “Letter,” CUFOS Associate
Newsletter 5, no. 5 (Oct./Nov. 1984): 2)

February 23 — Brig. Gen. George C. McDonald is appointed assistant chief of staff for intelligence for the newly created
US Strategic Air Forces in Europe. “Many months preceding the collapse of Germany, McDonald recognized the
imperative need for the creation of a new type of intelligence activity to investigate and exploit air intelligence objectives in Germany and liberated countries. This unique system was established and consisted of a great number of highly qualified technical and scientific personnel to exploit all the worldwide aeronautical research developments of Germany. This resulted in the collection of priority intelligence information of value in the prosecution of the war against Japan; technical and non-technical information of immediate operational significance and value; as well as a substantial portion of important documents and personnel of the German Air Ministry that enabled the US Army Air Forces to undertake long-range research with respect to many valuable- phases of air doctrine, research, employment, organization, procedure, and plans of the German air force.” Among the personalities involved in the operation are some who will become involved in UFO investigations in the future: Col. John A. O’Mara, Col. Howard H. McCoy, Col. Harold E. Watson, and Col. Malcolm D. Seashore. (Wikipedia, “United States Strategic Air Forces in Europe”)

February 24 — Night. Southwest of Saint-Quentin, Aisne, France, three silver objects are seen by an RAF bomber returning from a mission over Schweinfurt, Germany. They resemble Zeppelins but move independently of the wind. (Strange Company 60)

March — An Army Air Force pilot flying a B-17 sees a fast-moving, glowing green object light up the cockpit and speed out of sight over the horizon at Carlsbad, New Mexico. (UFOEv, p. 19)

March 1 — The first prototype H.IX V1, an unpowered glider with fixed tricycle landing gear, is tested in Germany, but there is an accident when the pilot attempts to land without first retracting an instrument-carrying pole extending from the aircraft. The design is taken from the Horten brothers and given to Gothaer Waggonfabrik. (Wikipedia, “Horten Ho 229”)

Spring (or 1945) — Two grammar school teachers are driving in the mountains near Auberry, California, when their car stalls and they see a cigar-shaped object with lighted portholes along the side hovering in a nearby ravine. They watch it for several minutes until it begins moving slowly out of the ravine, ascends, and shoots away to the west at a tremendous speed. The car engine remains stalled for a while, then starts by itself. (“Past Sightings Come to Light,” APRO Bulletin, Jan./Feb. 1968, p. 5)

April — Late afternoon. Near the Eastern front in western Slovakia, a man is standing on a hill near his home when he sees a dark round object moving at high speed to his right for less than one minute. It moves at a steady speed and is followed by another object about 20 seconds later. As many as 6 others appear, and five are visible at one time, each beginning as a pinpoint of light, growing bigger, then decreasing back to a pinpoint. The display lasts for about 5 minutes. (“Correspondence,” CUFOS Associate Newsletter 3, no. 5 (Oct./Nov. 1982): 2)

April 5 — The Y-12 plant at Oak Ridge has sent 200 grams of enriched uranium to Los Alamos. Italian-American physicist Emilio Segré receives the first sample and within 10 days discovers that the spontaneous fission rate is too high for use in a gun-type fission weapon (because of pu-240 isotope present as an impurity in the pu-239). (Atomic Heritage Foundation, “Atomic Timeline”)

April 26 — Night. RAF pilot Arthur Horton of the 622 Squadron is returning from a bombing mission to Essen, Germany, when he is followed by four orange balls of light with “short stubby wings” and emitting sparks, two on each side of the aircraft. He takes evasive action with his Lancaster, but the objects follow all his maneuvers for 10 minutes. When they reach the coast of Holland, they seem to “burn themselves out.” (Strange Company 64–65; UFOFiles2, pp. 16, 18)

May 29 — The Aircraft Warning Service is deactivated. (Wikipedia, “Aircraft Warning Service”)

June — 12:30 p.m. David A. K. Morris, a fitter with Service Unit 10 of the Royal New Zealand Air Force, takes a swim with a friend at Torokina Beach, Bougainville Island, Papua New Guinea. They see “a huge, dark-gray, seemingly metallic, bulbous mass hanging out of a large cumulus cloud.” It moves silently, its outline fading into the cloud and out of sight. It resembles a Zeppelin or the R101 airship, only bigger. (D. Morris, “RNZAF Camp UFO Sighting of 1944,” Ufocus NZ, July 22, 2020)

June — Edward W. Ludwig is commanding a small, Coast Guard–manned cargo vessel near Palmyra Atoll. While looking for a lost Navy patrol plane, he observes a bright aerial sphere that alternately moves and stops for 30 minutes. (“True Mystic Experiences,” Fate 3, no. 8 (December 1950): 82–87)

June 10? — The Liberty ship SS George E. Badger is off Omaha Beach in Normandy, France, when gunner Edward Breckel sees a “dark ellipsoidal object” on the horizon about 5 miles away. “Blunted on each end like a sausage,” the silent craft remains in view for 3 minutes, moving slowly at about 15 feet above the surface of the water. (Strange Company 67; “The Case for the ‘Sea-Saucer,’” CRIFO Orbit 1, no. 10 (January 7, 1955): 5)
Early July — 10:30 a.m. During Allied operations in the area around Loreto, Castelfidardo, and Osimo, in Ancona province, Italy, Antoni Szachnowsky, of the 2nd Polish Artillery Regiment, notices an egg-shaped, glistening, metallic, motionless object. The Polish Army anti-aircraft gun fires on it, then the German batteries join in. Eventually both sides stop, and the object remains motionless for a minute. Then it tilts at a 45° angle, moves rapidly upward, and disappears. ("1944: An Italian Foo-Fighter?" UFO Sightings Italia, no. 2, March 2002)

July 4 — Oppenheimer reveals Segeř’s final measurements to the Los Alamos staff, and the development of the gun-type plutonium weapon “Thin Man” is abandoned. Designing a workable implosion design (Fat Man) becomes the top priority of the laboratory, and design of the uranium gun-type weapon (Little Boy) continues. (Atomic Heritage Foundation, “Atomic Timeline”)

July 6 — German test pilot Heini Dittmar attains an unofficial airspeed record of 702 mph in a rocket-powered Messerschmidt Me 163B at Lagerlechfeld, Bavaria, Germany. (Wikipedia, “Heini Dittmar”)

July 9 — Afternoon. After a successful air strike by the US 449th Bombardment Group against the Concordia-Vega refinery at Ploiesti, Romania, witness Grigore Zmeuraru sees a round, yellowish object flying from the north at a speed about 3–4 times that of an aircraft. It leaves a short vapor trail, moves over the bombed area, and returns silently in the same direction. (Hobana and Weverbergh 226–227; Strange Company 71)

July 17 — The Air Service Command and the AAF Materiel Command are placed under AAF Materiel and Services. (Wikipedia, “Air Materiel Command”)

Late July — Evening. Jaakku Kivistö is serving in the Finnish Army as a noncommissioned medical officer stationed on a farm near Impilahti, Karelia [now Russia], by Lake Ladoga. He notices a large object next to the corn-drying building on a steep hillside that he at first takes for a military truck. As he walks closer, he sees it is reddish in color, moving slowly about 150–230 feet in the air, 100 feet long, and has a row of black windows. It moves off quickly in the direction of the lake and vanishes. (“A Close Encounter from the Year 1944,” Nordic UFO Newsletter, 1985, no. 1, pp. 3–5)

Summer — 5:00 p.m. François Panes watches a cigar-shaped object at an altitude of about 5,000 feet above the Kamensko Forest north of Blovice, Czechoslovakia [now Czech Republic], glittering brightly with no wings, no rudder, and no propeller. It is about 150 feet in diameter and 300–400 feet long. The object is lit up from underneath. It slowly descends, after which it rises up again and vanishes into the blue sky after 10–15 minutes. (Hobana and Weverbergh 215–216)

Summer — Fred Wieland and some friends are riding their bicycles on a footpath adjacent to the Grand Central Parkway in Queens, New York City. As they climb a hill, they look up and see a cigar-shaped object “broadside” to them. It is of smooth metallic construction with no windows or openings. They race to the top of the hill for a better look, but by then the object has completely disappeared. (Clark III 1178)

Summer — Mid-day. Francene Andron is at Camp McCain, southeast of Grenada, Mississippi, when she sees a large, fat, cigar-shaped object that changes from dull black to gray to “fog blue.” It is joined by three smaller discs that appear below it after emerging from a cloud. The large object disappears first, followed by the discs, which race away in different directions. (NICAP case file)

Summer — Day. Asa Howard Jr. is outside the barracks at RAF Molesworth in Cambridgeshire, England, when he and other airmen see a pencil-shaped, metallic object moving faster than a jet about a mile away. While watching it for about 2 minutes, they see it pass behind a small cloud before it disappears. (NICAP case file)

August — Night. Officer George Todt of the 38th Regiment, Second Infantry Division, is between Saint-Lô and Vire, Normandy, France, when he sees a cherry-red light one-fifth the size of the moon moving silently west at 120 mph towards Omaha Beach. It stops over the American lines and hovers for 14 minutes. It expands and contracts regularly every few seconds. Col. Francis Henry Boos and another officer also observe it. (Strange Company 78–79)

August 11 — Shortly after midnight. Capt. Alvah M. Reida is piloting a B-29 bomber based at Kharagpur, India, on a bombing mission over Palembang, Sumatra, Indonesia, when his right gunner and copilot notice a sphere “probably five or six feet in diameter, of a very bright and intense red or orange in color” that constantly throbs, at about 12,500 feet, pacing them about 1,500 feet off the starboard wing. It keeps up with the B-29, then flying at 210 mph. Reida tries to shake it off his plane, but it stays in the same relative position until, after 8 minutes, it makes an abrupt 90° turn and accelerates rapidly, disappearing in the overcast. (UFOEv, p. 23; Strange Company 71–75; Good Above, p. 19)

August 11 — Night. RAF Warrant Officer Ronald R. Claridge is over France aboard a No. 7 Squadron Lancaster bomber returning from a bombing run on La Pallice, La Rochelle, Charente-Maritime, France, when his radar screen goes blank. Another crewman shouts to look at a vast disc-shaped object with a long row of lights on their starboard
side. They watch it for 3 minutes, then it shoots away in a flash of light. Later he draws a watercolor painting to show how the UFO dwarfed the bomber. (UFOFiles2, pp. 26–27)

Mid-August — 11:00 a.m. During the Warsaw Uprising in Poland, Zenon Sergisz notices a German bomber passing by, as well as three bright points of light that descend as the bomber moves away. The lights are flattened spheres that move low behind some buildings then rise up at an angle and disappear. (Poland 14–15)

August 17 — The Allied command creates the Combined Intelligence Objectives Subcommittee (CIOS), charged in part with investigating the strange balls of fire. (Strange Company 79)

Late August — Sgt. Ness and another man of the mine-laying platoon of the 175th Infantry Regiment, 29th Infantry Division, see a large rectangular object “like a railroad boxcar” with no apparent source of propulsion move steadily at about 90 mph over the front lines near Brest, Brittany, France, and out to sea. At one point the object passes in front of the moon, briefly obscuring it from view. (Lore and Deneault, pp. 120–121)

Late August — 4:20 p.m. A nurse, Mrs. E. M. Church, on her way to a tram station in Christchurch, New Zealand, sees an object like an “upturned saucer” resting on the ground near the road. It seems to be 20 feet across and 9 feet high. Two beings, not quite 4 feet tall, are inside, visible through a rectangular window. A third stands motionless, just outside an open door. All three seem to be looking toward the lights of a nearby fairground. The nurse cannot decide if their skin color is green or they are dressed in green, but all are encased in a transparent oblong box. The head takes up half of their bodies and there are no apparent legs or arms. She inadvertently makes a noise, and the outside figure notices her. Its helmet flips over automatically, and it drifts inside the object, which rises up and disappears in the clouds. (Center for UFO Studies, HUMCAT Index 1940–1949, p. 12; Clark III 265)

August 31 — The Army Air Forces Air Technical Service Command is formed as the result of the merging of the Materiel and Air Service Commands. (Wikipedia, “Air Materiel Command”)

September — Dusk. Three Oak Ridge workers (a man named Nelson, A. C. Butler, and Albert Profitt) are driving 2 miles southeast of Oliver Springs, Tennessee, when a strange object appears about 50 feet ahead of them at the level of their windshield. It is glossy white in color and about 30 feet long and 4 feet wide. Nelson eases the car up to the object, but it withdraws; when he stops, it also stops. Soon the light rises high in the air and disappears over Black Oak Ridge. (Lorenzen, UFOs: The Whole Story, Signet, 1969, pp. 23–24)

September — 9:00 p.m. Canadian Army Lance Cpl. Carson Yorke is just outside Antwerp, Belgium, during a German bombardment. He steps out of his vehicle and sees a glowing globe traveling at about 30 mph and 40 feet altitude from the front lines toward the city (in the same course that the German V-2s are following). It seems to be 3–4 feet in diameter and looks “as though it was cloudy glass with a light inside.” It disappears from view, then is followed by another, then five others in succession. (Jerome Clark and Lucius Farish, “The Mysterious ‘Foo Fighters’ of WW II,” Saga UFO Report, Spring 1975)

September 2 — Two chemists are killed, and Arnold Kramish almost killed, after being sprayed with highly corrosive hydrofluoric acid while attempting to unclog a uranium enrichment device that is part of the pilot thermal diffusion plant at the Philadelphia Navy Yard. (Wikipedia, “Arnold Kramish”)

September 6 — The Combined Intelligence Objectives Subcommittee holds its first meeting in London, England. Present are Air Commodore K. C. Buss (Air Ministry), Gen. George C. McDonald (AAF Director of Intelligence), Lt. Col. Lewis F. Powell Jr., Col. Howard McCoy (chief of the Air Technical Section), Howard P. Robertson (CalTech physicist), and Cmdr. Ian Fleming (Admiralty). (Strange Company 80)

October — Late night. Members of a family who live in an isolated area on the outskirts of Rochester, Pennsylvania, are awakened by a loud noise and flash of light. The father goes to the door, where he sees a 4.5-foot-tall figure dressed in a brown robe. Fifteen feet to its left are five other figures dressed in luminous brown metallic suits. Their heads seem large, with only a slit for a mouth. The arms are long, with long thin fingers. Three of them enter the house and the father accompanies them to a landed craft nearby. He remembers nothing else when he wakes up in the morning. A round, burned circle 20 feet from the house and 25 feet in diameter is found the next day. (Clark III 265–266)

October — Nellie Carlin and another woman are about to drive to work in St. Paul, Minnesota, when they see what seems to be an airplane about to crash. It abruptly stops 20 feet above their heads, revealing itself to be a brown, bullet-shaped object with a flat end “like frosted glass with a bright light behind it.” It makes a crackling noise, turns right, and ascends at great speed. (Clark III 1178)

Late October — 9:30 p.m. 1Lt. J. B. Douglas Jr. and other soldiers of the 489th Armored Field Artillery near Weert, Netherlands, watch a bright silvery object through field glasses moving silently from northwest to southwest through an arc of 90° in about 30–45 minutes. (UFOEv, pp. 30, 129)
October 28 — Physicist David T. Griggs, a civilian adviser on radar to the War Department, is asked by Gen. Henry H. "Hap" Arnold to look into incidents of unusual aerial phenomena in Europe and interview pilots. He later moves his investigation to the Pacific Theater. His report to Arnold at the end of the war has never been located. He was interviewed by James E. McDonald on April 10, 1969. (Michael D. Swords, “David Griggs and the Foo Fighters,” IUR 31, no. 1 (January 2007): 17–19)

October 30 — Late night. RAF Flight Engineer Maurice Juberley of the 640 Squadron is returning from a bombing mission over Köln, Germany. His Halifax III is flying at 19,000 feet above the clouds when the rear gunner reports a ball of orange fire closing in on them. He orders an evasive maneuver and loses the light. (Strange Company 86)

Early November — Night. Lieut. Col. Oris B. Johnson’s 422d Night Fighter Squadron, equipped with P-61 Black Widow fighters, reports seeing 15–20 mystery objects every night over Germany, either alone or in formations of four. Johnson says he could accept that the reports are rocket planes or night fighter jets. (Strange Company 87)

November 3 — The Japanese Army launches the first of some 9,300 Fu-Go bomb-bearing fire balloons intended to land in North America to instill fear and terror. About 300 are found or seen in America. It is likely that more of them land in unpopulated areas. On November 4, a US Navy patrol craft discovers one of the first Fu-Go balloons floating off San Pedro, Los Angeles, California. National and state agencies are placed on heightened alert status when balloons are found in Wyoming and Montana before the end of the month. (Wikipedia, “Fu-Go balloon bomb”; Franklin Matthias, “Japanese Balloon Bombs Fu-Go,” Atomic Heritage Foundation, August 10, 2016)

November 4 — Night. RAF Lancaster bombers over Solingen, Germany, report what they call “scarecrow” dummy airplanes that explode with a sheet of flame and dense black smoke. (“German Dummy Planes Explode Amid Our Own,” New York Times, November 6, 1944, p. 3)

November 16 — 11:55 p.m. Lt. J. L. Besmond, officer of the day on the USS Gilliam, enroute from Oro Bay, Papua New Guinea, to Leyte Gulf, Philippines, observes an unusual object at a distance of 21 miles. Fire Control Officer P. Kendall Bruce describes it as a bright green globe that rises from behind the ship and moves in a “perfect parabola at great speed, finally disappearing behind the horizon to the north.” (NICAP, “UFO Observed from USS Gilliam”)

November 24 — Capt. William D. Leet’s B-17 crew (part of the 2nd Bombardment Group, 5th Wing of the Fifteenth Air Force) is returning from bombing a target at Klagenfurt, Austria. While flying over northeastern Italy near Trieste, Leet notices a blinding light and feels an intense heat. It goes away quickly, but seconds later he sees a “round amber light” sitting off the left wingtip of the B-17. It is bright and perfectly circular. Leet orders the gunners not to shoot at it. Sgt. Harris, the upper gunner, thinks it is 10 feet in diameter and 150–300 feet away. The object stays with them over the Adriatic Sea for 50 minutes, until it “just turned off” like a light bulb. (Strange Company 90–93)

November 29 — 3:00 p.m. Reginald Herbert Mortimer and his daughter Frances are on the Bruce Peninsula between Lake Huron and Georgian Bay, Ontario, when they hear a hissing sound behind them and see 9 disc-shaped objects pass overhead at approximately 2,000 feet. Moving three abreast in a square configuration, they are lost to sight over the lake. (Clark III 1179)

November 29 — Night. A Bristol Beaufighter crew (pilot Lieut. Edward A. Schlueter and radar observer Lieut. Donald J. Meiers of the 415th Night Fighter Squadron, and intelligence officer Capt. Fred B. Ringwald as observer) is on a bombing mission and flying above the Rhine River north of Strasbourg, Bas-Rhin, France. They see “eight to 10 bright orange lights off the left wing…flying through the air at high speed.” Neither the airborne radar nor ground control registers anything nearby. Schlueter and Meiers also see red lights on November 26 above Mannheim, Germany. (Zoe Crasney, “What Were the Mysterious ‘Foo Fighters’ Sighted by WWII Night Flyers?” Smithsonian Air and Space Magazine, August 2016; Strange Company 93–95)

November 30? — As the USS Gilliam is transporting troops from Leyte Gulf to Lingayen Gulf, Luzon, Philippines, Lieut. JG Kendall Bruce, fire control officer on the ship, observes a bright green, globe-shaped object rising out of the nearby headlands and disappears to the north. It is too slow for a missile. [Same event as November 16?] (NICAP, “UFO Observed from USS Gilliam”; Strange Company 95–96)

December 13 — SHAEF in Paris, France, issues a press release identifying the fireballs as a “new German weapon” and that the Ninth Air Force has reported seeing “many silver balls floating in the air above enemy territory.” An
Army Air Force spokesman says on December 20 that the silver balls have “no detectable effects” on Allied planes. He does not know whether or not they are metallic. *(Strange Company* 96, 101)

December 23 — Night. Navy Lt. George Arents III and copilot Lt. Elon Forster are flying a military DC-3 at 9,000 feet between Blackstone and Richmond, Virginia, when they notice a cigar-shaped object hovering below them at about 4,000 feet. It appears to be 200 feet long and has two horizontal rows of blue-lighted windows and a flaming exhaust coming out of its tail. (Jan Aldrich)

Late December through February 1945 — Radar operators at Naval Air Station Pasco, Washington, report unusual blips that appear out of nowhere and proceed from northwest to southeast. A Grumman F6F Hellcat fighter is scrambled on at least two occasions with orders to shoot down anything that appears to be hostile, but nothing is seen. In another incident, Lt. JG Clarence R. Clem accompanies Lt. Commander Richard Brown and Ensign C. T. Neal to a waiting aircraft and Brown takes off in pursuit of a ball of fire that quickly leaves him behind as it speeds off to the northwest and is lost to radar. On another occasion, naval officer R. W. Hendershot, flying an SNJ aircraft, is asked by ground radar to make contact with two high-altitude blips flying at the speed of a single-engine Piper Cub. Though he can see nothing, he is convinced the blips are real. (*Strange Company* 142; Nukes 43–44; Project 1947; “UFOs over Hanford: Cdr. R. W. Hendershot,” June 22, 2014; Robert L. Hastings, “Reports Confirm UFO Activity at the Hanford Nuclear Weapons Plant during World War II,” UFOs & Nukes, August 9, 2015; Headquarters Fourth Air Force, “Air Defense Measures at Hanford Engineering Company,” January 23, 1945; Robert L. Hastings, “Former US Navy Pilot Says Huge Fireball Maneuvered above the Hanford Atomic Plant during World War II,” UFOs & Nukes, October 5, 2015)

1945

January 2 — 2:30 a.m. USAAF Lieut. Jack Green and navigator Lieut. Warren Barber, 653rd Bombardment Squadron, are conducting a reconnaissance flight in a Mosquito over the Netherlands and northern Germany when they encounter two balls of fire on three occasions pacing their plane. Barber describes them as a “pair of fog lights, shooting up to 60 or 70,000 feet.” (*Strange Company* 114–116, 208–209)

January 2 — The *New York Times* publishes an article stating that the foo fighters are German weapons. Lieut. Donald J. Meiers of the 415th Night Fighter Squadron says he has been followed by.foo-fighters twice. “A foo-fighter picked me up at 700 feet and chased me 20 miles down the Rhine Valley [Germany]. I turned to starboard and two balls of fire turned with me. I turned to the port side and they turned with me. We were going 260 miles an hour and the balls were keeping right up with us.” (“Balls of Fire Stalk U.S. Fighters in Night Assaults over Germany,” *New York Times*, January 2, 1945, pp. 1, 4; *Strange Company* 117–118)

January 2 — Col. Clayton Lawrence Bissell, in the Pentagon’s Office of the Assistant Chief of Staff for Intelligence, sends SHAEF in Paris a classified message seeking an explanation for the red balls of fire pacing planes. No response has been located to date. ([Clayton Lawrence] Bissell, [message], January 2, 1945; Project 1947, “UFO Reports, 1945”)

February 2 — The first Hanford plutonium arrives at Los Alamos. (Atomic Heritage Foundation, “Atomic Timeline”)

February 2 — The first flight of the H.IX V2 is made in Oranienburg, Germany. All subsequent test flights and development are done by Gothaer Waggonfabrik in Gotha. By this time, the Horten brothers are working on a turbojet-powered design for the Amerika Bomber contract competition and do not attend the first test flight. The test pilot is Leutnant Erwin Ziller. Two further test flights are made in February. There are reports that during one of these test flights, the H.IX V2 undertook a simulated dogfight with a Messerschmitt Me 262, the first operational jet fighter, and that the H.IX V2 outperformed the Me 262. However, the Me 262 is considered by many as unsuitable for fighter missions, being slow in turning. (Wikipedia, “Horton Ho 229”)

February 7 — Afternoon. Several F6F fighters on patrol (one piloted by Ensign Norman P. Stark) from the USS Wasp aircraft carrier anchored at Ulithi Atoll in the Caroline Islands are told to investigate a radar target at 30,000 feet some 10 miles west of the fleet. Before they can reach altitude, the object moves back to the west at high speed. They catch a brief visual glimpse of it. (LCDR Norman P. Stark, “A WWII F6F Navy Fighter Pilot’s Experiences in the Pacific,” Battle of Saipan, January 1, 2000)

February 10 — The Chicago Tribune and Washington Times-Herald reveal Bill Donovan’s plans for a postwar intelligence agency and publishes a secret memo he has sent to Roosevelt proposing its creation. The article compares the proposed agency to the Gestapo. Knowing that Americans want a smaller federal government after the war, Roosevelt is not entirely sold on Donovan’s proposal, although Donovan feels reasonably confident that he can talk the president into the idea. J. Edgar Hoover disapproves of Donovan’s plan, which he sees as a direct threat to FBI authority, even though Donovan has stressed that his agency will operate only abroad, not domestically. (Walter Trohan, “Super-Spy Idea Denounced As New Deal OGPU,” Chicago Tribune, February 10, 1945, p. 1; Central Intelligence Agency, “Origins of CIA,” August 3, 2005; Mark Riebling, Wedge: From Pearl Harbor to 9/11, Simon & Schuster, 2002, pp. 59–61)

February 11 — Air Commodore Colin McKay Grierson, RAF assistant chief of staff A2, refers Ringwald’s report to the Air Ministry. (Strange Company 133–134)

Mid-February — As their C-47 prepares to land at Biggs Field, Fort Bliss, El Paso, Texas, S/Sgt Ralph Bayer is alarmed to see an aircraft approaching from the left and only 900 feet below them. The object is about 30 feet long and a dull, flat gray in color, and it travels in a straight course 500 feet above the ground until it disappears. (Clark III 1178)

February 18 — Disaster strikes during the third test flight of the H.IX V2 in Gotha, Germany. Erwin Ziller takes off without any problems to perform a series of flight tests. After about 45 minutes, at an altitude of around 800 meters, one of the Jumo 004 turbojet engines develops a problem, catches fire and stops. Ziller is seen putting the aircraft into a dive and pulling up several times in an attempt to restart the engine and save the precious prototype. He undertakes a series of four complete turns at a 20° angle. Ziller does not use his radio or eject from the aircraft. He already is unconscious as a result of the fumes from the burning engine. The aircraft crashes just outside the boundary of the airfield. Ziller is thrown from the aircraft on impact and dies from his injuries two weeks later. The prototype aircraft is completely destroyed. (Wikipedia, “Horton Ho 229”)
February 22 — Night. A B-24 bomber flying near Chichijima in the Ogasawara (Bonin) Archipelago, Japan, sees an object trailing exhaust. It is also picked up on radar and follows the plane for about 20 miles before disappearing off the screen. (Project 1947, “UFO Reports, 1945”)

March — A man is squirrel hunting in a wooded area near Belfast, Maine, when he sees a huge, elongated object just above the trees. He runs after it, thinking it is a dirigible about to crash. The object crashes into the trees at the far edge of a clearing, splitting a huge pine tree down the middle. He smells burned rubber. The object seems to be as big as several B-36 bombers. As he stands there stunned, the lowest end of the craft begins to rise and he hears a humming sound of increasing intensity. After it rises to a horizontal position, it begins to spin faster and faster and the hum becomes very intense. Suddenly one end spews a shower of fine, silvery threads that glint in the sunlight. The object begins to change to a white metallic color and it takes off straight up at fantastic speed. (“I Saw a Flying Saucer,” Flying Saucers, May 1959, pp. 6–18, 78; Clark III 1178–1179)

March 10 — A Japanese Fu-Go balloon strikes a high-tension wire on the Bonneville Power Administration in Washington State. The balloon causes sparks and a fireball that results in the power being cut. Coincidentally, the largest consumer of energy on this power grid is the Hanford site of the Manhattan Project, which suddenly loses power. The officer in charge at Hanford, Col. Franklin Matthias, says “it shut down the plant cold, and it took us about three days to get it back up to full power again.” (Franklin Matthias, “Japanese Balloon Bombs Fu-Go,” Atomic Heritage Foundation, August 10, 2016)

March 12 — Nearly a week after the US Army launches Operation Lumberjack to cross the Rhine River, the Ho 229 is included in the Jäger-Notprogramm (Emergency Fighter Program) for accelerated production of inexpensive “wonder weapons.” The prototype workshop is moved to the Gothaer Waggonfabrik (Gotha) in Friedrichroda, Germany. In the same month, work commences on the third prototype, the Ho 229 V3. (Wikipedia, “Horton Ho 229”)

March 18 — Grierson writes to Samuel V. Bovkin that the Air Ministry thinks the fireballs are either Me-262’s or flak rockets. (Strange Company 147)

March 18 — Night. A 416th NFS crew is flying a Mosquito 25 miles northwest of Florence, Italy. Suddenly a light is flying alongside them at 13,000 feet. It doesn’t appear on the radar screen. The pilot turns the plane toward the light, keeping on its tail, pursuing at 260 mph and climbing to 16,000 feet. Suddenly the light disappears. (Strange Company 148)

Late March — At least two residents of Dresden, Germany, see a round, flat, silver-colored object without propellers or wings hovering silently in the air. It suddenly disappears like a “burst soap bubble.” (“Weltrundschau,” Weltraumbote, no. 32/22 (July/Aug. 1958): 14–15; Clark III 503)

March 22 — 1:00 p.m. The USS New York is off New Guinea preparing to rejoin the Seventh Fleet. Gunner Cpl. Donald Pratt is preparing for a Japanese attack when he sees a shiny silver object hovering directly over the battleship. It remains stationary over the ship for 30 minutes and is tracked on ship radar. Two antiaircraft guns fire on the object, but it does not move or seem affected. Capt. Kemp C. Christian Sr. orders the guns to stop. Immediately the object shoots up and away at a fantastic rate of speed. (Strange Company 151–152)

March 25 — Around 10:30 p.m. Company A of the US 44th Armored Infantry Battalion is bivouacked on a hill along the Autobahn between Mannheim and Darmstadt, Germany, when 6–7 circular, glowing, yellow-orange objects approach at 150 feet, roughly following the road. They are not in strict formation and seem individually controlled. John G. Norris recalled that after 5–6 minutes they are hidden by the trees. (Strange Company 153–154)

March 26 — During an air operation, Lieut. Calvin P. Lamb (pilot), Lieut. James G. Holmes (radar observer), and Sgt. John W. McI Isaac (gunner) notice lights on an airborne object. The lights follow them through a few turns but move away as the crew orbits north of Iwo Jima, Japan. They give chase, obtaining a slight target on the aircraft radar, then the object pulls out of sight. A similar lighted object is again seen March 28 by Lieut. William F. Sill (pilot), Flight Officer George W. Hayden (radar observer), and PFC William Brasvell (gunner). (Project 1947, “UFO Reports, 1945”)

“UFO Reports, 1945” ——
April — During operations around Okinawa, Japan, the radar crew on the aircraft carrier *USS Independence* frequently notices strange radar returns that move at slow speeds (30–70 mph). Aircraft and destroyers sent to search for them never find anything. These radar ghosts are usually detected 25–30 miles away at an altitude of 1,500 feet, but occasionally 3,500 feet. The primary diagnostic for these false returns is their speed. The Navy nicknames them the “ghost of Nansei-shoto” after the Japanese name for the Ryukyu Islands, of which Okinawa is one. (*Strange Company* 183–186)

April — Ray Palmer publishes a second story by Richard Shaver, “Thought Records of Lemuria,” in the June issue of *Amazing Stories*. Here it is revealed that Shaver’s knowledge of the cave world and Lemuria isn’t really a “racial memory,” as the first story had asserted. Shaver, working in a factory, heard voices speaking to him, apparently through his welding gun. (Richard S. Shaver, “Thought Records of Lemuria,” *Amazing Stories* 19, no 2 (June 1945): 16–52)

April 3–4 — US B-29 bombers over Honshu, Japan, encounter numerous balls of light tagging along with them. (*Strange Company* 157–159)

April 7 — Walter and Reimar Horten, German designers associated with wingless aircraft, are arrested by US troops near Göttingen, Germany. (Lance Cole, *Secret Wings of World War II: Nazi Technology and the Allied Arms Race*, Pen & Sword, 2015)

April 10 — 11:00 p.m. James L. Hendry sees from his porch in Jeffersontown, Kentucky, a bright light that seems to be directly above Fisherville, 3 miles to the east. Its brightness fluctuates and it seems to be moving directly toward his location, casting a light beam downward. After 10 minutes, it goes out “like a snuffed candle.” (“A Meteor?” *Louisville Times*, April 14, 1945; Project 1947, “UFO Reports, 1945”)  

April 10 — As part of the Manhattan Project, 18 people in the US are injected with plutonium in doses ranging from 95 to 5,900 nanocuries without their knowledge or consent. The intent is to study how plutonium is absorbed into the digestive tract. The last experiment is conducted on July 18, 1947. (Wikipedia, “Unethical human experimentation in the United States”)

April 12 — Roosevelt dies at Warm Springs, Georgia. Harry S. Truman is sworn in as president.

April 22 — The *USS Lewis Hancock* is northeast of Okinawa, Japan, when the SG radar picks up an unidentified target at 6 miles heading their way at 70–115 mph. Its movements are erratic. Two miles out, the ship identifies a “tight formation of more than fifty birds.” (*Strange Company* 184)

April 24 — The *USS Audubon* is headed for Okinawa, Japan, with US Army passengers and equipment. Radar operators pick up “unidentified aeroplanes” heading their way. The screens show a blip, alternately fuzzy and strong, some 8 miles away headed down the starboard side at 25 mph. Still, nothing can be seen visually, and the radar operator suggests that it is a flock of birds. (*Strange Company* 184–186)

April 25 — 9:45 a.m. Acting Squadron Leader Kit Francis Williams of the RAF 617 Bomber Squadron is flying a Lancaster with 25 other aircraft to bomb Hitler’s headquarters at Berchtesgaden, Germany, in the Bavarian Alps. Just after a turn near Kaiserslautern, Germany, at 16,500 feet, Williams witnesses an object 9:45 a.m. Acting Squadron Leader Kit Francis Williams of the RAF 617 Bomber Squadron is flying a Lancaster with 25 other aircraft to bomb Hitler’s headquarters at Berchtesgaden, Germany, in the Bavarian Alps. Just after a turn near Kaiserslautern, Germany, at 16,500 feet, Williams witnesses an object flying 3,500 feet away headed down the starboard side at 25 mph. Its brightness fluctuates and it seems to be moving directly toward his location, casting a light beam downward. After 10 minutes, it goes out “like a snuffed candle.” (“A Meteor?” *Louisville Times*, April 14, 1945; Project 1947, “UFO Reports, 1945”)  

April 25 — 9:45 a.m. Acting Squadron Leader Kit Francis Williams of the RAF 617 Bomber Squadron is flying a Lancaster with 25 other aircraft to bomb Hitler’s headquarters at Berchtesgaden, Germany, in the Bavarian Alps. Just after a turn near Kaiserslautern, Germany, at 16,500 feet, Williams witnesses an object flying 3,500 feet away headed down the starboard side at 25 mph. Its brightness fluctuates and it seems to be moving directly toward his location, casting a light beam downward. After 10 minutes, it goes out “like a snuffed candle.” (“A Meteor?” *Louisville Times*, April 14, 1945; Project 1947, “UFO Reports, 1945”)  

April 25 — 9:45 a.m. Acting Squadron Leader Kit Francis Williams of the RAF 617 Bomber Squadron is flying a Lancaster with 25 other aircraft to bomb Hitler’s headquarters at Berchtesgaden, Germany, in the Bavarian Alps. Just after a turn near Kaiserslautern, Germany, at 16,500 feet, Williams witnesses an object flying 3,500 feet away headed down the starboard side at 25 mph. Its brightness fluctuates and it seems to be moving directly toward his location, casting a light beam downward. After 10 minutes, it goes out “like a snuffed candle.” (“A Meteor?” *Louisville Times*, April 14, 1945; Project 1947, “UFO Reports, 1945”)  

April 26 — Gen. Curtis LeMay’s XXI Bomber Command’s Air Intelligence staff produces a 5-page report representing the most up-to-date information and theories on the balls of fire but cannot find a good explanation for them. (*Strange Company* 162–163)

May — German scientist Viktor Schauberger, who has been using inmates from the Mauthausen concentration camp to help him develop new aircraft and submarine engines, is captured by Allied forces in Leonstein, Austria. Supposedly his devices and documents, which allegedly include a prototype flying saucer, are kept under lock and key. He is released in March 1946 and moves to Linz, Austria, but the Americans do not confiscate his workshop and laboratory materials, although they prohibit him from further military experimentation. (Wikipedia, “Nazi UFOs”)

May 3 — Early morning. Nine B-24’s with the 11th Bombardment Group’s 431st Squadron are heading out on a bombing mission against Japanese air installations on Truk [now Chuuk] Atoll in Micronesia. One plane over Fala Island sees two objects at their altitude of 11,000 feet, changing from cherry red to orange then white, then
dying out and turning cherry red again. Both follow the B-24 through all sorts of evasive actions. (“B-24 Sights Circles of Light,” UFO Historical Revue, no. 2 (September 1998): 8; Strange Company 163–165; NICAP, “May 2, Truk Atoll Sighting”)

May 5 — A pregnant woman, Elsie Mitchell, and five children are killed when they discover a Japanese Fu-Go balloon bomb that has landed in the forest of Gearhart Mountain near Bly in southern Oregon. (Wikipedia, “Fu-Go balloon bomb”)

May 23 and 25 — Night. In the wake of two B-29 raids on Tokyo, Japan, both nights, businessman Iomoyo Okado looks up from his air raid shelter and sees slow-moving “roundish objects, like hot cakes, about 20 square yards” in diameter, and silent. They are blue or gray in color. (“Flying Hot Cakes’ over Tokyo in 1945,” St. Joseph (Mo.) News-Press, July 12, 1947, p. 6; Clark III 503)

Summer — After 5:00 p.m. Future ufologist Ann Druffel is on a bus returning from her summer job in Long Beach, California, when she sees out of the left-hand window a bright, stationary, yellowish-white light in the northeastern sky. It looks like Venus but has a yellow color. She gets off the bus and still watches it, walking home. Soon she sees it is moving slowly to the northwest. She gets her mother to view it as well. Druffel thinks it is too high to be a coastal defense balloon. Druffel watches it for 90 minutes, after which it takes on some “activity.” Some 10–15 pieces of light begin separating from it, fading from view after moving several diameters away from the large object. (Ann Druffel, “UFO Sightings by UFO Researchers: The ‘Inaccessible Cases,’” MUFON UFO Journal, no. 139 (September 1979), pp. 14–15; Herbert S. Taylor, “Satellite Objects: A Further Look,” IUR 29, no. 2 (Summer 2004): 3–4)

Summer — Future ufologist Illobrand von Ludwiger sees an object like a black plate, whose diameter is one-eighth that of the Moon, flying against the wind below the clouds, in Stendal, Saxony-Anhalt, Germany. (Margaret Sachs, The UFO Encyclopedia, Putnam, 1980, p. 357)

Summer — Radioman Robert S. Crawford and 13 other sailors aboard the US Army Transport Delarof see a large, dark sphere rise out of the ocean east of Adak in the Aleutian Islands, Alaska. The UFO, showing darkly against the setting sun, climbs almost straight up for a few moments, then it arcs into level flight, and circles the ship two or three times. All the observers are convinced it is a large object. Crawford estimates the UFO is 150–250 feet in diameter. The gun crews hold their fire. After several minutes, it disappears to the south. (NICAP, “Large Object Emerges from Sea near the Delarof”; “The Question of Submerging UFO’s,” UFO Investigator 4, o. 5 (March 1968): 4)

June 1 — The Army Air Force approves a Northrop-recommended change for installing eight jet engines in each of two modified YB-35 piston-driven flying wings, which are redesignated YB-49s. (Wikipedia, “Northrop YB-49”)

June 1 — 7:30 p.m. A shiny, tubular object, 5–6 feet long, is observed over Morganton, North Carolina. It streaks toward the northwest, blue flame shooting from the rear. After it vanishes in the mountains near Lake James, witnesses hear an explosion. (Loren E. Gross, The Mystery of Unidentified Flying Objects—A Prelude, 1896–1949, The author, 1971, p. 156)

June 9 — XXI Bomber Command Air Intelligence issues an Air Intelligence Report on the balls of fire in the Pacific Theatre. The Truk sighting is attributed to an unknown Japanese experimental aircraft, though not a jet. (Strange Company 177–180)

July — The 9th Bombardment Group on Tinian in the Northern Marianas: “During our night missions in June and July a UFO phenomenon was reported. Our air crews started sighting balls of fire, i.e., glowing objects about the size of a full moon which flew around in the vicinity of our flying patterns over Japan. One of our crews reported that one of the objects followed their airplane halfway to Iwo Lima. I saw them on two missions. I don’t remember any reports of any hostile action by these objects and the reports of sightings stopped after a couple of months. The object of these reports was dismissed by some experts as the planet Venus. And, after these reports started coming in, some crews did mistake the rising full moon as one of these balls of fire. Some reports speculated that these balls of fire were exhausts from a Japanese development called a Baka Bomb, but exhaust flames can only be seen from the rear; and these objects appeared to have the same size and intensity in whatever direction they were traveling. I have never heard of any official assessment as to what these objects were. I had an occasion to ask General LeMay about them several years after the war and he had no explanation. I am sure that what I saw was neither Venus nor the moon nor a Baka Bomb.” (Lorenzen, UFOs: The Whole Story, Signet, 1969, p. 24; Henry C. Huglin, “Group Commander’s Reminiscences,” in Lawrence S. Smith, et al., History of the 9th Bombardment Group (VH), 9th Bomb Group Association, 1995, pp. 27–28)

July — In northern Okinawa, Japan, on a bluff looking toward the South China Sea, Artillery Capt. William A. Mandel sees a cigar-shaped object with a lighted tail moving at eye level at about 200–300 mph at an elevation of no
more than 400 feet. He estimates its length at 30–40 feet and its diameter at 6–8 feet. (Project 1947, “UFO Reports, 1945”)

July — When several balloon-shaped objects appear above Selfridge Field [now Selfridge Air National Guard Base] near Mount Clemens, Michigan, the base commander asks for a volunteer to attack them as possible Japanese balloon bombs. Jean Kisling, serving with a Free French Air Force detachment as an instructor on P-47 Thunderbolts, accepts the challenge. He chases one “well beyond the service ceiling of the P-47D” and opens fire with 8 machine guns. The object shoots away sideways on edge, leaving a contrail. (Good Need, p. 24)

July 1 — The Air Technical Service Command is moved into T-2 Intelligence. (Wikipedia, “Air Materiel Command”)

July 16 — The first detonation of a nuclear weapon (an implosion-style plutonium-based bomb) takes place at the Trinity site on what is now the White Sands Missile Range near Alamogordo, New Mexico. At this time, the bomb’s price tag, adjusted for inflation, is $28 billion. (Wikipedia, “Trinity (nuclear test)”)

Mid-July — Noon. Pilot Rolan D. Powell and five other F6F Hellcat pilots at Naval Air Station Pasco, Washington, are scrambled after radar reports a fast-moving object over the nearby Hanford facility. They see a bright object with a saucer-like appearance at. It is the size of three aircraft carriers, side-by-side, oval shaped, very streamlined like a stretched-out egg and, and pinkish in color. It hovers in a fixed position at 65,000 feet and then goes straight up and disappears. (NICAP, “Huge Saucer over Nuclear Reactor—Radar/Visual”; Strange Company 188; Patrick Gross, “Alleged UFO Intercept Attempt at Hanford Nuclear Plant, July 1945”)

July 20 — The Joint Chiefs of Staff establish Operation Overcast, a forerunner to Project Paperclip, a secret recruitment program to aid in postwar military research. The Joint Intelligence Objectives Agency is established to conduct the operation. (Wikipedia, “Operation Paperclip”)

July 24 — President Truman discloses to Soviet leader Joseph Stalin that the United States has atomic weapons. Stalin feigns little surprise, since he already knows this through espionage. (Gene Dannen, “Truman Tells Stalin, July 24, 1945”)

August — The Army Signal Security Agency persuades ITT, RCA, and Western Union to continue the wartime cable intercept program, both foreign and domestic, now called Project SHAMROCK. No courts, no warrants. It remains secret from Congress and the President. (Wikipedia, “Project SHAMROCK”)

August — 5:00 a.m. Ilona Johansson-Paasonen, staying in a sauna along lake Längelmävesi, Finland, wakes up and sees a 35-foot dazzling ball of fire streaking in her direction along the opposite shore. She throws herself to the floor, but when nothing happens she looks outside and sees a big dog, frozen in terror, its gaze fixed on the like object. On the other side another man sits steering an engine enclosed within a big glass bulb. (Ilona Johansson-Paasonen, “Humaioideja Längelmävedellä?” Vimana 1970, no. 3/4, pp. 22–24; Ilona Johansson-Paasonen, “Humanoids at Längelmävesi,” FSR Case Histories 13 (February 1973): 3–4; Clark III 266)

August 6 — 8:15 a.m. An atomic bomb (a fission weapon containing 64 kilograms of Uranium-235, Little Boy) is detonated 1,900 feet above Hiroshima, Japan, by the Enola Gay. The weapon is considered very inefficient, with only 1.7% of its material fissioning, but it is enough to obliterate the city. Some 78,000 people die instantly or immediately afterward in the firestorm. By the end of the year, another 25,000 will also suffer and die from radiation exposure. (Wikipedia, “Atomic bombings of Hiroshima and Nagasaki”)

August 7 — During a press conference with the Seattle Times, Col. Franklin Matthias, officer in charge at the Hanford Engineer Works in Washington, admits the plant has had problems with aerial intrusions, but that radar has been installed and an arrangement made with the Navy to intercept any unidentified aircraft. (Project 1947, “UFOs over Hanford: Commander R. W. Hendershot”)

August 9 — 11:01 a.m. Another atomic bomb (an implosion-type plutonium weapon, Fat Man) is dropped on Nagasaki, Japan, by Bockscar. Although the bomb is more powerful than the one used on Hiroshima, its effects are confined by hillside to the narrow Urakami Valley. At least 35,000–40,000 people are killed, and 60,000 others are injured. (Wikipedia, “Atomic bombings of Hiroshima and Nagasaki”)

August 10 — 3:00 a.m. Pianist Doris La Fountain is driving home along Market Street after finishing a concert at a night club in East Paterson [now Elmwood Park], New Jersey. She is accompanied by music store proprietor Thomas Brino and James Shaw of Clifton, New Jersey. For about 5 minutes they watch a brilliant red and green rectangular object maneuver at ground level about 70 feet away. It shoots off into the sky and disappears. (“Seeing Saucer Sweet Music to a Pianist,” New York Daily News, September 8, 1957, Passaic-Bergen Sec., p. 22; Lore and Deneault, p. 145)

August 16 — A UFO allegedly crashes near San Antonio, New Mexico, and is discovered by Jose Padilla, 9, and Remigio Baca, 7, when they are looking for a cow. The crashed saucer has created a gouge, and they can see entities moving around inside. They collect two shiny metal parts from the periphery of the crash site. A recent analysis

August 21 — Manhattan Project physicist Harry Daghlian is conducting an after-hours experiment at the remote Omega Site of the Los Alamos Laboratory in New Mexico when his hand slips. The test assembly he has built—a ball of plutonium surrounded by tungsten carbide bricks—goes critical. He sees a momentary blue flash and is struck by a wave of gamma and neutron radiation amounting to more than 500 rem. He disassembles the experiment, walks away, and admits himself to medical care. He falls into a coma and dies on September 15, the first person to die accidentally from close exposure to nuclear fission. (Adam Higginbotham, Midnight at Chernobyl, Simon & Schuster, 2019, pp. 30–31)

August 28 — Twelve 5th Air Force intelligence specialists flying on a C-46 approaching Iwo Jima (in the Ogasawara Islands, Japan) see three white, teardrop-shaped objects paralleling the plane. Navigational needles go wild, the engine sputters, and the plane falters until the objects speed away. One of the passengers is future UFO investigator Leonard Stringfield. (Stringfield, Situation Red, Fawcett Crest, 1977, pp. 9–10, Strange Company 191–193, 209–211; NICAP, “C-46 Encounters Objects / Magnetic Compasses ‘West Wild!’"

September — The first group of seven German rocket scientists arrive at Fort Strong in Boston harbor, Massachusetts, through Operation Overcast: Wernher von Braun, Erich W. Neubert, Theodor A. Poppel, August Schultze, Eberhard Rees, Wilhelm Jungert, and Walter Schwidetzky. By the end of the year, they and two other groups are moved to Fort Bliss, Texas, and White Sands, New Mexico, as “War Department Special Employees.” (Wikipedia, “Operation Paperclip”)

September — The US Army atomic bomb production unit, Z Division, named for its director, Jerrold R. Zacharias from Los Alamos, New Mexico, moves to Oxnard Field, New Mexico, from Wendover Field [now Airport], Utah, to be closer to Los Alamos. This marks the beginning of Sandia Base [now part of Kirtland AFB]. Nearby Kirtland Field is used as a B-29 base for aircraft compatibility and drop tests. By October, all the staff and facilities at Wendover are transferred to Sandia. As reservist officers are demobilized, they are replaced by about 50 hand-picked regular officers. (Wikipedia, “Manhattan Project”)

September — Policy adviser Ferdinand Eberstadt writes for Secretary of the Navy James Forrestal a report recommending a complete realignment of national security organizations. (Wikipedia, “Eberstadt Report”)

September 20 — The OSS is dissolved by Executive Order, effective October 1, scattering personnel through the Departments of State and War. The Research and Analysis Branch is transferred to the State Department. The War Department takes over Secret Intelligence (SI) and Counter Espionage (X2), which are rolled up into the Strategic Services Unit (SSU) headed by Brig. Gen. John Magruder, the former OSS Deputy Director of Intelligence who oversees the OSS liquidation. Most of the other personnel are cashiered. (Wikipedia, “Office of Strategic Services”)

September 26? — Night. Machinist Mate First Class George M. Reynolds, attached to the submarine tender USS Beaver with Submarine Squadron 45, anchored in Buckner Bay, Okinawa, Japan. He is on the main deck when he sees a bluish light move to the south, turn right, go over to the west, stop, and stand still. When it moves again, it goes back to the general area it started from. (Strange Company 195–196)

October — 8:00 p.m. While driving a car between Bryan and Stryker, Ohio, Gerald M. Kryling and his wife Thelma approach a bright light about 50 feet in the air and 20 feet from the road near some high-tension wires. It appears to be a 3-foot oval object with an amber-colored opening like a window that has shadows moving around inside. It takes off horizontally at great speed and then moves straight up. (CUFOS case file)

October 9 — Brig. Gen. George C. McDonald, AAF director of intelligence, writes to Maj. Gen. Elwood Richard Quesada in answer to a request for the investigation into wartime “balls of fire.” Exhaustive investigations of German technical personnel and US and UK sources reveal no confirmation of German involvement with the phenomena. (Macdonald–Quesada correspondence, October 1945)

November — Operation Overcast is renamed Project Paperclip. (Wikipedia, “Operation Paperclip”)
December — Lt. Col. Jo Chamberlin’s article on foo fighters appears in American Legion Magazine. Intelligence officers have ordered him not to state his military rank or position, but he is a special aide to Gen. Henry H. “Hap” Arnold. (Jo Chamberlin, “The Foo Fighter Mystery,” American Legion Magazine 39, no. 6 (December 1945): 9, 43–47; “Foo Fighter Archive Donated to UHR,” UFO Historical Revue, no. 17 (December 2015): 2–8)

December 5 — A training flight (Flight 19) of five TBM Avenger torpedo bombers disappears while over the Atlantic Ocean. The squadron’s flight plan is scheduled to take them due east from Fort Lauderdale, Florida, for 141 miles, north for 73 miles, and then back over a final 140-mile leg to complete the exercise. The flight never returns to base. A report by Navy investigators concludes that flight leader Lt. Charles C. Taylor mistook small islands offshore for the Florida Keys after his compasses stopped working, resulting in the flight heading over open sea and away from land. The report is later amended by the Navy to read “cause unknown” to avoid blaming Taylor for the loss of five aircraft and 14 men. One of the search-and-rescue aircraft deployed to look for them, a PBM Mariner with a 13-man crew, also disappears. The report attributes the loss of the PBM aircraft to an explosion in midair while searching for the flight. According to contemporaneous sources, the Mariner has a history of explosions due to vapor leaks when heavily loaded with fuel, as it might have been for a potentially long search-and-rescue operation. A tanker off the coast of Florida sees an explosion and a widespread oil slick when fruitlessly searching for survivors. The weather is becoming stormy by the end of the incident. None of the Avenger bombers have been found. (Wikipedia, “Flight 19”; Larry Kusche, The Bermuda Triangle Mystery—Solved, Harper & Row, 1975, pp. 97–122; Larry Kusche, The Disappearance of Flight 19, Harper & Row, 1980)

1946

1946 — Dancers on the roof of a nightclub in Istanbul, Turkey, watch the rapid passage of four square-shaped lights, reddish in color and aligned side by side, moving from the east and disappearing in the west in less than 60 seconds. One witness, meteorologist and RAF pilot George Raymond Leatherbarrow, estimates their altitude at 50,000 feet based on reflections on cirrus clouds. (G. R. Leatherbarrow, “Two Early UFO Cases from the Middle East,” Awareness 5, no. 3 (Autumn 1976): 4–5; Clark III 1177)
1946 — A farmer named Gunyon in Westerham, Kent, England, calls the British Technical Intelligence staff asking that the Air Ministry come and remove one of these “darned contraptions” which has fallen on his farm. The intelligence officers ask for directions and are told to drive from Croydon to Westerham, turning onto a lane when they reach a pub called The White Dog. Amid great security, two staff cars are dispatched, but fail to find the farm. They locate a pub called The White Hart and a farmer named Bunyan, who strenuously denies having made the call. Although the incident appears to be a hoax, few people can reach the Technical Intelligence staff and convince them to make a field visit. Indeed, the intelligence officers believe that former Air Intelligence scientist Reginald Victor Jones, who has been skeptical of foo fighters and ghost rockets, is behind the affair. Jones writes that a signal is received from Gen. Douglas MacArthur’s staff in Tokyo, asking for confirmation of a report that a Russian flying bomb had recently crashed in England. The other Director of Intelligence on the Air Staff, Air Commodore Roland Eugene Vintras, suggests to Jones that this might tie in with the “Westerham Incident.” (R. V. Jones, Most Secret War, Hamish Hamilton, 1978, pp. 507–513; “UFO Britannia: Part 2—World War Foo and Post War Cover Ups,” Above Top Secret forum, December 19, 2012)

January 10 — The Air Materiel Command at Wright Field, Ohio, issues a restricted-access document, German Flying Wings Designed by Horten Brothers by Capt. N. LeBlanc, detailing the drawings, photos, models, and documents relating to aircraft designed by Nazi aircraft designers the Horten brothers that were recovered in Germany by Allied forces. (N. LeBlanc, German Flying Wings Designed by Horten Brothers, Air Material Command, Technical Intelligence summary report no, F-SU-1110-ND, January 10, 1946; H. P. Dabrowski, The Horten Flying Wing in World War II: The History and Development of the Ho 229, Schiffer, 1991; Kevin D. Randle and Donald R. Schmitt, “Roswell and the Flying Wing,” IUR 18, no. 4 (July/Aug. 1993): 3; John Powell, “The Horten Flying Wings,” War Bird Forum, July 2019)
January 18 — 11:00 p.m. A US C-54 transport plane is at 7,000 feet over the French countryside on its way to Paris, France. Suddenly the pilot sees a brilliant “shooting star” about 35° above the horizon. It streaks down below the eastern horizon, then reappears and moves in a hyperbola before falling again. (Loren E. Gross, UFO’s, a History: 1946, the Ghost Rockets, The Author, 1988 ed., p. 1)

January 22 — President Truman creates a National Intelligence Authority (State, War, Navy, Chief of Staff, and a presidential representative with the DCI as a non-voting member) for policy and coordination and a Central Intelligence Group for operations under it. Rear Adm. Sidney Souers heads the CIG as Director of Central Intelligence. (Wikipedia, “National Intelligence Authority”)

February 21 — 8:30 p.m. One or more meteors are seen in west Finland and the counties of Västerbotten, Västernorrland, Kopparberg [now Dalarna], Gävleborg, Uppsala, Östergötland, and Skaraborg [now Västra Götaland] in Sweden. It supposedly sets a farmhouse on fire in Vaasa province, Finland. It leaves a long trail of smoke in the sky. (Archives for the Unexplained, “Case XXX: The Meteor That Did Not Start a Fire”)

March 5 — 6:00 p.m. João Prestes is returning on foot from a fishery on the banks of the Tietê River to his sister’s home in Araçariguama, São Paulo, Brazil. As he is entering the house, a light from outside strikes and envelopes him. He becomes dizzy and confused but manages to get up and go inside. He summons Araci Gomide, a nurse who has served in the military with him. Gomide describes his friend as being literally cooked, with his flesh detaching from his bones, injuries on his feet and ankles, and his feet clenched like the claws of a bird. His arms are burned and the flesh on his fingers is falling off. His chest, neck, and face also seem to be burned but not charred or red. Prestes dies on the way to a hospital in Santana di Parnaíba at 3:00 a.m. (Clark III 166–167; Brazil 17–21; Pablo Villarubia Mauso, “The Incredible Saga of João Prestes,” UFO Casebook)

March 6 — The Western Defense Command is deactivated. (Wikipedia, “Western Defense Command”)

March 14 — Dusk. Paul Cummings Jr. is driving east on US Highway 136 about 10 miles east of Havana, Illinois, with Douglas Gowdy. A bright orange ball appears in the road about 1 mile ahead, gliding down the highway only one foot above the pavement and possibly touching both shoulders of the road. When it is within 2,000 feet, Cummings pulls the car over and stops, and they rush out to lie down in a ditch, fearing an explosion. When they look up again, the object is nowhere in sight. (Lorenzen, UFOs: The Whole Story, Signet, 1969, pp. 26–27)

April 2 — The Strategic Services Unit is transferred to the new Central Intelligence Group and becomes the Office of Special Operations. (Wikipedia, “Strategic Services Unit”)

April 25 — While ice fishing at Anima Nipissing Lake, Ontario, Don Cameron and his family watch 12–14 small disc-shaped objects descend at a 45° angle about 75 feet away. They come spinning down on the ice, rise 2 feet into the air, then come down again. Cameron walks toward them, and they ascend and shoot away at the same angle and direction. They find black marks on the snow and ice. (Clark III 1179)

April or May — Around 12:00 noon. Richard R. Hill and Stanley Ogdrzyiak are driving in an open convertible on the Country Club Road near Lafayette, New York. Suddenly they see a gleaming, metallic, cigar-shaped object in the sky. It remains motionless at 5,000–10,000 feet altitude, which at that height would make it 300–400 feet long. After 2 minutes, it disappears instantaneously. (“Case 84,” CRIFO Newsletter 2, no. 3 (June 3, 1955): 4; Clark III 1179)

May — Day. Navy Lieutenant Andrew A. Titcomb is on leave and picking oranges at his wife’s family home at La Grange, north of Titusville, Florida, when he hears a whistling noise and sees a dark “flying football” directly overhead at about 1,000 feet elevation moving at 125 mph. It appears 15–20 feet in diameter and flies in an arc to the southeast. It disappears in a cloudbank. (UFOEv, p. 6; Clark III 1179)

May 13 — The Soviets establish a rocket center called NII-88 [now TsNIIMash] at Kaliningrad [now Korolyov], Russia, northeast of Moscow. Missile designer Sergei Korolev is appointed chief designer of Section 3 on long-range missiles. Stalin declares Korolev’s name a secret, which it remains until his death in 1966. Russia keeps dozens of its captured German scientists here, working on special projects until 1955. (Wikipedia, “TsNIIMash”)

May 13 — A rocket is seen traveling over Helsinki, Finland, in a southwesterly direction at 1,000 feet. It supposedly moves at supersonic speed, emitting a magnesium-like light and a trail of smoke. (Jan L. Aldrich, comp., The Ghost Rocket File, Fund for UFO Research, 2000, p. 10)

May 18 — 10:45 p.m. Gösta Carlsson, later to become founder and owner of Cernelle AB, is walking in the forested area of Kronoskagen near Angelholm, Sweden, when he sees a disc-shaped machine more than 50 feet in diameter. On

May 21 — Two motorists report an elongated craft resembling a rocket or Zeppelin over Stora Mellösa, Sweden. One of the witnesses sees two short wings, although the other cannot see any despite watching the object for 5 minutes. (Swords 12)

May 24 — 2:20 a.m. Witnesses in Landskrona, Sweden, see a wingless, cigar-shaped object, spurring sparks from its tail. About 300 feet above the ground, it is moving at airplane speed toward the southwest. (Loren E. Gross, UFO’s, a History: 1946, the Ghost Rockets, The Author, 1988 ed., p. 1; Göran Jansson, “Spökraketerna 1947,” January 2005, p. 6)

May 28 — The Aftonbladet newspaper in Stockholm, Sweden, is the first to use the term “Spökraket” (ghost rocket) in a headline. (Swords 12)

May 31 — 11:43 a.m. A huge, metallic, wingless cigar moves rapidly at 1,000 feet altitude over Katrineholm, Sweden. (Loren E. Gross, UFO’s, a History: 1946, the Ghost Rockets, The Author, 1988 ed., pp. 2–3)

Summer — Late evening. Two women on a walk in Johannesburg, South Africa, see an aerial object hovering 5 feet above the roof of a nearby hotel. It is shaped like a saucer with a round, golden ball in the center, evenly split between the top and bottom sections. They hear a clicking noise, and the ball drops through the saucer until it is level with the roof. More clicks are heard, and the ball rises through and above the saucer 8–9 feet. In the space between the ball and the disc the witnesses see two figures larger than normal height (7 feet), fair-complexioned and broad-shouldered, with short wavy hair. They are wearing white uniforms with stiff collars and stand motionless until the object floats away and is lost to view. (John Judge, “Near-Landing in 1946 in Johannesburg,” Flying Saucer Review 24, no. 5 (March 1979): 14–16; Clark III 266)

Summer — Day. Eleanor Hancock is in Colorado Springs, Colorado, looking southwest toward Cheyenne Mountain when two shining silver objects appear, moving rapidly in tandem from east to west toward the escarpment. Just before they reach the mountain, they turn sharply upward, still in formation, and disappear. (Clark III 1179)

June 6 — The Joint Research and Development Board is created by the Secretaries of War and the Navy to coordinate research efforts. (Joint Research and Development Board, Organization Authority Record, June 6, 1946)

June 9 — Night. An enormous light drops earthward over Sala, Sweden, leaving a long, fiery trail. An explosion is heard. Loren E. Gross, UFO’s, a History: 1946, the Ghost Rockets, The Author, 1988 ed., p. 3)

June 9 — 10:17 p.m. A rocket-like light passes over Helsinki, Finland, at 10,000 feet leaving a smoke trail and making a distant rumble. A luminous afterglow lasts 10 minutes. (Loren E. Gross, UFO’s, a History: 1946, the Ghost Rockets, The Author, 1988 ed., p. 3)

June 18 — A first-strike scenario, the Pincher war plan, is created by the US military to strike Moscow and the Caucasus with 50 nuclear weapons if the Soviets invade the Middle East. It is never officially approved, but the Joint Chiefs agree to use it for planning purposes. (Phillip S. Meilinger, “The Early War Plans,” Air Force Magazine, December 1, 2012)

June 26 — The commander of the military district in Morjärvi, Sweden, issues instructions on how to report incidents with “certain kind of light phenomena’ that might be associated with “tests made by foreign powers with guided weapons.” (Swords 12).
July — Amazing Stories publishes four short articles in its September 1945 issue by William C. Hefferlin, each describing a wonderful new invention that has come to the author, according to editor Ray Palmer, “from Tibet by mental telepathy.” One of the inventions is a “circle-winged airplane.” In later issues, Hefferlin and his wife Gladys go on to describe the Rainbow City, an underground Martian city beneath Antarctica where the flying saucers originate. (“A Description of Rainbow City from the Hefferlin Manuscript (Hollow Earth”); Walter Kafton-Minkel, Subterranean Worlds, Loompanics, 1989, pp. 160–167; Clark III 610)

July — Day. A long, silver-colored cigar appears suddenly out of the haze over Crane Beach, Ipswich, Massachusetts, moves noiselessly over the water, then disappears suddenly. (Lore and Deneault, p. 148; Clark III 1179)

July — 2:00 p.m. Hans Sorensen is cycling near Viskinge, Denmark, when he sees three discs flying silently overhead. The underside is uneven and dull gray, but they are like “polished mirrors” on top. (Loren E. Gross, UFO’s, a History: 1946, the Ghost Rockets, The Author, 1988 ed., p. 16)

July 1 — Able nuclear test, Bikini Atoll, Marshall Islands. Radio-controlled autopilots are installed in eight B-17 bombers, converting them into remote-controlled drones that are then loaded with automatic cameras, radiation detectors, and air sample collectors. Their pilots operate them from mother planes at a safe distance from the detonation. The drones can fly into Able’s mushroom cloud, which would have been lethal to crew members. (Wikipedia, “Operation Crossroads”)

July 3 — The Joint Research and Development Board is established. Essentially it is Vannevar Bush’s existing cadre of brain trust from the still active Office of Scientific Research and the postwar Joint New Weapons Committee. Added to this are other reconstituted R&D committees and advisers like Lloyd Berkner of the Carnegie Institution of Washington. The original founding members are physicist Alfred Lee Loomis, biologist Caryl Parker Haskins, physicist Luis Walter Alvarez, physicist William Shockley, and George Doriot. Two military representatives each from the Army, Navy, and Air Force complete the board’s membership. Counting Bush, this makes a board of 12. (Michael Hall and Wendy Connors, “The Research and Development Board: Unanswered Questions,” IUR 26, no. 2 (Summer 2001): 7–8)

July 9 — A journalist finds three dubious fist-size fragments, one of iron and the other two slag-like, after a bright projectile is seen over a beach at Njurunda, Sweden. (Göran Jansson, “Spökaketerna 1947,” January 2005, p. 12; Loren E. Gross, UFO’s, a History: 1946, the Ghost Rockets, The Author, 1988 ed., p. 14)

July 9 — 2:30 p.m. Erik and Asa Reuterswärd take a photo of a greenish-white daylight meteor by a lake at Guldsmedshyttan, northwest of Lindesberg, Sweden. They are atop a forest watchtower and have a good view of the object. The image is circulated to newspapers throughout Sweden; however, the photo probably shows an unusual daylight meteor, not a ghost rocket. (Loren E. Gross, UFO’s, a History: 1946, the Ghost Rockets, The Author, 1988 ed., pp. 12–13; Clas Svahn, “The 1946 Ghost Rocket Photo,” IUR 27, no. 3 (Fall 2002): 12–14, 23; Swords 13–14; Clas Svahn, “Spökaketerna: Den Största Gätan,” Rikorganisationen UFO-Sverige, March 7, 2017)

July 9 — 2:30 p.m. Two people on the north side of Vaxön, Sweden, watch a glowing white object with a blue-white tail streak across the sky in about 2 seconds, disappearing to the southeast. Around the same time, a witness at Järna Station in Södertälje sees an object “like a glass flask in a thermos” descending from a high altitude. (Loren E. Gross, UFO’s, a History: 1946, the Ghost Rockets, The Author, 1988 ed., p. 6)

July 9 — 2:30 p.m. A member of the US legation sees a silent ghost rocket falling rapidly over Stockholm, Sweden, according to a July 11 telegram from State Department official Christian M. Ravndal to Washington, D.C. Hundreds of other observations take place over central Sweden. Ravndal suggests that the Soviets are trying to intimidate the Swedes. (Göran Jansson, “Spökaketerna 1947,” January 2005, p.11; Clark III 524, 527; Good Above, p. 20; Loren E. Gross, UFO’s, a History: 1946, the Ghost Rockets, The Author, 1988 ed., p.p. 6, betw. 12–13)
July 9 — 2:35 p.m. Efrain Johnson sees a strange, cigar- or sugarloaf-shaped object to the east of Ockelbo, Sweden. It shines like silver and appears “like some glistening mass.” It falls to the ground and is gone in a few moments. (Loren E. Gross, *UFO’s, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 6)

July 9 — About 3:00 p.m. A housewife near Sörbo, Sweden, is washing on the shore of Södra Barken when she sees a falling object coming from the northeast. It changes color from blue to green and has a long tail. It tumbles into the lake about 320 feet away. (Loren E. Gross, *UFO’s, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., pp. 6–7)

July 9 — 3:30 p.m. A young man in Mockfjärd, Sweden, sees a silver-colored star diving toward the ground with a whistling noise. It comes down about 490 feet away from him, and he is blinded by the intense light. He thinks it crashes into Mt. Landholm. A powerful burning smell lingers for 15 minutes. (Loren E. Gross, *UFO’s, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 7)

July 9 — 3:35 p.m. Many people see a bright red, rocket-like object moving swiftly over Turku, Finland, and leaving a short trail. It casts shadows on the ground. (Loren E. Gross, *UFO’s, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 7)

July 10 — A brilliantly glowing projectile trailing luminous smoke crashes into a beach near Norrvikssand, Sweden. Airline pilot Torvald Linden and other witnesses find a shallow crater a little more than 3 feet in diameter. A mass of slag-like material, some of it reduced to powder (which burns the hands when touched) is found at the site and collected into bags. A journalist from *Svenska Dagbladet* on July 11 finds a “burnt-brown object with a hollow cylinder” with a diameter of about 1–2 inches. Military authorities take over the site. The debris is taken to Dr. B. Backlund at a laboratory in Kubikenborg, who finds it contains paper with microscopic black-and-white squares like a screen. Some porous, rust-colored fragments are also present. The same day, the beach is visited by Lt. Col. Rudberg, Capt. C. Ljungdahl, and Capt. R. Westlin, who conclude that the material has been in the area for a long time. (Loren E. Gross, *UFO’s, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., pp. 10–12)

July 10 — 2:30 p.m. A bluish flying cigar 10–12 times the diameter of the full moon in length passes over Stockholm, Sweden. (Loren E. Gross, *UFO’s, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 9)

July 12 — Swedish Intelligence agrees to cooperate in sharing ghost rocket information with the British military attaché in Stockholm, Sweden, Maj. de Salis. (Swords 20)

July 12 — Day. The railway station master at Gryon, Vaud, Switzerland, is watching a B-24 Liberator flying overhead at 15,000 feet when he also sees a “flying bomb” looking like a big star traveling northeast at about 250 mph. (Loren E. Gross, *UFO’s, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 14)

July 12 — 10:00 p.m. Inga Erikksson is in her garden in Usta, Örebro, Sweden, when she hears a sharp, sizzling sound in the air and sees three silvery triangular objects traveling horizontally from east to west. They are visible only for 2 seconds, but her mother notes that the electrical power has gone out in their home. (AFU case file)

July 15 — The Swedes provide the British attaché with analytical reports of all observations to date. (Swords 20)

July 18 — Two British intelligence officers arrive in Stockholm to meet with their counterparts in Sweden. One is from the Air Ministry (Squadron Leader Barrie Heath) and the other (Maj. Malone) is from MI10(a), a branch of the Directorate of Military Intelligence. (Swords 20)

July 18 — 12:00 noon. Sigvat Skaug and his son, who live along Lake Mjøsa in southeastern Norway, and his sister Åse Tandberg watch two rocket-like objects about 7 feet long pass over their heads at a very low altitude. They fall simultaneously into the lake, throwing the water several feet into the air. The objects look like V-1 rockets and come in low from the west at about 150 feet, causing the trees to sway. They fall into the lake about 1.2 miles from the western shore and 4.3 miles from Minnesund. (NICAP, “‘Ghost Rocket’ Crashes into Lake”; Loren E. Gross, *UFO’s, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., pp. 18–19; Göran Jansson, “Spökarketerna 1947,” January 2005, pp. 19–20; Clas Svahn and Anders Liljegren, “The Kölmjärv Ghost Rocket Crash Revisited,” AFU Newsletter 27 (Jan./Dec. 1984): 1–5; Swords 16; Clark III 526)

July 18 — Three workers see a ghost rocket above Ortviken, Sweden. Shortly afterward, Gunnar Falck watches a silvery cylinder moving over the northern part of Sundsvall. (Loren E. Gross, *UFO’s, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., p. 17)

July 19 — 11:15 a.m. In the village of Bölebyn, Sweden, Leonard Danielsson and his sons Kjell, Dan, and Hans see an “aeroplane” moving against the wind to the southwest. The boys say it looks like a large, metallic milk canister. It travels from horizon to horizon in about 20 minutes before disappearing in the northwest. (Swords 17)

July 19 — 11:30 a.m. Kurt Larsson, 11, is fishing at the north end of Lake Kattisträsket, Sweden, when he hears a roaring sound. A huge column of water rises out of the lake as if a mine has detonated. Military officers from Boden
investigate, but the lake is too muddy to send in a diver. They conclude that whatever fell is buried in 15 feet of mud. (Swords 24)

July 19 — 11:45 a.m. Many witnesses see a gray, winged rocket crash into Lake Kölmjärv, Sweden, with a loud bang close to the southwest bank. Knut Lindbäck says it generates a high plume of water when it hits the surface, “followed by another cascade as if something had detonated.” Water lilies and other aquatic plants are torn up and thrown on the shore. Lieut. Karl-Gösta Bartoll from the Boden engineer corps arrives the next day to supervise the salvage operation. Engineers Roland Rynniger and lab technician Torsten Wilner from the Defense Research Department also arrive with a Geiger counter. A three-week search turns up no traces of metal, even though the evidence points to an underwater explosion. (NICAP, “‘Ghost Rocket’ Crashes into Lake”; Göran Jansson, “Spökraketerna 1947,” January 2005, pp. 20–26; Loren E. Gross, UFO’s, a History: 1946, the Ghost Rockets, The Author, 1988 ed., pp. 20, 76; Clas Svahn and Anders Liljegren, “The Kölmjärv Ghost Rocket Crash Revisited,” AFU Newsletter 27 (Jan./Dec. 1984): 1–5; Swords 17–20, 24; Clark III 525, 526)

July 19 — 3:00 p.m. Karl and Tyra Axberg are sitting on the porch of their cabin on Lake Vassarajärvi in Norrbotten County, Sweden, when they hear a loud noise. A projectile comes in at a very low angle and hits the water at a 30° angle, continuing underwater for about 600 feet. A military team led by Karl-Gösta Bartoll can find no trace of a “ghost bomb.” (Swords 24–25)

July 19 — 3:40 p.m. Ingrid Hansson is sunbathing with her father on a floating jetty at the northern end of Lake Marmen, near Sunnanå, Sweden. She hears a violent roaring over the water and looks up to see an object bouncing along the surface, stirring up a wake. The object has created a water column 66 feet high upon impact. (Swords 24)

July 25 — The Swedish military states that ghost rockets are not meteors. (Loren E. Gross, UFO’s, a History: 1946, the Ghost Rockets, The Author, 1988 ed., p. 23)

July 27 — British Air Attaché Capt. Henderson informs the Foreign Office in London, England, that cooperation with Swedish Air Staff should be kept from the Americans. (David Clarke and Andy Roberts, Out of the Shadows, Piatkus, 2002; Joel Carpenter, “Guided Missiles and UFOs: A Tangle of Fear, 1937–53, Part Two”; Swords 20)

July 28 — Night. Sections of Oslo, Norway, are shaken by two violent aerial explosions. An “intense white light” accompanies the blasts. (London Daily Telegraph, July 29, 1946; Clark III 526)

July 29 — Norway begins censoring ghost rocket reports just as Sweden is doing. (Loren E. Gross, UFO’s, a History: 1946, the Ghost Rockets, The Author, 1988 ed., p. 25)

July 30 — 5:00 p.m. A customs officer on the Norway-Sweden border watches a silvery torpedo with short wings. The object moves in from the south but changes direction with a sharp turn and continues east with a whining sound. (Anders Liljegren and Clas Svahn, “The Ghost Rockets,” UFOs 1947–1987, Fortean Tomes, 1987, p. 35)

August — Day. Charles A. Johnson is driving on US Highway 41 along Lake Michigan north of Chicago, Illinois, when he sees three silver discs going from east to west in a triangular formation. (Clark III 1179)

August — 8:30 p.m. A young man sees a pan-shaped object near a road in Sint-Niklaas, Belgium. A small entity holding an acacia branch is nearby. The being enters the object through an opening on the underside. Afterward, traces of burning on the ground are detected. (Center for UFO Studies, HUMCAT Index 1940–1949, p. 20; Clark III 266)

Early August — An astronomer and meteorologist is looking at some clouds through a telescope in Stockholm, Sweden, and sees a luminous object that he estimates is about 90 feet long, torpedo-shaped, and metallic. It has a “tapered tail that spewed glowing blue and green smoke and a series of fire balls.” The object explodes with a terrific flash. (“Sweden Plans Radar Fight on ‘Rockets,’” Los Angeles Times, August 13, 1946, p. 1; Loren E. Gross, UFO’s, a History: 1946, the Ghost Rockets, The Author, 1988 ed., p. 39)
August 1 — President Truman signs the Atomic Energy Act, transferring the control of atomic energy from military to civilian hands, effective on January 1, 1947. It categorizes information on atomic energy as “born classified,” even if it is not created by any US government agency. “Restricted Data” is not a level of classification; rather, a document can be classified as Confidential, Secret, or Top Secret, while also containing Restricted Data. In addition, a document containing Restricted Data can also contain Critical Nuclear Weapon Design Information. In this way, a document can be classified as Secret (S), Secret//Restricted Data (S//RD), or Secret//Restricted Data-Critical Nuclear Weapon Design Information (S//RD-CNWADI), depending on the type of information it contains. (Wikipedia, “United States Atomic Energy Commission”)

August 1 — Truman approves the establishment of the Office of Naval Research for “planning, fostering, and encouraging scientific research” in relation to naval power and national security. (Wikipedia, “Office of Naval Research”)

August 1 — Col. Edwin Kennedy Wright, Vandenberg’s executive assistant at the Central Intelligence Group, sends a memorandum to President Truman saying the ghost rockets conform to a V-1 shape and seem to be launched from the USSR. The report notes that the missiles can turn and fly circular courses, seemingly indicating radio control. Most information comes from the military attaché in Sweden and the conclusions are from the director of intelligence for the War Department general staff. (Swords 21–23; Jan Aldrich, “Investigating the Ghost Rockets,” IUR 23, no. 4 (Winter 1998): 10, 12)

August 1 — 6:00 p.m. AF Capt. Jack E. Puckett is flying over Tampa, Florida, in a C-47 transport and sees a long cylinder twice the size of a B-29 with luminous portholes. After 3 minutes, it disappears at a speed of 1,500 mph. (“Rocket Craft Encounter Revealed by World War 2 Pilot,” UFO Investigator 1, no. 2 (Aug./Sept. 1957): 15; UFOEv, p. 19)

August 5 — 6:26 p.m. A luminous object is seen by a motorist near Landskrona, Skåne, Sweden.

August 5 — 11:00 p.m. A fast-moving, silent, circular object glitters in the sun over Skåne, Sweden, as it heads toward the south-southwest at a high altitude. (Loren E. Gross, UFO’s, a History: 1946, the Ghost Rockets, The Author, 1988 ed., p. 28)

August 6 — The US delegation in Budapest, Hungary, reports that a German scientist now working for the Soviets has revealed that the Soviets have developed guided rockets called V-3 and V-4 that are able to fly a round trip of 700 miles. (Jan Aldrich, “Investigating the Ghost Rockets,” IUR 23, no. 4 (Winter 1998): 10)

August 7 — A Top Secret message from the Commander-in-Chief Air Forces, Pacific, to Gen. Lauris Norstad, War Department Operations, requests guidance on the current classification of the substitute code word “Majestic” for Operational Plan Olympic (the invasion of Northern Japan). The plan has been downgraded to Restricted (Message CM1472 IN). The answer is that both code words had been declassified by the JCS on October 8, 1945 (Message CM96908 OUT 8 Aug 1946). (Jan Aldrich; Murray Bott, “Military Codenames ‘Olympic’ and ‘Majestic,’” UFO UpDates, April 4, 2002)

August 7 — Swedish Lt. Lennart Neckman of the Defense Staff’s Air Defense Division sees a clear, yellow flame passing low and slow over the countryside. (Loren E. Gross, UFO’s, a History: 1946, the Ghost Rockets, The Author, 1988 ed., p. 30)

August 8 — Chief of Swedish Air Defense Maj. Nils Ahlgren says that some of the rockets are seen at low altitude, maneuver in half circles, and appear to come from the south. (Göran Jansson, “Spökракетerna 1947,” January 2005, p. 36)

August 11 — 9:00–10:00 p.m. Hundreds of people in central and southern Sweden see “ghost bombs” that fly from south to north, giving off a brilliant blue-white light. Sometimes two of the objects are seen flying together. Some witnesses see smaller silver balls come out of the larger objects, which are variously described as cylinders and torpedoes with a “wide nose” and “fire-spurring tail.” Stockholm is said to be “near the boiling point” with ghost rocket speculation. (Loren E. Gross, UFO’s, a History: 1946, the Ghost Rockets, The Author, 1988 ed., pp. 33–39; Göran Jansson, Spökракетerna 1947, January 2005, pp. 38–40; Clark III 525; Anders Liljegren and Clas Svahn, “The Ghost Rockets,” UFOs 1947–1987, Fortean Tomes, 1987, p. 37; Don Berliner, with Marie Galbreath and Antonio Huneus, UFO Briefing Document: The Best Available Evidence, Dell, 2000, pp. 50–53)

August 12 — 10:00 a.m. A twin-engine Saab 18 Swedish Air Force bomber crashes and explodes near Valshult, Jönköping, Sweden, killing three airmen. Rumors circulate that it collided with a ghost rocket, but an investigation indicates that the pilot lost control. (Good Need, pp. 39–40)

August 12 — 8:15 p.m. A torpedo-shaped ghost rocket moves slowly over a seaport town in southern Sweden, barely grazing the roofs and trailing smoke. It continues out to sea and seems to come down on a small island. Two men
August 13 — Capt. Roscoe H. Hillenkoetter, US naval attaché in Paris, forwards as top secret a report by the French government on ghost rocket activity in Scandinavia. It states that “a good number of these projectiles are of the V-1 type in the form of a torpedo with two small wings.” A map shows them originating in the Leningrad [now St. Petersburg] area, Russia. (Swords 21; Good Need, pp. 38–39; Jan Aldrich, “Investigating the Ghost Rockets,” IUR 23, no. 4 (Winter 1998): 11)

August 13 — The Hungarian report of August 6 causes Maj. Gen. Stephen J. Chamberlin, Army assistant chief of staff for intelligence, to ask Budapest for further information. Top-secret requests are sent to military attachés in London, Stockholm, Oslo, Helsinki, and Copenhagen asking for listings of all ghost rocket reports, as well as V-3 and V-4 missiles. The military attaché in Oslo reports that a Soviet ship in the north Baltic Sea has been transmitting code to shore stations regarding the ghost rockets. The military attaché in Moscow asks other European officials about where the rockets originate and gets several answers, which he forwards on to Chamberlin: Hiiumaa island, Estonia; Latvia; or Peenemünde, Germany. Gen. Joseph T. McNarney of the US Forces in Europe Theater replies that Peenemünde is a likely origin, since the site has been refurbished. The military attaché in Stockholm suspects Hiiumaa, Peenemünde, or Parikkala in Finland, while the naval attaché in Stockholm thinks that Leba, Poland, is the launch site. (Jan Aldrich, “Investigating the Ghost Rockets,” IUR 23, no. 4 (Winter 1998): 10–11)

August 13 — The New York Times says the ghost rocket situation is extremely dangerous and that Sweden will not tolerate such violations. (“Swedes Use Radar in Fight on Missiles,” New York Times. August 13, 1946, p. 4)

August 13 — The US naval attaché and the Assistant US military attaché in Stockholm interview three Swedish Air Force officers assigned to the General Staff who say that they believe the objects are rockets. (Joel Carpenter, “Guided Missiles and UFOs: A Tangle of Fear, 1937–53, Part Two”; Swords 21)

August 13 — Afternoon. A troop of Boy Scouts in Denmark see a rocket-like object moving quickly at an altitude of 1,600 feet. They can see small side wings and fins. A blue-white light streams from the bottom, and it diverges from a straight course to a 35° curve. (Loren E. Gross, UFO’s, a History: 1946, the Ghost Rockets, The Author, 1988 ed., p. 43)

August 13 — 8:00 p.m. A cigar-shaped object flies past a witness at Karlskrona, Sweden, at a distance of only 150 feet. Only 5 feet long, it emits a faint green light and trails smoke from the rear. (Loren E. Gross, UFO’s, a History: 1946, the Ghost Rockets, The Author, 1988 ed., p. 43)

August 14 — 10:02 a.m. Swedish Air Force pilot Lieut. Gunnar Irholm and his signaler, Cpl. Möller, are flying a B-18A bomber at 650 feet 4 miles northeast of Malingsbo in central Sweden when they see a dark cigar-shaped object approaching on their left. It has no visible wings, rudders, lights, flame or projections of any type. It appears to follow the terrain at 370–430 mph, maintaining the same height, then vanishes into a storm cloud. (“Ghost Rockets over Scandinavia,” Intelligence Review, no. 49, January 9, 1947, US Department of Defense; Don Berliner, Marie Galbraith, and Antonio Huneens, Unidentified Flying Objects Briefing Document, UFO Research Coalition, December 1995, pp. 33–35; Swords 15–16; “Cigar Sighted from B-19 Bomber,” AFU Newsletter, no. 44 (September 2002): 1–4)

August 15 — Night. Several residents of the east side of Waterloo, Iowa, see an object buzzing rapidly around some trees. It gradually ascends, surrounded by a cloud of white vapor, and disappears high in the sky. One person calls it “a great white bird; another, a bomb.” Mrs. Russell Lampman says that the object is “6 feet, 3 inches tall, like a large man, and rather rectangular in shape.” She and her husband watch it for an hour after it starts hovering about 20–25 feet above a nearby alley. (Al Starr, “Street Scene,” Waterloo (Iowa) Sunday Times, August 18, 1946, p. II-1; “Well, We Saw It First!” Waterloo Daily Courier, July 7, 1947, p. 2; Project 1947, “UFO Reports: 1946”)

August 16 — A missile produces an enormous explosion over Malmö, Sweden, that shakes or breaks many windows. Some witnesses think they can see fragments of the object falling to earth. (“Windows Broken by Rocket Bomb,” Manchester Guardian, August 17, 1946, p. 6; Loren E. Gross, UFO’s, a History: 1946, the Ghost Rockets, The Author, 1988 ed., p. 50)
Late August — Margaret Sprankle, a civilian employee at Tinker AFB near Oklahoma City, Oklahoma, is returning from work when she sees, about 300 feet away, a large, metallic, lens-shaped structure about 75 feet in diameter. On the lower right side are 12–14 square windows; in each, visible from the shoulders up, is a figure. Their heads are very round. The object rotates 90° on its vertical axis and silently flies northwest and disappears in seconds. (Center for UFO Studies, HUMCAT Index 1940–1949, p. 22; Clark III 266)

August 18 — 8:00 or 10:00 p.m. An aerial object like a 9-foot cigar is seen moving slowly on the north side of Copenhagen, Denmark. It explodes with extraordinary force. (Loren E. Gross, UFO’s, a History: 1946, the Ghost Rockets, The Author, 1988 ed., p. 53)

August 19 — The US military attaché in Moscow reports on the visit of Maj. Stig Wennerström of the Swedish Air Force, who reveals that radar indicates the ghost rocket launch site is at Peenemünde, Germany. The rockets appear to be radio-controlled, carry no warheads, are self-destructive, and are plotted over a range of 620 miles. Sometimes they follow zigzag courses. (Jan Aldrich, “Investigating the Ghost Rockets,” IUR 23, no. 4 (Winter 1998): 12)

August 19 — Two US experts on aerial warfare, aviation legend Jimmy Doolittle and British Group Captain Douglas Bader, and General David Sarnoff, president of RCA, arrive in Stockholm, Sweden, ostensibly on private business, and independently of each other. The official explanation is that Doolittle, who is now vice-president of the Shell Oil Company, is inspecting Shell branch offices in Europe, while Sarnoff, a former member of General Dwight D. Eisenhower’s London staff, is studying the market for radio equipment. However, the story indicates that the Chief of the Swedish Defense Staff, Col. C. R. Kempf, makes no secret that he “was extremely interested in asking the two generals advice and, if possible, would place all available reports before them.” However, Doolittle denies the correlation to Barry Greenwood in 1984, and researchers have found no evidence to support a collaboration. (Joel Carpenter, “Guided Missiles and UFOs: A Tangle of Fear, 1937–53, Part Two”; Loren E. Gross, UFO’s, a History: 1946, the Ghost Rockets, The Author, 1988 ed., pp. 53–54; Clark III 527; Swords 21, 24)

August 21 — The General Staff in Norway issues a memorandum to the press asking it not to mention any ghost rockets seen over the country and to pass on all reports to the military Intelligence Department. In Sweden, the ban is limited to any mention of where the rockets are seen to land or explode. (London Daily Telegraph, August 22, 1946; Good Above, p. 21)

August 22 — 3:00 p.m. Photographer Gösta Skog takes a color film of a ghost rocket at Getå, 100 miles south of Stockholm, Sweden. The cigar-shaped object appears out of a cloud at 3,000 feet, trailing exhaust. The film turns out to be overexposed. (Clas Svanh, “Spökraketerna: Den Största Gåtan,” Riksorganisationen UFO-Sverige, March 7, 2017; Swords 14–15)

August 22 — Director of the Central Intelligence Group (CIG) Lt. Gen. Hoyt Vandenberg writes a top secret memo to President Truman via Adm. William D. Leahy, stating that the “weight of evidence” points to Peenemünde (which has become a Soviet naval base), East Germany, as the origin of the ghost rockets, and that a US military attaché in Moscow has been told by a “key Swedish Air Officer” [Wennerström] that radar course-plotting leads to the conclusion that Peenemünde is the launch site. CIG speculates that the missiles are extended-range developments of V-1s being aimed for the Gulf of Bothnia for test purposes and “do not overfly Swedish territory specifically for intimidation; self-destruct by small demolition charge or burning.” (Joel Carpenter, “Guided Missiles and UFOs: A Tangle of Fear, 1937–53, Part Two”; Barry Greenwood, “Significant Ghost Rocket Documents Available,” UFO Historical Revue, no. 15 (June 2015): 1–8)

August 23 — The British Foreign Office states that English radar experts, including Reginald Victor Jones, having returned from Sweden, had “submitted secret reports to the British government on the origin of the rockets.” (Good Above, p. 21)

August 24 — Stockholm Air Attache Maj. Gen. Alfred A. Kessler Jr. informs the War Department that the Ghost Rockets are an “unintentional hoax which developed naturally but which exploited by Defense staff by implication and lack of frankness possibly interest defense budget and to alert west against east.” (Joel Carpenter, “Guided Missiles and UFOs: A Tangle of Fear, 1937–53, Part Two”)

August 24 — Admiral Henry Kent Hewitt, Commander of US Naval Forces in Europe, writes a letter to the US naval attaché in Oslo, Norway, on “Rocket Bombs or Guided Missiles over Norway and Sweden.” Two “missiles” have fallen into a lake near Oslo, and the US Navy is “very interested.” ([Adm. Henry Kent Hewitt], Letter to US Naval Attaché, Oslo, “Rocket Bombs or Guided Missiles over Norway and Sweden,” August 24, 1946)

August 24 — Evening. A Norwegian student and a Swedish engineer are boating on a small river “somewhere in Sweden” when a light approaches them from the southeast. It resembles a full moon and emits an intense light: “As it passed immediately overhead, it grew so bright you could see a well as on a sunny day.” The object, about 10 feet long, releases four stars that fall silently to the ground. (Loren E. Gross, UFO’s, a History: 1946, the Ghost Rockets, The Author, 1988 ed., pp. 58–59)
August 26 — The US military attaché in Stockholm reports that the Swedes, possibly worried about a Soviet veto of their application for UN membership, have canceled their request for British radar equipment. (Jan Aldrich, “Investigating the Ghost Rockets,” _IUR_ 23, no. 4 (Winter 1998): 13)

August 29 — The American embassy in Stockholm tells the State Department that the ghost rockets are probably Soviet missiles. (Loren E. Gross, _UFO’s, a History: 1946, the Ghost Rockets_, The Author, 1988 ed., p. 63A; [Memo on telegram of August 27, 1946]; Good Above, pp. 22, 447)

September — German rocket engineer Walter Ziegler tells Army CIC that 400 men from his former rocket group at Bayerische Motoren Werke (BMW) in Munich, Germany, are invited by Russian military officers to a fancy dinner, wined and dined, then taken home. Several hours later, all 400 are woken up by the Russians and forced to take a trip. (Ziegler is not among them.) They are transported by train to a small town (“Kubischew”) outside Moscow, Russia, where they remain and work on secret military rocket projects under terrible conditions. (Jacobsen, _Area 51_, p. 42)

September 1–2 — Late night and early morning. Rocket-shaped objects are seen over northern Greece, according to Prime Minister Konstantinos Tsaldaris. Physician Paul Santorinis is placed in charge of an investigation. He rules out Russian missiles, but the Army ends the investigation in 1947. (Clark III 525; Loren E. Gross, _UFO’s, a History: 1946, the Ghost Rockets_, The Author, 1988 ed., pp. 62–63; Good Above, p. 23)

September 7 — British pilot Edward Mortlock Donaldson attains an airspeed record of 616 mph in a Gloster Meteor F Mk 4 at Littlehampton, England. (Wikipedia, “Edward Donaldson (RAF officer)”) September 9 — The scientific advisor to MI6, English physicist Reginald Victor Jones, considers the ghost rockets a social panic phenomenon. An RAF Intelligence report, “Investigation of Reported Missile Activity over Scandinavia,” identifies eight types of ghost rocket sightings: iron cylinder, magnesium-like light, white core surrounded by blue-green, shining ball with tail, torpedo-shape, black object with flame, small rocket, small missile. It takes the daytime reports seriously but concludes are probably only a few genuine reports of actual missiles. (Joel Carpenter, “Guided Missiles and UFOs: A Tangle of Fear, 1937–53, Part Two”; Swords 26–27; Loren E. Gross, _UFO’s, a History: 1946, the Ghost Rockets_, The Author, 1988 ed., pp. 63–64)

September 11 — The Chief of Naval Intelligence requires naval attachés to forward information on Soviet rocket research and operations including launches from submarines. (NARA, US Naval Intelligence files; Jan Aldrich)

September 11 — Jack Northrop grounds the XB-35, which has suffered gearbox and propeller control problems, until the Army Air Force can fix its propulsion system. (Wikipedia, “Northrop YB-35”)

September 11 — 2:00 p.m. Justin B. Rinaldi is standing in a friend’s backyard in Engle, New Mexico, when he hears a loud whirring sound and sees a black object whiz by. It is pointed at one end, has a narrow body, and what appear to be fins on the tail. It is traveling fast at an altitude of 75 feet. Rinaldi sees it hit a clump of trees at a ranch house and the “branches parted like a great force had struck.” He and friends go to the site but can find nothing. (“Flying Disc Tales Bring 2 Reports from Engle Area,” _Albuquerque Journal_, June 29, 1947, p. 1; Clark III 530)

Mid-September — Two luminous globes that shine “like an electric arc” are seen flying in a straight line over Longwy, Meurthe-et-Moselle, France. (Loren E. Gross, _UFO’s, a History: 1946, the Ghost Rockets_, The Author, 1988 ed., p. 66)

September 18 — Two greenish globes, one following close behind the other, zoom over Castanheira, Portugal. (Loren E. Gross, _UFO’s, a History: 1946, the Ghost Rockets_, The Author, 1988 ed., p. 67)

September 22 — 3:15 a.m. A rocket-shaped object is seen for 90 seconds over Florence, Italy. It makes an abrupt turn, then speeds south toward Rome. (Loren E. Gross, _UFO’s, a History: 1946, the Ghost Rockets_, The Author, 1988 ed., p. 69)

Fall — 9:00 p.m. Gladys McCage and her 4-year-old son see a yellowish-orange light coming from the northwest at a “terrific speed” toward their farm 8 miles north of O’Neill, Nebraska. Its color changes to red as it approaches, and soon it is hovering above the witnesses. They run toward the house and the cigar-shaped object swings up to the northeast. McCage says it is as big as a football field, has windows, and is making a loud noise. A yellowish-blue-green flame is shooting out near the back, and it is traveling too fast for any plane at the time. (Clark III 530)

October — Ray Palmer publishes a letter from Maurice Doreal (pseudonym of Claude D. Dodgin) of the Brotherhood of the White Temple in Denver, Colorado, regarding the “Shaver mystery.” Doreal claims intimate knowledge of the subterranean realms, which he claims are inhabited by the Black Brotherhood and protected by “space-warps.” In 1949 Doreal claims to have visited caves inside Mount Shasta, California, inhabited by Atlantean masters. He equates Shaver’s Dero with an evil group of Lemurians. (Walter Kafton-Minkel, Subterranean Worlds, Loompanics, 1989, pp. 154–160; Charmaine Ortega Getz, “The (Sort of) Amazing Story of Maurice Doreal and the Brotherhood of the White Temple Revealed at Last,” Weird Colorado, September 6, 2015)

October 1 — The US Military Attaché in London, England, writes a top-secret memo to the War Department complaining that the British “may not have given us all information on reported rockets over Scandinavia.” (Jan L. Aldrich, comp., The Ghost Rocket File, Fund for UFO Research, 2000, p. 73)

October 9 — Evening, George Adamski and some associates are watching a meteor shower associated with Comet 21P/Giacobini-Zinner when they see a “gigantic spacecraft” hovering above the mountain ridge south of Mount Palomar, California. He claims to meet a military officer a few weeks later who assures him that the object was indeed from another world. Others in San Diego see an object with a long, tube-shaped fuselage, giant wings, and two red lights. The medium Mark Probert later tells the press that he has established psychic communication with the occupants and the object is called the Kareeta. (“Sparks Fly As Comet Passes Earth,” Los Angeles Daily News, October 10, 1946, p. 3; Colin Bennett, Looking for Orthon, Paraview, 2001, pp. 28–29; Harold T. Wilkins, Flying Saucers on the Attack, Citadel, 1954, pp. 41–48; Curt Collins, “1946, Before Saucers, Kareeta: UFO Contact in California,” The Saucers That Time Forgot, August 8, 2017)

October 10 — 4:00 a.m. Waltraut Anlauf, a telephone operator in Friedland Refugee Camp, Lower Saxony, Germany, sees small, elongated flashes at a great height in the sky. They look like cigars and are luminescent white in front and bluish-white in back. She sees about 10 objects pass per minute. Sometimes there is an interruption of about 10 minutes, and then new groups appear. The sighting lasts one hour. Possibly these are part of the Taurid meteor shower. (Clark III 529)

October 10 — The defense staff in Sweden admits it cannot explain the ghost rockets because reports are too vague. About 80% appear to be meteors (“celestial phenomena”), although radar has tracked a few unusual targets. The report concludes that they are not V-type bombs. (“Swedish Inquiry Fails to Solve Rocket Case,” New York Times, October 11, 1946, p. 3; Loren E. Gross, UFO’s, a History: 1946, the Ghost Rockets, The Author, 1988 ed., pp. 71–72; Good Above, p. 23)

October 21 — Two persons on the shore of a lake in southern Sweden hear a whistling sound in the air, like a “flock of birds.” They see an object moving over the trees at a low altitude. It is dart-shaped and has short wings and a “ball-shaped tip.” It falls into the lake and possibly explodes on impact. (Loren E. Gross, UFO’s, a History: 1946, the Ghost Rockets, The Author, 1988 ed., p. 74)

November — The War Department issues a press release on how German scientists are helping out at Wright Field, Ohio. (Dolan, p. 12)

December 3 — The Swedish military reports that about 100 impacts were investigated by the Defense Research Institution and not found to be rockets. (Joel Carpenter, “Guided Missiles and UFOs: A Tangle of Fear, 1937–53, Part Three”)

December 10 — Gen. Curtis LeMay answers an inquiry from Assistant Secretary of War for Air Stuart Symington about establishing interim projects at the Air Materiel Center (AMC). LeMay’s answer: The Commander of AMC on his own volition may establish an interim project; however, to continue the project it must be approved for the next budget cycle. (Air Force Historical Research Agency, Maxwell AFB; Jan Aldrich, “Secret Twining Letter: ‘The Reported Phenomena Are Real,’” October 11, 2008)

December 23 — Jacobsson’s ghost rocket committee issues its final report on 987 ghost rocket cases, stating that 225 reports had been made in full daylight. More than 100 reports describe spool-shaped objects with or without wings. It concludes: “Despite the extensive effort, which has been carried out with the means available, and seven
months after the first observations, no actual proof that a test of rocket projectiles has taken place over Sweden has been found.” (Swords 26; Loren E. Gross, *UFO’s, a History: 1946, the Ghost Rockets*, The Author, 1988 ed., pp. 75–76; Anders Liljegren and Clas Svahn, “The Ghost Rockets,” *UFOs 1947–1987*, Fortean Tomes, 1987, p. 36)

1947

1947 — 11:00 p.m. Air Force pilot Edwin T. Yeoman is returning home with his wife Eva after going to a movie in Sacramento, California. As they drive northeast, they see a stationary light hovering at an altitude of 3,000–4,000 feet above Roseville. After watching it for 5 minutes, the light gets brighter, rises vertically for several thousand feet, makes an abrupt 90° turn, and shoots across the horizon from east to west. (CUFOS case file)

January 9 — The US Defense Department’s Intelligence Review, no. 49, contains a four-page summary of ghost rocket sightings and suggests some may have been Soviet test missiles or jet airplanes. (“Ghost Rockets over Scandinavia,” *Intelligence Review*, no. 49, January 9, 1947, US Department of Defense; Don Berliner, Marie Galbraith, and Antonio Huneues, *Unidentified Flying Objects Briefing Document*, UFO Research Coalition, December 1995, pp. 33–35)

January 16 — 11:30 p.m. An RAF Mosquito plane chases an unidentified target detected on radar at RAF Trimley Heath Radar Station [now closed] near Felixstowe, Suffolk, England, moving at a speed calculated to be faster than sound at an altitude of 38,000 feet over the North Sea, 50 miles north of the Netherlands acoast. It descends to 17,000 feet and takes controlled, evasive action. The plane pursues it for 40 minutes, even though the pilot cannot see it visually, until he loses it over the Norfolk coast. (UFOFiles2, p. 29; ClearIntent, p. 151; Sparks, p. 16; David Clarke, “Operation Charlie,” 2002; Martin L. Shough, “A New Study of the British ‘Ghost Airplanes’ of 1947,” April 2009)

January 17 — 11:37 p.m. After two unidentified targets similar to yesterday’s are reported by RAF Neatishead, northeast of Norwich, England, over the North Sea, another radar track enters the Eastern Sector area, and an RAF Mosquito piloted by Flight Lt. William Kent is scrambled to 18,000 feet. Kent attempts to close in, but his onboard radar is unable to keep it on track because the target is “jerking violently” and taking evasive action. After 20 minutes, the target descends below 2,000 feet and is lost from ground radar. Unofficially the radar operators give the intruder a name—Charlie—and when the Air Ministry later begins a concerted effort to solve the mystery, its code name is “Operation Charlie.” (Martin L. Shough, “A New Study of the British ‘Ghost Airplanes’ of 1947,” April 2009)

January 20 — In London, Ben Lockspeiser, chief scientist for the UK Ministry of Supply, after meeting with Swedish scientists and air force authorities, informs the American naval attaché in London, England, Cmdr. Jenkins, that the Swedes doubt the rockets are from Russia but prefer that the US and UK continue to think so. Natural phenomena and popular imagination are considered the causes. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 January 1st–June 23rd, Supplemental Notes*, The Author, 2000, pp. 3–5)

January 23 — Night. Three senior RAF officers are visiting RAF Neatishead in Norfolk, England, for an interception exercise when an unidentified radar target makes another appearance at 28,000 feet. RAF Mosquitos from Yorkshire are scrambled, but by the time the aircraft reach the area, the target is gone. (Martin L. Shough, “A New Study of the British ‘Ghost Airplanes’ of 1947,” April 2009)

January 27 — RAF Flying Officer Stewart of the Northern Signals Area, after investigating the Operation Charlie radar incidents at RAF Neatishead, England, issues a report, no longer extant, that suggests that some of the targets are radiosonde balloons released by the USAF’s 8th Weather Squadron in Downham Market, Norfolk. However,
RAF and Air Ministry sources continue to refer to the sightings as unexplained over the following months.  (Martin L. Shough, “A New Study of the British ‘Ghost Airplanes’ of 1947,” April 2009)

January 29 — Secretary of War Robert P. Patterson and Secretary of the Navy James V. Forrestal issue a memorandum that formally establishes the Armed Forces Special Weapons Project, a new agency to take over responsibility for the aspects of nuclear weapons that still remain under the military. It is to be jointly staffed by the Army and Navy. Los Alamos Laboratory’s ordnance engineering Z Division and AFSWP establish themselves at Sandia Base, New Mexico, bringing the strict secrecy that has prevails at Los Alamos. (Wikipedia, “Armed Forces Special Weapons Project”)

February 6 — Around 7:30 a.m., Frederick Walter Flavel and his wife Emma are walking to their house in Lock, South Australia, when they see five gray, oblong objects rise apparently from the sea and move from northwest to southeast. At 9:00 a.m., Ronald Ernest Ellis and two other railroad workers in Port Augusta, South Australia, watch five white or light-pink egg-shaped objects moving across the sky from north to south at about 6,000 feet. They quiver, cast shadows on the ground, and move out of sight in a few seconds. (NICAP, “Five Objects Cast Shadows”; Chris Aubeck and Martin Shough, Return to Magonia: Investigating UFOs in History, Anomalist, 2015, pp. 329–350)

February 8 — A US Navy Privateer bomber flying over Sweden picks up signals that might be directing rockets. (Letter from US Naval Forces Europe, London, to Chief of Naval Operations; Jan Aldrich)

February 17 — Capt. J. B. Pearson Jr., US naval attaché in London, England, sends an intelligence report to the Chief of Naval Intelligence about his conversation with Col. Westergard, head of the Airplane Design Section for the Swedish Air Ministry. Westergard tells him some 40% of the 1,000 ghost rocket sightings are “reliable.” They seem to originate in Peenemünde, Germany, and fly toward Finland. The best observation is from an artillery officer who sees an object in his optical range finder and follows it for about 90 seconds. It is in level flight at 4.5 miles distance and is about 36 feet long and torpedo shaped. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 January 1st–June 23rd, Supplemental Notes, The Author, 2000, p. 7)

February 28 — Capt. Emmet O’Beirne, Chief of the Defensive Air Branch, writes a memorandum to the chief of the USAF Office of Air Intelligence about the branch’s interview with H. W. Flickinger, vice president for exports at Republic Aircraft Corp. after his return from Sweden: “He stated that he had seen one of the Swedish ‘spook rockets’ in flight, which resembled the V-1 buzz bomb but was somewhat smaller. The noise of this missile was more that of a rocket than like a V-1.” (Jan Aldrich)

March 21 — A cigar-shaped object with smoke coming from its tail is seen flying from east to west at considerable height over southern Sweden by several witnesses. It looks metallic and is about 60 feet long, flying slowly. The object seems to turn around and fly back eastward briefly. (“Phantom Bomb Returns to Skies over Sweden,” New York Times, March 22, 1947, p. 8; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 January 1st–June 23rd, Supplemental Notes, The Author, 2000, p. 9)

April — The June 1947 issue of Amazing Stories is devoted in its entirety to “proofs” of Richard Shaver’s claims and includes four of his novels. Vincent Gaddis has written a prescient article on UFOs, titled “Visitors from the Void.” (David Halperin, “The Shaver Mystery—Richard Shaver, Ray Palmer, and the Quest for Lemuria (Part 2),” July 11, 2014; Richard S. Shaver, “Formula from the Underworld,” Amazing Stories 21, no. 6 (June 1947): 10–29; Vincent H. Gaddis, “Visitors from the Void,” Amazing Stories 21, no. 6 (June 1947): 159–161)

April — 11:00 a.m. US Weather Bureau meteorologist Walter A. Miniczewski watches a silvery disc through a theodolite while tracking a ceiling balloon in Richmond, Virginia. It is traveling east to west at less than 15,000 feet and has a flat bottom and a dome on top. (NICAP, “Silvery Disc Seen through Theodolite”; James E. McDonald, “Statement on Unidentified Flying Objects,” in Symposium on Unidentified Flying Objects, Hearings, US House Committee on Science and Aeronautics, 90th Cong., 2nd Sess., July 29, 1968, p. 62; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 January 1st–June 23rd, Supplemental Notes, The Author, 2000, pp. 17–21; Sparks, p. 16)

April 15 — The US Naval Attaché in Stockholm issues a secret intelligence report, “Sweden: Guided Missiles, Alleged Rockets over Sweden.” Both the naval and military attachés agree that there is nothing to the ghost rocket episode. No foreign missiles have overflown or landed in Sweden, according to the evidence a, vailable. “Swedish officials prefer to dismiss it as an unexplained press sensation.” (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 January 1st–June 23rd, Supplemental Notes, The Author, 2000, p. 16)

April 17 — Col. Oliver G. Haywood Jr. of the Atomic Energy Commission writes a memorandum to Harold A. Fidler at the Clinton Engineer Works in Oak Ridge, Tennessee, saying: “It is desired that no document be released which
May — 9:00 p.m. Harry Bentrup Jr. is on his porch in Jennings, Missouri, when a circular object surrounded by a ring of luminous green lights swoops in quickly from the east, hovers above him for 15 seconds, then takes off to the west. (MUFON case file)

May 1? — Mrs. W. C. Clark of Memphis, Tennessee, watches two objects “like tennis balls” fly over her yard. (“Three Memphians Say They Saw Objects,” Memphis (Tenn.) Commercial Appeal, July 7, 1947, p. 2)

May 1 — Rear Adm. Roscoe H. Hillenkoetter replaces Hoyt Vandenberg as Director of Central Intelligence. May 5 — Hillenkoetter writes to Baruch, saying that his CIRES plan is “on the verge of being put into effect.” (Jan Aldrich)

May 10 — Rose Slawuta of Newark, New Jersey, sees a shining, elliptical object with a gold band around it approaching from the west. (Newark (N.J.) Star-Ledger, July 7, 1947; Bloecher, p. I-2)

May 14 — 8:30 p.m. A spherical object 3-4 feet in diameter is seen over Budapest, Hungary, passing southeast to northwest at about 3,000 feet altitude in a flat trajectory. (Allied Control Commission for Hungary; George Mitrovic, The Gateways to the Gods, Kindle, 2012)

May 15 — 4:11 p.m. A Hermes test missile (V-2) at White Sands Proving Ground, New Mexico, goes off course and lands 6 miles east of Alamogordo five and a half minutes after launch. Commanding Officer Lt. Col. Harold R. Turner blames “peculiar phenomena” for the accident. The official explanation is that the V-2 had a defective fin. Trade consultant and former state representative Jon Andrew Kissner finds evidence in 1994 that possibly another object was seen in the vicinity of the rocket after the launch that might have been responsible for the failed test. (“V-2 Goes Astray, Lands in Six Miles of Alamogordo,” Las Cruces (N.Mex.) Sun-News, May 16, 1947, p. 1; Good Need, pp. 55–57; Wikipedia, “Hermes program”)

May 17 or 19 — 8:30 p.m. Byron B. Savage, an RCA field engineer, sees a frosty-white or silvery elliptical object about the size of a B-29 heading northwest at 10,000 feet over Oklahoma City, Oklahoma, at three times the speed of a jet (about 1,800 mph). As it noiselessly passes overhead, it appears to be circular. (NICAP, “Round and Flat Object Observed by Field Engineer”; Oklahoma City Times, June 26, 1947; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 January 1st–June 23rd, Supplemental Notes, The Author, 2000, pp. 27–28; Sparks, p. 16)

May 19 — Around 12:30 p.m. Navy veteran Dean A. Hauser and six other Pike’s Peak Railway workers (including Ted Weigand, Marion Hisshouse, T. J. Smith, L. D. Jamison) at Manitou Springs, Colorado, are taking a lunch break when they watch a silver object come in from the northwest, hover overhead, and gyrate at 1,000 feet. The UFO is moving “erratically in wide circles” and reflects light like it is made of metal. After 20 minutes it disappears in a straight line to the west-northwest. (“Manitou Vets Relate Story: Another ‘Disk’ Seen,” Denver Post, June 28, 1947, p. 1; Bloecher, p. I-1; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 January 1st–June 23rd, Supplemental Notes, The Author, 2000, pp. 29–30)

Late May — 11:00 a.m. Colden R. Battey, a physician from Augusta, Georgia, is fishing 10 miles off St. Helena Sound, near Beaufort, South Carolina. He notices a formation of four disc-like objects flying overhead in a southeasterly direction at a terrific rate of speed. The discs appear to be spinning on their axes and are at an estimated altitude of 20,000 feet. They are silvery and appear highly polished, and on their undersides Battey can see a circular rim or projection, about one-quarter of the way from the edges. No sound is heard as they fly overhead. The formation speeds out of view in less than 20 seconds. (NICAP, “Four Discs Flying Overhead”; Bloecher, p. I-2)

May 29 — 7:30 p.m. A Hermes II test missile (a modified V-2) is launched from White Sands Proving Ground in New Mexico to test the “Organ,” a series of ramjet air intakes designed to take pressure measurements. The missile travels south instead of north and lands in the Tepeyac Cemetery, 3 miles south of Juárez, Mexico, creating an
June — AMC civilian engineer W. R. Presley takes a muddy photo of a UFO at Oak Ridge, Tennessee. It is most likely a photographic flaw. (Hynek UFO Report, p. 142)

June 2 — Private pilot Forrest Wenyon is flying over Rehoboth Beach, Delaware, and sees a silvery, jar-shaped object cross in front of his plane. It has a silver-white, fiery exhaust. (NICAP, “Jar-Shaped Object Crosses in Front of Aircraft”; Bloecher, p. III-9; Sparks, p. 16)

June 9 — A still-unlocated air intelligence summary is released, alleging that the Soviets in eastern Siberia are producing (or may be able to produce) 1,400 (or 1,800) aircraft based on the Horten brothers’ VIII-type, low-aspect, disc-shaped design by 1952. A Russian aviation historian thinks that the factories in question are at the time producing copies of the German Messerschmidt Me 262 jet fighter. A correct, more detailed summary of the intelligence report is published in December 1948 in Air Intelligence Report Number 100-203-79, “Analysis of Flying Object Incidents in the U.S.” (Jan Aldrich)

June 10 — 3:30 p.m. Gyorik Ferenc and others on Arena Street [modern Dózsa György út] in Budapest, Hungary, watch four yellow-red discs moving toward the northwest in a straight-line formation for about 30 seconds. They are about 165 feet apart. The objects make a small arc around a corner of a park before disappearing. (Project Blue Book record; Joe Brill, “UFOs behind the Iron Curtain,” Skylook, no. 76, March 1974, p. 8)

June 12 — 6:15 p.m. Lovena Erickson sees two high-speed, round objects at a high altitude over Weiser, Idaho. They move up and down twice and leave a vapor trail that persists for more than an hour. (NICAP, “June 12, 1947, Weiser, Idaho”; Bloecher, p. II-8; Sparks, p. 17)

June 18 — Day. E. H. Sprinkle is one of a half-dozen Eugene, Oregon, residents who spot a formation of round objects “racing overhead” on a course to the northeast. Watching from Skinner’s Butte outside town. Sprinkle takes a snapshot of the objects with an inexpensive camera as they race over. Enlargements of the photograph show “seven dots” in a formation “shaped like an X or a Y, lined up across the sky.” Newspaper photographers say the dots “might be a fault in the developing process” that sometimes appears on a negative that has not been agitated properly in the developer. (“Local Man Asserts Flights Seen Here,” Eugene (Oreg.) Guard, June 26, 1947, p. 1; Bloecher, p. IV-3)

June 19 — Maj. Gen. Stephen Chamberlin, head of War Department Intelligence, authorizes three electronic signals intelligence flights between July 1 and August 1 to look for radio signals over the Baltic Sea. The Swedish military is told that they are training flights. (Jan Aldrich)

June 21 — 11:55 a.m. Guy R. Overman watches several silvery objects moving below a plane at Spokane, Washington. (NICAP, “Eight Disc-Shaped Objects As Big As a House”; Bloecher, p. II-18; Sparks, p. 17)

June 21 — Log salvager Harold A. Dahl is patrolling east of Maury Island, Washington, with his 15-year-old son Charles and two crewmen when he allegedly sees six doughnut-shaped objects. Five of them are circling the sixth, which seems distressed. When it is directly above the boat at 500 feet, it supposedly spews some hot slag-like material that breaks Charles’s arm and kills his dog. Dahl claims he filmed the objects. (Clark III 721; John A. Keel, “The Maury Island Caper,” UFOs 1947–1987, Fortean Tomes, 1987, pp. 40–43)

June 22 — Dahl claims he is visited by a mysterious dark-suited man who knows all about the sighting. He tells his associate Fred L. Crisman, and they allegedly go to the beach to pick up fragments. Dahl mails Ray Palmer in Chicago, Illinois, some fragments. (Clark III 721; Kenn Thomas, Maury Island UFO: The Crisman Conspiracy, IllumiNet, 1999; Charlotte LeFevre and Philip Lipson, “The Maury Island UFO Incident,” February 2014)

June 22 — Edward Louis DeRose in Greenfield, Massachusetts, sees a small, round-shaped, silvery-white object moving in a northwesterly direction faster than a speeding plane at an estimated altitude of 1,000 feet. The object stays in view for 8–10 seconds until obscured by a cloud bank. It reflects the sunlight strongly as if is made of polished aluminum or silver. (Air Force Base Intelligence Report, “Flying Discs,” July 30, 1947; Kevin D. Randle, “Roswell, Nathan Twining, and the Mini-EOTS,” A Different Perspective, October 6, 2014)
June 24 — 3:30 p.m. G. Oliver Dickson sees a shiny disc “a little like a blimp” flying north to south about 3,000 feet above Mount Franklin just north of El Paso, Texas. He estimates it is about 40 feet across and 5 feet thick. (More El Pasans Report Seeing ‘Flying Discs’ in Southwest,” El Paso (Tex.) Times, June 29, 1947, pp. 1–2)

June 22 — Evening. Yale University astrophysicist Lyman Spitzer is speaking on WTIC radio in Hartford, Connecticut, and speculates that if life on Mars developed a bit earlier than on earth, it is possible that Martians have been civilized for millions of years. “Unless they had spent some time in a large city or had landed sufficiently recently to be photographed, we would have no record of their being here,” he says, and that “any few men who had seen them would probably not be believed by anyone else.” (“Mars May Be Populated, Says Yale Speaker,” Hartford (Conn.) Courant, June 23, 1947, p. 1; Clark III 455)

June 23 — Afternoon. Disabled stunt pilot Richard Rankin views 10 flat, circular objects flying in a V-formation over his house in Bakersfield, California. About two hours later, 7 of the objects are seen flying in the opposite direction. (Bloecher, p. II-3; Sparks, p. 17; Kevin D. Randle, “More Pre-Arnold UFO Sightings,” A Different Perspective, June 30, 2013)

June 23 — 9:30 p.m. Richard L. Bitters and his wife Martha are returning from a movie in Wapakoneta, Ohio, when they see a saucer-like object flying an uneven course in the sky. (“Saucer Just Didn’t Fit Editor’s Idea of a ‘Scoop,’” Madison Wisconsin State Journal, July 7, 1947, p. 2; Bloecher, p. III-6)

June 24 (or 30) — Afternoon. Bill Schuening, a farmer, is driving his pickup truck down a remote rural road 25 miles north of Pendleton, Oregon, when he hears a loud humming sound. Coming over a rise, he sees in a nearby field a large disc-shaped object hovering 5–6 feet off the ground. He can also see two short (3 feet tall) figures wearing green suits and white helmets standing underneath the object. The figures suddenly vanish, and the craft then shoots towards the Columbia River, makes a big circle, and flies towards the mountains. (NICAP, “Man Sees Figures Standing near Disc”; Clark III 267; Patrick Gross, URECAT, November 7, 2018)

June 24 — 1:50 p.m. Railroad engineer Charles Kastl sees 9 or 10 spinning discs in the air about 12 miles east of Joliet, Illinois. They are a string of flat circular objects “going faster than anything I’ve ever seen.” Kastl can see no connecting link between them, but they act as though the leading disc has a motor in it to power the others, because when it flips, the others do as well. When it rights itself, the others also right themselves. (“Flying Discs Seen by Railroad Man,” Cedar Rapids (Iowa) Gazette, June 28, 1947, p. 2; Schopick, pp. 1–2; NICAP, “Engineer Reports 10 Shiny Flat Discs”; Kevin D. Randle, “The June 23, 1947 UFO Sighting,” A Different Perspective, March 20, 2013)

June 24 — 3:30 p.m. Idaho Lieutenant Governor Donald S. Whitehead and Justice of the Peace Jacob M. Lampert see an object with a brilliant head and a smoky tail from an office window in downtown Boise, Idaho. It dips from view after about 20 minutes. (“Whitehead, Lampert, Join ‘Disc List,’” Boise Idaho Statesman, July 3, 1947, p. 9; Bloecher, pp. III-18–19)

June 24 — Afternoon. Fred M. Johnson, a prospector in the Mount Adams, Oregon, area, sees 5-6 oval objects with tails about 30 feet in diameter. He watches one through a telescope. They are not flying in any sort of formation and as they bank in a turn, the sunlight flashes off them. As they approach, Johnson notices that his compass begins to spin wildly. When the objects finally vanish in the distance, the compass returns to normal. Johnson’s report is the very first “unidentified” case in the Project Sign files. (NICAP, “Prospector Compass Incident”; Bloecher, p. IV-3; Clark III 170–171; Bruce Maccabee, “The Arnold Phenomenon: Part Three,” IUR 20, no. 3 (May/June 1995): 6–7; Martin Shough, “The Singular Adventure of Mr. Kenneth Arnold,” June 2010, pp. 106, 109–110; Randle, Levelland, 2021, pp. 58–59)

June 25 — Shortly after 12:00 noon. W. I. Davenport is working on the roof of a house at 82nd Street and Holmes Road in Kansas City, Missouri, when he hears the sound of a motor. Looking up, he sees 9 objects approaching from the east. They are aluminum-colored and leave vapor trails. (“Puzzle in Sky Whiz,” Kansas City (Mo.) Star, June 26, 1947, p. 6)

June 26 — 2:00 a.m. Mrs. J. Harrison watches a large fireball pass toward the northwest from her residence at 4639 South Oakenwald, Chicago, Illinois. It breaks up into two dozen small discs that whirl around rapidly. (“Dr. Urey Scoffs at ‘Atom Angle’ to Flying Disks,” Chicago Tribune, July 6, 1947, p. 8)

June 26 — Northrop delivers a second four-engine XB-35 flying wing aircraft to Muroc AFB [now Edwards AFB], California. (Wikipedia, “Northrop YB-35”)

June 27 — 9:50 a.m. Mrs. W. B. Cummings is driving about 5 miles southeast of San Antonio, New Mexico, when she sees a bright silver object descending quickly in the east. It leaves a short white trail. White Sands officials say there has been no missile testing since June 12. (“More El Pasoans Report Seeing ‘Flying Discs’ in Southwest,” El Paso (Tex.) Times, June 29, 1947, p. 1)

June 27 — Pentagon Army AF Public Relations Officer Capt. Tom Brown says the army has no idea what the discs are. (Loren E. Gross, UFOs, a History: Volume 1, 1947, The Author, February 1991, p. 16)

June 27 — In a United Press dispatch from Pendleton, Oregon, Kenneth Arnold expresses frustration over the furor that his saucer sighting has caused. A preacher has called him from Texas to say that the flying discs are “harbinger of doomsday.” A woman recognizes Arnold in a Pendleton café and runs out shrieking that he is “the man who saw the men from Mars.” He says the whole thing has gotten out of hand: “Half the people I see look at me as a combination Einstein, Flash Gordon, and screwball. I wonder what my wife back in Idaho thinks.” (“Report of ‘Flying Saucers’ Causes Furor; Texas Preacher Calls Flock for World’s End,” Medford (Oreg.) Mail Tribune, June 27, 1947, p. 1)

June 27 — Day. Capt. Robert D. Dwan, a pilot out of Alamogordo Army Air Field [now Holloman AFB], New Mexico, is flying a private plane near Engle, New Mexico, at 3,000 feet, when he looks down and sees a “ball of fire, with a fiery blue tail behind it.” The object is about 2,000 feet below him, and he is “certain it is a meteorite.” The object disintegrates as he watches it. (Bloecher, pp. III-9–10)

June 27 — Afternoon. Clyde Homan sees two groups of loosely bunched objects, rocking back and forth as they fly noiselessly above Woodland, Washington. The objects are bright, flat, and moving at an estimated 600 mph. (Bloecher, pp. II-1–2)
June 28 — 1:15 p.m. Lieut. Eric B. Armstrong, flying an F-51 at 6,000 feet 30 miles north of Lake Mead, Nevada, sees a formation of 5–6 objects streak by his plane. They are in close formation at an estimated speed of 285 mph. (NICAP, “Formation of 5–6 Objects Head toward P-51”; Bloecher, p. III-10; Sparks, p. 17)

June 28 — 9:20 p.m. Two pilots and two intelligence officers (Capt. Wilson H. Kayko, Capt. John H. Cantrell, 1st Lt. Theodore Dewey, and Capt. Redman) at Maxwell Field [now Maxwell AFB] in Montgomery, Alabama, see a bright light zigzagging across the sky for 25 minutes. When it is directly overhead, the UFO makes a sharp 90° turn and disappears to the south. (NICAP, “Object Zig-Zags with Bursts of Speed”; Bloecher, p. III-3; Sparks, p. 18)

June 29 — 1:15 p.m. Carl J. Zohn, a guided missile expert with the Naval Research Laboratory, is 20 miles east-northeast of Las Cruces, New Mexico, to observe a V-2 rocket launch scheduled for July 3. Between 1:00 and 1:30 p.m., he is riding out to the testing grounds with John R. Kauke and NRL scientist Curtis C. Rockwood (and his wife Nancy) when they see a silvery disc flying at 8,000–10,000 feet. It has no appendages, wings, tail, or propellers. After about 60 seconds it disappears. (NICAP, “Naval Research Lab Rocket Scientists See Silver Discs”; Bloecher, p. III-18; Sparks, p. 18; Evelyne Tsezana, “Grandpa Zohn Saw UFOs in New Mexico,” Geni, April 6, 2011)

June 30 — 9:10 a.m. Naval Lt. William G. McGinty is flying a P-80 from Williams AFB [now Phoenix-Mesa Gateway Airport], Arizona, near the Grand Canyon when he observes two circular objects diving at inconceivable speed and landing 25 miles south of the canyon. (NICAP, “P-80 Pilot Sees Circular Objects Dive and Land”; Bloecher, p. II-12; Sparks, p. 18)

June 30 — Around this time the Air Force Research and Development office of the Air Materiel Command organizes an informal project at Wright Field in Dayton, Ohio, to collect UFO reports in the interests of national security. The project officer at Wright Field is Lt. Col. Edward G. Nabell Jr. (Sparks, p. 13)

Summer — Naval Cmdr. L. H. Witherspoon sees a disc-shaped UFO flash over the airport at Pittsburg, Kansas. (UFOEv, p. 30)

Early July — A cyclist near Amfreville-la-Mi-Voie, Seine-Maritime, France, encounters an oval object, 10 feet long and 5 feet high, resting on the road 100 feet in front of her. Two small beings dressed in outfits and headgear are busy around it. When she honks her horn, the entities scurry into the object, entering it through a 20-inch opening. The UFO rises, oscillates, and streaks away. (Clark III 267; Patrick Gross, URECAT, August 81, 2006)

July 1 — Day. Animal ecologist Charles K. Gunn, his wife, and two passengers are driving near North Bedeque, Prince Edward Island, when they see a bright, shapeless object speeding along in the sky for 30 seconds. (Bloecher, p. III-18)

July 1 — A target is picked up on radar at Chitose Air Base, Hokkaido, Japan, moving 16 miles north at speeds in excess of 500 mph. The blip instantly reverses course four times, breaks into two objects, then merges into one again. (Col. James F. Olive Jr., “Radar Pick-Ups of High-Speed Targets in the Far East,” Memorandum for Assistant Chief of Air Staff, Washington, D.C., September 26, 1947)

July 1 — Col. Alfred Kalberer holds another press conference in Fort Worth, Texas, and brings astronomer Oscar Monnig along to comment that the discs are “an interesting study in human psychology.” (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 June 24th–July 6th, Supplemental Notes, The Author, 2000, pp. 23–24)

July 1 — 10:10 p.m. Meteorologist Ellwood E. Unger and his wife watch a round, orange, luminous object going about 100 mph after they leave a movie theater in Louisville, Kentucky. (Bloecher, p. III-2; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 June 24th–July 6th, Supplemental Notes, The Author, 2000, p. 23)

July 1? — 11:00 p.m. Mrs. A. M. King is with another passenger on the deck of the Union-Castle Mail SS Llandovery Castle as it is steaming through the Mozambique Channel. They notice a star-like object traveling fast toward the ship. It shines a strong beam of light on the water within 150 feet of the ship, then descends, the beam shortening and becoming brighter as it nears the water. Soon the light switches off and they can see a metallic object that looks like a cigar with the end cut off. It remains about 20 feet above the sea, moving parallel with the ship. King
estimates it is about four times the length of the ship and four times as tall. After a few seconds, a large flame erupts from the rear of the object. It vanishes soundlessly in the darkness. (Lorenzen, FS Hoax, pp. 18–19)

July 1–3? — According to Annie Jacobsen’s informant, EG&G engineer Alfred O’Donnell, the upcoming Roswell, New Mexico, crashes are the result of a psychological warfare operation by Soviet leader Joseph Stalin to fly into US airspace two disc- or wing-shaped aircraft based on a Horton brothers design obtained at the end of World War II. One craft allegedly contains living dwarves or children (human guinea pigs) who had been surgically altered using similar methods to those used in Auschwitz concentration camp by Nazi doctor Josef Mengele. This aircraft is remotely controlled by the crew of the second craft. The idea is to land the first aircraft in a visible location in the US, perhaps in Washington, D.C. The children would exit the craft and present themselves to the highest echelons of the government. However, the two aircraft crash in the New Mexico desert and, he claims, the Atomic Energy Commission is put in charge of the remains. (Jacobsen, Area 51, pp. 367–374; Kremlin 30–36)

July 2 — 8:00 p.m. Spectators at a baseball game at the Cincinnati (Ohio) Milling Machine Company watch two slow-moving discs hovering above the field for 10 minutes. (“100 at Ball Game Tell of Seeing Two Mystery Saucers,” Cincinnati (Ohio) Post, July 7, 1947, p. 1)

July 2 — 9:50 p.m. Mr. and Mrs. Dan Wilmot see an oval object like two inverted saucers pass over their house moving northwest in Roswell, New Mexico. (Sparks, p. 19; Kevin D. Randle and Donald R. Schmitt, The Truth about the UFO Crash at Roswell, Evans, 1994, p. 159; Kevin D. Randle and Donald R. Schmitt, “When and Where Did the Roswell Object Crash?” IUR 19, no. 1 (Jan./Feb. 1994): 13–14)

July 3 — 8:55 a.m. William F. LeFevre watches a shiny, mirror-like disc zoom over River Drive near West 8th Street in Denver, Colorado, at several thousand feet and make a 45° turn before vanishing toward the southwest. (Denver Post, July 5, 1947; Michael David Hall and Wendy Ann Connors, Alfred Loedding and the Great Flying Saucer Wave of 1947, Rose Press, 1998, p. 44)

July 3 — Morning. Project Mogul Flight number 8, a cluster of plastic balloons, is launched from Holloman AFB, New Mexico. (Kevin D. Randle, “The Project Mogul Flights and Roswell,” IUR 19, no. 6 (Nov./Dec. 1994): 6–7, 23)

July 3 — The St. Louis Post-Dispatch reports that the Air Research Center at Wright Field, Ohio, and the army intelligence service are looking into the flying discs. An INS dispatch states that Commander of the Army Air Force Gen. Carl Spaatz has asked Wright Field to look into such reports. Air Materiel Command’s Lt. Gen. Nathan F. Twining tells Idaho Evening Statesman reporter David N. Johnson that officials are indeed looking into the discs and that Wright Field has no comparable technology. Lieut. William C. Anderson, Wright Field public relations officer, says there is no confirmation that the discs exist. Maj. Paul Gaynor says the Army Air Force needs more concrete information. German scientists working at Wright Field are asked about the discs, but they say they have heard nothing about any such experiments in Europe. (“Army Gets Around to Checking ‘Flying Discs’ and Is Mystified,” St. Louis Post-Dispatch, July 3, 1947, p. 1; Dave Johnson, “AAF Investigates Reports of Mysterious Air Objects,” Boise Idaho Daily Statesman, July 3, 1947, pp. 1, 9; “Military Says ‘No Results’ in Disc Probe,” Boise Idaho Daily Statesman, July 4, 1947, p. 2; “Weird ‘Flying Saucers’ Seen over 10 States,” New York Daily News, July 4, 1947, Final ed., p. 8)

July 3 — 5:45 p.m. Farmer Ewen McNeill in Village Green, east of Charlottetown, Prince Edward Island, sees a black, rocket-shaped projectile trailing a blindingly white flame and a smoke trail pass overhead as he is working his fields. It seems to be flying at 10,000 feet and is visible for 15 seconds. Around the same time, a resident of Augustine Cove watches an “object the size of an apple” traveling south at high speed. (Bloecher, p. II-17; Chris Rutkowski, Canada’s UFOs: Declassified, August Night, 2022, p. 64)
July 3 — 6:30 p.m. Mrs. Walter Johnson and her family see 8–9 discs flying out of the southern sky 6 miles west of Saint Maries, Idaho, over the St. Joe River. The objects came in “very fast, slow down jerkily, then flutter to the ground like leaves.” Mrs. Johnson thinks the objects are about the size of a “five-room house.” When they reach a clearing in the timber, they appear to “settle Down” a few at a time. Mrs. Johnson reports the sighting to intelligence officers at the Spokane Army Air Base [now Fairchild AFB], and an intensive air search is carried out by two missions of the National Guard’s 116th Fighter Group. Local sheriff’s deputies also make a ground search, but no traces of alanding can be found. (“Saucer’ Reports Increase As Sky Is Searched in Vain,” Spokane (Wash.) Spokesman-Review, July 7, 1947, pp. 1, 6; “Dishman Residents Saw ‘Flying Saucers’ Land,” Spokane (Wash.) Spokesman-Review, July 7, 1947, p. 6; Bloecher, p. II-12)

July 3 — 7:30 p.m. Project Mogul Flight number 9, a cluster of plastic balloons, is launched from Holloman AFB, New Mexico. (Kevin D. Randle, “The Project Mogul Flights and Roswell,” IUR 19, no. 6 (Nov./Dec. 1994): 6–7, 23)

July 4 — 3:00 a.m. Lenora Woodruff wakes up in her home at 184 S. Arlington Avenue, East Orange, New Jersey, when several airplanes fly overhead. She looks out and sees a “strange goldenish platter” moving swiftly across the sky. It disappears in a second. (“South Plainfield Woman Reports Seeing ‘Flying Saucer’ Formation,” Bridgewater (N.J.) Courier-News, July 5, 1947, p.1)

July 4 — After 4:00 a.m. Mrs. Martin Kole is awakened in her home in Alexandria, Virginia, by something shining through her bedroom window. She sees a large, round object hovering in the southwestern sky. She watches it for a few minutes, then goes back to bed. (Bloecher, p. II-6)

July 4 — The United Press service rounds up theories about the flying discs. It quotes Army Air Force “experts” saying that the sightings might be caused by weather conditions, or meteors, or foreign aircraft that it “our responsibility to know about it and take proper action.” Occultist Ole J. Sneide from San Francisco, California, thinks they are “oblate spheroid space ships from other planets” with hidden bases on the dark side of the moon. This is apparently the first public mention of an extraterrestrial origin for flying saucers in the media. (“U.S. Stops ‘Laughing Off’ Stories of Flying Disks,” Hollywood (Calif.) Citizen-News, July 3, 1947, p. 1; “Flying Disks Said ‘Space Ships’ from Other Solar Systems,” Bryan (Tex.) Eagle, July 3, 1947, p. 8; “Buck Rogers Special,” Santa Rosa (Calif.) Press Democrat, July 4, 1947, p. 2; Curt Collins, “A 1947 Pioneer of the UFO Extraterrestrial Hypothesis,” The Saucers That Time Forgot, December 16, 2021)

July 4 — 10:30 a.m. CAA official Irving C. Allen is flying a small aircraft near Moscow, Idaho, when he sees a white disc moving north for 5 minutes as it crosses his path several miles in front of him. (Bloecher, p. III-10)

July 4 — 11:00 a.m. C. J. Bogne and other witnesses in a car near Redmond, Oregon, see four discs flying past Mt. Jefferson on a straight course at high speed. (Ruppelt, p. 20; Bloecher, p. II-9; Sparks, p. 19)

July 4 — 11:00 a.m. Harry Hale, production manager of the Portland Oregonian, sees one shiny disc moving swiftly just west of Beaverton, Oregon. (“Air Liner Crew Confirms Flying Disks over State; Many Seen during Day over City,” Portland Oregonian, July 5, 1947; Project 1947, “UFO Reports, 1947”)

July 4 — 1:05–5:30 p.m. Many people in Portland, Oregon—including KOIN newsmen Frank Cooley, deputy Clark County Sheriff Fred Krives, Portland police officer Kenneth A. McDowell, and Oregon highway patrol Sgt. Claude Cross—view five large discs moving at high speed to the east, two flying south and three to the east, with an oscillating or wobbling motion, sudden 90° turns or zigzagging. Radio reports alert other officers (including Walter Lissy, Robert Ellis, and Earl Patterson, all WWII veterans) who see the metallic objects that look like a disc or hubcap or pie-pan or half-moon-shadow in the sun. No vapor trail or noise (except possible humming) is reported. (NICAP, “Seven Discs Observed by Many Witnesses”; Bloecher, pp. II-9, III-15; Sparks, p. 20; “Air Liner Crew Confirms Flying Discs over State; Many Seen during Day over City,” Portland Oregonian, July 5, 1947; Project 1947, “UFO Reports, 1947”; James E. McDonald, “Statement on Unidentified Flying Objects,” in Symposium on Unidentified Flying Objects, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, p. 58; Michael David Hall and Wendy Ann Connors, “Alfred Loeding: New Insight on the Man behind Project Sign,” IUR 23, no. 4 (Winter 1998): 5)

July 4 — 2:50 p.m. Seven people at Twin Falls Park, seven miles east of Twin Falls, Idaho, watch a group of discs in a rough V-formation flying at great speed. A second flight of 9–10 objects circle overhead in a loose formation. They gain altitude rapidly and move to the west. ("Flying Saucer Mystery Grows," Tucson (Ariz.) Daily Citizen, July 5, 1947, p. 4; Bloecher, p. II-5)

July 4 — 5:00 p.m. Nova Hart and his wife Marveline are picnicking off Old Saint Charles Road west of Pattonville, Missouri. They see a saucer-shaped object, ribbed like a “parachute canopy,” gliding slowly (50–60 mph) and silently from south to north about 300 feet off the ground. It seems to have a propeller attached to a red conical structure on its underside and is about 20–25 feet in diameter. (Bloecher, p. II-14)

July 4 — After 5:00 p.m. Private pilot Dan Whelan and passenger Duncan Underhill are flying at 5,000 feet west of Long Beach, California, when they see a disc about 2,000 feet above them, traveling at 400–500 mph. They estimate it
is 40–50 feet in diameter and flying north-northwest. (“Air Disc’ Mystery Grows, Baffles U.S.,” Hollywood (Calif.) Citizen-News, July 5, 1947, pp. 1, 3; Bloecher, p. III-10)

July 4 — 6:30 p.m. United Press correspondent John C. Corlett, along with artist V. H. Selby and their wives, see a white disc speeding over Boise, Idaho, at an altitude of about 10,000 feet. It takes about 3 seconds to disappear. (“View of ‘Flying Saucers’ over Ontario Dumbfounds Veteran Pilot, Other Crew Member of Airliner,” Portland Oregonian, July 5, 1947; Project 1947, “UFO Reports, 1947”)

July 4 — 7:00 p.m. George Aster and others at Hauser Lake, Idaho, watch a flying disc for 30 minutes as it hovers with a lateral oscillation about 30° above the horizon at an estimated 20,000 feet. It shoots straight up and vanishes when a small aircraft approaches it. (“Disks Seen Here Today, Is Report,” Spokane (Wash,) Spokesman-Review, July 7, 1947, p. 1; Bloecher, pp. II-6–7)

July 4 — Sunset. Henry Seay, a farmer living 2 miles north of Fayetteville, Arkansas, watches three yellow discs flying overhead to the southwest, dropping sparks, and frightening his cattle and horses. The following night it happens again and the cows go into a panic, running off to the other side of the pasture. Some kind of dust falls on Seay, although it does not burn. After several seconds, the object rises up vertically 30–40 feet and shoots off horizontally at 50 mph. (Bloecher, p. IV-1)

July 4 — Sunset. M. K. Leisy, a junior intern at the Institute of the Pennsylvania Hospital at 44th and Market streets in Philadelphia, is reading on the porch of the hospital when he hears a loud roar. A large transport plane passes overhead, but he also sees a dark sphere with a luminous halo around it moving below the clouds at a moderate speed. It disappears into the clouds. (“Flying Discs Seen over City,” Philadelphia Inquirer, July 5, 1947, pp. 1, 3; Bloecher, pp. II-14–15)

July 4 — The first of the special flights from Washington, D.C., arrives at Roswell Army Air Field [now closed], New Mexico (presumably to investigate the radar reports claimed by Frank Kaufmann). On the plane is Warrant Officer Robert Thomas. Thomas and his companions are in uniform upon arrival, but quickly change to civilian clothes. Thomas wants an on-site briefing as soon as it can be arranged. These men remain at RAAF throughout the later retrieval. (Kevin D. Randle and Donald R. Schmitt, The Truth about the UFO Crash at Roswell, Evans, 1994, pp. 160–161)

July 4 — During a thunderstorm near Corona, New Mexico, W. W. “Mack” Brazel hears a tremendous thunderclap that sounds like an explosion but is somehow different from the rest of the thunder. Others in the area report the same phenomenon. (Kevin D. Randle and Donald R. Schmitt, The Truth about the UFO Crash at Roswell, Evans, 1994, p. 160)

July 4 — 11:27 p.m. Army Signal Corps radar sites in southern New Mexico supposedly continue to track a mysterious object. Kirtland AFB’s commander scrambles a fighter jet piloted by Kenny Chandler to locate the object, but he cannot find it. Before midnight, Frank Kaufmann allegedly sees a brilliant glow on the radar display, pulsates a number of times, then explodes in a starburst. The belief is that the object has now crashed. Jim Ragsdale and “Trudy Truelove” supposedly see a bright flash of light and hear a roaring sound that passes overhead. Ragsdale knows that something has struck the ground close to their campsite. (Kevin D. Randle and Donald R. Schmitt, The Truth about the UFO Crash at Roswell, Evans, 1994, p. 160; Jacobsen, Area 51, p. 36; Kevin D. Randle and Donald R. Schmitt, “When and Where Did the Roswell Object Crash?” IUR 19, no. 1 (Jan./Feb. 1994): 14; Kevin

July 5 — 5:00 a.m. Archaeologists, including William Curry Holden, working the sites around Roswell, New Mexico, stumble across an impact site where an object has crashed. One of them heads to the closest phone to tell Sheriff George A. Wilcox of the discovery of the remains of a crashed aircraft of some kind. Wilcox calls the local fire department to alert them about the crash. One truck, with Dan Dwyer on it, responds to the call. The site is about 35–40 miles north of Roswell. The Roswell Fire Department, escorted by members of the Roswell Police Department, makes a run along Pine Lodge Road northwest of Roswell. They are among the first civilians to stumble across the impact site. (Kevin D. Randle and Donald R. Schmitt, The Truth about the UFO Crash at Roswell, Evans, 1994, pp. 33–36; Thomas J. Carey, “The Search for the Roswell Archaeologists: Casting the Net,” IUR 18, no. 6 (Nov./Dec. 1993): 3–8, 23–24; Thomas J. Carey, “The Continuing Search for the Roswell Archaeologists: Closing the Circle,” IUR 19, no. 1 (Jan./Feb. 1994): 4–12; Kevin D. Randle and Anthony Bragalia, “Two Roswell Witnesses, Reconsidered,” IUR 32, no. 3 (July 2009): 6–8, 24)

July 5 — 5:01 a.m. Project Mogul Flight number 10, a cluster of plastic balloons, is launched from Holloman AFB, New Mexico. (Kevin D. Randle, “The Project Mogul Flights and Roswell,” IUR 19, no. 6 (Nov./Dec. 1994): 6–7, 23)

July 5 — 5:30 a.m. According to discredited Roswell witness Frank Kaufmann, a small contingent of men from Roswell Army Air Field in New Mexico drive north on what is now US Highway 285. Near mile marker 132, they turn off the road and began driving across the desert, stopping from time to time to cut the barbed-wire fencing. They discover a heel-shaped craft measuring about 25 feet long and 12 feet wide embedded in a cliff. The soldiers find civilians on the site already. Besides the archaeologists, a local man named Larry Campbell (later called Jack Armstrong or Cactus Jack) also claims to have been there. They escort them off while others secure the area. Five bodies are allegedly found on the site. The impact site is cleaned and secured by 11:30 a.m. Annie Jacobsen has interviewed Alfred O’Donnell, later an engineer at EG&G, who tells her that one of the objects crashed and was recovered by the Joint Chiefs, including the airframe, propulsion equipment, and the power plant. It has no wings or tail. The fuselage is round and there is a dome on top. Inside there are Cyrillic letters stamped or embossed in a ring running around the inside. Army intelligence officers suspect that the craft is the brainchild of German airplane engineers, Walter and Reimar Horten, working for the Russian military. A frantic search to find what happened to the brothers allegedly takes place; informants like Austrian physicist Adolf Smekal of Frankfurt, Germany, provide leads, with confusing results for several months. (Kevin D. Randle and Donald R. Schmitt, The Truth about the UFO Crash at Roswell, Evans, 1994, p. 161; Thomas J. Carey, “The Strange Saga of ‘Cactus Jack,’” IUR 22, no. 1 (Spring 1997): 3–11; Jim Wilson, “Roswell Plus 50,” Popular Mechanics 174 (July 1997): 48–53; Jacobsen, Area 51, pp. 36–40)

July 5 — 10:00 a.m. W/O Robert Thomas and his crew proceed to the impact site. The bodies, originally covered by sheets, are now in lead-lined body bags. Only those with the highest clearance are allowed close to the center of the impact. Guards are posted, facing out, to keep the curious away. According to researcher Kathy Kasten, the dead bodies are taken to Roswell Army Air Field, but one is still alive and taken to Fort Stanton [now closed] in Lincoln, New Mexico, whose Marine Hospital was used to confine troublesome German and Japanese detainees during World War II. Allegedly, aerospace physician William Randolph Lovelace II travels there from Albuquerque to examine the survivor, who reportedly dies one week later and is buried in the Fort Stanton cemetery. (Kevin D. Randle and Donald R. Schmitt, The Truth about the UFO Crash at Roswell, Evans, 1994, p. 161; Nick Redfern, The Roswell UFO Conspiracy, Lisa Hagan, 2017, pp. 204–221)

July 5 — Following the rain the night before, Brazel inspects the pastures surrounding the J. B. Foster ranch house southeast of Corona, New Mexico. Riding with him is the young son of the Proctors, William D. Proctor. During the inspection, Brazel discovers a large debris field. Scattered on the slopes and into the sinkhole and depressions are plastic-like beams, pieces of lightweight balsawood-like material only stronger, light metallic foil (which doesn’t stay bent or folded, resumes its original shape, and won’t tear), and heavy-gauge monofilament. The debris is thick enough that the sheep refuse to cross the field and are driven around it to water more than a mile away. Brazel, taking a few scraps of the material, heads to the home of his closest neighbors, Floyd and Loretta Proctor. He shows them “a little sliver” of material that he can neither burn nor cut. Some of the beams have

July 5 — 2:30 p.m. Automobile dealer Kjell Qvale and dozens of others see a triangular formation of silvery discs flying south near Auburn, California. They appear directly overhead and are in view for 3–4 minutes, disappearing one at a time, but not over the horizon. (“Skeptical Experts Call Disc Reports ‘Mass Illusion,’” San Francisco Examiner, July 8, 1947, p. 1; Bloecher, p. II-5)

July 5 — Later that evening, Brazel removes the large, circular piece of the debris from the range. Brazel either loads it into the back of his truck or drags it along behind. He stores it in a livestock shed about three miles north of the crash site. (Kevin D. Randle and Donald R. Schmitt, The Truth about the UFO Crash at Roswell, Evans, 1994, p. 163)

July 6 — Brazel gets up early, completes his chores, and then drives into Roswell, New Mexico, about 75 miles away. He stops at the office of Sheriff George A. Wilcox. Contrary to published reports, Wilcox is excited about the find and suggests the military at the Roswell Army Air Field [now closed] be notified. While waiting for the military officers to arrive, Wilcox dispatches two of his deputies to the ranch. They have only the directions given by Brazel, but both men are familiar with the territory; and Wilcox believes they will be able to find the debris field. KGFL reporter Frank Joyce calls Wilcox, who tells him Brazel is in his office with an interesting story. Brazel allegedly gets on the phone with Joyce and mentions debris and a stench from dead bodies. (Kevin D. Randle and Donald R. Schmitt, The Truth about the UFO Crash at Roswell, Evans, 1994, pp. 163–164)

July 6 — 1:45 p.m. Maj. A. B. Browning and the crew of a B-25 flying over Clay Center, Kansas, see a silvery disc about 30–50 feet in diameter slightly lower than it. It passes them for a while then shoots off. (NICAP, “30–50’ Circular Object Paces B-25, Accelerates”; Bloecher, p. III-11; Sparks, p. 21)

July 6 — Day. Army Air Corps Capt. James H. Burniston and his wife watch a round, flat object that oscillates on its lateral axis of travel three quarters of the way across the sky in a few seconds at Fairfield-Suisun Army Air Field [now Travis AFB] near Fairfield, California. (NICAP, “Round Flat Object Size of C-54”; Bloecher, p. III-3; Sparks, p. 21)

July 6 — 2:45 p.m. David A. Kenney, an aircraft instruments engineer, and two others watch an oval-shaped UFO flying at a high altitude for nearly 2 minutes near Encampment, Wyoming. (Bloecher, p. III-17; David Kenney, “Right Place, Right Time,” IUR 30, no. 4 (August 2006): 28)

July 6 — Afternoon. Francis Howell and his wife are in their yard at 317 Ash Street in Tempe, Arizona, when they see an object floating down to the ground with a kite-like motion. It appears to be about 2 feet across and made of aluminum. It disappears behind some trees. The Howells and some neighbors walk toward the place where it apparently has landed, and they see the disc ascend at a 45° angle and move at high speed toward the northwest. (“Tempeans See ‘Disc,’” Phoenix Arizona Republic, July 7, 1947, p. 1; Bloecher, p. II-13)

July 6 — Colonel William H. Blanchard, Roswell AAF commanding officer, entrusted with oversight of the first and only atomic-bomb strike force in the world, the 509th Bomb Group, orders Jesse A. Marcel, the air intelligence officer, to investigate the debris report. Marcel immediately drives to the sheriff’s office. Marcel interviews Brazel, examines the pieces of the material that Brazel brought in, and decides he had better visit the ranch to examine the field for himself. Marcel, taking some of the debris with him, returns to the base and reports to Blanchard on what he has seen. Blanchard, convinced that he is in possession of something highly unusual, perhaps Soviet, alerts the next higher headquarters. Marcel and Blanchard all know this is from not any type of balloon. Marcel returns to the sheriff’s office with the senior counterintelligence agent assigned to the base, CIC Captain Sheridan W. Cavitte. They escort Brazel back to his ranch and examine the debris field. Acting on orders from Major General Clements McMullen, deputy commander of the Strategic Air Command, Blanchard obtains more of the debris from the sheriff’s office. It is sealed in a courier pouch and loaded on an airplane to be flown on to the Fort Worth Army Air Field, where it is given to Colonel Thomas J. DuBose for transport on to Washington, D.C. After Marcel and Cavitte leave with Brazel, the two deputies return to say they did not find the debris field but observed a burned area in one of the pastures. There the sand has been turned to glass and blackened. It looks as if something circular has touched down. (Kevin D. Randle and Donald R. Schmitt, The Truth about the UFO Crash at Roswell, Evans, 1994, pp. 37–40, 164; Good Need, p. 89; Nukes 482–483)

July 6 — 8:45 p.m. Army Staff Sgt. Ira L. Livingston watches a procession of glowing round objects moving at 500 mph over Birmingham, Alabama. A new one appears every 5 seconds. Many others report UFOs in the area between
July 6 — 9:00 p.m. Because of the distance to the ranch over roads that are less than adequate, Brazel, Marcel, and Cavitt do not arrive until after dark. They stay at the “Hines” house (an old ranch house close to the debris field), eat cold beans, and wait for daylight. Marcel runs a Geiger counter over the large piece of wreckage Brazel has stored in the cattle shed. He detects no sign of radiation. (Kevin D. Randle and Donald R. Schmitt, The Truth about the UFO Crash at Roswell, Evans, 1994, p. 165)

July 7 — 2:00 a.m. A special flight (the first) leaves Roswell AAF for Andrews AAF in Washington, D.C. Some of the debris and the bodies are on that flight. (Kevin D. Randle and Donald R. Schmitt, The Truth about the UFO Crash at Roswell, Evans, 1994, p. 165)

July 7 — AMC commander Lieut. Gen Nathan Twining unexpectedly flies to Alamogordo AAF and Kirtland AAF in New Mexico, remaining there until July 11. Army Air Forces Commander Gen. Carl Spaatz is supposedly “vacationing” in Washington State. He tells reporters he knows nothing about the flying discs. (Kevin D. Randle and Donald R. Schmitt, The Truth about the UFO Crash at Roswell, Evans, 1994, p. 165)

July 7 — A hoax in Shreveport, Louisiana. A 16-inch aluminum disc with smoke coming out of it is found. Army investigators find “Made in USA” on the disc. It is one of many homemade gadgets, weather balloon radar targets, circular saws, and other disc-like debris that people find or make in order to have some fun in the press or with gullible saucer-seekers. (Sparks, p. 21; “Speaking of Pictures: A Rash of Flying Disks Breaks Out over the U.S.,” Life, July 21, 1947, p. 14; ClearIntent, p. 149; Kevin D. Randle and Donald R. Schmitt, “Secret Projects and Open Eyes: A Response,” IUR 19, no. 3 (May/June 1994): 15–17; Kevin D. Randle, “The Hoover Memo Again,” A Different Perspective, July 29, 2015; Maurizio Verga, “Here They Are! Early Crashes of Flying Saucers, a Visual History,” Cielo Insolito, no. 6 (March 2018): 8–27)

July 7 — 9:55 a.m. Newspaper editor John Brackett and his wife Wilma see an object streak across the sky in Reno, Nevada, leaving a trail of bluish-white vapor. It is high in the sky and traveling at about 1,000 mph. (“Tiny Speck Whizzes across Sky Here at Unbelievable Rate of Speed; Many Reno Persons See Small Object,” Reno Nevada State Journal, July 8, 1947, p. 14; Bloecher, pp. III–7–8)

July 7 — 11:30 a.m. Flight instructor Kenneth Jones out of Elkhart, Wisconsin, is practicing take-offs and landings with a student near Koshkonong. They watch a disc descending vertically on edge through the alto-cumulus clouds at 6,000 feet, stop at 4,000 feet, assume a horizontal orientation, and fly horizontally for 15 seconds, covering 23 miles at 5,500 mph. At one point it heads straight towards them on a course of about 120°, then stops again
July 7 — Gen. Hoyt Vandenberg’s activity log: 1:10 p.m., answers a Toronto Star reporter’s question about possible secret military aircraft. Vandenberg says no AAF planes are looking for discs, but National Guard planes are looking into the discs on their own. 1:50 p.m., Stephen Leo, public relations officer for AF Secretary Stuart Symington, calls concerning the Shreveport, Louisiana, incident. 1:55 p.m. Leo and Gen. Curtis LeMay discuss the discs. Col. Warren, at Ellington Field [now Ellington Airport] in Houston, Texas, calls concerning the Shreveport disc. 4:20 p.m., Col. Warren calls back and says the incident is a hoax. (David Rudiak, “Lt. Gen. Hoyt S. Vandenberg and Roswell,” Roswell Proof, 2001)

July 7 — 2:30 p.m. Capt. Robert J. Southey and Clem Hackworthy are flying a private aircraft near East Troy, Wisconsin, when they see a fast-moving silver object flying southeast from Eagle to Muskego, covering 17 miles in 20 seconds (approximately 3,060 mph). They try to photograph it, but it quickly disappears, then suddenly reappears about 10 miles away. (Bloecher, pp. III-11–12; Sparks, p. 22; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 July 7th–July 10th, Supplemental Notes, The Author, 2001, p. 9)

July 7 — A meeting is held in the office of Brig. Gen. George F. Schulgen, chief of the Requirements Intelligence branch of Army Air Force Intelligence. It is decided to investigate five flying disc incidents with “qualified” observers and obtain detailed statements: two in Seattle, Washington; one in Boise, Idaho; one in Palm Springs, California; and one in Washington State. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 July 7th–July 10th, Supplemental Notes, The Author, 2001, p. 16)

July 7 — 5:20 p.m. Radar technician David W. Chase watches a disc-shaped object passing overhead at Medford, Oregon. It appears to be flying at 600–700 mph on edge at right angles to the surface of the earth, though following its contours at 500–1,000 feet. The object gives off a bright light. (Bloecher, p. III-18; Ray Palmer, “New Report on the Flying Saucers,” Fate 4, no. 1 (January 1951): 63–81)

July 7 — 7:45 p.m. Five students on a practice baseball field at Ohio State University in Columbus, Ohio, see three metallic oval objects flying swiftly and silently in a triangular formation overhead. They seem to be about 10 feet in diameter and are flying east over the Olentangy River. They are out of sight within 10 seconds. (Bloecher, p. II-6)

July 7 — 9:00 p.m. Orrin Williams and his wife Albertine, along with Mr. and Mrs. Cecil Grant, are fishing on Great Pond near Rome, Maine, when they see a “spinning rocket” come out of the southern sky and stop abruptly overhead, where it hovers as a ball of fire. A similar object comes from the east, passing close by the first one. A third object approaches from the east and stops by the first object before moving on. The first object then retraces its path to the south at high speed. The display lasts several minutes. (Bloecher, p. II-10)

July 7 — 9:00 p.m. William A. Rhodes, an independent scientist and inventor in Phoenix, Arizona, takes two photos of a dark, heel-shaped disc at his home at 4333 N. 14th Street. The photos are reproduced in the July 9 issue of the Arizona Republic. A few weeks later, an Army Air Corps Intelligence officer from Hamilton Army Airfield [now closed] in Novato, California, visits Rhodes and takes the prints and negatives, but Rhodes is unable to get them back. However, Kenneth Arnold obtains them on a later visit to Hamilton, and they wind up with James E. McDonald. Rhodes actually has an informal top-secret clearance because of his invention of a degaussing device for ships. He dies in 2007 at the age of 90. (NICAP, “The Rhodes Photo Case”; Bloecher, p. IV-4; Michael D. Swords, “Can You Learn Anything from UFO Photos, Part Two,” The Big Study, July 5, 2012; Swords 53, 54)

July 7 — 9:30 p.m. Charles Crockett, 15, is walking along Western Avenue in Manchester, Maine, when he sees a cluster of luminous objects to the west, just above the treetops on the north end of Cobbseason Ferry. They are still visible when he arrives home and alerts his mother and grandmother. Possible searchlight beams. (“Flying Saucers’ Still Seen Flitting in N.E. Sky,” Bangor (Maine) Daily News, July 8, 1947, pp. 1–2; Bloecher, p. II-20)

July 7 — 10:15 p.m. Louisville Times photographer Al Hixenbaugh is at Preston Street and Bickels Lane in Louisville, Kentucky, when he notices three “fiery balls” in the sky. He takes a 5-second exposure, capturing two of the objects that show as slightly curved streaks. He estimates they are 1–2 miles away, moving at 200 mph, and at an altitude of 1,000–2,000 feet. Robert Delara of 2745 West Market Street also sees the three objects shooting northward. (Louisville (Ky.) Times, July 8, 1947; “‘Flying Liver Pills’ over Kentucky,” Cincinnati Enquirer, July
July 8 — 2:00 a.m. Marcel stops at home in Roswell to show his wife Viaud and son Jesse Jr., some of the Corona, New Mexico, crash debris. Over the next hour they examine it on the kitchen floor. Marcel Sr. says it is a flying saucer. Marcel is not breaking regulations since nothing has yet been classified. With the help of his son, Marcel loads it into the car to be taken to Roswell AAF. (Kevin D. Randle and Donald R. Schmitt, The Truth about the UFO Crash at Roswell, Evans, 1994, p. 166; Robert J. Durant, “C. B. Moore’s Mogul Tape,” IUR 23, no. 2 (Summer 1998): 7–9, 32; Robert A. Galganski, “Probing the Roswell Thin-Strut Debris,” IUR 24, no. 3 (Fall 1999): 8–12, 30; Karl T. Pflock, et al., “Debris Details,” IUR 24, no. 4 (Winter 1999): 28–29)

July 8 — 6:00 a.m. Marcel and Cavitt visit with Blanchard in his quarters and tell him what they have seen. Blanchard calls base Provost Marshal Maj. Edwin D. Easley and orders him to post guards on the roads around the debris field. Armed guards encircle the primary areas, denying access to anyone without official business. Easley is directed to locate Brazel and have him escort the MPs to the debris field. Blanchard calls Eighth Air Force headquarters in Fort Worth, Texas, and advises them of the new find. (Kevin D. Randle and Donald R. Schmitt, The Truth about the UFO Crash at Roswell, Evans, 1994, p. 166)

July 8 — 7:30 a.m. The regular 9:00 a.m. Roswell Army Air Field staff meeting is moved up 90 minutes. The main topic for discussion is Marcel and Cavitt reporting an extensive debris field near Corona in Lincoln County, New Mexico, approximately 75 miles northwest of Roswell. A preliminary briefing is provided by Blanchard about the separate impact site approximately 40 miles north of Roswell. Samples of wreckage are passed around the table. Pieces that resemble metal foil, paper-thin yet extremely strong, and pieces with unusual markings along their length are handed from man to man, each voicing their opinion. No one is able to identify the crash debris. (Kevin D. Randle and Donald R. Schmitt, The Truth about the UFO Crash at Roswell, Evans, 1994, p. 166)

July 8 — 9:00 a.m. Cavitt and Lewis S. Rickett, who has returned from an assignment in Carlsbad, New Mexico, drive a staff car to the impact site north of Roswell, followed by MPs. They are stopped by the guards who are still posted. When they arrive, they see that a small containment of debris remains that Rickett is allowed to examine. (Kevin D. Randle and Donald R. Schmitt, The Truth about the UFO Crash at Roswell, Evans, 1994, p. 166)

July 8 — 9:30 a.m.–9:20 p.m. Five separate UFO sightings take place at Muroc AFB [now Edwards AFB] in southern California, the Air Force’s aircraft testing and development center. Ruppelt says these are the first sightings “that really made the Air Force take a deep interest in UFOs.” At 9:30 a.m., 1st Lt. Joseph C. McHenry and three others see three discs heading in a westerly direction. At 10:10 a.m., XP-84 test pilot Maj. Jowell C. Wise sees a yellowish-white object at 10,000 feet traveling about 200 mph. At 11:50 a.m., Maj. Richard R. Shoop, Col. S. A. Gilkey, and Capt. John P. Stapp are sitting in an observation truck at Rogers Dry Lake and see a round, white aluminum-like object descending from 20,000 feet for about 90 seconds; it has two knobs or thick fins on the top. Around 4:00 p.m., a pilot flying an F-51 some 40 miles south of Muroc sees a “flat object of a light-reflecting nature”; it is flying too high for him to climb up to it. At 9:20 p.m., spherical objects are again seen in the area, this time at 8,000 feet and moving against the wind at 300 mph. (NICAP, “Observers Sight Saucer over Base”; NICAP, “Object Observed by Four Witnesses in Observation”; NICAP, “Object Descends to Ground Level, Rises”; NICAP, “Flat Object with Fin Observed by F-51 Pilot”; Bloecher, pp. 32; Clark III 783–784; Sparks, pp. 22–23; Patrick Gross, “The Muroc Army Air Field Incidents”)

July 8 — 11:00 a.m. Col. William Blanchard dictates a press release about the Roswell recovery to Public Information Officer Lt. Walter Haut, who delivers the release to radio stations around noon (the first apparently to Frank Joyce at KGFL) and the newspapers in Roswell, New Mexico. (Kevin D. Randle and Donald R. Schmitt, The Truth about the UFO Crash at Roswell, Evans, 1994, p. 167)

July 8 — The Army Air Force issues a press release saying that, based on a “preliminary study,” the flying discs are not secret bacteriological weapons designed by a foreign power, experimental army aircraft, or spaceships. However, Army and Navy officials are not certain what they are. (“Saucer’ Dept.—All Designs,” Racine (Wis.) Journal Times, July 8, 1947, p. 6)

July 8 — Rep. Lyndon B. Johnson (D-Tex.) requests information on the flying discs from the War Department. Someone from Gen. Carl Spaatz’s office writes back on July 21 to tell him the Army Air Forces are looking into it, but there is “no indication” that the discs are “new or unusual missiles or aircraft.” (Swords 38)

July 8? — British radio and TV entertainer Hughie Green is driving across the US. About 250 miles west of Philadelphia, Pennsylvania, he hears an announcement that a flying saucer “had crashed in New Mexico and that the Army were moving in to investigate. Later the program was interrupted again and quite a few details were given.” When he arrives at Philadelphia, there is nothing in the newspapers or on the radio. (“Star Puzzled,” Flying Saucer Review 1, no 1 (Spring 1955): 3; Clark III 319; “Hughie Green: ‘Peripheral Witness to Roswell?’” Above Top Secret forum, October 20, 2012)
July 8 — 1:00 p.m. Marcel goes on a B-29 special flight (the second) to Fort Worth Army Air Field, Texas, with the wreckage to report to Gen. Roger M. Ramey. The pilot is Lt. Col. Payne Jennings Jr., with Lt. Col. Robert Barrowclough riding in the bombardier’s seat. Only a few packages are loaded onto the plane. One, a triangular package about two feet long, is wrapped in brown paper. The other three are about the size of shoe boxes. They are so light that it feels as if there is nothing in them. When it lands in Fort Worth, the enlisted soldiers on the plane are ordered to remain aboard until a guard is posted and Marcel gets off taking one of the packages that he has been carrying on his lap. According to Flight Engineer M/Sgt. Robert Porter, the soldiers go to the mess hall once the guard is posted. The remaining debris is transferred to a B-25 that is flying to Wright Field in Dayton, Ohio. Marcel goes to Ramey’s office and puts the package on his desk. They both go to a map room, where Marcel shows him where the debris was found. When they return to Ramey’s office, Marcel sees that the package he brought has been substituted by a torn-up weather balloon. Ramey proposes a plan that possibly originates from his bosses at the Pentagon. Attention needs to be diverted from the more important impact site north of Roswell by acknowledging the Corona location. Too many civilians are involved, and the press is already alerted. (Kevin D. Randle and Donald R. Schmitt, The Truth about the UFO Crash at Roswell, Evans, 1994, pp. 167–168; Thomas J. Carey and Donald R. Schmitt, “Flight to Fort Worth: From Complicity to Cover-Up,” IUR 25, no. 2 (Summer 2000): 7–13, 30)

July 8 — 2:26 p.m. Haut’s press release about the recovered disc reaches the Associated Press wire. The story announces: “The army air forces here today announced a flying disc had been found” the previous week. It says that the disc is recovered by intelligence officers of the 509th Bomb Group at Roswell Army Air Field [now closed], New Mexico, with the help of local ranchers and the Chavez County Sheriff’s Office. It adds that the disc is being loaned by Maj. Marcel “to higher headquarters.” (Kevin D. Randle and Donald R. Schmitt, The Truth about the UFO Crash at Roswell, Evans, 1994, p. 167)

July 8 — 2:30 p.m. Blanchard decides it is time to “go on leave.” Too many phone callers into the base are asking to speak with him. He, along with a few members of his staff, drive out to the Corona, New Mexico, debris field. Those left at the base are told to inform the reporters that the colonel is now on leave. (Kevin D. Randle and Donald R. Schmitt, The Truth about the UFO Crash at Roswell, Evans, 1994, p. 167; Kevin D. Randle, “When a Leave Is Not a Leave: Col. Blanchard and the Roswell Timeline,” IUR 19, no. 4 (July/Aug. 1994): 18–20; Karl T. Pflock, “Taking Liberties with a Leave,” IUR 20, no. 2 (Mar./Apr. 1995): 18)

July 8 — 2:41 p.m. The press release is put on the United Press wire.

July 8 — 3:50 p.m. An Army National Guard pilot flying near Mount Baldy, California, observes a flat object, reflecting light, about the size of a fighter. He gives chase, attempting to keep it in sight, but is unable to do so. (Air Force Base Intelligence Report, “Flying Discs,” July 30, 1947; Kevin D. Randle, “Roswell, Nathan Twining, and the Mini-EOTS,” A Different Perspective, October 6, 2014)

July 8 — 4:26 p.m. Thomas Dale is flying a small plane at 2,800 feet over Alton, New Hampshire, with passenger Jere Stetson. They see a metallic object some 2 miles away to the east and some 1,500 feet below their aircraft. It approaches them at great speed before veering to the north. They estimate it is 20 feet long and “not exactly round.” (Bloecher, p. III-12)

July 9 — 1:00 a.m. William Valetta sees 5–6 domed discs streaking eastward as he stands outside his house at 4328 South Emerald Avenue in Chicago, Illinois. They make a swishing noise and he sees a blue flame underneath each of them. Smoke seems to be coming from the tops. (Bloecher, pp. II-13–14)

July 9 — The FBI interviews Capt. Emil J. Smith and copilot Ralph Stevens at Boise (Idaho) Municipal Airport about their July 4 sighting. (ClearIntent, p. 151; Good Above, pp. 253–254)

July 9 — US Sen. Glen H. Taylor (D-Idaho) says he hopes the saucers will turn out to be space ships from another planet, whose hostility might end all our “petty arguments on earth.” (“Can’t Laugh Off Saucers,’ Says Senator,” *Boston Globe*, July 9, 1947, p. 5)

July 9 — The US Army Air Force issues classified orders requiring reports of any “saucer-like” objects to be investigated and passed on to T-2 Technical Intelligence at Wright Field, Ohio, with summaries sent to the Pentagon. However, most of the early cases still go directly to the Air Force Office of Intelligence at the Pentagon. (Michael David Hall and Wendy Ann Connors, “Alfred Loeding: New Insight on the Man behind Project Sign,” *IUR* 23, no. 4 (Winter 1998): 6)

July 9 — 10:30 a.m. President Truman meets with Sen. Carl Hatch (D-N.Mex.).

July 9 — 11:58 a.m. Vandenberg calls President Truman.

July 9 — 12:50 p.m. Vandenberg and Symington meet with the Joint Chiefs.
July 9 — 12:17 p.m. *Idaho Statesman* aviation editor and former B-29 pilot David N. Johnson, flying in an Idaho Air National Guard AT-6 Texan, sees a black object standing out against the clouds as he prepares to land at Gowen Field [now Boise Airport], Boise, Idaho. Johnson takes 10 seconds of 8mm motion-picture film (but it shows no trace of the object). It makes a slow roll, then makes a stair-step climb, then disappears into the clouds. (NICAP, *AT-6 Encounters Black Disc*; Bloecher, pp. III-12–13; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 July 7th–July 10th, Supplemental Notes*, The Author, 2001, pp. 39–43, 55; *Sparks*, p. 23)

July 9 — 2:30 p.m. Vandenberg and Symington meet again.

July 9 — Late afternoon. 1Lt Chester P. Barton, stationed at Roswell Army Air Field in New Mexico, is sent by Maj. Edwin D. Easley to go to the crash site and report back to him about what is going on. He gets no closer than about 50 feet from the wreckage, which appears to have burned. He is convinced it is the remains of a B-29 bomber. He remains at the site for about 90 minutes then reports back to Easley. (Joseph Stefula, “The Roswell Testimony of Chester P. Barton,” IUR 26, no. 2 (Summer 2001): 21–23, 29–31)

July 9 — Brig. Gen. George F. Schulgen, chief of the Requirements Intelligence branch of Army Air Force Intelligence, requests FBI help with the problem of the flying discs from Special Agent S. Wesley Reynolds, Army intelligence claims they are not Army or Navy craft. He says that Air Corps Intelligence is utilizing all its scientists to study the cases to see whether they are natural or artificial or inspired by “individuals of Communist sympathies with the view to causing hysteria and fear of a secret Russian weapon.” (E. G. Fitch, [FBI memo], July 10, 1947; ClearIntent, p. 148; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 July 7th–July 10th, Supplemental Notes*, The Author, 2001, p. 14)

July 9 — Shortly after 5:00 p.m. Electrician Raymond Edward Lane and his wife are picking huckleberries near Midland, Michigan, when they hear a kind of “puff” noise nearby. Looking up, they see a ball of white, sparkling fire, like a Fourth of July sparkler, about the size of a bushel basket, no more than 100 feet away. It is hovering several feet above a stretch of sand. After about 10 or 15 seconds, the light goes out and the object vanishes. The only thing that remains is a peculiar dark substance on the sand and some metallic fragments. Lane collects fragments of the material in a tin can and brings them the next morning to Robert S. Spencer, a senior researcher at the Dow Chemical Company materials research laboratory in Midland. Spencer goes to the site with Lane and Dow’s internal security chief Edward Fales. Spencer has the Dow spectroscopy laboratory analyze the fragments and reports that the shiny pellets are largely silver mixed with a bit of silicon. They conclude that it consists of fused sand. By the end of September, the lab has analyzed ashlike powder found at the site. It turns out to be thorite that is slightly radioactive, mixed with magnesium hydroxide and other trace minerals. The conclusion is that the sighting is the result of some kind of home-made fireworks experiment, although Dow chemist John Josef Grebe suspects it might have been a small missile. (NICAP, “Object Hovers over Sand”; Bloecher, pp. IV-2–3; Joel Carpenter, “The Midland Fireball: Dow Chemical, UFOs, and Evidence,” I/R 23, no. 3 (Fall 1998): 28–32)

July 9 — 11:30 p.m. Constable Eric Kearsey sees four yellowish discs flying in close formation above Grand Falls, Newfoundland. He calls other people to watch them as well. They are moving at high speed to the east with a dipping motion. At 11:40 p.m., an egg-shaped object “the size of a barrel head” passes overhead in the same direction. (St. John’s (Newf.) Evening Telegram, July 9, 1947; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 July 7th–July 10th, Supplemental Notes*, The Author, 2001, pp. 45–46)

July 10 — FBI agent E. G. Fitch forwards Schulgen’s request to Assistant Director of the Domestic Intelligence Division D. Milton “Mickey” Ladd at FBI headquarters in a memo titled “Flying Disks.” Ladd adds a note saying that the “Bureau does not believe it should get into these investigations” because many cases are “pranks.” Associate FBI Director Clyde Tolson adds, “I think we should do this,” while J. Edgar Hoover writes, “I would do it but before agreeing to it we must insist upon full access to discs recovered. For instance in the La. Case the Army grabbed it and would not let us have it for cursory examination.” (E. G. Fitch, [FBI memo], July 10, 1947; RosRept, pp. 25–26; Good Above, p. 541; Kevin D. Randle, “The Hoover Memo Again,” A Different Perspective, July 29, 2015)

July 10 — Roswell debris and bodies have been flown from Fort Worth to Wright Field, according to future Brig. Gen. Arthur Exon, then stationed at Wright Field, Ohio, who says that a special unit is created to study them. The story is slightly corroborated by Jack G. Tiffany Jr., whose father Jack G. Tiffany Sr. is one of the crew members that flies debris from Fort Worth to Dayton. (Kevin D. Randle and Donald R. Schmitt, *The Truth about the UFO Crash at Roswell*, Evans, 1994, pp. 61–66; Thomas J. Carey and Donald J. Schmitt, *Inside the Real Area 51*, New Page, 2013, pp. 165–175; Nukes 483–486)

July 10 — 10:00 a.m. John H. Janssen, aviation editor of the *Morristown Daily Record*, takes a photo of four luminous objects as he is flying his Piper J-3 Cub at 10,000 feet over Morristown, New Jersey. Three of the objects are silvery white, while the fourth is a dull metallic color. (“‘Flying Saucers’ Invade Morristown; 4 Discs

July 10 — 12:15 p.m. Doolittle and Vandenberg meet with Truman.

July 10 — 2:40 p.m. Secretary of War Robert P. Patterson meets with Groves and Montague.

July 10 — 4:47 p.m. University of New Mexico astronomer Lincoln LaPaz, his wife Leota, and two daughters, Jean and Mary, are driving west on Highway 60 near Fort Sumner, New Mexico, when they see a sharply outlined, white ellipsoidal object wobbling in the sky to the west about 25 miles away. They watch it for about 30 seconds, then it disappears behind a cloud, but reappears 5 seconds later further to the right. He estimates its size as 245 feet long and 100 feet thick at the maximum, with a horizontal speed of 120–180 mph and a vertical speed of 600–900 mph. It moves silently with no vapor trail. It resembles no known aircraft. (NICAP, “200' Ellipsoidal Object Sighted by La Paz Family”; H. B. Darrach Jr. and Robert Ginna, “Have We Visitors from Space?” Life, April 7, 1952, p. 84; Bloecher, p. III-19; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 July 7th–July 10th, Supplemental Notes, The Author, 2001, p. 58; Sparks, p. 24; James E. McDonald, “Statement on Unidentified Flying Objects,” in Symposium on Unidentified Flying Objects, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, p. 60)

July 10 — 5:30 p.m. Three civilian airline mechanics (John N. Mehrman Jr., Robert Leidy, and John E. Woodruff) at Ernest Harmon AFB [now Stephenville International Airport] are returning from a fishing trip and driving up a mountain road near Stephenville Crossing, Newfoundland. They see a bluish-black exhaust trail that has cut through some clouds leaving a “hole.” Woodruff sees a disc-shaped object the apparent size of a C-54 transport plane coming out of the clouds and traveling at a terrific rate of speed. The hole remains in the cloud for more than an hour. Leidy takes two Kodachrome photos of the exhaust trail. The sighting later impresses Project Sign personnel to the extent that they ask questions about UFO effects on clouds. (NICAP, “Harmon Field Photo”; Sparks, p. 24; Michael D. Swords, “Can You Learn Anything from UFO Photos, Part Two,” The Big Study, July 5, 2012; Swords 38–39; Loren E. Gross, UFOs, a History: Volume 1, 1947, The Author, February 1991, pp. 44–45; Chris Rutkowski, “The Cold, Hard Facts about UFOs in Canada,” IJU 34, no. 1 (Sept. 2011): 8–9; Chris Rutkowski and Geoff Dittman, The Canadian UFO Report, Dundurn Press, 2006, pp. 49–50; Chris Rutkowski, Canada’s UFOs: Declassified, August Night, 2022, pp. 167, 264–267)

July 10 — Mac Brazel is still being held at a guest house on the Roswell, New Mexico, base. The officers try to convince him not to say anything about what he has seen. They also try to prevent him talking to reporters. He is given a physical by doctors at the base hospital. (Kevin D. Randle and Donald R. Schmitt, The Truth about the UFO Crash at Roswell, Evans, 1994, p. 172)

July 11 — Debriefings of all military participants in the debris recovery operation take place. They are taken into a room in small groups and told that the recovery is highly classified and not to talk about it. Military personnel warn civilians around Roswell, New Mexico, that they are not to talk about what happened. (Kevin D. Randle and Donald R. Schmitt, The Truth about the UFO Crash at Roswell, Evans, 1994, pp. 72–76, 172)

July 11 — 11:00 a.m. USAAF Col. Bruce H. Perry and Maj. William E. Geyser, 59th AACS Group, see a round 2–3 foot or 10-foot aluminum or silver-metallic sphere traveling at great speed to the south of Elmendorf AFB [now Joint Base Elmendorf-Richardson], Anchorage, Alaska. Estimated altitude is 3,000–4,000 feet. (NICAP, “Round 3’ Aluminum Object at Great Speed”; Sparks, p. 24)

July 12 — Kenneth Arnold is interviewed at the Hotel Owyhee in Boise, Idaho, by Lt. Frank M. Brown and Capt. William L. Davidson, who have flown in from Hamilton Army Airfield [now closed] in Novato, California. He also submits a written statement to Army Air Force intelligence, referring to the objects as “saucer-like.” At the end of the report he draws a picture of what the objects appeared to look like at their closest approach to Mt. Rainier, Washington. He writes, “They seemed longer than wide, their thickness was about 1/20th their width.” As to motion, Arnold writes, “They flew like many times I have observed geese to fly in a rather diagonal chain-like line as if they were linked together.” (James Easton suggests in 2007 that Arnold may have seen pelicans, based on their movements, but this seems unlikely.) While they are at Arnold’s house, Brown and Davidson hear that pilot Emil J. Smith is in Boise on a layover, and all three go to the airport to talk to him. (Kenneth Arnold and Ray Palmer, The Coming of the Saucers, Palmer, 1952, pp. 21–23; Kenneth Arnold, “Confidential,” Project 1947; Frank M. Brown, “Memorandum for the Officer in Charge,” July 16, 1947; James Easton, “Kenneth Arnold and the Pelicans,” UFO Conjectures, April 4, 2007; Martin Shough, “The Singular Adventure of Mr. Kenneth
July 12 — The FBI conducts a shorter follow-up interview with Capt. Emil J. Smith. (ClearIntent, p. 153)
July 12 — 6:30 p.m. USAF Maj. Edward Graham and others at Elmendorf AFB [now Joint Base Elmendorf-Richardson], Anchorage, Alaska, see a balloon-like grayish object, 10 feet long, flying northwest at 100 mph at an altitude of 1,500 feet and following the contour of mountains 5 miles away. It is paralleling the course of a landing C-47. (Sparks, p. 24)
July 12 — 6:35 p.m. Seamen John C. Kennedy and Ben Boberly are on duty at Naval Air Station Seattle at Sand Point [now closed and redeveloped as Magnuson Park], Seattle, Washington. They notice a silvery disc-shaped object flying overhead to the east at 12,000 feet. At about the same time, Arnold Bergh and James Calahan watch three silvery discs flying quickly north from their location near North 82nd Street and 11th Avenue in Seattle. (Bloecher, p. III-6)
July 13 — 5:48 p.m. Warren Baker Eames is driving with his wife Alice on State Highway 2 near Gardner, Massachusetts, when they see a large, silvery, disc-shaped object in the sky ahead, moving west. As they watch, its nearest edge dips down toward them and it accelerates in a sudden burst of speed to the west-northwest. (Bloecher, p. III-1)
July 15 — Mack Brazel is returned home after an extensive interrogation at Roswell AAF, New Mexico. (Kevin D. Randle and Donald R. Schmitt, The Truth about the UFO Crash at Roswell, Evans, 1994, p. 173)
July 15 — 12:15 p.m. Col. Frank A. Flynn is flying a Vultee BT-13 Valiant over Concord, California, when a group of 12–15 objects approaches and passes him. At first he takes them for birds, but he can see no necks or wings and they are moving in excess of 200 mph. They are moving in a see-saw fashion at three different altitudes about 200 feet apart, and they appear to be about 15 feet across, white on the top and gray and black on the bottom. At their closest point, they are about one mile away. Flynn turns his plane around to pursue them, but they outdistance him quickly. (Bloecher, p. III-13)
July 19 — The antiaircraft command base of the Chinese Nationalist Government Air Force spots a UFO over Lanzhou City, Gansu, China. It is 50 feet long and has an apparent rudder and two jet pipes in the back. About 8:00 p.m., witnesses in Gansu province watch a red object cross the sky in 2 seconds. (Paul Dong, The Four Major Mysteries of Mainland China, Prentice-Hall, 1984, p. 3)
July 23 — Day. John H. Janssen, aviation editor of the Morristown Daily Record, is flying his Piper J-3 Cub at 6,000 feet near the Morristown Airport in New Jersey. He sees a flash of light, the engine gives out, and the plane seems to be motionless. Then he sees two UFOs (this time with portholes) and manages to get the propeller going again. This is one of the first cases of “vehicle interference” UFO cases involving an airplane. (NICAP, “07-10-1947 USA, New Jersey, Morristown”; John H. Janssen, “My Encounter with Flying Disks,” Fate 2, no. 3 (September 1949): 12–16)
July 23 — José C. Higgens and some assistants are surveying a field in Campina do Amoral in the Colônia Goio-Bang, located between Luiziana and Mamboré, Paraná, Brazil. On hearing a sharp sound, they see a grayish-white disc-shaped object about 100 feet in diameter, which soon lands and rests on curved metal feet. His assistants flee, but Higgens goes up to examine it. He sees a small, glass window, then two odd-looking beings observing him curiously. A door opens in the craft, and three other hairless beings dressed in transparent overalls. They have large, round eyes with eyebrows and pronounced eyelashes. Their legs are disproportionately long and they are about 7 feet tall. One points a small tube at Higgens. They are speaking in an unknown, sonorous language. He walks toward the door and can see only a small cubicle, bordered by another door, and several portholes. Higgens by gestures asks where they are from and the leader draws a map in the dirt, indicating a seventh planet, presumably Uranus. He eludes them by pretending to look for his wife and goes into a hidden spot in the woods. After 30 minutes the beings climb into the object and take off. (Wikipedia, “Caso José Higgens”; Clark III 576–
July 25 — Intelligence agents from the Fourth Air Force, Lt. Frank M. Brown and Capt. William L. Davidson, visit Kenneth Arnold in Boise, Idaho, and tell him to contact them if he runs across any interesting UFO evidence.

July 25 — A memorandum over the signature of Maj. Lester M. Garrigues states that by order of Col. Blanchard, the nine men who had been assigned duties in the recovery of the Roswell, New Mexico, crash are relieved from duty on that project. However, it is now largely considered a forgery by Frank Kaufmann. Garrigues has assumed duties in China prior to this and is no longer in Roswell. (Kevin D. Randle, “Frank Kaufmann, Roswell Witness,” IUR 27, no. 3 (Fall 2002): 8, 17–19; Mark Rodeghier, “Frank Kaufmann Exposed,” IUR 27, no. 3 (Fall 2002): 9–11, 26)

July 25 — Day, Leonard Robertson is riding his motorcycle northeast of Dumas, Texas, when he sees a flash of light to his left. An oval object like a bubble is floating over a field about one mile away. Suddenly the object explodes, so Robertson takes a side road to the field where he retrieves a piece of metal “lighter than aluminum foil” about 30 inches long and 24 inches wide. There are two small holes in it and the center seems to be burned. (Perryton Man Displays Proof of Saucer Story,” Amarillo (Tex.) Daily News, August 6, 1947, p. 1; “Salvage from Mystery Blast,” Amarillo (Tex.) Daily News, August 9, 1947, p. 5; Curt Collins, “The Texas UFO Crash Debris Photo from July 1947,” The Saucers That Time Forgot, May 21, 2020)

July 26 — President Truman signs the National Security Act, a major restructuring of the military and intelligence agencies. It creates a unified National Military Establishment (Army and Navy) and a Department of the Air Force, both under the new Secretary of Defense. The Joint Research and Development Board becomes the R&D brain center. Each of the three service secretaries maintains quasi-cabinet status. It establishes the National Security Council to advise the president and the Central Intelligence Agency, the first peacetime intelligence agency in the US. The CIA is prohibited from conducting domestic surveillance, but Allen Dulles ensures it can handle “other functions” affecting “national security” without scrutiny from Congress or (sometimes) the president. Much of the CIA’s funding initially comes from wealthy Americans. The act creates the first black military and intelligence budget. (Wikipedia, “National Security Act of 1947”)

July 27 — Capt. Davidson and Lt. Brown interview Richard Rankin. The FBI finds that the CIC agents have also interviewed Kenneth Arnold, Capt. Emil J. Smith, Flight Officer Ralph Stevens, and Boise Stateman Editor David N. Johnson about their UFO sightings. Leverett G. Richards, aviation editor of the Portland Oregonian, informs the FBI of this information. He also calls Lieut. Gen. Nathan Twining, who leaves “the impression that the AAF instituted this investigation to wash out the disc reports since they are definitely not of AAF origin.” (Memo for FBI Director from Mr. D. M. Ladd, August 14, 1947)

July 28 — After assessing the Ernest Harmon AFB, Newfoundland, report, Gen. Schulgen orders Col. Howard M. McCoy, deputy commander of T-2 intelligence at Wright Field, Ohio, to send a top-level assessment team (possibly Alfred Loedding or Col. William R. Clingerman Jr.) to Stephenville “immediately” and report directly to the Pentagon afterwards. McCoy suspects German or Russian technology. (Michael D. Swords, “Project Sign and the Estimate of the Situation,” JUFOS 7 (2000): 33–34; Swords 39)

July 28 — 8:34 p.m. Capt. Charles F. Gibian and First Officer Jack Harvey are piloting United Air Lines Flight 105 and descending above Mountain Home, Idaho, in preparation for landing in Boise. Harvey sees an object that seems to be another aircraft ahead of them and to the south, but it rapidly moves to the northwest in a weaving fashion, diminishing in size and vanishing from view. (“United Air Lines Crew Reports Sighting Flying Saucer between Mountain Home and Boise,” Boise Idaho Daily Statesman, July 29, 1947, pp. 1–2; Bloecher, pp. III-13–14)

July 29 — A memo from FBI agent E. G. Fitch says that Special Agent Reynolds has met with Gen. Schulgen again, who assures him that “all discs recovered would be made available for the examination by the FBI agents.” (ClearIntent, pp. 149–150)

July 29 — 6:55 a.m. Kenneth Arnold is flying to Tacoma, Washington, to investigate the Maury Island mystery. As he is over Union, Oregon, preparing to land at La Grande to refuel, he sees a cluster of 25 small (24–30 inches) brass-colored discs with a spot in the middle moving at a terrific speed. They come within 1,200 feet of his aircraft before veering away. At La Grande, he phones aviation editor David N. Johnson about his sighting, then reaches Tacoma at dusk. He gets a room (502) at the Winthrop Hotel, where a room and a bath have already been mysteriously reserved for him. Harold A. Dahl visits Arnold that night, then takes him to Fred Crisman’s place to see some Maury Island fragments. Arnold thinks it looks like lava. (Kenneth Arnold and Ray Palmer, The Coming of the Saucers, Palmer, 1952, pp. 25–38; Bloecher, pp. I-15–16, III-14; Clark III 720–721)
July 29 — 2:50 p.m. Assistant Base Operations Officer Capt. William H. Ryherd and ex-AAF B-29 pilot 1Lt Ward Stewart see two round, shiny, white objects near Hamilton Army Airfield [now closed] in Novato, California. The objects are 15–25 feet in diameter and are flying at about 750 mph at an altitude of 6,000–10,000 feet heading south. One object flies straight and level; the other weaves from side-to-side like an escort fighter. (Bloecher, p. III-5; Sparks, p. 25)

July 30 — Arnold calls United Airlines pilot Capt. Emil J. Smith and asks him to come listen to the Maury Island, Washington, story. Smith arrives in Tacoma in the afternoon and cross-examines Dahl and Crisman. Smith stays with Arnold at the Winthrop Hotel. Journalist Ted Morello of United Press calls Arnold and says that a crackpot has been calling him, explaining everything that is going on in the hotel room, including conversations with Smith when they are alone. They try but fail to locate a listening device in the room. (Kenneth Arnold and Ray Palmer, The Coming of the Saucers, Palmer, 1952, pp. 38–46; Clark III 721)

July 30 — The FBI issues a policy statement on “Flying Discs,” saying that sightings should be investigated to see whether an “individual might be desirous of seeking personal publicity, causing hysteria, or playing a prank.” (“Flying Disks,” Section B, Bureau Bulletin no. 42, Series 1947, in Black Vault FBI documents compilation, p. 48; ClearIntent, p. 150)

July 30 — A memo with the subject line, “Recovery ‘Flying Discs,’” purportedly written by Maj. Edwin D. Easley, acknowledges that the Roswell, New Mexico, crash could “represent an interplanetary craft of some kind.” However, it is now largely considered a forgery by Frank Kaufmann. (Kevin D. Randle, “Frank Kaufmann, Roswell Witness,” IUR 27, no. 3 (Fall 2002): 8, 17–19; Mark Rodeghier, “Frank Kaufmann Exposed,” IUR 27, no. 3 (Fall 2002): 9–11, 26)

July 30 — The Garrett Estimate, an Air Force Base Intelligence Report on “Flying Discs”—an informal estimate of the situation based on 16 reports selected by Collections Officer Lt. Col. George D. Garrett—says that the “flying saucer situation is not all imaginative or seeing too much in some natural phenomena. Something is really flying around.” Also, “Lack of topside inquiries . . . give more than ordinary weight to the possibility that this is a domestic project, about which the President, etc., know.” The study is passed up the line to Gen. George Schulgen and Hoover at the FBI for comment, subtly indicating that investigating a domestic project is a waste of time. (Air Force Base Intelligence Report, “Flying Discs,” July 30, 1947; Michael D. Swords, “Project Sign and the Estimate of the Situation,” JUFOS 7 (2000): 32–33, 57–61; Swords 39, 474–475; Kevin D. Randle, “Roswell, Nathan Twining, and the Mini-EOTS,” A Different Perspective, October 6, 2014)

July 31 — Crisman and Dahl bring heavy fragments and white metal from the Maury Island case to the Winthrop Hotel room in Tacoma, Washington. They cannot locate the photos. Arnold calls Brown and Davidson at Hamilton Army Airfield in Novato, California. They quickly depart for Tacoma. Morello calls Arnold and says his informant knows that Brown and Davidson are on their way in a B-25. They arrive in the late afternoon. The five men talk until 11:00 p.m., when Crisman offers to go home and get more Maury Island fragments. He returns with slightly different, more slag-like rock stuffed in a large cereal box, which is loaded into Brown’s army vehicle. Brown and Davidson leave to go back to Hamilton for Air Force Day the next day. Morello calls again and says his informant told him everything about what has just taken place. (Kenneth Arnold and Ray Palmer, The Coming of the Saucers, Palmer, 1952, pp. 46–57; [FBI teletype, August 6, 1947], pp. 87–88)

July 31 — Capt. Edward Ruppelt: “By the end of July 1947, the UFO security lid was down tight. The few members of the press who did inquire about what the Air Force was doing got the same treatment that you would get today if you inquired about the number of thermonuclear weapons stock-piled in the U.S.’s atomic arsenal. . . [At T-2 there was] confusion almost to the point of panic.” (Ruppelt, p. 22)

August — USAF fighter pilot W. Boyce sees a hovering disc above Media, Pennsylvania. (UFOEv, p. 33)

August — T-2 Intelligence and Army Air Force Intelligence hold meetings over the next two months and prepare documents requesting an authorized project to investigate UFOs, per General LeMay’s 1946 instructions.

August — The Air Materiel Command headquarters replaces T-2 Intelligence with the Technical Intelligence Department, tasked with producing reports and estimates on foreign air weapons. It begins to develop a photoanalysis capability.

August — The Denver Post runs a story that claims the military is building a secret base consisting of huge caverns for atomic weapons defense purposes. The article says the new base is in the Manzano Mountains southeast of Sandia Base, New Mexico. The military responds by issuing a statement that operations and construction near Sandia Base are top secret. In fact, however, the Armed Forces Special Weapons Project is building one of several bases around the country that will be used for nuclear weapons storage. The AFSWP code-names the base “Site Able.” (Wikipedia, “Sandia Base”)

August

August 3 — Smith contacts Maj. Sander, who relieves Arnold and Smith of all their fragments. He shows them a smelting lot where he finds similar pieces of slag. Smith and Arnold check out of the Winthrop Hotel in Tacoma, Washington. (Kenneth Arnold and Ray Palmer, The Coming of the Saucers, Palmer, 1952, pp. 73–84)

August 4 — Pilots Capt. Jack Peck and Vince Daly see a smooth UFO northwest of Bethel, Alaska, dead ahead as they are flying a DC-3 for Al Jones Flying Service. Peck hauls back on his controls to bring his plane up to safer altitude. Now 1,000 feet higher, the pilots glance downward and spot the UFO closer but on a changed course. Still dark against the sky, it looks to be as large as a C-54. Intrigued, Peck dives on the object as it pulls away, doing his best to get a better view, but it speeds up to an estimated 500 mph and is lost to view in four minutes. (NICAP, “Smooth Black Object Crosses Path of DC-3”; Harold D. Johnston, “Matters of National Interest,” August 5, 1947; Sparks, p. 25)

August 7 — The Seattle, Washington, FBI office interrogates Crisman and Dahl and announces the Maury Island incident is a hoax. The FBI file notes that Dahl stated that “if questioned by the authorities he was going to say it was a hoax because he did not want any further trouble over the matter.” Dahl’s daughter Louise admits in 2007 that the whole story was made up, as did her brother Charles in the late 1960s, who called Crisman a “smooth-talking con artist.” The affair had started as a joke and blossomed into something worse. Associated Press reporter Elmer Vogel says that Dahl’s wife had compelled him to tell Vogel the truth. Morello also speaks to Crisman, who admits the story is baseless. (Clark III 721; Kenneth Arnold and Ray Palmer, The Coming of the Saucers, Palmer, 1952, pp. 105–111; Jason Colavito, ed., “Inquiry into Richard Shaver and Ray Palmer, Federal Bureau of Investigation, 1947”; Kenn Thomas, Maury Island UFO: The Crisman Conspiracy, IllumiNet, 1999; Anthony Bragalia, “Maury Island No Longer a Mystery: A UFO Hoax Exposed!” UFO Digest, July 8, 2010; Brian J. Robb, “Conspiracy Central: The Life and Lies of Fred Lee Crisman,” Fortean Times 355 (July 2017): 32–39)

August 8 — Lt. Col. Donald L. Springer, assistant chief of staff for army intelligence at the Fourth Air Force, who has just returned to Hamilton Army Airfield [now closed] in Novato, California, from Tacoma, Washington, says “there is not sufficient evidence or testimony available to this headquarters to conclude whether or not the reports of so-called flying disks in the Tacoma area or any other area have any basis of fact.” He adds that the Maury Island crash “did not occur.” (“Fourth Air Force Drops Disc Inquiry; Search Held Futile,” San Francisco Examiner, August 9, 1947, p. 5)

August 9 — John Derry, serving as acting general manager of the Atomic Energy Commission, proposes a set of guidelines that restate the proposition that secrecy can be based on reasons other than national security. The definition of Confidential that he proposes goes beyond the Army and Manhattan Project rules: “CONFIDENTIAL: Documents, information or material, the unauthorized disclosure of which, while not endangering the National security, would be prejudicial to the interests or prestige of the Nation or any Governmental activity, or individual, or would cause administrative embarrassment, or be of advantage to a foreign nation shall be classified CONFIDENTIAL.” The Derry memo calls for review by a classification board assembled from the AEC’s regional sites. In September, this board assembles in Oak Ridge, Tennessee. The available documentation does not show that Derry’s proposed rules go into effect, but it does show that the Classification Board blesses the illustrations of matter that “should be graded” Secret or Confidential. The former category includes “certain selected human administration experiments performed under MED [Manhattan Engineer District].” (US Advisory Committee on Human Radiation Experiments, “Final Report,” October 1995, chapter 13)
August 13 — 1:00 p.m. Albert Clarence Urie and his two sons Billy and Kenneth see a straw hat–shaped, sky-blue object about 10 wide, 10 feet high, and 20 feet long. It has “pods” on the side emitting flames and is flying along the Snake River Canyon six miles west of Blue Lakes Ranch near Twin Falls, Idaho. The UFO is moving up and down towards them at 1,000 mph and an altitude of 75 feet about 1/2 mile away. Urie is about 300 feet from the object, which is about level with him and silhouetted against the canyon wall. It disappears behind a hill about one mile away. Hynek, for Project Blue Book, later identifies it as an “atmospheric eddy.” (“Flying Saucer Reported Flashing Down Canyon at 1,000 Miles Per Hour; Two Others Seen,” Twin Falls (Idaho) Times-News, August 15, 1947, pp. 1, 8; NICAP, “Snake River Case”; Hynek UFO Report, p. 34; Sparks, p. 26; Story, pp. 337–338); Patrick Gross, “Snake River, August 13, 1947”)

August 13 — The San Francisco Examiner’s Washington Bureau hears a rumor from a US intelligence source that Soviet agents have been ordered to solve the mystery of flying saucers. It reports that the Kremlin believes that the discs are connected with Army experiments in anti-radar weaponry. (San Francisco (Calif.) Examiner, August 14, 1947, p. 1)

August 14 — The first Gallup poll on UFOs shows that 90% of Americans have heard of flying saucers; 33% don’t know what they are, 39% consider them hoaxes or misidentifications, 16% consider them US or Russian secret weapons. The ETH is not mentioned. (Project 1947, “August 1947 Gallup Poll”; Robert J. Durant, “Evolution of Public Opinion on UFOs,” IUR 18, no. 6 (Nov./Dec. 1993): 9–10)

August 14 — Shortly after 9:00 a.m. Italian artist and author Luigi Rapuzzi (who uses the pseudonym L. R. Johannis) is hiking along the left bank of the Torrente Chiarzò near Raveo, Udine, Italy, when he sees a vivid red, metallic, domed disc on the riverbank about 165 feet ahead. It is about 33 feet wide and embedded in a cleft in the rock about 20 feet above the shallow stream. Looking around, he sees two “boys” on the edge of a grove of trees. He shouts at them and points to the object, walking toward them, but notices they are actually odd-looking dwarfs who are approaching him stiffly. They are about 3 feet tall and wearing dark blue coveralls with red collars, cuffs, and belts. Their greenish heads are covered in tight-fitting, brownish caps. He looks at them in astonishment for 2–3 minutes, then waves his geologist’s pick at them and asks where they come from. One of the entities raises his right hand to its belt, which emits a puff of smoke that knocks Rapuzzi to the ground as if from an electric shock. As he is lying there, one of them grabs his pick and he notices its green hand has 8 claws. They climb up the rock and into the disc, which soon shoots straight out and into the air, hovering briefly at an angle, then vanishes. Rapuzzi feels a blast of wind that blows him across the ground. His pick is missing. (NICAP, “Professor Encounters ‘Lens’ and Creatures”; “The Villa Santina Case,” in Charles Bowen, ed., The Humanoids, special issue of FSR, Oct./Dec. 1966, p. 2; 1Pinotti 19–30)

August 14 — 10:40 a.m. Three men of the 147th Airways and Air Communications Service Squadron at Harmon Field, Guam, see two small crescent-shaped objects zigzagging at 1,200 feet. They disappear in the clouds and another object emerges and proceeds west. (Lt. Col. Donald L. Springer, “Flying Disc,” August 27, 1947; Sparks, p. 26)

August 14 — The FBI concludes that the plane carrying Davidson and Brown was not sabotaged, nor was it carrying actual flying disc parts. (Memo for FBI Director from Mr. D. M. Ladd, August 14, 1947)

August 15 — In response to the August 13 San Francisco Examiner report, FBI Director J. Edgar Hoover asks the agency to look into whether Soviet spies are looking into whether the flying discs are a secret US technology. Assistant Director of the Domestic Intelligence Division D. Milton “Mickey” Ladd at FBI headquarters assures FBI Deputy Director Edward Allen Tamm that he is unaware of any such effort. (Memo to Assistant FBI Director E. A. Tamm from Agent D. M. Ladd, August 15, 1947)

August 15? — 9:30 p.m. Maj. Elmer H. Hammer of the 28th Bombardment Wing at Rapid City Army Air Base [now Ellsworth AFB] near Box Elder, South Dakota, sees 12 objects flying at 6,000–10,000 feet in a tight diamond formation at 300–400 mph. The objects level off at approximately 5,000 feet and make a gentle large-radius turn of about 110° to the right about 4 miles away. They start climbing at an angle of 30–40° and appear to accelerate rapidly in the climb. The objects are approximately 100 feet long and have a brilliant yellow-white luminous glow. (NICAP, “12 B-29-Sized Elliptical Objects Seen”; Hynek UFO Report, p. 40; Sparks, p. 26)

August 17 — A forest ranger at a fire lookout tower on Mt. Josephine, Skagit County, Washington, observes an object shaped like a huge clam that appears to fall tipped at an angle northeast of the fire tower. It slows to a stop, levels off, and floats “leisurely as if suspended by a cord” for a few minutes and finally moves off to the southeast with ever increasing speed. (Loren E. Gross, UFOs, a History: Volume 1, 1947, The Author, February 1991, p. 61)

August 19 — FBI memo to D. M. Ladd from E. G. Fitch on “Flying Discs” mentions SAC Reynolds’s conversation with Lt. Col. George Garrett, who strongly suspects the Army or Navy is testing some new technology, concluding that “there were objects seen which somebody in the Government knows all about.” However Gen. Stephen Chamberlin and the War Department claim to have no involvement. (Memorandum from E. G. Fitch, “Flying Discs,” August 19, 1947)

August 20 — An Anglo-American intelligence team releases a report on secret German weapons. Foo fighters are said to be caused by a rocket-propelled plane launched straight up from the ground, intercepting Allied bomber formations by firing a spray of rocket shells from the nose. The pilot then parachutes back to the ground, a chute opens on the rocket, and it is recovered for re-use. (*New London (Conn.) Day*, August 20, 1947; Jan Aldrich)

August 22 — Col. **Robert Taylor III**, Collection Branch of Army Air Force Intelligence, summarizes the findings of Lt. Col. Garrett’s investigations of UFOs in a letter to Gen. **Curtis LeMay**, Deputy Chief of Air Staff for Research and Development. Taylor requests any information on AAF projects that might give rise to such UFO reports. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 August 1st–December 31st, Supplemental Notes*, The Author, 2001, p. 27; *Sparks*, 39–40)

August 25 — USMC Maj. **Marion Eugene Carl** attains a world airspeed record of 651 mph in a Douglas Skystreak at Muroc AFB [now Edwards AFB], California. (Wikipedia, “Marion Eugene Carl”)

August 28 — Microwave Early Warning radar on Shika Island off Fukuoka, Japan, picks up a target moving 450–478 mph at an altitude of 1,500 feet. It changes course, climbs, and is tracked to a distance of 62 miles. (NICAP, “Target Tracked in a Climb”; *Sparks*, p. 27)

August 29 — Gen. **LeMay** answers Col. **Taylor**’s August 22 request stating that there is no such project as described. (Swords 41)

Late August — Brig. Gen. **George F. Schulgen** passes the updated Garrett Estimate on to Air Materiel Command head Gen. **Nathan Twining** with a request for a statement on the discs so an authorized UFO project can be requested. Col. **Howard McCoy** asks for a meeting between **Alfred Loedding** (aeronautics engineer at T-3), Lt. Col. **George Garrett** (Collections), and Charles Carroll (a math and missiles expert who has been correlating UFO sightings with approaches of planetary bodies) “in order to set up a system for evaluating the information being received.” These four will later form the core of the ETH-friendly faction at Project Sign. (RosRept, p. 13; Michael D. Swords, “Project Sign and the Estimate of the Situation,” *JUFOS* 7 (2000): 33–35; Letter to T-2 from Executive Air Intelligence Requirement Division, September 3, 1947; *Sparks*, p. 13; Swords 42, 43)

September — Astronomer **Lincoln LaPaz** arrives in Roswell, New Mexico, and rediscovers the area of blackened ground earlier found by two of Wilcox’s deputies. He speaks to some witnesses and determines there might have been more than one object.

September 3 — A memo from Col. R. H. Smith at Air Defense Command headquarters at Mitchel Field on Long Island, New York, states that the intent of USAF cooperation with the FBI was to “relieve the numbered Air Forces of the task of tracking down all the many instances which turned out to be ash-can covers, toilet seats, and whatnot.” (ClearIntent, p. 156; Michael Hesemann and Philip Mantle, *Beyond Roswell*, Marlowe, 1997, p. 66)

September 3 — Dale Edwards and three friends are camping out in the Desolation Wilderness area west of Lake Tahoe, California, when one of them spots a huge gray UFO accompanied by a rush of warm air. The next day they encounter a circle, 40 feet in diameter, of recently burned grass and skunk cabbage. (“True Mystic Experiences,” *Fate*, 2, no. 3 (September 1949): 74–82)

September 5 — In response to the Garrett Estimate, Gen. **Curtis LeMay** states in a memo, copied to the FBI, that “a complete survey of research activities discloses that the Army Air Force has no project with the characteristics similar to those which have been associated with the Flying Discs.” (Michael D. Hall and Wendy A. Connors, *Alfred Loedding and the Great Flying Saucer Wave of 1947*, Rose Press, 1998, p. 83)

September 5 — In Washington, D.C., **Alfred Loedding** (as Wright Field T-2’s liaison with the Pentagon) meets with Garrett and Carroll. Flying disk reports at the Pentagon are transferred to Wright Field, Ohio, shortly afterwards. (Michael D. Swords, “Project Sign and the Estimate of the Situation,” *JUFOS* 7 (2000): 34)

Mid-September — **Twining** passes the Garrett Estimate on to Col. **Howard McCoy**, Maj. Gen. **Alden Crawford** (chief of T-3), Gen. **Franklin O. Carroll** (director of research and development), Col. C. K. Moore (aircraft laboratory chief), Col. Russell Minty (power-plant laboratory chief), and Brig. Gen. **Edgar P. Sorensen** (Air Institute of Technology commander). They each study Garrett’s report and hold a conference on the discs. (Michael D. Swords, “Project Sign and the Estimate of the Situation,” *JUFOS* 7 (2000): 33)
September 16 — An incoming radar target is picked up at Itazuke Air Base [now Fukuoka Airport], Fukuoka, Japan, moving 840–900 mph, then fading out. (Col. James F. Olive Jr., “Radar Pick-Ups of High-Speed Targets in the Far East,” Memorandum for Assistant Chief of Air Staff, Washington, D.C., September 26, 1947)

September 17 — The US Senate confirms James Forrestal as the first Secretary of Defense.

September 18 — The reorganization of military and intelligence agencies under the National Security Act takes effect. The US Army Air Forces is disbanded and becomes the US Air Force.

September 19 — FBI Special Agent Harry M. Kimball in San Francisco passes Col. R. H. Smith’s memo up the chain to Hoover. (ClearIntent, p. 156)

September 19 — A dubious document, allegedly written on this date by DCI Adm. Roscoe Hillenkoetter and titled “Examination of Unidentified Disc-Like Aircraft near Military Installations in the State of New Mexico: A Preliminary Report,” has been circulated by Timothy S. Cooper. It purports to verify the “recovery of unidentified planform aircraft” in two locations on July 6. (Good Need, p. 95)

September 19 — 5:30 p.m. A geophysicist employed by the Humble Oil and Refining Company is testing a weather radar at Grand Isle, Louisiana, when the radar detects an object moving in a southwesterly direction at about 1,000 mph. It persists for about one minute, so he records it in his notebook and discusses the sighting with other scientists. No visual sighting is made. (Houston Press, March 24, 1950; Jan L. Aldrich, “Project 1947: A Progress Report,” March/April 1996)

September 21 — Arrangements are made to transfer UFO files from Garrett’s office in the Pentagon to Alfred Loedding at AMC. (Swords 43)

September 23 — Head of Air Materiel Command Gen. Nathan Twining responds to Schulgen’s request for UFO information with a classified letter composed by Col. McCoy with the assistance of Alfred Loedding. “AMC Opinion Concerning ‘Flying Disks.’” Twining notes the discs are “real and not visionary or fictitious.” Reports (based on the cases in the Garrett Estimate) include “extreme rates of climb, maneuverability (particularly in roll), and action which must be considered evasive.” Twining gives three reasons to study the discs: They might represent a deep-black domestic project; to pick up physical evidence; and to find out if they are nuclear-propulsion devices from Russia or elsewhere. The letter lists common descriptions of the objects and recommends that USAF “issue a directive assigning a priority, security classification, and code name for a detailed study of the matter.” This will ultimately result in Project Sign. Henceforth all disc reports are to be sent to the Army and Navy Research and Development Board, the USAF Scientific Advisory Group, the Atomic Energy Commission, the National Advisory Committee for Aeronautics, Project RAND, and the Nuclear Energy for the Propulsion of Aircraft project at Oak Ridge. Twining promises a detailed “Essential Elements of Information” (EEI) to be formulated immediately so that all agencies will have guidance. (Lt. Gen. Nathan Twining, “AMC Opinion Concerning ‘Flying Disks.’” September 23, 1947; RosRept, p. 14; Swords 42, 476–478; Good Above, pp. 260–262, 476–478)

September 24 — DCI Hillenkoetter, in a letter to AMC, designates T-2 and the Air Intelligence branch of the US Navy Bureau of Aeronautics as National Assets. He indicates that he does not plan to duplicate air technical intelligence assets within the CIA. (Jan Aldrich)

September 24 — President Truman meets with Vannevar Bush, chairman of the Research and Development Board, at the White House. Secretary of Defense James Forrestal is also present. (Stanton T. Friedman, Top Secret / MAJIC, Marlowe, 1996, pp. 68–69)

September 24 — Col. Miles E. Goll, in a memo signed for Col. McCoy, asks about a radar case in Japan that Charles Carroll had mentioned to Alfred Loedding in their meeting of September 5. (Dr. Carroll’s UFO files; Jan Aldrich)

September 25 — A memorandum from Maj. Robert J. Thomas lists the names of nine military personnel in charge of events in the aftermath of the Roswell, New Mexico, recovery. However, it is now largely considered a forgery by Frank Kaufmann. (Kevin D. Randle, “Frank Kaufmann, Roswell Witness,” IUR 27, no. 3 (Fall 2002): 8, 17–19; Mark Rodeghier, “Frank Kaufmann Exposed,” IUR 27, no. 3 (Fall 2002): 9–11, 26)

September 26 — A memorandum from Col. James F. Olive Jr., Chief of Air Intelligence Division, to the Assistant Chief of the Air Staff, A-2, summarizes three radar trackings of high-speed targets in Japan (Chitose Air Base, July 1; and MEW Radar Station, Fukuoka, August 28 and September 16). It concludes that there is insufficient information to state that they involved aircraft or missiles but supports the conclusion that they were not natural phenomena. The report is forwarded to T-2 on September 29. (Col. James F. Olive Jr., “Radar Pick-Ups of High-

Early October — Private pilot Selman E. Graves claims to have witnessed part of the recovery of a crashed UFO in Paradise Valley, Arizona, on property owned by his friend, Walt Salyer. (Good Above, *pp. 394–397*

October 1 — *Bureau Bulletin* 59 ends all FBI cooperation with the Air Force on UFO investigation, although the FBI continues its own inquiries. (ClearIntent, *p. 159*)

October 1 — A letter from Truman to Vannevar Bush appears to bear the original Truman signature used in the MJ-12 fake memo.

October 7 — Capt. R. V. A. Therien of the Royal Swedish Navy states at USAF headquarters that some ghost rockets have been observed making 180° turns, and about 33 of the incidents are considered factual. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 August 1st–December 31st, Supplemental Notes*, The Author, 2001, p. 76)

October 14 — Bernt Balchen, Norwegian Airline director and former USAF Colonel, gives USAF headquarters information about two radar locations and a rocket firing incident observed in the Petsamo region (Pechengsky District) of Finland, recently ceded to Russia. Gen. Alfred A. Kessler Jr., former US military attaché in Sweden, disputes Therien’s information. He says only two ghost rocket sightings are possibly factual, but there is no evidence to authenticate them. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1947 August 1st–December 31st, Supplemental Notes*, The Author, 2001, p. 76)

October 14 — Test pilot Chuck Yeager unofficially breaks the sound barrier (670 mph) for the first time in an experimental rocket-powered Bell X-1 at Muroc [now Edwards] AFB, California. (Wikipedia, “Chuck Yeager”)

October 20 — A farmer named Britton sees two cigar-shaped UFOs traveling a straight course at high speed about one mile in height in trail formation near Dayton, Ohio. They leave a slight vapor trail then disappear suddenly. (NICAP, “Farmers Observe Two Cigars”; Keyhoe, FSTS, p. 89; *Sparks*, p. 29)

October 21 — A preliminary EEI document, indicating that the radar detection of UFOs near Fukuoka, Japan, on September 16 has played a role in concerns about disc maneuverability, is circulated to the European Command by Lieut. Col. Malcolm D. Seashore, former acting chief of the Analysis Section at AMC under McCoy. It expresses concern about German/Russian technology and adds disc characteristics of hovering, disappearance, quick grouping, and sudden appearance. (“Flying Disc Information Request to European Command, October 1947”; Michael D. Swords, “Project Sign and the Estimate of the Situation,” *JUFO* 7 (2000): 35; Swords 43, 479–484)

October 21 — The jet-propelled Northrop YB-49 makes its first test flight from Jack Northrop Field in Hawthorne, California, reaching Muroc AFB in 32 minutes. (Wikipedia, “Northrop YB-49”)

October 28 — Brig. Gen. George F. Schulgen, Chief of USAF Intelligence Requirements Division, writes a five-page report based on the characteristics listed in the September 23 *Twining* letter (though in greater detail) and the preliminary EEI of October 21. Titled “Intelligence Requirements on Flying Saucer Type Aircraft: Draft of Collection Memorandum,” it lists things investigators should try to determine about UFO propulsion, control, construction, arrangement, landing gear, and power plant. It considers the objects “to be a manned aircraft, of Russian origin, and based on the perspective thinking and actual accomplishments of the Germans” (page 5, paragraph 4). [However, a fake version of this document has the phrase “it is the considered opinion of some elements that the object may in fact represent an interplanetary craft of some kind…. The presence of an unconventional or unusual type of propulsion system cannot be ruled out and should be considered of great interest.” Other deletions and additions are present in the fake document.] (George F. Schulgen, “Intelligence Requirements on Flying Saucer Type Aircraft: Draft of Collection Memorandum,” October 30, 1947 [PDF of real memo, pp. 1–6, PDF of fake memo, pp. 7–12]; RosRept, p. 35; Good Above, p. 262; Robert G. Todd, “Fake Air
November — Former Messerschmitt test pilot Fritz Wendel tells US Army CIC that the Horten brothers were working on an advanced aircraft in Heiligenbeil, East Prussia [now Mamonovo, Russia] right after the war. The airplane is 33 feet long, shaped like a half-moon, and has no tail. It can fly to 12,000 feet. Wendel’s story is corroborated by a German informant named Prof. George, who describes a later Horten craft as able to fly at 1,200 mph because it is propelled by rockets. (Jacobsen, Area 51, pp. 41–42)

November 6 — Chuck Yeager again makes an unofficial airspeed record of 891 mph in a Bell X-1 at Muroc AFB, California. (Wikipedia, “Chuck Yeager”)

November 10 — Lt. Col. Walker sends a memo to his field commands in Germany in response to the September 23 Twining letter. It calls for a discreet canvass into finding German engineers who might know of similar technology. (“The Walker Memo,” The Roswell Files)

November 12 — Early morning. US Navy Second Officer Williamson on the USS Ticonderoga 40 miles north or south of Cape Blanco, Oregon, sees two fireballs with fiery tails heading northwest at 700–900 mps. Possible meteors. (Sparks, p. 29)

November 18 — Boise Idaho Statesman Aviation Editor David N. Johnson, having heard of the USS Ticonderoga sighting, writes to Gen. George E. Stratemeyer at Mitchel Field, New York, for information and asking eight questions about the Army’s investigation. Stratemeyer passes the query on to Garrett and Taylor. (Swords 43)

December 8 — Pilots observe a reddish light moving at moderate speed over Las Vegas, Nevada. It emits a flash of green light and shoots upwards at a “tremendous speed.” (UFOEv, p. 149)

December 11 — Garrett and Taylor write a memorandum to the USAF Public Relations Office outlining the proper answers to questions such as Johnson has asked. (Swords 44)

December 14 — 12:20 a.m. Six staff sergeants at Fort Bragg, North Carolina, watch a domed disc with a glowing green corona surrounding it moving slowly at a slightly tilted angle. It skims the treeline (causing the tops of the trees to wave slightly) and takes off to the northwest. They estimate it is 50–75 feet in diameter and flying at 200 feet altitude. (Project 1947 case file)

December 16 — Army Lt. Col. Harry H. Pretty in Berlin writes a memo to the Deputy Director of Intelligence in Berlin stating that the Horten brothers (Reimer and Walter) have been located in Göttingen, Germany. He says they are eccentric and quarrelsome. Though they were responsible for the Horten Ho 299 (a prototype fighter/bomber flying wing design), his investigation concludes that no saucer design “ever existed nor was projected by any of the German air research institutions.” (Lt. Col. Harry H. Pretty, “Horten Brothers (Flying Saucers),” December 16, 1947)

December 17 — US Air Force Chief of Staff Gen. Carl Spaatz tells the Idaho Statesman he does not rule out the possibility of the flying disks being “foreign experimentation.” He adds that the Air Force is still investigating and he still wants people to report their sightings. (“Spatz Leaves Door open on Chance ‘Flying Discs’ Are of Foreign Origin,” Boise Idaho Statesman, December 17, 1947, p. 1)

December 18 — Pentagon Col. James F. Olive Jr. (chief of AFOAI) and Lieut. Col. J. E. Thomas of the Offensive Air section (AFOAI-OA) respond to a request by deputy chief of Air Staff for Research and Development Gen. Curtis LeMay on the status of flying disc analysis. They complete their reanalysis of the earlier documents from the Pentagon and Wright-Patterson, rewrite a new EEl indicating a potentially serious but puzzling phenomenon, and turn this over to Chief of Air Force Intelligence McDonald for his signature. (“Analysis of ‘Flying Disc’ Reports,” December 18, 1947; Michael D. Swords, “Project Sign and the Estimate of the Situation,” JUFOS 7 (2000): 36; Swords 43, 485–491)

December 19 — The Research and Development Board has its first meeting.

December 22 — The final EEl, called “Analysis of Flying Disc Reports,” is issued by Chief of USAF Intelligence George C. McDonald, who concurs with AMC’s recommendation of September 23 and forwards it to director of USAF Research and Development Gen. Laurence Cardee Craigie for a reply. Gen. Charles Cabell, the new chief of AFOIR, signs off on this. (“Analysis of ‘Flying Disc’ Reports,” December 18, 1947; Michael D. Swords, “Project Sign and the Estimate of the Situation,” JUFOS 7 (2000): 36)

December 26 — At the American Association for the Advancement of Science meeting in Chicago, Illinois, University of Iowa astronomer Charles C. Wylie proposes a coast-to-coast sky patrol to report on rockets, meteors, or flying saucers. He says that “mass hysteria” about saucers could have been prevented with a sky patrol in place. (“Sky
December — By now, ATIC has received 156 UFO reports. Aerodynamicists at ATIC and AMC agree that no German design can match UFO performance. The USAF Aeromedical Laboratory says that even if such a craft can be built, the human body cannot withstand the maneuvers, and USAF materials specialists say that no known material can withstand them either, as well as the heat of high speeds. Ruppelt later writes, “Why couldn’t these people, whoever they might be, stand these horrible maneuver forces? Why judge them by earthly standards? I found a memo to this effect was in the old Project Sign files.” (Ruppelt, p. 28)

December 30 — Gen. Laurence C. Craigie, director of USAF R&D and successor to Gen. Curtis LeMay (who has returned to Europe), advises the AMC commanding general that USAF policy is not to ignore UFO reports, but to collect, evaluate, and act on the information. He establishes Project Sign (Project HT-304 under USAF Technical Instruction no. TI-2185) in a memo titled “Flying Discs.” Alfred Loedding, who is convinced that the flying discs are extraterrestrial, may have come up with the “Sign” designation. It carries a 2A restricted classification. (Gen. Laurence C. Craigie, “Flying Discs,” Memorandum to Commanding General, Air Materiel Command, December 30, 1947; Sparks, p. 11; Condon, p. 896; “Report by the Director of Intelligence, USAF, to the Joint Intelligence Committee on Unidentified Aerial Objects,” April 28, 1949, p. 2; Michael David Hall and Wendy Ann Connors, “Alfred Loeding: New Insight on the Man behind Project Sign,” IUR 23, no. 4 (Winter 1998): 24). Craigie, after his retirement from the Air Force in 1955, indicates that he believes UFOs are a waste of time and only approved Project Sign because of internal USAF politics. (Joel Carpenter)

1948

1948 — David T. Keating, an employee of the USAF Nuclear Energy for the Propulsion of Aircraft group, is flying with the 166th Fighter Squadron of the Ohio National Guard out of Lockbourne AFB [now Rickenbacker Air National Guard Base] in Lockbourne, Ohio. While executing a flip of his P-51 at 18,000 feet, he sees a silvery disc zoom above his plane. He goes in pursuit of it at 325 mph and closes to within 240 feet of it. It seems to be 40 feet in diameter and 6 feet thick, with a vertical stabilizer rudder on the end. He keeps flying after it even when he loses sight of it. “About 10 miles south of the Ohio River,” he claims, “I spotted litter on a hillside and a path that had obviously been ripped up by a crashing plane.” Short on fuel, he returns to Lockbourne. He persuades his major to fly over the crash scene, and they send a truck to retrieve the remains. (Helen Knox, “Ridge Newcomer Tells of Game of Tag with ‘Saucer,’” The Oak Ridger, September 18, 1950; Clark III 325)

1948 — An airman stationed in Arizona is called out with a scientific team to examine a flying saucer that has crashed near Taos, New Mexico. When he arrives, the area is roped off and under military guard. The object is metallic with a flat circular airfoil. The cabin at the top center is too small for a normal-sized human. He is told by workers on the scene that bodies of “little men” have been removed from the craft. They discover that the ship is constructed of interlocking sections pinned together, but they cannot locate a power plant, except possibly some electromagnets below the cabin. (L. J[ames] Lorenzen, “Aimé Michel’s Orthotenic Lines,” APRO Bulletin, July 1958, pp. 6–7; Clark III 325)

1948 — British author and ex-MI5 operative Bernard Newman publishes a novel titled The Flying Saucer, the first book to use that phrase in its title. The story revolves around a group of scientists who create a fake Martian threat in order to bring the world together. Plot elements include a trio of staged saucer crashes (in New Mexico, Russia, and the UK), propaganda, and even an alien autopsy. (Bernard Newman, The Flying Saucer, Gollancz, 1948; Andrew May, “The Flying Saucer,” Retro-Forteana, June 30, 2013; Kremlin 43–45)

1948? — Sylvia Hall, 11, wakes up at her home on the corner of Riggs Road and Lateral 1 Road south of Yakima, Washington, when her bedroom fills with bluish-white light pouring in through the closed west window. Some 100 feet above the ground is a huge bright cloud. Gliding down from it in groups of four on something like a ramp are tall people with bluish-silvery robes. She watches them for 10 minutes, then she has an overpowering desire to go back to bed. She tells no one about the experience until she is an adult. (Greg Long, “Strangeness at Yakima,” IUR 19, no. 4 (July/Aug. 1994): 16–17)

January 6 — 3:00 p.m. Bernice Zaikowski, 61, of Chehalis, Washington, hears a “sizzling and whizzing” sound and looks up to see a “birdman” hovering 200 feet above her barn. She watches “a man equipped with long silver wings fastened over the shoulders with a strap” ascend rapidly, hover, bank, then fly away. “He flew in an upright position and appeared to be manipulating controls strapped to his chest.” The wings do not flap; instead they retract close to his body during ascent, and are extended to hover or proceed in horizontal flight. Zaikowski says
five other adult witnesses and a number of children also see the birdman. (‘‘Flying Man’ Is Chehalis Report,’’ Coos Bay (Oreg.) World, January 21, 1948, p. 2; Lyle Zapato, “The Birdmen of Cascadia,” ZPi blog, March 24, 2007; Clark III 270)

January 7 — 1:00 p.m. Kentucky State Police telephone Commanding Officer Col. Guy F. Hix’s office at Godman Army Airfield in Fort Knox, Kentucky, reporting an unidentified object near Elizabethtown, Kentucky. Another call to Hix comes from state police at about 1:10 p.m. of an observation by a civilian in Madisonville, Kentucky, through a Finch telescope of a cone-shaped object about 100 feet tall by 43 feet wide, at an altitude of 4 miles and moving at 10 mph. This is apparently General Mills Skyhook balloon Flight B, which passes about 40 miles to the southwest of Madisonville. Other reports come in from Lexington and Mannsville, Kentucky. (Sparks, p. 30)

January 7 — 1:20–2:10 p.m. Army Flight Service reports to Godman Army Airfield control tower that the object is over Irvington then Owensboro, Kentucky. Godman Tower Operator Tech/Sgt Quinton A. Blackwell, Capt. James F. Duesler Jr., Base Air Inspector Lt. Col. E. Garrison Wood, and other USAF personnel see a round or ice-cream-cone-shaped white or silver object with a revolving red streamer toward the south beginning at 1:50 p.m. Many others see it as well after 2:07 p.m., such as Operations Officer Capt. Cary W. Carter and Col. Guy F. Hix. (Sparks, p. 30)

January 7 — 2:50 p.m. Capt. Thomas F. Mantell Jr., a 25-year-old Kentucky Air National Guard pilot, and three others are flying F-51D fighters to Louisville, Kentucky. After Mantell reports his position to Standiford Field in Louisville, Tech/Sgt. Quinton A. Blackwell at Godman Army Airfield at Fort Knox breaks in over the radio to request Mantell to intercept and identify the object. The object maintains a constant angular position as seen from Godman as it apparently moves away at about 240–300 mph at an altitude of 50,000–60,000 feet during most of Mantell’s pursuit. Flying at 300 mph and gradually climbing to about 22,000–23,000 feet, Mantell gradually overtakes the UFO from below, past Bowling Green, Kentucky, at about 3:10 p.m. In one of his last radio reports, Mantell says the UFO “appears to be a metallic object or possibly reflection of sun from a metallic object, and it is of tremendous size.” At 3:15 p.m., at 22,500 feet with oxygen running low, two other F-51Ds quit the chase. Mantell continues to 25,000, blacks out, and crashes at 3:18 p.m. about 4 miles south-southwest of Franklin, Kentucky. The UFO disappears from view behind a cloud at Godman at 3:50 p.m. The Project Sign staff, still not yet formally organized, are under pressure to come up with some kind of answer, so they quickly float Venus (offhandedly suggested by Ohio State University astronomer J. Allen Hynek) as an explanation. This implausible explanation is not even believed by the Air Force, but it remains unchallenged for several years. In 1952, Ruppelt reopen the case and identifies the object as a secret Skyhook balloon, although he cannot confirm a launch that day. Army veteran Clifford Stone finds later that there had been no Skyhook launches since late December. However, Barry J. Greenwood and Robert Todd tentatively identify the balloon as one launched from Camp Ripley near Little Falls, Minnesota, on January 6. (Wikipedia, “Mantell UFO incident”; NICAP, “The Mantell Case”; Clark III 706–710; Ruppelt, p. 31; Good Above, pp. 262–263; Good Need, pp. 104–105, Sparks, pp. 30–31; Michael D. Swords, “Project Sign and the Estimate of the Situation,” JUFOS 7 (2000): 37; “The Mantell UFO: A Smoking Gun, Maybe!” Just Cause, no. 39 (March 1994): 9–10; “The Mantell UFO: A Smoking Gun, Maybe! Part Two” Just Cause, no. 40 (June 1994): 8–12; Christopher D. Allan, “The Mantell Case—50 Years Later,” IUR 23, no. 1 (Spring 1998): 7–9, 31–32; Michael D. Swords, GrassRoots UFOs: Case Reports from the Timmerman Files, Fund for UFO Research, 2005, pp. 137–138; Kevin D. Randle, “The Mantell Analyses,” A Different Perspective, September 21, 2017; Center for UFO Studies, [clippings and documents on Mantell case]; Swords 51–52; Francis Ridge, The Mantell Incident: An Anatomy of a Re-Investigation, The Author, 2010; Flight Handbook, USAF Series F-51D Aircraft, January 20, 1954)

January 7 — 4:45–7:06 p.m. USAF 1Lt. Paul I. Orner tracks an unidentified white light with red coloration in a weather theodolite at Godman Army Airfield in Fort Knox, Kentucky, for more than 2 hours. (Sparks, p. 31)

January 7 — 7:15 p.m. Air Traffic Controller and pilot Alex A. Boudreaux and VHF Direction-Finding (DF) Operator and amateur astronomer Frank M. Eisele, 103rd AACS Squadron, at Lockbourne AFB [now Rickenbacker Air National Guard Base] in Lockbourne, Ohio, spot a bright object to the southwest of the airfield that appears and disappears intermittently. Fighter pilot USAF Capt. Charles E. McGee sees the object on runway 23 landing approach when he is at about 1,800 feet. The light seems to be at about 3,000 feet to the southwest about 4–5 miles away, then later on the ground to the west about 6–7 miles away. USAF VHF DF Operator and pilot Albert R. Pickering, Detachment 733, 103rd AACS Squadron, is awakened by the sudden emergence of a lighted amber-colored round or oval object about the size of a C-47 or larger [60+ feet] dropping out of the overcast bank 10,000 feet overhead. Lockbourne Control Tower at the same time radios a report of the object, which then maneuvers over to Commercial Point about 3–5 miles away to the west-southwest, then makes three full 360° circles over one spot in 30-40 seconds per turn over the runway, at a speed of more than 500 mph, leaving a luminous, amber-colored trail or exhaust about 5 times its length. Then the UFO goes to another location and does more 360°
February — 2:00 a.m. Glancing out his window while getting a drink of water, farmer C. Bruce Stevenson notices a bright orange-amber glow near his farm buildings a few miles from Circleville, Ohio. He expects to find the buildings on fire, but instead there is a large, domed flying saucer gliding silently over the roof of his pig house about 100 feet away. The UFO, about 60 feet in diameter, maintains a slow speed and low altitude until it disappears from sight. (“Bruce Stevenson Reveals Close-Up View of Saucer,” Circleville (Ohio) Herald, August 2, 1952, pp. 1–2; “Bruce Stevenson Claims Saucer Wasn’t Reflection,” Circleville (Ohio) Herald, August 7, 1952, p. 1; Project 1947, “UFO Reports, 1948”; Pete Hartinger, “America’s First Classic Close Encounter,” Pickaway Quarterly, Fall 1996, pp. 11–13)

February 4 — Capt. Richard W. Geuss, acting assistant adjutant general, writes a memo on behalf of Lieut. Gen. George E. Stratemeyer, to ADC and USAF commanding generals on “Investigation and Reporting of ‘Flying Disc’ Incidents.” It specifies that Air Force commanders are charged with evaluating military UFO incidents, in cooperation with CIC personnel and local FBI offices. Even hoaxes are to be passed on to the FBI. (Capt. Richard W. Geuss, “Investigation and Reporting of ‘Flying Disc’ Incidents,” February 4, 1948)

February 12 — Brig. Gen. Charles P. Cabell, chief of the Air Intelligence Requirements Division, sends a secret memo to Maj. Gen. Samuel E. Anderson, director of Plans and Operations, stating that the Commanding General of AMC feels that the responsibility for collecting information on “flying disks” should be complemented by a requirement that all USAF installations “provide a minimum of one each aircraft, with necessary crews, on a continuous alert basis. These aircraft should be equipped with gun camera, and such armament as deemed advisable, in order to
incorporating 8 informants, one of whom is a geophysicist named goes down near Phoenix with 2 dead occupants. The story turns out to be a being. Soon afterward, a crash occurs in Arizona and 16 bodies are taken from the wreckage. A study, the scientists conclude that the “vehicle probably flew on magnetic lines of force.”

Chocolate color, apparently as a result of the bodies of 16 small humanlike beings. Above, a Texas oilman, a farmer near Stockton, Kansas, sees a hovering object that leaves a bare spot in the ground. Kenneth Arnold is persuaded that reports of the Norton County meteorite fall might actually have been UFO-related. Astronomer Lincoln LaPaz directs the recovery of the massive achondritic meteorite in 1948. More than 100 stones are recovered, including one weighing about one ton. (Wikipedia, Norton County (meteorite); Norton County, Kansas; Meteorite Recovery, October 8, 2015: Luna Meteorite Hunters, Norton County, KS Fall 18FEB1948 More Than 60 Years Ago, February 26, 2009; Loren E. Gross, UFOs, a History: 1948, The Author, 1988, pp. 15–16; Michael D. Swords, “Project Sign and the Estimate of the Situation,” JUFOS 7 (2000): 37–40)

February 20 — 2:00 a.m. In Palm Beach, Florida, lawyer and writer Charles Francis Coe and his son Alan see a globe of light shooting across the sky to the northeast at terrific speed. Coe calls it a “ray or blob of light” and insists it is not a meteor. (“Mystery ‘Globe’ Seen by Editor,” Palm Beach (Fla.) Post, February 21, 1948, p. 1; “True Mystic Experiences,” Fate 1, no. 3 (Fall 1948): 105–113; Kenneth Arnold and Ray Palmer, The Coming of the Saucers, Palmer, 1952, p. 139)

February 20 — 1:15 p.m. Six surveyors, including Idaho Power Company surveyor E. G. Hall, see a small flat, heart-shaped UFO flying in the sky at Emmett, Idaho. Through his theodolite it looks fuzzy across its back edge as if “dipped in cream.” He says it was about the size of a Piper Cub airplane and flying point first below the cloud level at between 2,000 and 4,000 feet. (Emmett (Idaho) Messenger, February 26, 1948; Kenneth Arnold, “Are Space Visitors Here?” Fate 1, no. 2 (Summer 1948): 13)

March 12 — Maj. Earl S. Browning Jr., in a memo to the European command of the 970th CIC, writes that the Horten brothers have been located and interrogated by US officials. Walter Horten has remained in Germany as an officer in the German Air Force. He thinks that sufficient types of flying wing prototypes existed when the Russians invaded Germany and may have served as models for flying discs. Reimar Horten had emigrated to Argentina when the war ended. (Jacobsen, Area 51, p. 43)

March 17–18 — The USAF Scientific Advisory Board meets in Room 3E-869 of the Pentagon, with physicist Theodore von Kármán presiding. Col. McCoy is present and speaks briefly about Project Sign, saying it has over 300 reports, many of them from experienced observers: “I can’t even tell you how much we would give to have one of those crash in an area so that we could recover whatever they are.” (Howard McCoy, “Scientific Advisory Board Conference Held 17–18 March 1948, Room 3E-869, the Pentagon, Washington, D.C.”)

March 23 — RAF pilot John Cunningham reaches an altitude of 59,430 feet in a de Havilland Vampire turbojet. (Wikipedia, “John Cunningham (RAF officer)”)

March 25 — 5:00 a.m. According to writer Frank Scully, who hears the tale from a scientist he refers to as “Dr. Gee” and a Texas oilman, a UFO crashes on a rocky plateau off Hart Canyon Road east of Aztec, New Mexico. When Air Force investigators and government scientists arrive on the scene, they crawl through a broken porthole and find the bodies of 16 small humanlike beings (3–3.5 feet tall) dressed in the “style of 1890.” Their skin is charred a chocolate color, apparently as a result of the rush of terrestrial air through the shattered window. After a thorough study, the scientists conclude that the “vehicle probably flew on magnetic lines of force.” Segments of the craft, as well as the bodies, are supposedly transported to Wright Field in Ohio. Dr. Gee, who claims to have been on the scene, said the UFO is likely from Venus, as Martians “would probably be three or four times as large as human beings.” Soon afterward, a crash occurs in Arizona and 16 bodies are taken from the wreckage. A third spacecraft goes down near Phoenix with 2 dead occupants. The story turns out to be a hoax dreamed up by two con men named Silas Newton and Leo GeBauer (“Dr. Gee,” although Scully claims this was a composite character incorporating 8 informants, one of whom is said to be geophysicist Carl A. Heiland). The hoax is loosely based on

Spring — Ray Palmer and *Flying* magazine editor Curtis Fuller publish the first issue of *Fate* magazine at Clark Publishing Company in Chicago, Illinois. It features a first-hand story and a 30-page UFO roundup by Kenneth Arnold, as well as a history of unconventional aircraft by Curtis Fuller. Palmer and Fuller use the shared pseudonym “Robert N. Webster.” The issue sells a healthy 50,000 copies. It is still being published in 2022. (Kenneth Arnold, “Did See the Flying Disks?” *Fate* 1, no. 1 (Spring 1948): 4–10; Kenneth Arnold, “The Mystery of the Flying Disks,” *Fate* 1, no. 1 (Spring 1948): 18–48; Robert N. Webster [Curtis Fuller], “What Were the ‘Doughnuts’?” *Fate* 1, no. 1 (Spring 1948): 12–17; Clark III 872)

Spring — Kenneth Arnold visits the Landing Aids Experiment Station in Arcata, California, and interviews Kenneth W. Ehlers, a radar technician (and later physicist) working on airport operational systems, including radar. He has been accumulating information on unidentified radar targets (he calls them “gizmos”) that cannot be seen with the naked eye and sending reports on their flight paths to Navy meteorologist Florence Van Straten and Luis Walter Alvarez, the inventor of Ground Control Approach System radar. In many cases, the target indicates a small solid target flying around 30 mph. The targets always fly in the same path from northwest to southeast, along the coast. Sometimes they come to a complete halt; at other times they split into two objects, merging later. Ehlers notes that the targets have been attributed to insects, but he is skeptical. Later, he suspects they might be plasmas occurring at the inversion layer, but that does not explain their behavior. (Wesley Price, “The Sky Is Haunted,” *Saturday Evening Post* 220, no. 36 (March 6, 1948): 13; Ray Palmer, “New Report on the Flying Saucers,” *Fate* 4, no. 1 (January 1951): 63–81; “Landing Aids Experiment Station,” Transocean Air Lines; Greg Long, “In Search of Gizmos: A 1947 Radar Case,” IUR 19, no. 6 (Nov./Dec. 1994): 15–20)

Spring? — President Truman asks Col. Robert B. Landry, his USAF aide, to provide him with quarterly verbal reports on the state of UFO information and research. He does so to the end of 1952, with possibly 18 briefings in all. (James R. Fuchs, “Oral History Interview with Robert B. Landry,” Harry S. Truman Library and Museum, February 28, 1974)

April — Morning. US Weather Bureau meteorologist Walter A. Minozewski at the Richmond, Virginia, weather station and his staff catch sight of a bright metallic, elliptical disc while they are tracking a small ceiling balloon at 15,000 feet. He checks his observation through a theodolite telescope. The disc flies just below the balloon and remains in sight for 15 seconds, appearing much bigger than the balloon. It has a flat, level bottom and a dome on top. It remains on a westward heading at high speed, then vanishes off into the distance. (Ruppelt, p. 41; Bloecher, p. 1-1)

April 1 — 9:55 a.m. USAF 1stLt. Robert W. Meyers is leading a flight of four P-47s from the 67th Fighter Group about 9 miles southeast of Sorsogon City, Luzon, Philippines. At 1,500 feet, he notices an unusual silvery object about 3 miles to the east. Shaped like a flying wing or half-moon with a “turtle back,” it resembles no military craft in use at the time. The object flies below the squadron at 200 mph and an altitude of about 1,000 feet. Meyers estimates it is about 30 feet wide and 20 feet long. When he attempts to contact the other three P-47s, he realizes his radio is dead. As he makes a 270° left turn to get a closer look, the object makes a 90° left turn and moves away at tremendous speed. It is only visible for about 5 seconds. (NICAP, “P-47 Flight Encounters Half-Moon Object”; Sparks, p. 33)

April 5 — Afternoon. At Holloman AFB, near Alamogordo, New Mexico, three highly trained balloon observers (Joseph Olson, Johnson, and Chance) are working on a secret project for the Air Force’s Watson Laboratories. They see
two objects. One observer follows one object, and the others follow the second as they diverge. All are certain that the objects aren’t balloons. They are large, whitish, roundish, very high, faster than any aircraft, and perform rapid, erratic motions. One object is lost at a low altitude. The other goes up quickly and seems to just disappear. The observation lasts about 30 seconds. The case is deemed important enough to send Alfred Loedding and one of Clingerman’s assistants, Lt. Col. James C. Beam (the head of Project Sign), to New Mexico to interview Project Mogul scientist James W. Peoples and the other witnesses. Unfortunately, they are gone when Sign arrives. (They are later interviewed at the USAF Watson Laboratory complex in Red Bank, New Jersey.) The witnesses are very sure of themselves and the case is classed as “Unidentified.” While at Holloman, Loedding and Beam talk with Lt. Herbert G. Markley, who has worked with the Watson team. Markley remembers one of them speaking of unusual radiation returns from their equipment, but later the Watson personnel say that these were probably just “angels” (spurious echoes due to atmospheric microstructures, insects, equipment malfunction, or other stimuli). Markley does report that UFOs are seen around Holloman often. He himself has seen a disc in late August 1947 and flat, round aerofoams on at least two further occasions. (NICAP, “Team Watches 35-Meter Disc”; Ruppelt, p. 71; Michael D. Swords, “Project Sign and the Estimate of the Situation,” JUFOS 7 (2000): 40–41; Sparks, p. 33; Project 1947, “Holloman AFB UFO Sightings”)

April 9 — Viola Johnson of Longview, Washington, and another witness see three “flying men” circling the town. She says they are “dressed in khaki-colored flying suits with helmets over their faces.” (Clark III 777)

April 15 — 6:17 a.m. The X-Ray nuclear device is detonated near Enewetak Atoll in the Marshall Islands. B-17 pilotless drone aircraft are flown through the cloud, and a drone light tank is used to recover soil samples from the crater. Unfortunately, it becomes bogged and must be towed out 10 days later. (Wikipedia, “Operation Sandstone”)

April 23 — A preliminary 25-page report, written by Project Sign’s Col. Howard McCoy and Lt. Col. James C. Beam, summarizes UFO reports received through February 1, with attached memos and documents. It is addressed to Chief of Staff Hoyt Vandenberg and Director of Intelligence Charles P. Cabell. The Rhodes photos and 99 other cases are listed. A comment by chemist Irving Langmuir is appended, noting his doubts about the reality of flying discs. (Col. Howard M. McCoy, “Project Sign,” April 23, 1948; Swords 54–55)

April 27–28 — Physicist Joseph Kaplan, a member of the USAF Scientific Advisory Board, visits the Kirtland AFB Office of Special Investigations, AEC’s Sandia Base, and Los Alamos in New Mexico, under orders from Theodore Von Kármán, chairman of the USAF Scientific Advisory Board, to review UFO reports and investigations from the area. Kaplan and Lincoln LaPaz meet with security personnel at Los Alamos. Kaplan reports that “these occurrences relate to the National Defense of the United States” and should be investigated scientifically.” (Good Above, p. 266)

May — An article on secret Skyhook balloons (without mentioning the project name) by Devon Francis is published in Popular Science. (Devon Francis, “New Balloons Explore Roof of the Airways,” Popular Science, May 1948, pp. 98–104)

May 5 — An Efficiency Rating report is written up for Alfred Loedding from Miles E. Goll, which mentions his work as a monitor for Project Sign. (Miles E. Goll, “Efficiency Rating of Mr. Alfred C. Loedding,” May 5, 1948)

May 7 — Afternoon. Mr. and Mrs. Fordyce J. Kaiser and their housekeeper Jean Bray, at 251 W. Waldorf Avenue, Memphis, Tennessee, see 50–60 unusual objects, apparently moving very high and fast, traveling in straight lines with slight zigzagging. They are shiny like bright aluminum with silvery trails. Lt. Col. James C. Beam of Project Sign goes to investigate. On the way back, he consults with astronomer Paul Herget of the Cincinnati Observatory in Ohio, who thinks the objects are meteors and recommends Ohio State University astronomer J. Allen Hynek in Columbus as a project consultant. (Loren E. Gross, UFOs, a History: 1948, The Author, 1988, pp. 28–29; Sparks, p. 34; Michael D. Swords, “Project Sign and the Estimate of the Situation,” JUFOS 7 (2000): 41; Swords 55–56)

May 12 — European Command HQ sends the director of intelligence at the US Forces in Austria a memo alleging that Walter Horten has admitted he has been in contact with the Russians. (Jacobsen, Area 51, p. 43)

May 14 — Douglas Aircraft Company creates the RAND Corporation, a global think tank to offer research and analysis to the US military. It is financed by the US government, endowments, corporations, universities, and private individuals. (Wikipedia, “RAND Corporation”)

May 15 — During the Zebra nuclear detonation at Enewetak Atoll in the Marshall Islands, a manned aircraft accidentally flies through the mushroom cloud. Because the pilot and crew “suffered no ill effects,” the Air Force decides that piloted aircraft could collect samples. The Los Alamos, New Mexico, personnel assigned to remove the filters from the B-17 drones have apparently carried out the same procedure on X-Ray and Yoke without problems, but this time three of them suffer radiation burns on their hands serious enough to be hospitalized and need skin grafting. One of the men who carries out the procedure for Yoke is then also found to have burns on his hands and is also hospitalized but is discharged on May 28. Once again, the drone tank gives trouble and bogs in the crater,
but the soil samples are retrieved by the backup drone tank. Both tanks are subsequently dumped in the ocean. (Wikipedia, “Operation Sandstone”; Jacobsen, Area 51, p. 224)

May 15 — A piston-driven YB-35 flying wing bomber makes its first and only flight at Edwards AFB in California. (Wikipedia, “Northrop YB-35”)

May 17 — Day. William A. Bonneville sees a bright white ball, three times as bright as a locomotive headlight, sail over the hills to the northwest between Plevna and Miles City, Montana. It moves south, then west, repeating these maneuvers for 20 minutes until it flies into a dark cloud. It is silent, and a long, bright light shoots out from beneath. (Michael D. Swords, “Project Sign and the Estimate of the Situation,” JUFOS 7 (2000): 41–44)

Late May — 11:40 a.m. Sgt. T. G. Jones and three other officers and two crew are aboard a York transport aircraft, accompanied by a formation of six Meteor jets, cruising at 10,000 feet above the Oxford/Bicester area in England, bound for RAF Acklington. Visiting US Maj. Robin Olds is in one of the jets. They encounter a 100-foot oval object with three bumps or protrusions on the bottom, as Jones describes it through binoculars. Ground radar tracks the object, which is stationary and above 25,000 feet. Two jets go up to try to get a better look and get within a few thousand feet. The object departs vertically at a speed of 1,500 mph. (Jenny Randles, UFO Conspiracy, Cassell, 1987, pp. 92–93)

May 28 — 3:00 p.m. USAF Reserve 1st Lt. Alexander Kokolonis is flying a C-47 at 6,000 feet six miles east of Monroe, Michigan, when he sees out of the navigator’s window three discs 2 miles to the left. He estimates they are 300–400 feet in diameter, silvery-gold, and traveling well over 500 mph. They are seen for only 10–15 seconds. Shortly afterwards, Kokolonis sees two similar objects and he alerts M/Sgt Ernest Davis Jr., who also sees them. (NICAP, “Air Force Transport Buzzed by 3 UFOs”; Michael D. Swords, “Project Sign and the Estimate of the Situation,” JUFOS 7 (2000): 45)

May 31 — 1:20 p.m. A cigar-shaped object moves through the sky from the northwest at terrific speed over Wilmington, North Carolina. Mrs. H. D. Alspach, Mrs. Charles Colvin, and Mrs. Isabell Hufham see the object emit smoke. It appears about 3 feet long. It slows down over the Cape Fear River, veers off to the east, and then speeds away at a high altitude. (NICAP, “Cigar Slows Down Then Speeds Up”; Sparks, p. 34)

Summer — USAF Maj. Edwin A. Jerome reports that a high-speed radar target appears during an inspection visit at Goose Bay AFB [now CFB Goose Bay], Labrador. It is calculated at going 9,000 mph at an altitude of 60,000 feet. The commanders assume that the US equipment is faulty, but the Canadians have tracked the same target. The following day, an object hovers over the base at 45,000 feet and moving only 10 mph. (NICAP, “Edwin Jerome Radar Case”; UFOEv, pp. 83–84; Yurko Bondarchuk, UFO Sightings, Landings, and Abductions, Methuen, 1979, pp. 151–152; Chris Rutkowski and Geoff Dittman, The Canadian UFO Report, Dundurn Press, 2006, pp. 51–52; Chris Rutkowski, Canada’s UFOs: Declassified, August Night, 2022, p. 264)

Summer [possibly 1958] — Early afternoon. Aircraft instrumentation engineer Victor G. Didelot watches an elliptical UFO moving rapidly west to east roughly parallel to the shoreline of Lake Erie in Erie, Pennsylvania. It suddenly and silently ascends vertically at three times its horizontal speed and disappears. (UFOEv, pp. 55–56)

Summer — Physicist Carl A. Mitchell sees three luminescent greenish discs, one second apart, passing across the sky above Easton, Pennsylvania, from north to south. (UFOEv, p. 49)

June 5 — A jet-propelled Northrop YB-49 crashes north of Muroc [now Edwards] AFB in California after completing a number of maximum forward center-of-gravity tests, killing its pilot, Maj. Daniel Forbes (for whom Forbes AFB in Topeka, Kansas, is named), copilot Capt. Glen Edwards (for whom Edwards AFB is named), and three other crew members. The aircraft suffers structural failure, with both outer wing sections becoming detached from the center section. (Wikipedia, “Northrop YB-49”)

June 16 — Soviet test pilot Arkady Ivanovich Apraksin is flying at an altitude of 6.5 miles above a solid layer of clouds south of the Kapustin Yar site, Astrakhan Oblast, Russia. He sees an unconventional aircraft in the shape of a cucumber with cones of light radiating from it descending across his path. The base tells him it has tracked the object on radar and given it instructions to land, but it does not respond. Apraksin is ordered to intercept it and open fire if it refuses to land. When he closes to within 6 miles, the light beams open up like a fan and shine into his aircraft, blinding him. The plane’s electrical systems malfunction. He glides the plane to a safe landing after the UFO disappears. Apraksin is interrogated heavily. (Good Above, p. 221; Joe Brill, “UFO’s behind the Iron Curtain,” Skylook, no. 87, February 1975, pp. 14–15)

June 18 — The National Security Council issues Directive 10/2, calling for covert action against the USSR, and granting the authority to carry out covert operations against “hostile foreign states or groups” that could, if needed, be denied by the US government. To this end, the Office of Policy Coordination (OPC) is created inside the new CIA. Frank Wisner, the head of the OPC, answers not to the CIA director, but to the secretaries of defense, state, and the NSC, and the OPC’s actions are a secret even from the head of the CIA. Most CIA stations have two
June 29 — ATIC’s chief of operations, C. A. Griffith, writes to a military representative in Norway to send all UFO reports to Wright-Patterson AFB in Ohio. (Loren E. Gross, UFOs, a History: 1948, The Author, 1988, pp. 32–33)

June 30 — A couple are driving near Hecla, South Dakota, when they see an unusual star. They stop the car and get out, but it is not moving. They drive on and stop again. A few pieces break off the original star and arrange themselves in a triangle formation. They all now look like polished aluminum; they rise to a great height and vanish. (Michael D. Swords, “Project Sign and the Estimate of the Situation,” JUFOS 7 (2000): 45–46; Sparks, p. 35; Swords 57)

July — 1:00 p.m. Former Air Force pilot Don Newman and three friends watch a disc-shaped, domed UFO, about 100 feet in diameter, maneuvering over Pasco, Washington. “The exterior finish appears to be spun or burnished aluminum.” The object slows, then accelerates rapidly, dives, and climbs over the area. (UFOEv, p. 38; NICAP, “Summary of letter from Witness to Major Keyhoe, dated March 10, 1958”)

July 1 — A Maj. Hammer is flying above Rapid City AFB [now Ellsworth AFB], South Dakota, when he sees 21 brilliant, yellow-white, oval-shaped objects. They are about 100 feet in diameter and flying in a tight diamond formation. They make a high-speed dive, level, make a perfect turn in formation, angle upwards at 30°–40°, and accelerate out of sight. He estimates their cruising speed at 500 mph. (Swords 57–58; Sparks, p. 35)

July 4 — Day. Edward E. Thompson watches a brilliant spherical UFO for five minutes while sitting in Johnson Park in Camden, New Jersey, across from the Cooper Free Public Library. (“Report from the Readers,” Fate 1, no. 4 (Winter 1949): 93–94)

July 7 — A silver, disc-shaped object allegedly crashes some 30 miles south-southwest of Laredo, Texas. US servicemen are reportedly dispatched from a nearby military base to cordon off the UFO crash site until a special US retrieval team arrives to examine the wreckage and carry it away to a military base in San Antonio, Texas. Supposedly the badly burned body of a nonhuman entity is recovered from the crash site. Ufologist Leonard Stringfield hears rumors of the crash in 1977, but few further details emerge. Early in 1978, Stringfield describes the humanoid found at the crash site as “about 4 feet, 6 inches tall, completely hairless, with hands that had no thumbs.” That description seems to fit the body shown in two photographs that are mailed to Willard F. McIntyre in December 1978. The body depicted in the photos sent to McIntyre has come to be known as the “Tomato Man” due to its large, roundish head. Many UFO researchers, including Ron Schaffner and Kevin Randle, believe the body is that of a human pilot who is badly disfigured by intense heat following a plane crash. They argue that one of the photos shows a pair of eyeglasses, such as a human pilot would wear, near the body. (William S. Steinman and Wendelle C. Stevens, UFO Crash at Aztec, UFO Photo Archives, 1986, pp. 402–422; Kevin D. Randle, A History of UFO Crashes, Avon, 1995, p. 188; Good Above, pp. 397–398; “Laredo 1948,” Texas UFO Museum and Research Library, March 8, 2009; Noe Torres and Ruben Uriarte, The Other Roswell: UFO Crash on the Texas–Mexico Border, Roswell Books, 2008)

July 9 — Caramia and Carpenter, two officers of the USAF 72nd Reconnaissance Group, are fishing at Fielding Lake, Alaska, when they hear a loud roar and notice about 20 gray discs or spheres moving at 500 mph in loose formation from west-northwest to east-southeast at about 5,000 feet. (Barry Greenwood, “The Estimate of the Situation: Well, Not Exactly!” UFO Historical Revue, no. 16 (July 2015): 5–10)

July 9 — 9:47 p.m. While on the ground in Osborn, Ohio, the USAF Project Sign officer who had flown to investigate the Hecla case, sees a self-luminous, yellow-white object flying at 500–600 mph. It seems to pulse its lights at 3-second intervals as it moves away. (Swords 58; Sparks, p. 35)

July 14 — Day. Charles W. Shangle Jr. watches two groups of about 16 UFOs maneuvering at 300–600 mph over Boise, Idaho. Two of the objects exhibit a “falling leaf” motion. (“True Mystic Experiences,” Fate 2, no. 1 (May 1949): 75–79)

July 17 — 4:50 p.m. Two Kirtland AFB sergeants on a fishing trip with their families five miles south of San Acacia Diversion Dam, New Mexico, see a group of 7 aluminum-like, spherical objects approach from the south at 20,000 feet pass overhead at 1,500 mph. They first appear like stub-nosed jet fighters of an unknown type, shifting from V-formation to L-formation to circular formation to no regular formation. A regular pulsating flashing light appears in the group at 30° from zenith to the north, and at this oblique angle the objects do not appear circular. There is no noise or trail. (NICAP, “Two Military Families Report Seven Objects”; Swords 58)

July 20 — The Netherlands government reports that a wingless, cigar-shaped object with two decks of windows is seen flying rapidly on four separate occasions by two Dutch citizens over The Hague (and/or Arnhem). (NICAP, “High V-2-Like Craft Observed”; Loren E. Gross, UFOs, a History: 1948, The Author, 1988, p. 86)
July 21 — The USAF Research and Development division sends a formal letter to the RAND Corporation authorizing them to select scientists to evaluate the possibility that the flying discs might be human-built spaceships. RAND’s reply is not known. (Swords 58)

July 24 — 1:45 a.m. A bright object is seen at Robins AFB in Houston County, Georgia, by ground maintenance crewman Walter Massey, who sees a “stream of fire” in the north. As it moves overhead, it seems more cylindrical. It moves off to the west. (NICAP, “July 24, 1948, 0250E, Warner Robins AFB, Georgia”)

July 24 — 2:45 a.m. Capt. Clarence S. Chiles and copilot John B. Whitted are flying an Eastern Airlines DC-3 at 5,000 feet, 20 miles southwest of Montgomery, Alabama, when they see an object about 100 feet long moving rapidly toward them on their right. Torpedo-shaped and wingless, the object has flames jetting 50 feet from its rear. There are two rows of square windows through which a bright light is glowing. They only see it for 5–10 seconds. It is half a mile away and moving at about 700 mph. After it passes the plane it swoops into a cloud bank at 6,000 feet. One passenger, Clarence L. Mckelvie of Columbus, Ohio, also sees it. (Wikipedia, “Chiles-Whitted UFO Encounter”; NICAP, “Chiles-Whitted Case”; Kenneth Arnold and Ray Palmer, The Coming of the Saucers, Palmer, 1952, pp. 90–91; James E. McDonald, “Statement on Unidentified Flying Objects,” in Symposium on Unidentified Flying Objects, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 42–43; Clark III 234–236; UFOEv, p. 48; Sparks, p. 36; Michael D. Swords, “Project Sign and the Estimate of the Situation,” JUFOS 7 (2000): 46–47; Swords 58–60; Good Above, pp. 264, 479; Joel Carpenter, “Watershed: The Chiles-Whitted ‘Rocketship’ Sighting,” 2002; Martin Shough, “Analysis of the Chiles-Whitted Sightings, July 24, 1948,” February 2011; Kevin D. Randle, “Chiles/Whitted and Skepticism,” A Different Perspective, January 21, 2016)

July 25 — Chief of Air Force Intelligence Gen. Charles Cabell phones McCoy’s office at Wright-Patterson AFB in Ohio. Sign is ordered to get into the field immediately and investigate the Chiles-Whitted case. By that afternoon, Loedding, Deyarmond, and Llewellyn (now apparently director of Project Sign) are flown by Capt. Clarence Groseclose to Atlanta, Georgia. (Sparks, p. 13; Swords 60)

July 26 — Loedding, Deyarmond, and Llewellyn interview Chiles and Whitted in the Henry Grady Hotel, Atlanta, Georgia. They are impressed with their account. Mulling the case through September, Project Sign is disturbed even more than the Mantell incident, according to Ruppelt. Capt. Sneider considers the shape aerodynamically feasible; consultant J. Allen Hynek says it might be a fireball but considers that “far-fetched.” (Swords 60)

July 26 — Aeronautical engineer Molt Taylor speculates to the Associated Press that “If we can build such craft, what is to prevent others from doing so, assuming that a similar order of intelligence exists on other planets? You and I may see the day when we will be united with Russia defending this planet against attack from space.” (“It May Be Men from Mars, Expert Says of ‘Saucers,’” San Francisco Examiner, July 28, 1948, p. 32; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1948, Supplemental Notes, The Author, 2000, p. 65)

July 27 — Air Intelligence Memorandum on “Pattern of Flying Saucers” requires that a study be made by the Air Intelligence Division to examine the pattern of tactics of reported UFOs and develop conclusions as to their probability. This leads to the EEI “Analysis of Flying Object Incidents in the United States” (100-203-79) of December 10. The JIC report gives the incorrect date as August 6. (Col. Brooke E. Allen, “Analysis of Flying Object Incidents in the U.S.,” October 11, 1948; “Report by the Director of Intelligence, USAF, to the Joint Intelligence Committee on Unidentified Aerial Objects,” April 28, 1949, p. 2; Jan L. Aldrich, “New Top Secret Document Revealed,” Project 1947)

July 29 — 9:18 a.m. James Toney and Robert Huggins, both employees of an Indianapolis, Indiana, rug cleaning firm, are in a truck headed west when they see a shiny, propeller-shaped, aluminum object with 10–12 small cups protruding from either blade. It is 6–8 feet long and flying silently above the trees at 30 feet altitude some 300 feet away heading south. It approaches to about 100 feet at its closest. The object glides across the road at 25–30 mph in a slight descent then makes a 20° bank to the east and goes down in a wooded area. Toney and Huggins stop the truck and get out to look, but the object has disappeared behind trees. A later search finds no traces. (NICAP, “Close Encounter with ‘Propeller-Shaped’ Object”; Sparks, p. 36)

July 31 — 8:25 a.m. Mr. and Mrs. Vernon Swigert of south-central Indianapolis, Indiana, see a cymbal-shaped or domed-disc object to the west of their home. It is about 20 feet across, 6–8 feet thick, white without any shine but shadowing on upper right. It flies straight and level from horizon to horizon, west to east heading 90°. They estimate its altitude as 2,000 feet covering a distance of 5 miles in 10 seconds. It shimmers in the sun as if spinning, is silent, and has no trail. (NICAP, “Cymbal-Shaped Object Observed by Couple”; Sparks, p. 37)

August 5 — This date given by Edward Ruppelt for the lost “Estimate of the Situation,” in which Project Sign concludes that UFOs are interplanetary, is probably too early. See September 30.
August 15 — Morning. Future ufologist Walter H. Andrus Jr., his wife Genevieve, and son Donald see four UFOs flying in formation east to west over downtown, Phoenix, Arizona. They simply vanish in sequence, then the first three reappear one at a time in the northwest where they pass out of sight to the west. (Story, pp. 17–18)

August 21 — A possible Russian rocket trail is seen over Katrineholm, Sweden, that remains visible for three hours “resembling a brilliant star surrounded by streamers of fire like the tentacles of an octopus.” However, there is no known record of a launch on this date of a V-2 or R-1 missile from the Russian base at Kapustin Yar, Astrakhan Oblast, Russia. It may be the same object viewed by Swedish Armed Forces Supreme Commander Helge Jung of an “aerial explosion considered to be some form of guided missile originating from Estonian islands, possibly Dagö or Osel.” (“Sky Octopus’ Seen above Swedish Town,” Richmond (Ind.) Palladium-Item, August 23, 1948, p. 2; “Sky Octopus over Sweden,” Fate 2, no. 1 (May 1949): 35; Jan Aldrich, “Investigating the Ghost Rockets,” IUR 23, no. 4 (Winter 1998): 14)

September — About this time Capt. Robert R. Sneider becomes a co-chief of Project Sign with Lt. Howard W. Smith. (Sparks, pp. 13–14)

September 1 — The CIA Office of Policy Coordination is formally established with the responsibility to engage in “propaganda, economic warfare, preventive direct action, including sabotage, antisabotage, demolition and evacuation procedures; subversion against hostile states, including assistance to underground resistance groups, guerrillas and refugee liberation groups, and support of indigenous anti-communist elements in threatened countries of the free world.” (Wikipedia, “Office of Policy Coordination”)

September 16 — Before dawn. Fred Scott, 63, is walking around Grassy Mountain, Malheur County, Oregon, when he looks up and sees two “flying persons” to the south. They are 150–250 feet up, one following the other at a distance of 8–10 feet. Their wings are narrow and rounded at the tip and do not flap. Their legs are unusually short. They remain visible while Scott walks for at least another mile. (Center for UFO Studies, HUMCAT Index 1940–1949, p. 43; Clark III 270)

September 23 — 9:40 a.m. At Los Alamos National Laboratory, New Mexico, a group of people are waiting for an airplane at the landing strip when one of them notices something glint in the sun. It is a flat, circular object, high in the northern sky. The appearance and relative size is the same as a dime held edgewise and slightly tipped, about 50 feet away. (NICAP, “Flat Dime On-Edge Observed by Lab Personnel”; Sparks, p. 38)

September 26 — 2:00 p.m. P. L. Lewis sees a white object moving rapidly across the sky at Port Hope, Ontario, then disappear when it is nearly overhead. Other white objects follow at about 50 mph in a northeasterly direction, accompanied by strands of spider web. Lewis speculates that the objects are balls of spiders’ threads, held together by thistledown. (P. R. Bishop, “Cobwebs or Flying Saucers?” Weather 4 (1949): 121–122; Philip J. Imbrogno, Files from the Edge: A Paranormal Investigator’s Explorations into High Strangeness, Llewellyn, 2010, p. 54)

September 30? — Project Sign officer Capt. Robert R. Sneider has decided that the time has come to climax Project Sign’s task and write the required “Estimate of the Situation.” Every intelligence operation’s task is ultimately to present such a best-guess summary, strongly backed with as much fact as possible. Using the Chiles-Whitted case as the core and collecting around it many cases from the summer of 1947 to September 1948, Sneider composes the document. The most recent case known to have been listed in the document is the September 23 Los Alamos National Laboratory sighting in New Mexico. Two prominent USAF intelligence officers (Ruppelt and Dewey J. Fournet Jr.) see the document in 1952. “It was a rather thick document with a black cover and it was printed on legal-sized paper. Stamped across the front were the words TOP SECRET.” Ruppelt says the Estimate concludes that the best evidence indicated an extraterrestrial origin for UFOs. Sneider is probably the primary author. Devarmond, Loedding, and Truettner almost certainly are part of the writing. Llewellyn certainly looks in. All these people, as well as higher-ups in Clingerman’s and McCoy’s offices, must approve it, at least in some sense. And an Estimate of UFOs as extraterrestrial is no small thing to asent to. The Estimate is probably addressed to Chief of Staff Gen. Hoyt Vandenberg, but it really is meant for Director of Intelligence Gen. Charles Cabell. It is probably sent near the end of September, just before the George Gorman “UFO dogfight” in Fargo, North Dakota, on October 1. It probably lands in Garrett’s Collections office and is hand-carried to Cabell. Cabell may or may not be shocked. With a pro-ETH Wright-Patterson intelligence group on one side, an anti-ETH Pentagon Intelligence Requirements Office on the other, and open-minded collections officers and the powerful Research and Development chief (Gen. Donald L. Putt) in between, Cabell doesn’t want to decide this on his own. He hands the Estimate further upstairs to Vandenberg himself, who rejects it and bats it back to Cabell with a strong

October 1 — The first Joint Army-Navy-Air Force Publication (JANAP) 146, based on Bernard Baruch Jr.’s CIRES system, is issued. It consists of instructions for military and civilian personnel on how to report sightings of enemy aircraft, missiles, submarines, and surface vessels. This version does not include UFOs. It is tabulated shortly afterward by Maj. Gen. Cabell. (Antonio F. Rullán, “Blue Book UFO Reports at Sea by Ships: Analysis of the Blue Book Ship Database,” December 10, 2002, pp. 8–9; Swords 122)

October 1 — 8:30 p.m. 2d Lieut. George F. Gorman of the North Dakota National Guard, flying an F-51 near Fargo, North Dakota, spots an object traveling east to west. He describes it as a light 6–8 inches in diameter displaying incredible movements. He repeatedly gives chase beginning at 9:07 p.m., but each time is outmaneuvered by the light, which moves up to 600 mph. On his first pass he gets as close as 500 feet from the light at about 5,000 feet altitude. Gorman climbs to 14,000 feet but stalled out, unable to intercept the light, which is at about 16,000 feet. The light makes evasive and aggressive maneuvers, such as seeming to try to ram the F-51. When it drops to 11,000 feet, Gorman attempts to dive at it, but the light pulls up, rises vertically, and disappears at high speed. The light is also seen by airport control tower operators Lloyd D. Jensen and Manuel E. Johnson, as well as others on the ground and pilot Arthur E. Cannon flying a Piper Cub at 1,600 feet. Jensen watches the dogfight through 6x30 binoculars, the UFO appearing perfectly round with sharp edges and no fuzzy outline. Project Sign personnel arrive within hours and interview the witnesses. Eventually they conclude the object was a balloon, with evasive maneuvers the product of Gorman’s imagination, since ground observers do not see anything comparable. Some ufologists, among them Aimé Michel and James E. McDonald, have rejected the balloon explanation. (Wikipedia, “Gorman dogfight”; NICAP, “Gorman (Fargo) Case”; Ruppelt, pp. 41–43; Sparks, p. 39; Michael D. Swords, GrassRoots UFOs: Case Reports from the Timmerman Files, Fund for UFO Research, 2005, p. 138; Clark III 536–537)

October 7 — A document from Project Sign to Garrett and Cabell is an upbeat Sneider report on the initial investigation of the Gorman dogfight, making the object sound extremely unusual and intelligent in behavior. This is almost like a supplement to the Estimate. (Michael D. Swords, “Project Sign and the Estimate of the Situation,” JUFOS 7 (2000): 50)

October 7 — A set of letters, composed not by Sneider but actually by Samuel Z. Hunnicutt, a member of T-2 and the Sign team, and approved by MCI heavyweights McCoy, Clingerman, and Leland Money, goes out to the CIA, US Army Intelligence, and the Office of Naval Intelligence. The query: What domestic technological developments do you know of that might explain UFOs and help us differentiate them from inimical (Soviet) foreign developments? (Michael D. Swords, “Project Sign and the Estimate of the Situation,” JUFOS 7 (2000): 50)

October 12 (or 22) — Project Sign’s Col. William R. Clingerman writes a letter to USAF Chiefs of Staff requesting a study of UFOs by the RAND Corporation, similar to the one made by USAF R&D in July, especially the possibility that “some of the unidentified aerial objects that have been reported both in the United States and in foreign lands may have been experimental spaceships.... it is believed more likely that they represent the effort of a foreign nation, rather than a product from beyond the Earth.” (Col. W. R. Clingerman, “Request for Study by Rand Project,” October 12(?), 1948; Swords 58, 492–493)

October 15 — 11:05 p.m. On night patrol, 1st Lt. Oliver “Bud” Hemphill Jr. of the 68th Fighter Squadron is flying a Northrup F-61 Black Widow some 50 miles northwest of Fukuoka, Japan, when the crew picks up an object on radar going 200 mph. As he closes to intercept, the object speeds up to 1,200 mph then slows down again. The plane tries closing in six times, but each time the object speeds away. On one pass the crew sees the object’s silhouette, which looks like a “rifle bullet” 20–30 feet long. The object “seems cognizant of the whereabouts of the F-61 at all times.” Radar operator Barthel thinks it is a “new type of aircraft.” (NICAP, “F-61 ‘Black Widow’ Radar Case”; James E. McDonald, “Statement on Unidentified Flying Objects,” in Symposium on Unidentified Flying Objects, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 69–70; Hynek UFO Report, pp. 134–137; Sparks, p. 40)

October 29 — Five US Air Force pilots observe a silvery object over Neubiberg Air Base [now closed] near Munich, Germany. The object disappears at a terrific speed after having remained over the air base more than 30 minutes. A similar object is seen days before by another group of American pilots. (Jan Aldrich, “Early Top Secret UFO Document Discovered,” 2000)

Late 1948 — The search for a suitable US location for nuclear testing, codenamed “Project Nutmeg,” commences under the direction of expert meteorologist and Navy Captain Howard B. Hutchinson. The government is looking for a place where nuclear tests would have little impact on the American people or the American economy. Five primary sites are considered: Dugway Proving Ground, Utah; Alamogordo—White Sands Guided Missile Range, New Mexico; an area in Nevada between Fallon and Eureka; the Tonopah—Las Vegas Bombing and Gunny Range (the site finally chosen in 1950, now part of Nellis Air Force Base); and the Pamlico Sound area off the coast of North Carolina. (“Project Nutmeg: The Birth of the Nevada Test Site,” National Nuclear Security Administration, June 2004; Philip Howard, “Project Nutmeg,” Village Craftsmen, April 21, 2012; Diane Tennant, “How Outer Banks Almost Became a Nuclear Test Site,” Norfolk Virginian-Pilot, January 27, 2013)

November 1 — Radar operator M/Sgt Francis H. Mills at Goose Bay AFB [now CFB Goose Bay], Labrador, tracks an object too large for a bird, too small for a plane, flying at 60 mph. Not confirmed visually. (NICAP, “600 MPH Track at Goose Bay”; NICAP, “October 29, October 30, and November 1, 1948, Incident Nos. 188, 195, and 196; Goose Bay, Labrador,” June 28, 2009; Sparks, p. 42)

November 3 — Against most predictions, Harry S. Truman wins the US presidential election against Republican Thomas E. Dewey. Secretary of Defense James Forrestal, like everyone else, expects to have a new boss in January. His relationship with Air Force Secretary Stuart Symington has deteriorated, and he has not obtained a budget consensus from the Joint Chiefs. His mental health, physical condition, and authority are deteriorating. He is convinced that “foreign-looking men” are following him and that Symington is spying on him. Secret Service Chief Urbanus E. Baughman begins to think Forrestal is suffering from a “total psychotic breakdown.”

November 3 — Gen. Charles Cabell writes a firm letter to Wright Field in Ohio, asking Project Sign for another Estimate. It is possibly composed by Maj. Aaron “Jere” Boggs or Col. Edward H. Porter at the USAF Defensive Air Branch. While admitting that the objects seem real, it also cautions that they are not identified. (Read: You may not identify them as extraterrestrial craft.) (Maj. Gen. C. P. Cabell, “Flying Object Incidents in the United States,” November 3, 1948, Michael D. Swords, “Project Sign and the Estimate of the Situation,” JUFOS 7 (2000): 50–51, 62; Swords 62, 64)

November 4 — A USAF Europe document transmits some information on the Swedish ghost rockets. “They have been reported by so many sources and from such a variety of places that we are convinced that they cannot be disregarded and must be explained on some basis which is perhaps slightly beyond the scope of our present intelligence thinking.” One of the objects was observed crashing into a lake by Swedish Gen. Helge Jung and his party. A salvage operation was unsuccessful. USAF officers visit Swedish Air Intelligence officials who have reached the conclusion that “these phenomena are obviously the result of a high technical skill which cannot be credited to any presently known culture on earth.” The document is distributed to the CIA (which in response to a FOIA request claims no record), Armament Intelligence Branch, and AMC. (“USAFO 14, TT 1524, Top Secret,” November 4, 1948; Jan Aldrich, “Early Top Secret UFO Document Discovered,” 2000; Swords 62–63; Good Need, p. 115)

November 6 — Two UFOs, maneuvering like planes in a dogfight, are tracked on USAF radar over Wakkanai, Japan. (NICAP, “Target Circles Radar Site”; Keyhoe, FS from OS, p. 34; Sparks, p. 42)

November 8 — A letter is sent with Col. McCoy’s signature to Gen. Cabell. Written by Sign operative Albert Devarmond, it is overtly submissive but covertly rebellious. It contains several comments agreeing with Cabell that the UFO phenomenon is not identifiable and that no concrete physical proof exists to identify it. At the same time it drops all sorts of hints, doubtless the same arguments used in the original Estimate, that the objects really are extraterrestrial whether the Pentagon thinks so or not: It mentions the ETH; it mentions plotting waves against planetary approaches and finding a correlation; it mentions the books of Charles Fort as indicating that this has been going on for at least a century; it mentions that odd shapes (like the Chiles-Whitted case) can fly but require more advanced power plants than we have. (Col. H. M. McCoy, “Flying Object Incidents in the United States,” November 8, 1948; Michael D. Swords, “The McCoy Letter,” IUR 22, no. 1 (Spring 1997): 12–17, 27; Michael D. Swords, “Project Sign and the Estimate of the Situation,” JUFOS 7 (2000): 51, 63–64; Swords 62, 65, 494–496)

November 12 — Project Sign personnel travel to the National Bureau of Standards in Washington, D.C., to attempt to convince Cabell and Vandenberg on the ETH. It includes Schneider, and perhaps Devarmond, Loedding, Truettner, and McCoy. On the Pentagon side, Boggs and Cabell are there and perhaps Vandenberg, and they are having none
of the ETH. Back at Wright-Patterson AFB in Ohio, Deyarmund and Truettner begin writing a sanitized Project Sign report. More scientific oversight is requested for Sign personnel. The Scientific Advisory Board and George Valley of MIT are to be made aware of all cases. So too are Bogg’s office, ONI, and maybe even the NBS. Hynek is to be formally commissioned for an assessment, as well as Irving Langmuir and Project Rand. (Col. H. M. McCoy, “Transmittal of Project ‘SIGN’ Incident Summaries,” November 12, 1948; Swords 65; Michael D. Swords, “Project Sign and the Estimate of the Situation,” JUFOS 7 (2000): 51–52)

Mid-November — Late afternoon, Clifford DeWitt Fife hears a whirring in the air near Nevada, Missouri. He looks up and sees a hovering, disc-like object. Two bright objects drop down out of the disc about 200–300 feet, then speed off to the southwest. The large object moves off to the northeast. (Nevada (Mo.) Daily Mail, November 30, 1948; Herbert S. Taylor, “Satellite Objects: A Further Look,” IUR 29, no. 2 (Summer 2004): 7)

November 18 — 10:00 p.m. USAF Reserve pilot Lt. Henry G. Combs is flying a T-6 Texas combat trainer when he sees an object flying west to east over Andrews AFB, Maryland. It has one continuously glowing white light. He makes a pass to check on it, but it takes evasive action and he duels with it for 10 minutes. The object performs very tight curves and quick accelerations to 600 mph. (NICAP, “The Lt. Combs / T-6 Encounter”; Sparks, p. 42; Richard H. Hall, Uninvited Guests, Aurora, 1988, pp. 236–237)

November 23 — 10:00 p.m. US Army Col. William P. Hayes sees a bright white, round light “larger than a basketball” descend slowly as he is driving 10 miles east of Vaughan, New Mexico. It explodes without a sound some 400–500 feet above the ground. (NICAP, “Another Object in Vertical Descent Explodes near Colonel”; Sparks, p. 43; Clark III 539)

November 23 — 10:20 p.m. The first [although see October 15] documented radar-visual UFO case takes place at Fürstenfeldbruck Air Base in Bavaria, Germany. A UFO is seen circling at 27,000 feet. An F-80 pilot sent to intercept it describes it as bright red. It climbs abruptly to 50,000 feet at 900 mph. A second F-80 pilot verifies the report. (NICAP, “Gnd Visual / Gnd Radar Track Object at 27,000′”; Ruppelt, p. 46; Sparks, p. 43)

November 24 — Writer Sidney Shalett has asked for USAF cooperation in writing an article on UFOs for the Saturday Evening Post. In a “Memorandum for the Record,” the USAF Directorate of Intelligence indicates that “publicity of this nature is undesirable but, if such articles are written, they will be less harmful to the national interest if a degree of privacy in their preparation is exercised.” Signed November 24 by Cabell, Director of Intelligence. (Maj. Gen. Charles P. Cabell), “Memorandum for Record,” November 24, 1948)

November 30 — Maj. Gen. Charles P. Cabell, in an Air Staff Summary Sheet, admits that he has tried to dissuade the press from publishing articles like Shalett’s. Cabell has asked Secretary Forrestal for permission to feed Shalett some statistics, but the memo is apparently never sent. (Maj. Gen. C. P. Cabell, “Publicity on Flying Saucer Incidents,” Air Staff Summary Sheet, November 30, 1948; “Memorandum for Mr. Forrestal” [unsent])

November 30 — Letter from Howard McCoy at AMC Dayton to Commanding General, Air Defense Command, Mitchel AFB [now closed], Long Island, New York. “It is requested that all reports of unusual sightings by radar stations of your command be made directly to this Headquarters by the most expeditious means.” (NICAP, “1948 UFO Chronology”)

November 30 — An interim report by Project Sign, one that apparently takes seriously the possibility that UFOs represent interplanetary probes, is accidentally destroyed. USAF Intelligence later requests a replacement copy from TID at Wright-Patterson AFB in Ohio. A recent FOIA to the National Archives answers that such a document would be in Project Blue Book files, but it is not. (Jan Aldrich)

December — A first-strike war plan (Sizzle) is developed to use 133 nuclear aerial bombs against 70 cities of the USSR. (“Nuclear ‘Pincher’: The START II Treaty, the American ‘Escalation of Superiority’ Strategy, and Russia’s Strategic Nuclear Forces,” from Sovetskaya Rossiya, April 8, 1995)

December 3 — 8:15 p.m. Sgt. Bruce Earlin McFarland, control tower operator at Fairfield-Suisun AFB [now Travis AFB] at Fairfield, California, watches for 25 seconds a round, white light fly with variable speed (200–400 mph) and a bouncing motion, finally disappearing after a rapid, erratic climb to 20,000 feet. (NICAP, “Fairfield-Suisun AFB, Dec. 3, 1948, UFO Report”; Sparks, p. 43)

December 5 —9:05 p.m. Pilot Capt. William R. Goade is flying a USAF C-47 from Denver to Phoenix. Just west of Las Vegas, New Mexico, he and his copilot Maj. Roger Carter spot a bright green flash. Some 22 minutes later, an identical flash rises from the east slope of Sandia Peak and follows a parabolic curve as the C-47 passes 20 miles northeast of Albuquerque. Capt. Ernest Van Lloyd and the crew of Pioneer Airlines Flight 63 also see the second object, described as first orange, then green. (NICAP, “AFOSI Case 8: AF C-47 Pilot Observes UFO Similar to Green Flare”; Clark III 539; Sparks, p. 43)

December 6 — Lt. Col. Doyle Rees, commander of the Seventeenth District AFOSI at Kirtland AFB, New Mexico, orders an investigation into the previous night’s green fireball. (Clark III 539)
December 6 — Project Sign is ordered to send copies of all its future cases and analyses to Maj. Boggs of the Office of Defensive Air, the ONI, and the USAF Scientific Advisory Board. (Swords 65)

December 6 — 10:55 p.m. Atomic Energy Security Service Officer Joseph Toulouse sees a greenish flare one-third the apparent size of the moon at Sandia Base outside Albuquerque, New Mexico. It is visible for 3 seconds before it arcs downward and vanishes. (NICAP, “AFOSI Case 10: AESS Observed Green Flare Directly over Sandia Base”; Clark III 539; Sparks, p. 44)

December 8 — Two AFOSI officers, Capts. Melvin E. Neef and John J. Stahl Jr., interview every agency that might know something about green-flare operations but come up short. That evening, they are flying a T-7 out of Kirtland AFB, Albuquerque, New Mexico, at 5,000 feet when they see a brilliant green light, larger and more brilliant than a meteor or flare, traveling a flat trajectory 2,000 feet above them. They see it for 2 seconds before it burns out. (NICAP, “AFOSI Case 11: Agents in T-7 Observe Intense Green Fireball at 13,000”; Clark III 539; Sparks, p. 44)

December 9 — Capt. Neef informs Lincoln LaPaz, director of meteoritics at the University of New Mexico, about the green fireball sightings. He says they do not sound like any meteors he is familiar with. (Clark III 539)

December 10 — The revised Project Sign report is issued, Air Intelligence Report Number 100-203-79, “Analysis of Flying Object Incidents in the U.S.” (AIR 203) [Some copies are confusingly dated April 28, 1949.] This is the culmination of Sign’s work since early August, augmented by ONI collaboration over the past two months. UFOs are not extraterrestrial (the idea is hardly noticed). UFOs are probably real, but if so, there is a small chance that they are Soviet and therefore dangerous. All in all, the word “Soviet” dominates the commentary. (US Air Force, Directorate of Intelligence, Analysis of Flying Object Incidents in the U.S.: Summary and Conclusions, Air Intelligence Report 100-203-79, December 10, 1948; copy, dated April 28, 1949; Bruce Maccabee, “Hiding the Hardware,” IUR 16, no. 5 (Sept./Oct. 1991): 7–8; Michael D. Swords, “Project Sign and the Estimate of the Situation,” JUFOS 7 (2000): 52; Swords 65–66; Good Above, pp. 265, 480–481)

December 12 — 9:02 p.m. Lincoln LaPaz and two USAF officers (Sandia Base Intelligence Officer Lt. Allan B. Clark and Sandia’s AF-Civil Air Patrol Liaison Officer Maj. Charles L. Phillips) see a green fireball near Bernal, New Mexico. He calculates that it is flying directly over Los Alamos National Laboratory, and it maintains its horizontal flight at the low altitude (for a meteor) of 8–10 miles. LaPaz arranges with the Atomic Energy Security Service to set up a patrol with Speed Graphic cameras to try to photograph the fireballs. (NICAP, “AFOSI Case 13: LaPaz, Captain, CAP Intel Officer Observed Green Fireball”; Clark III 539–540; Good Above, p. 266; Joel Carpenter, “Green Fireball Chronology,” October 6, 2011)

December 13 — Project Sign files are sent to the Navy by Col. William R. Clingerman. (NICAP, “Project ‘SIGN’ Files Sent Directly to the Navy,” December 13, 1948)

December 16 — Astronomer J. Allen Hynek is officially tasked by Project Sign with studying UFO cases for astronomical explanations. (AMC contract W33-038-1118).

December 16 — Brig. Gen. Donald Putt, Director of USAF Research and Development, orders that the code word Sign be changed to Grudge (since the Air Force bears a grudge against UFO reports, according to Ruppelt), effective in February. Morale plummets. (“Report by the Director of Intelligence, USAF, to the Joint Intelligence Committee on Unidentified Aerial Objects,” April 28, 1949; Sparks, p. 11)

December 20 — In a confidential memo to Lt. Col. Doyle Rees, LaPaz argues that the green fireball he saw on December 12 was no meteor he has ever studied. He writes that the object moved far too slowly to have been a meteor and left no “trail of sparks or dust cloud” as would be typical of meteors flying at low altitudes. Other anomalous characteristics were the intense lime-green color, low altitude of only 8–10 miles yet exhibiting no sound, flat rather than arced trajectory, and turning on and off like a light switch. The interest in green fireballs inspires the creation of an informal group, the Los Alamos Astrophysical Association, whose members, all scientists and engineers with security clearances, are permitted to examine some classified Project Sign reports. This is essentially the beginning of Project Twinkle. (Clark III 540; World History Project, “Project Twinkle Established to Monitor Green Fireball Sightings”)

December 20 — 8:54 p.m. Shortly after they have packed up their Speed Graphic cameras provided by LaPaz to try to photograph the green fireballs, personnel (William D. Wilson, Buford G. Truett, Clifford E. Strang, and George S. Skipper) at an Atomic Energy Security Service post west of Los Alamos, New Mexico, spot a blue-white fireball moving in a nearly flat trajectory. Two objects separate from the main body and trail behind it. Thanks to an independent observation at another site, LaPaz is able to triangulate its flight path as 7–8 miles, west to east toward Los Alamos. (NICAP, “AFOSI Case 14: AESS OP Sighted Green Fireball with Triangulation”, Sparks, p. 46)

December 29 — The Fourth Army sums up the UFO situation in the southwest in a statement. In December 5–28, there were 23 reports of “flares or moving lights.” All but two are in New Mexico and are an intense white or greenish-white light. (Clark III 540)

1949

1949? — Evening. USAF Brig. Gen. William M. Garland is stationed at Mather AFB [now Sacramento Mather Airport] in Sacramento, California. He and a few other people, including some command pilots, are sitting in their yard when they see a “bright, silvery, round object” going too fast for an airplane. (Jan L. Aldrich, “Brigadier General William Madison Garland, USAF”)

1949 — 1:00 a.m. A group of soldiers of the 2nd Armored Division stationed at Fort Hood, Texas, are tasked with standing guard over a plateau in a remote, fenced-off part of the base. After a few weeks, they see bright lights in the sky. They approach the plateau and descend slowly and silently. Suddenly, part of the plateau opens up and they can see light coming from inside. The lights descend into the opening, which closes over them. (Michael D. Swords, “Timmermania: A Step Too Far into the Timmerman Files?” IUR 27, no. 4 (Winter 2002–2003): 9; Michael D. Swords, GrassRoots UFOs: Case Reports from the Timmerman Files, Fund for UFO Research, 2005, p. 146)

1949 — Day. A student pilot is flying a two-seat Taylorcraft over Los Angeles, California. Just as he turns to a westerly flight heading, he sees an object speeding across the sky from north to south. Suddenly it stops abruptly, and the pilot heads toward the object climbing to within a few hundred feet. An intense flash of white comes from its tail and in less than a minute it is completely out of sight. (“Recently Reported,” CUFOS Associate Newsletter 2, no. 10 (October 1981): 5)

January — Project Sign personnel begin to be reassigned. Loedding disappears from project records. Deyarmond’s attention goes elsewhere. Truettner makes one last serious attempt at interviewing about nuclear propulsion (at Oak Ridge, Tennessee) and is given a negative opinion on UFOs by Col. Ralph L. Wassell. He, too, disappears from the project. The civilian members are relieved of their duties and reassigned to other intelligence tasks within T-2. For Loedding in particular, his role and prestige are never the same. After a few further years of intelligence work, both he and Truettner leave AMC. For the higher military ranks (Llewelyn and Sneider), all we know is that they are soon no longer involved, perhaps not even assigned to the same base. Even Clingerman and McCoy become less involved, perhaps because they have also heard that their tenures will soon be up and they will be sent to school and then transferred. The only persons left active on the project are two of the lower ranks: Lieut. Howard W. Smith and civilian George W. Towles. Their job is reduced basically to collection and filing. In this condition, or worse, the Air Force commitment to a UFO investigation project will remain until the summer of 1951. (Michael D. Swords, “Project Sign and the Estimate of the Situation,” JUFOS 7 (2000): 52–53)

January — Early morning. Sarah Elizabeth Lampe watches an odd, disc-like electrical discharge, about 3 feet in diameter, that persists for “fully two minutes” during the Big Snow, 8 miles from Beatty, Nevada. (“True Mystic Experiences,” Fate 4, no. 2 (March 1951): 84–89)

January 1 — The CIA Office of Scientific Intelligence is established. Willard Machle becomes assistant director for scientific intelligence. Problems almost immediately involve recruitment and filling positions with competent professionals. (Rear Adm. R. H. Hillenkoetter, “Scientific Intelligence,” January 4, 1949)

January 1 — 5:00 p.m. Pilot Thomas A. Rush and his wife are in a private plane flying east of Jackson, Mississippi. They see a cigar-shaped object, 60 feet long and 10 feet wide, cross their path at an altitude of 1,500–1,600 feet. It is only about 500 feet distant. The speed is approximately 200 mph, and it accelerates to 400–500 mph. The object makes a 50° turn and is visible for 10–12 seconds. (NICAP, “Cigar-Shaped Object Encountered by Bush Pilot”; Loren E. Gross, UFOs, a History: 1949, January–June, The Author, 1988, pp. 1–2; Sparks, p. 46)

January 4 — 2:00 p.m. USAF pilot Capt. Paul R. Stoney, on the ground at Hickam Field [now part of Joint Base Pearl Harbor–Hickam] near Honolulu, Hawaii, sees a flat, white, elliptical object about the size of a T-6 aircraft, circle
at about 3,000 feet while oscillating to the right and left. It is apparently several miles off the base and slowly circling. It is bright white on the underside and darker on top and possesses no other structures. It proceeds for 15 minutes to make “rhythmic undulation” maneuvers in a cyclical manner. The “object seemed to maneuver under control at all times completing 360° turns and 90° turns.” The object then “depatured climbing (into the northeast) at accelerated speed out of sight.” (NICAP, “Disc Circles, Maneuvers, Climbs into the NE”, Sparks, p. 47)

January 5 — The USAF Technical Information Division at Wright-Patterson AFB near Dayton, Ohio, transmits Project Sign’s list of UFO incidents to the Air Weather Service for analysis and recommendations. (Jan Aldrich)

January 6 — 5:30 p.m. PFC Everett sees a bright-white, diamond-shaped light in high flight from southeast to northwest above the Ordnance section at Kirtland AFB, Albuquerque, New Mexico. It is about 1,500–2,000 feet altitude and flying faster than a jet. Possible meteor. (NICAP, “Diamond-Shaped Light”; Sparks, p. 47)

January 10 — FBI special agent Charlton C. McSwain sends a memo to J. Edgar Hoover enumerating the views of an AMC resident engineer (identified only as “Mr. E”) with the Nuclear Energy for the Propulsion of Aircraft project at Oak Ridge National Laboratories in Tennessee that the flying discs are human-made nuclear missiles originating in Russia. (Loren E. Gross, UFOs, a History: 1949, January–June, The Author, 1988, pp. 6–10)

January 11 — Angered over his opposition to defense economization policies and meeting secretly with Thomas Dewey’s Republicans, Truman tells Forrestal that Louis A. Johnson will soon replace him as Secretary of Defense.

January 13 — Col. Eustis L. Poland of US Army Intelligence (G-2) sends a memo on behalf of the Commander of Fourth Army at Fort Sam Houston in San Antonio, Texas, to the Director of Army Intelligence concerning the green fireballs. It recommends a scientific study because “these incidents are of such great importance, especially as they are occurring in the vicinity of sensitive installations.” (Col. Eustis L. Poland, “Unconventional Aircraft,” January 13, 1949; Good Above, pp. 265, 482)

January 24 — An FBI memo from D. M. Ladd to Hoover documents speculation on a Soviet nuclear-powered disc by USAF Col. Clyde D. Gasser of the Nuclear Energy for the Propulsion of Aircraft (NEPA) project at Oak Ridge, Tennessee. Gasser reports rumors coming from Wright-Patterson AFB in Ohio that nuclear-powered disc-shaped planes might be making incursions into US airspace and returning to the USSR over the North Pole. (D. M. Ladd, “Flying Discs,” January 24, 1949)

January 27 — 10:20–11:20 p.m. Capt. Eckerman Sannes, acting chief of the Aircraft Branch at Eglin AFB near Valparaiso, Florida, and his wife are driving slowly on Cortez Road between Bradenton and Cortez, Florida, when they observe a “cucumber-shaped” object. The object, seen through binoculars, seems as long as two Pullman cars, with 7 lighted, square windows. It is throwing sparks and approximately 8–10 miles away. In the first sighting at 10:20 p.m., the object approaches from the south going north, moving from an altitude of 8,000 feet in a gradual descent until lost behind trees. In the second sighting at 11:20 p.m., the object is seen in the north, heading south and making a gradual turn to the west. It descends then climbs with a bouncing motion (up 4,000 feet, down 2,000 feet) at about 400–500 mph, resulting in an overall climb and loss to view at an altitude of around 40,000 feet. The bouncing appears to start after the final 270° course change to the west. (NICAP, “Two Sightings of Object with Lighted Windows”; Sparks, p. 49)

January 30 — 5:54 p.m. Hundreds of people see a green meteor come out of the northwest and vanish southwest of Roswell, New Mexico. It is completely silent. (NICAP, “AFOSI Case 18: Green Fireball Event Witnessed in New Mexico”; Commanding Officer, Kirtland AFB, “Nr. OSI-1-90,” January 31, 1949; Clark III 540; Loren E. Gross, UFOs, a History: 1949, January–June, The Author, 1988, pp. 15–16; Sparks, p. 49)

January 31 — Kirtland AFB in New Mexico notifies the Pentagon that it will launch an immediate investigation of the green fireballs, noting that “local commanders [are] perturbed by implications of phenomena.” LaPaz speaks to dozens of witnesses of the January 30 fireball and manages a rough triangulation of the fireball’s 143-mile path from Amarillo to Lamesa, Texas. He estimates its speed at 25,000–50,000 mph, with a beginning altitude of 60,000 feet and a final altitude around 40,000 feet. LaPaz accompanies search teams to bring back any fragments. They end up in the area of Lamesa but give up after a few days of fruitless search. He later tells AFOSI agent Paul Ryan that the fireballs are artificial, perhaps radio-controlled missiles directed by enemy agents in the Southwest. (Commanding Officer, Kirtland AFB, “Nr. OSI-1-90,” January 31, 1949; Clark III 540)

January 31 — The FBI field office in San Antonio, Texas, issues a memo on UFOs, “Protection of Vital Installations.” It is sent to Hoover, G-2, ONI, OSI, and mentions a meeting among these groups on UFOs, “considered top secret by intelligence officers of both the army and the air forces.” (SAC, San Antonio, “Protection of Vital Installations, Bureau File #65-58300,” January 31, 1949; ClearIntent, p. 149; Good Above, pp. 267, 483)
February — Chemist H. Marshall Chadwell, from the New York office of the Atomic Energy Commission, is appointed assistant director of scientific intelligence at the CIA. (Jan Aldrich)

Early February — Writer Sidney Shalett is given a guided tour of Project Grudge at Wright-Patterson AFB in Ohio, a glimpse of low-interest UFO cases, and a few conservative opinions by Air Force personnel. (Swords 73)

February 1 — Col. Hanna (?), assistant chief of the Power Plant Laboratory (at Wright-Patterson?) and project engineer for Project Sign, meets with other Project Sign personnel and concludes that nuclear-powered UFOs are improbable. (Project Status Report on Project Sign, February 4, 1949; Jan Aldrich)

February 8 — UCLA geophysicist Joseph Kaplan meets with LaPaz at the University of New Mexico in Albuquerque. He finds LaPaz’s understanding of the green fireball reports unsettling. He discusses the matter with Capt. Melvin Neef and Maj. William Godsoe (Fourth Army Intelligence liaison officer at Sandia Base). He promises to alert Scientific Advisory Board chairman Von Kármán and urge an investigation. (Clark III 540)

February 11 — Kaplan meets in Washington, D.C., with Von Kármán, who is impressed enough to write Gen. Charles P. Cabell that the green fireballs look like a serious issue that needs to be addressed, perhaps by LaPaz. (Swords 79, 497)

February 11 — Project Sign releases a final sanitized report, “Unidentified Aerial Objects: Project ‘Sign,’” Technical Report F-TR-2274-1A, authored by Lawrence Truettner and Albert B. Deyarmond and approved by Col. Clingerman (chief of USAF Technical Intelligence Division) and Col. Howard McCoy (chief of the Intelligence Department). 72 pages are visible in the NICAP report, and 1,537 pages (some illegible) are available on the Blue Book microfilm. Its conclusions are based on 273 reports (243 US and 30 foreign) and it summarizes the characteristics of four types of UFOs: flying discs, cigar-shaped objects, spherical objects, and balls of light. It acknowledges the possibility that “these aerial objects are visitors from another planet” and refers to commentary in Appendix D by James Lipp of the RAND project. “No definite and conclusive evidence is yet available that would prove or disprove the existence of these unidentified objects as real aircraft of unknown and unconventional configuration. It is unlikely that positive proof of their existence will be obtained without examination of the remains of crashed objects.... Evaluation of reports of unidentified objects is a necessary activity of military intelligence agencies. Such sightings are inevitable, and under wartime conditions rapid and convincing solutions of such occurrences are necessary to maintain morale of military and civilian personnel. In this respect, it is considered that the establishment of procedures and training of personnel is in itself worth the effort expended on this project.” Truettner and Deyarmond, in a between-the-lines rebuke of Cabell’s order not to consider the ETH, recommend that if enough cases are examined and proven to have no security risks, then the project should be terminated. The report is distributed to AMC, USAF Intelligence Directorate, ONR, Cambridge Labs, Air Weather Services, Hynek at Ohio State University, the RAND Project, and the USAF Scientific Advisory Board. (L. H. Truettner and A. B. Deyarmond, Unidentified Aerial Objects: Project “Sign.”) Air Materiel Command Technical Report no. F-TR-2274-1A, February 1949; Sparks, p. 12; Swords 72)

February 12 — Project Sign officially becomes Project Grudge. (Sparks, p. 12)

February 12 — Another realistic Spanish-language radio version of The War of the Worlds is broadcast in Quito, Ecuador, causing panic, a riot, and a major fire. (John Gosling, Waging the War of the Worlds, McFarland, 2009, pp. 102–113)

February 16 — A Conference on Aerial Phenomena is held at Los Alamos Scientific Laboratory in New Mexico with military representatives Lincoln LaPaz, Norris E. Bradbury, Marshall Holloway, Frederick Reines, and Edward Teller in attendance. Representatives from Project Grudge are noticeably absent. LaPaz tells the attendees that while most meteors are blue-green, the green fireballs are described as pale green or yellow-green. Normal meteors rarely move in long, horizontal paths with nearly constant velocities. He says there are 10 incidents that strongly fit the pattern and 20 others that might. The scientists agree to set up a series of instrument stations to photograph and analyze the fireballs. Teller thinks the fireballs might be electrical-optical phenomena. Navy Commander Richard S. Mandelkorn, who is in attendance, writes in his report that “there is cause for concern of the continued occurrences of unexplainable phenomena of this nature in the vicinity of sensitive installations.” (Cmdr. Richard S. Mandelkorn, Report of a Trip to Los Alamos, New Mexico, 16 February 1949, February 18, 1949; Lt. Col. Doyle Rees, [Minutes of February 16 Conference on Aerial Phenomena, Los Alamos], March 29, 1949; Loren E. Gross, UFOs, a History: 1949, January–June, The Author, 1988, pp. 23–53; Swords 79–80; Good Above, pp. 265–266)

February 17 — 5:57 p.m. University of New Mexico Professor of Civil Engineering Marvin May sees a brilliant white object in the west at 6° elevation for less than 6 minutes in Albuquerque, New Mexico. The object is first round
then shifts to an ellipse as it approaches, then it appears to be elongated like a bent pipe with corners, one full moon in length. It makes a slight climbing turn to the north, shifts to peach color as it makes a rapid sharp turning climb to the south, disappearing in cloudless sky by diminishing in size and brightness. At the same time, 100 guards at Sandia Base, New Mexico, including the officer of the guard, see a yellow-orange cigar-shaped object for seven minutes. (NICAP, “AFOSI Case 24: Vertical Climb, Then Leveled Off”; Sparks, p. 50)

February 18 — Cabell writes Von Kármán and says he has a transcript of the Los Alamos meeting and that Hynck is studying the green fireballs topic. He adds: “It seems unlikely that domestic incidents can be attributed to the activity of a foreign power or a science unknown to our specialists.” (Loren E. Gross, UFOs, a History: 1949, January–June, The Author, 1988, pp. 12–13)

February 18 — A Fourth Air Force letter quotes Project Sign’s requirements for radar reporting, as stated by the Continental Air Command (NORAD’s predecessor) on February 4. The USAF Air Defense Command is subordinate to ConAC at this time. The requirements admit that a “large number of targets appearing on radar screens remain unidentified.” It refers to McCoy’s November 30, 1948, letter on Sign’s preference for radar tracks of aerial objects that show extremely fast or slow speeds, vertical or near vertical ascent or descent, extraordinary maneuverability, and extreme altitudes. (Clark III 810)

February 23 — McCoy sends Capt. Roger Groseclose and Lt. Howard Smith to Kirtland AFB’s Office of Special Investigations to discuss the green fireballs with LaPaz and Neef and to mollify them for not showing up at the February 16 conference. (Clark III 541)

February 24 — Groseclose and Smith have an unpleasant exchange with Neef, LaPaz, Agent Jack Boling, and Army Maj. Godsoe, who says it’s not worth AFOSI’s time to conduct investigations for AMC. The AMC officers retort that the fireballs are not an Army concern. Groseclose and Smith say they are concerned with all anomalous aerial phenomena. Disgusted, Godsoe leaves the room. Groseclose and Smith then turn on LaPaz, criticizing him for only sending AMC raw data and not finished analyses. LaPaz says he is on leave as a volunteer and must go back to the University of New Mexico, unless he sees a contract. However, AMC agrees to set up a network of observation posts with cameras, transits, and trained personnel. (Loren E. Gross, UFOs, a History: 1949, January–June, The Author, 1988, pp. 11, 14–15; Clark III 541)

February or March — 4:30 p.m. A representative of the International Petroleum Company, a subsidiary of Standard Oil of New Jersey, is driving north along the Pan-American Highway about 6 miles south of Lima, Peru, when he sees a metallic disc hovering low above the desert on his right. He walks over to it, and three mummy-like creatures about 5 feet tall emerge. They speak to him in both English and Spanish, explaining to him that they come from another star system, are concerned about our use of atomic energy, use solar power, no longer have sex, and reproduce by subdividing. They invite him inside the disc, which from the inside has transparent walls. He sees no instruments, only a padded ledge. (Lorenzen, UFOs over the Americas, Signet, 1968, pp. 122–148)

March — Strategic Air Command head Gen. Curtis LeMay delivers the first SAC Emergency War Plan, which calls for dropping 133 atomic bombs on 70 cities in the USSR within 30 days. LeMay predicts that World War III will last no longer than 30 days. (Wikipedia, “Curtis LeMay”)

March 2 — Sidney Shalett provides the USAF Directorate of Intelligence a draft of his upcoming article for review. The Air Force is not pleased, objecting to Shalett stating an “official” USAF position, his claim that the Air Force is his sole source of information (although it is), a quote by Irving Langmuir criticizing Project Sign, and any inference that the Air Force and Navy are not cooperating. (Swords 73)

March 6–7 — 8:30 p.m. Army Pts. Martin Fensterman and Frank Luisi, on security patrol near Killeen Base [now West Fort Hood], Texas, a nuclear weapons storage site, see a flash of pale blue light in the sky to the northeast. At 8:55 p.m., a quarter mile away, Pvt. Harold Moore sees a white light with an orange trail flash across the western horizon. At 9:00 p.m., from inside the base boundary, Sgt. Hubert Vickery and Pfc. John Ransom notice a pale blue-white light streaking across the western sky low over the horizon. Between 1:15 and 2:00 a.m., four more security patrols report burst of lights like a flash bulb. (SAC, San Antonio, “Protection of Vital Installations, Bureau File 65-58300,” March 22, 1949; Clark III 541–542; Sparks, pp. 50–51; “Fort Hood Sightings, 1949,” Texas UFO Museum and Research Library, February 5, 2014)

March 8 — 1:03 a.m. Two infantrymen half a mile apart at Killeen Base, Texas, see apparently separate streaking bright lights (one white, the other yellowish red). The latter one covers 60° of sky, appearing and disappearing at about the same angle above the horizon. Cpl. Luke Sims is able to run 10 paces to a field telephone before it vanishes. All observers insist these are not meteors and are more like flares. (NICAP, “Killeen Base, Camp Hood, Texas, OSI Case 39”; SAC, San Antonio, “Protection of Vital Installations, Bureau File 65-58300,” March 22, 1949; Clark III 542; Sparks, p. 52)
March 13 — 9:53 p.m. Two MPs guarding the Technical Area at Sandia Base, New Mexico, see a silent, spherical object, bluish- or greenish-white, with a flaming blue tail twice as long as the body, which is apparently half the size of the full moon. (NICAP, “March 13, 1949, Sandia Base, NM, OSI Case 40”; Sparks, p. 52)

March 15 — A memo on UFOs to Willard Machle by a Dr. Stone from the CIA Office of Scientific Investigation dismisses the idea of UFOs as foreign aircraft and suggests they are misidentifications of other phenomena. (ClearIntent, p. 113)

March 17 — Seven sightings of large, green, red, and white flares take place at Killeen Base, Texas, including the previously skeptical Capt. Horace McCulloch, assistant G-2 of the Second Armored Division at Camp Hood, who is driving between Camp Hood and Killeen Base to prepare a test firing of some flares to prove that recent sightings are not anomalous. McCulloch puts the entire base on alert. (Clark III 542; Sparks, p. 52)

March 22 — SAC San Antonio, Texas, sends a memo to FBI headquarters regarding the January 31 communication on Protection of Vital Installations, emphasizing that USAF and the Army consider the matter “secret.” Fourth Army Intelligence is now calling UFOs “unconventional aircraft” and ATIC’s office is now Project Grudge. It also discusses green fireball cases. (SAC, San Antonio, “Protection of Vital Installations, Bureau File 65-58300,” March 22, 1949)

March 25 — J. Edgar Hoover sends a memo to a large number of FBI offices indicating that “flying discs are believed to be man-made missiles rather than natural phenomenon,” probably made in Russia. (John Edgar Hoover, “Flying Discs,” March 25, 1949; ClearIntent, p. 161)

March 28 — James Forrestal leaves office in a formal ceremony. He rides back to the Pentagon with his opponent Stuart Symington, who talks to him about something troubling. Forrestal appears traumatized. Forrestal sits in his office, dazed and incoherent, repeating, “You are a loyal fellow.”

March 31 — Forrestal is flown to Hobe Beach, Florida, to stay with his friend Under Secretary of State Robert A. Lovett, where his wife is vacationing. He meets with psychiatrist William C. Menninger (who diagnoses “severe depression” of the type “seen in operational fatigue during the war”) and psychologist Capt. George N. Raines from the Naval Hospital at Bethesda, Maryland. Forrestal has several hysterical episodes when they are there, ranting about Communists following him, and perhaps one suicide attempt.

March 31 — CIA’s H. L. Bowers writes a memo to Dr. Machle, “Notes and Comments on Unidentified Aerial Objects--Project Sign,” stating that Devarmond thinks UFOs will turn out to be another “sea serpent.” Nonetheless, they must be investigated. (Document released to Brad Sparks but not in subsequent CIA FOIA releases; Good Above, p. 330)

March 31 — 11:50 p.m. Lieut. Frederick Davis, on patrol east of Killeen Base, Texas, sees a reddish-white ball of fire passing horizontally above the base airstrip. After 10–15 seconds it disappears without descending. He notes interference on the telephone line when he calls the report in. (NICAP, “Field Telephone Affected by BOL”; Clark III 542; Sparks, p. 53)

April 2 — Menninger and Raines fly Forrestal to the National Naval Medical Center in Bethesda, Maryland, where he can be treated quietly. On the drive to the hospital from the airport, Forrestal attempts to jump out of the car but is restrained. Forrestal declares he does not expect to leave the hospital alive. He is admitted under the care of Raines, who diagnoses him with involitional melancholia and places him in a VIP suite on the 16th floor. Forrestal’s personal diaries are removed from his old office and taken to the White House, where they remain for a year.

April 3 — Broadcaster Walter Winchell announces on his radio program that the “flying saucers, never explained by anyone in authority are now definitely known to have been guided missiles shot all the way from Russia.” (“Anatomy of a Hoax, Part Two,” Saturday Night Uforia)

April 5 — 10:00 p.m. A huge green fireball with a red afterglow is seen streaking approximately 300 feet above the southern slope of Fejarito Mountain, near Los Alamos, New Mexico. It disappears behind the mountain. Another fireball is seen at 11:00 p.m., and the next two nights. (NICAP, “1949 UFO Chronology”; Sparks, p. 54)

April 8 — In response to Winchell’s claim, the Air Force admits it is impossible to “deny categorically” that the flying saucers originate in Russia. A spokesman says that some unknown incidents are placed in a classified category, denied to everyone except authorized military personnel. (“Air Force Isn’t Committing Self on Flying Disks,” Cedar Rapids (Iowa) Gazette, April 8, 1949, p. 22)

April 9 — Forrestal has been treated for one week at the National Naval Medical Center in Bethesda, Maryland, with narcosis through sodium amytal. For the next 30 days, he undergoes a regimen of insulin sub-shock combined with psycho-therapeutic interviews. Raines says the treatment occasionally throws Forrestal into a confused state with a great deal of agitation and confusion.
April 14 — Col. Reid Lumsden, commander of the AFOSI district office at Kelly AFB [now Kelly Field Annex] in San Antonio, Texas, hands the Army reports of flares at Killeen Base to Col. William Carpenter, deputy director of special investigations at the Pentagon. Carpenter promises to investigate. (Clark III 542)

April 16 and 18 — Mysterious flares are again observed at Killeen Base, Texas. (Brad Sparks and Jerome Clark, “The Southwestern Lights, Part Three,” IUR 10, no. 5 (Sept./Oct. 1985): 10; Clark III 542)

April 19 — AFOSI at Kirtland AFB, New Mexico, sends to USAF headquarters a list of all green fireball reports it has investigated (39 in all) from December 5 to April 12. The common characteristics of most of the incidents are: “a. Green color, sometimes described as greenish-white, bright green, yellow-green, or blue green. b. Horizontal path, sometimes with minor variations. c. Speed less than that of a meteor, but more than any known type of aircraft. d. No sound associated with observation. e. No persistent trail or dust cloud. f. Period of visibility from one to five seconds.” (“The Scientific Advisory Board to the Chief of Staff, United States Air Force, Conference,” November 3, 1949; Clark III 541; Swords 133–135)

April 22 — 9:05 a.m. A round, flat, thin, metallic disc is seen traveling west to east, dropping slowly, over Cliff, New Mexico. (Sparks, p. 55)

April 25 — 6:30 a.m. A man named Abreu and a friend are fishing at Springer Lake, northwest of Springer, New Mexico, when they hear a high-pitched whistle and see a number of silvery-white balls passing overhead quickly. They reappear repeatedly over the next hour. (NICAP, “Various Formations Observed”; Clark III 541; Sparks, p. 57)

April 25 — Lt. Col. Doyle Rees wires AFOSI headquarters to ask if he can send two of his men to AMC to find out if Project Grudge plans to do anything about the green fireballs. Before Rees has a response, Joseph Kaplan arrives in Albuquerque, New Mexico, having been directed there by AF Intelligence Director Maj. Gen. Charles Cabell and Scientific Advisory Board Chairman Theodore Von Kármán, who wants Kaplan to set up a field investigation. They emphasize that Grudge is not to be informed. (Clark III 542; Loren E. Gross, UFOs, a History: 1949, January–June, The Author, 1988, p. 52)

April 27 — Rees, Kaplan, and LaPaz brief Armed Forces Special Weapons Project personnel at Sandia Base, New Mexico. LaPaz outlines plans for a network of visual, photographic, spectrographic, and radar observations covering Los Alamos, Sandia, and White Sands. Scientist William D. Crozier of the New Mexico School of Mines offers to handle air sampling. Rees urges that the Killeen Base in Texas be included. Kaplan, who says the project is “of extreme importance” because “these occurrences relate to the National Defense of the United States,” recommends LaPaz to handle the project. (Lt. Col. Doyle Rees, “Unknown (Aerial Phenomena),” May 12, 1949; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1949 January–June, Supplemental Notes, The Author, 2000, pp. 60–62; Clark III 542)

April 27 — USAF Directorate of Intelligence briefs the USAF Deputy Chief of Staff for Operations on UFOs. “Investigations continue in an effort to find definite explanations for the many unidentified aerial objects which have been reported during the past two years.” (“Unidentified Aerial Objects,” Air Brief, Special Study Part Two, April 27, 1949)

April 27 — A 22-page memorandum for the press (629–49) on “Project Saucer” is released by the Pentagon Office of Public Information, scheduled deliberately to coincide with part one of Shalett’s article in the Saturday Evening Post. The writer is unknown, but it is more pro-ETH than the current Project Grudge mentality, listing several
April 28 — 9:20 p.m. Two Army patrolmen southeast of Killeen Base, Texas, see a blinking violet light no more than 1.5 inches in diameter and only 10–12 feet from them, 6–7 feet above the ground. During the 60-second observation, the light passes through the branches of a tree. At 9:25 p.m., 2 miles away, four Army soldiers see a 4-inch light with a 2–4-inch metallic cone attached to the back. It silently approaches them in a level flight at 60–70 mph. It disappears to the southwest at a distance of 150 feet. At about 9:37 p.m., a 2-inch-wide white light appears 100 feet away to the northwest, flying in a zig-zag fashion in a level path 6 feet above the ground. It vanishes abruptly. A third light shows up at 9:39 p.m. in the west-southwest. (NICAP, “Close Encounters with Drones/Probes at Weapons Storage Site”, Sparks, pp. 57–58; Brad Sparks and Jerome Clark, “The Southwestern Lights, Part Three,” IUR 10, no. 5 (Sept./Oct. 1985): 10; Clark III 542)

April 28 — USAF Director of Intelligence Charles Cabell sends a report on “Unidentified Aerial Objects” to the Joint Intelligence Committee. It summarizes the history of Project Sign up to its redesignation as Grudge and adds an appendix on “Unidentified Aerial Objects: Fact and Discussion,” which is basically a short version of the sanitized February 11 Sign report, with some green fireball information added. It recommends sending reports of unidentified “light phenomena” to the scientific community and reports of “atomic powered craft of unusual design” to the AEC. It concludes that “There are numerous reports from reliable and competent observers for which a conclusive explanation has not been made” and that some “involve configurations and described performance which might conceivably represent an advanced aerodynamical development. A few unexplained incidents surpass these limits of credulity. It is unlikely that a foreign power would expose a superior aerial weapon by a prolonged ineffectual penetration of the United States.” This essentially resurrects the ETH as a possibility, without clearly stating it. (“Report by the Director of Intelligence, USAF, to the Joint Intelligence Committee on Unidentified Aerial Objects,” April 28, 1949; Jan Aldrich, “Top-Secret 1949 Document,” IUR 23, no. 1 (Spring 1998): 3–6, 31; Swords 76–77)

April 28 — Kaplan, LaPaz, Rees, and Neef meet with security officers at Los Alamos National Laboratory in New Mexico to discuss green fireball observations at that facility. (Loren E. Gross, The Fifth Horsemman of the Apocalypse: UFOs, a History: 1949 January–June, Supplemental Notes, The Author, 2000, pp. 62–63)

April 28 — 8:00 a.m. Businessman and private pilot Leon A. Faber is flying at 3,000 feet near the Indiana State Prison in Michigan City, Indiana, when he sees a metallic disc moving east about 10,000 feet away. He is chatting with some ham radio operators on the ground during the 5 minutes the object is in sight before it disappears. (NICAP, “Flying Saucer Observed from Aircraft”)

April 28 — 5:45 p.m. Howard Hann [Hamm?], a Mr. Hubert [Huber?], and Tex Keahey see a very large, bright, sausage-shaped object travel from northeast to southwest over the rim of the Catalina Mountains near Tucson, Arizona, over a period of 12 minutes. The object is shiny metallic and reflects the sun, apparently revolving as it moves like the “slow roll of an airplane.” There is no noise, nor is there exhaust or a vapor trail. There are no wings or engines or “protuberances of any sort.” It appears to be traveling at 300–600 mph. (NICAP, “Cigar-Shaped Object Observed in Daylight”)

April 28 — 8:30 p.m. Several security patrols at Killeen Base, Texas, report nine separate sightings of lights southeast of the base. Most change color from white to red to green. On one occasion, four lights appear together; on another, 8–10 show up in each other’s company. No debris or evidence of flares are found. (Brad Sparks and Jerome Clark, “The Southwestern Lights, Part Three,” IUR 10, no. 5 (Sept./Oct. 1985): 10; Clark III 543; Sparks, p. 58)

April 29 — The April 30 issue of the Saturday Evening Post with part one of Sidney Shalett’s “What You Can Believe about Flying Saucers” hits the newsstands. The USAF Public Relations Office has cooperated fully with Shalett, who sets out a fairly even-handed introduction to the phenomenon. (Sidney Shalett, “What You Can Believe about Flying Saucers, Part One,” Saturday Evening Post, April 30, 1949, pp. 20–21, 136–139; Swords 73)

April 30 — Hynek turns in his astronomical analysis of Sign’s 237 cases. His contract with Sign is over. (J. Allen Hynek, The UFO Experience, Ballantine ed., 1974, pp. 199–200; Hynek UFO Report, p. 17; O’Connell 45)
May 4 — The US Fourth Army creates an operational plan for a green fireball observation and tracking network at Killeen Base in Camp Hood, Texas. Although it lacks cameras, it has four six-man observation posts equipped with instruments to obtain directional bearings. One of the posts serves as the plotting center to coordinate and triangulate UFO sightings. Each day, a roving patrol gets new orders. (Brad Sparks and Jerome Clark, “The Southwestern Lights, Part Three,” IUR 10, no. 5 (Sept./Oct. 1985): 10–12; Clark III 543; Thomas Tulien, ed., Proceedings of the Sign Historical Group UFO History Workshop. Sign Historical Group, November 2001, pp. 43–44).

May 5 — 10:00 a.m. The Fourth US Army has approached AFOSI in San Antonio to offer assistance in investigating green fireballs and the Killeen lights. They arrange a meeting with AFOSI, ONI, CIC, the FBI, and the Armed Forces Special Weapons Project at Camp Hood, Killeen, Texas, the first of several weekly meetings. Army and Navy officials agree that the fireballs remain unexplained. AFSWP personnel believe they are natural phenomena; AFOSI and FBI give no opinion. The Fourth Army urges AFOSI to create an observation system, even though it had just secretly created one of its own on May 4. (Brad Sparks and Jerome Clark, “The Southwestern Lights, Part Three,” IUR 10, no. 5 (Sept./Oct. 1985): 10–11; Clark III 543)

May 5 — 11:40 a.m. Army officers Maj. Charles D. May Jr., Maj. James N. Olhausen, and Capt. Molloy C. Vaughn on the Waco no. 4 firing range at Fort Bliss, Texas, watch for 30–50 seconds two oblong white discs pass through a field of fire. They are flying at about 200–250 mph at an altitude of 1,000 feet. The objects make a shallow turn. (NICAP, “May 5, 1949, 1140 MST, Fort Bliss, Texas”; Sparks, p. 59)

May 6 — Soviet test pilot Arkady Ivanovich Apraksin takes a new airplane for a flight at the Kapustin Yar site, Astrakhan Oblast, Russia. At its maximum ceiling of 9.3 miles, he encounters a cucumber-shaped object, similar to the one he encountered on June 16, 1948, that directs cones of light at his aircraft from a distance of 6–7 miles. The lights cause his communications equipment to fail and damage part of his plexiglass cockpit canopy that results in a loss of air pressure. He manages to land on the banks of the Volga River 30 miles from Saratov. He wakes up in a hospital in Saratov. He again undergoes intense interrogation, psychotherapy, and medical procedures. (Good Above, pp. 221–223; Joe Brill, “UFO’s behind the Iron Curtain,” Skylook, no. 87, February 1975, p. 15)

May 6 — Col. Lumsden of the San Antonio, Texas, AFOSI office informs headquarters that the “matter has reached a fairly serious stage and some positive action is necessary.” He does not send this message to Project Grudge. Headquarters responds quickly and orders him to investigate all sightings but reminds him to inform AMC. (Brad Sparks and Jerome Clark, “The Southwestern Lights, Part Three,” IUR 10, no. 5 (Sept./Oct. 1985): 11; Clark III 543)

May 6 — Part two of Shalett’s article on UFOs appears in the May 7 issue of the Saturday Evening Post, which takes a more skeptical tone than the first part, with the Gorman case receiving a particularly harsh thrashing. However, he treats Chiles-Whitted favorably and ends with some hints on how to make good observations. Within a few days, the frequency of UFO reports hits an all-time high. USAF issues another long press release completely debunking UFOs, but it has no effect. (Sidney Shalett, “What You Can Believe about Flying Saucers, Part Two,” Saturday Evening Post, May 7, 1949, pp. 36, 184–186; Swords 74; Ruppelt, p. 63)

May 9 — An article in Time magazine reports on the Air Force press release, remarking that “Spinners of yarns about flying saucers, including a score or so of Air Force pilots, stuck stoutly to their stories.” (“Things That Go Whiz,” Time, May 9, 1949; “Anatomy of a Hoax, Part Six,” Saturday Night Uforia)

May 9 — Editor Ken Purdy asks Maj. Donald E. Keyhoe to investigate the flying saucer mystery for True magazine, warning him to watch out for “fake tips” from the Pentagon. Keyhoe is initially skeptical, but after talking to his old friends Adm. Delmer S. Fahrney and Adm. Calvin M. Bolster, his opinion changes. (Keyhoe, The Flying Saucers Are Real, Gold Medal, 1950, pp. 18–22. 44)

May 9 — Naval Unit Commander Robert B. McLaughlin, with several other officers, witnesses a white object overhead during the launch of a WAC Corporal B rocket at White Sands Proving Ground, New Mexico. It disappears “in a blinding burst of speed to the west.” (R. B. McLaughlin, [Letter to J. A., VanAllen], May 12, 1949; Sparks, p. 61)

May 12 — Commander McLaughlin writes to his friend, atmospheric physicist James Van Allen, describing the Moore theodolite case and his own sighting a few days earlier. He thinks they must involve technology because they have been seen accelerating and maneuvering. (R. B. McLaughlin, [Letter to J. A., VanAllen], May 12, 1949)

May 12 — 9:30 p.m. Astronomer Donald H. Menzel leaves Holloman AFB on Highway 70 for Alamogordo, New Mexico. Shortly after noticing the star Antares, he sees another fuzzy object in the sky nearer to the horizon. A second object appears three degrees to the south. Determining that the objects are not Castor and Pollux or reflections, Menzel watches them another 4 minutes. Both objects vanish abruptly. (Donald H. Menzel, Flying Saucers, Harvard University, 1953, pp. 3–4. 99–100; Sparks, p. 62; J. Allen Hynek, “Vignettes of UFO History: Dr. Menzel Reports a UFO!” IUR 7, no. 6 (Nov./Dec. 1982): 11; Clark III 741–742)
May 18 — **George N. Raines** leaves Washington, D.C., for four days to attend a meeting of the American Psychiatric Association. He says Forrestal seems “somewhat better,” having regained 12 pounds.

May 18 — **Walter Winchell**, in his “On Broadway” syndicated column, writes: “The *N.Y. World-Telegram* on Saturday [May 14] confirmed this reporter’s exclusive report of several weeks before—which newspapermen have about—the Flying Saucers . . . Said the front-page piece in the *W-T*: ‘Air Force people are convinced the flying disc is real. The clincher came when the air force got a picture recently of three discs flying formation over Stephenville, Newfoundland. [The July 10, 1947, hole-in-the-cloud case?] They outdistanced our fastest ships. Some air force men believe the discs are a new type flying machine utilizing gyroscopic principles’ . . . At the time we added that the reality of the flying discs or saucers could not be denied truthfully.” (“*Anatomy of a Hoax, Part Two*,” Saturday Night Uforia)

May 19 — Wright-Patterson Air Material Intelligence Commander Col. **Howard McCoy** forwards a copy of the Project Sign final report to the Research and Development Board, along with some appendices that later find their way into the Project Grudge final report. (Michael Hall and Wendy Connors, “The Research and Development Board: Unanswered Questions,” *IUR* 26, no. 2 (Summer 2001): 10)

May 19 — The Fourth Army’s observation system near Killeen Base, Texas (without cameras, but with four 6-man observation posts equipped with instruments), is revealed to the intelligence community at one of its weekly meetings. Two trucks serve as a roving Artillery Patrol observation post linked to the Killeen plotting center by radio. AFOSI Lt. Col. **Doyle Rees** has meanwhile set up a 24-hour visual observation post in the Sandia Mountains near Albuquerque, New Mexico. It is equipped with a wide-angle-lens camera fitted with a spectrographic grating. (Brad Sparks and Jerome Clark, “The Southwestern Lights, Part Three,” *IUR* 10, no. 5 (Sept./Oct. 1985): 12; Thomas Tulien, ed., *Proceedings of the Sign Historical Group UFO History Workshop*, Sign Historical Group, November 2001, pp. 43–44; Clark III 543)

May 21 — 1:30 p.m. An F-82 is dispatched from Moses Lake AFB [now Grant County International Airport] in Washington State to intercept a UFO that is hovering in restricted air space over the Hanford Atomic Works at an altitude of 17,000–20,000 feet. The silvery disc is seen from the ground at Hanford and on radar. Before the F-82 can take off, the disc speeds away faster than a jet fighter. It disappears from ground radar and the F-82 cannot locate it. (NICAP, “Hanford AEC Plant / F-82/RV Case”; Sparks, p. 63; Hynek UFO Report, p. 141)

May 22 — 1:45 a.m. At the National Naval Medical Center in Bethesda, Maryland, **Forrestal** is awake and refuses a sedative. Five minutes later, the Navy corpsman guarding him finds the room empty. Forrestal’s body is found on a third-floor roof below the 16th-floor kitchen. No suicide note is found other than part of a translation of Sophocles’ tragedy Ajax that he is copying. (Wikipedia, “James Forrestal”; J. C. Hawkins, *Betrayal at Bethesda: The Intertwined Fates of James Forrestal, Joseph McCarthy, and John F. Kennedy*, The Author, 2017; David Martin, *The Assassination of James Forrestal*, McCabe, 2019)

May 24 — 5:00 p.m. Five witnesses (NACA Ames Research Lab employees Don Heaphy, Gilbert Rivera and his wife, Mrs. Roy L. McBeth, and Mrs. William McBeth) on a fishing boat on the Rogue River, Oregon, near Elephant Rock, see a round, silvery object the size of a transport aircraft. It comes from the east, then turns southwest and leaves no exhaust trail. The disc appears flattened and has a wrinkled surface with a vertical stabilizer fin. The time of observation is less than 3 minutes. (NICAP, “The Rogue River Incident”; Sparks, p. 64; Swords 83–84; Bruce Maccabee, “An Assessment of the UFO Sighting at Rogue River, Oregon (May 24, 1949),” December 2009)

May 27 — 2:25 p.m. Pilot and businessman **Joseph Shell**, ferrying an SNJ trainer for North American Aviation from Red Bluff, California, to Burns, Oregon, sees 5–8 oval objects, twice as long as wide and one-fifth as thick, around Hart Mountain, Oregon. They fly in trail formation, with an interval equal to 3–4 times their length, except that the second and third are closer together. (NICAP, “Pilot Encounters 5–8 Egg-Shaped Metallic Objects”; Sparks, p. 65)

May 31 — The Air Force Office of Special Investigations sends Project Grudge a copy of Rees’s report on Kaplan’s visit on April 28, the trip that USAF Intelligence had arranged to explore the possibility of a clandestine investigation separate from Grudge. Thus AMC learns of the conspiracy to keep it in the dark, but Rees fails to mention the involvement of USAF Intelligence. (Brad Sparks and Jerome Clark, “The Southwestern Lights, Part Three,” *IUR* 10, no. 5 (Sept./Oct. 1985): 15)

May 31 — The Navy review board, convened by Adm. **Morton D. Willcuts**, completes hearings on James Forrestal’s death. The cause of death is remarkably inconclusive, and the investigation leaves many questions unanswered.

Summer — The gouge is said to be still visible in the debris field near Corona, New Mexico. **Mack Brazel**, having found various scraps and bits for the past two years, mentions to someone in a bar in Corona that he has some material. The next day, a Capt. Armstrong and three others from Roswell Army Air Field supposedly confiscate the pieces.
Summer — 4:00 p.m. The French Navy patrol boat *La Rusé* (formerly the USS PC-472) encounters a cigar-shaped bluish object about one mile away off Casablanca, Morocco. The crew watches it for 1 minute until it shoots toward the horizon and out of sight. (Lorenzen, *UFOs: The Whole Story*, Signet, 1969, p. 36)

June 6 — 9:05 p.m. Two observation posts at Killeen Base, Fort Hood, Texas, spot a hovering orange light. Lts. Virgil Williams and Marvin L. Jones are at one site and Lts. Bernard G. Raferty and *Alfred H. Jones* are at the other. When they triangulate its location, they find it is 3 miles south of one observation post and 4.5 miles south of the plotting center, hovering 5,280 feet in the air. It is 30–70 feet in diameter. Suddenly it starts moving in level flight, then bursts into small particles. The duration is less than 3 minutes. This observation involves the first real-time triangulation of a UFO sighting. (Brad Sparks and Jerome Clark, “The Southwestern Lights, Part Three,” *IUR* 10, no. 5 (Sept./Oct. 1985); 12; Clark III 543; *Sparks*, p. 66; Thomas Tulien, ed., *Proceedings of the Sign Historical Group UFO History Workshop*, Sign Historical Group, November 2001, p. 43)

June 14 — 3:35 p.m. A crew of Navy engineers under Capt. *Robert Bright McLaughlin* is testing an Air Force V-2 rocket at White Sands Missile Range, New Mexico. When the V-2 attains a speed of 2,000 feet per second in its upward flight, it is joined by two smaller circular objects that pace it, one on each side. One then passes through the rocket’s exhaust, joins the other, and together accelerate upwards leaving the V-2 behind. Five other missile observation crews also see the objects. (NICAP, “Two UFOs Pace V-2 Rocket”; Robert McLaughlin, “How Scientists Tracked a Flying Saucer,” *True*, March 1950, pp. 25–27, 96–99; *Sparks*, p. 66; Swords 92–93)

June 22 — Three women (one a schoolteacher, another a biologist working at Oak Ridge, Tennessee, and a third who is the wife of a member of the Security Division, AEC, Oak Ridge) observe an odd trio of “flying saucers” for about 15 minutes: “It was described as consisting of two identical rectangular-shaped objects which appeared to be coordinated in movement and which moved in wave-like motion. The third object was circular in shape and appeared to be in level flight between and above the two rectangular objects. The rectangular objects appeared to be bright metal on top but dark underneath, while the color of the circular object was the same as that of frosted glass. The ‘flying saucer,’ when last sighted, was in level flight and was flying in a northwesterly direction. The weather was clear with high cumulus clouds. The ‘flying saucer’ flew at speed of from 10 to 15 mph over an area just about the center of Oak Ridge.” (Loren E. Gross, *UFOs, a History: 1949, January–June*, The Author, 1988, pp. 83–84)

June 29 — 6:30 p.m. A former US Air Force tech sergeant observes three separate flights of three V-shaped or triangular objects from his front porch in Baltimore, Maryland. The objects veer sharply into a cloud at 2,500 feet altitude and then fly around it repeatedly. They have the ability to reverse their course 180° instantaneously. Through binoculars, they look like black, open boomerangs. More objects join them until there are 15–20, and he watches them for two hours. The formation moves from southeast to northeast and disappears. Fifteen other witness also see the display. (Marler 126–128)

July 3 — 10:40 a.m. Aeronautical engineer *Molt Taylor*, airport manager at Longview, Washington, is preparing for an air show when someone points out an object in the sky to the northwest. He announces it over the PA system to the crowd of 150–200 observers, including pilots, who watch a metallic disc cross to the southeast with a falling-leaf motion. Estimated altitude is 30,000 feet at 300 mph, with the approximate size of 100 feet. A second object is seen at 10:49 a.m. for 2 minutes. A third sighting takes place at 11:25 a.m. An object approaches from the west at about the same altitude, oscillating at 48 per minute, and disappears into the sun. (NICAP, “Metallic Discus Object Observed by 150–200 Observers”; *Sparks*, p. 67; Swords 82–83; James E. McDonald, “Statement on Unidentified Flying Objects,” in *Symposium on Unidentified Flying Objects*, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 48–49)

July 13 — *Kaplan* responds to a July 1 letter from Gen. *Charles P. Cabell* inquiring about his April visit to Los Alamos, New Mexico. He explains that he has deliberately waited two months to report because he wanted to have a cooling off period from the deep impression the New Mexico witnesses had on him. Moreover, he wants to see if the green fireballs are still reported (they are) before he recommends a full-scale instrumented program. He says that Norris Bradbury, the Los Alamos lab director, has urged that a classified scientific conference be held to discuss the phenomena. Kaplan suspects that the fireballs are an auroral phenomenon, but concedes that their horizontal motion and southern appearance are “difficult to explain.” He recommends a photographic and spectrographic patrol that would stay on to look out for the fireballs. (Brad Sparks and Jerome Clark, “The Southwestern Lights, Part Three,” *IUR* 10, no. 5 (Sept./Oct. 1985); 15)

July 24 — 12:03 p.m. Henry Clark, manager of a flying service, is flying a Piper PA-16 Clipper at 19,000 feet 10 miles northwest of Mountain Home, Idaho, when he sees a tight formation of 7 delta-shaped objects, 35–55 feet in diameter near his plane. They make a perfect and unbanked right turn 1,500 feet ahead of his plane, then they turn right again, passing the aircraft at about 450–500 mph. Clark’s engine runs rough during the sighting, which lasts
10 minutes. After he lands, he finds all his spark plugs burned out. When Blue Book investigates the case, they confiscate the spark plugs. (NICAP, “Piper Clipper Encounters Seven Delta-Shaped Objects”, Sparks, p. 68)

July 24 — 8:30 p.m. An Air Force major and captain watch seven bluish-white lights pass over Fort Worth, Texas, in a V formation, moving rapidly from south to north. The distance between the lights does not vary during the 4–5 seconds they are visible. (Loren E. Gross, UFOs, a History: 1949 July–December, The Author, 1988, p. 13)

July 24 — A green fireball is seen falling close to Socorro, New Mexico. The next day, scientist William D. Crozier collects dust samples from the School of Mines campus at Socorro. The samples contain copper particles of unusually large size. (Clark III 543–544; Sparks, p. 68)

August — George Adamski publishes Pioneers of Space, detailing his out-of-body visits to the Moon, Mars, and Venus. In private correspondence he later explains “how one may venture from one place to another, while his physical is in one place and he is in another. That is the way I have written this book. I actually have gone to the places I speak of.” (George Adamski [ghost-written by Lucy McGinnis], Pioneers of Space, Leonard-Freefield, 1949; “Palomar Mountain, 1940–1960: From Obscurity to World Fame,” The Adamski Case, September 22, 2019)

August 8 — 11:30 p.m. Six airmen and tower operators at Medford Municipal Airport [now the Rogue Valley International–Medford Airport] in Oregon see 1–7 shiny objects traveling at variable speeds at an estimated altitude of 30,000 feet. They fly in formation for a while, then break off and return to formation again. Control tower operators using binoculars seem to distinguish wings on the objects. They remain visible until around 12:30 a.m. (NICAP, “Winged Objects Cavort over Airport”)

August 10 — USAF’s AMC issues a final 600-page report, “Unidentified Flying Objects—Project Grudge,” Technical Report 102-AC-49/15-100, or “The Grudge Report,” authored by Lt. Howard W. Smith and George W. Towles. Hynek’s April analysis is included as an appendix. Based on 237 cases, Hynek finds that 32% can be explained astronomically. Others say 12% are balloons, 33% are other misidentifications, hoaxes, or insufficient information. That leaves 23% (55) classed as unknowns. Despite this, witnesses are mostly deluded, hysterical, lying, or crazy, and “further study along present lines would only confirm the findings presented herein.” The report concludes there is little evidence to prove UFOs are real and do not represent a security threat. It recommends that press releases be created to “aid in dispelling public apprehension.” On the other hand, it suggests that military and government agencies interested in “psychological warfare” be informed of the findings. Appendix D is written by USAF Scientific Advisory Board member George E. Valley, who writes that extraterrestrial civilizations “might observe that on Earth we now have atomic bombs and are fast developing rockets. In view of the past history of mankind, they should be alarmed. We should, therefore, expect at this time above all to behold such visitations.” Project Grudge enters a period of dormancy until July 1950. The report is classified Secret until August 1, 1952. (Lt. Howard W. Smith and George W. Towles, “Unidentified Flying Objects—Project Grudge,” Air Materiel Command Technical Report 102-AC-49/15-100; Hynek UFO Report, p. 18; Sparks, p. 12)

August 10 — The National Military Establishment is renamed the Department of Defense to unify the Army, Navy, and Air Force under the Secretary of Defense. It establishes the Joint Chiefs of Staff. (Wikipedia, “United States Department of Defense”)

August 17 — Lincoln LaPaz submits the fifth of a series of reports on “anomalous luminous phenomena.” He notes that “Many of the green fireballs now appearing descend in nearly vertical paths, whereas, in earlier months almost all of the green fireballs observed moved almost horizontally. There appears to be a concentration of New Mexico incidents near weekends, especially on Sunday and near the hour of 8:00.” (Loren E. Gross, UFOs, a History: 1949 July–December, The Author, 1988, pp. 28–29)

August 16 — A young girl in Wola Drzewiecka, Poland, sees a dark green object nearby like two bowls put together and about 5 feet in diameter. She walks right up to it and touches its metallic surface with her index finger, getting a mild electric vibration and making her fingertip turn red. The object begins rotating, then rises up and disappears to the south at an altitude of 50 feet. In the distance she sees another object that she says remained in the same spot for several days. (Poland 18–19)

August 18 — LaPaz and USAF scientists meet with William D. Crozier to find out about his July 25 dust collection in Socorro, New Mexico. Crozier says he thinks the copper particles may have come from a campus building, although samples from the open country contain the same particles. LaPaz notes that copper is extremely rare in
meteorites, although it might explain the yellow-green color of the fireballs. He suggests that further air and ground samples be taken in areas where the fireballs are seen. (Clark III 543–544)

August 19 — Two prospectors, Buck Fitzgerald and Mase Garney, report that a flying saucer crashed near them in Death Valley, California. Two little men jump out and start running. The prospectors chase them over a sand dune, but lose them. (“Little Men’ in Flying Disc,” San Francisco Examiner, August 20, 1949, p. 2; Clark III 269; Patrick Gross, **UCECAT**, August 22, 2006)

August 19 — 8:15–11:00 p.m. Rev. Gregory Miller, pastor of the St. Peter and Paul Church in Norwood, Ohio, has purchased from Army surplus an 8-million-candlepower searchlight for his church carnival. Sgt. Donald R. Berger of ROTC of the University of Cincinnati is to operate it. During the festivities, Berger’s sweeping searchlight suddenly flashes across a stationary circular object in the sky. Miller and others join in and observe. When Berger moves the searchlight away, the disc continues to glow. Hundreds of calls are received by Cincinnati Post and Cincinnati Enquirer offices regarding fireballs and comet-like objects all across the Cincinnati area this first night. The searchlight picks up the same or similar objects on nine further occasions, the last being on March 10, 1950. (“More Proof That ‘Saucers’ Exist,” CRIFO Orbit 1, no. 5 (August 6, 1954): 1–2; NICAP, **The Ohio Searchlight Incident**; Patrick Gross, “The Norwood Searchlight Incident”)

August 29 — 7:00 a.m. The Soviet Union secretly conducts its first successful nuclear weapon test (First Lightning) at the Semipalatinsk Test Site in Kazakhstan. The design is very similar to the first US “Fat Man” plutonium bomb. The project is led by physicist Igor Kurchatov. (Wikipedia, “RDS-1”)

September 1 — Col. John W. Schweizer of AFOIN writes to the director of USAF Intelligence: “reports that fall in the ‘fireball’ category will no longer be included in HQ Air Materiel Command and Directorate of Intelligence, HQ USAF, investigative activity on unidentified aerial incidents.” AMC hands green fireball reports over to the USAF Cambridge Research Laboratory at Hanscom AFB in Bedford, Massachusetts. AFOIN rejects an Army request for further facilities to study the green fireballs from field locations. (Clark III 543)

September 14 — The Geophysical Sciences Branch of the Air Force Research and Development orders the new AMC commander Lt. Gen. Benjamin Chidlaw to have the Cambridge Research Laboratory in Massachusetts evaluate the New Mexico and Texas green fireball cases and consider the creation of an instrumented network. AMC is directed to send representatives from Boston to a meeting in New Mexico. (Lt. Col. John McK. Tucker, “Light Phenomena,” September 14, 1949; Brad Sparks and Jerome Clark, “The Southwestern Lights, Part Three,” IUR 10, no. 5 (Sept./Oct. 1985): 16; Clark III 544)

September 14 — 9:30–10:00 p.m. Two residents of Lubbock, Texas, see 9 clusters of objects “similar to ducks flying in formation,” bright silver and roughly round in shape. There are as many as 50 objects in all the formations except one. They seem to be traveling at 5,000 feet altitude, going north to south. Each light is visible for about 10 seconds, but it takes 30 minutes for all the objects to pass overhead. One witness is convinced the objects are ducks. (Clark III 692–693)

September 26 — 6:30 p.m. Lester Wolfe and five others 5 miles southeast of Lexington, Nebraska, are threshing wheat when they see three objects coming from the general direction of the sun (southwest). As the objects move, they give off a dazzling brilliance. They maintain a level flight with two of the objects changing positions as they fly. The power of the illumination remains constant throughout the incident (no pulses or flashes). Once the objects reach a direction northwest of the observers, they make a smooth 90° turn straight upwards and climb rapidly out of sight. Dean Wolfe is a recent graduate of a two-year course in aeronautical design and thinks the objects look like domed discs when viewed face forward, but are more like stubby, wingless, tailless fuselages when seen from the side. About 5 miles away, Don, Minnie, Elmer and Irene Ballheim see two fast-moving objects flying in the distance at level flight before abruptly turning straight up and flying upward. This group of people does not know their distant neighbors. (NICAP, “90-Degree Turn Straight Up”; Swords 83–84)

September 27 — 1:30 and 3:00 a.m. At least five observers at Sandia Base, New Mexico, see fireballs of various colors traveling either in an arc or in tangent to the Earth. (Francis Ridge, “The Nuclear Connection Project: The New Mexico Sightings,” September 3, 2005; Sparks, p. 71)
September or October — A Swiss Air Force officer sees a silvery disc 20 feet in diameter with jagged edges above Payerne, Vaud, Switzerland. He observes it flying at about 700 mph for 12 seconds. (Center for UFO Studies, [Payerne case file])

Fall — A radar-tracking UFO case takes place at a key atomic base (probably Los Alamos, New Mexico). The base radar scope covers 200 miles of sky up to 100,000 feet. A legitimate radar contact tracks five apparently metallic objects at a great height moving south and crossing the radar scope in less than 4 minutes (an average of about 4,500 mph). (H. B. Darrach Jr. and Robert Gimna, “Have We Visitors from Space?” Life, April 7, 1952, p. 89)

Fall — Night. Donald Bushwell and his wife are traveling along a straight highway in New Mexico. Suddenly a disc about 50–60 feet across comes straight down the road toward them about 4 feet off the ground. It raises up a little before reaching the car and passes overhead. As it does so, his radio turns to static. (Tulsa (Okl.) Tribune, December 10, 1957; Schopick, p. 77)

October 10 — 1:07 a.m. A bluish-green fireball is seen moving to the northeast at 45° above the horizon at Sandia Base, New Mexico. Duration is from 4 to 15 seconds. (Francis Ridge, “The Nuclear Connection Project: The New Mexico Sightings,” September 3, 2005)

October 12 — Columnist Frank Scully writes an article in Variety alleging that the US government has retrieved crashed spaceships in the southwestern desert. (Frank Scully, “Scully’s Scrapbook,” Variety, October 12, 1949; Clark III 595, 1044)

October 14 — At another conference in Los Alamos, New Mexico, attended by 16 representatives of AFOSI, AMC (Joseph Kaplan and Maj. Frederic C. E. Oder), Fourth Army, the FBI, AFWSWP, and Los Alamos scientists (Edward Teller, George Gamow, and Stanislaw Ulam), the green fireballs are identified as probably atmospheric in origin, but more observational data is needed. LaPaz and Neef speak at length. Oder’s Cambridge Research Laboratory at Hanscom AFB in Bedford, Massachusetts, is selected for a field project, under LaPaz’s supervision. (Brad Sparks and Jerome Clark, “The Southwestern Lights, Part Three,” IUR 10, no. 5 (Sept./Oct. 1985): 16; Clark III 544; Swords 81; Good Above, pp. 266–267)

October 14 — 1:15 p.m. Harley C. Marshall, manager of public relations at Palomar Observatory in San Diego County, California, is driving away from the observatory when he sees a perfect “V of V’s” formation of about 16–18 silver objects without tails or wings overhead traveling at high speed to the northwest and emitting a sound like jets. He stops and watches them disappear behind the cloud cover. Returning to the observatory, he phones electrician Benjamin B. Traxler, who at 1:20 p.m. sees one dark UFO traveling to the southwest. Marshall checks the Navy Electronics Laboratory Geiger counter on site and sees that the needle has jumped off the scale for several seconds. For the next 10 days, another 21 incidents of off-scale cosmic-ray detector incidents occur at scattered times, fitting a periodic 1.5-hour time schedule, a phenomenon not seen before or after, and unexplainable by equipment failure or radio interference from aircraft. Two representatives of the Office of Naval Research and two from the Naval Electronics Laboratory in Point Loma, California (Joseph P. Maxfield and G. L. Bloom), visit the observatory to investigate the readings, but not before they stop in at Alice Wells’s Palomar Gardens Café on the way in. After George Adamski claims he has seen increased UFO activity in the area (including a sighting about the same time as another observation by Traxler on October 21), they ask him if he would send them any photos he might take with one of his telescopes. He gives them a copy of a telescopic photo he took in February 1949 with his 15-inch reflector. The Naval Electronics Lab later attributes the photo to “electric discharge which frequently occurs in cameras during film pulling in dry or cold climates.” Several Navy aircraft of differing prop and jet types are flown near the observatory using radio, altimeter, and radars on October 21 and November 2 in an unsuccessful effort to trigger the Geiger counter. (NICAP, “Geiger Counters Detect UFO Presence”; Clark III 38, 949–950; Sparks, pp. 74–75; Swords 86–87; Maurice Weekley and George Adamski, “Flying Saucers As Astronomers See Them,” Fate 3, no. 6 (September 1950): 56–59; Colin Bennett, Looking for Orthon, Paraview, 2001, pp. 29–30)

October 23 — 7:15–10:45 p.m. Rev. Gregory Miller has set up his searchlight once again at St. Peter and Paul Church in Norwood, Ohio. Sgt. Berger turns on the light and picks up a large object in the beam. At about 10:00 p.m., the searchlight picks up two distinct groups of five triangular objects that seem to emerge from the main disc. They descend on the beam then turn out of it. The same performance is repeated 30 minutes later. About 50 persons, including newspaper reporters observe the objects. Miller takes several photographs and asks Sgt. Leo Davidson of the Norwood police department to film the display. He uses three rolls, 25 feet each, and a Hugo-Meyer F-19-3” camera with telephoto lens. Davidson also takes 10 still photographs of the large disc-shaped object that flies in
and out of the searchlight beam, using a Speed-Graphic camera with a 14-inch Wallensach telephoto lens. Two of these are exceptional shots, showing both the parent object and the smaller group. These two pictures are last seen by Time-Life correspondent Harry Mayo, who has prepared a feature story for Time, which was to include them. But Mayo’s story and Miller’s photos were not used in Time or Life and, in spite of requests by Miller, these two photos are never returned. (Harry Mayo, “What Glows on Here? Norwood Muses,” Cincinnati Post, April 6, 1950, p. 1; “More Proof That ‘Saucers’ Exist,” CRIFO Orbit 1, no. 5 (August 6, 1954): 1–2; NICAP, “The Ohio Searchlight Incident”; Patrick Gross, “The Norwood Searchlight Incident”)

November 3 — Joseph Kaplan brings the green fireball to the USAF Scientific Advisory Board at the Pentagon. By this time, he is convinced the fireballs are a rare type of meteor. But others are puzzled by the brightness, trajectories, and soundlessness, Kaplan says, “This high selectivity of direction seems to indicate that some group was trying to pinpoint Los Alamos with a new sort of weapon.” (Clark III 544)

November 3 — Karl Taylor Compton resigns as chairman of the Research and Development Board around the same time that Lawrence R. Haftad succeeds Lloyd Berkner as executive secretary. (Michael Hall and Wendy Connors, “The Research and Development Board: Unanswered Questions,” IUR 26, no. 2 (Summer 2001): 9)

November 3 — 11:00 a.m. USAF Capt. William H. Donnelly is driving south about 2 miles north of Rosarito, Baja California, Mexico, with a friend when he sees four objects to the east at a high altitude. All are oval and a metallic white color. They are constantly changing formation, moving up and down, back and forth. The objects continue to fly south rapidly and move in a horizontal line and disappear from sight in 20–40 seconds. (Jan Aldrich)

November 11 — 6:30 p.m. USNR Commander J. R. Bodler is in charge of a merchant vessel (possibly the USS Hemminger) in the Strait of Hormuz between the Persian Gulf and the Gulf of Oman. He observes a huge, pulsating submarine light wheel, some 1,000–1,500 feet in diameter, one mile from his ship. It is revolving around an ill-defined center with streaks of light like searchlight beams moving counterclockwise “like the spokes of a gigantic wheel.” He thinks it is caused by natural phosphorescence, stimulated by some marine life. (J. R. Bodler, “An Unexplained Phenomenon of the Sea,” US Naval Institute Proceedings 72 (January 1952): 66–67; Carl Feindt, waterufo.net)

November 27 — 6:00 p.m. Kirtland AFB Deputy Base Commander Lt. Col. Charles E. Lancaster Jr. is driving near McIntosh, New Mexico, when he sees a green fireball descend near Albuquerque. (Sparks, p. 77)

December — Capt. Bernard Baruch Jr. suggests to Gen. Hoyt Vandenberg that UFOs be added to JANAP 146 as required reporting subjects and that civilian pilots report UFO sightings according to military chains of command. (Swords 122)

December 2–3 — The US government releases radioactive fission products at the Hanford Site plutonium production facility in eastern Washington in an operation called Green Run. The radioisotopes are supposed to be detected by US Air Force reconnaissance. Sources cite 5,500–12,000 curies of iodine-131 are released and an even greater amount of xenon-133. The radiation is distributed over 500,000 acres encompassing three small towns and causes the cessation of intentional radioactive releases at Hanford until 1962, when more experiments commence. There are some indications that many other tests are conducted in the 1940s prior to Green Run, although this is a particularly large test. Evidence suggests that filters to remove the iodine are disabled during the test. (Wikipedia, “Green Run”)

December 4 — 5:00 p.m. Mario Restier is returning home from his father’s place in Volta Redonda, Rio de Janeiro, Brazil, when he notices a disc land about 32–50 feet from the road. He hears a voice telling him not to be afraid and asking if he wants to know what it’s all about. Two beings about 5 feet 5 inches emerge from the UFO wearing togas and helmets. Restier asks them if they believe in God, and they answer, “God is one.” Encouraged, he enters the craft where he is offered a trip, put in a tub filled with liquid, and taken on a trip to a city on another world. He is shown a screen that depicts human nature, ambitions, and violence. After about 6 hours, he is returned to the spot where he was abducted. Returning to his father’s house, he finds it is April 14, 1950, and has lost nearly four months of earth time. (Brazil 23–24)

December 24 — The January 1950 issue of True magazine is published, with Donald Keyhoe’s article, “The Flying Saucers Are Real.” Keyhoe argues that the Air Force knows UFOs are real, alien, and covering up information from the public in order to avoid panic: “For the past 175 years, the planet Earth has been under systematic close-range examination by living, intelligent observers from another planet.” The Air Force finds itself buried in letters, telegrams, and phone calls demanding information about flying saucers. (Donald E. Keyhoe, “The Flying Saucers Are Real,” True, January 1950, pp. 11–13, 83–87)

December 27 — USAF announces that Project Grudge is terminated. Its files are put into storage. The Grudge report is released again, reiterating that UFOs are the “result of (1) misinterpretations of various conventional objects; (2) a mild form of mass hysteria; or (3) hoaxes.” (Clark III 932–933)

1950

1950 — N. Meade Layne publishes The Ether-Ship Mystery and Its Solution, which identifies UFOs as emanating from the etheric world, which coexists with and interpenetrates ours. The etherians must lower their “vibrational” rate in order to enter our realm. UFOs are “thought-constructs” that can take many forms and densities. He considers the etherians benign. (Meade Layne, The Ether-Ship Mystery and Its Solution, Borderland Sciences Research Associates, 1950)

1950 — William Ortiz, a deaf-mute, claims to have the first of three close encounters (the others in 1969 and 1975) with large-eyed aliens in UFOs in Colombia. After the first two events, he finds his hearing temporarily restored. The entities communicate to him using hand signals. (“First Reported CEIII Alien Communicating with Deaf-Mute,” CUFOS Associate Newsletter 3, no. 4 (Aug./Sept. 1982): 1, 3)

January — The Ground Observer Corps, an organization of civilians who watch the skies for enemy airplanes, is created by the US Air Defense Command. (Wikipedia, “Ground Observer Corps”)

January — On the Seattle, Washington, to Anchorage, Alaska, route, an air freighter is paced for five minutes by a UFO. When the pilots try to close in, the craft zooms away at terrific speed. Later, the airline head reports that intelligence officers quizzed the pilots for hours. “From their questions,” he said, “I could tell they had a good idea of what the saucers are. One officer admitted they did, but he wouldn’t say any more.” (Donald E. Keyhoe, The Flying Saucers Are Real, Gold Medal, 1950, p. 10)

January — Keyhoe meets with Gen. Sory Smith, director of public relations for the Air Force; Maj. Jesse E. Stay and Jack T. Shea, press officers; and Maj. Jere Boggs, Pentagon liaison to Project Grudge. Most of the interview involves questions for Boggs. Keyhoe is given two looseleaf notebooks with summaries of “Project Saucer” cases. His request to visit Wright-Patterson AFB in Ohio to look at the actual case files is turned down weeks later. (Donald E. Keyhoe, The Flying Saucers Are Real, Gold Medal, 1950, pp. 147–154)

January 7 — 10:15 p.m. The assistant maintenance officer at Holloman AFB is driving south of Corona, New Mexico, when he sees a green fireball. It descends at a 60° angle, then levels out and travels 10° east before dropping out of sight behind a mountain. When first seen, it is yellowish-white, changes to orange as it descends, then turns bright blue-green as it levels out and disappears. (NICAP, “January 7, 1950, Corona, NM, OSI Case 161”: Clark III 544; Sparks, p. 78)

January 9 — Time magazine reports on rumors of crashed saucers and small humanoid in New Mexico. (“Visitors from Venus,” Time, January 9, 1950)

January 12 — The AF Directorate of Intelligence quietly cancels the special intelligence collection directives to various government agencies for reporting UFO incidents, though routine intelligence channels still require UFO reporting, per AFCIR-CC7, “Reporting of Information on Unconventional Aircraft.” Cancellation is a follow-up to the widely announced closure of “Project Saucer.” AFOIN Director Gen. Charles P. Cabell believes that in fact AMC is taking its UFO project underground by announcing the closure. Months later Cabell discovers that AMC Intelligence under Col. Harold E. Watson is not running a secret UFO investigation, and Cabell is forced to make up for AMC’s negligence by conducting his own UFO investigations via his AF Intelligence staff. (Maj. Gen. C. P. Cabell, “Reporting of Information on Unconventional Aircraft,” January 12, 1950; Swords 498)

January 12 — 11:25 p.m. A B-29 aircraft is flying over the Gulf of Mexico (southwest of Florida) on a course of 260° when three objects are noted on the radar scope orbiting the B-29 from all quadrants. The objects are noticed by the radar operator, aircraft commander, navigator, and bombardier. One object is first sighted on a bearing of 330° traveling south. The objects travel across the scope in approximately 15–20 seconds on the 100-mile range setting. In a few minutes this object is joined by two others, which disappear in a few minutes. At short ranges the object is large and well-defined on the radar scope. The object goes off for about 100 miles, turns and comes in as
January 26 — Lt. Col. Lester F. Mathison, commanding officer of the 625th Aircraft and Warning Squadron at Elmendorf AFB [now Joint Base Elmendorf-Richardson], Anchorage, Alaska, notices three redish objects above the cirrus cloud layer at 25,000–30,000 feet. They are moving to the north in a slightly curled trail fashion and disappear into some clouds. (“Extract: History of the 57th Fighter-Interceptor Wing, January 1–March 31, 1950 (Elmendorf AFB, Alaska),” UFO Historical Review, no. 8 (February 2001): 7–8)

February 1 — Harry S. Truman issues Executive Order 10104 and creates the “Top Secret classification” designation. (US Office of the Federal Register, “Executive Order 10104”)
February 1 — A meteor-like object spewing smoke is seen by many people over Tucson, Arizona. The radio operator at Davis-Monthan AFB asks 1st Lieut. Roy L. Jones Jr., to investigate it in his B-29, but he cannot catch up with it. Edwin Francis Carpenter, head of the University of Arizona astronomy department, says he is certain the object is not a meteor. (Donald E. Keyhoe, The Flying Saucers Are Real, Gold Medal, 1950, pp. 10–12; Sparks, p. 81)

February 2 — Lincoln La Paz, citing the press of academic duties, withdraws from Project Twinkle. (Clark III 544)

February 5 — 5:10 p.m. Four people at Falmouth Airport [now part of Frances Crane Wildlife Management Area north of Hatchville, Massachusetts] see two illuminated cylindrical objects in the western sky. The witnesses include Marvin R. Odom, owner of the airport, and Lt. Philip Foushee Jr., of Otis AFB [now Otis Air National Guard Base] near Mashpee. As the objects are maneuvering, a fireball drops from one. Five minutes later they both climb at high speed and disappear from view. (NICAP, “Feb. 5, 1950; Teaticket, Mass.”; Hyannis (Mass.) Cape Cod Standard Times, February 6, 1950; Sparks, p. 81)

February 8 — AFOSI Letter #85 is issued, directing Air Force personnel to relay UFO sightings to the Pentagon or AMC only if they are of “priority Counterintelligence interest.” (Loren E. Gross, UFOs, a History: Volume 5, January–March 1950, The Author, 1983, p. 18)

February 20 — La Paz writes to Peter H. Wyckoff of the USAF Cambridge Research Laboratories in Massachusetts that a “fireball project” ought not be pursued because any objects that are not meteors are probably US test missiles. But he concedes he might be wrong and says in that case, “intensive, systematic investigation of these objects should not be delayed.” (Clark III 544)

February 21 — Project Twinkle, with the assistance of Land-Air, Inc., has set up its first operations post, manned by two observers who scan the sky over Holloman AFB, New Mexico, with theodolite, telescope, and camera. (Clark III 544; Thomas Tulien, ed., Proceedings of the Sign Historical Group UFO History Workshop, Sign Historical Group, November 2001, p. 45)

February 22 — Navy pilots and others see two glowing UFOs, confirmed by radar, above the Naval Air Station at Key West, Florida. A plane is sent to investigate but it is “hopelessly outdistanced.” After hovering momentarily at a high altitude (50 miles?), they speed away. (Donald E. Keyhoe, The Flying Saucers Are Real, Gold Medal, 1950, p. 12; Sparks, p. 81)

February 24 — 7:30 p.m. USAF Cpl. Lertis E. Stanfield and other Holloman AFB Photographic Branch project staff at an observation post at Datil, New Mexico, take five photos (using a Cineflex camera with 3-inch focal length lens) of a circular, luminous white object that changes to red and green. Its angular velocity is greater than 0.5°/min in azimuth calculated by Lincoln La Paz. The object moves in a smooth straight-line motion from about 8:00–9:30 p.m. to the west, blinking red and green. It disappears at high altitude. (NICAP, “AFOSI Case 175; Datil Observation Post Photographs Object”; Sparks, p. 82)

February 26 — 2:45 p.m. Three witnesses observe a bronze-colored object that looks like two cigarette ashtrays placed face to face over Vancouver, British Columbia. It slows down as it passes overhead and wobbles as it moves along. (Chris Rutkowski, Canada’s UFOs: Declassified, August Night, 2022, p. 64)

March — James J. Rodgers is named a chief of Project Grudge. (Sparks, p. 14)

March — Naval Commander Robert Bright McLaughlin, in charge of a team of Navy scientists at White Sands Proving Ground, New Mexico, writes about the Charles B. Moore sighting of April 24, 1949, in a True magazine article and speculates on saucer propulsion systems. McLaughlin writes that the saucers are indeed “spaceships from another planet, operated by animate, intelligent beings.” The Navy, having gotten a preview of the article, removes him from White Sands and gives him an assignment at sea aboard the destroyer USS Bristol. (Robert B. McLaughlin, “How Scientists Tracked a Flying Saucer,” True, March 1950, pp. 25–27, 96–99; Ruppelt, pp. 70–72; Swords 94–95)

March — According to Karl T. Pflock, two CIA agents clandestinely visit Aztec, New Mexico, UFO crash storyteller Silas Newton and tell him that, although they know he is lying, they want him to continue spreading the tale as disinformation. The two agents later wind up involved in the Psychological Strategy Board created in 1951. (Kremlin 37–42)

March 3 — At Selfridge AFB [now Selfridge Air National Guard Base] near Mount Clemens, Michigan, a lone UFO causes multiple radar trackings and is logged at speeds up to 1,500 mph. (NICAP, “Object Descends Vertically, Levels Out”); Patrick Gross, “Selfridge AFB, Michigan, March 3, 1950”; Sparks, p. 83)

March 8 — Mid-morning. TWA pilot Capt. W. H. Kerr reports to the CAA that he and two other TWA pilots (D. W. Miller and Malvern H. Rabeneck) are watching a UFO hovering at high altitude near Dayton, Ohio. The CAA has already received about 20 other reports about it from Vandalia, Ohio. ATIC control tower operators at Wright-Patterson AFB pick it up visually and on radar (“a good, solid target”). Four F-51 interceptors are sent up. They see it as a huge, round, metallic object, but clouds move in. The object climbs vertically out of sight at high speed.
March 9 — 7:45 p.m. A crew of three radar controllers at Selfridge Air Force Base [now Selfridge Air National Guard Base] near Mount Clemens, Michigan, is busy monitoring the night flying units of the 56th Fighter-Interceptor Group. 1st Lt. Francis E. Parker, 1st Lt. Frank H. Mattson, Sgt. McCarthy, and Cpl. Melton observe an intermittent target on the height range indicator (HRI) scope of the CPS-4 radar at 47,000 feet altitude and higher. Further indications of what Parker describes as a well-defined, clear target like an aircraft are picked up with increasing regularity over the next 45–60 minutes. During this time, the target seems to stay in the area where the F-80s are flying, but 20,000 feet above them. The radar operators are monitoring two different systems—a CPS-5 radar operating on long-wave frequencies at 40,000 feet, and a CPS-4 radar operating on short-wave frequencies—and the target appears on both scopes simultaneously without fade. The speed varies from a hover in low-density air to nearly 1,500 mph, well in excess of the fastest operational jet at the time, and a climb rate of up to 7,000 feet per minute. (NICAP, “The Selfridge AFB Incident”; Sparks, p. 84; Hynek UFO Report, pp. 123–125, 295–297; Clark III 1047–1049; Martin L. Shough, “Radar and the UFO,” UFOs 1947–1987, Fortean Tomes, 1987, pp. 215–217)

March 10 — A publisher and others see a bright disc hover over Orangeburg, South Carolina, for 15 minutes. It speeds away, leaving a trail. (UFOEv, p. 149)

March 13 — Early morning. Army Signal Corps (Reserve) Maj. Taylor in Clarksburg, California, is sleeping when an odd droning noise wakes him up. Going outside, he notices the noise is coming from a brilliant light in the sky, one-half the size of the full moon. It sways for about 15 minutes, then moves away. (Loren E. Gross, UFOs, a History: Volume 5, January–March 1950, The Author, 1983, p. 49)

March 13 — Day. At the Central Airport in Mexico City, Mexico, Santiago Smith (weather observer for Mexicana de Aviación), J. de la Vega of the airport commander’s office, and others see a total of four UFOs passing overhead. Smith observes one of them through a theodolite, describing it as the shape of a “half-moon.” (UFOEv, p. 44; “‘Saucers’ No Illusion: Hundreds See Shy Visitors,” Oakland (Calif.) Tribune, March 14, 1950, p. 9; Loren E. Gross, UFOs, a History: Volume 5, January–March 1950, The Author, 1983, pp. 50–51)

March 15 — An Air Force Captain Hall, flying in Guatemala, hears from other pilots at La Aurora Airport in Guatemala City that large, fast, and highly maneuverable objects have flown directly over the runway. The stories also appear in the local press. When Hall returns to Brookley Air Force Base [now Mobile Aeroplex at Brookley] in Mobile, Alabama, he is interrogated by a USAF intelligence officer and told: “Listen, there is no such thing as a flying saucer. You won’t discuss them.” (Swords 96)

March 16 — The efforts of Kaplan and Maj. Oder to start a fireball research project come to fruition when the AF Geophysical Research Directorate headed by Oder issues a letter directive authorizing Project Twinkle. A $20,000 half-year contract is signed with Land-Air, Inc. which operates the phototheodolites at White Sands, New Mexico. Land-Air is to set up a 24-hour watch at a location in New Mexico to be specified by the Air Force, and the phototheodolite operators at White Sands are to film any unusual objects that happen to fly past. The official contract gives April 1 as the starting date.

March 16 — Just before 12:00 noon. Chief Petty Officer Charles Lewis sees a flying disc streak across the sky at Naval Air Station Dallas [later Grand Prairie Armed Forces Reserve Complex] near Dallas, Texas. It buzzes a high-flying B-36. It hovers under the bomber for a moment, then flies off and disappears. NAS Commander Capt. Milton Adolphus Nation vouches for Lewis and says that the base tower operators had seen a UFO 10 days before. (NICAP, “Disc Buzzes B-36”; “Flying Saucers’ Sighted by Two,” Dallas Morning News, March 18, 1950; Ruppelt, p. 75)

March 18 — 8:40 a.m. Private pilot Robert Fisher, flying a Beechcraft Bonanza over Bradford, Illinois, encounters an oval object with a metallic sheen. He can still see the object when it flies behind some thin clouds. It moves away at an estimated speed of 600–1,000 mph. (UFOEv, p. 38)

March 18 — The USAF publicly denies that UFOs are secret missiles or space-exploration devices. (Donald E. Keyhoe, The Flying Saucers Are Real, Gold Medal, 1950, p. 13)
March 20 — 9:26 p.m. Chicago and Southern Airlines Capt. Jack Adams and First Officer G. W. Anderson Jr., flying a DC-3 at 2,000 feet and heading west from Memphis, Tennessee, to Little Rock, Arkansas, see a circular disc 100 feet in diameter approximately over Hazen, Arkansas. In the top center of the object is an extremely bright light blinking at an estimated 3 flashes per second. The bottom of the object appears to have 9–12 symmetrical oval or circular portholes in a circle approximately 75% of the distance from the center to the outer edge. The object passes directly in front of the airliner at a distance of not more than 2,640 feet and approximately 1,000 feet higher than the airliner. They watch the object for 25–35 seconds. Adams estimates its speed is greater than 1,000 mph. (NICAP, “DC-3 Encounters 100’ Disc”; Little Rock Arkansas Gazette, July 24, 1955; Sparks, p. 85; Swords 95–96; Tom Howell YouTube channel, “UFO from the 1950s,” October 3, 2006)

March 21 — 1:00–1:30 p.m. Sergeant Woods at Sandia Base, New Mexico, reports four round, silvery objects to the northeast. The objects appear to be more maneuverable than any known aircraft. The maneuvers are similar to those in dogfights involving two aircraft, but there seems to be no similarity to a conventional plane. They make right-angle turns and reverse direction instantaneously. The duration is about 30 minutes. Other witnesses at Sandia and Kirtland AFB report similar observations. (NICAP, “Base Personnel Sight Strange Objects”; Sparks, p. 85)

March 22 — 11:00 a.m. Eleven sergeants in the 4925th Test Group watch a UFO northwest of Kirtland AFB, New Mexico. The shape is “similar to a flying wing air craft and tan in color, turning to brown around the edges.” It first travels northwesterly at 25,000–30,000 feet, then turns north and disappears with a tremendous burst of speed. (NICAP, “Atomic Test Group Witnesses UFO in Broad Daylight”; Sparks, p. 85)

March 22 — FBI agent Guy L. Hottel writes to FBI headquarters about a rumor that three UFOs have crashed and are recovered in New Mexico. They are 50 feet in diameter and “each one was occupied by three bodies of human shape but only 3 feet tall, dressed in metallic cloth of a very fine texture. Each body was bandaged in a manner similar to the blackout suits used by speed flyers and test pilots.” It goes on, “According to Mr. [redacted], informant, the saucers were found in New Mexico due to the fact that the Government had a very high-powered radar set-up in that area and it is believed the radar interferes with the controlling [sic] mechanism of the saucers.” The informant is probably Silas M. Newton or Leo GeBauer. On March 25, 2013, the FBI issues a release saying that the Hottel memo was simply a second- or third-hand claim “that we never investigated. Some people believe the memo repeats a hoax that was circulating at that time, but the Bureau’s files have no information to verify that theory.” (Guy Hottel, “Flying Saucers, Information Concerning,” March 22, 1950; Richard H. Hall, Uninvited Guests, Aurora, 1988, pp. 326–327; Good Above, p. 527; Federal Bureau of Investigation, “UFOs and the Guy Hottel Memo,” March 25, 2013; Robert L. Hastings, “The March 22, 1950 FBI Memo on Crashed Flying Saucers,” UFOs & Nukes, April 18, 2011)

March 26 — Vice-Admiral Louis Mountbatten, in a letter to his friend Charles Eade, editor of the London Sunday Dispatch, rejects the idea that flying saucers are secret weapons, admitting that “they do not come from our Earth…. Maybe it is the Shackletons or Scotts of Venus or Mars who are making their first exploration of our Earth.” (UFOFiles2, p. 37)

March 26 — Day. Bertram A. Totten, a clerk at the Library of Congress, is flying his plane at 5,000 feet over Fairfax County, Virginia, when he spots an aluminum-colored disc about 40 feet in diameter and 10 feet thick flying 1,000 feet below him. He dives toward it, but it speeds up into the overcast. It glints when the sun hits it, and he notices a vapor trail. (Loren E. Gross, UFOs, a History: Volume 5, January–March 1950, The Author, 1983, pp. 79–80)

March 26 — 4:00 p.m. Former First Lady Eleanor Roosevelt interviews airline pilots Jack Adams and G. W. Anderson about their March 20 UFO sighting on her NBC television program, Today with Mrs. Roosevelt. (“Anatomy of a Hoax, Part Five,” Saturday Night Uforia)

March 26 — 8:50 p.m. CAA Tower operator Marie H. Matthews and United Airlines employees Robert Higbee and Fred Hinkle see a brilliant light northeast of Hubbard Field [now Reno–Tahoe International Airport] outside Reno, Nevada. It hangs motionless for 5–6 minutes, then moves slowly across the sky with a green light on either side of it. It suddenly zooms upward into a cloud bank. (UFOEv, pp. 44–45)

March 27 — 10:30 a.m. USAF antiaircraft radar operator Cpl. Bolfango tracks a stationary target on radar over the Motobu Peninsula, Okinawa, Japan, at 18 miles range for 10 minutes at 13,000 feet. The object then moves on a 220° heading for 16.9 miles in 2 minutes (about 500 mph) to a point over a mountain, where it is lost. (NICAP, “Tracked Stationary Target at 18 Miles”; Sparks, p. 85)

March 27 — Radio broadcaster Henry J. Taylor, on his syndicated radio program Your Land and Mine, announces the “wonderful news” that saucers are in fact US secret weapons, which will reassure the nation when the US Air Force confirms it. Within days, the story is twisted to specifically credit the Navy’s alleged “top secret” project the Flying Flapjack Vought XF5U. The story is apparently disinformation planted by ex-Hollywood writers in the

March 28 — In response to a request from J. Edgar Hoover to his aide D. Milton (“Mickey”) Ladd on “just what are the facts re ‘flying saucers,’” agent S. Wesley Reynolds interviews Maj. Boggs and Lieut. Col. John V. Hearn Jr. of Air Force Intelligence, who tell him that most UFOs are misidentifications and weather balloons. (Swords 95; Loren E. Gross, UFOs, a History: Volume 5, January–March 1950, The Author, 1983, pp. 84–85)

March 28 — Samuel Eaton Thompson is on his way home to Centralia, Washington, from Markham. He drives through a wooded area between Morton and Mineral and decides to stop to take a break. On foot, he comes upon a large, globe-shaped craft hovering above a clearing. Naked children with dark tans and blond hair are playing on steps that lead from an open door to the side of the UFO. Several naked adults—humanoid, attractive, and also deeply tanned—then appear at the ship’s door. After realizing that Thompson means them no harm, they beckon him closer. The crew consists of 20 adults and 25 children, the latter from about 5–15 years of age. Thompson claims to have spent the next 40 hours with the humanoids. They are from Venus, he learns, and have stopped at Earth despite the fact that other Venusian saucers have been shot at by Earth-based military forces. The Venusians further claims that they are vegetarian and that they never grow ill. Thompson also claims the Venusians are naïve and childlike; they do not know who has built their flying saucers and seem to possess little to no curiosity. He goes back to get a camera and tries to take photos, but the object is too bright to appear on film. Thompson returns home on March 30. (“Centralian Tells Strange Tale of Visiting Venus Space Ship in Eastern Lewis County,” Centralia (Wash.) Daily Chronicle, April 1, 1950; Clark III 1127–1129; Jerome Clark, “The Coming of the Venusians,” Fate 34, no. 1 (January 1981): 49–55; Patrick Gross, URECAT, November 16, 2018)

March 31 — Syndicated columnist Drew Pearson publishes “Worried about Flying Saucers?” in which he sympathizes with the Air Force, which has to reply to groundless public excitement. His USAF contact has told him, “there ain’t no such animal.” Pentagon Public Relations Officer Maj. DeWitt Searles tells the press that all UFO cases are the result of misinterpretations, mass hysteria, and hoaxes: “As far as the Air Force goes, there’s no such thing as a flying saucer.” (Drew Pearson, “Worried about Flying Saucers?” Honolulu Star-Bulletin, March 31, 1950, p. 5; “Major Debunker of Flying Saucers, Keeps Saying, ‘No, No, 1,000 Times No,’” Rock Island (Ill.) Argus, March 31, 1950, p. 18; Swords 96–99)

Spring — Commander Augusto Vars Ortega of the Chilean Navy takes about 1,200 feet of color film of UFOs—one above the other, turning at tremendous speeds—in Antarctica. When NICAP asks the Chilean Embassy about the film in 1956, it tells Keyhoe that the film is classified and not available. (Dan Lloyd, “Things Are Hotting Up in the Antarctic,” Flying Saucer Review 2, no. 5 (Sept./Oct. 1965): 5)

April — Daytime. While working on her lawn in Canby, Oregon, Ellen Jonerson glances over at her neighbor’s yard and sees a 12-inch-tall man with his back turned to her. When he turns around, she sees that he has a heavily tanned face, is of stocky build, and wears overalls and a plaid shirt. There is a skullcap on his head. She dashes inside to call a friend, then runs outside again in time to see the figure “waddling” away. He walks under a parked car and disappears. Kenneth Arnold, who interviews her, is convinced of her sincerity. (Center for UFO Studies, HUMCAT Index, 1950–1951, p. 2; Clark III 270)

April 1 — Project Twinkle officially begins.

April 4 — Presidential press secretary Charlie Ross states that Truman has conferred with his two top military advisers, Rear Adm. Robert Dennison and Brig. Gen. Robert B. Landry, and that they claim the US has no such technology. Furthermore, the Air Force study has concluded there are no such things as flying saucers. Caltech aeronautics professor Clark Blanchard Milikan agrees, saying: “If anyone should know about such a project, I should know—and I know of no development in the aircraft or guided missile field.” (Swords 97–99)

April 5 — Sen. Richard Russell Jr. (D-Ga.) states to the press that he is “completely baffled” by flying saucer reports that are made by many pilots who would not be fooled by hallucinations or clouds. Sen. Millard Tydings (D-Md.), chair of the Armed Services Committee, says he thinks saucers might be experimental US aircraft “in embryo stage.” Rep. Albert J. Engel (R-Mich.) thinks the same. Sen. Kenneth S. Wherry (R-Neb.) says the saucers are “like our foreign policy. It is in a state of confusion and no one seems to know what it is all about.” (“Congress Split about Saucers,” Miami (Fla.) News, April 5, 1950, pp. 1, 6; Loren E. Gross, UFOs, a History: Volume 6, April–July 1950, The Author, 1990, pp. 9–10; Swords 98)

April 6 — 4:45 p.m. Lt. John J. Sevilla, a pilot with the 131st Fighter Squadron, hears a sound like a flight of jet airplanes and rushes out of his house in Springfield, Massachusetts, to see them. Instead, he sees a perfectly circular object moving slowly westward at an altitude of 25,000 feet. He watches it for 5 minutes as it moves at a speed of 50–
April 7 — A CAA control tower operator at Logan Airport in Boston, Massachusetts, watches a blue light split into two lights that revolve around each other for 10 minutes. *Hynek UFO Report, pp. 65–68; Sparks*, p. 86

April 7 — Newsmen **Edward R. Murrow** produces the first extended TV commentary on UFOs, “The Case of the Flying Saucer” on CBS. He begins with the **Kenneth Arnold** case, mentions Muroc AFB cases and **Mantell**, and quotes both **True** magazine and **Donald Menzel**. Also on the show are **Henry J. Taylor**, engineer **Charles H. Zimmerman**, and **Charlie Ross**, as well as people on the street. (“Transcript of Ed Murrow—Kenneth Arnold Telephone Conversation,” CUFOS Associate Newsletter 5, no. 1 (Feb./March 1984): 3; Edward R. Murrow, “The Case of the Flying Saucer [audio only],” Bryce Zabel YouTube channel, February 24, 2018)

April 7 — The National Security Council presents President **Truman** with Report 68 (NSC-68), a 56-page top secret policy paper that provides the “blueprint for the militarization of the Cold War.” It advocates a large expansion in the military budget, the development of a hydrogen bomb, and increased military aid to US allies for the containment of Communist expansion. It essentially warns Truman that the US is losing the Cold War. Truman does not approve it until 1951. (Wikipedia, “NSC-68”)

April 8 — **Paul Limerick**, commander of the Veterans of Foreign Wars in Shelby, North Carolina, watches a round, aluminum-colored object with four other people for 2 minutes. It follows a horizontal course toward the southwest without making a sound, then shoots straight up and disappears. (Loren E. Gross, *UFOs, a History: Volume 6, April–July 1950*, The Author, 1990, p. 13)

April 10 — 7:00 p.m. Several University of California, Berkeley, graduate students, including **Garniss H. Curtis**, **Robert Scott Creely**, and **Louis I. Briggs**, watch a bright light moving against the wind at about 10–15 mph at 1,500 feet altitude about 3–4 miles away from Berkeley, California, for two hours. It turns slowly to the south then turns around and heads slowly back. Four high school students in Monterey, California, see a gleaming object over San Francisco in the early afternoon. (NICAP case file; “Saucer Visits San Francisco, Schoolboys Say,” *Los Angeles Times*, April 12, 1950, p. 17)

April 14 — RAND Corporation writer Jean M. Hungerford writes a 32-page research memorandum for the US Air Force titled “The Exploitation of Superstitions for Purposes of Psychological Warfare.” She uses recent examples of religious miracles that were used in Western propaganda, as well as horoscopes, chain letters, and folklore. (Jean M. Hungerford, “The Exploitation of Superstitions for Purposes of Psychological Warfare,” USAF Project Rand Research Memorandum, RM-35, April 14, 1950)

April 17 — *Newsweek* publishes an article, “Flying Saucers Again,” on crashed saucers. (“Flying Saucers Again,” *Newsweek*, April 17, 1950, p. 29)

April 17 — More than 15 people report seeing a UFO for 20 minutes at 2,000 feet on the eastern horizon at Los Alamos, New Mexico. One scientist watches the object through a telescope and says it looks flat, circular, metallic, and roughly 9 feet in diameter. It moves faster than any conventional aircraft. (Loren E. Gross, *UFOs, a History: Volume 6, April–July 1950*, The Author, 1990, p. 26; *Sparks*, p. 86)

April 24 — 10:00 p.m. Bruno Facchini steps outside his house on the outskirts of Abbiate Guazzone, Varese, Italy, and notices something flashing near a power line. He goes to investigate and encounters a landed disc with an open door and steps leading down. Three or four men in diving suits and helmets are inside. One seems to be welding a pipe. Facchini speaks to them, but they are so insistent that he is not responded. One points a small “camera” at him that emits a beam that knocks him over. Facchini lies still while the repairs are completed, and the UFO takes off. (Pino Carminati Ghidelli, “*Un Diaco è Atterrato*,” *Notiziario UFO*, no. 37 (Jan./Feb. 1971): 19–22; Antonio Giudici, “The Case of Bruno Facchini,” *Flying Saucer Review* 20, no. 6 (April 1975): 30–32; Ezio Barnardini, “Facchini: Un CE3 Rivisitato,” *Notiziario UFO*, no. 104 (March 1985/Jan. 1986): 4–7; Clark III 267; Marcus Lowth, “Bruno Facchini’s Extraterrestrial Encounter in Varese, Italy,” UFO Insight, September 5, 2020; 1Pinotti 30–40; **Patrick Gross**, “Abbie Guazzone, Italy, April 24, 1950”)

April 25 — Early morning. Military security patrols at the deactivated Dugway Proving Ground in western Utah view a series of unusual lights and objects moving above an ammunition storage area. One object is “surrounded by an aura of spears of light jutting diagonally from the main body.” (Loren E. Gross, *UFOs, a History: Volume 6, April–July 1950*, The Author, 1990, p. 34)

April 25 — 3:00 p.m. Enrique Hausmann Muller takes a film of a bright, circular UFO with rays of flame spinning off its edge in a pinwheel fashion in Montuiri, Majorca, Balearic Islands, Spain. Probable hoax. (UFOEv, p. 88; Loren E.
April 27 — While preparing for an MX-776A Shrike air-to-ground missile test at White Sands Proving Ground, New Mexico, Charles Riggs, a member of the Project Twinkle cinephotodolite camera crew supplied by Land-Air Inc., sees, tracks, and manages to film four high-flying objects streaking across the sky. Another station also tracks the objects. The photos show only a smudgy dark object, but the triangulation results in a calculation by mathematician Wilbur L. Mitchell and Capt. Perry Bryant of the objects’ size as 30 feet in diameter and 150,000 feet in altitude. (NICAP, “Cinephotodolite Film Taken by Tracking Station”; Ruppelt, p. 88; Clark III 544–545; Sparks, p. 88; Thomas Tulien, ed., Proceedings of the Sign Historical Group UFO History Workshop, Sign Historical Group, November 2001, p. 44; Good Above, pp. 354–355; Bruce Maccabee, “The White Sands Films,” IUR 21, no. 1 (Spring 1996): 22–25)

April 27 — 8:25 p.m. TWA Flight 117 pilot Capt. Robert Adickes and Flight Officer Robert F. Manning are flying near Goshen, Indiana, when they see a bright-red disc-shaped UFO behind their DC-3. It overtakes the plane in about 2 minutes. Stewardess Gloria Henshaw and 11 passengers (including Boeing engineers C. H. Jenkins and Dean C. Bourland and executives E. J. Fitzgerald and S. N. Miller) also see the object. It veers off at 400 mph, drops down to 1,500 feet, and disappears. (NICAP, “Adickes TWA DC-3 Case”; Sparks, p. 89; Donald E. Keyhoe, “Flight 117 and the Flying Saucer,” True, August 1950, pp. 24–25, 75–79; James E. McDonald, “Statement on Unidentified Flying Objects,” in Symposium on Unidentified Flying Objects, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 46–47)

May 5 — 11:30 p.m. Capt. Marcellus D. O’Sullivan, 1Lt. William J. Reisinger, and three enlisted men of the 625th Aircraft and Warning Squadron at Elmendorf AFB [now Joint Base Elmendorf-Richardson], Anchorage, Alaska, see a reddish-orange object hovering in the sky for 5 minutes. It puts on a burst of speed and disappears over the horizon. (“From History: 57th FighterInterceptor Wing (Alaska), January–June 1950,” UFO Historical Revue, no. 5 (July 1999): 8)

May 11 — 7:30 p.m. Evelyn Trent, who lives on a farm nine miles from McMinnville, Oregon [near Sheridan, Oregon], is walking back to her farmhouse after feeding rabbits. Before reaching the house, she sees a slow-moving, metallic disk-shaped object heading in her direction from the northeast. She yells for her husband Paul, who is inside the house; he comes out and also sees the object. After a short time, he goes back inside to get a camera and manages to take two photos of the object before it speeds away to the west. Paul Trent’s father briefly sees the object before it flies away. The Trents assume they have seen some exotic military aircraft. They do not develop the film in the camera until they use it up and show the photos only to a few friends. Eventually it reaches the cover of Life magazine, but the Trents show no desire to make any money from the photos. Although the Colorado project initially thinks the photos seem genuine, three Interface Pilot for l’Analyse de Chichés d’OVNIs researchers in 2013–2015 claim to find evidence of a model suspended from a string. Researcher Brad Sparks finds major mathematical and scientific errors in IPACO’s work, which actually supports a UFO conclusion. (Wikipedia, “McMinnville UFO Photographs”; “Farmer Trent’s Flying Saucer,” Life, June 26, 1950, p. 29; NICAP, “Trent / McMinnville Photos”; Story, pp. 223–226; Sparks, p. 90; Hynek UFO Report, pp. 244–245; Condon, pp. 396–407; Bruce S. Maccabee, “On the Possibility that the McMinnville Photos Show a Distant Unidentified Object (UO),” Proceedings of the 1976 CUFOS Conference, Center for UFO Studies, 1976, pp. 152–163; Bruce S. Maccabee, “The McMinnville Photos,” The Spectrum of UFO Research, CUFOS, 1988, pp. 13–57; Bruce S. Maccabee, “The Trent Farm Photos,” April 2000; Bruce S. Maccabee, “The Trent Farm Photos Appendix,” April 2000; Bruce S. Maccabee, “The McMinnville Photos,” May 2000; Michael D. Swords, “Can We Learn Anything from UFO Photos? Part Five,” The Big Study, July 15, 2012; Antoine Cousyn, François Louange, and Geoff Quick, “The McMinnville Pictures,” Interface Pilot for l’Analyse de Chichés d’OVNIs, May 2014; Clark III 702–704)

May 15 — Afternoon. Architect Enrique Carotenuto Bossa is driving in an isolated region in Bahía Blanca Partido (possibly between Macachín and Estación Hidalgo Ferrocarril Sarmiento), La Pampa, Argentina, when he sees a metallic disc resting on the ground to the left of the highway. He stops the car to investigate, approaches it, and sees an open door in its side. He goes inside and sees a “curved divan with three seats, two of which were occupied by small beings covered from head to foot (except for an opening for the face (in a kind of tight-fitting overall of a brown color).” The bodies are about 4 feet tall, and their faces seem charred or burnt. In front of them is a screen with “rays playing on it,” and on top of the screen is a rotating globe. The engineer runs out and drives back to his hotel. He returns the next day with two companions and finds only an ash heap. But they look up and see three UFOs—one a cigar-shaped object and two discs, hovering above them at 1,800 feet. The discs merge

May 20 — 12:15 p.m. Meteorologist Seymour L. Hess is strolling the grounds of Lowell Observatory in Flagstaff, Arizona, when he notices a round, gray-colored object approaching from the southeast at about 12,000 feet altitude. He follows it with a 4x spyglass as it passes in front of a small cumulus cloud. Hess estimates it is about 4 feet in diameter and moving about 100 mph. (UFOEv, p. 3; Condon, pp. 245–248; James E. McDonald, “Statement on Unidentified Flying Objects,” in Symposium on Unidentified Flying Objects, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 61–62)

May 21 — A second Gallup poll on UFOs is released, showing that 5% of respondents think “these flying saucers” are “comets, shooting stars, something from another planet.” (Loren E. Gross, UFOs, a History: Volume 6, April–July 1950, The Author, 1990, pp. 48-49; Robert J. Durant, “Evolution of Public Opinion on UFOs,” IUR 18, no. 6 (Nov./Dec. 1993): 10–11)

May 21 — 3:50 p.m. T/Sgt Edward Eles, Earl DuQuoin, and four other airmen of the 187th Fighter Squadron of the Wyoming National Guard are on the airfield at the Municipal Airport in Cheyenne, Wyoming, when they see a V-shaped formation of four round, pure-white discs flying in a northerly direction. In a matter of seconds, the objects change formation and make a sharp right-angle turn, flying single file, and speed out of sight. (Cheyenne Wyoming State Tribune, May 22, 1950, p. 1)

May 24 — During an MX-674 Tarzon controllable vertical bomb test at Holloman AFB, New Mexico, Floyd Fannon and other USAF crew members see eight unidentified objects. They separately track and film two of the objects down the North American Aviation missile firing range. Project Twinkle cinetheodolite station P-8 films one object to the northeast for 6 frames (1.0 sec) moving uniformly to the south. Cinetheodolite station P-10, located 5.7 miles down range to the north from P-8 and 7 feet higher, films another object, hence no triangulation is possible. (NICAP, “Cinetheodolite Film Taken by Tracking Station”; Sparks, p. 91; Good Above, pp. 354–355; Bruce Maccabee, “The White Sands Films,” IUR 21, no. 1 (Spring 1996): 22–25)

May 25 — Lt. Col. Doyle Rees of the USAF Office of Special Investigations writes a confidential memo to Brig. Gen. Joseph F. Carroll, Director of Special Investigations. In part, it states: “In a liaison meeting with other military and government intelligence and investigative agencies in December 1948, it was determined that the frequency of unexplained aerial phenomena in the New Mexico area was such that an organized plan of reporting these observations should be undertaken. The organization and physical location of units of this District were most suitable for collecting these data, therefore, since December 1948, this District has assumed the responsibility for collecting and reporting basic information with respect to aerial phenomena in this general area.” (NICAP, “Summary of Observations of Aerial Phenomena, New Mexico Area, Dec 1949 to May 1950”)

May 29 — 9:20 p.m. Capt. Willis T. Sperry, copilot Bill Gates, flight engineer Robert Arnholt, a stewardess, and several passengers on an American Airlines DC-6 airliner headed southwest out of Washington, D.C., en route to Nashville, Tennessee, are flying at 7,500 feet at 250 mph. About 7 miles west of Mount Vernon, Virginia, Gates alerts Sperry to a bright blue or bluish light ahead of them and increasing in size. Sperry makes an evasive 45° turn to the right and the object passes from 11 o’clock to 7 o’clock position to the left at a slightly higher altitude. The light very briefly passes between the aircraft and the upper part of the moon, revealing an object with a long silhouette (somewhat reminiscent of a submarine) without visible wings or empennage. The blue light is on the front of the object. Sperry turns left back onto his original course to get the object back in view, but it apparently stays stationary for about 30 seconds. Gates then notices the object circling around to the right side. Sperry banks right again, while the object Paces the airliner about 20–30 seconds before it climbs to the east at a 30° angle at “fantastic” speed and disappears. (Wikipedia, “Sperry UFO Case”; NICAP, “Capt. Willis Sperry Sighting”; Loren E. Gross, UFOs, a History: Volume 6, April–July 1950, The Author, 1990, pp. 52–53; Project 1947, “UFO Reports 1950”; Sparks, p. 91)

May 29 — A shiny, bright object streaking across the sky is spotted by two cine-theodolite stations at White Sands Missile Range, New Mexico, just before firing a test missile. The object is tracked and photographed by both stations. After the films are developed, it turns out that the stations had photographed different objects. Analysts estimate that the objects were higher than 40,000 feet, traveling more than 2,000 mph, and over 300 feet in diameter. (Ruppelt, p. 89; Loren E. Gross, UFOs, a History: Volume 6, April–July 1950, The Author, 1990, p. 36)

Summer — Physicist Enrico Fermi first formulates the “Fermi Paradox” during a casual conversation (in Los Alamos, New Mexico?) with fellow physicists Edward Teller, Herbert York, and Emil Konopinski. While walking to
lunch, the men discuss recent UFO reports and the possibility of faster-than-light travel. The conversation moves on to other topics, until during lunch Fermi allegedly says suddenly, “But where is everybody?” (although the exact quote is uncertain). (Wikipedia, “Enrico Fermi”)

Summer — Evening. An 8- or 10-foot-disc lands in a field behind Mrs. Mason Vaughan’s house in Beaverdam, Virginia. From an open cockpit a “man with unusual goggles or headpiece” looks out. Surprised, the disc takes off abruptly, breaking off a limb from an oak tree on the way up. (Clark III 267; Center for UFO Studies, HUMCAT Index 1950–1951, p. 20)

June 1 — A pilot on patrol from RAF Tangmere in West Sussex, England, sights a “bright circular metallic object” that speeds past his Gloster Meteor jet fighter at 20,000 feet. As he undergoes a debriefing by squadron intelligence, he finds out that four RAF controllers at the radar station at RAF Wartling near Eastbourne have, at the same time, tracked an “unusual response” that vanishes from their screens, moving at terrific speed. (David Clarke, “Flying Saucer Working Party,” Dr. David Clarke Folklore and Journalism, January 3, 2015)

June 8 — Gen. Earle E. Partridge of the Fifth Air Force, responsible for the Korean Theatre, writes to Commanding Gen. George E. Stratemeyer, asking for an analysis of certain UFO cases. (Swords 100–101)

June 12 — Eastern Airlines executive Eddie Rickenbacker tells the press that if flying saucers “do exist, you can rest assured that they are ours.” (Swords 100)

June 12 — 4:00 p.m. Working in a quarry somewhere in California, geologist John Zimmerman and civil engineer Charles Fisher are watching a jet aircraft speeding through the sky and leaving a vapor trail. Suddenly Zimmerman notices that the vapor trail has been cut. Looking more closely, he notices a metallic disc making vertical loops around the jet. Two other discs come into view and perform the same aerobatics. (Wells Alan Webb, Mars, the New Frontier, Fearon, 1956, p. 124; UFOEv, p. 50)

June 17 — Oskar Linke and his 11-year-old daughter Gabriele are walking toward Haselbach, Thuringia, East Germany, in the twilight when she notices something about 420 feet away. It appears to be two men dressed in shiny metallic clothing who are stooped over and looking at something on the ground. Linke approaches to 30 feet away, looks over a small fence, and sees a large object about 40 feet in diameter that looks like a huge frying pan. It has two rows of holes in its periphery and a black conical tower about 9 feet high. The two men suddenly jump inside. The inside lights up, the object starts humming and rises slowly from the ground, rotating like a top. It rises from the ground with the aid of a central cylinder and is surrounded by flames, then takes off in the direction of Stockheim. Later he finds a circular depression in the ground at the spot. Linke resettles in West Berlin in 1951. He tells his story to a notary there on July 1, 1952, which is how it turns up in the Western press. (NICAP, “CE III by Two Witnesses / Oskar Linke Case”; Central Intelligence Agency, “‘Flying Saucers’ in East Germany,” July 9, 1952; Andreas Müller, “Das Haselbach-UFO von 1950: Die Augenzeugin spricht,” grenzWissenschaft-aktuell.de, January 26, 2016; Sparks, p. 92; Good Above, pp. 513–514)

June 21 — 1:35 a.m. Control tower operators Cpl. Roger G. Pryor and S/Sgt. Ellis R. Lorimer and airways communications staffer S/Sgt. Virgil Cappuro watch a flying disc speeding at 1,000–1,500 mph over Hamilton AFB [now closed] in Novato, California. The object shoots blue flame and makes a roar like thunder as it makes five passes over the base. They observe it through binoculars for 25 minutes. (NICAP, “Disc Makes Five Passes at Control Tower”; Sparks, p. 92)

June 24 — A cigar-shaped UFO paces a United Airlines plane (Capt. E. L. Remlin, First Officer David Stewart, and observer Capt. Samuel B. Wiper) for 20 minutes near Daggett, California. The object is also seen by the crew of another airliner and a navy transport plane. The Navy pilot sees for 3 minutes a dark gray object with heat radiation at the tail end. He estimates altitude at 50,000–100,000 feet and a speed of 1,000–1,500 mph. The crews discuss the matter with two CAA ground stations. (NICAP, “Three Aircraft Crews Observe UFO”; UfoEv, p. 31; Sparks, p. 93)

June 25 — North Korea invades South Korea, beginning the Korean War. (Wikipedia, “Korean War”)

June 27 — 4:15 p.m. Al Hixenbaugh, a photographer for the Louisville Times, is at the corner of Longest and Everett avenues in Louisville, Kentucky, when he hears the sound of a DC-3 airplane overhead. He looks up and sees the plane as well as a large disc with a slight corona around it. He shoots 50 feet of film with his 16mm movie camera as the object remains motionless for 10 seconds before it starts getting smaller and disappears to the west. (Louisville (Ky.) Times, June 28, 1950, p. 1; “How to Film UFO’s,” Saucers 6, no. 3 (August 1958): 3; Sparks, p. 93)

June 30 — Midnight. Rev. Ross Vermillion, a former bomber pilot, and his wife are driving 9 miles west of Kingman, Kansas, when they see a bright red light hovering over US Hwy 54 near Cunningham, Kansas. They estimate it to be about 250 feet in diameter with a small canopy on top. The family of druggist Dwayne Mulnix of Meade,
Kansas, also sees the object and they stop and watch it for about 20 minutes along the highway. They begin to drive closer, but it speedes away. As seen in the bright moonlight, the object looks made of bright metal and has an elliptical body “as big as the cross-section of a B-29” with a rotor turning counterclockwise around its body. (NICAP, “WWII Pilot Tells of Seeing Flying Saucer”; Loren E. Gross, *UFOs, a History: Volume 6, April–July 1950*, The Author, 1990, pp. 66–69)

June 30 — 11:15 p.m. Two navy men (Petty Officer Carter and Able Seaman Connelly) at Royal Canadian Naval Air Station Shearwater, Dartmouth, Nova Scotia, are pulling duty on radar watch from dusk until dawn. They report four separate radar contacts bearing 160° at 5 miles over 90 minutes. Visual confirmation of two glowing objects is made by a chief petty officer in North Dartmouth. (NICAP, “Navy Men Report Radar Contact”)

July — USAF Director of Intelligence Maj. Gen. Charles P. Cabell orders secret UFO field investigations to be conducted by his staff Technical Capabilities Branch in the Evaluation Division under Maj. Milton D. Willis. These begin this month and last until October 1951 when Cabell is replaced by Gen. John A. Samford. (Clark III 936)

July — Armed Forces Special Weapons Project concludes a top secret study, named Project Nutmeg, to search for an atomic weapons site in the continental US. AFSWP concludes that a site on the Air Force’s Las Vegas Bombing and Gunnery Range in Nevada is the right place. President Truman approves the location, known as Frenchman Flat. (Wikipedia, “Sandra Base”; “Project Nutmeg: The Birth of the Nevada Test Site,” National Nuclear Security Administration, June 2004)

July — Mid-day. Electronics engineer Cliff Booth is having lunch in his office at a private contractor’s building at Holloman AFB, New Mexico, when he gets a call that a UFO has been reported by one of the range stations. Booth and an Askania cinetheodolite operator are asked to drive to another range station with a manually operated Askania and look for the object. Through the finders on the theodolite the object presents a side view to the observers and appears to be cigar-shaped and metallic, with a straw-colored iridescent radiance or luster. It also has fins one-third of the way back from the front of the fuselage and a row of at least three oblong ports extending to the rear of the object and located above the center line of the fuselage. The ports are a dark smoky gray but not luminescent. The object hovers in an almost horizontal position, elevation 20°–25°, azimuth northeast. Shortly after the men focus the instrument on the object to take a film, it begins maneuvering. Turning toward the camera, the object moves in, and the men can see the front — a round shape with the fins extending out from the sides. It then drops abruptly, as though beginning to fall, but stops. It moves toward the camera, turns sideways, then drops as before, but this time it exposes the side view again. The operator leaves to report the coordinates to headquarters, and when he returns the object is gone. The men turn over their exposed film to the Data Reduction Division for development and analysis. A week or so later they are called in and questioned by a young first lieutenant unknown to them who asks them over and over again if they have taken pictures and to describe the object they had seen. Then they are asked if they can identify the film of the object they photographed. One of the men becomes angry about the questioning, telling the officer he had seen what he reported, had photographed the object, and is convinced it is some sort of a vehicle from outer space. He is shown a film of 14 frames on a Recordak projector. The black-and-white presentation shows a blurred ellipsoid with a dark center, but no details. (Puzzled about the film, he later talks to a mathematician-analyst employed by Land-Air, Inc.; she conjectured the object had been oscillating in the air, preventing a stable image.) The men are then told by their superiors to forget the whole thing. (Lorenzen, *FS Hoax*, pp. 27–29; Project 1947, “APRO Files: Coral E. Lorenzen, Holloman Air Force Base UFO Sighting, July, 1950”)

July — 1:45 p.m. A Civil Aviation Authority flight engineer observes a “wingless, fuselage-shaped” object maneuvering over Cincinnati, Ohio. The object climbs at a steep angle to 16,000–18,000 feet, hesitates, dives, and speeds away to the west. (UFOEv, p. 45)

July 2 — Dusk. While picnicking on the shore of Sawbill Bay on Marmion Lake, western Ontario, an anonymous employee of the Steep Rock Iron Mine claims to have seen a UFO resting on the water’s surface. A hatch opens and 10 figures, 3–4 feet tall, emerge, wearing shiny, metallic clothing. They seem to be drawing in lake water with a hose. The object soon rises and hovers, then swiftly takes off. The story appears in the mine’s house newsletter, then gets picked up by some Canadian newspapers and *Fate* magazine in its February/March 1952 issue. However, Robert Badgley, a Scarborough, Ontario, member of APRO, finds in 1974 that Steep Rock employee Gordon Edwards had written the fictitious tale to entertain readers of the newsletter and to satirize saucer stories. (“Steep Rock Flying Saucer,” *Fate* 5, no. 2 (February–March 1952): 68–72; “1950 Steep Rock Lake, Ontario Case Possible Hoax,” *APRO Bulletin* 26, no. 5 (November 1977): 5; John Robert Columbo, *UFOs
July 4 — Evening. Aerojet engineer Daniel Fry is alone during the holiday at White Sands Proving Ground, New Mexico, when a flying saucer appears and hovers just above the ground. Fry approaches and strokes its surface when a voice booms, “Better not touch the hull, pal, it’s still hot.” After some conversation with the disembodied extraterrestrial named Alan, he is invited on board the craft, which flies him to New York and back in 30 minutes. Fry has further encounters and becomes a celebrity on the contactee circuit. He finally meets Alan in person in 1961. (Daniel Fry, *The White Sands Incident*, New Age, 1954; Clark III 518–520)

July 6 — A memo by Lt. Col. F. D. McGarrachy, USAF chief of General Investigations Division, expresses strong interest to acquire motion pictures of UFOs taken by civilians, perhaps in cooperation with the FBI, but not in a way to arouse public suspicion of USAF interest. (*Hynek UFO Report, pp. 54–56*).

July 7 — Gen. Cabell, through his aide Col. Barber, sends a notice to AMC Intelligence Chief Col. Harold E. Watson, that despite the official closing of Project Grudge, the Air Force still desires to receive UFO reports and take them seriously. Project Grudge begins to be reactivated as Project 10073. (*Sparks*, p. 12; *Swords* 101–102, 498–499).

July 19 — A memo by Col. Bruno W. Feiling, chief of the USAF Technical Analysis Division, on “Investigation of Flying Saucer Reports” says that UFO investigation takes up too much time. (*Hynek UFO Report, p. 57*).

August — A CIA memo sent to FBI headquarters, “Summary of Aerial Phenomena in New Mexico,” discusses the green fireballs and notes that OSI is concerned with the phenomena seen over sensitive installations. It reiterates that Lincoln LaPaz does not think they are meteors. (*ClearIntent, pp. 167–168*).

August — 2:00 p.m. Hugh O’Neill views a cigar-shaped object hovering silently about 2–5 miles off the Big Sur coast at Anderson Creek, California, at an elevation of 500–1,000 feet. It moves swiftly away to the south, then returns less than 2 minutes later and slowly circles above the ocean twice for 90 seconds, disappearing again to the south. (Henry Miller, *Big Sur and the Oranges of Hieronymus Bosch*, New Directions, 1957, p. 75; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs a History: 1950 August–December*, Supplemental Notes, The Author, 2000, p. 3).

August 4 — A memo from Army Maj. Ulysses Grant Carlan states that UFOs since July 30 have been seen at the Hanford Site in Washington State. They are above 15,000 feet. Jets attempting interception fail. The AEC says that the investigation is continuing. (Maj. U. G. Carlan, “Flying Discs,” *August 4, 1950; Good Above, pp. 267, 485; Nukes 46; Loren E. Gross, *UFOs, a History: Volume 6: April–July 1950*, The Author, 1990, p. 71).

August 4 — The crew (Master Nils Lewring, Chief Mate Jacob Koelwyn) of the *MV Marcalia* in the North Atlantic between Nova Scotia and the US Eastern seaboard watch an aluminum-colored cylinder-shaped UFO, apparently 10 feet in diameter, 50–100 feet above the surface. It initially moves 25 mph, makes no noise, wobbles slightly, disappears over the horizon, then reappears. The ship’s captain watches the object through binoculars for 90 seconds. One of the other witnesses describes the sighting as “one of the most frightening experiences I have ever had.” (NICAP, “Object 100’ above Sea Observed by Ship MV Marcalia”; *ClearIntent, pp. 115–116*; *Good Above, pp. 340–341*).

August 12 — 1:30 p.m. Mr. and Mrs. Bud Oliver are at the state forestry lookout tower on Round Top Mountain north of Medford, Oregon, when they see two UFOs, one disc-shaped, the other oblong. They are about 100 feet apart, and the oblong one is tumbling in the air end over end. (“Lookouts Report Seeing ‘Saucers’ North of Medford,” *Medford (Oreg.) Mail-Tribune*, August 17, 1950, p. 9).

August 14 — 11:27 a.m. Flight Lt. Stan J. Hubbard and two other officers at Farnborough Airfield, Hampshire, England, hear a humming noise. Hubbard looks up and sees a flat gray disc, about 100 feet in diameter, at an altitude of
700–1,000 feet. He watches it for 30 seconds as it flies at a speed of 800–1,000 mph and makes a series of S-turns, oscillating as it moves. The other two officers see nothing. (David Clarke, “Flying Saucer Working Party,” Dr. David Clarke Folklore and Journalism, January 3, 2015; Good Need, pp. 149–151; David Clarke and Andy Roberts, Out of the Shadows, Piatkus, 2002, pp. 87–93; UFOFiles2, pp. 40–42)

August 15 — 11:30 a.m. Nicholas Mariana and his secretary Virginia Raunig are inspecting the Great Falls, Montana, baseball stadium in preparation for a game. He walks up to the grandstand and notices two fast-moving bright lights “like two new dimes in the sky.” He rushes to his car, parked 60 feet away, and gets his 16mm movie camera from the glove compartment. He films the objects passing behind a water tower, which provides a frame of reference for measuring distance, size, altitude, azimuth, and speed. In October he takes it to an Air Force officer for analysis. USAF notes that two jet interceptors were in the area and might be the objects on the film, but Mariana and Raunig had seen those too. Controversy soon arises when Mariana claims that the first 35 frames of his film—which he says most clearly show the UFOs as rotating disks—are missing. People in the Great Falls area who view Mariana’s film support him. They claim that the missing frames clearly show the UFOs as spinning, metallic disks with a “notch or band” along their outer edges. USAF personnel deny this accusation and insist that they have removed only a single frame of film that was damaged in the analysis. In 1952, Blue Book reviews the film; so does Robert M. L. Baker Jr. in 1954, and the Colorado project in 1967. All studies of the film agree that it was not faked and that the objects appear to be disc-shaped. (Wikipedia, “Mariana UFO incident”; NICAP, “Nick Mariana / Montana UFO Color Film”; “Nick Mariana UFO Footage 1950 Great Falls Montana,” parkerdonaldmusic YouTube channel, September 29, 2012; “Air Force Takes over Films of Flying Disks,” Spokane (Wash.) Chronicle, October, 1950, p. 8; “Colored Films on Saucers to Be Shown,” Twin Falls (Idaho) Times-News, October 19, 1950, p. 17; Clark III 767–769; UFOs Yes, 81–108; Condon, pp. 407–415; Margaret Sachs, The UFO Encyclopedia, Putnam, 1980, pp. 127–128; Barry Greenwood, “On the Question of Tampering with the 1950 Great Falls UFO Film,” UFO Historical Revue, no. 7 (September 2000): 1–8; Michael D. Swords, GrassRoots UFOs: Case Reports from the Timmerman Files, Fund for UFO Research, 2005, pp. 138–139; Michael D. Swords, “Can You Learn Anything from UFO Photos? Part Three,” The Big Study, July 7, 2012; Patrick Gross, “The Great Falls, Montana, UFO Color Film, August 15, 1950”)

August 15 — A top secret meeting on UFOs takes place at the Metropole Building on Northumberland Avenue in London, England. It is chaired by Hugh Young, deputy director of intelligence, and attended by representatives of the Secret Intelligence Service and Wing Commander Myles Formby of the Air Ministry’s technical intelligence branch. Young explains that Henry Tizard, chief scientific advisor to the Ministry of Defence, feels that reports of flying saucers should not be dismissed without investigation and has asked that a working party be set up to look into significant reports. RAF Fighter Command is advised that all future reports of aerial phenomena should go to the Flying Saucer Working Party. (David Clarke and Andy Roberts, Out of the Shadows, Piatkus, 2002, pp. 77–78; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: January 1, 1947–December 31, 1959, Supplemental Notes, The Author, 2003, p. 35)

August 20 — An FBI informant meets with George Adamski at Alice Wells’s restaurant, the Palomar Gardens Café, south of Mount Palomar, California. In addition to the standard flying saucer tales, Adamski mentions that the Federal Communications Commission has established contact with people from other planets who apparently have a communist economic system. He also predicts that Russia will dominate the world for the next 1,000 years. (Kremlin 63–71)

August 30 — 10:45 a.m. During a Bell Aircraft MX-776 Shrike missile test (for the later Rascal air-to-ground strategic missile) a USAF M/Sgt and eight Bell Aircraft employees at Holloman AFB, New Mexico, see two glaringly bright circular or elliptical objects maintaining relative position to each other following the B-50 Superfortress launch aircraft from above on both the dry run and hot run prior to missile release. The objects give a “strong glare at all times” (not reflected sunlight), maneuver at high estimated speeds up to 10 times the B-50 (roughly 2,500 mph) for short distances, leave no vapor trails, hover, accelerate rapidly, and make abrupt “square” turns with apparent size changing to indicate ascent and descent. (NICAP, “Two Objects Filmed during Shrike Missile Test”; Sparks, p. 98; Maj. R. G. Illing, “Aerial Phenomena,” September 13, 1950; Swords 115)

August 31 — 10:00 a.m.–1:00 p.m. After V-2 missile launch no. 51 at Holloman AFB, New Mexico, Project Twinkle cinetheodolite crews track and film multiple objects sporadically several times from different directions at very high speeds over the course of 3 hours. Cinetheodolite station P-5 films an object using a one-frame-per-second 60 cm focal length camera with 35 mm color film. Frames 593 and 595 (2 seconds of nearly 10 minutes of film) show its elevation angle changing. An attempted interception by four F-86 jets from Kirtland AFB for one hour fails to locate the objects, which apparently return after the jets leave. Cinetheodolite observers note an object
with definite shape and 3D depth but indistinct edges and no smoke or trail. The object seems to “rock or oscillate.” It is lost when the observer looks away to get an angle reading. (NICAP, “Objects Filmed after V-2 Launch”; Sparks, p. 99)

September — 7:00 a.m. Three US Navy planes on a combat mission 100 miles south of the Yalu River in Korea are approached from below by two huge discs, at least 600–700 feet in diameter, traveling at 1,000–1,200 mph. The radar shows them as 1.5 miles away. Suddenly the objects halt, back up, and begin a jittering motion, keeping pace with them, circling above and below. When one pilot readies his guns, the aircraft radar goes haywire, apparently jammed. His radio transmitter is blocked by a buzzing noise. The discs are silvery and shaped like a “coolie’s hat, with oblong ports from which emanated a copper-green colored light which gradually shifted to pale pastel-colored lights.” A shimmering red ring circles the top portion of the disc. The objects soon speed away in the direction from which they had come. (Haines, Korea, pp. 28–30; Lorenzen, FS Hoaxes, pp. 30–32)

September — The first US Army large-scale aerosol vulnerability test occurs in the San Francisco Bay Area, California, using two types of bacteria (Bacillus globigii and Serratia marcescens) and fluorescent particles. Six simulated attacks are conducted, with the conclusion that it is feasible to attack a seaport city with biological aerosol agents from a ship offshore. The first open-air tests with biological simulants are conducted in 1950 in various locales, one of which is off the coast of Norfolk, Virginia. (Wikipedia, “United States biological weapons program”; David R. Franz, Cheryl D. Parrott, and Ernest T. Takafuji, “The U.S. Biological Warfare and Biological Defense Programs,” in Medical Aspects of Chemical and Biological Warfare, Office of the US Surgeon General, 1997, chap. 19)

September — George Adamski first receives national exposure as coauthor of an article in Fate on his fake UFO photographs. A follow-up article in July 1951 features even more dramatic photos. (Clark III 39; Maurice Weekley and George Adamski, “Flying Saucers As Astronomers See Them,” Fate 3, no. 6 (September 1950): 56–59; George Adamski, “I Photographed Space Ships,” Fate 4, no. 5 (July 1951): 64–74; George Noory, “Fate Flashback: ‘Flying Saucers’ in the 1950’s,” Coast to Coast AM, August 18, 2016)

September 5 — 4:09 p.m. Flight Lt. Stan J. Hubbard is standing on the watchtower at Farnborough Airfield, Hampshire, England, with five other officers, one of whom is Wing Commander Frank Jolliffe. They all see, at a range of 10–15 miles, a light gray disc following a rectangular flight path, consisting of a “falling leaf, horizontal flight, an upward “falling leaf,” then another horizontal stretch. The Working Party concludes they have imperfectly viewed some conventional aircraft. (David Clarke, “Flying Saucer Working Party,” Dr. David Clarke Folklore and Journalism, January 3, 2015; Good Need, pp. 150–151; David Clarke and Andy Roberts, Out of the Shadows, Piatkus, 2002, pp. 87–93; UFOFiles2. p. 41)

September 8 — Henry Holt publishes Frank Scully’s Behind the Flying Saucers, the first book on UFOs. It sensationally claims that the US government has retrieved a crashed flying saucer and several dead pilots. Rep. Edward H. Jenison (R-III.) condemns the book as contributing to mass hysteria during a time of war in Korea. USAF Public Information Officer Clare Welch estimates that 3–4 million people have heard about saucers, thanks to the book. (Frank Scully, Behind the Flying Saucers, Holt, 1950; John L. Cotton, et al., “Flying Saucers and Frank Scully,” in KNW 2333: The Scientific Method, Critical and Creative Thinking (Debunking Pseudoscience), Southern Methodist University; Swords 103; Curt Collins, “Operation Hush-Hush: The UFO Crash and ET Bodies Cover-Up,” The Saucers That Time Forgot, February 9, 2018)

September 9 — Air Force Intelligence Collection Division’s Collection Control Branch (AFOIN-CC-1) at the Pentagon issues a new intelligence reporting directive requiring special handling and reporting of UFO incidents, “Reporting of Information on Unconventional Aircraft,” thus reversing the cancellation directive of January 12, 1950. The action reflects the increasing interest by AFOIN Director Gen. Cabell and his dissatisfaction with AMC inaction on UFO study at Wright-Patterson AFB. (NICAP, “1950 UFO Chronology”)

September 13 — The Air Force responds to producer Howard Hawks’s request for the use of military locations, personnel, and equipment for his upcoming film The Thing from Another World by refusing to participate and objecting to any display of USAF personnel or equipment on the grounds that “it is our policy not to participate in any proposal that will perpetuate this hoax.” (Woods 103–104)

September 15 — Canadian engineer Wilbert B. Smith attends a classified briefing with physicist Robert I. Sarbacher of the US Defense Dept.’s Research and Development Board. Smith asks if there is any truth to the Scully crash-and-retrieval story and Sarbacher replies, “The facts reported in the book are substantially correct.” He says that UFOs are “classified two points higher even than the H-bomb.” In 1983, Sarbacher confirms the comment to Stanton T. Friedman, although he clarifies that he was speaking about crashed UFOs in general. He tells UFO researcher William Steinman in November 1983 that he “was invited to participate in several discussions associated with the reported recoveries” of UFOs, but is unable to attend the meetings. He claims Vannevar Bush,
Eric A. Walker, and John von Neumann are “definitely involved” in the program and probably J. Robert Oppenheimer as well. (Clark III 1029–1031; Good Above, pp. 519–521; Northern Ontario UFO Research and Study, “Dr. Robert Sarbacher,” March 1, 2010; Wilbert B. Smith, [SARBACHER INTERVIEW NOTES], September 15, 1950; Dulan II 320; Robert I. Sarbacher, [LETTER TO WILLIAM STEINMAN], November 29, 1983)

September 21 — MIT research associate and Air National Guard Maj. Myron Herbert Lijda and Joseph V. Connelly are testing radar near Provincetown, Massachusetts, under contract to the US Signal Corps, when they track an unknown object on a converging course with two F-86s. The clear target passes the planes at a speed of at least 1,200 mph, makes a right turn, then passes directly over or under the F-86s. (NICAP, “SCR-615B Tracks UFO”; Hynek UFO Report, pp. 139–141; Sparks, p. 100; Swords 104)

September 25 — JANAP 146(A) is issued: “Communications Instructions for Reporting Vital Intelligence Sightings from Aircraft,” the start of CIRVIS reporting for commercial and military pilots. This adds UFOs to the list of sighting categories. All UFO reports are to be sent to the Air Defense Command at the Pentagon and to the Secretary of Defense. AMC at Wright-Patterson is not mentioned. (Swords 123)

September 25 — The Air Force Intelligence office, apparently at the request of Gen. Hoyt Vandenberg, orders all copies of the December 10, 1948, revised Project Sign report destroyed. (Good Need, p. 114)

September 26 — 10:00 p.m. Policemen John Collins and Joseph Keenan are patrolling on Vare Avenue near 26th Street in South Philadelphia, Pennsylvania, when they see something like a parachute drifting down ahead of them at treetop level. It is about 6 feet in diameter and settles in an open field. After summoning Sgt. Joseph Cook and Patrolman James Casper, they go into the field to investigate. When they turn their flashlights on it, it gives off a purplish glow, “almost a mist, that looked as though it contained crystals.” Collins touches it and it dissolves in his hand, leaving an odorless, sticky residue. It completely evaporates in 25 minutes. This event inspires producer Jack H. Harris to ask his friend Irvine H. Millgate to come up with a story for what eventually becomes the 1958 horror film The Blob. (Clark III 1102; “Flying ‘Saucer’ Just Dissolves,” Philadelphia Inquirer, September 27, 1950, pp. 1–2; Rebekah McKendry, “THE SUPPOSEDLY TRUE STORY BEHIND THE CLASSIC FILM THE BLOB!” 13th Floor, October 21, 2015)

October — Donald Keyhoe’s True article is expanded into a paperback book, The Flying Saucers Are Real, which sells 500,000 copies. It brings many interested civilians and military people to accept UFO reality, government withholding of information, and the extraterrestrial hypothesis. (Donald E. Keyhoe, The Flying Saucers Are Real, Gold Medal, 1950; Wikipedia, “The Flying Saucers Are Real!”)

October — Jack? L. Rohn is named a chief of Project Grudge. (Sparks, p. 14)

October 3 — Geochemist J. D. Laudermilk watches a disc moving with a wobbling motion at 750 mph behind a mountain peak near Pomona, California. (UFOEv, p. 49)

October 5 — A California Central Airlines plane, piloted by Capt. Cecil Hardin and Flight Officer Jack Conroy, is buzzed by a wing-like UFO with 8 bright lights between San Fernando and Van Nuys, California. Bands of blue light are visible across its width. (“Now Add This to Saucer Mysteries,” Los Angeles Daily News, October 6, 1950, p. 2; NICAP, “Mysterious Object Buzzes Airliner”; UFOEv, p. 34)

October 7 — Walter Bedell Smith takes over as director of central intelligence.

October 12 — The Oak Ridger columnist Robert Sharon Allen reports that the Atomic Energy Commission Security Service has issued a questionnaire to be used when UFOs are reported at its installations. (Robert S. Allen, “AEC Wants Info on Flying Saucers Seen near A-Plants,” The Oak Ridger, October 12, 1950; Project 1947, “Robert S. Allen Introduction”)

October 12–November 5 — Some 15 radar and visual sightings of UFOs take place over restricted airspace at Oak Ridge, Tennessee. After the observation on October 23, an unexplained increase in alpha-beta background radiation is detected; after the November 29 sighting, an alpha and gamma ray increase is correlated with unidentified radar targets in the area. (ClearIntent, pp. 171–173; Memo from Strategic Air Command Knoxville to Director of FBI, “Flying Saucers’ Observed over Oak Ridge Area,” October 25, 1950; J. Edgar Hoover, [LETTER IN RESPONSE], December 5, 1950; Bruce S. Maccabee, “NCP-14: SAUCERS OVER OAK RIDGE,” from UFO–FBI CONNECTION, Llewellyn, 2000, pp. 163–181; Francis Ridge, “The Oak Ridge Sightings including All the Tennessee Blue Book Unknowns,” September 22, 2005; Sparks, pp. 100–102; Clark III 950; Swords 106–107; Hynek UFO Report, pp. 142–143)
October 13 — J. Edgar Hoover sends a teletype message to the Special Agent in Charge in Los Angeles, California, asking him to determine whether Frank Scully is the same man who has been active in communist activities since the 1930s. (Anthony Bragalia, “J. Edgar Hoover’s Saucer Crash Secrets,” UFO Explorations, April 2011)

October 15 — 4:20 p.m. After taking off from Raleigh, North Carolina, Miami Airlines DC-4 pilot Capt. George A. Woodward and copilot William Bardsley see four round, metallic objects descending slowly near Pope AFB [now Pope Field] at Fort Bragg. They look like two saucers fitted together and are about 100 feet in diameter, flying in a line about 25 feet apart. The pilots pursue the objects for about 3 minutes, but the objects recede then shoot away at tremendous speed. Around the same time, a similar object crosses the path of an Air Force jet near Pope AFB. (NICAP, “Pilots Report 100-Ft Round Objects”; NICAP, “Aluminum-Like Object Crosses Path of Jet”)

October 18 — USAF Brig. Gen. Ernest Moore writes a memo to Col. Harold E. Watson at Wright-Patterson AFB in Ohio, advising him of the standing policy of releasing no details about UFO case investigations. A form letter is to be used: “We have investigated and evaluated ____________ incident and have found nothing of value and nothing which would change our previous estimates on this subject.” (Swords 102–103, 500)

November 5 — Four Pan American Airways employees (Fred Wilkinson, Patrick Joseph Maloney, Fred Perrior, and E. Newman) see a bright object fly east to west over Heathrow Airport, London, at 1,000 mph. (London Sunday Dispatch, November 12, 1950; “Saucers over England,” Fate 4, no. 2 (March 1951): 18)

November 7 — A military pilot flying a Douglas AD-4Q Skyraider near Lakehurst, New Jersey, engages in a dogfight with a steady white light that he at first mistakes for an aircraft. He gets on its tail, then the light reverses suddenly and passes 100–200 feet above his plane at incredible speed. He again tails it and the same thing happens. The light continues to “turn about me in wide, climbing turns, making about two orbits to my one.” He abandons chase at 11,500 feet. (NICAP, “Light Makes 5–6 Head On Passes at Navy Plane”; Hynek UFO Report, pp. 68–70; Sparks, p. 102)

November 16 — Col. Harold E. Watson at AMC brings in news columnist Bob Considine for an in-depth interview on flying saucers. Watson says: “I’ve seen lots of flying saucers…and every single saucer turned out to be the sun shining off the wing or body of a distant DC-4, or jet, or a weather balloon, or it was a reflection off a water-tank or something else that is readily explainable.” He characterizes witnesses as crackpots, religious fanatics, publicity hounds, or practical jokers. Considine asks him about airline pilot witnesses. Watson accuses them of being fooled by optical tricks and the power of suggestion. (Swords 107–108)

November 17 — Telenews Productions releases a 9½-minute short film, The Flying Saucer Mystery, apparently the first UFO documentary. The film’s main focus is on the best new evidence of 1950, the alleged first authentic photographs and motion picture film of flying saucers, the two snapshots by farmer Paul Trent, and the film shot by Louisville (Ky.) Times photographer Al Hixenbaugh on June 27, 1950. It also features UFO witness Arthur Weisberger of Tucson, Arizona, describing his sighting, apparently the only record of the event, as well as Donald E. Keyhoe and Admiral Calvin M. Bolster. The film is apparently only shown for a few months and rotates among the Telenews Theaters across the nation. It is lost for decades until it resurfaces in the 1990s. (“Flying Saucer Mystery,” histroycomestolife YouTube channel, July 3, 2010; Curt Collins, “The First UFO Documentary: The Flying Saucer Mystery,” The Saucers That Time Forgot, January 9, 2020)

November 21 — Wilbert Smith writes a top secret memo to the Canadian Controller of Telecommunications claiming that he has talked to Canadian embassy staff in Washington, D.C., who tell him that the UFOs are the “most highly classified subject in the US government” (what Sarbacher told him) and that a “concerted effort is being made by a small group headed by Dr. Vannevar Bush.” Sarbacher later verifies the information, saying the small group existed within the Research and Development Board. (W. B. Smith, “Memorandum to the Controller of Telecommunications,” November 21, 1950; NICAP, “The Smith Memo, November 21, 1950”; Good Above, pp. 183, 464–466; Michael Hall and Wendy Connors, “The Research and Development Board: Unanswered Questions,” IUR 26, no. 2 (Summer 2001): 10–11)

November 26–27 — 11:50 p.m. A “mysterious lighted object” flashing red, white, and green lights is seen above Huron (South Dakota) Regional Airport. Weather Bureau observer Gene Fowler, Winfield Henry of the Civil Aeronautics Administration, and Gordon Moore and Chet Fuqua, ground personnel at Western Airlines, go up to the roof of the airport administration building for a better look. Fowler is able to watch it through a theodolite used for weather balloons for 8 minutes. He says, “The azimuth reading changed from 147 degrees to 161 degrees during that period and went up seven degrees vertically.” The Rapid City weather bureau and Aberdeen CAA in South Dakota estimate the object is 40–50 miles northwest of Bismarck, North Dakota. The object reappears at 1:30 a.m. and is visible, sometimes hovering, until 3:00 a.m. when it disappears to the northwest. In Aberdeen, CAA aircraft communicator William B. Hiller sees a star-like object at 2:00 a.m. and watches it for 90 minutes. It changes colors, glowing white, green, and red alternately. (“Mysterious Sight May Be ‘Saucer,’” Rapid City

November 27 — Bill Blair, a commercial pilot and flight instructor, watches six elliptical objects in loose echelon formation over Evansville, Wisconsin. They are making noises like a helicopter and are flying at 500 mph at 10,000 feet. (UFOEv, p. 34)

December — The US seaplane tender USS Gardeners Bay is steaming up the channel from Incheon, South Korea, when the crew sees two mysterious, smoke-trailing objects that strike the water at tremendous speed. Two columns of water rise to 100 feet in height. No aircraft are sighted overhead. (Sanderson, InvRes, p. 43; “Sighting Flying Discs Again?” Naval Aviation News 32, no. 2 (February 1951): 26)

December — Science writer Gerald Heard publishes *The Riddle of the Flying Saucers* in the UK, in which he speculates that with conditions on Mars being severe, the only intelligent beings that can exist there would be advanced insects. A US edition is published in April 1951 as *Is Another World Watching? The Riddle of the Flying Saucers.* (Gerald Heard, *The Riddle of the Flying Saucers*, Carroll and Nicholson, 1950; Lyle Zapato, “Of Bees and Men: *The Riddle of the Flying Saucers*,” ZPI blog, January 27, 2015)

December 2 — Cmdr. Charles Peter Edwards, Canadian Deputy Minister of Transport for Air Services, approves Wilbert B. Smith’s proposed plan to use the Department of Transport lab and field facilities during off-hours to gather quality UFO data. It is called Project Magnet. (“What Was the Truth about Project Magnet?” Flying Saucer Review 10, no. 4 (July/Aug. 1964): 29; Clark III 1078; Good Above, pp. 183–184)

December 5 — Engineer Lt. Col. John R. Hood disperses radiation counters around the Oak Ridge, Tennessee, National Laboratory’s restricted area. The intent is to map the presence of any unusual radiation, in the wake of numerous UFO reports over the facility. He also sets up a source of radioactive material to see if its presence has an effect on the air above it. If the air is unusually ionized, it might be the source of the anomalous radar targets. He also mentions using a magnetometer array, but there is no documentation of the result of this effort. (Loren E. Gross, *UFOs, a History: Volume 7, August–December 1950*, The Author, 1982, pp. 64–65; Swords 107)

December 6 — 10:30–11:04 a.m. The ConAC Air Defense Controller notifies the HQ USAF that a number of unidentified aircraft are approaching the northeast area of the United States and that there is no reason to believe they are friendly. By radar contact it is determined that approximately 40 aircraft are in the flight at 32,000 feet on a course of 200° northeast of Limestone, Maine. The White House is notified at 10:31 a.m., and President Truman discusses the reports in a meeting with UK Prime Minister Clement Attlee. (NICAP, “Radar-Inspired National Alert”; Bruce Maccabee, “Immediate Saucer Alert! The Mystery of December 6, 1950,” July 1999; Clark III 824; Sparks, p. 103)

December 6 — While F-94s are being tested at Dyess AFB near Abilene, Texas, radar catches a UFO on a high-speed intercept course with the planes. Some personnel see the object shortly afterward. Col. Robert B. Willingham claims it is a not a missile. It makes 90° turns at high speed. NORAD tracks it and the object is said to crash near the Mexican border near Del Rio, Texas. Willingham and a copilot take a light aircraft to the site but are escorted away. They do see part of the crash field and pick up a small piece of metal from the ground. Willingham takes it to a Marine Corps metallurgy lab in Hagerstown, Maryland, for analysis but never sees it again. (Kevin D. Randle, *A History of UFO Crashes*, Avon, 1995, pp. 192–193; Clark III 338; “Del Rio 1955,” Texas UFO Museum and Research Library, March 22, 2010; Kevin D. Randle, “Del Rio UFO Crash and MJ-12,” A Different Perspective, July 21, 2010; Kevin D. Randle, “MJ-12’s Fatal Flaw and Robert Willingham,” IUR 33, no. 4 (May 2011): 4–7)

December 6 — 5:00 p.m. Former aircraft purchasing agent Harry Lamp and four boys spot a 75-foot silver object hovering at 3,000 feet above the northern part of Fort Myers, Florida. Through 10x binoculars Lamp sees it is 3–4 feet thick at the edges and 14 feet thick in the center, which revolves as it hovers. The object has a red rim with two white and two orange jets along it. It flies away at high speed. (NICAP, “Large Object with Bubble on Top”)

December 6 — Dubious MJ-12 documents refer to a UFO crash on the Mexico side of the US border in the area between El Indio, Texas, and Guerrero, Coahuila, Mexico. (“El Indio 1950,” Texas UFO Museum and Research Library, February 5, 2014)

December 8 — The FBI office in Richmond, Virginia, sends a telegram to FBI headquarters saying that local Army Intelligence has been put “on immediate high alert for any data whatsoever concerning flying saucers.” It adds, “CIC advises data strictly confidential and should not be disseminated.” (Auerbach, [teletype memo], December 8, 1950; ClearIntent, p. 175)

December 10 — 7:30 p.m. RAF Group-Captain B. S. Cartmel and two friends are at the Wilderness Golf Course near Sevenoaks, Kent, England, when they see a bright light moving east to west in complete silence. It maintains a steady height of 3,000 feet moving at 130–150 mph and is visible for 5 minutes. (Good Above, pp. 28–29)
December 12 — The AFSWP’s Project Nutmeg officially selects the Tonopah–Las Vegas Bombing and Gunnery Range, Nevada, for domestic nuclear testing. (Wikipedia, “Nevada Test and Training Range”)

December 13 — 4:55 p.m. J. G. F. Moul and his mother are sitting at their home in Kimberley, South Africa, when they observe a bright object “like a huge mirror in the sky,” hovering, and moving laterally and up and down for about 3 minutes. It goes behind a cloud but can still be seen, appearing like a “piece of magnesium wire burning with a bright, purplish-white light.” It dives through the clouds, turns sharply, and shoots out of sight. (David Marais, “The Outspan Magazine, January 1, 1954”)

Late December — USAF Capt. J. E. Broyles sees an aluminum-like oval object with a conical tail moving slowly in the sky near Cheyenne, Wyoming. (UFOEv, p. 20)

December 26 — Harvard University historian William L. Langer, special assistant for intelligence analysis to US Secretary of State James F. Byrnes, organizes the CIA Office of National Estimates, a forerunner of the National Intelligence Council. (Central Intelligence Agency, “Staff Conference: Minutes of Meeting Held in Director’s Conference Room, Administration Building, Tuesday, 26 December 1950, at 1100 Hours”)

December 27 — Sunset. A TWA flight, piloted by Capt. Art Shutts, is enroute from Chicago to Kansas City. Near Bradford, Illinois, Shutts notices a bright white light ahead of the plane, also flashing red and green occasionally. It begins to “wobble and swerve unsteadily,” then streaks back and forth in a north-south line through an arc of 10–30°, changing direction abruptly. He notices that the horizon near the UFO appears to vibrate as if light is distorted, especially after the object puts on a burst of speed. It dims to a pinpoint and begins to slowly move south. Suddenly it lurches, accelerates rapidly, zooms upward at a 45° angle, makes a nearly square turn, plunges downward, and disappears below the horizon to the north. It is visible for 25 minutes. (UFOEv, p. 40)

1951

1951 — While flying an F-86 Sabrejet over West Germany, USAF pilot Gordon Cooper sees several metallic discs flying at a high altitude. He claims to “have two days of observation of many flights of them, of different sizes, flying in fighter formation, generally from east to west over Europe.” (Gordon Cooper and Bruce Henderson, Leap of Faith: An Astronaut’s Journey into the Unknown, HarperCollins, 2000, pp. 80–81; “UFO Sightings by Astronauts,” Siti.net, January 30, 2001; “Astronaut Gordon Cooper Talks about UFOs,” Elhardt YouTube channel, December 27, 2007)

1951 — The intelligence unit of the 1st Marine Aircraft Wing puts out periodic intelligence reports through 1953 that cover ground and air operations, unusual incidents, and UFO reports in Korea. The UFO reports are in a different category from unidentified aircraft. Some of these reports do not appear in Project Blue Book. (Jan Aldrich)

1951 — The Atomic Energy Commission uses its parallel system of secret-keeping to conduct controversial research, development, and engineering on aircraft and pilot-related projects, entirely without oversight.

January — Author and journalist Bob Considine’s article appears in Cosmopolitan, debunking all UFO stories as delusions and hoaxes, and quoting a weary Air Force Col. Harold E. Watson, who has replaced McCoy in Project Grudge. It offends people so badly that many pilots afterward refuse to report UFO sightings to the Air Force. USAF Public Information Officer Clare Welch, who has set this interview up, believes the Air Force has better things to do and is out of step with Cabell’s renewed interest. (Bob Considine, “The Disgraceful Flying Saucer Hoax!” Cosmopolitan, January 1951, pp. 32–33, 100–102, republished by Project 1947; Swords 113–114)

January 1 — 7:00 a.m. Katie Sowell watches an object about 30–50 feet in diameter, like two “upside down saucers” revolving counterclockwise and darting low over her farmhouse near Oak Grove, Louisiana. It has rectangular, opaque windows. It is seen for 15–20 minutes at close range. It banks and disappears, going straight up. (Huntsville (Ala.) Times, February 5, 1974; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1951, Supplemental Notes, The Author, 2000, pp. 1–2)

January 16 — Raymond Dugan and Raymond E. Stiles, members of the General Mills Aeronautical Research Laboratory balloon project, observe a round disc near their Skyhook balloon over Artesia, New Mexico. The balloon is at a height of 112,000 feet. A short time later, Dugan, Stiles, and four civilian pilots at Artesia Airport see two similar
objects circling the same balloon that then fly off to the northeast. (NICAP, “Two Discs Approach Skyhook”; Project Blue Book, [Artesia documents]; J. Allen Hynek, The UFO Experience, Ballantine ed., 1974, pp. 69–70; Sparks, p. 104; Swords 166)

January 20 — 9:20 p.m. Sioux City, Iowa, CAA Control Tower operator John M. Williams sees an odd light in the west. Capt. Lawrence W. Vinther and copilot James F. Bachmeier of Mid-Continent Airlines Flight 9 takes off and Vinther is asked by the tower to look for the light. While still in a climbing turn at about 1,000 feet, the pilots spot the object to the north-northwest at about 8,000 feet and 4 miles away. It looks like a B-29 fuselage with wings but no engines and blinks some lights like running lights. The object comes towards the DC-3, flies across the nose within 200 feet, then suddenly reappears on the other side, paralleling them for 2–3 seconds. The object then flies under them and disappears to the northwest. This is one of the first reports to make it into the CIRVIS system specified by JANAP 146. (NICAP, “UFO Buzzes DC-3”; Lawrence W. Vinther, “Another Saucer Mystery,” Flying 48 (June 1951): 23, 56, reprinted by Project 1947; Ruppelt, p. 84; Jan Aldrich; Sparks, p. 104; James E. McDonald, “Statement on Unidentified Flying Objects,” in Symposium on Unidentified Flying Objects, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 43–44)

January 21 — 4:20 p.m. A UFO that appears to be over the restricted area at Oak Ridge National Laboratory, Tennessee, is sighted on the radarscope of an F-82 fighter. The GCI gives the go-ahead to intercept the target. The radar set on the F-82 is locked on and the run begins. The interception is unsuccessful, and the fighter returns to base. In all, three passes are made at targets, all with radar indications, but they cannot be completed since the target is over the restricted area that includes the X-10 plant. (NICAP, “F-82 Attempts Intercept of UFO over AEC Plant / Radar”; Sparks, p. 104)

January 22 — 11:00 a.m. USAF pilots Capt. Ernest W. Spradley Jr. of Aerial Photo Lab and Capt. James E. Cocker of All-Weather Flying Division (both based at Wright-Patterson AFB in Ohio), a General Mills Aeronautical lab project engineer named McAleese, and another airman flying in a C-47 heading east about 50 miles southeast of Holloman AFB, New Mexico, at about 10,000–12,000 feet, tracking a Project Gopher plastic balloon at about 50,000–70,000 feet, when they see a bright star-like object adjacent to the tear-shaped balloon. As they approach and fly under the balloon, they notice the object descend to the balloon’s level and grow larger in apparent size until about one-quarter to one-half the size of the 70-foot balloon. It appears to be round and flat like a dime, milky white or silvery in color, with a clear outline. Cocker and McAleese leave the cockpit and go to the astrodome to observe the object. After 3 minutes they see the object separate from the balloon and head west at high speed. After about 1 minute it emits a series of 3 bright photoflashes at one-second intervals and disappear from sight. (NICAP, “C-47 Crew Encounter Object near ‘Gopher’”; NICAP, “White Object Paces Balloon”; Sparks, p. 105; Swords 114–115)

January 27 — An Air Force B-50D bomber drops the first atomic bomb, the Able blast, for testing in the US onto a dry lake bed known as Frenchman Flat, inside the Nevada Test Site. (Wikipedia, “Operation Ranger”)

January 29 — USAF Lt. Col. Milton D. Willis replies to Robert B. Sibley, president of the Aero Club of New England, who has written Secretary of the Air Force Thomas K. Finletter asking that the UFO project be reinstated because pilots are indeed seeing something that could be extraterrestrial. Willis writes that, although the UFO project is disbanded, the Air Force still investigates incidents and sends them to AMC if necessary, and an officer (Willis himself, who has replaced Boggs) monitors all UFO reports. As an aside to his superiors, Willis in a memo notes that “there have been several incidents, during the last six months, which cannot be explained and further investigation may be necessary.” (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1951, Supplemental Notes, The Author, 2000, pp. 7–8; Swords 113)

February 13 — William Webster, chair of the Defense Department’s Research and Development Board, convenes a press briefing at the Pentagon and announces that “Careful studies have been made [referring to the upcoming article in *Look*]. I don’t believe anyone who has the opportunity to be informed and to look into this thing believes there is a flying saucer as such. As far as I know there is nothing to the flying saucers.” (Loren E. Gross, *UFOs, a History: Volume 8, 1951*, The Author, 1983, pp. 13–14)

February 19 — 7:20 a.m. Capt. Jack Bicknell and Radio Officer D. W. Merrifield are flying a Lockheed Model 18 Lodestar aircraft out of Nairobi, Kenya, when they see a bright object hanging motionless about 10,000 above Mount Kilimanjaro in Tanganyika [now Tanzania]. They watch it for 3 minutes, then tell the passengers about it. Bicknell observes it through binoculars and sees a “metallic, bullet-shaped object which must have been over 200 feet long.” It has a vertical fin at one end, and at regular intervals along the fuselage are vertical dark bands. It remains completely stationary for 17 minutes. Two passengers take photos of it. Then it begins rising and moving eastward, disappearing at 40,000 feet. It leaves no vapor trail. (NICAP, “Lodestar Crew Sees Stationary Silver Elongated Object”; “The Flying Saucer: Captain Bicknell’s Own Story,” *Nairobi (Kenya) Sunday Post*, February 25, 1951, p. 15; Center for UFO Studies, [case documents]; UFOEv, p. 124; Sparks, p. 105; Patrick Gross, “February 19, 1951, Mount Kilimanjaro, Africa”; Barry Greenwood, “Mt. Kilimanjaro, Tanganyika, February 19, 1951: Photo Located.” *UFO Historical Revue*, no. 16 (July 2015): 1–4)

February 20 — The Air Intelligence Training Bulletin publishes a facetious news item on how to recognize flying saucers, but implies they are all reflections. (“Recognition of Flying Saucers,” *Air Intelligence Training Bulletin*, February 20, 1951)

February 25 — Project Twinkle head and chemist Anthony O. Mirarchi at the USAF Cambridge Research Laboratory in Massachusetts tells the Associated Press that he thinks UFOs are not “just balloons” (in response to Liddel’s upcoming article) and urges a full investigation of what could be experiments by a “potential enemy of the United States.” He says that UFO reports show “maneuvered motion” that are not characteristic of a natural phenomenon. He says the “Navy report is erroneous. It lulls people into a false sense of security.” He reminds the nation of the critical installations in New Mexico, including Los Alamos, and argues that they are a target of reconnaissance: “If they were launched by a foreign power, then they could lead to a worse Pearl Harbor than we have ever experienced.” He blasts the US government for a policy of “suicide by secrecy.” The FBI and Air Force mull prosecuting Mirarchi for violating AFR 205-1. (“A.F. Scientist Warns Saucers Major Threat,” *Dayton (Ohio) Daily News*, February 26, 1951, p. 1; “Scientist Fears Flying Saucers Portend a Worse ‘Pearl Harbor,’” *Oklahoma Daily Oklahoman*, February 26, 1951, p 1; Swords 119–120; Loren E. Gross, *UFOs, a History: Volume 8, 1951*, The Author, 1983, pp. 18–19)

February 27 — Physicist Urner Liddel, Office of Naval Research, says in a *Look* magazine article that there is not a single reliable UFO report that is not attributable to the cosmic [Skyhook] balloons. The article is based on Liddel’s study in ONR’s *Research Reviews* in March. He claims to have studied “hundreds” of sightings in detail (probably from Project Grudge). As for UFOs sighted by Skyhook scientists themselves, he discounts them because these technicians are not aware of mirages and internal reflections in optical devices. (Richard Wilson, “A Nuclear Physicist Exposes Flying Saucers,” *Look*, February 27, 1951, pp. 60–64; Swords 117–118; Urner Liddel, “Bogies at Angels 100.” *Research Reviews*, March 1951, pp. 1–6)

March — A ghost light is seen in Suffolk County, Virginia, and investigated by Nansemond County Deputy Sheriff Hurley Jones, who sees the light three times. It looks like a car headlight 5 feet off the ground, three times. Jeston Reid said his father had seen the light in the 1870s. The location is apparently either Turlington Road or Jackson Road [they intersect] south of Suffolk, since locals say the old railroad along the Jackson and Whaleville logging road used to run down that way, and the light has also been compared to a locomotive headlight. Some 200 people have been gathering along the road, hoping to catch a glimpse. (“Mystery Light Is a Puzzle in Nansemond,” *Richmond (Va.) Times-Dispatch*, March 6, 1951, p. 2; “Nansemond’s Mystery Light Is Nothing New to Old-Timers,” *Richmond (Va.) Times-Dispatch*, March 7, 1951, p. 2; “Mysterious Suffolk Light Has Deputy Believing in Ghosts,” *Statesville (N.C.) Daily Record*, March 8, 1951, p. 1)

March — 11:30 p.m. Operations Officer Robert Wood is aboard the *USS Dyess* approximately 125 miles southeast of Cape May, New Jersey, when he picks up a radar target coming in from due east at a speed of 98–104 mph and an altitude of 3,000–4,000 feet. It stops and hovers about 30 miles away. Wood notifies the bridge, and the captain orders the ship to change course toward the object. About 30 minutes later, the UFO suddenly takes off toward the north at 3,000 mph, getting to within 35–40 miles south of Nantucket Island, Massachusetts, before it zooms
March 14 — A group of nine Bell Aircraft engineers are flying at 15,000 feet in a B-50 Superfortress near Holloman AFB, New Mexico, during a test of a secret Bell aircraft. They spot a group of unknown objects flying in a confusing “swirl” that breaks into a V-formation and back to a “swirl,” then a V again. The objects are slightly higher than the aircraft and seem to be moving at high velocity. The engineers insist the objects are not geese, which actually can fly this high. (This may be the same incident as the August 30, 1950, case at Holloman.) (Loren E. Gross, *UFOs, a History: Volume 8, 1951*, The Author, 1983, pp. 21–22)

March 15 — 10:20 a.m. George F. Floate, chief engineer of the Delhi Flying Club, and two assistants observe a swirl of white cloud moving from north to south at about 4,000 feet altitude near the club’s hanger in New Delhi, India. The cloud is about 700 feet in length. At the end of it a bullet-shaped object appears, approximately 100 feet long and as big around as a C-47 fuselage. The witnesses shout out, and 17–20 people rush out of the hanger and see the object. It heads south for about 3 minutes where it makes an apparent loop, coming back over the field. At the top of the loop it is out of sight, but it is seen again in its dive. After recovering straight and level flight, the UFO proceeds to the southwest until it is lost to sight. Its speed is estimated at three times greater than the cruising speed of a British Vampire jet. The total duration is about 7 minutes. (NICAP, “20+ Top Shelf Witnesses / Metallic Cigar”; *Sparks*, p. 106)

Early spring — Dusk. US Army Pfc. Francis P. Wall is on maneuvers with the 27th Infantry Regiment near Cheorwon, South Korea, when he sees an orange light like a jack-o-lantern coming down a mountain. Artillery airbursts do not seem to harm it. As it approaches, it turns into a brilliant blue-green disc pulsating with light. Wall asks permission to shoot and fires a round from his M-1 rifle at it. The object starts moving erratically from side to side, flashes on and off, and makes an engine-like noise. It sweeps the soldiers with a beam of light, and they feel a burning and tingling sensation. They retreat to their bunkers and continue to watch the object, which is still lighting up the area, and then it shoots away at a 45° angle. (Haines, *Korea*, pp. 18–27; Richard F. Haines, “GI Fires on UFO in Korea,” *IUR* 15, no. 6 (Nov./Dec. 1990): 23–24)

April 4 — The Truman administration forms the Psychological Strategy Board to coordinate and plan for psychological operations. The board is composed of the Under Secretary of State, the Deputy Secretary of Defense, and the Director of Central Intelligence, or their designated representatives. The board’s first director is Gordon Gray, later National Security Advisor during the Eisenhower administration. The board is created in response to the growth of Office of Policy Coordination covert activities during the Korean War. The PSB is tasked with creating propaganda that will subconsciously turn people away from communism and toward democracy. It is abolished in 1953. (Wikipedia, “Psychological Strategy Board”)

April 7 — Howard Hawks’s film *The Thing from Another World* opens, starring Margaret Sheridan, Kenneth Tobey, and James Arness, about a crashed flying saucer found in the Arctic. It ends with the haunting lines by Douglas Spencer: “Watch the skies, everywhere! Keep looking. Watch the skies!” (Internet Movie Database, “The Thing from Another World”)

April 11 — Air Defense Command issues a memo on “Unconventional Aircraft” to all USAF facilities, encouraging them to report sightings in a timely manner. (Loren E. Gross, *UFOs, a History: Volume 8, 1951*, The Author, 1983, pp. 25)

April 17 — Project Grudge’s Col. Harold E. Watson notes that JANAP 146 has no provision for UFO reports to be sent to Wright-Patterson AFB under the CIRVIS system. (Jan Aldrich)

April 21 — Drones are again used in the series of thermonuclear tests designated Operation Greenhouse at Eniwetok Atoll in the Marshall Islands. During the Easy detonation, two T-33 drones are lost. One receives heavy damage from the shock wave, loses control, and crashes; the other refuses to respond to control signals and crashes on uninhabited Boguluia Island. The Air Force concludes that unmanned samplers are unreliable. (M/Sgt Leland B. Taylor, *History of Air Force Atomic Cloud Sampling*, US Special Weapons Center, January 1963, pp. 34–37; Jacobsen, *Area 51*, p. 225)

April 23 — Col. Harold E. Watson writes a memo to the USAF Director of Intelligence, explaining his view that “little if any results” have been obtained from Project Grudge other than the objects are not from a foreign power. But since there is still dome doubt, all reports should be forwarded to AMC at Wright-Patterson AFB in Ohio. (Swords 121)

May 21— Wright-Patterson’s Technical Intelligence Department (T-2) becomes the Air Technical Intelligence Center (ATIC) and is assigned to the Directorate of Intelligence in the Pentagon. Project Grudge goes along with it. (Sparks, p. 12; Clark III 936)
May 22 — 3:20 a.m. American Airlines pilot Capt. W. R. Hunt observes a blue-white, star-like object gyration around the airplane at 21,000 feet for 20 minutes about 100 miles southwest of Dodge City, Kansas. It moves backward and forward, then up and down, then dives below the plane and speeds away. (“Mysterious Bright Light ‘Plays Tag’ with Airliner over Kansas,” Iola (Kan.) Register, May 22, 1951, p. 1; Loren E. Gross, *UFOS, a History: Volume 8, 1951*, The Author, 1983, p. 26)

June — Project Grudge only has one person on staff to investigate UFO reports, Lt. Jerry W. Cummings, who reorganizes the system and uses a more open-minded approach. (Jacobs, *UFOS Controversy in America*, Signet ed., 1976, pp. 56–57; Sparks, p. 14; Swords 121)

June 1 — 10:00 p.m. An ATIC official at Wright-Patterson AFB is driving west near Dayton, Ohio, when he sees a large, bluish-white light moving parallel to the car. It looks like a “stubby cigar.” After 15–20 seconds, it makes a right-angle turn, becomes circular, and rapidly disappears. Its speed is “faster than an airplane, slower than a meteor.” (UFOEv, p. 23)

June 19 — Day. Mechanic Joseph Matiszewski hears a whistling sound as he is walking in Sønderborg, Denmark, and sees an object land in a nearby meadow. Approaching to within 150 feet of it, he finds himself paralyzed and notices that birds have stopped singing and cows seem frozen in place. Four men with brown skin and wearing black shiny suits and translucent helmets emerge from the object and send Matiszewski some telepathic messages. Eight smaller objects are ejected from the large one and float above it. Other figures inside the craft and on its deck appear to be making repairs. The objects ascend to about 300 feet and climb rapidly after that. The paralysis subsides. (Patrick Gross, *URECAT*, July 1, 2007)

June 22 — *Life* magazine reporter Robert Emmett Ginna Jr. visits Air Technical Intelligence Center at Wright-Patterson AFB in Ohio for the first time to gather information on “Project Saucer” for an article. The visit is coordinated by Jack T. Shea, special assistant to the director of public relations. (Jan Aldrich; Michael D. Swords, “1952: Ruppelt’s Big Year,” *IUR* 28, no. 4 (Winter 2003–2004): 8)

June 25 — The UK Flying Saucer Working Party is disbanded. (Good Need, p. 152)

Summer — A dubious story surfaces in 1956 that three UFOs had appeared above Mexico City International Airport at the same time as a visit by US Secretary of Defense George C. Marshall. (However, there is no record of a visit by Marshall at this time; apparently his first visit to Mexico was a vacation in Cuernavaca in February 1952.) According to the story, Marshall tells a “highly placed American” and “prominent medical scientist” that UFOs are interplanetary and friendly, but they have crashed accidentally on three occasions. In 1965, the American informant is revealed to be Rolf Alexander, who is in fact Allan Alexander Stirling, a New Zealand seaman who had jumped ship in 1920 and entered the US illegally. To support himself he promoted various dubious health cures while concocting a fictitious personal history. His activities were interrupted by prison sentences for mail fraud and embezzlement, and in 1954–1960 he claimed the ability to break up clouds with his psychokinetic abilities. (“Let’s Talk Space: ‘Flying Saucers’ Are Real,” Flying Saucer Review 2, no. 1 (Jan./Feb. 1956): 2–4; “Rolf Alexander, M.D.,” *Flying Saucer Review* 11, no. 2 (Mar./Apr. 1965): 9; RosRept, p. 99)

July — The radiation-counter network set up at Oak Ridge National Laboratory, Tennessee, in December 1950 by Lt. Col. John R. Hood hits paydirt when a UFO appears, sighted both visually and on radar over the facility. He finds that the radiation counters have detected a significant rise in some kind of emission. Hood wants to expand the equipment, adding a debris-catching pursuit plane. However, information is lacking on this case and any follow-up. (Loren E. Gross, *UFOS, a History: Volume 8, 1951*, The Author, 1983, p. 42)

July 1 — 10:50 p.m. Four night pilots of the 1st Marine Aircraft Wing in different areas around Seoul, Korea, simultaneously report a large green ball, very bright and trailing streaks of red then blue, passing overhead at 10,000–15,000 feet. (Haines, *Korea*, p. 31; Sparks, p. 106)
July 4 — 10:00 p.m. Future ufologist Irena Scott and her sister Sue are sleeping at their home in Galena, Ohio, when they wake to see a small glowing light circling their bedroom in a meandering movement, but never bumping into anything. It circles the room three times, maintaining the same shape, brightness, and size (less than one inch). After a few minutes, it moves in tight circles around the chandelier, then spirals downward, makes a noise, and emits tiny lights. Terrified, they rush out of the room and tell their father, who inspects the room but finds nothing. (Irena Scott, “Bedroom Light,” IUR 13, no. 2 (March/April 1988): 14–15)

July 14 — Morning. During a guided missile launch, two radar operators at White Sands Missile Range, New Mexico, catch a fast-moving object on their scope. At the same time, a tracker watching a B-29 with binoculars sees a large UFO near the bomber. Another observer sights the UFO and, with a 35mm camera, shoots 200 feet of film. The UFO shows on the film as a round, bright spot. The film has never been released. (NICAP, “White Sands Radar/Visual”; Sparks, p. 107; Project 1947, “Radar and Visual UFO Sighting, White Sands Missile Range, New Mexico—July 14, 1951”; Good Above, pp. 354–355)

July 25 — Personnel at Holloman AFB, New Mexico, write a report compiling the results of an organized skywatch of UFOs at the base. Several photos are taken. The report does not conclude what the objects are, but it does establish that some kind of objects have been seen. (“Status of Project Blue Book,” T52-6888, [1952], p. 1)

August — In an article in Popular Science, the editors ask UFO witnesses what they think the objects are. About 70% believe they are intelligently controlled devices, either man-made or extraterrestrial. (“What Were the Flying Saucers? Eyewitnesses Believe They Saw Secret Aircraft,” Popular Science 159 (August 1951): 74–75, 228)

August 3 — 11:00 p.m. Walter N. Webb, nature counselor at Camp Big Silver on the shore of Silver Lake in southern Michigan, 3 miles south of Pinckney, is showing two boy campers some celestial objects through a reflecting telescope. He sees a glowing, yellowish light moving westward at a low elevation in an undulating path over hills to the south. It disappears behind the hills before he can train his telescope on it. (UFOEv, p. 50)

August 11 — Former USAF pilot Robert O. Dodge watches three disc-like UFOs in formation over Portland, Oregon. (UFOEv, p. 34)

Mid-August — 10:30 a.m. Mining engineer Alfred Roos hears a swishing sound at his ranch 10 miles east of Silver City, New Mexico. He looks up and sees two lens-shaped UFOs swooping at tremendous speed then hovering. They go back and forth between his location and Fort Bayard, two miles to the northwest, where they finally disappear into a cloud. (UFOEv, p. 56)

Mid-August — Midnight. A witness is on his porch in Waco, Texas, looking at the sky when he sees a V-shaped formation of 10–20 round, luminous objects silently pass over from west to east in a matter of seconds. (Lorenzen, UFOs: The Whole Story, Signet, 1969, pp. 41–42)

August 17 — 11:30 a.m. Otto Bock, a German scientist with a specialty in optics who came to the US as part of Operation Paperclip, observes a high-altitude, metallic object through his 20x telescope for about 4 hours. He says the sighting is confirmed by four other persons. (Project 1947, “Letter to Donald Keyhoe: Otto Bock, August 22, 1951”)

August 20 — The CIA, approved by DCI Roscoe Hillenkoetter, starts Project ARTICHOKE to study hypnosis, morphine addiction, and LSD to produce amnesia and other vulnerable states in subjects, as a way of exploring interrogation methods. (Wikipedia, “Project ARTICHOKE”; [Central Intelligence Agency], “Project Artichoke,” declassified?), January 31, 1975)

August 23 — Frank Wisner succeeds Allen Dulles as CIA Deputy Director of Plans in the Office of Policy Coordination, with Richard Helms as chief of operations. In this position, Wisner is instrumental in supporting pro-American forces that toppled Mohammed Mossadegh in Iran in 1953 and Jacobo Árbenz in Guatemala in 1954. Sometime this year he visits Richard M. Bissell Jr. and asks him to finance OPC operations by diverting some Marshall Plan funds, presumably for covert black ops. (Jacobsen, Area 51, pp. 45–46)

August 25 — Evening. Joseph Bryant and his wife, at 407 West Powell Street, Brownfield, Texas, see a loose group of glowing lights heading north to south. They are a “little bigger than a star.” A few minutes later a second group flies over, and then a third, which circles around the house. This time Bryant can hear them, and he identifies
August 25 — 9:10 p.m. Three Texas Technical College professors (geologist Wilbur Irvin Robinson, chemist Aaron Gustav “Gus” Oberg, and petroleum engineer William Lyon Ducker Jr.) are sitting in a backyard at Lubbock, Texas, when they see a fast-moving, semicircular formation of 20–30 lights, as intense as bright stars but larger. Blue-green and silent, they move across the sky in seconds. A second group appears and repeats the performance. Others, including Carl Hemminger at Texas Tech, report seeing the same objects the same night. J. Russell Heitman, head of the Texas Tech journalism department, says he had seen an identical group of lights several days earlier. The professors watch 10–12 such flights through November 1 (including on September 1 and 5), sometimes accompanied by colleagues Ellis Richard Heineman, E. F. George, Grayson Mead, and John Brand. Some researchers, including Ruppelt and Hynek, think the witnesses are seeing migrating plovers attracted to Lubbock’s new vapor street lights, although Ruppelt changes his mind later. (Wikipedia, “Lubbock Lights”; NICAP, “The Lubbock Lights / Carl Hart Photos”; Clark III 688–690; Loren E. Gross, UFOs, a History: Volume 8, 1951, The Author, 1983, pp. 45–55; Swords 130–132; “Lubbock 1951,” Texas UFO Museum and Research Library, November 15, 1999)

August 25 — Around 9:58 p.m. Hugh Young, a security guard at Sandia Base, and his wife Emily are in their trailer home in east Albuquerque, New Mexico, and watch a large object like a flying wing, but 1.5 times as large as a B-36, flying at 80 feet at about 300 mph. It has glowing white lights on the trailing edge of the wing and is completely silent. (NICAP, “Flying Wing over Sandia Base”; Clark III 691; Sparks, p. 108)

August 26 — 8:28 p.m. A radar station at Larson AFB [now Grant County International Airport], near Moses Lake, Washington, tracks a UFO at 13,000 feet going 950 mph on two different sets, AN/CPS-1 and AN/CPS-4, for about 6 minutes. An F-86 is scrambled, but radar contact is lost before the plane gets off the ground. An electronic signal is received from this object that appears to be a mode-one IFF response from an AN/APX-6 transponder. This response is received twice at approx. 115 miles and 80 miles from the radar station. (NICAP, “Two Radars Track 900 MPH Target; Clark III 692; Ruppelt, pp. 96–98, 108–109; Sparks, p. 108)

August 27 — At a conference at Holloman AFB, New Mexico, on the green fireballs, Project Twinkle’s Maj. Edward A. Doty expresses skepticism about the project. Meteorologist Bernard “Duke” Gildenberg tells those assembled that he has never seen anything out of the ordinary, nor has astronomer Clyde Tombaugh. The commanding officer at Holloman wants to cease allocating funds for the project. (Clark III 545)

August 28 — Project Twinkle personnel talk to LaPaz about the green fireballs and he insists they are not meteors. (Clark III 545)

August 30 — 11:30 p.m. A Texas Tech freshman named Carl Hart Jr. sees the same formation of 18–20 lights over Lubbock, Texas, and takes five photos. He gets the roll of film developed the next day and takes it to the Lubbock Morning Avalanche, which puts them out on the Associated Press wire. ATIC examines the photos and notes that the “two rows of spots behaved differently. One row only shows slight variation from a precise V formation throughout, whereas the other now appears to pass from above the first row, through it to a position below.” Biologist James Cecil Cross looks at the Lubbock photos under a microscope and rules out the bird explanation. See also Life, Apr. 7, 1952. While investigating the Lubbock Lights, Ruppelt also learns that several people in and around Lubbock claim to have seen a “flying wing” moving over the city. Among the witnesses is the wife of Dr. Ducker, who reports that in August 1951 she observed a “huge, soundless flying wing” pass over her house. Ruppelt knows that USAF does possess a “flying wing” jet bomber, and he feels that at least some of the sightings are caused by the bomber, although he cannot explain why, according to the witnesses, the wing makes no sound as it flies overhead. Ruppelt says that in addition to Project Grudge investigators, another group of people who, “because of their association with the government, had complete access to our files” (scientists convinced of the ETH) were also looking into the Lubbock cases. In March 1955, Ducker sends Ruppelt a telegram indicating that he has figured out that the lights are a “natural phenomenon” and requests no further publicity in his book. However, Texas Tech mathematics professor Ralph Sylvester Underwood has also observed three flights and estimates the objects are at 2,000 feet altitude and flying at 700 mph—much too fast for birds. (NICAP, “The Lubbock Lights / Carl Hart Photos”; “‘Flying Whatsis’ Stir Dispute in Area,” Lubbock (Tex.) Morning Avalanche, September 6, 1951; Clark III 690–693; Ruppelt, pp. 96–110; Kevin D. Randle, “Carl Hart and the Lubbock Lights,” IUR 18, no. 5 (Sept./Oct. 1993): 17–19; Michael D. Swords, “Classic Cases from the APRO Files,” IUR 24, no. 2 (Summer 1999): 22; “Lubbock 1951,” Texas UFO Museum and Research Library, November 15, 1999; Donald R. Burleson, “New Findings on the Lubbock Lights,” IUR 26, no. 2 (Summer 2001): 3–5; “Lubbock Lights and Roswell,” Texas UFO Museum and Research Library, December 7, 2005; Michael D. Swords, “Can We Learn Anything from UFO Photos? Part Five,” The Big Study, July 15, 2012; Swords 131–132)
August 31 — 12:45 p.m. Mrs. Tom Tilson and one or two other women are driving north on Hwy 70 near Matador, Texas, when they see to the west a pear-shaped object the length of a B-29 fuselage (100 feet). It is aluminum or silver-yellow with a port or some type of aperture on the side, and it moves with its smaller end forward, drifting slowly at about 150 feet altitude. It then shoots up in a circular fashion and out of sight after a few seconds. (Clark III 692; Sparks, p. 109)

September 9:00 p.m. Louise McDougall is sitting on the lawn outside her trailer park in Bloomington, California, when she has the feeling someone is watching her. She looks up and sees a flying saucer hovering some 20 feet up. It is lenticular, perhaps 100 feet in diameter, and dull silver metallic in appearance. There are tall, rectangular windows in its lower half, in which can be seen against an amber glow four men, in one-piece “jump suits,” with shoulder-length hair. She turns a spotlight on the saucer, whereupon it shoots off silently at incredible speed. About 15 minutes later it returns, hovering in the same spot, the figures still visible at the windows. After 6 or 7 minutes, it takes off again to the southeast. McDougall’s husband and three other people also see it. (Clark III 267; Patrick Gross, URECAT, September 15, 2006)

September 6 — The Air Force issues JANAP 146(B), “Communications Instructions for Reporting Vital Intelligence Sightings from Aircraft.” All UFO reports are to go to the Air Defense Command in the Pentagon (which presumably will send them to AMC at Wright-Patterson AFB in Ohio), the Secretary of Defense, and to the nearest US military command. (Swords 123)

September 10 — 11:10 a.m. At the Army Signal Corps radar center at Fort Monmouth [now closed], New Jersey, a student operator demonstrating radar functions to a group of visiting officers picks up a target that is moving too fast to be tracked automatically. The object seems to be following the coastline. He follows it off and on for 3 minutes, after which it disappears to the northeast, flying at 700 mph. About 25 minutes later, a T-33 jet trainer piloted by Lt. Wilbert S. Rogers, with Maj. Edward Ballard as passenger, spots a “silver-colored object about the size of a fighter plane” flying at 900 mph at 5,000–8,000 feet over Sandy Hook. It makes a 90° banking turn and disappears out to sea. At 3:15 p.m., a second radar tracking occurs, but this slower object turns out to be a balloon. (NICAP, “The Fort Monmouth Radar Incident”; NICAP, “The Sandy Hook / T-33 Incident”; James E. McDonald, “Statement on Unidentified Flying Objects,” in Symposium on Unidentified Flying Objects, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, p. 66; Clark III 513–515; Sparks, p. 110; Thomas Tulien, ed., Proceedings of the Sign Historical Group UFO History Workshop, Sign Historical Group, November 2001, pp. 45–46; Swords 124–127; Good Above, pp. 269, 487)

September 11 — 10:50 a.m. Two radars at Fort Monmouth, New Jersey, pick up another object moving at 1,000 mph. At 1:30 p.m., another radar target appears, apparently hovering. Overcast conditions prevent a visual sighting. The radar then shows it ascending at a rapid rate then streaking to the south at 700+ mph. (Clark III 514)

September 12 — Fort Monmouth, New Jersey, officials send ATIC and USAF headquarters a three-foot-long teletype describing the sightings. ATIC’s new chief, Col. Frank Dunn, gets a wire from Gen. Charles Cabell, who wants somebody from ATIC to find out what’s going on. Dunn sends Lt. Jerry Cummings (head of Project Grudge) and Lt. Col. Nathan R. Rosengarten (chief of the ATIC Aircraft Performance Section). (Clark III 514–515; Ruppelt, pp. 93–94; Swords 126; Good Need, pp. 164–165)

September 13 — 9:30 p.m. T/Sgt Warner B. Maupin and Cpl. John W. Green track two objects on radar at Goose Bay AFB [now CFB Goose Bay], Labrador, on a collision course. One of them tries to warn the supposed aircraft of an imminent collision and is surprised to watch one avoid danger by moving to the right. A third unidentified target joins the other. The incident lasts more than 15 minutes. (Chris Rutkowski and Geoff Dittman, The Canadian UFO Report, Dundurn Press, 2006, p. 53; Sparks, p. 110; Chris Rutkowski, Canada’s UFOs: Declassified, August Night, 2022, p. 261)

September 18 — The Day the Earth Stood Still, directed by Robert Wise and starring Michael Rennie and Patricia Neal, premiers in New York City. The ultimate flying saucer science-fiction movie, the plot revolves around an alien who lands in a UFO in Washington, D.C., and demands that atomic testing cease. Lock Martin, who is more than 7 feet tall, plays the robot Gort. (Internet Movie Database, “The Day the Earth Stood Still”)

September 18 — 10:20 p.m. USAF B-36 radar operator Maj. Paul E. Gerhart and navigator Maj. Charles J. Cheever are flying northwest at 239 mph over the Hudson Strait in northern Canada when they pick up radar interference coming from an unidentified aircraft moving away from them to the east about 32 miles away. The anti-jamming device on their radar is turned on at 11:20 p.m. but does not affect the jamming on the radar scope. At 11:35 p.m., a UFO is seen visually on the right side of the B-36, which is flying at 18,000 feet over southwest Baffin Island, Nunavut. The object has all-white “unconventional running lights” and two white flashing tail lights, travels about 35 mph faster than the B-36, crosses the front from right to left heading toward the north-northwest, and is in view about 20 minutes. While the object is still visible at 11:50 p.m., the B-36 autopilot and APQ-24 radar set
malfunction, the latter coming back a few minutes later when the object disappears. ECM operators S/Sgt. Donald E. Jenkins and S/Sgt. Doty T. Larimore on two B-36 flights over Labrador on September 19 detect carrier wave signals at several frequencies and some radar-like pulses at other frequencies, all below 1,000 MHz. (NICAP, “B-36 Radar Picks up Object Seen Visually”; Sparks, p. 111)

September 23 — At March AFB [now March Air Reserve Base] near Long Beach, California, two F-86 jets try to intercept an object in controlled orbit at around 55,000 feet, but they run low on fuel and have to land. Two more F-86s are scrambled, with the same results. Three of the pilots report seeing a “silver airplane with highly swept-back wings,” although one of them says the UFO looks round and silver. (NICAP, “Swept Wing Aircraft at above 50,000′/Tracked by GCI”; Ruppelt, pp. 94–95, 111, 113–114; Sparks, p. 112)

Fall — Navy pilot Lt. Cmdr. Marvin C. Davies is flying a plane off a CVE class aircraft carrier near Korea when the crew tracks a radar target 3 miles astern. The object has apparently been circling the fleet at an altitude of 5,000 feet and speeds of “slow” to 1,000 mph. The UFO has been tracked on 14 ship radars for 7 hours. It stops circling and takes up a position behind the plane’s wingman, remaining there 5 minutes, then departing at high speed. (Project 1937, “UFO Reports, Korea”; UFOEv, p. 84)

October — Per Sundh is appointed head of a unit at the Swedish Defence Staff responsible for investigating UFO reports. He remains in charge until October 1954. During that time the department handles 6,000 reports, of which 400 are investigated and 40 remain unexplained. Their astronomical consultant is Bertil Lindblad, an astronomer at Stockholm University, Sweden. Sundh says that his personnel always took even the weirdest observations seriously. (Swords 364–365)

October 1 — 10:00 a.m. At the Pentagon, Cummings and Rosengarten brief Cabell, his staff, and a representative from Republic Aircraft Corporation who “supposedly represented a group of top US industrialists and scientists.” The meeting is recorded with a wire recorder. Edward Ruppelt, later head of Project Blue Book, hears the recording before it is ordered destroyed and keeps detailed notes about the meeting. Cabell supposedly learns that Grudge is effectively dead and demands to know “who in hell has been giving me these reports that every decent flying saucer report is being investigated?” Cabell says there is a great deal of doubt in his mind as to what the saucers are and that the Grudge report is the “most poorly written, inconclusive piece of unscientific tripe” he had ever read. He orders Grudge to reactivate itself, and Cummings and Rosengarten go back to Wright-Patterson AFB in Ohio to do just that. (Clark III 514–515; Ruppelt, pp. 93–94; Swords 127–128, 501–502; Michael Hall, “When UFOs Were Serious Business: Then and Today,” IUR 28, no. 4 (Winter 2003–2004): 4)

October 4 — 2:00 a.m. Two French aviation officers are camped out several miles northwest of the village of Tessalit, Mali. A luminous dark-yellow disc approaches slowly from the east, loses altitude, makes a 90° turn, accelerates, and ascends at high speed. (Patrick Gross, “Tessalit, Mali, October 4, 1951”)

October 9 — 1:42 p.m. A fast-moving, silvery UFO shaped like a “flattened tennis ball” is sighted by a Civil Aviation Administration Chief Aircraft Communicator Roy Messmore at Hulman Municipal Airport [now Terre Haute Regional Airport], five miles east of Terre Haute, Indiana. At 1:45 p.m., private pilot Charles Warren, flying at 5,000 feet east of Paris, Illinois, sees a silvery “flattened orange” object that appears stationary to his left rear. It picks up speed and heads to the northeast. Project Blue Book plots the sighting and concludes that both cases involve the same object. (NICAP, “October 9, 1951, Hulman CAA / Pilot Case”; NICAP, “Pilot Radios Terre Haute: Observes ‘Flattened Orange’”; Sparks, p. 114; Swords 129)

October 10 — 10:10 a.m. Engineer and pilot Joseph J. Kaliszewski, flying with copilot Jack Donaghue on a Skyhook balloon tracking mission for General Mills 10 miles east of St. Croix Falls, Wisconsin, notices a strange object crossing the sky from west to east, much higher and behind the balloon, which is at 20,000 feet. The UFO has a peculiar glow. It comes into sight at a slight dive, then levels off and slows down, makes a sharp left turn, climbs at an angle of 50–60° into the southeast with terrific acceleration, and disappears. It is seen for about 2 minutes. (NICAP, “The Kaliszewski Sightings”; UFOEv, p. 56; Sparks, p. 114)

October 11 — 6:30 a.m. Joseph J. Kaliszewski and Dick Reilly are flying at 10,000 feet north of Minneapolis, Minnesota, observing a balloon when they see a brightly glowing object to the southeast of the University of Minnesota airport moving at high speed from west to east. It has a halo around it with a dark under surface. It crosses rapidly, slows down, and starts to climb slowly in lazy circles. Observers Doug Smith and Dick Dorion at the General Mills tracking station at the University of Minnesota watch the object through a theodolite. They watch another object 2 hours later. (NICAP, “The Kaliszewski Sightings”; UFOEv, p. 56; Sparks, p. 114; James E. McDonald, “Statement on Unidentified Flying Objects,” in Symposium on Unidentified Flying Objects, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 44–45)

October 16 — 11:01 a.m. Air Force pilots flying three F-94 fighters out of McChord AFB [now Joint Base Lewis-McChord] and naval ground personnel see a round, gray object flying soundlessly at high speed and high altitude
west of Naval Air Station Whidbey Island in Oak Harbor, Washington. Photos taken from the F-94s show the object. After 50 minutes, the aircraft abandon the chase. The Air Force attributes the sighting to Venus. (NICAP, “3 F-94’s Encounter Round Grey Object / Photos Taken”; Clark III 391–392; Sparks, p. 115)

October 20 — Frank B. Jewett Jr., director of the Aeronautical Research Laboratory at General Mills Corporation, writes to Assistant Secretary of the Air Force Eugene M. Zuckert about UFOs seen by his personnel. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1951, Supplemental Notes, The Author, 2000, p. 51)

October 22 — Capt. Edward J. Ruppelt officially takes over a revitalized Project Grudge, relieving Lt. Jerry W. Cummings and 2d Lt. Henry Metscher. He learns from some scientists and engineers who visit ATIC frequently that “UFOs were being freely and seriously discussed in scientific circles.” (Ruppelt, p. 114; Sparks, p. 14; Clark III 933)

October 22 — The Directorate of Intelligence provides answers to the problem that Col. Harold Watson identified with the CIRVIS reporting system. (Michael Hall and Wendy Connors, “Flying Saucers: Behind the Cold War Veil of Military Intelligence (Part II),” European Journal of UFO and Abduction Studies 3, no. 1 (March 2002): 32)

October 30 — 6:40 a.m. A group of servicemen are preparing to observe the Buster Charlie atomic test at Area 7 of the Nevada Test Site. Just before the blast, they see at an altitude of a few thousand feet a formation of 18 silvery, rotating, disc-shaped objects, each with a dome, arranged in six groups of three stretched out in a horizontal row. They fly low over the test site, hover for 30–60 seconds, and depart at an angle, disappearing in seconds. (Nukes 68–71)

November — Maj. Gen. Cabell is promoted to staff director for the Joint Chiefs of Staff. He is replaced as director of Air Force Intelligence by Maj. Gen. John A. Samford. (Clark III 936)

November 2 — 7:15 a.m. The crew of an American Airlines DC-4 is flying east of Abilene, Texas, at 4,500 feet. They see a bright-green, projectile-shaped object, about the same size as their airliner, streak past at about same altitude and same easterly heading. The object leaves a trail then explodes, shooting red balls of fire in all directions. (Keyhoe, ES Conspiracy, pp. 92–93; Nukes 74–75; Sparks, p. 115)

November 3 — 9:00 p.m. A green fireball is sighted in Arizona, New Mexico, Texas, and Oklahoma. Capitol Airways pilot H. R. DeHoney is flying at 11,000 feet about 20 miles south of Flagstaff, Arizona, watches the object speed by as a bright blue-green ball that leaves a streak of brilliant red fire. (Nukes 75–76; “Mystery Meteor Startles NM. Arizona,” Santa Fe New Mexican, November 4, 1951, p. 13)

November 6 — Ruppelt flies to Reese AFB [now Reese Technology Center] in Lubbock, Texas, to begin his investigation of the Lubbock lights, accompanied by OSI agent Howard Bossert. (Clark III 691)

November 7 — Evening. A steamship captain and crew watch an elongated orange object with six glowing “portholes” speed toward Ontario over Lake Superior. (UFOE, p. 146)

November 8 — Ruppelt and an officer from Reese AFB visit Brownfield, Texas, to investigate UFO sightings there. (Clark III 691)

November 9 — Since October 30, seven green fireballs of exceptional size have been seen over a seven-state area in the American Southwest. Lincoln LaPaz, director of the University of New Mexico Institute of Meteoritics, says that frequency is exceptional: “In fact, there has never been a rate of meteorite fall in history that has been one fifth as high as the present fall. If that rate should continue, I would suspect the phenomenon is not natural.” The fireballs travel in straight lines and are completely silent. (“Southwest’s 7 Fireballs in 11 Days Called ‘Without Parallel in History,’” New York Times, November 10, 1951, pp. 1, 14; Nukes 76–79)

November 11 — 8:45 p.m. Thomas Bartis and his older brother Francis are driving through New Haven, Connecticut, when they see a huge yellow fireball with a greenish-blue tail streak through the sky. Probable bolide. (“Second Fireball Is Sighted,” Meriden (Conn.) Record-Journal, November 12, 1951, pp. 1, 10)

November 20 — 6:42 p.m. A vivid green fireball is reported from Dodge City, Kansas, and Lubbock and Big Springs, Texas. Two Air Force pilots landing at Kirtland AFB, Albuquerque, New Mexico, and a Trans World Airlines pilot also see the fireball. (Nukes 78)

November 24 — 3:53 p.m. Air Force Capt. William Fairbrother is flying a P-51 over Mankato, Minnesota, at 25,000 feet when he sees a white object shaped like a flying wing. It hovers at first, then it passes 100 feet above and to the left of his aircraft. He immediately turns to follow but loses sight of it. (Sparks, p. 115)

November 24 — 6:24 p.m. A Capital Airlines Flight 94 pilot and several control tower and other ground observers in four different locations in Michigan (Grand Rapids, Coopersville, Battle Creek, and Selfridge AFB near Mount Clemens) see a large round object flying west at 500–1,000 feet at about 1,000 mph. (Sparks, p. 116; Swords 130)
November 27 — Geophysicist Louis Elterman releases the final report on Project Twinkle. Basically, it admits that the low frequency of occurrence of the fireballs does not justify the $50,000 a year required for a useful monitoring facility. It speculates that “the earth may be passing through a region in space of high meteoric population. Also, the sun-spot maxima in 1948 perhaps in some way may be a contributing factor.” (Louis Elterman, Project Twinkle Final Report. Atmospheric Physics Laboratory, November 27, 1951; Clark III 544–545)

December — Ed J. Sullivan, a technical writer for North American Aviation, holds a meeting of engineers, scientists, and journalists in Los Angeles, California, who have been following the UFO phenomenon. They form Civilian Saucer Investigation to collect reports and forward them on to ATIC. Its most prominent member is Walther Riedel, German rocket scientist retrieved by Project Paperclip. (Michael D. Swords, GrassRoots UFOs: Case Reports from the Timmerman Files, Fund for UFO Research, 2005, pp. 139–140; Clark III 241–242)

December 5 — Early morning. Swedish Prince Carl Bernadotte and a friend, Berl Gutenberg, are driving near Stockholm, Sweden, when they see a bright flash of light illuminate the sky. Bernadotte stops the car and opens the door to listen for sounds. They go immediately to the Stockholm Criminal Investigation Department, who reports the incident to the Security Police and the military UFO desk. The report is instantly classified, even though the object is probably a meteor. (Swords 366)

December 11 — Project Twinkle closes down. (Clark III 545)

December 12 — 3:50 p.m. USAF Capt. Donald “Deke” Slayton, flying a P-51 fighter at 10,000 feet, sees a whitish or gray object off his left wing about one mile away and 1,000 feet below his flight level about five miles southeast of Hastings, Minnesota. It looks like a kite at first, then like a weather balloon, then two rapidly revolving discs that overlap with centers about 1 foot apart. He attempts an intercept, but the UFO increases speed and disappears. (NICAP, “‘Deke’ Slayton / P-51 Encounter”; Sparks, p. 117)

December 19 — Ruppelt travels to the Pentagon with ATIC Chief Col. Frank Dunn. They visit with Maj. Gen. John A. Samford, who has replaced Cabell as USAF director of intelligence and who seems “familiar with the general aspects of the problem.” Samford’s aide, Gen. William M. Garland, tells them that ATIC has the sole authorization to carry out UFO investigations for the entire US military (not exactly true), and they discuss security problems posed by UFOs at sensitive installations. Ruppelt reveals that his preliminary analysis of UFO sighting patterns has uncovered a disturbing correlation of unexplained sightings around nuclear weapons facilities and highly classified nuclear stockpile sites and some SAC strategic air bases. Gen. Samford orders ATIC to conduct an exhaustive statistical study to verify Ruppelt’s findings. He attempts an intercept, but the UFO increases speed and disappears. (Ruppelt, pp. 115–116)

December 26–27 — Ruppelt and Col. Sanford H. Kirkland Jr. of ATIC meet with members of the Battelle Memorial Institute in Columbus, Ohio, and ask them to help out with the USAF evaluation of UFO reports: first, a study of witness perception and recall, then a statistical study of UFO reports. (“Seven Status Reports for Project Stork.” CUFON; Clark III 929)

1952

1952 — The Lawrence Livermore National Laboratory is established in Livermore, California, as an offshoot of the UC Radiation Laboratory at Berkeley. It is intended to spur innovation and provide competition to the nuclear weapon design laboratory at Los Alamos, New Mexico. Edward Teller and Ernest Lawrence, director of the Radiation Laboratory at Berkeley, are regarded as its cofounders. Los Alamos and Livermore soon establish a rivalry, fighting for weapons contracts and feasibility-study awards. (Wikipedia, “Lawrence Livermore National Laboratory”)

1952 — José Manuel Rodríguez Delgado, a Spanish physiologist at Yale University, coauthors what he claims is the first peer-reviewed paper describing deep-brain stimulation of humans. Over the next two decades, he implants electrodes in some 25 subjects. Most are schizophrenics and epileptics at the now-defunct State Hospital for Mental Diseases in Howard, Rhode Island, where Delgado’s occasional collaborator Hannibal Hamlin is a staff psychiatrist. Delgado is reticent discussing his experiments on humans. He is more enthusiastic recalling research
on monkeys, chimpanzees, and gibbons, which he kept both at Yale and in open-air compounds in the Bahamas and New Mexico. He explores the effects of stimulation not only on individuals but also on groups. In one demonstration, he implants a stimoceiver (a tiny electrode able to receive and transmit signals over FM radio waves) in a macaque who terrorizes his cage-mates. Delgado installs a lever in the cage that, when pressed, activates the stimoceiver in the bully and pacifies him. A female in the cage soon figures out the lever’s significance and yanks it often and with gusto. (John Horgan, “Tribute to Jose Delgado, Legendary and Slightly Scary Pioneer of Mind Control,” Cross-Check, Scientific American blog, September 25, 2017)

1952 — World War II air intelligence records are transferred from the Pentagon to Maxwell AFB in Montgomery, Alabama. This shift is probably why Blue Book’s Capt. Edward J. Ruppelt later cannot find anything about foot-fighters during his trips to USAF intelligence to locate reports not forwarded to ATIC. (Jan Aldrich)

1952? — An anonymous occupation soldier in Austria meets a diving suit–clad being who paralyzes him, pulls him inside a UFO, and flies him to an otherworldly place he takes to be Mars. He sees other humans who do not acknowledge him. Then he is returned to his base. (Prince George (B.C.) Citizen, December 11, 1957; Clark 2)

1952 — 6:30 a.m. A carpool of people on their way to work at United Airlines in San Mateo, California, observe five smaller objects merging with a much larger, diamond-shaped object. The big one is about 150–200 feet long, charcoal or gunmetal in color, and is hovering 50–75 feet above some salt flats. The UFOs are directly in front of them to the east, about 1,500–1,800 feet away. One of the witnesses, airplane mechanic Leonard L. Musel, said the smaller objects entered the large object through a “transparent tail or sleeve.” After they were aboard, the bigger UFO turned edgewise and zoomed off at a fantastic speed. (Herbert S. Taylor, “Satellite Objects: A Further Look,” IUR 29, no. 2 (Summer 2004): 7)

1952 — Night. USAF Pvt. Sinclair Taylor is on guard duty at Camp Okubo in Uji, on the southern outskirts of Kyoto, Japan, when he hears flapping sounds and sees what seems to be an enormous bird. As it gets closer to him, Taylor sees that it is a winged man well over 7 feet tall with a wingspread of 7 feet. Taylor fires at it repeatedly with his rifle and thinks he hit it, but he can’t find the body. (Clark III 778)

January — Jim and Coral Lorenzen found the Aerial Phenomena Research Organization in Sturgeon Bay, Wisconsin. Soon, a man claiming to have an intelligence background becomes an active supporter and tries to lead the Lorenzens into “metaphysical areas of research.” Coral Lorenzen rebuffs these attempts. She discovers what seem to be the impressions of an intelligence report about her on one of his letters. In the summer, two suspicious men posing as building contractors seem to be lurking around her home as well as the homes of the APRO treasurer and secretary the same day. (Lorenzen, Encounters with UFO Occupants, Berkley Medallion, 1976, pp. 1–2, 248–251; Clark III 49)

January — Some 74% of the CIA’s money goes toward covert operations. It has already infiltrated many US labor, business, church, university, and cultural groups, usually channeling the money through foundations. This year it begins HTILINGUAL, a secret project to intercept mail destined for the USSR and China. It also targets domestic peace and civil rights activists. It lasts until 1973, photographing 2 million envelopes and opening 215,000 letters. (Frank J. Donner, The Age of Surveillance: The Aims and Methods of America’s Political Intelligence System, Knopf, 1980; Jim Keith, Mind Control, World Control: The Encyclopedia of Mind Control, Adventures Unlimited, 1997; David Wise, The American Police State: The Government Against the People, Random House, 1976)

January 1 — 10:54 p.m. Warrant Officer W. J. Yeo (a master telecomm specialist) and Sgt. D. V. Crandell watch a silent, reddish-orange object circle and maneuver for nearly 9 minutes at RCAF Station North Bay, Ontario. It appears to be very large and travels at supersonic speed. (“Saucers’ Seen Here; 2 Sighted at RCAF Station,” North Bay (Ont.) Nugget, April 15, 1952, pp. 1–2; Yurko Bondarchuk, UFO Sightings, Landings, and Abductions, Methuen, 1979, p. 92)

January 3 — Brig. Gen. William M. Garland, Assistant for the Production of Intelligence, writes a secret memorandum for General John A. Samford that lays down the investigative shortcomings of Project Grudge and suggests policies and agendas for the immediate future. Garland mentions that the aircraft inventions and models by the Horten brothers had fallen into the hands of the Soviets at the end of World War II. (Brig. Gen. William M. Garland, “(Secret) Contemplated Action to Determine the Nature and Origin of the Phenomena Connected with the Reports of Unusual Flying Objects,” January 3, 1952; Swords 141–143; Kremlin 34)

January 6 — Contactee George Van Tassell, living at Giant Rock in the Mojave Desert near Landers, California, receives the first of many psychic messages from extraterrestrial starship commanders. This one is from “Luthunn, senior
in command of first wave, planet patrol, realms of Schare. We have your contact aboard 80,000 feet above this place.” Other messages soon come from Elcar, Clota, Totalmon, Latamux, Noma, Leekow, Luu, Oblew, Kerrull, Locktopar, Molca, Clatu, Hulda, Lata, Singba, and others. One of his contacts, Ashtar, will become a metaphysical superstar, and in the years ahead many contactees will channel communications from him. These aliens seek to raise humanity’s “vibrationary attunement” so that earthlings will not threaten the wise and peace-loving space people. Van Tassel reprints many of these messages in a misleadingly titled book, I Rode a Flying Saucer! (George W. Van Tassel, I Rode a Flying Saucer! The Mysteries of the Flying Saucers Revealed, New Age, 1952; Clark III 1218–1219)

January 8 — Battelle Memorial Institute in Columbus, Ohio, agrees to help out the Air Force with analyzing UFO reports. (Clark III 929)

January 20 — 7:20 p.m. Two master sergeants, both intelligence specialists, are walking down a street at Fairchild AFB near Spokane, Washington, when they notice a large, bluish-white, spherical object approaching from the east. It passes north of their position, traveling horizontally and silently, and disappears in the west. They notice it has a long blue tail. It travels underneath low cloud cover at 4,700 feet at 1,400 mph. (NICAP, “Large Sphere with Blue Tail at 500′” ; Ruppelt, p. 12; Sparks, p. 118)

January 21 — 9:50 a.m. A Navy pilot lieutenant commander in a TBM Avenger chases a white, dome-shaped object over Mitchel AFB [now closed] on Long Island, New York. It accelerates rapidly, makes a 180° turn, and heads out to sea. He estimates it is traveling at least at 300 mph. It looks like a parachute canopy and has a dark undersurface. Although there is a balloon in the area, but its flight path is completely different. NICAP, “TBM Chases Climbing and Accelerating Object”; Ruppelt, pp. 121–123; Sparks, p. 118)

January 22 — 12:20 a.m. At a northern Alaska outpost, Murphy Dome Air Force Station, radar captures a UFO traveling 1,500 mph at 23,000 feet. When an F-94 is sent to intercept, the target stops, slows down, reverses course, and heads directly for the radar station. It comes within 30 miles, then disappears from the screen. The F-94 heads back to refuel, and a second fighter is scrambled. This pilot gets a strong radar return. At first, the object is almost stationary, but then it dives suddenly, at which point ground radar picks it up again. A third F-94 is sent up, also tracks the object on radar, and close to within 900 feet. At this point, the pilot pulls away to avoid a collision, as the UFO is nearly immobile. Since none of the pilots obtained a visual sighting, the Air Force concludes that the radar returns are weather-related, although the pilots strongly dispute this. (NICAP, “Alaskan Radar Case”; Ruppelt, pp. 123–127; Sparks, pp. 119–120)

January 29 — On his trip to the Pentagon to brief Gen. William M. Garland, Ruppelt visits the AFOIN offices and discovers they have more complete files than ATIC in Dayton, Ohio, does. He arranges to have copies made of the missing files for him at Project Grudge (though multiple visits are required to obtain the copies and Ruppelt probably does not succeed in getting everything). The offices with UFO files include the Technical Capabilities Branch (TCB) of the Evaluation Division and the Collection Control Branch of the Collection Division. (NICAP, “The 1952 Sighting Wave”)

January 29 — Brig. Gen. William M. Garland, USAF Assistant for Production of Intelligence, and his staff are briefed at the Pentagon on the status of Project Grudge by Edward Ruppelt, who with his colleagues at ATIC has prepared sighting maps that show a concentration of cases at White Sands and Los Alamos, New Mexico; Killeen Base, Texas; Oak Ridge, Tennessee; and Dayton, Ohio (where Wright-Patterson AFB is situated). At this meeting, Garland introduces a new intelligence policy that emphasizes the use of instrumentation for intelligence collection, including the detection and tracking of UFOs (the basis for terminating Project Blue Book as an intelligence function). As an interim last-chance measure to prove whether anecdotal sightings have any value, Garland approves Ruppelt’s publicity plan to draw in UFO reports from the public so that triangulations might be obtained. This leads to Garland secretly backing the Life magazine article. Apparently on the same day, Garland gives the welcoming address to the secret MIT Lincoln Laboratory (Ruppelt calls it the Beacon Hill group) in Cambridge, Massachusetts, where he tells the assembled scientists to study ways USAF intelligence methodology can be revolutionized through the use of technology. (Later Garland sends Ruppelt, Col. Sanford H. Kirkland Jr. of ATIC, and Lt. Col. William A. Adams of AFOIN, to brief the Lincoln Lab scientists on UFOs on March 26 and in April 1952, respectively) (“Status of Project Blue Book,” T52-6888, [1952]; NICAP, “The 1952 Sighting Wave”; Swords 144; Loren E. Gross, UFOs, a History: 1952, January–May, The Author, 1993, p. 12)

January 29 — Evening. Violet M. Winstead and her husband are at an open-air movie theater on Guam when they and others at the theater see an orange light passing silently overhead. (Violet M. Winstead, Letter, IUR 9, no. 1 (Jan./Feb. 1984): 3)

January 29 — Night. A bright orange, disc-shaped object, also described as a “huge ball of fire,” paces two B-29s on the same night, 80 miles from each other over the towns of Wonsan and Sunchon, North Korea. (NICAP, “Rotating
February 2 — 7:35 p.m. Radar operators aboard the aircraft carrier USS Philippine Sea pick up an unidentified target off the east coast of Korea. It is first detected at a distance of 25 miles; when it closes to 20 miles, it makes a wide turn to the east directly away from the carrier, accelerating from 600 to 1,800 mph at 52,000 feet altitude. It splits into two targets 5–12 miles apart on a slightly zigzag course to the north. They disappear about 110 miles away. Observers on the carrier see three exhaust flames. (NICAP, “USS Philippine Sea Tracks Approaching Target”; Hynek UFO Report, pp. 126–127; Sparks, p. 121)

February 8 — Dewey Fournet, on the Pentagon’s UFO desk, writes to Ruppelt at ATIC for help in interpreting the Korean sightings. Ruppelt has brought in an expert from Wright-Patterson AFB’s Engineering Division, Peter A. Stranges of the Propulsion Branch Power Plant Group, to help with the analysis, which he passes on to Fournet and Garland. Stranges compares the Wonsan sightings to the foo fighters of World War II. (Swords 144–145).

February 20 — 3:00 p.m. Rev. Albert Baller is sitting in a train at the station in Greenfield, Massachusetts, when he sees a “sharp flash of light about 35° or more above the horizon.” Looking upward, he sees three perfectly circular, silver objects approaching in a V-formation. They are moving at about the “speed of a second hand on a watch.” They stop and hover for 10 seconds. The lead object reverses and pulls into a line with the other two between them. Then they depart in a direction at right angles to their approach. (UFOEv, p. 69)

February 22 — The now-completed Site Able is renamed Manzano Base, New Mexico, and turned over to the operational control of the Air Force. What appear to be secure bunkers are visible to people (mostly military personnel) who go to a recreational camping area nearby known as Coyote Canyon. The military, however, never officially confirms the nature of the activities at Manzano Base [now part of Kirtland Air Force Base]. At one point, a military spokesman says that Manzano Base has nothing to do with Sandia Base. Manzano has since been identified as the first of six original National Stockpile Sites for nuclear weapons. The other original NSS installations similar to Manzano are: Site Baker at Killeen Base, adjacent to Gray AFB [now Robert Gray Army Airfield] at Fort Hood, Texas; Site Charlie at Campbell AFB [now Campbell Army Airfield] near Hopkinsville, Kentucky, and adjacent to Fort Campbell; Site Dog at Bossier Base, adjacent to Barksdale AFB near Bossier City, Louisiana; Lake Mead Base, adjacent to Nellis AFB, Nevada; and Medina Base, adjacent to Lackland AFB [now Joint Base San Antonio], Texas. (Wikipedia, “Sandia Base”)

February 23 or 24 — 11:15 p.m. The navigator on a B-29 bomber sees a pulsating bluish cylinder while the aircraft is evading antiaircraft fire near Sinuiju, North Korea. It arrives high and fast, makes several turns, and levels out underneath the aircraft. (Sparks, p. 122)

February 25–27 — Life magazine reporter Robert Emmett Ginna Jr. visits USAF headquarters at the Pentagon to gather information for his UFO article. He talks with Brig. Gen. Joseph F. Carroll, Director of Special Investigations. Brig. Gen. William M. Garland tells him that he has considered firing a guided missile at a UFO to bring it down and requests that Ginna delay publishing an article until the Air Force has come to a more definite conclusion. Ginna also talks to Lt. Col. Doyle Rees of OSI. (Jan L. Aldrich, “Have We Visitors from Space?” Project 1947)

March or April — 5:00 a.m. Two women cryptographers in the US Naval Reserve stationed at the US Naval Training Center at Port Deposit, Maryland, are out taking a walk outside the base on a dirt road. They notice a red light off to one side above the trees. It starts moving toward them and stops about 100 feet above the road in front of them, about 300 feet away. The object is a 250-foot black disc with two large red lights at each side, an illuminated
dome, and smaller lights along the rim. A hole opens in the bottom and phosphorescent white sparks drop toward the ground and disintegrate when they hit the road. The two reservists sprint the quarter-mile back to the base. (NICAP case file)

March 1 — The 4602nd Air Intelligence Service Squadron is activated under ADC to collect air combat intelligence. (CUFON, “4602d AISS Unit History Sampler”)

March 3 — Robert Emmett Ginna Jr. of Life visits ATIC at Wright-Patterson AFB in Dayton, Ohio, to obtain material for his UFO article. Walther Riedel, former German rocket scientist at Peenemünde, Germany, tells Ginna he has kept notes on UFO sightings from all over the world: “I am completely convinced that they have an out-of-world basis.” He also meets with visits Air Force UFO spokesman Albert M. Chop. AMC claims it is investigating every serious UFO report, but it can’t find the files he requests. Ginna becomes suspicious. (“Status of Project Blue Book,” T52-6888, [1952]; Jan L. Aldrich, “Have We Visitors from Space?” Project 1947; Michael D. Swords, “1952: Ruppelt’s Big Year,” IUR 28, no. 4 (Winter 2003–2004): 9; Swords 120–121)

March 5 — The Air Force sends a letter, signed by Lieut. Gen. Nathan Twinning, to Secretary Finletter in response to Sen. Russell’s February 21 inquiry. It offers two possible explanations: aircraft exhaust from a Soviet Lavochkin La-9 or La-11 fighter aircraft, or spotlights carried on enemy aircraft that have intercepted US bombers. (Project 1947, “UFO Documents, 1952, Korea”; Swords 145)

March 7 — Physicist Joseph Kaplan visits ATIC to discuss methods of obtaining more information on green fireballs using a special diffraction grid to be placed on patrol cameras that can be used as a field spectrometer. (“Status of Project Blue Book,” T52-6888, [1952])

March 10 — 6:45 a.m. Clarence K. Greenwood, inspector of engineering metals, sees two dark objects come from behind him at an altitude of 5,000–7,500 feet while he is waiting for a bus in Oakland, California. They pick up speed, one of them moving in a pendulum-like motion. He thinks they are about 45 feet long. (UFOEv, pp. 56–57)

March 14 — Evening. US Secretary of the Navy Dan A. Kimball is flying to Hawaii when he sees two discs moving at 1,500 mph. The UFOs circle his plane twice, then move on 50 miles east to another Navy plane carrying Adm. Arthur W. Radford. The UFOs circle Radford’s plane then zoom up out of sight. Kimball sends a report to the Air Force, but hears nothing back, despite USAF demanding reports from all Navy witnesses. Kimball threatens to initiate Naval reports on UFOs through ONR to be kept separate from purse, but it can’t find the files he requests. Ginna becomes suspicious. (“Status of Project Blue Book,” T52-6888, [1952])

March 19 — Ruppelt and other representatives of ATIC meet with the commander of the Air Defense Command, Gen. Benjamin W. Chidlaw, and Gen. Grandison Gardner and his staff in Colorado Springs, Colorado, on getting radar scope camera films as UFOs are being tracked. “They agreed with it in principle and suggested that I work out the details with the Director of Intelligence for the ADC, Brigadier Gen. Woodbury M. Burgess.” Chidlaw promises to issue a directive to all units explaining procedures in UFO situations, including the scrambling of interceptors. This is issued, apparently in April. Burgess assigns Maj. Vernon L. Sadowski of his staff to be liaison to Project Grudge, and the Ground Observer Corps is brought into the UFO reporting net. (Ruppelt, pp. 128–129; “Status of Project Blue Book,” T52-6888, [1952])

March 25 — Project Grudge becomes a separate organization under the title Aerial Phenomena Group and is renamed Project Blue Book, apparently by Lt. Col. Charles Cooke, which he thinks has “no overtones.” Ruppelt says it is based on the books provided for taking college tests at Iowa State University. (Loren E. Gross, UFOs, a History: 1952, January–May, The Author, 1993, pp. 20–21; Sparks, p. 12; Ruppelt, p. 131; Clark III 916)

March 26 — Day. Henry C. Davis is looking out at the ocean through his second-floor window in Long Beach, California, and listening to the radio. He spots two yellow discs in the sky about one mile high and 2 miles away. He thinks they are 1,000 feet apart and moving southeast to northwest at 100 mph. As they pass, his radio goes to static twice. (Schopick, p. 78)

March 26 — Ruppelt meets with the MIT scientists he calls the Beacon Hill Group, which recommends that Blue Book use “sound detection apparatus” in areas of UFO activity. (Clark III 916)

March 26 — Five trials are conducted through April 21 by the US Army Chemical Corps under Operation Dew. The tests release zinc cadmium sulfide along a 100-to-150-nautical-mile line approximately 5–10 nautical miles off the coast of Georgia, North Carolina, and South Carolina. Two of the trials disperse clouds of zinc cadmium sulfide over large areas of all three states. The tests affect over 60,000 square miles of populated coastal region. The Dew I releases are from a Navy minesweeper, the USS Tercel. The conclusion is that long-range aerosol clouds can obtain hundreds of miles of travel and large-area coverage when disseminated from ground level under certain meteorological conditions. (Wikipedia, “Operation Dew”)
March 29 — 11:20 a.m. Near Misawa, Japan, USAF Lt. David Conant Brigham is flying a T-6 target plane on a practice intercept mission for two F-84s. The first F-84 overtakes him at 6,000 feet when the T-6 pilot notices a small disc gaining on the interceptor. The UFO curves toward the F-84, decelerates rapidly, then flies on edge in a 90° bank. It flies between the two aircraft, pulls away, flips again, passes the F-84, crosses in front, and accelerates out of sight in a near vertical climb. Both pilots notice the object, which comes within 30–50 feet of the T-6. The pilot estimates it is only 8 inches in diameter. There is a ripple around the edge. (NICAP, “Brigham/T6 Case: UFO Makes Pass at F-84”; UFOEv, p. 5; Keyhoe, FS from OS, p. 192; Sparks, p. 123)

March 29 — Two fiery discs are sighted over the uranium mines in the southern part of the Belgian Congo near Elisabethville [modern Lubumbashi, Democratic Republic of the Congo]. With a diameter of approximately 36–45 feet, they travel in a precise and light manner, both vertically and horizontally. They emit hissing and buzzing sounds. Changes in elevation from 2,400 to 3,000 feet are accomplished in a few seconds. The discs often move down to within 60 feet of the treetops. A Commander Pierre of the Belgian Air Force sets out in pursuit in a fighter plane from the city airport. On his first approach he comes to within about 260 feet of one of the discs. Suddenly they hover in one spot then take off in a unique zigzag flight to the northeast at an estimated speed of 930 mph. Pierre gives up his pursuit after about 15 minutes. (NICAP, “Two Discs over Uranium Mines / Jet in Pursuit”; Sparks, p. 123; Good Above, p. 512)

March 29 — 6:40 p.m. Carl J. Henry, chairman of the Industrial Commission of Missouri, along with several others, watches a cylinder-shaped, silver UFO for 2 minutes almost directly overhead in Butler, Missouri. It is moving silently in a northwesterly direction leaving no trail or exhaust. He estimates its length at 100 feet. (UFOEv, p. 68)

March 29 — 10:45 p.m. Donald F. Stewart and George Tyler III are driving northbound on the Governor Ritchie Highway in Glen Burnie, Maryland. A 50-foot silvery domed disc with two portholes and an apparent hatch appears from the northeast and hovers above their car, causing the engine to fail, magnetizing the wiring, and cracking the paint. Stewart takes a sub-machine gun from the back of the car and debates whether to fire it at the object, which remains in view for 3 minutes before turning its edge and speeding away to the southwest. Tyler changes his story later, denying he was involved. Possible hoax. (NICAP, “E-M Effects on Car from Domed Disc”; Sparks, p. 124; Hynek UFO Report, pp. 196–198); Randle, Levelland, 2021, pp. 61–64, 229)

March 31 — ATIC Chief Frank Dunn writes to Gen. Garland requesting that Project Blue Book be entirely declassified in order to make it easier to encourage civilian pilots to send in reports. That is a bit too much openness for Garland, who compromises by reclassifying certain case investigations as “Restricted,” a relatively low level. (Swords 146)

April? — Amateur astronomer W. Gordon Graham sees a UFO “like a smoke ring, elliptical in shape, and having two bright pinpoints of light along its main axis” at London, Ontario. It sails overhead from west to east. (London (Ont.) Free Press, May 1, 1952; UFOEv, p. 49)

April — Secretary of the Navy Dan Kimball, upset with the way the Air Force has treated his UFO sighting, sets up an independent Navy probe of UFOs under Lt. Commander Fred Lowell Thomas of the Office of Naval Research. The project lasts through 1952, but probably not much longer. (NICAP, “Navy Secy Dan Kimball’s Pilot’s Sightings, March 14, 1952”)

April — Ruppelt again meets with MIT Lincoln Laboratory scientists (the Beacon Hill group) in Cambridge, Massachusetts, to brief them on Blue Book’s progress. Afterward, he asks them about the flashes seen on Mars in 1951, and a general discussion of life on other planets ensues. Michael D. Swords suspects that some of those present are physicist George Valley Jr., engineer Julius Adams Stratton, physicist Albert G. Hill, and chemical engineer Walter G. Whitman. (Edward J. Ruppelt, “Are There Men on Mars? Or Other Worlds?” IUR 23, no. 1 (Spring 1998): 10–12, 31)

April — Albert K. Bender, a factory worker in Bridgeport, Connecticut, announces the formation of the International Flying Saucer Bureau. (Clark III 189, 623)

April 2 — 9:00 a.m. While on a fishing trip to Lake Mead, Nevada, with his wife and M/Sgt Lester Gossett, M/Sgt Sheldon Smith observes a large silver UFO at a high altitude. It looks like a B-36 without wings. Smith observes it right after a flight of F-86s overfly the area at about 15,000 feet. After watching the hovering object for about an hour at a much higher altitude than the vapor trails from the F-86s, it suddenly disappears. ([NICAP, “**B-36 without Wings**”](https://www.nicap.org/intelPocketGuide))

April 3 — The Air Force publicly announces that it has not stopped investigating and evaluating UFO reports. April 7 — [Henry B. Darrach Jr.](https://www.jewishvirtuallibrary.org/jsource/Russians/Darrach.html) and [Robert Ginna](https://www.jewishvirtuallibrary.org/jsource/Russians/Ginna.html)’s article, “Have We Visitors from Space?” appears in *Life* and reports on the revitalized USAF project. It comes close to advocating the ETH, and its primary sources are high-ranking Air Force officers. (H. B. Darrach Jr. and Robert Ginna, “ *[Have We Visitors from Space?*](https://www.jewishvirtuallibrary.org/jsource/Russians/Darrach.html),” *Life*, April 7, 1952, pp. 80–96; [NICAP, “**Scholarly Commentary on LIFE Article of April 7, 1952**”](https://www.nicap.org/intelPocketGuide); Michael D. Swords, “1952: Ruppelt’s Big Year,” *IUR* 28, no. 4 (Winter 2003–2004): 8–9) April 7 — During war games taking place in the vicinity of Lampasas, Texas, nicknamed Operation Longhorn, the Air Force announces that a new “aerial light” attached to a B-26 aircraft is in use that makes an “attacking bomber look like a ball of fire in the sky.” It is essentially a bright magnesium searchlight (dubbed a “Hell Roarer” flare) that can illuminate a battlefield for nighttime photography. USAF Public Information Officer Capt. Irving Rappaport implies it could be mistaken for a flying saucer. (“*[Light Makes Bomber Resemble Ball of Fire*],” *Chambersburg (Pa.) Public Opinion*, April 7, 1952, p. 3; “*[It’s No Saucer! Strange Objects in the Sky Are Nothing New in Dayton*],” *Dayton (Ohio) Daily News*, November 9, 1952, magazine supplement, p. 7; Curt Collins, “*[UFOs: Confusing the Public*],” *The Saucers That Time Forgot*, January 27, 2022) April 12 — 8:30 p.m. W/O E. H. Rossell and Flight Sgt. Reginald McRae are driving on RCAF Station North Bay, Ontario, when they see a bright amber disc arrive from the southwest, move across the airfield, stop, and then take off in the opposite direction at an angle of 30° at terrific speed. ([NICAP, “**Amber Disc Stops, Reverses Direction**”](https://www.nicap.org/intelPocketGuide); [Yurko Bondarchuk, *UFO Sightings, Landings, and Abductions*, Methuen, 1979, pp. 92–94]) April 16 — ADC becomes frantic about a possible Soviet attack. Air Force Intelligence warns Brig. Gen. [Woodbury Burgess](https://www.jewishvirtuallibrary.org/jsource/Russians/Burgess.html), at ADC Headquarters, Ent AFB [now the US Olympic Training Center] in Colorado Springs, Colorado, that a classified source (possibly an electronic intercept) has provided an “indication” of ominous Soviet military activity. With the simultaneous appearance of two waves of unidentified targets, there is no alternative. At 3:10 a.m., ADC Commander Gen. [Frederic H. Smith Jr.](https://www.jewishvirtuallibrary.org/jsource/Russians/Smith.html), orders America’s first nationwide Air Defense Readiness alert. ([NICAP, “**UFOs and Alert Scare, April 1952**”; “**Radar Scare**,” Miami (Fla.) Herald, April 19, 1952, p. 23; “*[3 Plane Vapors Cause Alert at Alaska Stations*],” *Long Beach (Calif.) Independent*, April 18, 1952, p. 18) April 17 — 12:58 a.m. Four high-altitude contrails heading east-southeast toward Alaska are seen by NORAD defense observers at Nunivak Island, Alaska. ([NICAP, “**Another Radar-Inspired National Alert**”](https://www.nicap.org/intelPocketGuide)) April 17 — 5:10 a.m. Radar at Caswell Air Force Station [now closed] in Limestone, Maine, tracks five unknown targets headed southwest into the US. Three are later identified as off-course civilian airliners, while two remain unidentified. A nationwide Air Defense Readiness Alert is declared at 5:11 a.m. SAC is notified to prepare launch of nuclear missiles. The alert is canceled at 7:40 a.m. ([NICAP, “**Another Radar-Inspired National Alert**”](https://www.nicap.org/intelPocketGuide)) April 17 — 12:05 p.m. Air Force T/S Orville Lawson, [Rudy Toncer](https://www.jewishvirtuallibrary.org/jsource/Russians/Toncer.html) (sheet metal shop foreman), and sheet metal shop workers R. K. Van Houtin, Edward Gregory, and [Charles Ruliffson](https://www.jewishvirtuallibrary.org/jsource/Russians/Ruliffson.html) at Nellis Air Force Base, near Las Vegas, see 18 circular objects flying an easterly course that carry them over or very close to the Nevada Test Site. They watch the objects for about 30 seconds. (“*[Work Crew Spots Flying Saucers over A-Test Site*],” *Salt Lake Tribune*, April 18, 1952, p. 1; NICAP, “April 17, 1952; Nellis AFB, Nevada Large Group of Circular UFOs”; Nukes 83) April 17 — [Dewey Fournet Jr.](https://www.jewishvirtuallibrary.org/jsource/Russians/Fournet.html) responds to a reporter from the *Baltimore Sun* who has asked about details of the Blue Book investigation with a two-and-a-half-page memo, vaguely up a bit, but essentially saying that “nothing detrimental to our national security has materialized from these incidents.” (Swords 147)
April 18 — 12:07 p.m. Detachment 21 of the 618th Aircraft and Warning Squadron, Japan Air Self-Defense Force, picks up a radar target over the Korea Strait north of Kyushu Island, Japan, moving at 2,700 mph. (NICAP, “Object Tracked at 2,700 MPH”; Sparks, p. 127)

April 19 — 9:20 p.m. USAF Brig. Gen. Edwin M. Day is reclining on a patio in Dhahran, Saudi Arabia, when he sees an object traveling parallel to the ground at a constant altitude (between 10,000 and 20,000 feet) and moving in his direction. Its speed is greater than a jet’s. It breaks into two parts at one point but maintains its constant course. He follows it visually for 5–6 seconds until it disappears to the north-northeast. (“When UFOs Were Serious Business: Then and Today,” IUR 28, no. 4 (Winter 2003–2004): 5–6)

April 20 — 9:15 p.m. Detachment 21 of the 618th Aircraft and Warning Squadron, Japan Air Self-Defense Force Letter 200 modified by AFR 200

command officers at every ba

April 21 — The Canadian Defence Research Board establishes a UFO study group that meets for the first time today. Project Second Storey, formed by Omond M. Solandt, DRB chairman, meets at least five times. It is chaired by astrophysicist Peter M. Millman and includes Wilbert B. Smith and representatives from Naval Intelligence, Military Operations and Planning, and the Defence Research Board. At its April 24 meeting, it decides to meet with the US government on UFO matters. (“Project Second Storey Minutes, 1952.04.24”; Clark III 1078; Good Above, p. 186; Chris Rutkowski and Geoff Dittman, The Canadian UFO Report, Dundurn Press, 2006, p. 225–226)

April 22 — An Air Force Intelligence memorandum to Col. Frank Dunn, chief of ATIC, transmits nine reports (not released) of unidentified submarine objects reported to the Office of Naval Intelligence. (Good Need, pp. 141, 145)

April 23 — 9:30 a.m. R. C. Munroe, engineering standards section head for Raytheon Manufacturing Company, notices an object near an AT-6 Texan trainer aircraft above Lexington, Massachusetts. He estimates its altitude at 40,000 feet. It decelerates abruptly and goes into a flat turn. He writes, “It is inconceivable to me that any human being could have withstood the deceleration or acceleration displayed by this aircraft.” (UFOEv, p. 57)

April 24 — 10:45 a.m. Engineers Carl Hawk and Marvin Harvey are at Sandia Base, Albuquerque, New Mexico, when they look up to watch a jet fighter as it shoots to the north above the Sandia Mountains. They also notice a soundless, flat, rectangular, wing-like object streaking through the sky from east to west above Tijeras Canyon. The object is completely black except for a distinct, bright yellow “V” on its bottom. Two slight points extend from its rear corners. Hawk estimates that it is passing overhead at 2,000 feet altitude at 200–400 mph and is roughly 60 feet wide by 20 feet long. They watch it for 10 seconds until it disappears in a cloud above downtown Albuquerque. (“What Soared Against Duke City Sky That Day in April, 1952?” Albuquerque (N.Mex.) Tribune, November 21, 1957, p. 8)

April 25 — 11:00 a.m. A biochemist and a bacteriologist are driving to their office in San Jose, California, when they see a metallic-looking disc rotating around a vertical axis and wobbling. It is moving slowly over the office and is about 4–5 feet in diameter. It flies in a slow arc. Then they see a black object hovering at a high altitude under an overcast. This one is about 100 feet in diameter. Two identical objects come into view out of the clouds. The three objects “jittered about like boats in a stream.” Then the small disc stops spinning, hovers, then shoots upwards, followed by one of the black objects. The remaining two objects linger another minute or so, then take off separately. The episode lasts 15 minutes. The biochemist calls Moffett Field in Santa Clara County, but hangs up before reporting the sighting, which they describe as a “most disturbing experience.” The object “utilized some propulsion method not in the physics books.” (NICAP, “Scientist Sighting / Extraordinary Propulsion Implied”; Richard H. Hall, Uninvited Guests, Aurora, 1988, pp. 241–242)

April 25 — Battelle releases its first status report on Project Stork, noting that it has selected a panel of consultants, initiated a news clipping service, and devised a coding scheme for UFO reports. (“Seven Status Reports for Project Stork,” CUFON)

April 29 — Secretary of the Air Force Thomas K. Finletter issues Air Force Letter 200-5, which directs intelligence officers at every base to report UFOs immediately to ATIC and all major USAF commands. It enables Project Blue Book staff to communicate directly with any Air Force base without going through the normal chain of command, and provides for wire transmission of reports to ATIC, followed with details via air mail. AFL 200-5 is modified by AFR 200-2 in 1953. (Department of the Air Force, “Unidentified Flying Objects Reporting,” Air Force Letter 200-5, April 29, 1952; Ruppelt, pp. 132–133)

April 29 — An Air Force memorandum written to justify a trip by Lt. Col. E. Sterling and Stefan Possony to Europe mentions that their work for USAF Intelligence’s “Special Study Group” is to evaluate Soviet advanced aerial
delivery systems, as well as to shed “some much needed light” on the “vexing ‘flying saucer’ problem.” It adds that the “Air Force cannot assume that flying saucers are of non-terrestrial origin, and hence, they could be Soviet.” (Michael D. Swords, “1952: Ruppelt’s Big Year,” IUR 28, no. 4 (Winter 2003–2004): 10; Swords 151)

April 30 — 6:00 p.m. Six members of the 3rd Platoon, Heavy Mortar Company, 180th Infantry Regiment at the front lines around Panmunjeom, Korea, see two silvery wingless objects, one behind the other, flying in a valley in a southeasterly direction. Pfc H. B. Webb thinks they are flying at 900–1,000 mph. Some slower northbound F-86 Sabre jets pass above them. They make a rumbling sound. (Haines, Korea, p. 63)

May — Army radar specialist Jay Nogle is stationed near Washington, D.C., when he picks up an unknown target on his M33 scope at an altitude of 18,000 feet about 130 miles from the capital (which would put it over eastern Pennsylvania). Two other Army units also detect the object, which remains stationary for 30 minutes before moving. By the time the object reaches the edge of the radar scope, it is traveling at 1,000 mph. The report goes all the way to the Pentagon, where orders are given to fire on it if it returns. Nogle says that radar targets are frequently seen in May or June, and units have their antiaircraft guns loaded after the first incident. When fighters are scrambled from McGuire AFB [now part of Joint Base McGuire-Dix-Lakehurst] in Burlington County, New Jersey, the targets move speedily out of range. (Swords 153)

Early May — 10:00 p.m. A senior CIA official is having a lawn party at his home near Alexandria, Virginia, for some VIPs. He and two others notice a light approaching silently from the west. It stops then climbs almost vertically, stops again, then levels out. Then it goes into a nearly vertical dive, levels out, and streaks off to the east. (Ruppelt, pp. 135–136; Swords 148)

Early May — A meeting is held in the Pentagon office of Stefan Possony, acting chief of the Directorate of Intelligence Study Group under Maj. Gen. John A. Samford to hear Harvard University astronomer Donald Menzel express his views. Present are Possony, Capt. Edward J. Ruppelt, ATIC chief Col. Frank Dunn, Brig. Gen. William M. Garland, Possony’s assistant Leslie Rosenzweig, and one other officer. Menzel announces that he has solved all UFO reports and claims to have helped out in the development of the cameras in Project Twinkle. His attitude irks everyone in the meeting. When he asks the Air Force to support his views in upcoming publications in Time and Look, Gen. Garland gets angry. Col. Dunn says that Blue Book would have put some money into more formal versions of his experiments, but he can only offer a statement that Menzel has told them of his theory. Now Menzel gets agitated, saying it is no theory. He refuses to let them take a copy of his book to pass on to Joseph Kaplan and J. Allen Hynek. In the evening, Possony speaks with astronomer Francis J. Heyden at Georgetown University, who tells him that Menzel’s work is based on no more than a “couple of meaningless high school physics experiments.” (Clark III 743; Michael D. Swords, “Strange Days, Part 2,” IUR 32, no. 2 (December 2008): 9; Swords 152)

May 1 — 9:10 a.m. Air intelligence officer Maj. Rudolph Pestalozzi and an airman standing outside the Davis-Monthan AFB base hospital, Tucson, Arizona, watch two shiny, round objects overtake a B-36 flying above. The objects slow down to match the plane’s speed and remain in formation with them for 20 seconds. Then they make a sharp, no-radius turn away from the B-36, moving away a bit. Then one of the objects stops and hovers. Both are silent, and the crew estimates they have a diameter of 20–25 feet and a thickness of 10–12 feet. (NICAP, “The Case of the Missing Report”; Hynek UFO Report, pp. 109–112, 292–294; Sparks, p. 131; Good Need, pp. 166–167)

May 1 — 10:50 a.m. At George AFB [now Southern California Logistics Airport] near Victorville, California, five independent witnesses in the base control tower see a group of five white discs moving in formation for about 30 seconds. The objects appear very maneuverable, seem to almost collide, then break away in a right-angle turn. They are traveling an estimated 900–1,200 mph and are 1,000–1,200 feet in diameter. Four miles away at Apple Valley, California, the base’s wing director of personnel, playing on a golf course, sees one of the UFOs at the same time. (NICAP, “George AFB / Apple Valley, CA Radar Case”; Hynek UFO Report, pp. 107–109; Sparks, p. 131; Swords 147–148; Good Need, p. 166; Michael D. Swords, “Intelligent Motions,” IUR 33, no. 1 (March 2010): 10, 15)

May 1 — 1:45 p.m. Albuquerque Journal composing room employee Eugene Cline sees four silvery objects seemingly playing tag with a formation of 12 Air Force bombers—either B-29s or B-50s—flying west over Albuquerque, New Mexico. The round objects are keeping up with the planes at the same altitude, moving in a “tumbling or pitching manner.” One object shoots straight up and takes off in a southerly direction. About the same time, workmen (one of them Howard Burgess) erecting an antenna at nearby Sandia Base watch three UFOs pass directly overhead. One comes from the west and moves south; another comes from the north and moves south;
and a third, tan-colored rather than silver like the others, passes low overhead and looks like a “cylinder tumbling end over end.” Burgess and the others are debriefed and sworn to secrecy about what they have witnessed. (“Flying Saucers Play Tag with Bombers over City,” Albuquerque (N.Mex.) Journal, May 2, 1952, p. 2; Nukes 56–58)

May 7 — 12:15 p.m. A Captain Morris and three enlisted men at Keesler AFB, Biloxi, Mississippi, see one or two aluminum or silver cylindrical objects darting in and out of the clouds 10 times. ([Blue Book case report]”; [Sparks], p. 131)

May 7 — 4:30 p.m. Magazine writer Ed Keffel, in the company of João Martins, takes five photographs of a UFO over Barra da Tijuca, Rio de Janeiro, Brazil. In the first, the UFO resembles an airplane coming directly toward them over a large group of trees. The second shows the object as disc-shaped. The third photo is taken as the object tilts slightly, showing both the top with a slight dome and the now obvious disc shape. More trees, including a very tall palm, can be seen in the photograph. The fourth picture, taken as the object tilts the other way, shows a raised ring on the bottom. The final picture is taken as the object is nearly vertical, seen over part of the ocean and some distant hills. The UFO disappears shortly afterward. NICAP does not see any negatives and is skeptical. The Colorado project finds a “glaring internal inconsistency” in the illumination and dismisses the photos as hoaxes. Today, the best evidence seems to suggest the case is a hoax, perpetrated by two magazine writers who wanted an interesting story. (NICAP, “Barra da Tijuca Photos”; Olavo T. Fontes, “The Barra da Tijuca Disc,” APRO Special Report no. 1 (October 1961): 1–6; Condon, pp. 83, 415–418; Swords 460–461; Cláudio Tsuyoshi Suenaga, “Os 90 Anos do O Cruzeiro, a Revista que Inaugurou a Era Moderna dos Discos Voadores no Brasil.” October 11, 2018)

May 8 — 2:27 a.m. Pan American Airways pilot Clayton C. Gallagher and his copilot, flying a Lockheed Constellation aircraft at 8,000 feet en route from San Juan, Puerto Rico, to New York, see a light, 10 times the size of an airplane landing light, approach them over the Atlantic Ocean east of South Carolina. It streaks past their left wing about a quarter mile away, followed by two smaller orange balls of fire. Probable meteor. (NICAP, “Three UAO Sighted by Constellation Crew”; [Sparks], p. 131)

May 8 — Air Force Secretary Thomas Finletter and his staff (including his special assistant, covert CIA agent Joseph Bryan III) receive a secret one-hour briefing on UFOs from Ruppelt and Lt. Col. R. J. Taylor that covers USAF investigations over the previous five years. Finletter asks questions about some specific sightings. (Ruppelt, p. 138)

May 10 — 3:00 p.m. USAF Lt. Col. Maurice G. Bechtel and his wife are in the yard of their home in Albuquerque, New Mexico, when they see two silvery disc-shaped objects flying straight and level, one after the other, moving southwest to northeast at about 20,000 feet. The first object seems to waver on its axis, the second object follows a similar path but at a higher altitude. The first object is the size of a B-36 at high altitude. Bechtel alerts the radar station but it is unable to track the objects. (NICAP, “Two Discs Observed by Lt. Colonel and Wife”; [Sparks], p. 132)

May 10 — 8:30 p.m. A British scientist and others at Paphos, Cyprus, see a luminous circular object rise from the sea and waver back and forth before fading from sight directly overhead. ([Sparks], p. 132; Good Above, p. 540)

May 10 — 10:45 p.m. Four employees of DuPont Corporation at the AEC’s Savannah River Laboratory near Jackson, South Carolina, see four disc-shaped objects approach, then two other discs pass high overhead from different directions. They are a luminous yellow-gold color and move at a high rate of speed. One of the discs approaches at such a low altitude that it must ascend to pass over some tall tanks at the facility. One witness says that the objects are weaving from left to right while continuing on a steady course. The case is investigated by the FBI and passed on to the Pentagon and the Atomic Energy Commission. (NICAP, “Objects Sighted near Vital Installation”; [Sparks], p. 132; Nukes 84)

May 12 — 8:45 p.m. A UFO is seen by Walker AFB T/Sgt. Raymond Bare in a car in downtown Roswell, New Mexico. The object is blue-green in color, and its estimated altitude above the terrain is 20,000–30,000 feet. It appears to be about 40–50 miles distant over some low mountains east of Ruidosa. The object travels three times over approximately the same south-to-north / east-to-west, swaying, triangular course. Rate of speed cannot be precisely estimated but is faster than that of jet aircraft. Intensity of color brightness varies with the object’s altitude. The Air Force explains it as the planet Venus, but Venus is on the other side of the earth at the time. (NICAP, “High-Speed Object Maneuvers over Mountains”; Clark III 390–391; [Sparks], p. 132)
May 13 — 8:55 p.m. Aeronautical engineer Donald R. Carr sees a meteor-like object descend over National City, California, flying a curving path to the northwest. At 9:25 p.m., Carr watches a similar object, seemingly returning from the north. (UFOEv, p. 4)

May 13 — 10:33 p.m. James Richardson and three other amateur astronomers (among them Cyril Thomas Wyche and Harry B. Mooney), set up telescopes at Furman University in Greenville, South Carolina, when they see a diamond formation of 4 oval, reddish-yellow or reddish-brown luminous objects nearly overhead. They disappear after 3 seconds moving through a 12° arc. The apparent size is a half dollar at arms length. They wobble in flight. (NICAP, “Diamond Formation of 4 Objects Observed by Astronomers”; Willy Smith, “Blue Book Pearls: Greenville, S.C.,” IUR 20, no. 3 (May/June 1995): 8–9, 24; Sparks, p. 133; Michael D. Swords, “Intelligent Motions,” IUR 33, no. 1 (March 2010): 10, 15)

May 15 — USAF Intelligence Special Study Group Chief Lieut. Col. E. Sterling and Stefan Possny begin a five-week temporary duty trip to Europe to study Soviet missiles and aircraft. As a side project they study “flying saucers” that might be of Soviet origin. No documents have yet been found on this trip’s results. (Swords 151)

May 15 — 6:35 p.m. The pilot of an F–51 assigned to the 18th Fighter Bomber Group flying at 9,000 feet over North Korea encounters a silver object estimated to be 50 feet in diameter. It appears ahead of him to the right and begins climbing at 1,000 mph to the east, pauses, then descends into some haze. (Haines, Korea, pp. 39–40)

May 15 — 8:00 p.m. Two F–86E pilots of the 61st Fighter-Interceptor Wing are on a mission in North Korea when they see a silvery disc larger than a MiG aircraft 20 miles away and below them at 8,000–10,000 feet. Seen for only 3–5 seconds, the object is traveling at 1,200–1,500 mph in a rolling maneuver. (Haines, Korea, p. 39)

Late May — 1:00–3:00 a.m. Royal Canadian Navy Commander George R. McFarlane is officer of the watch on the Canadian warship HMCS Iroquois in the Pacific Ocean between Hawaii and Guam en route to Korea. He sees many different lights, some single, others in formations of 3, 5, or 6, appearing and disappearing instantly. Suddenly one of the objects appears off the port bow at close range and low elevation. McFarlane and the signalman on watch see that the light is attached to a disc-shaped object with two dozen black windows running along its side. It hovers nearby for at least 15 minutes. (Good, pp. 142–143)

May 23 — After 11:00 p.m. Lockheed worker Orfeo Angelucci is driving home on Victory Boulevard from his job in Burbank, California, when he senses a force and sees a red, glowing UFO. After a while he begins to follow it, and after he crosses the Los Angeles River and turns onto Forest Lawn Drive, he gets to within 30 feet of it when it hovers. Just before it streaks away, two smaller green globes, 3 feet in diameter, shoot out of it and approach him. He hears a voice saying, “Don’t be afraid, Orfeo, we are friends.” This begins his contact with benevolent beings from other planets. (Orfeo Angelucci, The Secret of the Saucers, Amherst Press, 1955, pp. 1–15; Bryant and Helen Reeve, Flying Saucer Pilgrimage, Amherst Press, 1957, pp. 222–232; Clark III 127–129)

May 25 — 9:27 a.m. An Air Force captain in charge of the navigation section of Combat Crew Training School at Randolph AFB near San Antonio, Texas, his wife, and another pilot see a group of about 12 orange-white, teardrop shaped lights in 3 groups of 4 moving from west to east at 2,000 mph and 10,000 feet altitude. They hear deep, soft intermittent noise. (Ruppelt, p. 140; Sparks, p. 134)

May 26 — 3:20 a.m. Ground radar alerts the crew of an F–94 Starfire interceptor jet over North Korea that an unidentified target is on its tail. The jet turns, locks onto the object with onboard radar at 21,000 feet and begins to close. Both the pilot and radar operator see a brilliant white light straight ahead. The UFO performs a steady climbing turn and accelerates away at a tremendous speed. The jet loses the object at a distance of 7,800 feet after 15 seconds of contact. (Haines, Korea, pp. 40–44)

May 28 — 1:45 p.m. Albuquerque, New Mexico, fire department employees Martin Romero and Don Atteberry see two circular objects, one shiny silver and the other orange or light brown, performing fast maneuvers on three different occasions over the course of an hour above the northeast part of the city. (NICAP, [Blue Book case documents]; Sparks, p. 135)

May 28 — 8:30–8:40 p.m. A green fireball about one-third the size of the full moon is seen in Albuquerque, New Mexico, from eight ground points and five aircraft. Lincoln LaPaz pinpoints the fall near Santa Fe. Around the same time, the crew of a Flying Tiger Line C–46 near Otro, New Mexico, sees a green fireball rise up and drop steeply down. (“2 Green Fireballs Seen by Many, LaPaz Reports,” Albuquerque Journal, May 29, 1952, p. 2)

May 28–29 — During a night refueling mission at 8:10 p.m., the crews of five USAF B–29 bombers see green spherical objects. The primary sighting takes place near Albuquerque, New Mexico, and involves three B–29s flying at 15,000 feet. Another sighting takes place around 11:30 p.m. about 10 miles southwest of Tulsa, Oklahoma. That crew is flying at 25,000 feet. Three hours later the final sighting takes place near Enid, Oklahoma, also with a B–29 at 25,000 feet. The aircrews making these reports do not think the objects are meteorites. (NICAP, “Five B–29 Bomber Crews Observe Green Objects”; Sparks, p. 135)

May 31 — About 4:00 a.m. Over Cheorwon, South Korea, several US soldiers see a bright UFO that looks like a falling star, except that it stops falling and begins to climb again. It then moves northeast at 150 mph, reverses course twice, then climbs at a 45° angle and fades from sight. One guard hears a pulsating sound. An F-94 attempts to intercept the brilliant white object, which takes clearly evasive maneuvers and pulls away at 30,000 feet. (NICAP, “Jerky Object Observed and Tracked on Radar”; Hynek UFO Report, pp. 87–90; Haines, Korea, pp. 63–64; Sparks, p. 136; Patrick Gross, “UFO US Military Reports, Korea, 1952”)

May 31 — 9:30 p.m. Mr. R. Baits is on the beach at Derna, Libya, with three companions when he notices a soft orange light traveling soundlessly toward them from inland at great speed and in a straight line. Suddenly, as it reaches a point overhead, it swerves to the east over the town, gaining height. After a few seconds it moves to the south and begins zigzagging until it fades away into the background of stars. (Newcastle (UK) Evening Standard, June 13, 1952; Jan Aldrich)

June — Ruppelt has four officers, two airmen, and two civilians on his permanent Blue Book staff (including Lt. Anderson G. Flues, Robert M. Olsson, and Kerry Rothstien), as well as a number of scientific consultants, including Hynek. In the Pentagon, Maj. Dewey Fournet Jr. is a full-time Blue Book liaison. (Ruppelt, p. 140)

June — In the wake of mass media public and governmental interest in UFOs kindled by the provocative Life magazine article, CIA intelligence experts Sidney N. Graybeal (Chief, Guided Missiles Branch, Weapons and Equipment Division, Office of Scientific Intelligence) and Irl D’Arcy Brent (Chief, Ground Branch, W&E Division, OSI) prepare a summary of the UFO subject for the CIA/OSI hierarchy based on the past several years of OSI intelligence (and OSI predecessor documents going back to ghost rockets of 1946) and mentioning sightings going back to the Bible. The possibility of swamp gas in Michigan as an explanation for UFOs is suggested by Brent (foreshadowing the Hynek swamp-gas fiasco in Michigan in 1966). This report has never been acknowledged or released by the CIA despite FOIA litigation. Its existence and contents are revealed in Brad Sparks’s interviews with Brent and Graybeal and other OSI officials in 1975–1976. (NICAP, “The 1952 Sighting Wave”)

June — Sunset. In Tombstone, Arizona, Navy Lieut. Cmdr. John C. Williams, his wife Josephine, and a guest see a “huge circular object” flying toward them from the direction of Tucson. Suddenly it stops in mid-flight, hovers, then reverses direction and retracts its course. A few seconds later it returns, stops gain, and appears to oscillate and tilt from one side to the other. Again it reverses its course, repeating everything 2–3 more times. (UFOEv, p. 31)

Early June — 9:00 or 10:00 p.m. Violet M. Winstead and her husband are driving in a narrow valley somewhere between Charleston and White Sulphur Springs, West Virginia, when they see a number of lights on a bridge crossing the valley. They begin blinking off, one by one. When they get to the bridge, they see no street lights. (Violet M. Winstead, Letter, IUR 9, no. 1 (Jan./Feb. 1984): 3)

June 1 — 2:40 a.m. A cargo ship anchored at the wharf in Port-Gentil, Gabon, observes a mysterious object fly from behind the city, make a double loop, pass over the roadway, and then dive toward the sea. (ClearIntent, p. 119)

June 1 — Morning. The chief of a radar test section for Hughes Aircraft Company tracks an unidentified target coming across the San Gabriel Mountains north of Los Angeles, California. It is moving at 180 mph toward Santa Monica at an altitude of 11,000 feet. The object suddenly triples its speed to 550 mph, turns, and climbs over Los Angeles at 35,000 feet per minute. The target then levels out for a few seconds, goes into a high-speed dive, and levels out again at 55,000 feet. They lose the blip somewhere near Riverside. (NICAP, “Radar Tracks Object Which Suddenly Climbs to 55,000 Feet”; Ruppelt, pp. 141–143)
June 4 — Air Force Secretary Finletter issues a press release about his May UFO briefing, saying, “No concrete evidence has yet reached us either to prove or disprove the existence of the so-called flying saucers. There remain, however, a number of sightings that the Air Force investigators have been unable to explain. As long as this is true, the Air Force will continue to study flying saucer reports.” (Keyhoe, FS from OS, p. 51)

June 6 — 8:42 a.m. Flight Sgt. Kenneth Dudley Smith from the 77th RAAF Squadron at Kimpo Air Base [now Gimpo International Airport] in Seoul, Korea, observes a dull silver object in the shape of a coin performing spinning and tumbling maneuvers for 4 minutes at 345 mph. Flight Sgt. Kenneth Fawner also sees the UFO for 30 seconds. ([Blue Book case documents]; Sparks, p. 137)

June 6 — Battelle issues its second status report on Project Stork to ATIC. It describes a “tentative” data sheet for observers to fill out, a more detailed coding scheme, an example of an IBM punch card that will be used, and plans for statistical studies. (“Seven Status Reports for Project Stork,” CUFON; “Seven Status Reports for Project Stork, Part 2,” CUFON; Clark III 929)

June 8 — 10:50 a.m. Four flat, round, shiny objects in a diamond formation are seen in Albuquerque, New Mexico, from the ground by Mr. and Mrs. J. D. Markland. The objects are approximately 15,000 feet in altitude and traveling 300 mph. There is no audible sound. They are first seen at about 60° above the horizon to the north and are traveling to the southwest at approximately 240°. (NICAP, “Diamond Formation of Flat Objects Observed”; Sparks, p. 138; Michael D. Swords, “Intelligent Motions,” IUR 33, no. 1 (March 2010): 10, 15)

June 8 — During a launch of a pibal balloon at Calgary, Alberta, a silvery ellipse with a sharp outline reflecting sunlight and an aspect ratio of 8:1 crosses the field of vision of the observer’s theodolite. (Jan Aldrich; Project Magnet Case V)

June 11 — 6:44 p.m. Two round objects, dark blue with gray centers, are seen moving southwest to northwest for 40 seconds at 500 mph and 6,000 feet altitude several miles east of O’Hare Airport in Chicago, Illinois. One passes the other before disappearing. (Loren E. Gross, UFOs, a History: 1952, June–July 20th, The Author, 1986, pp. 10–11)

June 13 — 1:00 a.m. M. Veillot and M. Damiens, air traffic control operators at Paris–Le Bourget Airport, France, watch a prominent orange-red light hover in the sky for about one hour. Eventually it begins moving and crosses the sky southwest of the airport, accelerating rapidly. The light is also seen by M. Navarri, the pilot of an approaching Air France plane. (Michel, Truth About FS, 165–166)

June 15 — 8:32 a.m. A meteorologist assistant on reserve army maneuvers sees a large silver disc in the sky southeast of Halifax, Nova Scotia. It moves southwest for 30 seconds at an altitude of 5,000–8,000 feet and then rises and merges in 2–5 seconds with altocumulus clouds at 11,000–12,000 feet. Its diameter is about 100 feet and speed at least 800 mph. (Good Above, p. 184)

June 15 — 4:20 p.m. A round shiny object is seen over Gordonsville, Virginia. At 4:25 p.m., the crew of a commercial airliner reports a silver sphere over Richmond, Virginia. At 4:33 p.m., a Marine fighter jet is scrambled from Marine Corps Base Quantico in Prince William County, Virginia, and attempts to intercept a target south of Gordonsville but fails and returns to base. At 5:43 p.m., an Air Force fighter attempts to intercept the same shiny sphere but after reaching 35,000 feet turns back. At 7:35 p.m., a UFO emitting a golden glow is seen over Blackstone, Virginia. Fighter jets from Langley AFB in Hampton, Virginia, are scrambled, but the object is gone by the time they get there at 8:05 p.m. (Ruppelt, pp. 194–195)

June 15 — 11:50 p.m. Edward Duke, a former Navy radar technician, sees an unidentified cigar-shaped object in the vicinity of Standiford Field [now Louisville International Airport], Louisville, Kentucky. It has a light on either side of the fuselage and a reddish hue on the trailing end. The object appears to be moving at about 400–500 mph and maneuvers around in several directions for 15 minutes, then descends and flies away to the northeast. ([Blue Book document]; Sparks, p. 138)

June 17 — 1:28 a.m. A USAF F-94 pilot sees a light like a bright star cross the nose of his jet at blinding speed over Cape Cod, Massachusetts, for 15 seconds. (Sparks, p. 138)

June 17 — 7:30–10:20 p.m. Many witnesses at McChord AFB [now Joint Base Lewis-McChord] south of Tacoma, Washington, see 5–6 yellowish discs, tracked by radar and theodolite. Several F-94s are scrambled. (NICAP, “1–5 Silver Yellow Objects Stop and Start”; Sparks, p. 138)
June 17 — 8:45 p.m., Orville Foster, a US Weather Bureau observer at the Pueblo (Colorado) Memorial Airport, watches a UFO through the bureau’s theodolite. It circles leisurely for 10 minutes, then disappears toward the northeast. (“‘Flying Saucer’ Sighted at Pueblo,” Leadville (Colo.) Herald-Democrat, June 18, 1952; Project 1947, “UFO Reports, 1952”) Mid-June — Ruppelt briefs Maj. Gen. John A. Samford and his staff, two Navy captains from ONI, and “some people I can’t name.” The meeting is contentious. One USAF colonel argues that Blue Book’s investigation is biased against the ETH, which launches an emotional debate. Ruppelt is directed to “take further steps to obtain positive identification” of UFO reports. (Ruppelt, pp. 147–149)

June 18 — 5:00 p.m. USAF Capt. Erie P. Ashton and 2nd Lt. Clifton Ashley, while flying a B-25 about 100 miles east of March AFB [now March Air Reserve Base] in southern California, sight a silver object at approximately 11,000 feet in altitude off their left wing. The object is longer than it is wide and in sight for about 39 minutes. (NICAP, “UFO Paces B-25”; Sparks, p. 138)

June 18 — According to Sgt. Richard Doty’s 1980s disinformation, the living alien retrieved in 1949 (EBE-1) and kept at Los Alamos, New Mexico, dies of unknown causes. (Clark III 364)

June 19 —2:37 a.m. At Goose Bay AFB [now CFB Goose Bay], Labrador, radar men pick up a UFO track. 2nd Lt. A’Gostino and others outside see a strange, red-lighted object come in over the field. The radar blip suddenly enlarges, as if the device has banked, exposing a larger surface to the radar beam. The watching airmen see the red light wobble or flutter. After a moment the light turns white and quickly disappears. Apparently, the unknown craft has gone into a steep climb. Keyhoe assumes the radar and visual sightings are simultaneous, but Blue Book records indicate they are separate. (NICAP, “Target Suddenly Enlarges”; Keyhoe, FS from OS, p. 52; Sparks, p. 139; Chris Rutkowski and Geoff Dittman, The Canadian UFO Report, Dundurn Press, 2006, pp. 55–56)

June 19 — 1:30 p.m. Four silvery UFOs are seen by many witnesses in Tacoma, Washington, flying silently at a high altitude. Unofficial sources report that the objects are tracked on radar at McChord AFB [now Joint Base Lewis-McChord] in Tacoma and jets are scrambled. (Tacoma (Wash.) Reporter, June 20, 1952; Shoot 9; Michael D. Swords, “Intelligent Motions,” IUR 33, no. 1 (March 2010): 11, 15)

June 19 — 9:50 p.m. A former Army Air Force ground crew member sees a UFO flying in a swirling motion over the backyard of his home in Trenton, New Jersey. (Loren E. Gross, UFOs, a History: 1952, June–July 20th, The Author, 1986, p. 17)

June 20 — 3:03 p.m. A flight of four US Marine Corps captains and pilots (Bobbie Foster, Richard Francisco, Teddy L. Pittman, and Ronnie A. McDonald) of F4U-4B Corsair fighters with the 7302nd Squadron over central Korea see a silvery-white object passing below them, banking into a left turn. As the object circles around, Foster dives toward the object, which appears to be 10–20 feet in diameter. It flies away at an estimated speed of 1,000 mph and disappears toward friendly lines. (NICAP, “F4U-4B Corsairs Encounter Circling UFO”; Sparks, p. 139)

June 21 — 12:30 p.m. T/Sgt. Howard Davis, flight engineer of a B-29 bomber flying at 8,000 feet altitude near Kelly AFB [now Kelly Field] in San Antonio, Texas, sees a small, flat object with a sharply pointed front and rounded rear. It is white with a dark blue center and red rim and trails sparks as it dives past the B-29 at a distance of 500 feet in one second. (NICAP, “B-29 Encounters Flat Object with Pointed Front”; Sparks, p. 140)

June 21 — 10:58 p.m. A Ground Observer Corps spotter at Oak Ridge, Tennessee, sees a small (6–8 inches in diameter), slow-moving UFO near the AEC plant. GCI radar obtains the target, but it fades from the scope. An F-97 on combat air patrol engages in a “dogfight” with the object, which makes “ramming attacks” at the aircraft. It blinks until it speeds away. (NICAP, “Radar Visual near AEC Plant”; Ruppelt, p. 43; Sparks, p. 139)

June 22 — 10:45 p.m. Two US Marine sergeants see a 4-foot diameter orange object dive at a runway from the north, dropping from 800 to 100 feet altitude over the west end of the runway at Pyeongtaek military base, South Korea, shooting 2–5-foot red flares. It then heads west at about 300–450 mph for 2–3 seconds, hovers briefly over a hill, turns 180° in 45–60 seconds, flashes, heads east a half mile, flashes again, and blinks out. No sound. (Hynek UFO Report, pp. 82–83; Sparks, p. 140)

June 23 — 1:30 a.m. USAF ADC radar operators Lt. A. N. Robinson Jr. and Airman Ray H. Foote, plus 5 other controllers, officers, and maintenance technicians at Kirkville Air Force Station in Missouri, track a hard target with a clear sharp return about the size of a B-29. It suddenly appears 85 miles north-northwest of the station, moving at a constant speed of about 3,600+ mph on a straight path for about 125 miles for 2 minutes. Then it vanishes. A second target appears at 1:35 a.m. (NICAP, “Seven ADC Men Track 3,600 MPH Target”; Michael D. Swords, “Case Missing,” IUR 19, no. 6 (Nov./Dec. 1994): 20; Sparks, p. 141)

June 23 — 3:30 a.m. Secretary Martha Milligan sees a bullet-shaped object emitting a burnt-orange exhaust fly straight and level over Oak Ridge, Tennessee. (NICAP, “June 23, 1952: Oak Ridge, Tenn.”; Sparks, p. 141)
June 23 — 10:00 a.m. National Guard Lt. Col. Oren Laramore Depp [Johnny Depp’s grandfather] sees two objects looking like giant soap bubbles reflecting yellow and lavender colors flying in line over Owensboro, Kentucky. (Sparks, p. 141)

June 23 — 4:05 p.m. Airport weather chief Rex Thompson sees a round disc with a metallic shine flash and flutter like a flipped coin for 5–7 minutes over Geiger Field [now Spokane International Airport], Spokane, Washington. (NICAP, “June 23, 1952: Spokane, Wash.”; Sparks, p. 140)

June 23 — 9:00 p.m. 2d Lt. K. Thompson sees a very large light flying straight and level for 10 minutes at McChord AFB [now Joint Base Lewis-McChord] near Tacoma, Washington. (Sparks, p. 140; Michael D. Swords, “Intelligent Motions,” IUR 33, no. 1 (March 2010): 11, 15)

June 24 — The first issue of Ouranos is published by the Commission Internationale d’Enquêtes sur les Soucoupes Volantes, in Paris. (Ouranos, no. 1)

June 25 — Wilbert B. Smith writes an “Interim Report on Project Magnet,” in which he states: “If, as appears evident, the flying saucers are emissaries from some other civilization, and actually do operate no magnetic principles, we have before us the fact that we have missed something in magnetic theory but have a good indication of the direction in which to look for the missing quantities.” (Good Above, p. 185)

June 25 — 8:30 p.m. Mrs. Daniel Norbury and Lawrence Matheis see a bright yellow-white, egg-shaped object, sometimes with a red tail, make seven circles over Chicago, Illinois. (NICAP, “June 25, 1952: Chicago, Illinois”; Sparks, p. 141)

June 27–30 — Ruppelt visits McChord AFB in Tacoma, Washington, to look into recent sightings there. Capt. Harnagy of the 4704 Air Defense Wing Intelligence tells him that the objects are always seen in the northern sky around 8:00 p.m. (Loren E. Gross. UFOs, a History: 1952, June–July 20th, The Author, 1986, pp. 23–24)

June 28 — 1:20 p.m. Two observers at the Cargo Air Service hangar at Kirtland AFB in Albuquerque, New Mexico, see two silvery discs high in the sky and moving to the south. They noiselessly climb nearly vertically at high speed, one going south-southeast, the other heading almost due east. The observation lasts 30 seconds. (J. Allen Hynek, THE UFO Experience, Ballantine ed., 1974, pp. 68–69; Sparks, p. 142)

June 29 — 5:45 p.m. Three Air Force police officers of the 83rd Air Base Squadron at O’Hare Airport in Chicago spot a flat, oval object as it hovers between two radio towers about 7 miles away. It is bright silver in color, encircled by white haze, and appears about 30 feet in diameter. During the next 45 minutes the object moves to the southwest and then back north. It accelerates instantaneously to a speed faster than a jet fighter. ([Blue Book documents]; Sparks, p. 143)

June 30 — Ruppelt says that by this time there is a split in opinion in the military about what to do about UFOs. One group assumes that UFOs are interplanetary, and information must be withheld at a top-secret level. “The enthusiasm of this group took a firm hold in the Pentagon, at Air Defense Command headquarters, on the Research and Development Board, and many other agencies.” (Ruppelt, pp. 152–153)

Summer — Denis Plunkett forms a British branch of Albert K. Bender’s International Flying Saucer Bureau in Bristol, England. When Bender closes down IFSB in late September 1953, the branch becomes the British Flying Saucer Bureau, with his son E. L. Plunkett as president. It publishes Flying Saucer News from Spring 1953 to Spring 1956 and Flying Saucer News Bulletin from February 1955 through 1957. (Flying Saucer News, no. 1 (Spring 1953); Flying Saucer News Bulletin, no. 1 (February 1955))

Summer — Night. Radar at MacDill AFB in Tampa, Florida, picks up a target at 40,000 feet flying at 460 mph. A nearby B-29 volunteers to investigate, searching until midnight. The pilot, a USAF colonel, finally reports a visual sighting of the UFO, flying at 40,000 feet and 250 mph and appearing as a glowing white light shaped like a football. The object changes course and disappears at high speed. (UFOEv, p. 25)

July — Edgar Jarrold begins the Australian Flying Saucer Bureau in Sydney, New South Wales, Australia’s first civilian UFO organization, following his personal observation of two fast-moving yellow lights in the sky over Fairfield, New South Wales. (“Saucers on His Mind,” Sydney (N.S.W.) Morning Gazette, February 2, 1954, p. 7; Clark III 632)

July — Afternoon. A man driving a car near Schenectady, New York, sees an oblong object hovering nearby. A gondola lowers from the object and a bunch of “Navy officers in white hats” rush to the windows. All are wearing huge dark glasses. The gondola goes back up, and three smaller UFOs appear and go inside the bigger one. (Center for UFO Studies, HUMCAT Index 1952–1953, p. 10; Clark III 267)

July — The administration and faculty of Ohio Northern University, in Ada, Ohio, announce the formation of Project A: Investigation of Phenomena, saying that members of the engineering, pharmacy, law, and liberal arts colleges will examine the evidence for UFOs under the direction of Dean Warren L. Hickman. Project A personnel seek reports from the public and collect newspaper clippings. The project receives a disappointing 54 completed
questionnaires, far lower than the 200 they would like for a scientific sampling. However, they do estimate that about 20% involve “unnatural phenomena.” After unsuccessful attempts to obtain reports from Civilian Saucer Investigation in Los Angeles and other groups, the university closes the project down in mid-1954. (Loren E. Gross, UFOs, a History: 1952, August, The Author, 1986, p. 3; Clark III 916; Curt Collins, “Project A: The Short Life of a UFO Study,” September 21, 2018)

July 1 — J. Robert Moskin’s article appears in Look magazine. It features Gen. Hoyt Vandenberg’s declaration that we cannot afford to be complacent about UFOs. Keyhoe says that the article has upset the “silence group” in the Pentagon. (J. Robert Moskin, “Hunt for the Flying Saucer,” Look. July 1, 1952, pp. 37–41; Keyhoe, FS from OS, pp. 52–53)

July 1 — 7:25 a.m. A Ground Observer Corps spotter sees a UFO headed southwest across Boston, Massachusetts. Two F-94s are scrambled. Erwin W. Nelson and his wife at Lynn, Massachusetts, notice two vapor trails from the climbing jets, look around, and see in the west a bright silver “cigar shaped object about six times as long as it was wide” heading over Boston at a very high altitude. An identical UFO is following the first some distance back. No vapor trails are visible. The witnesses watch the F-94s search back and forth far below the UFOs. At 7:30, USAF Capt. Robert E. Metcalf, petroleum officer for the 6520th Test Support Wing, and USAF air policemen M/Sgt James Stiner and M/Sgt Joseph R. Bosh. 6520th Air Police Squadron, at Hanscom Field, Bedford, Massachusetts, see the two jets, look for what they are intercepting, and see to the east a 100-foot-long silvery ellipse “fatter than a cigar” traveling southwest. At two points, the object seems to hover, then continues at about 40,000 feet. The object’s path intersects contrails of the two jets heading southeast. Metcalf loses sight of the object on his way to the tower after a few minutes, then sees it again at about 7:40 a.m., noting it has increased distance “considerably,” but finally loses sight of it at the tower. (Blue Book document); UFOEv. p. 160; Ruppelt, pp. 150–151; Sparks, p. 144)

July 1 — 8:40–9:15 a.m. Two silvery objects move south along the East Coast and hover near Fort Monmouth, New Jersey, for about 5 minutes at 50,000 feet. As radar at Fort Monmouth detects the objects, they put on a burst of speed and head southwest toward Washington, D.C., confirmed visually. At about 12:00 noon, a physics professor at George Washington University in D.C. sees a grayish UFO hovering and arcing back and forth across the sky for about 8 minutes. He guesses about 500 people are watching the object. (NICAP, “Objects Tracked at 50,000’, G/V”; Ruppelt, pp. 151–152; Loren E. Gross, UFOs, a History: 1952, June–July 20th, The Author, 1986, pp. 36–37; Sparks, p. 144)

July 2 — 11:10 a.m. As he is driving on a highway seven miles north of Tremonton, Utah, US Navy Chief Petty Officer Delbert C. Newhouse and his wife see a strange object in the sky. Newhouse pulls the car to the side of the road, gets out, and watches 12–14 UFOs at about 10,000 feet. Looking like “two pie pans, one inverted on top of the other,” they are clustered in a loose formation, “milling around.” He takes about 75 seconds worth of film through the telephoto lens of his 16mm movie camera, though the objects have receded a bit to shiny points of light. At one point a single object leaves the pack, heading east, and Newhouse holds the camera still so the UFO crosses the field of view. He repeats the procedure 3-4 times. Blue Book obtains the film and sends it to the USAF Photo-Reconnaissance Laboratory and the Navy’s Photo Interpretation Laboratory. Both analyses eliminate the possibility of aircraft or birds. (NICAP, “The Tremonton, Utah / Newhouse Color Film”; “Delbert Newhouse UFO Footage, 1952, Tremonton, Utah,” parkerdonaldmusic YouTube channel, September 29, 2012; Ruppelt, pp. 220–222; UFOEv, pp. 88, 112; Hynek UFO Report, pp. 235–239; Condon, pp. 418–426; “Turner on Tremonton,” IUR 3, no. 5 (May 1978): 6; Swords 149; Clark III 1203–1204; Kevin D. Randle, “Newhouse’s Tremonton, Utah Movie Revisited,” A Different Perspective, December 12, 2013; Patrick Gross, “Tremonton, Utah, UFO Color Film of July 2, 1952”)

July 3 — 4:15 a.m. A witness on the Manitou Beach Highway near Rome Center, Michigan, watches two circular lights about 20 feet in diameter flying horizontally at tremendous speed at only a few hundred feet altitude. (NICAP, “July 3, 1952, Selfridge AFB, Mich.”; Sparks, p. 145)

July 3 — 11:50 p.m. Mrs. J. D. Arbuckle sees two bright pastel-green discs fly straight and level very fast for 6 seconds over Chicago, Illinois. The next day the Air Force public information office at O’Hare Airport says it has received 16 reports of UFOs over Chicago in the past week. An Air Force spokesman says that jet patrols are on alert 24 hours a day. (Sparks, p. 145; “Deny Reports of ‘Saucers’ Alerts,” Waterloo (Iowa) Courier, July 4, 1952, p. 1)

July 5 — 6:00 a.m. Four commercial pilots flying at 9,000 feet above the Hanford atomic site in Washington State observe a disc just below a deck of wispy clouds directly above their C-46. The witnesses are Capt. John Baldwin, Capt. George Robertson, H. D. Shenkel, and Steven Summers. Baldwin says that the disc stands still at first and then seems to back away and change shape, becoming flat, gaining speed, and then disappearing. Robertson says “we couldn’t pick it up on our radar. We reversed our course and went back, but we couldn’t spot it again.” (NICAP, “C-46 Crew Observe Disc over AEC Plant”; Hynek UFO Report, p. 53; Sparks, p. 145; Swords 149)
July 5 — 7:58 p.m. Oklahoma State Patrolman Arthur Myers Hamilton is flying five miles south-southeast of Norman, Oklahoma, in a State Patrol airplane when he sees three dark discs 4–8 miles away at 6,000 feet hover for 15 seconds then fly away, silhouetted against a dark cloud. (NICAP, “Three Dark Discs Sighted from State Patrol Airplane”; Sparks, p. 145)

July 7 — Battelle issues its third status report on Project Stork to ATIC. It mentions that Hynek has been consulted on the observer’s data sheet, suggested some changes, and is in the process of interviewing astronomers about any potential sightings made by them. The group has studied and coded UFO reports from 1948. (“Seven Status Reports for Project Stork,” CUFON)

July 8 — A commissionaire on duty at an army depot in Ottawa, Ontario, sees a bright orange light about a quarter size of the full moon travel from south to north, turn, and travel south again. (Jan Aldrich; Project Magnet Case X)

July 9 — 12:45 p.m. USAF Maj. Claude K. Griffin is driving one mile north of Colorado Springs, Colorado, when he sees a luminous white object shaped like an airfoil moving slowly and erratically like a corkscrew. He estimates its size at 100 feet, distance at 15–20 miles, and altitude at 30,000 feet, heading northwest. Griffin stops the car to watch for 12 minutes. USAF Maj. E. R. Hayden and his wife come out of their house and look at the object in a 4x rifle scope. He describes it as rectangular, silver on one side, and black on the other. It flutters as it moves slowly north-northwest above 20,000 feet 20 miles away. It gains altitude and gradually diminishes to a black dot, then accelerates to a high speed and disappears. ([Blue Book documents]; Sparks, p. 145)

July 9 — 5:30 p.m. Farmer John Mittl watches an aluminum, oval-shaped object silently change direction and attitude above his farm 2 miles east of Kutztown, Pennsylvania, finally tipping on end and departing. He manages to take three photos. (Claude Falkstrom and Curt Collins, “John Mittl: From Unsolved UFOs to Astral Encounters,” The Saucers That Time Forgot,” July 13, 2018)

July 10 — 8:18 p.m. Capt. James E. Lundy and First Officer Leon Blanks are flying a National Airlines C-60 airplane 15 miles south of Quantico, Virginia, when they see an object resembling an aircraft landing light. The object becomes brighter as it approaches from the north. It then performs a climbing turn away from the aircraft and its appearance changes, resembling a light emitted by a red flare. Visible for 10 minutes, it is flying too fast for any known aircraft. (NICAP, “Light Maneuvers near C-60 Airliner”; Sparks, p. 146)

July 10 — Night. A Marine pilot on night maneuvers near Marine Corps Base Quantico, Virginia, spots two green objects shoot straight across the sky at terrific speed at a high altitude. (“Radar Sees ‘Saucers,’ AF Investigating,” July 22, 1952, pp. 1A, 6A)

July 10 — Night. Forty crew members of the Canadian destroyer HMCS Crusader off Korea see two shiny discs and track them on radar. The radar fix places them at 10,560 feet altitude and 7 miles distant. (NICAP, “Naval Destroyer Observes Two Discs / Tracks on Radar”)

July 12 — 8:42 p.m. O’Hare AFB weather observer Capt. W. J. Shea and a civilian, Jane Morrison, watch three lights, one main red light with smaller white lights on each side, traveling 500 mph at 40,000–50,000 feet over Montrose Beach, Chicago, Illinois, from the west-northwest. They accelerate to the south and make a 180° turn heading north-northwest, then disappear. The UFO is seen by 400+ people, with 14 others making reports to the 4706th Defense Wing located at O’Hare Airport. (Ruppelt, p. 153; Sparks, pp. 146–147)

July 12 — 9:04 p.m. Two USAF F-86 Sabre jets with the 62nd Flight Squadron are flying at 22,000 feet on a routine training mission (or on a scramble mission) over Arlington Heights, Illinois. Capt. Robert W. Casey Jr., after coming out of a right turn, sees an oblong yellowish lighted object with an exhaust moving in a straight course about 15 miles away south of Elgin, Illinois, at 22,000 feet traveling at 800 mph. The F-86 pursues at maximum speed, but the object pulls away. Both pilots hear a strange radio transmission on their restricted communications channel during the pursuit saying the name of the pursuit pilot, Casey, in an ethereal “ghost-like” monotone. Apparently, this is a prank by Casey’s fighter pilot buddies at the 62nd who are monitoring his channel, though this is later officially denied by the 62nd. (NICAP, “F-86 on Scramble Mission / Strange Radio Transmission”; Sparks, p. 147)

July 13 — 4:00 a.m. Capt. William Bruen, piloting National Airline Flight 611 heading north from Jacksonville, Florida, sees a round ball of bluish-white light about 60 miles southwest of Washington, D.C., hovering to the west then ascending to the airliner’s altitude of 11,000 feet, then parallel course off left wing at about 2 miles distance. It takes off upwards at 1,000 mph when Bruen turns on all aircraft lights. (NICAP, “Light Ascends, Paces Aircraft, Takes Off Vertically”; Hynek UFO Report, pp. 90–91; Sparks, p. 148)

July 14 — The Ground Observer Corps expands into Operation Skywatch, consisting of 750,000 volunteers aged 7 to 86 years old working around the clock in shifts at more than 16,000 posts and 73 filter centers to detect a sneak
attack against the United States. The expansion follows an Army announcement from a few weeks earlier that antiaircraft guns and personnel are on continuous duty in key areas. (Radomes.org, “Ground Observer Corps,” January 31, 2001; Shoot 21–22)

July 14 — 9:12 p.m. Some 8,000 feet above the Chesapeake Bay in Maryland/Virginia, Capt. William B. Nash and copilot First Officer William H. Fortenberry, flying a Pan American Airways DC-4, see six crimson dots at 30°. The dots are streaking in their direction like tracer bullets. As they get closer, they resolve into reddish-orange circles, about 100 feet in diameter and 15 feet thick, with sharply defined edges. Nash says they are holding a “narrow echelon formation.” When they are nearly underneath the aircraft, “they flipped on edge, the sides to the left of us going up and the glowing surfaces facing right. While all were in the edgewise position, the last five slide over and past the leader so that the echelon was now tail foremost.” Then they all flip over again into a flat attitude. Two new, brighter UFOs join the formation, and the lights of all eight objects blink out then come on again. They all speed westward (Nash estimates 6,000–12,000 mph) and climb in a graceful 45° arc. The entire sighting lasts only 15 seconds. Possible corroboration comes from a sighting in Camden, New Jersey, although the date is uncertain. (Wikipedia, “Nash-Fortenberry UFO sighting”; “Miami Pilots Spot 8 Saucers Flying in Formation,” Miami (Fla.) Herald, July 16, 1952, pp. 1A, 8A; NICAP, “Nash / Fortenberry Case”; Sparks, p. 150; William B. Nash and William H. Fortenberry, “We Flew Above Flying Saucers,” True, October 1952, pp. 65, 110–112; James E. McDonald, “Statement on Unidentified Flying Objects,” in Symposium on Unidentified Flying Objects, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, p. 47; Clark III 791; Good Above, pp. 269–270; “The Pilot’s Tale,” Saturday Night Uforia; Swords 149–150; Shoot 22–24; Michael D. Swords, “Classic Cases from the APRO Files,” IUR 24, no. 2 (Summer 1999): 21–22; Thomas Tulien, “The 1952 Nash/Fortenberry Sighting Revisited,” IUR 27, no. 1 (Spring 2002): 20–23, 27–28, reprinted in Project 1947; Michael D. Swords, “Intelligent Motions,” IUR 33, no. 1 (March 2010): 11, 15)

July 15 — The Lorenzens publish the first issue of the APRO Bulletin. (APRO Bulletin 1, no. 1 (July 1952))

Mid-July — Ruppelt says that rumors persist that the Air Force is braced for an expected invasion by UFOs. “Had these rumormongers been at ATIC in mid-July they would have thought that the invasion was in full swing.” He talks to a scientist “from an agency that I can’t name” about the build-up of UFO reports. From his study of reports, the scientist predicts that “within the next few days they’re going to blow up and you’re going to have the grandaddy of all UFO sightings. The sighting will occur in Washington or New York, probably Washington.” Brad Sparks identifies the scientist as Stefan T. Possony, acting chief of the AFOIN Special Study Group and adviser to Gen. John A. Samford. (Ruppelt, pp. 154–155, 157; NICAP, “The 1952 Sighting Wave”)

July 16 — 9:35 a.m. US Coast Guard photographer Seaman Shell R. Alpert sees several bright lights through a window screen (no glass) from his position inside the photo lab at Coast Guard Air Station Salem [now Winter Island Marine Park], Massachusetts, while cleaning a camera. He watches them for 5–6 seconds, calls out to Hospitalman 1st Class Thomas E. Flaherty from sick bay to see them. The objects dim then brighten suddenly. Alpert grabs a camera and films 4 roughly elliptical irregular blobs of light in formation through the screen, on Super XX cut film 4-by-5-inch format. The lights disappear suddenly in a flash. The photo is explained as showing reflections of light sources from inside the building, but this ignores the fact that the window is open, and the camera is not pointed through glass. (UFOEv, p. 88; Sparks, p. 151; Joe Nyman and Barry Greenwood, “The July 1952 Coast Guard Photo Revisited,” IUR 26, no. 4 (Winter 2001–2002): 3–5, 25–30; Michael D. Lampen, “Mystery Alpert Objects,” IUR 27, no. 2 (Summer 2002): 27; “The Photographer’s Tale,” Saturday Night Uforia, December 3, 2012)

July 16 — 9:00 p.m. Paul R. Hill, an aeronautical research engineer, is watching the sky with his future wife, Frances Hoback, on Chesapeake Avenue (near LaSalle Avenue) in Hampton, Virginia, when he notices two amber-colored lights coming in over Hampton Roads from the south at 500 mph. They slow down and make a U turn, moving side by side until they revolve around each other at a high rate of speed in a tight circle 200–300 feet in diameter. A third UFO comes racing up from the direction of Virginia Beach and falls in several hundred feet below the other two, making a V formation. A fourth UFO comes in from up the James River and joins the group, which heads south at 500 mph. “Their ability to make tight circling turns was amazing.” Around 9:03 p.m., the four UFOs have moved out of sight to the south. (NICAP, “Two Pairs of Objects Maneuver Overhead”; [Blue Book documents]; UFOEv, p. 57; Sparks, p. 150)

July 17 — 6:30 p.m. A woman leaving Yarmouth Harbour, Nova Scotia, on the SS Yarmouth watches seven silvery objects in an inverted triangular formation for 2 minutes. They hover momentarily, descend slowly, and disappear. (Chris Rutkowski, Canada’s UFOs: Declassified, August Night, 2022, pp. 268–269)

July 17 or 18 — 10:10 p.m. T/Sgt. Thurman C. Mahone and A/3c Gene A. Jennings at Lockbourne AFB [now Rickenbacker Air National Guard Base] in Lockbourne, Ohio, see an amber-colored, elliptical-shaped object with
a small flame at the rear, periodically increasing in brightness. It moves swiftly, giving off a resonant beating sound. (NICAP, “July 18, 1952: Lockbourne, Ohio”; Sparks, p. 151)

July 18 — Early morning. American Airlines pilot Capt. Paul L. Carpenter, First Officer George Fell, and Flight Engineer Quilici watch several dull-red objects with a “yellowish tinge” speeding around in the air at an altitude of 25,000–30,000 feet near Denver, Colorado, during a non-stop flight from Los Angeles to Chicago. A maximum of three objects are seen at one time over a 2-minute period. Carpenter says they seem to be about 100 miles away. The first object is moving south by southeast. One minute after it disappears, two more come into view going westward and another one eastward. “The two traveling westward disappeared about two seconds then reappeared traveling eastward.” (Loren E. Gross, UFOs, a History: 1952, June–July 20th, The Author, 1986, p. 60)

July 18 — Capt. Edward Ruppelt tells the press in Dayton, Ohio, that ground radar has tracked UFOs at speeds of 1,500–2,000 mph, that jet fighters scrambled to intercept them have failed, and that “persons making these reports actually see something in the sky,” but the Air Force does not know what they are. (“‘Saucer’ Sightings Spur AF’s Drive to End Mystery,” Dayton (Ohio) Journal Herald, July 18, 1952, pp. 1, 10; Loren E. Gross, UFOs, a History: 1952, June–July 20th, The Author, 1986, p. 66)

July 18 — 6:10 p.m. André Frégnale is hiking near Lac Chauvet, Puy-de-Dôme, France, when he sees a disc flying west to east in a straight line at constant speed. He immediately takes two photos when the object is at its largest apparent size, then two others when it is moving away to his left. It is in view for 50 seconds. (“Une soucoupe volante,” Le Méridional, July 25, 1952, pp. 1, 8; Pierre Guérin, “A Scientific Analysis of Four Photographs of a Flying Disk near Lac Chauvet (France),” Journal of Scientific Exploration 8, no. 4 (1994): 447–469; Alain Delmon, “Les Cas Solides: Lac Chauvet, France, 1952,” Les OVNI:s: Intelligences non-humaines ou mythe moderne?, December 26, 2003)

July 18 — 9:45 p.m. Three Air Force officers and four enlisted men at Patrick AFB, near Cocoa Beach, Florida, see a series of hovering and maneuvering red-orange lights moving in a variety of directions. (NICAP, “Hovering and Maneuvering Lights”; Sparks, p. 151)

July 19 — 2:55 a.m. An experienced civilian pilot watches an elliptical-shaped object with a light fringe over Williston, North Dakota, for 5 minutes. It descends fast and makes a 360° then a 180° turn. (Sparks, p. 151)

July 19 — Lincoln LaPaz tells newspapermen in Albuquerque, New Mexico, that UFOs “can reverse directions and cruise back and forth; they travel at high speeds in wide sweeping circles…. They travel at high altitudes and can be followed as long as 3½ minutes.” (“Luminous Objects Flooding Southwest Skies Not Shooting Stars or Meteorites, Says LaPaz,” July 20, 1952, p. 1; Loren E. Gross, UFOs, a History: 1952, June–July 20th, The Author, 1986, p. 67)

July 19 — 10:00 a.m. Engineer John A. Anderson and other technicians at the Savannah River Atomic Site near Aiken, South Carolina, watch a greenish glowing object dart back and forth silently and erratically at high speed above the plant. It is in view for 2 minutes, moving constantly and changing direction at sharp angles. The object disappears over the horizon at “tremendous velocity.” (NICAP, “Multiple Witnesses Observe Strange Maneuvering Object”; James E. McDonald, “Statement on Unidentified Flying Objects,” in Symposium on Unidentified Flying Objects, Hearings, US House Committee on Science and Astronautics. 90th Cong., 2nd Sess., July 29, 1968, p. 51; Nukes 47–48)

July 19 — 4:30 p.m. Agricultural engineer Pedro Bardi and others on a farm in the Madre de Dios region of Peru see a UFO flying at 325 feet shortly after their short-wave radio goes dead. Bardi says it is a bit smaller than a DC-3 and is making a buzzing sound. It shows up 4 minutes later at Puerto Maldonado, 75 miles away, and Customs Administrator Domingo Troncoso photographs it. The photo shows an elongated object trailing smoke, passing over the top of a tree and in front of a cumulus cloud. (Curt Collins, “The Case of the Smoking Saucer.” In Honor of Jim Moseley, November 3, 2014; Curt Collins, “Jim Moseley: The Case of the Smoking Saucer.” The Saucers That Time Forgot, August 18, 2018)

July 19 — 10:00 p.m. Six luminous round objects are seen by a Chicago, Illinois, woman moving horizontally and vertically as they cavort around in the sky. The same night, a UFO is seen by three witnesses at the Ground Observer Corps post at the city hall in Elgin, Illinois. (Loren E. Gross, UFOs, a History: 1952, June–July 20th, The Author, 1986, p. 68)

July 19–20 — 11:40 p.m. Air traffic controller Edward Nugent at Washington National [now Ronald Reagan National] Airport’s Air Route Traffic Control (ARTC) in D.C. picks up a formation of seven objects on his long-range radar. They are southeast of Andrews AFB [now Joint Base Andrews] in Prince George’s County, Maryland, moving along at 100–130 mph. Two of the targets suddenly accelerate and vanish off the scope within seconds.
One apparently reaches a speed of 7,000 mph. A second, shorter-range radar in the airport control tower (operated by Howard Cocklin and Joseph Zacco Jr.) and another at Andrews AFB has also tracked the objects. For 6 hours, between 8 and 10 UFOs are tracked on radar. Senior Air Traffic Controller Harry G. Barnes says that “They followed no set course, were not in any formation, and we only seemed to be able to track them for about three miles at a time…. I can safely deduce that they performed gyrations which no known aircraft could perform.”

July 19 — 12:00 midnight. A part-time farmer named Constantine and a hired hand named Davis are curing tobacco when they see two cigar-shaped objects—one hovering, the other moving to the east—for 3–4 minutes near Centerville, Virginia. Both objects are translucent, lit from within, and emit an exhaust from one end. They both ascend until they disappear. (Sparks, p. 151)

July 21 — 10:00 a.m. Ruppelt first hears about the National Airport sightings in D.C. when he buys a newspaper in the Washington National Airport terminal. He has been to Andrews AFB in Maryland the day before with his boss Col. Donald L. Bower, and no one had said anything. At 1:00 p.m., Maj. Dewey Fournet calls Ruppelt to come to a briefing with Capt. Berkow, a USAF intelligence officer from Bolling AFB in D.C. Ruppelt hears that President Truman is personally interested and wants a full investigation, but Bower orders Ruppelt to return to Wright-Patterson AFB in Ohio. (Ruppelt, pp. 158–159; Thomas Tulien, ed., Proceedings of the Sign Historical Group UFO History Workshop, Sign Historical Group, November 2001, pp. 46–47)

July 21 — 10:30 a.m. Radar used to measure wind velocity in the upper atmosphere at Dobbins Air Force Base, Marietta, Georgia, detects an unusual object flying at 50,000 feet. Observing the blip are four radar technicians who state that “it could have been an electromagnetic phenomenon but they did not believe it was.” A second blip appears on the radar moving toward the wind-finding weather balloon and passing through it three separate times. USAF officials report “in private conversations” that the object moves at 1,200 mph, slows considerably for 3–5 minutes, then disappears. The Civilian Defense director in Atlanta, George M. “Pup” Phillips, receives a report of the object but has “no details.” Col. Murray C. Woodbury, commander of the 35th Air Division at Dobbins, checks with “defense officials in Washington” before telling the press that such reports are sent to the Air Technical Intelligence Center (Project Blue Book) in Dayton, Ohio, for evaluation. Surprisingly, he admits, “We try to interpret such objects and identify them, but so far we have been unsuccessful.” (NICAP, “Blip Makes Passes on Wind-Finding Target”; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1952 July 21st–31st, Supplemental Notes, The Author, 2001, p. 3; Sparks, p. 152)

July 21 — 6:30 p.m. USAF pilot Capt. Edward E. Dougher and WAF Lt. Josephine J. Stong, separated by one mile on the ground in Wiesbaden, Germany, see 4 bright yellowish lights. Dougher watches them separate, with two climbing and two flying away level in the opposite direction. His wife Barbara joins him as they fly away. Stong sees two reddish lights fly in opposite directions for 10–15 minutes. (NICAP, “Separated Witnesses Observe Maneuvering Lights”; Sparks, p. 152; Michael D. Swords, “Intelligent Motions,” IUR 33, no. 1 (March 2010): 12, 15)

July 22 — At Wright-Patterson AFB, Ruppelt meets with ATIC electronics specialist Capt. Roy L. James (who harbors a “personal dislike for UFOs”). He tells Ruppelt that weather conditions caused the Washington radar returns.

July 22 — Pikes Peak Broadcasting Company President Joseph H. Rohrer gives a lecture (one of a series) on flying saucers at a chamber of commerce meeting in Pueblo, Colorado. He mixes a few genuine cases with some crashed saucer fiction, claiming that 7 discs have been retrieved by the US government, three of them forced down in Montana. One occupant has survived, he says, a little man 3 feet tall who is later kept alive in a secret site in

July 22 — 10:20 p.m. A bluish-green UFO is seen over Boston, Massachusetts, and a few minutes later it is picked up by GCI radar. When Ground Control vectors an F-94 toward the UFO, the pilot sees the UFO near Braintree and locks on to it with his own radar. But the object easily leaves the jet behind. (NICAP, “F-94B Chases Object / With Airborne Radar Tracking”; Keyhoe, *FS from OS*, p. 67; Sparks, pp. 154–155)

July 22–23 — 10:30 p.m. An air traffic control tower operator at MacDill AFB in Tampa, Florida, watches for 30 minutes a red-greenish-blue object to the west-southwest at about 45° elevation with 2 other objects to the north of it, smaller and lower in elevation. He sights another object to the south-southeast about 30° elevation at 11:30 p.m. MacDill radar tracks an object at 12:03 a.m. 37 miles away at 41,200 feet altitude heading almost directly toward the base at 532 mph. It also tracks an object to the south-southeast at an altitude of 41,000 feet (reportedly Navy and CAA radars also track the object). At 12:08 a.m., the pilot and copilot of a B-29 bomber on landing approach are vectored by MacDill tower operator to investigate the UFO. They see a high-speed object at 40,000 feet heading towards MacDill and traveling faster than the B-29. The B-29 fire control radar locks onto the object and prepares to fire just as the UFO changes course and disappears at 4,600 mph. Four airmen at the MacDill radar site see an object as it passes nearly overhead. MacDill radar loses the object at about 12:15 a.m. Civilians in Tampa also see two yellowish-orange discs maneuvering around the air base. (Sparks, p. 156; *Tampa (Fla.) Daily Times*, July 23, 1952, p. 1)

July 22–23 — 10:50 p.m. Crews of several USAF F-94 jet interceptors from Dover AFB, Delaware, make 13 visual sightings and one radar tracking of blue-white lights around Trenton, New Jersey, continuing until 12:45 a.m. White, green, and blue lights are seen by ground observers and F-94 pilots moving in arcs and blinking out suddenly. One F-94 crew gets a radar lock-on from 30,000 feet away of an object the size of an F-94. At 9,000 feet distance, the object makes a sharp right turn, suddenly drops in height, and disappears. (Sparks, p. 156)

July 23 — 2:15 a.m. Seaman Henry J. Arnpriester is on watch at Nahant (Massachusetts) Coast Guard Station [now closed] when he sees two bluish lights approximately 5 feet in diameter. They appear as flat, disc-shaped objects having no aerodynamic features and move without sound or exhaust trail at a speed faster than a four-engine airliner at an altitude of 1,100 to 2,000 feet. When they are approximately 1.5 miles from the point of observation, they execute an extremely sharp turn similar to the path of a ball bouncing off a wall. (Lt. Col. Robert S. Jones, “Spot Intelligence Report,” July 29, 1952; Sparks, p. 156)

July 23 — 7:36 a.m. US Navy radar at Jamestown, Rhode Island, tracks a high-speed target heading north at 42,000 feet. It is confirmed by ADC radar at Camp Hero [now closed] at Montauk Point, New York. F-94s and F-86s are scrambled unsuccessfully from Westover AFB [now Westover Air National Guard Base] in Chicopee, Massachusetts. (NICAP, “Jets Scrambled / High Speed Object at 45,000’ Feet”; Sparks, p. 156)

July 23 — 8:40 a.m. The crews of three USAF F-94 jet interceptors see a large silver object, shaped like a long pear with 2–3 squares beneath it, flying at 170–210 mph over Pottstown, Pennsylvania. A smaller object, delta-shaped or swept-back, flies around it at 1,150–1,720 mph. ([Blue Book document]; Sparks, p. 157)

July 23 — 12:50 p.m. Crews of two USAF F-94 jet interceptors flying at 35,000–46,000 feet altitude near Altoona, Pennsylvania, see three cylindrical objects in a vertical-stack formation fly at an altitude of 50,000–80,000 feet for 20 minutes. (NICAP, “July 23, 1952: Altoona, Penn.”; Sparks, p. 157)

July 23 — 7:00–8:00 p.m. Owner Edwin C. Johnston and more than 20 employees of Aircraft Hydroforming at Culver City, California, see a bright silvery elliptical object that moves northwest over the Northrup aircraft plant in nearby Hawthorne, then stops and hovers. Two small discs emerge and circle around the area before rejoining the mother ship. The object then climbs straight up out of sight at tremendous speed. (“Aircraft Co. Owner Sees ‘Discs’ Four Nights in Row,” *Redlands (Calif.) Daily Facts*, July 24, 1952, p. 9)

July 23 — 7:15 p.m. Many witnesses at Lockbourne AFB [now Rickenbacker Air National Guard Base] in Lockbourne, Ohio, including visiting Capt. Eugene E. McManus from Turner AFB [now Naval Air Station Albany] in Albany, Georgia, observe four round, fluorescent white objects hovering near the base at 75,000 feet. An Air force pilot named Capt. Swartz in Flight Service at Wright-Patterson AFB, Dayton, Ohio, radios in the report that the objects
are balloons. Two F-84 jets are scrambled at 8:15 p.m. and identify them as a balloon cluster. The objects, seen over many other areas of central Ohio (Capt. Edward J. Ruppelt says he was called out to see it over Wright-Patterson), are probably USAF reconnaissance balloons sent up from Clinton County Airport in Wilmington, Ohio. (NICAP, “July 23, 1952, Lockbourne, Ohio, UFO Report”; Clark III 395–398)

July 23 — Night. Contactee Orfeo Angelucci feels compelled to walk over the Glendale-Hyperion Bridge in Glendale, California. He feels an odd sensation and suddenly sees in front of him a soap-bubble-like object that turns into a metallic craft. He gets aboard and is taken on his first trip into outer space. (Orfeo Angelucci, The Secret of the Saucers, Amherst Press, 1955, pp. 18–36)

July 24 — 3:40 p.m. Two USAF pilots, Lt. Col. John L. McGinn and Lt. Col. John R. Barton, are flying a B-25 out of Hamilton AFB [now closed] in Novato, California, for Colorado Springs. They are over Carson Sink, Nevada, at 11,000 feet when they see three unknown objects make a left bank and fly to within 400–600 yards of the plane. They are three bright silver, delta-wing craft with no tails and no canopies. The pilots see a clean upper triangular wing with a definite ridge that runs from the nose to the tail. They estimate the speed as at least three times that of any conventional jet. (Wikipedia, “Carson Sink UFO incident”; NICAP, “B-26 Crew Encounters 3 Triangular UFOs”; NICAP, “The Carson Sink Case”; Sparks, p. 157; Ruppelt, pp. 10–12; Michael Hall, “When UFOs Were Serious Business: Then and Today,” IUR 28, no. 4 (Winter 2003–2004); 5; Michael D. Swords, “Intelligent Motions,” IUR 33, no. 1 (March 2010): 12, 15)

July 25 (or April 25) — 3:00 a.m. Carlo Rossi is on his way to a fishing spot on the Serchio river near San Pietro a Vico, Lucca, Italy. He notices an odd light above the river and finds that it belongs to an enormous disc-shaped object with a transparent dome. It is about 82 feet in diameter and apparently taking up water through a long tube. The object is standing in the river on three legs and has a ladder reaching down next to the tube. Rossi thinks it is hovering by means of propellors. Suddenly a porthole opens, and a human figure looks out and notices him. Rossi begins to leave, but a green ray passes above his head and he feels an electric shock. The object takes off and disappears to the west. (“Le Nostre Analisi: Precisazioni sul Caso di S. Pietro e Vico (1952),” Notiziario UFO, no. 67 (July/Sept. 1975): 4–9; Patrick Gross, URECAT, September 12, 2006; 1Pinotti 42–46)

July 25 — Capt. J. W. Titus of the 140th Wing Medical Group sees two oval-shaped objects flying in formation at 400–600 mph in Portales, New Mexico. They are silent and leave no vapor trail. At one point, they make an abrupt 80° turn and fly off to the north. (Nukes 85–86)

July 26–27 — 8:15 p.m. Flying saucers return to the nation’s capital, only one week after a massive number of radar-visual UFO sightings above restricted air space in Washington, D.C. At 8:15 p.m., pilot Capt. Berkow and a stewardess of a National Airlines flight near Washington National Airport [now Ronald Reagan National] see several objects resembling the glow of a cigarette high above them. The lights move at around 100 mph. Soon, the airport and Andrews AFB in Maryland are tracking a dozen UFOs throughout much of the sky, all traveling 90–100 mph. By midnight, two F-94s are scrambled from New Castle AFB in Delaware to intercept them. National Airport staff hustle newspaper reporters away from the air traffic control tower, saying that interceptions are classified (but Project Blue Book chief Capt. Edward J. Ruppelt suspects that the Air Force does not want the press around when they finally get a good look at a saucer). The UFOs are seen on radar for 2 hours, but when the jets approach, the blips disappear. When the pilots return to base, they show up again. Reports are reaching Langley AFB about rotating objects that give off alternating colors over Newport News, Virginia. Another F-94 is scrambled, the pilot gets a radar lock, and the target speeds away. At National Airport, the objects reappear shortly before dawn, and two more F-94s are scrambled. The pilots obtain radar locks; again, the objects speed away. USAF press spokesman Albert M. Chop is in the airport radar tower and notes that everyone there believes the targets are “very probably caused by solid metallic objects.” One F-94 pilot, Lieut. William Patterson, says, “I saw several bright lights. I was at my maximum speed, but even then I had no closing speed.” A USAF air intelligence report later states that the radar crew is emphatic that the returns are solid and not temperature inversions. In 1969, however, Colorado project physicist Gordon David Thayer concludes that the radar events involved temperature inversions. He believes the visual sightings were caused by meteors and scintillating stars. University of Arizona atmospheric physicist James McDonald disagreed, arguing that Thayer’s own data did not support his conclusion. Colorado project psychologist Michael Wertheimer interviews many of the radar operators; nearly all disagree with the inversion explanation and maintain that all experienced radar operators have no trouble identifying such phenomena. (NICAP, “The Washington National Sightings”; Richard Hall, “The Washington Invasion, July 26/27, 1952”; Clark III 1252–1255; Ruppelt, pp. 163–167; Condon, pp. 157–158, 862–867; Swords 156–159; Good Above, pp. 270–272; Patrick Gross, “The Washington D.C. UFO Flap of 1952”; Sparks, p. 158; Kevin D. Randle, Invasion Washington: UFOs over the Capitol, HarperTorch, 2001, pp. 68–76, 127–148, 253–260; Shoot 42–47)
July 26 — 5:15 p.m. Air Defense Command radar detects a UFO over Williams, California. An F-94 jet interceptor is scrambled and locks onto the object with its radar. The crew sees a yellow-orange light. As confirmed by ground and airborne radar, the UFO plays tag with the F-94, alternately accelerating away when it gets close, then slowing down until it catches up again. (NICAP, “F-94 Intercept with ADC Detection”; Sparks, p. 158)

July 26 — 11:00 p.m. Three women in Oran, Algeria, notice a large, orange-red, luminous patch in the sky. It travels from east to west, halts, then vanishes. It is one of many UFOs seen in the province of Oran over several weeks. (ClearIntent, pp. 120–121)

July 27 — 10:40 a.m. Bowling Green State University biologist Charles H. Otis sees a “flotilla” of UFOs “seemingly floating along, making no sound” at 3724 Dexter Road, Ann Arbor, Michigan. He grabs a pair of 5x binoculars and studies them until they disappear. He counts 15 of them in a loose formation, moving slowly. One object leaves the formation and disappears in a burst of speed. The body of each seems to be elongated but split at the rear. A bright glow is visible in the front, and they have a bifurcated tail streaming out horizontally, never changing in length (UFOEv, pp. 50–51)

July 27 — 6:35 p.m. A group of eight pilots and engineers see a large, silvery object moving rapidly at a high altitude over Manhattan Beach, California. After it makes a turn, the UFO separates into 7 discs that form into groups, circle, and speed out of sight. Former Navy pilot and aircraft engineer J. E. Kempf says the formation looks like a “stack of coins.” (NICAP, “Large Object Separates into 7 Discs”; Sparks, p. 159; Michael D. Swords, “Intelligent Motions,” IUR 33, no. 1 (March 2010): 13, 15)

July 28 — Early morning. While napping between shifts as a heavy-equipment operator in the Nevada desert, Truman Bethurum is awakened by 8 small men who “seem to be of Latin extraction.” They take him to a nearby flying saucer where he meets the captain, a “gorgeous woman, shorter than any of the men, neatly attired, and also having a Latin appearance: coal black hair and olive complexion. She appeared to be about 42 years old,” although Bethurum learns that she is hundreds of years old. Her name is Aura Rhanes. Her ship is called a “scow,” and her crew is from the planet Clarion, a world that is always on the other side of the moon. He later tells this story and his later adventures in his 1954 book Aboard a Flying Saucer, ghostwritten by Mary Kay Tennison. (Truman Bethurum, Aboard a Flying Saucer, DeVors, 1954; Clark III 192–194)

July 28 — USAF Maj. Gen. John A. Samford secretly orders a deemphasis on or elimination of human anecdotal UFO reports. Instead, they would be “going on instruments,” as worded in his briefing, so that he can close down Blue Book. Technological hurdles and budget limits greatly delay the plan, but Blue Book does transition into a propaganda debunking mission over the next 6 months. (Clark III 813)

July 28 — Late afternoon. Ruppelt and Maj. Ed Gregory arrive in Washington, D.C., during the big UFO flap, dodging newspaper reporters at the Roger Smith Hotel. Blue Book receives an astonishing total of 50 UFO reports in a single day. UFO inquiries are jamming the Pentagon telephones. Air Force and CIA officials concede that the Soviet Union might take advantage of the confusion. (Ruppelt, pp. 166–167)

July 28 — According to the United Press, the Air Defense Command has alerted jet interceptor pilots to take off instantly in pursuit of any flying saucers. The International News Service amplifies this by quoting the Air Force that orders have been issued to shoot them down if they refuse to land. The Air Force refuses to confirm this, but USAF Deputy Press Officer Lt. Col. Moncel A. Monts states that “jet pilots are, and have been, under orders to investigate unidentified objects and to shoot them down if they can’t talk them down.” (“Air Force Alerted for ‘Discs’: Sightings over Washington Put Jets at Ready,” Honolulu Star-Bulletin, July 28, 1952, p. 1; “Jets on 24-Hour Alert to Shoot Down ‘Saucers,’” San Francisco Examiner, July 29, 1952, p. 2; Shoot 49–50; David Rudiak, “1952 Flying Saucer ‘Shoot Down’ Stories,” Roswell Proof)

July 28 — In charge of jet interceptions over Washington, D.C., during the big UFO flap, USAF Director of Operations Gen. Roger M. Ramey issues an ambiguous public denial that the interceptors have been ordered to shoot down any saucers. However, newspaper articles and other documents say there was such an order. (David Rudiak, “Background on Gen. Roger M. Ramey,” June 4, 2013)

July 28 — President Truman, resting in Kansas City, Missouri, after the Democratic Convention, calls CIA Director Walter Bedell Smith and asks him to investigate the Air Force’s mishandling of the Washington National sightings. Smith later directs, through Deputy Director for Intelligence Loftus E. Becker, that a CIA/OSI group be put together to review the USAF UFO intelligence program at ATIC. Truman’s involvement is meant to be kept Top Secret and is not revealed until 1992. (Clark III 1012)

July 28 — Canadian researcher Wilbert B. Smith allegedly shows Rear Admiral Herbert B. Knowles a metallic piece from a saucer that was shot down near Washington, D.C. It is twice the size of a man’s thumb and has been loaned to him by the Air Force, but he must return it to the CIA (or another secret agency). (David Rudiak, “Wilbert B. Smith,” Roswell Proof; Frank Edwards, FS Serious Business, Bantam ed., 1966, pp. 48–49; Good Above, p. 188)
July 28 — UK Prime Minister Winston Churchill writes to William Sidney, Secretary of State for Air, and scientific adviser and friend Lord Cherwell, saying, “What does all this stuff about flying saucers amount to? What can it mean? What is the truth? Let me have a report at your convenience.” The response, dated August 9, begins: “The various reports about unidentified flying objects, described by the Press as ‘flying saucers,’ were the subject of a full Intelligence study in 1951” [presumably the report by the Flying Saucer Working Party]. (“Records Show Winston Churchill’s Interest in UFOs,” The Cosmic Report, December 12, 2020; Good Above, pp. 30, 448–449; UFOFiles2, pp. 43–44)

July 29 — 1:30 a.m. An Air Defense Command radar outside of Osceola, Wisconsin, picks up some unidentified targets. Four F-51s from St. Paul, Minnesota, are scrambled, but the targets are moving around so quickly that it is impossible to vector in on a single target. The F-51 pilots see many lights; one pilot at 25,000 feet sees an object blaze across the nose of his airplane. Two other pilots vainly try to climb up to a hovering light that is in the same position as the radar targets. ATIC’s Robert M. Olsson and Wendell Swanson explain the radar incident as a temperature inversion and the visual sighting as a meteor. (NICAP, “Clusters of Small Targets and One Large Target”; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1952 July 21st–31st, Supplemental Notes, The Author, 2001, pp. 80–85; Sparks, p. 161)

July 29 — Early morning. CAA radar tracks 8–12 UFOs at a time traveling 100–120 mph in a 10-mile arc around Washington, D.C. When an Eastern Airlines pilot tries to check on the radar targets at the request of the CAA at 3:00 a.m., he sees nothing. The targets disappear from CAA radar when the airliner approaches them and come back in behind him after he passes through the area. (“Air Force Debunks ‘Saucers’ As Just ‘Natural Phenomena,’” New York Times, July 30, 1952, pp. 1, 10)

July 29 — 10:00 a.m. President Truman tells his air force liaison, Robert B. Landry, to find out what is going on with UFOs. Landry calls ATIC and eventually reaches Ruppelt, who tells him that weather may have caused the radar targets, but there is no proof. He later learns that Truman is listening in. There is some evidence that Truman or Landry soon contact the National Security Council directly to find out how to proceed with the UFO problem. (Ruppelt, p. 167; Swords 170)

July 29 — 10:00 a.m. Several employees of Los Alamos Scientific Labs, New Mexico (including Robert B. Leachman, W. Schafer, E. T. Journey), see a white object moving east to west with a gyration motion. Two jet interceptors from Kirtland AFB in Albuquerque arrive 5 minutes later. The object disappears but reappears in front of the jets, makes a 360° turn, comes around in back, follows for 2 minutes, then disappears. (NICAP, “Jets Scrambled from Kirtland”; Hynek UFO Report, pp. 61–64; Sparks, p. 161)

July 29 — Four weather observers at Walker AFB [now closed] in Roswell, New Mexico, watch several high-speed discs through a theodolite. (Hynek UFO Report, pp. 114–115; Sparks, p. 161)

July 29 — An FBI memo from Victor P. Keay on “Flying Saucers” discusses a classified briefing about UFOs by Cmdr. Randall Boyd Jr. of the Air Intelligence Estimates Division to Norman W. Philcox, an FBI liaison to the Air Force. The Air Force has “failed to arrive at any satisfactory conclusion” on UFOs. Reports are being received from all parts of the US and distant parts of the world. Boyd explains that USAF has made no progress in ascertaining the nature of UFOs, but it is filing them into three classifications: reports by civilians on the ground, reports by commercial or military pilots, and reports by pilots that are confirmed by radar or ground observations. He concludes by writing that it is “not entirely impossible that the objects sighted may possibly be ships from another planet such as Mars,” but he adds that “air intelligence is fairly certain that these objects are not ships or missiles from another nation in this world.” (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1952 July 21st–31st, Supplemental Notes, The Author, 2001, pp. 55–56; ClearIntent, pp. 175–177)

July 29 — Ralph L. Clark, acting assistant director of the CIA Office of Scientific Intelligence, sends a memo to OSI Deputy Director Robert Amory Jr., indicating that the agency will be looking into UFO matters a bit more thoroughly, even though it has been collecting cases for the past three years (since 1949): “a special study group has been formed to review the subject to date. D/CI [Walter Bedell Smith] will participate in this study with D/SI [H. Marshall Chadwell], and a report should be ready about 15 August.” It alludes to his meeting with CIA rocket consultant Frederick C. Durant and others the previous day. (Ralph L. Clark, “Recent Sightings of Unexplained Objects,” July 29, 1952, reprinted in “The CUFON 1952 CIA UFO-Related Document Sampler”; Good Above, pp. 330, 505)

July 29 — Robert L. Farnsworth, president of the American Rocket Society, urges President Truman and defense officials to restrain the US armed forces from shooting at UFOs. He says that hostile action might alienate us from “beings of far superior powers.” (Robert L. Farnsworth, [Telegram to President Truman], July 28, 1952; “A Pro-Saucer Voice Heard,” New York Daily News, July 29, 1952, p. 2)
July 29 — An orange, oblong stationary object is observed at the airport in Macdonald, Manitoba, in the south-western sky for 2 minutes. It seems to change into a group of small round lights. They all disappear together. (Jan Aldrich; Project Second Storey)

July 29 — 9:15 p.m. Air Force Reserve Lt. Col. Robert G. LeCompte sees a flight of at least 10 luminous objects pass over Albuquerque, New Mexico. At first they appear overhead in no pattern, heading north, then shift to a V formation. They then shift into two rows. (NICAP, “AF Reserve Colonel Observes Rapid Ellipse”; Sparks, p. 163; Michael D. Swords, “Intelligent Motions,” IUR 33, no. 1 (March 2010): 13, 15)

July 29 — 9:35 p.m. Marine Pfc Ralph C. Mayher, using 16 mm film exposed at 24 frames per second, obtains footage of a high-speed UFO over Miami Beach, Florida. Retaining a few frames for personal study, Mayher submits the main portion of the film to the Air Force for analysis. The film is never returned, and no analysis report is ever released. Enlargements of a few frames show a fiery looking, roughly circular object, symmetrical, with two small peaks or projection on opposite sides of the disc. The CIA examines the film in 1957 and returns it with no comment or analysis. The Mayher case features prominently in the subsequent lawsuit by Ground Saucer Watch against the CIA and is important because it is a confirmed case of direct interaction of the CIA with a witness, clearly indicating that there was CIA interest in the subject. (NICAP, “Ralph Mayer / Miami Film”; Ralph Mayer, “I Proved Flying Saucers Are Real,” Pic, June 1954; Good Above, pp. 355–356)

July 29 (or July 28) — 9:40 p.m. An Aircraft and Warning Station in Port Huron, Michigan, tracks an unidentified return on radar for 20 minutes. GCI asks Capt. Edward J. Slowinski flying an F-94B on a practice run to investigate. The pilot sees a bright, flashing, colored light in the location of the blip 29 miles west of Port Huron and follows it for 20 minutes. Slowinski is unable to close on the object. (NICAP, “Key Radar Case (CCL #17)”; Sparks, p. 160; James E. McDonald, “Statement on Unidentified Flying Objects,” in Symposium on Unidentified Flying Objects, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 72–73; Center for UFO Studies, [documents and case files])

July 30 — Flight Sgt. Roland Hughes of No. 20 Squadron RAF is on a training flight in a de Havilland Vampire FB-9 jet fighter and returning to base at RAF Oldenburg, Germany, when he sees a “gleaming silver, metallic disc” drop down from above and fly alongside his aircraft for several seconds before speeding off. The object is about 100 feet long. Its surface is shiny “like tinfoil,” highly reflective, and “without a single crease or crinkle in it.” On August 5, Hughes is ordered to fly to RAF Faßberg for further questioning. He arrives and finds a number of officers, including his commander and the UK Minister of Supply, Duncan Sandys (Winston Churchill’s son-in-law), who asks Hughes how many beers he had before his saucer sighting. The Air Commanding Officer then reveals that the object had also been tracked on radar going faster than any known aircraft. This convinces Sandys that the case is a serious one, a view that he communicates to Lord Cherwell, the government’s chief scientific adviser, in a letter, saying there is “ample evidence of some unfamiliar and unexplained phenomenon.” (UFOFiles2, pp. 44–46; “The UFO Sighting That Convinced a Government Minister,” The Telegraph, May 27, 2012)

July 30 — Gen. Hoyt Vandenberg tells the press that, although he does not believe there are flying saucers, he dislikes the “mass hysteria” about them. He says the Air Force has had experts investigating them since the end of World War II and never found anything substantial. (“Double Vision,’ Vandenberg,” Santa Rosa (Calif.) Press-Democrat, July 31, 1952, p. 6)
July 30 — 1:10 p.m. Willie Vaught of Alexandria, Indiana, sees a strange looking cloud and calls her two teenage daughters (Laura and Patsy) and Laura Oliver to see it. While looking at it, they see six flat, aluminum-like objects streak across the cloud, merge, and disappear within a minute. (“Alexandria Family Reports Seeing ‘Flying Saucers,’” Alexandria (Ind.) Times-Tribune, July 31, 1952, p. 1; Herbert S. Taylor, “Mystery Clouds and the UFO Connection,” IUR 29, no. 4 (July 2005): 19)

July 31 — Brig. Gen. Alfred R. Maxwell of the Research and Development Board prepares a memorandum that generally supports the official position that UFO reports contain no information of value, he writes: “The Air Force has made little very progress in learning what the phenomena or objects are.” (Don Berliner and Stanton T. Friedman, Crash at Corona, Marlowe, 1994, pp. 30–31)

August — Hollywood producer Clarence Greene and a friend see a “sphere of light” in the sky over Los Angeles, California. Visible for 5 minutes, the object alternately hovers and turns before speeding off over the horizon. The next morning, Greene tells his business partner Russell Rouse about the sighting. As he reflects on the experience, he grows ever more irritated by the stigma attached to UFO sightings. (Clark III 1188)

August 1 — 10:51 a.m. An Air Defense Command radar site on Campbell Hill at Bellefontaine, Ohio, tracks a target 20 miles NNW of Wright-Patterson AFB, traveling 500 mph against the wind. It vectors two F-86s piloted by Maj. James B. Smith and Lt. Donald J. Hemmer. They make visual contact but climb to 48,000 feet twice without reaching it. Smith gets a weak return on his radar gun sight and shoots a gun camera film of a white or silvery sphere estimated at 60,000 feet. They break off the intercept at 11:13 a.m. about 100 miles west-southwest of Dayton. The film reportedly shows a UFO in the upper right of the frames with noticeable motion to the lower left. Although Blue Book Capt. Edward J. Ruppelt’s assistants Lt. Anderson G. Flues and Lt. Robert Olsson initially declare the case an “unknown,” Ruppelt changes that evaluation a few weeks later after ATIC Technical Analysis Division Chief Col. Donald L. Bower transfers out, explaining it as two separate but coincidental IFOs—a weather balloon and a jet. Ruppelt goes to great lengths to debunk the case in his ADC briefings to the Robertson Panel. (NICAP, “Gun Camera R/V Case”; Condon, pp. 161–163; Clark III 392–395; Hynek UFO Report, p. 21; Sparks, p. 165; Patrick Gross, “The Bellefontaine, Ohio, Radar/Visual/Photographic Case, 1952”; Shoot 71–73; Center for UFO Studies, [Blue Book documents and files])

August 1 — Edward Tauss, acting chief of the Weapons and Equipment Division of the CIA’s Office of Scientific Intelligence, writes a letter to OSI Deputy Assistant Director Ralph L. Clark, saying that less than 100 credible reports remain unexplainable. “Interplanetary aspects and alien origin not being thoroughly excluded from consideration.” He recommends the CIA continue to cooperate with ATIC, but “no indication of CIA interest or concern reach the press or public.” (ClearIntent, p. 123)

August 1 — 8:30–9:00 p.m. We, the People, a 30-minute TV news show produced by Life magazine, devotes its airtime to the recent UFO sightings over Washington, D.C. WNBT-TV, which originates the program, rents a DC-3 airliner, fills it with 20 newsmen, and has the plane circle over Washington, just in case the saucers return. On the ground in the radar room of Washington National Airport there are more newsmen and TV cameras. The show features editors and journalists Frank Blair, David Brinkley, Clay Blair, and various UFO witnesses. (Curt Collins, “UFOs on TV: The 1952 Washington, DC Saucer Flap,” The Saucers That Time Forgot, July 5, 2018)

August 1 — 9:50 p.m. Scripps-Howard reporter Howard Doyle Kline sees a cluster of glowing white objects overhead in Albuquerque, New Mexico. The objects shift around into various patterns, including a perfect V at one point. Their shifts in position are incredibly swift and fantastically violent, he says. “They made” a flying saucer believer out of me.” He reports the incident to Lincoln LaPaz, University of New Mexico meteoriticist, and Col. William A. Matheny, commander of the 34th Air Defense Division. The report, which is one probably used in Maj. Dewey Fournet’s Motion Study, is missing from the Project Blue Book files. (New York World-Telegram, August 2, 1952; UFOEv, pp. 69–70; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1952 July 21st–31st, Supplemental Notes, The Author, 2001, p. 95)

August 2 — 3:00 a.m. USAF 1st Lt. W. A. Theil and enlisted man Edwards see a red ball with a trail of blue flame fly straight and level over Lake Charles, Louisiana. (Sparks, p. 165)

August 2 [or July 30] — George Hunt Williamson and his wife Betty are visited in Prescott, Arizona, by two other metaphysics enthusiasts, Alfred C. Bailey and his wife Betty of Winslow, Arizona. This evening, in the course of an automatic-writing experiment using a sort of Ouija board, they receive a message from an extraterrestrial in a spacecraft. In the days and weeks that follow, “Nah-9 of Solar X Group” and many other planetary and star people communicate with them. The space people call earth “Saras.” Nah-9 says that the good men of Saras must unite with good space people to avert a calamity. More Ouija sessions take place through August 17. A message comes through that they will be contacted via radio with an International Morse Code message on August 22. Bailey approaches a coworker on the Santa Fe Railroad, a ham radio operator named Lyman Streeter, and asks for

August 3 — 3:00 p.m. An Air Force master sergeant on the ship Santa Luïsa observes three round, flat, metallic objects hovering at 30,000–40,000 feet some 10 miles away from his position at the mouth of the Rio Guayas near Isla Puná, Ecuador. After 5 seconds, one object dives to the west then turns back northwest. They all disappear after another 5 seconds. (Project 1947, *case documents*; Project 1947, “*UFO Reports, 1952*”)

August 3 — 4:15 p.m. Two huge silvery discs are observed visually and tracked on radar for 1 hour and 15 minutes over Hamilton AFB [now closed] near Novato, California. The ground observers are pilots Capt. Leslie R. Hadley, Capt. Wayne T. Perske, and 2d Lt. Duane A. Swinley. They dive at each other and maneuver as if in a dogfight. After F-86s are dispatched to intercept, 6 more objects appear, take up a diamond formation, and accelerate out of sight. (NICAP, “*Eight Huge Objects Observed by 8 Witnesses and Radar*”; *Sparks*, p. 165; Project 1947, “*Hamilton Air Force Base, Hamilton, California, August 3, 1952*”; Project 1947, [Blue Book documents and files]; Michael D. Swords, “Intelligent Motions,” *IUR* 33, no. 1 (March 2010): 14, 15)

August 3 — 10:20 p.m. Civilian engineer Paul L. Anderson sees 3 light-green cylindrical objects at Truth or Consequences, New Mexico. They are hovering at 45° elevation in an inverted-V formation, switching to echelon when one object moves with a rolling motion along its long axis. It disappears by rapidly rising vertically. The observation lasts 9 minutes. (NICAP, “*Three Cylindrical Objects Observed by Engineers*”; *Sparks*, p. 165; Michael D. Swords, “Intelligent Motions,” *IUR* 33, no. 1 (March 2010): 14, 15)

August 5 — 12:25 a.m. A trio of brilliant white dots of indefinite shape, at an altitude of an estimated 5,000 feet, passes over Westover AFB [now Westover Reserve Air Base] in Chicopee, Massachusetts. The second object is half the size of the first, and the third is half the size of the second one. The first one resembles an automobile headlight. The appearance of other two is not given. The three are in a triangular formation. No jet activity is recorded over the airbase at the time and witnesses say the objects are moving “faster than jets.” (Loren E. Gross, *UFOs, a History: 1952, August*, The Author, 1986, p. 23)

August 5 — Day. During a daylight observation of Venus, astronomer James C. Bartlett Jr., watches two discs fly overhead in a southerly direction at Baltimore, Maryland. They move away to the east, then two more objects with dome-like protrusions in the center fly past. (“*Two Huge UFOs Sighted by Baltimore Astronomer,*” *UFO Investigator* 1, no. 5 (Aug./Sept. 1958): 1, 3)

August 5 — 9:46–12:00 midnight. A visual sighting is made at 9:46 p.m. by an observer on the ground at Manassas, Virginia, who spots a brilliant oval flying south. About 10:50 p.m., Andrews AFB in Maryland picks up two unidentified blips moving slowly and steadily away from Washington, D.C., on a course toward Mount Vernon, Virginia. Minutes later the fluorescent screens at Andrews show two more UFOs to the east of the field moving for a short distance, stopping, and then moving again. The speed of the targets is a slow 60 mph. The height of the targets is unknown. Planes from both Andrews AFB and Bolling AFB are sent up to investigate but rainy weather forces them to turn back after they reach 15,000 feet altitude. Around 12:00 midnight yet another target appears on radar, and jets from New Castle AFB in Delaware are scrambled. The jets see no UFOs when they arrived over Washington; however, a spokesman for Andrews radar tells the press that “no radar sightings were made while the planes were overhead.” (“*Flock of ‘Saucer’ Objects Again Puzzles Wash. DC,*” *Visalia (Calif.) Times-Delta*, August 6, 1952, p. 1; Loren E. Gross, *UFOs, a History: 1952, August*, The Author, 1986, pp. 23–24)

August 5 — 10:45 p.m. Eight residents of Camden, New Jersey, report a bright, round, orange object hovering or moving slowly in the western sky. (“*8 City Residents Report ‘Saucers’ on Nocturnal Sweep through Sky,*” *Camden (N.J.) Courier-Post*, August 6, 1952, p. 16)

August 5 — 11:45 p.m. A complex radar-visual sighting takes place at Haneda AFB [later Tokyo International Airport], Japan. Control tower operators watch a disc as it passes over Tokyo Bay at about 1,500 feet. It is a dark round shape surrounded by a bright light with a curved outer edge and smaller lights around it. While being tracked on radar, a scramble alert is issued at 11:55 p.m., and an F-94 Starfire jet from nearby Johnson Air Base [now Iruma Air Base] in Sayama, Saitama Prefecture, goes after the object. The interceptor, piloted by 1Lt. Wesley R. Holder and Radar Observer 1Lt. Aaron M. Jones Jr., chases the object, which speeds away while being tracked by onboard radar. During the next 30 minutes, the UFO disappears and reappears throughout the sky, vanishes when the jet closes in, performs intricate maneuvers, and at one point splits into three radar targets. The jet searches over Tokyo Bay until 12:33 a.m. when it is recalled. (NICAP, “*F-94 Pilots Tracked Object for 90 Seconds*”; Ruppelt, pp. 187–189; Condon, pp. 123–126; *Sparks*, p. 166; Martin L. Shough, “Radar and the UFO,” *UFOs 1947–1987*, Fortean Tomes, 1987, pp. 217–219; Patrick Gross, “*The Haneda AFB Case, Japan, August 5, 1952*”)

August 6 — Hynek sends Project Blue Book a report on his interviews with 45 astronomers about their opinions on UFOs at a June meeting of the American Astronomical Society and finds that five (11%) have seen a UFO, seven are
indifferent to the subject, more express at least some interest, and a few are very interested but wary of publicity. (J. Allen Hynek, “Special Report on Conferences with Astronomers on Unidentified Aerial Objects,” August 6, 1952; “Seven Status Reports for Project Stork, Part 2,” CUFON; “Seven Status Reports for Project Stork, Part 3,” CUFON; Loren E. Gross, UFOs, a History: 1952, August, The Author, 1986, pp. 83–85)

August 6 — 9:00 p.m. James J. Allen sees a UFO 6 feet high, 8 feet long, and lighted inside strike the chimney of his home in West Lumberton, North Carolina. It crashes into his backyard. When he approaches it, the lights go off and he sees a man about 30 inches tall standing next to it. He asks if he is hurt, then the figure reenters the vehicle and it zooms away. (“West Lumberton Event Added to Growing ‘Saucer’ Reports,” Lumberton (N.C.) Robesonian, August 7, 1952, pp. 1, 4; Clark III 326; Curt Collins, “James J. Allen’s Alien Encounter Embarrassment: Aug. 6, 1952,” The Saucers That Time Forgot, January 19, 2018)

August 7 — 12:02 a.m. At Kerkrade, Netherlands, marine engineer Will Jansen watches a domed object swoop down to a low altitude, hover, zigzag, then speed away. He sees a similar object hovering further away. It finally tilts up vertically and shoots out of sight. (UFOEv, p. 122)

August 7 — 9:08 a.m. Mrs. Susan Pzuhl (or Pfuhl) observes over San Antonio, Texas, four round UFOs that give off a color similar to white-hot metal. The objects appear to be approximately 18 inches in diameter and are observed one at a time at intervals of approximately 20 minutes. With the exception of one object that moves slowly, the speed must have been 3 times as fast as a propeller-driven aircraft. No sound can be heard. Their maneuvers consist of radical directional change by the first object, straight and level flight by the second object, a slight directional change by the third object, and a large circular maneuver by the fourth object. An aircraft passes under the fourth object with no apparent reaction by the plane or the object. It vanishes suddenly like an extinguished light. Duration is 70 minutes. (NICAP, “Four 18” UFOs Observed”; Sparks, p. 166)

August 7 — 3:00 p.m. Two Ground Observer Corps skywatchers in Silverton, Oregon, Ida Pfeifer and Dorothy Stammann, see an aluminum-colored object 3 miles away that appears at first triangular, then more saucer shaped. Army and air observers in Portland confirm that jet interceptors are at that moment in pursuit of the object. Replacement skywatchers Sadie Barkhurst and Mrs. Olaf Teglund also see the object at 5:00 p.m. All agree that the UFO is headed east at a moderate speed, but darts “fiercely” toward the interceptor when it approaches. (“Flying Saucer at Silverton,” Salem (Oreg.) Capital Journal, August 9, 1952, p. 14)

August 8 — A special CIA/Office of Scientific Intelligence team consisting of Philip Grandin Strong, Ransom L. Eng, and Frederick C. Durant visit Wright-Patterson AFB in Ohio for a comprehensive briefing about UFOs from Blue Book staff. This classified visit is in response to secret orders from President Truman to the CIA to investigate the Air Force’s mishandling of UFOs during the Washington National Airport cases. (CUFON, “The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts,” May 17, 1996; Clark III 397; Swords 172–173)

August 9 — 1:45 a.m. A/3C Joseph F. Raley is walking to work at Lake Charles Air Force Station [now closed] in Lake Charles, Louisiana, when he observes a disc-like object from a distance away of 3,000–5,000 feet. The object is at an estimated altitude of 5,000 feet. It moves several hundred mph faster than any known jet aircraft. No sound is heard. The object is first seen moving north to south until it crosses the air station, where it stops and hovers for approximately 2 seconds, then takes off to the west. (NICAP, “Faster-Than-Jet Disc Stops, Hovers Two Seconds, Accelerates”; Sparks, p. 167)

August 10 — 5:38 p.m. Roy E. Munson is resting in his hammock at 1231 Widgren Drive, Rockford, Illinois, when he sees a disc-shaped object moving west to east and streaking across the sky in 6 seconds. Within minutes, another appears on the same flight path. Some family members and neighbors join him to watch the objects, which keep appearing for the next 90 minutes by which time a total of 54 have gone by. Munson alerts the CAA operator at the Rockford airport, who calls O’Hare Airport in Chicago, which sends two USAF jet interceptors to the area. They appear just as the last of the discs, which seem surrounded by a haze, disappears. Of the 54 objects, 36 appear larger that the others and move faster. Fifty follow the straight west-to-east path out of sight. Three deviate from the path to the north, and one deviates to the south. (NICAP, “Rockford, Illinois, Monday, August 11, 1952”)

August 11 — A CIA memo refers to a meeting of the newly created study group on UFOs attended by eight operatives. (Central Intelligence Agency, “Minutes of Branch Chief’s Meeting of 11 August 1952”; CUFON, “The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts,” May 17, 1996; Swords 173)

August 12 — 1:43 a.m. An Air Force F-94B jet fighter from Dover AFB in Delaware is flying at 20,000 feet when both the pilot and his radar crewman sight a glowing object 45° to their left and at a lower altitude, with the waters of the Delaware Bay as a dark backdrop. Curious, the jet pilot adjusts his course and heads directly at the object, which is stationary. In an apparent reaction, the object loses some of its brilliance and diminishes in size, apparently moving away. The pilot determines that the object had halted above Cape May, New Jersey, where it
again hovers. Without success, the pilot tries to raise the local CCI station on the radio on F channel to request a radar scan of the Cape May area. Low on fuel, the pilot cannot pursue the UFO any further, so he breaks off the chase and heads for home. The UFO follows the jet, increasing in apparent size as it draws near and overtakes it. Eventually, the UFO loses interest and flies away to the south. (Loren E. Gross, *UFOs, a History: 1952, August*, The Author, 1986, p. 36)

August 13 — Around 7:00 p.m. Two civilians in the Tampa, Florida, area watch three UFOs. One object changes its course abruptly to the west, moving in excess of 600 mph. The same object hovers for about 5 minutes then moves at an excessive rate back to the east and resumes its course to the north and disappears. The two other objects do not alter course but disappear to the north. (Loren E. Gross, *UFOs, a History: 1952, August*, The Author, 1986, p. 39)

August 13 — 9:10 p.m. A witness in Oakland, California, calls Hamilton AFB [now closed] in Novato to notify them he is watching “two balls of fire” making a 10-mile circle and leaving in the direction of Hamilton. When the report is made to Capt. Kenneth Broden, Hamilton AFB Airdrome Officer, he orders an F-94 jet scrambled to search the bay between Oakland and the air base. (Loren E. Gross, *UFOs, a History: 1952, August*, The Author, 1986, p. 39)

August 13 — 9:45 p.m. In Tokyo, Japan, US Marine Corps pilot Maj. James D. McGough sees an orange light fly a left orbit at 8,000 feet and 230 mph, then spiral down to no more than 1,500 feet, remain stationary for 2–3 minutes, and go out. An attempted interception is unsuccessful. (NICAP, “Orange Light Maneuvers Then Stops in Mid-Air”; Sparks, p. 167)

August 14 — Australian Minister for Air William McMahon states facetiously in Parliament that flying saucer reports are “probably based on flights of imagination,” but indicates he will “cause a thorough investigation to be made.” (Swords 376)

August 14 — The CIA’s special UFO study group meets for the first time and is given a summary (probably written by A. Ray Gordon, project officer of the CIA’s Physics and Electronics Branch) of UFO history, an analysis of Project Blue Book, and a discussion of explained sightings and theories about unexplained sightings. (Central Intelligence Agency, “Flying Saucers,” August 14, 1952; Good Above, pp. 331–333)

August 14 — 7:20 p.m. People on the docks of Phillippeville [modern Skikda], Algeria, see an enormous red disc leaving behind a greenish trail. At 9:15 p.m., two people in Constantine, Algeria, watch a luminous object flying at high speed. It emits a bright light. (ClearIntent, p. 122)

August 14 — 10:30 p.m. A yellow ball of light undulates up and down and from side to side over the Mathieson chemical plant in Lake Charles, Louisiana. It is also seen to shoot ahead abruptly and come to a halt in the same manner. Witnesses estimate that the ball passes over at 5,000 feet, growing fainter and fainter as it moves away. (Loren E. Gross, *UFOs, a History: 1952, August*, The Author, 1986, p. 43)

Mid-August — 10:30 p.m. John D. Moorman, deputy sheriff of Starke County, is fishing in a boat with Surphin Casper on the Tippecanoe River about 3 miles northwest of Monterey, Indiana. Moorman looks up and sees 7–8 objects hovering. They watch for a few seconds until the objects move away to the west. About half of them return east momentarily, and all of them disappear by blinking out. (NICAP case file)

August 15 — 4:20 a.m. Ground Observer Corps observers in Davis, California, see a rainbow-colored, round object hovering in the air. Soon they notice eight more objects of a strange appearance. At 5:30 a.m., two more UFOs are seen, one moving west while the other moves east. The Air Force scrambles a F-94 jet interceptor to search the area at altitudes of 10,000–20,000 feet. The military claims the pilot can see nothing unusual, although the GOC spotters say that the UFOs and the jet are both visible in the sky at the same time and possibly at the same altitude. At 5:00 a.m., in Napa, California, GOC post observer Diane Robinson sights a “cigar-shaped silver thing” traveling at tremendous speed at 10,000 feet toward the southwest. (Loren E. Gross, *UFOs, a History: 1952, August*, The Author, 1986, p. 43)

August 15 — CIA operative Frederick C. Durant [and/or Ransom L. En] writes a top-secret draft memo for DCI Walter Bedell Smith on the OSI teams visit to Wright-Patterson AFB and a summary of its findings. It offers an analytical description of UFOs going back to the 1946 Scandinavian ghost rockets. It rules out the possibility of Russian secret weapons and mentions the sightings at Los Alamos and Oak Ridge at a time when the “background radiation count had risen inexplicably. Here we run out of even ‘blue yonder’ explanations that might be tenable, and, we still are left with numbers of incredible reports from credible observers.” Yet “even though we might admit that intelligent life may exist elsewhere and that space travel is possible, there is no shred of evidence to
August 15 — RAAF Flight Lt. William H. Scott, chief test pilot of the Government Aircraft Factories, is flying a de Havilland Vampire jet between 35,000 and 36,000 feet near Rockhampton, Queensland. Looking east toward the coast, he sees a large, circular light at a lower elevation. It is the color of an ordinary incandescent light bulb. After about 60 seconds, 6–10 smaller lights break off from the main light, surrounding it for 2 minutes before disappearing. After another 2 minutes, the big light also disappears. (Swords 376)

August 19 — The CIA/OSI study group prepares an internal 6-page document of its findings. It has made a study of the Soviet press that shows “not one report or comment” about UFOs, which indicates official censorship. It perceives a danger that the Russians might try to infiltrate civilian UFO groups (such as Civilian Saucer Investigation of Los Angeles) or add UFO disinformation during a nuclear attack: “We give Russia the capability of delivering an air attack against us, yet at any given moment now, there may be a dozen official unidentified sightings plus many unofficial.” It briefs CIA Director Walter Bedell Smith on August 20. (Central Intelligence Agency, “Flying Saucers,” August 19, 1952; CUFON, “The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts,” May 17, 1996; Clark III 1013; Swords 174)

August 19 — 2:38 p.m. Ground Observer Corps observer Albert Lathrop sees two objects shaped like fat bullets flying straight, level, and fast over Red Bluff, California. (Sparks, p. 167)

August 19 — 8:00 p.m. An oval disc is seen above Boron Air Force Station [now closed] in Boron, California. Two jet fighters are guided into the area by Capt. Ralph J. Borgerson at the base, but the object speeds away to the east as they close in. (Loren E. Gross, UFOs, a History: 1952, August; The Author, 1986; p. 49; Sparks, p. 167)

August 19 — About 10:00 p.m. Scoutmaster D[unham] S[anborn] “Sonny” DesVergers is driving with three scouts on the edge of the Everglades south of West Palm Beach, Florida, when he sees a light in a wild palmetto grove. The boys do not see it, so he drives on. Another boy admits he has seen a light in that direction too, so DesVergers returns to the spot and goes into the grove, telling the boys to stay in the car unless he is delayed. Soon all three boys see red lights flashing in the grove. This alarms them, and they go to a nearby house for help. They return to see DesVergers staggering out of the grove, incoherently saying he has been zapped into semiconsciousness by some kind of red flare coming from a hatch in a red ball of light (and burns his cap as well). An area of flattened and burned grass is found after the event. DesVergers has a reputation as a prankster and hopes to monetize his story somehow, but the scouts do corroborate his story and there are physical traces. Grass samples from the site sent to the Air Force show root damage extending 4 inches or more into the soil, suggesting overheating, possibly by microwave radiation. Karl Pflock thinks it is a hoax, but Jerry Clark isn’t 100% sure. (NICAP, “Florida Scoutmaster Case”; “Attack by Flying Saucer Described by Scoutmaster,” Miami ( Fla.) Daily News, August 24, 1952, pp. 1A, 4A; “Line Forms at Left for That Saucer Yarn,” Miami (Fla.) Daily News, August 25, 1952, p. 1A; “Boy Scout Wants New Saucer Hunt,” Miami (Fla.) Daily News, August 26, 1952, p. 2A; “‘Saucer’ Witnesses Talking,” Miami (Fla.) Daily News, August 27, 1952, pp. 1A, 8A; Clark III 496–498; Ruppelt, p. 176; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1952 August, Suplemental Notes, The Author, 2001, pp. 115–119; Story, pp. 128–131; Jenny Randles, UFO Reality, p. 143; Karl T. Pflock, “The Best Hoax in UFO History?” 1997; “The Scoutmaster’s Tale,” Saturday Night Uforia, March 27, 2013)

August 20 — The CIA/OSI UFO study group briefs CIA Director Walter Bedell Smith, who then orders the preparation of a National Security Council Intelligence Directive for submission to the NSC stating the need for a UFO investigation. (H. Marshall Chadwell, “Unidentified Flying Objects,” December 2, 1952)

August 20 — Air Defense Command radar at Congaree AFB [now McEntire Joint National Guard Base], southeast of Columbia, South Carolina, tracks a target traveling more than 4,000 mph some 60 miles from the base. (NICAP, “ADC Tracks Object at 4,000 MPH”; UF OEv, p. 78)

August 21 — 10:10 p.m. Ground Observer Corps Supervisor D. C. Scott spots a yellowish-white light flying in the sky at 2,000 feet northeast of Elgin, Illinois. Several times it rises to 5,000 feet in three minutes, hovers, then descends again. Scott alerts Capt. Everett A. Turner at the Chicago Filter Center, who tells him to call again when the light settles down. After one hour and 23 minutes the light begins to hover, Scott calls Turner again, and Turner has at least one F-86 Sabre jet scrambled from O’Hare Airport in Chicago. The pilot makes four passes between 10,000 and 2,000 feet. On the fourth pass, it heads directly toward the light, which blinks out. (“Jets Pursue Mystery Light,” Carbondale Southern Illinoisan, August 23, 1952, p. 1; UF OEv, p. 66; Shoot 102–103)

August 22 — A. Ray Gordon, project officer of the CIA’s Physics and Electronics Branch, provides a briefing document explaining the “Air Force Stand on ‘Flying Saucers’” to CIA Director Walter Bedell Smith, who then briefs President Truman on the CIA UFO study group’s reports at his regular Friday intelligence briefing. (“The Air Force Stand on ‘Flying Saucers’,” August 22, 1952; CUFON, “The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts,” May 17, 1996; Clark III 1013)

August 22–23 — Evening. Lyman Streeter sees unusual lights near Winslow, Arizona, and hears strange signals on his ham radio. Not long afterward, Lyman, his wife, and Alfred C. Bailey hear a mysterious code coming through the air itself. Eventually, at 2:00 a.m., a Morse Code-like message comes through the radio from Regga of Mars and Zo and Nah-9 from Neptune. Zo refers to Affa from Uranus, who thinks earth is too evil. He also warns them that the evil Orion Solar System is coming to earth in a “square star body.” Williamson arrives from Prescott on August 23. (George Hunt Williamson and Alfred C. Bailey, The Saucers Speak! New Age, 1954; Michael D. Swords, “Strange Days,” IUR 30, no. 4 (Aug. 2006): 22; Clark III 1283–1284)

August 24 — 10:15 a.m. USAF Col. Gerald W. Johnson is flying an F-84G when he sees two silver balls in the vicinity of Hermanas (a ghost town), New Mexico. They seem to be 6 feet in diameter and 2 miles away. One seems to change into a long, gray object as it is turning to the right. After 3 minutes they disappear, then reappear 7 minutes later, by which time the F-84 is over El Paso, Texas. One after the other, the objects climb straight up 2,000–3,000 feet. (NICAP, “F-84 Encounters Two Silver Balls”; Sparks, p. 168; Michael D. Swords, “Intelligent Motions,” IUR 33, no. 1 (March 2010): 14, 15)

August 25 — 3:40 p.m. At Holloman AFB, New Mexico, plant supervisor Fred Lee and foreman Lawrence A. Aguilar watch a round silver object for 5 minutes. It flies south, turns and flies north, makes a 360° turn, then flies away vertically. (NICAP, “Silver Sphere Maneuvers over Base”; Sparks, p. 168)

August 25 — 5:50 a.m. William Squires, a radio station musician at KOAM [now KKW-AM] is driving from his home northeast of Frontenac, Kansas, to the station at Pittsburg. He is in his 1952 Jeep station wagon on a rough gravel road about a quarter of a mile from US Highway 160 when he sees a large, disc-shaped object hovering 10 feet in the air on the right side of the road 750 feet away. The UFO looks like two bowls placed together end to end, 75 feet long, 40 feet wide, and 15 feet high in the midsection. Through a window he can see the head and shoulders of a motionless human figure. Along its outer edge are a series of propellers 6–8 inches in diameter, spaced closely together and mounted on a bracket so they revolve “in a horizontal plane” along the edge of the object. He stops and gets out to watch it. As he is walking toward the object, it rises into the air and flies away at great speed. (Hynek UFO Report, pp. 200–203; Patrick Gross, “Project Blue Book Unexplained Cases”; Sparks, p. 168)

August 25 — 9:25 p.m. Affa of Uranus contacts the Baileys, the Streeters, and the Williamsonsons (as well as two students named Ronald Tucker and Betty Bowen) by radio, using 405 or 450 kilocycles. Zo and Um of Neptune, Regga of Mars, and other aliens continue sending messages by both radio and telepathy. Streeter sees a dark spot in the sky that he claims is Affa. Williamson sees a blue light that he thinks is Zo. Everyone signs an affidavit that the events have truly taken place. (George Hunt Williamson and Alfred C. Bailey, The Saucers Speak! New Age, 1954; Michael D. Swords, “Strange Days,” IUR 30, no. 4 (August 2006): 22, 24; Clark III 1284)

August 27 — 4:45 a.m. Two meteorological officers at Macdonald Airport in Manitoba see a disc-shaped object with shadows on it. It makes two turns around the airfield. When the rotating airport beacon light strikes it, the object glints like shiny aluminum, speeds away to the northeast, and vanishes. (Good Above, pp. 184–185)

August 28 — A family on the ground in Le Roy, New York, sees a disc making tight vertical circles around an airliner. (UFOEv, p. 10)

August 28 — 9:30 p.m. Three civilians in Chickasaw, Alabama, report to Brookley AFB [now Mobile Downtown Airport] in Mobile, Alabama, their observation of multiple red stationary and maneuvering objects to the south, and another one moving from south to west, all in the direction of Brookley. AFOSI agent Charles A. Robinson arrives in Chickasaw at 9:50 p.m. to investigate and sees the same four objects to the south and southwest at an estimated 8–12 miles distance. One fiery red object is stationary for 15 minutes then drifts 15°–20° to the right
late summer — as a signal corps employee working the night shift, vivian walton handles decoded teletype messages inside a high-security building at the defense supply center near columbus, ohio. she walks into the photo lab, where colleague joe sheehy is developing photos, one of which he says is a ufo that had landed in the “hill country” somewhere near columbus. he says the object is 30 feet in diameter and unoccupied, with minimal damage. a few days later, an alert is sounded, allegedly because of danger of attack by ufos. walton claims the downed UFO has gone through the depot on the way to wright-pattersonafb in dayton. (james w. moseley, “The Wright Field Story, or Who’s Lying?” Nexus 3, no. 1 (september 1954): 11–15; james w. moseley, The Wright Field Story, saucerian, 1971; jerome clark, “A Catalog of Early Crash Claims,” IUR 18, no. 4 (july/aug. 1993): 18; irena scott and william e. jones, “Crash Claims,” IUR 18, no. 5 (sept./oct. 1993): 21; good need, p. 159; claik iii 329)

september — 10:00 a.m. a radar scope near kirtlandafb in albuquerque, new mexico, picks up an unknown target approaching at 700 mph then slows down to 100 mph northeast of the airfield. two F-86 sabre jets are scrambled but at first cannot locate the target. the second pilot suddenly spots what seems to be a balloon but as he gets closer it looks more like a “doughnut without a hole.” he gets as close as 1,500 feet before the object accelerates. when it is again at a range of 3,000 feet, the pilot begins firing at the object, but it pulls up in a climb and disappears in seconds. capt. ruppelt is given this report by an intelligence officer (probably lt. glen parrish) at the base, who is about to forward the incident report to atic but the commanding officer (brig. gen. william a. matheny) orders it destroyed. parrish shows the last copy of the report to ruppelt during a visit to kirtland. (ruppelt, pp. 1–5; NICAP, “F-86 Shooting Incident / 700 MPH Target”)

september — UFO witness turned researcher Kenneth Arnold releases The Coming of the Saucers, coauthored by his friend and publisher, Raymond A. Palmer. As publicity, the story “Flying Saucer-y” is prepared by King Features Syndicate and carried in many newspapers as a full-page story. (Kenneth Arnold and ray palmer, the coming of the saucers, Palmer, 1952; curt collins, “Kenneth Arnold’s 1952 UFO Book Promotion,” the saucers that time forgot, september 28, 2018)

september — civilian saucer investigation in Los Angeles publishes the first of only four issues of its CSI Quarterly Bulletin. The final issue appears in early 1954. (CSI Quarterly, no. 1 (fall 1952))

september — John P. Cahn publishes an expose of Frank Scully’s ‘Behind the Flying Saucers’ in true magazine. Scully’s sources are an oil prospector named Silas M. Newton and a mysterious “Dr. Gee,” later identified as Leo GeBauer, a con man with a long arrest record. the tale is a ploy to gain the attention of potential investors in a bogus oil detection scheme allegedly linked to alien technology. Jerome Clark writes that Scully was himself a victim, not a perpetrator. (J. P. Cahn, “Flying Saucers and the Mysterious Little Men,” True, September 1952, pp. 17–19, 102–112; claik iii 1044–1045)

september 1 — 8:23 p.m. air defense command radar at yaak air force station in montana picks up UFOs exhibiting changes of direction as many as five times a minute. Some course changes are 90 degrees and speeds are measured at 1,400–1,600 mph. Six blips at one time appear on the FPS-3 radar scopes and the strange targets come within 10...
miles of the GCI site. So close is the indicated range the radar personnel leave their windowless operations room to check the sky. Six objects can be seen an estimated 10 miles away. When first spotted, the UFOs are in an in-trail formation, and shortly thereafter that changes to an in-line abreast grouping. Finally, the UFOs switch to a vertical stack. S/Sgt. William Kelly remembers tracking the UFOs on the radar executing vertical climbs that exceed the limit of the site’s height-finding equipment. (NICAP, “Radar/Visual at Air Force Radar Site”; Sparks, p. 170)

September 1 — 10:30 p.m. An ex-artillery officer named Bowman and 24 others at Marietta, Georgia, see a red, white, and blue-green object that spins and shoots off sparks. An unidentified witness using binoculars sees two large objects shaped like spinning tops with red, blue, and green colors, flying side by side and leaving a sparkling trail for 30 minutes. At 10:50 p.m., a former Army Air Force B-25 gunner sees two large white disc-shaped objects with green vapor trails fly in trail formation, merge, and fly away quickly. (NICAP, “Two Discs in Trail Formation”; Sparks, p. 170)

September 2 — 12:01 a.m. CAA radar controllers Robert L. Termeuzen (GCA), Ralph L. Frick, Dale E. Warner, Warren J. Weber, and Radar Maintenance Technician Gordon R. Copeland track as many as 30 targets simultaneously at Midway Airport in Chicago, flying in various directions with an average speed of 175 mph at about 2,000 feet. The 755th Aircraft Control and Weapons radar station in Elkhorn, Wisconsin, claims that the Midway Airport Tower supervisor has called them at 2:50 a.m., saying there are 40 targets plotted by airport radar flying from 3,000 to 6,000 feet at a speed of 120–150 mph. The targets are the size of blips from light planes or larger (the best target quality is in the 6–10-mile range) and move in no particular pattern—sometimes erratically and sometimes in straight lines up to 15 miles long. In at least one instance, the targets fly in formation with an aircraft. At 5:14 a.m., the Air Defense Command is alerted and authorizes the scramble of two jets from the 4706th Interceptor Wing at O’Hare Airport in Chicago. At 5:55 a.m., a pair of F-86 Sabre jets piloted by Capt. William W. Maitland and Lt. Beverly D. Dunhill, lift off and are vectored right through the targets as shown on radar, making passes at 800 and at 4,000 feet without making contact. The F-86s are evidently without airborne radar because they only mention visual descriptions. Maitland and Dunhill later tell the media: “We didn’t hit anything. We didn’t see anything. We went through the target showing on the scope and there was nothing there, not even a cloud.” The jets break off their aerial search at 6:19 a.m. and return to base. By 7:00 a.m. all of the mysterious targets disappear off the scopes toward the south. The Midway radar crews are convinced the targets are returns from tangible bodies, but CAA chief Bob Zeigler overrules them and blames “peculiar atmospheric conditions.” (“Sabre Jets Fly through ‘Object,’” Spokane (Wash.) Spokesman-Review, September 3, 1952, p. 1; NICAP, “40 Targets at Midway Airport”; Sparks, p. 171)

September 3 — 9:00 a.m. Instructor pilot Donald L. McCraven and N. D. Thomas observe a dark elliptical object reflecting sunlight 6 miles north of Tucson, Arizona. The object makes three well-coordinated turns with no perceptible sound. It moves at tremendous speed during a slight climb and is observed for approximately 90 seconds. (NICAP, “Dark Ellipse Makes Three Coordinated Turns”; Sparks, p. 172)

September 3 — 12:30 p.m. Truman meets in the Cabinet Room with Gen. William M. Garland, Col. John Gordon Fowler, and three other USAF officers; Lawrence J. Henderson Jr. and Walter W. Niles from the RAND Corporation; and Robert B. Landry and four others from the National Security Resources Board. The topic is the Washington UFO incident. (Frank Stalter, “The Real Majestic 12: Harry Truman’s 1952 DC UFO Meeting.” The UFO Partisan, 2009)

September 6 — 10:10 a.m. Walter Borys and George McCracken, two guards at the Osborn Prison Farm [now Osborn Correctional Institute] in Somers, Connecticut, are with 13 inmates in the yard when they hear an odd motor noise and see a silvery object in the northern sky. It appears to be descending in a zigzag motion but stops and shoots upward at a right angle at terrific speed after releasing a puff of smoke. Other witnesses in the area think it is a jet aircraft. (Hartford (Conn.) Courant, September 7, 1952, p. 1; Audrey H. Hennis, “The ‘Flying Saucer’ Was from a Jet After-Burner,” Hartford (Conn.) Courant, September 19, 1952, p. 18; Loren E. Gross, UFOs, a History: 1952, September–October, The Author, 1986, pp. 11–12)

September 8 — Wilbert B. Smith and Department of Transport associates launch a large weather balloon with a magnesium flare over Ottawa, Ontario, but it does not inspire any UFO reports. (Clark III 1078; Loren E. Gross, UFOs, a History: 1952, September–October, The Author, 1986, pp. 17–18)

September 9 — 9:00 p.m. US Air Force civilian illustrator E. J. Colisimo sees a disc with lights along part of its circumference over Rabat, Morocco. It is flying twice as fast as a T-33 jet trainer in a slightly curved path. (NICAP, “Disc Twice As Fast As T-33”; Sparks, p. 172)

September 10 — Battelle issues its fifth status report on Project Stork to ATIC. It says that 800 copies of its revised report questionnaire have been sent to the Air Force, many of which were passed on to military witnesses as a trial test.
The group has now examined UFO reports from 1947–1949 and 1951. It decided to discontinue the news clipping service. (“Seven Status Reports for Project Stork, Part 3,” CUFON)

September 10 — 2:30 p.m. The wife of a civilian employee at Andrews AFB [now Joint Base Andrews] in Prince George’s County, Maryland, sees a shiny, metallic, elliptical, silent object moving back and forth near the base. It is visible for 2–3 minutes. (Loren E. Gross, UFOs, a History: 1952, September–October, The Author, 1986, p. 25)

September 11 [or 7 or 17] — CIA Office of Scientific Intelligence Director H. Marshall Chadwell writes a memorandum to Director of Central Intelligence Walter Bedell Smith that sets out two national security implications of UFOs for the government of the United States: the potential for psychological panic by citizens, and demonstrating the nation’s vulnerability by air. It recommends that “A national policy should be established as to what should be told the public regarding the phenomena, in order to minimize risk of panic.” (H. Marshall Chadwell, “Flying Saucers,” September 11, 1952; CUFON, “The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts,” May 17, 1996; Swords 175–181, 503–507; Good Above, p. 224)

September 11 — Williamson, Streeter, and Bailey receive a radio message saying, “I hope we might have a landing soon,” and later, “We must make landing contact soon… If you believe us, you will act accordingly.” (George Hunt Williamson and Alfred C. Bailey, The Saucers Speak! New Age, 1954; Michael D. Swords, “Strange Days,” IUR 30, no. 4 (Aug. 2006): 22)

September 12 — 1:30 a.m. Two oil well drillers, William Darling and Donald Davis, see a lighted object with windows on one side circling 150 feet above the ground silently for nearly 30 minutes at Bladensburg, Ohio. Suddenly it makes a noise like steam blowing and shoots out of sight. (“Report from the Readers,” Fate 6, no. 2 (February 1953): 108)

September 12 — Around 7:15 p.m., in Flatwoods, West Virginia, two brothers, Edward and Fred May, and their friend Tommy Hyer (ages 13, 12, and 10 respectively) witness a bright object cross the sky, coming to rest on land belonging to local farmer G. Bailey Fisher. The boys go to the home of the May brothers’ mother, Kathleen May, where they tell the story of having seen a UFO crash land. From there, Mrs. May, accompanied by the three boys, local children Neil Nunley, 14, and Ronnie Shaver, 10, and West Virginia National Guardsman Eugene Lemon, 17, walk to the Fisher farm. At the top of a hill, they reportedly see a large pulsating “ball of fire” about 50 feet to their right. They also detect a pungent mist that makes their eyes and noses burn. Lemon then notices two small lights over to the left of the object, underneath a nearby oak tree and directs his flashlight towards them, revealing a creature, which May reports as bounding towards them. Other sources describe it as emitting a shrill hissing noise before gliding towards them, changing direction and then heading off towards the red light. The group flees in panic. Sheriff Robert L. Carr and his deputy Burnell J. Long search the area separately, but find no trace of the encounter other than the smell. Early the next morning, A. Lee Stewart, co-owner of the Braxton Democrat, visits the site of the encounter for a second time and discovers two elongated tracks in the mud, as well as traces of a thick black liquid. It is later revealed that the tracks are likely those of a 1942 Chevrolet pickup truck driven by local Max Lockard, who had gone to the site to look for the creature some hours prior to Stewart’s discovery. Ivan T. Sanderson interviews the witnesses several days later and concludes that a flight of “intelligently controlled objects flew over West Virginia.” The Air Force concludes that people have seen a meteor and that the monster was only the glowing eyes of a barn owl. Joe Nickell also concludes in 2000 that the bright light in the sky reported by the witnesses on September 12 was most likely a meteor, that the pulsating red light is likely an aircraft navigation/hazard beacon, and that the creature described by witnesses closely resembles a barn owl. Nickell claims that the experience was distorted by the heightened state of anxiety felt by the witnesses after having observed the original meteor. However, Frank C. Feschino has done extensive research to support his hypothesis that the Flatwoods incident was only one small part of a major UFO display involving multiple objects (many of them reported as “meteors” or “balls of fire” or “flaming planes”) passing in westerly and other directions across the eastern and southern United States between 6:50 and 7:25 p.m. The trajectory of one of these objects (moving first northwest then northeast then south) alone takes it over Baltimore, Catonsville, Frederick, Hagerstown, Cumberland, and Garrett County, Maryland; Preston County, Morgantown, Fairmont, Wheeling, Charleston, Parkersburg, Nitro, Ward, and Chelyan, West Virginia; Selma, Columbus, Zanesville, St. Clairsville, Ohio; it is last seen moving south around Bluefield, West Virginia. Another object is seen over Washington, D.C., heading due west towards West Virginia, apparently landing in Flatwoods. A third object travels southwest over Roanoke and Pulaski, Virginia, possibly landing near Arcadia, Tennessee. Feschino thinks that these three objects had been damaged by fire directed at them by Air Force interceptors. Five other objects are observed in North Carolina in that time period, and these Feschino suspects may have been attempting to look for and assist the damaged objects. He also speculates that the disappearance of an F-94 jet fighter out of Tyndall AFB in Panama City, Florida, piloted by 2Lt John A. Jones and radar operator 2Lt John S. DelCurto, might have involved a tragic
UFO interception that began three hours earlier; the last known contact with the fighter is at 5:43 p.m. over the Gulf of Mexico 70 miles northwest of Tampa, the accident takes place under unusual circumstances, and the wreckage has never been found. Feschino thinks that a UFO damaged in dogfights with many interceptors over the Gulf might have triggered the second battle over the Atlantic seaboard around 7:00 p.m. Then a second wave of multiple objects is observed 8:00–8:10 p.m. in the Washington, Maryland, Virginia, Ohio, and West Virginia region that, according to Feschino, involves a search for a second downed UFO. Although Feschino jumps to many conclusions and his documentation for specific incidents and conditions is somewhat confusing, he may well have grasped more truth than the meteor-and-owl explanation of the skeptics. (Wikipedia, “Flatwoods Monster”; Gray Barker, “The Monster and the Saucer,” Fate 6, no. 1 (January 1953): 12–17; Gray Barker, They Knew Too Much about Flying Saucers, University Books, 1956, pp. 11–35; Keyhoe, FS from OS, pp. 116–120; Clark III 494–495; Ivan T. Sanderson, Uninvited Visitors, Cowles, 1967, pp. 39–51; Northern Ontario UFO Research and Study, “The Braxton Democrat”; Shoot 112–313, 320–327; Joe Nickell, “The Flatwoods UFO Monster,” Skeptical Inquirer 24, no. 6 (Nov./Dec. 2000): 15–19; Michael D. Swords, “Peeking at Ivan’s SITU Files: The Flatwoods Monster,” The Big Study, April 11, 2011; Frank C. Feschino, The Braxton County Monster: The Cover-Up of the Flatwoods Monster Revealed, Quarriner Press, 2004)

September 14 — 4:30 a.m. Fred J. Brown is preparing to milk the cows at the Everglades Experiment Station [now the Everglades Research and Education Center] in Belle Glade, Florida, when he spots a circular object about 35 feet in diameter hovering about 100 feet above the ground. It has a row of red and amber lights spaced around the outside rim and the underside. As it descends to about 40 feet, the 13 cows bolt in panic — as Erasto Smith, the student farmer, later wrote. “I saw it,” he wrote, “and I was scared.” As Brown is rounding up the cows, the object appears again, moving from the outside rim and the underside. As it descends to about 40 feet, the 13 cows bolt in panic. The object’s glow illuminates the ground as it passes, and it gains altitude and disappears again. (“Cattle Stampeded Twice by Mysterious ‘Object,’” Palm Beach (Fla.) Times, September 16, 1952, p. 1)

September 14 — Exercise Mainbrace begins in the North Sea. It is the first large-scale naval exercise undertaken by NATO and jointly commanded by Admiral Lynde D. McCormick and Gen. Matthew B. Ridgway. It involves the US Navy and the navies of Great Britain, France, Canada, Denmark, Norway, Portugal, Netherlands, and Belgium. Its objective is to convince Denmark and Norway that they can be defended against an attack from the USSR, and involves 80,000 men, 200 ships, and 1,000 aircraft. The operation lasts through September 25. (Wikipedia, “Exercise Mainbrace”)

September 14 — 10:13 p.m. The Danish destroyer Willemoes, during the Exercise Mainbrace maneuvers, is north of Bornholm island, Denmark, in the Baltic Sea. Lt.Cmdr. G. Schmidt-Jensen and several members of the crew see an unidentified object, triangular in shape, that moves at high speed toward the southeast. It emits a greenish glow and jets three rays of fire from its rear. Jensen estimates the speed at 930 mph. (NICAP, “Operation Mainbrace Sightings”; Loren E. Gross, UFOs, a History: 1952, September–October, The Author, 1986, p. 28; Marler 128–129, 265)

September 19 — 10:53 a.m. During Exercise Mainbrace maneuvers, a silvery, spherical UFO appears near RAF Topcliffe in North Yorkshire, England, following an RAF Meteor jet (possibly piloted by Flight Lt. John W. Kilburn and Flight Lt. Marian Cybulski) about to land. It has been following about 5 miles behind the jet at 15,000 feet, swinging like a “falling sycamore leaf” and descending. As the jet turns toward Dishforth, the object follows but begins rotating on its axis then suddenly accelerates and disappears. Several ground crew members of RAF 269 Squadron (Master Signaller Albert Thomson, Sgt. Flight Engineer Thomas Deweys, Flight Lt. R. Paris, and Leading Aircraftman George Grime) and civilians also see it. Prince Philip suggests to RAF Air Marshal Peter Horsley, who is serving as equerry to the duke, that he investigate credible reports of UFOs, especially those by fighter pilots who have seen them. He arranges for RAF Fighter Command to send copies of any reports for examination at Buckingham Palace and begins an informal study that lasts until 1955. (NICAP, “Swaying Silver Object Follows Jet”; Richard Hall, “Operation Mainbrace Sightings”; Good Above, pp. 31–32, 450; Nick Redfern, “UFOs and NATO: The Mainbrace Affair,” Mysterious Universe, April 22, 2014; David Clarke, “The Prince and the Saucers,” Fortean Times 406 (June 2021): 18–19; Sparks, p. 173; Ruppelt, pp. 195–196; UFOFiles2, p. 47)

September 20? — Sometime during Exercise Mainbrace, at the underground RAF Ash, near Woodnesborough, Kent, England, Senior Aircraftman William Maguire tracks on radar a huge UFO high above the English Channel for 18 minutes. Eventually it splits into three and speeds away, one object to the north, another toward France, and the third toward Eastern Europe. (Good Need, p. 152; Nick Redfern, “UFOs, NATO, and Military Encounters.” Interesting and Curiosities, October 28, 2018)
September 20 — Naval personnel on the US aircraft carrier **USS Franklin D. Roosevelt** in the North Sea observe a silvery sphere moving across the sky behind the fleet. Photographer Wallace Litwin takes three color photos that are developed and examined by naval intelligence officers. **Ruppelt** says they “turned out to be excellent … judging by the size of the object in each successive photo, one could see that it was moving rapidly.” No balloon has been launched. (NICAP, “**Object Photographed during Operation Mainbrace**”; Ruppelt, pp. 195–196; UFOEv, p. 162; “**In the News 1952**,” Saturday Night Uforia, 2013)

September 20 — 7:30 p.m. At Air Base Karup in Jutland, Denmark, three Danish Air Force officers see a shiny, metallic UFO pass overhead and disappear in clouds to the east. (Aimé Michel, *The Truth about FS*, 133)

September 21 — Six RAF Meteor jets flying above the North Sea observe a shiny sphere approaching from the direction of the Mainbrace fleet. It eludes their pursuit and disappears. As they are returning, it reappears following one of the jets, but when he turns to chase it, it speeds away. **Ruppelt** says the Mainbrace sightings forced the RAF to “officially recognize the UFO.” (NICAP, “**Six RAF Jets Approached by Shiny Sphere**”; Ruppelt, p. 196; Sparks, p. 173)

September 24 — CIA Assistant Director of Scientific Intelligence **H. Marshall Chadwell** writes a 4-page memo to CIA Director **Walter Bedell Smith**, summarizing his earlier memo and stating that since 1947 unexplained sightings were running at 20% and in 1952 they rose to 28%. “I consider this problem to be of such importance that it should be brought to the attention of the National Security Council in order that a community-wide coordinated effort toward its solution may be initiated.” His CIA scientific consultants (**Julius Stratton**, and perhaps **Lloyd Berkner** and **Howard P. Robertson**) think the answer will be found “on the margins of just beyond the frontiers of our present knowledge in the fields of atmospheric, ionospheric, and extraterrestrial phenomena, with the added possibility that the present dispersal of nuclear waste products might also be a factor.” (H. Marshall Chadwell, “**Flying Saucers**,” September 24, 1952; CUFON, “**The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts**,” May 17, 1996; Good Above, pp. 328–329, 506–507)

Late September — **Ruppelt** visits the headquarters of the Air Defense Command at Ent AFB [now the US Olympic Training Center] in Colorado to brief Gen. **Benjamin W. Chidlaw** and his staff on the past few months of UFO activity at a lunch at the officer’s club. One of the attendees is Maj. **Vernon L. Sadowski**, the ADC Intelligence liaison to Blue Book, who says that “no one can understand why Intelligence is so hesitant to accept the fact that something we just don’t know about is flying around in our skies, unless you are trying to cover up something big.” (Ruppelt, pp. 194–197)

September 26 — Syndicated aviation columnist **Robert S. Allen** writes in his column that the “Air Force has a breathtaking report” ready on UFOs. The study expresses the belief that some reports are genuine and originate from “sources outside of this planet.” The supposed document also says that some sightings involve secret US military devices. The study is allegedly based on more than 1,800 sightings in the past 5 years. (Robert S. Allen, “**Report on Flying Saucers**,” *Los Angeles Mirror News*, September 26, 1952, p. 43; Michael Hall, “Was There a Second Estimate of the Situation?” *IUR* 27, no. 1 (Spring 2002): 10–11)

September 26 — 11:16 p.m. The pilot and crew of a USAF C-124 see two distinct green lights to the right and slightly above the plane, about 400 miles north-northwest of the Azores Islands. At one point, they appear to turn toward the plane. They remain visible until the plane sights the islands. (NICAP, “**Air Crews Observe Green Lights**”; Sparks, p. 174)

September 27–28 — Throughout West Germany, Denmark, and southern Sweden, there are widespread UFO reports. A luminous object with a comet-like tail is seen moving irregularly near Hamburg and Kiel, Germany. Once, three satellite objects are reported moving around a larger object. A cigar-shaped UFO moving silently eastward is also seen. (UFOEv, p. 163)

September 28 — 2:00 p.m. **Williamson, Streeter**, and Bailey attempt to meet the saucer intelligences for a landing somewhere in the Arizona desert, but apparently get lost. They return to Streeter’s home, where the radio sends sinister-sounding messages about the radio being dangerous, a man coming, and Streeter having a deep secret (perhaps that Streeter has attempted psychic contact once before in 1950). (George Hunt Williamson and Alfred C. Bailey, *The Saucers Speak!* New Age, 1954; Michael D. Swords, “Strange Days,” *IUR* 30, no. 4 (Aug. 2006): 22)

September 28 — 8:35 p.m.–10:09 p.m. USAF radar operator A/3c Carlton L. Hall, stationed on the southwest coast of Tsushima Island, Japan, notices unusual targets on six separate occasions, each time for a duration of 2–4 sweeps. On two separate outbound tracks from Itazuke Air Base [now Fukuoka Airport], a series of targets appear directly behind aircraft when entering an azimuth of 50°–70° from nearby Tsutsusaki Lighthouse. The objects appear as
normal aircraft but are rounder in shape, trailing about 2–3 miles to the rear of the aircraft. A/2c Warren D. Grovenstein also observes four of these anomalies with Hall. ([Blue Book report])

September 29 — 6:30 p.m. Capt. Dursemaine, commanding officer of the Gendarmerie Maritime en Allemagne, watches a luminous, egg-shaped object with a black spot in its center flying at an altitude of 3.7 miles above his home 1.2 miles south of Mainz, Rhineland-Palatinate, Germany. It emits a low-pitched hum and white exhaust. (Jan Aldrich)

September 30 — 10:30 a.m. A North American Aviation Company film crew, headed by Dick Beemer, is at Edwards AFB in southern California to film some tests. They are at Rogers Dry Lake when a B-29 passes overhead. Cameraman Carlos Garcia sees an unusual object moving near the plane. A second object appears. Soon the whole crew is looking up. Beemer says the objects are silent, leave no vapor trail, take turns maneuvering around each other, and look like “flattened spheres.” They have a color motion picture camera with them, but the UFOs are too near the sun. (UFOEv, pp. 57–58)

Fall — Evening. Paul Solem has his first contact with a flying saucer around the Lost River Sinks a few miles from his ranch in Howe, Idaho. After watching a metallic object land, Solem sees a man with long blond hair and dressed in a white uniform standing next to it. He tells Solem to call him “Paul 2.” He says he is from Venus and tells Solem to work with Indians in North America in preparing for a postapocalyptic social order. This will be the first of many contacts for Solem. Over the next 17 years he wanders through the western states, speaking with Indians and contactees, gathers a small group of followers, and generally avoids the limelight. (Clark III 1094)

October — The first number of Albert K. Bender’s Space Review is published. (Space Review 1, no. 1 (October 1952); Clark III 189)

October — Opal Church is driving with her nephew in a car between Salem and Corvallis, Oregon, when they see an 8-foot, heavily built figure walking with “fluid movements” along the road. It is wearing an Arab-style headdress and a uniform, with gloves and boots, of fine metallic mesh. A ribbed belt surrounds the waist. Its face is pale and foot, heavily built figure walking with “fluid movements” along the road. It is wearing an Arab-style headdress and a uniform, with gloves and boots, of fine metallic mesh. A ribbed belt surrounds the waist. Its face is pale and

October — Stanley Glickman, an American artist living in Paris, France, joins a group of fellow Americans at a café, one of whom is CIA mind-control and poison specialist Sidney Gottlieb. A heated political debate ensues, and when Glickman decides to leave, he is offered a drink to soothe ill feelings. Gottlieb surreptitiously slips LSD into Glickman’s drink and it derails his life. Glickman suffers a complete mental breakdown from which he never recovers. In 1977, he learns about Gottlieb and CIA’s LSD experiments on unwitting involuntary subjects from the Kennedy congressional hearings. Glickman sues in 1981, but the trial is delayed 17 years on technical grounds, by which time Glickman has died in 1992. His sister, Gloria Kronisch, pursues the case in the US Court of Appeals, Second Circuit, as his executors in 1998, but it is thrown out on July 9 because the statute of limitations has passed. (H. P. Albarelli Jr., A Terrible Mistake: The Murder of Frank Olson and the CIA’s Cold War Experiments, Trine Day, 2009; Kronisch v. United States, US Court of Appeals, 2d Circuit, July 9, 1998)

October — Evening. Aeronautical engineer and former Project Sign liaison Alfred Loeding and his wife Marion see an odd object while driving near Plainsboro, New Jersey. At first, they think it is an aircraft crashing, but the object levels off and flashes away at high speed, emitting a bluish-green light. He estimates it is 100 feet in diameter and 500–600 feet high, and it gives off a “weird light like looking at a firefly” while changing shape. Loeding says Rep. L. Gary Clemente (D-N.Y.) is also a witness. (“Flying Saucer Design Practical, WADC Aid Says: U.S. Interested,” Dayton (Ohio) Journal Herald, August 9, 1957, p. 13)

October 2? — Shortly before 7:00 a.m. One Thursday this month, Johannes Nordlien is waiting for coworkers when he hears a howling sound. A white, saucer-shaped object, 13 feet in diameter, comes in from the west at high speed and passes him only 325 feet away. It falls with a violent splash into the river Lågen [Gudbrandsdalslågen?] in Norway. When his colleagues show up, the water is still roiling. (Ole Jonny Børø, “Observations of Unidentified Submarine Objects in Norway,” IUR 20, no. 1 (Jan./Feb. 1995): 12)

October 2 — CIA Office of Scientific Intelligence Director H. Marshall Chadwell writes a memorandum to Director of Central Intelligence Walter Bedell Smith recommending he advise the National Security Council that more research is needed on UFOs to investigate their national security threat. (H. Marshall Chadwell, “Flying Saucers,”

October 9—11 — At the Optical Society of America meeting in Boston, Massachusetts, J. Allen Hynek presents a paper on “Unusual Aerial Phenomena,” in which he expresses skepticism for most reports, except for nocturnal lights that do “not appear to be readily explainable on an astronomical basis, or by mirages, balloons, or by conventional aircraft.” Astronomer Donald Menzel presents a dismissive paper on radar angels and mirages, while Urner Liddel presents “Phantasmagoria or Unusual Observations in the Atmosphere,” dismissing UFO reports as mass hysteria, fear psychosis, and sensation-seeking. (J. A. Hynek, “Unusual Aerial Phenomena,” Journal of the Optical Society of America 43 (1953): 314–317)

October 10 — Battelle issues its sixth status report on Project Stork. UFO reports through 1951 have been coded and put on IBM punch cards. About 60% of the reports have been evaluated. The panel has looked at two films and soil and vegetation samples from cases in Florida and Pittsburg, Kansas. The witness questionnaire is further refined and will become the basis for Project Blue Book’s form. (“Seven Status Reports for Project Stork, Part 3,” CUFON; “Seven Status Reports for Project Stork, Part 4,” CUFON)

October 11 — A Ground Observer Corps spotter sees a disc hovering in one spot for 20 minutes over Newport News, Virginia. When two interceptors arrive from Langley Air Force Base, the object tilts up, accelerates, and shoots away. (UFHOEv, p. 150)

October 12 — Harold H. Fulton founds Civilian Saucer Investigation (New Zealand) in Auckland. It begins publishing a quarterly newsletter, Flying Saucers, in May 1953, which continues until September 1959 with a name change in 1958 to Space Probe. (Flying Saucers 1, no. 1 (May 1953); Space Probe, Christmas 1958)

October 13 — James Q. Reber, assistant director of CIA intelligence coordination, writes a memo to the CIA deputy director of intelligence, arguing that fundamental research into the question of positive identification is the responsibility of the Defense Department and that while investigating Soviet knowledge of UFO phenomena is a “primary concern” for the CIA, it “is far too early in view of the present state of our knowledge regarding Flying Saucers for psychological warfare planners to start planning how the United States might use U.S. Flying Saucers against the enemy.” Reber goes on to recommend that when “intelligence has submitted the National Estimate on Flying Saucers there will be the time and basis for a public policy to reduce or restrain mass hysteria.” (James Q. Reber, “Flying Saucers,” October 13, 1952; CUFON, “The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts,” May 17, 1996)

October 13 — 7:08 p.m. USAF pilot Maj. William D. Leet and his engineer, flying a C-54 troop carrier, watch an elliptical UFO hovering in clouds near Oshima, Japan. It speeds away after 7 minutes. (UFHOEv, p. 24)

October 14 — OSI Deputy Assistant Director Ralph L. Clark writes a memorandum for the record suggesting a meeting on October 20 or 21 to work out a research and intelligence program on UFOs. (Ralph J. Clark, “Flying Saucers Problem,” October 14, 1952)

October 16 — George Hunt Williamson is in a state of panic from the messages he and the Baileys have received from space people. He writes an associate doing missionary work in Guatemala that disaster will strike the earth before December 1. He says radio contacts have stopped and that he has been told there will be a direct contact with a spaceman: “Professor George Adamski is in on this too.” The Baileys have already met with Adamski (in August) and now the messages are urging another meeting with him. (Y. N. ibn Aharon [Yonah Fortner], “Diagnosis: A Case of Chronic Fright,” Saucer News 4, no. 5 (Aug./Sept. 1957): 3–6; Clark III 1284)

October 17 — Early afternoon. Residents of Oloron-Sainte-Marie, Pyrénées-Atlantiques, France, see a large cigar-shaped structure in the blue sky, inclined at a 45° angle. The witnesses include the family of Yves Prigent, general superintendent of the local high school. A plume of white smoke is escaping from its upper end. At some distance in front of the cylinder, about 30 round, puffy objects with a central red spot are following the same trajectory. The smaller objects move in pairs following a broken, zig-zag path. They leave an abundant trail of a white substance (angel’s hair) behind them, which slowly falls to the ground as it disperses. For several hours, clumps of it hang on the trees, on the telephone wires, and on the roofs of houses. (“Les Soucoupes Volantes vues à Oloron le 17 Octobre,” France-Dimanche, October 26, 1952, in The Spectrum of UFO Research, CUFOS, 1988, p. 114; Jimmy Guieu, Flying Saucers Come from Another World, Hutchinson, 1956, pp. 87–92; Jacques Vallee and Janine Vallee, Challenge to Science: The UFO Enigma, Regnery, 1966, pp. 120–121; Clark III 123; Patrick Gross, “Documents: Found in the Attic”; Loren E. Gross, UFOs, a History: 1952, September–October, The Author, 1986, pp. 73–74; Lotharson, “Unidentified Flying Spiders in Southern France?” Shards of Magonia, March 12, 2017)

October 18 — 9:44 p.m. Journalist Keith Hooper is returning home from an assignment for the Adelaide Advertiser when he sees a greenish-white, cigar-shaped object about the size of a Boeing 707 some 10 miles away over the
Adelaide Hills, South Australia, moving southeast to northwest. The object makes a sharp, right-angle turn upward, recedes, then vanishes at tremendous speed. The duration is 5–7 seconds. (Keith Hooper, “My Flying Saucer,” Sydney (N.S.W.) Morning Herald, March 13, 1965, p. 13)

October 21 — Afternoon. Flight Lt. Michael Swiney and a student pilot, Royal Navy Lt. David Crofts, are flying a Meteor T.7 trainer out of RAF Little Rissington, Gloucester, England, for a high-altitude navigation exercise at 35,000 feet. Not long after breaking out of a cloud during a climb at 13,000–14,000 feet, they see three circular, white objects in front of them. As the aircraft get closer and turns to avoid them, the objects become visible as discs. They disappear quickly when the pilot looks away briefly. Two Meteor F.8 fighters are scrambled from RAF Tangmere [now closed] in West Sussex to chase three unknown radar targets moving at 3,000 mph but fail to intercept them. (Wikipedia, “Little Rissington UFO incident”; David Clarke and Andy Roberts, Out of the Shadows, Piatkus, 2002, pp. 98–102; UFOFiles2, pp. 47–49)

October 23 — Ruppelt holds a briefing on UFOs at Los Alamos Scientific Laboratory, New Mexico. Afterward Assistant Director for Scientific Personnel William H. Crew arranges a special meeting for Ruppelt and Col. Bower with seven people from the laboratory. Several of them have evidence that there is a possible correlation between sightings of UFOs and unusual radiation detection. (Edward J. Ruppelt, [Message referring to a December 1 telephone call], December 2, 1952)

October 24 — President Truman signs National Security Council Directive 6, a 7-page document that eliminates the Armed Forces Security Agency formed in 1949 to unite all military signal intelligence operations and creates the National Security Agency. Since the memo is a classified document, the existence of the NSA is not known to the public. Due to its ultra-secrecy the US intelligence community refers to the NSA as “No Such Agency.” The NSA is responsible for global monitoring, collection, and processing of information and data for foreign intelligence and counterintelligence purposes. NSA inherits Project Shamrock from the AFSA. It also inherits collection of UFO data, at least by 1958, but probably in 1953. (ClearIntent, p. 189; Thomas L. Burns, The Origins of the National Security Agency, 1940–1952, National Security Agency, 1990, pp. 97–99)

Late October — Night. Radioman Tom Kramer is serving aboard the USS Curtiss, the AEC flagship for Ivy Mike, the first detonation of a hydrogen bomb at Eniwetak Atoll in the Marshall Islands. After an onboard movie, Kramer and other crewmen see a round, silent, bright white light that is motionless at first, then starts zigzagging for less than 10 seconds and takes off at high speed. (Nukes 100–101)

Late October — 3:45 a.m. Seaman Abelardo Marquez, posted on the USS Fletcher near Eniwetak Atoll for the upcoming Ivy Mike thermonuclear test, is going on duty to the bridge when he notices that the ship is uncharacteristically moving at full speed. Other crew members tell him it is because of a round white light that has been moving above the ship. Marquez sees it descending, then it stops and hovers about 40° above the horizon and perhaps one-half mile from the ship. Capt. Grover L. Rawlings is talking with other officers on the bridge, saying they do not know what the light is, and that is not tracked on radar. After about 4–5 minutes, the light takes off straight up at the same speed it had descended. (Nukes 101–105)

October 27 — 2:03 a.m. Customs officer Gabriel Gachignard observes a cigar-shaped object land briefly on a runway of the airport at Marignane, Bouches-du-Rhône, France, 100 meters away, producing a dull sound. The object is dark with four lighted windows. It takes off with a “swish” and a shower of sparks when he runs toward it. (Clark III 243–244; Jimmy Guieu, Flying Saucers Come from Another World, Hutchinson, 1956, p. 53; Michel, The Truth about FS, pp. 152–156; Jacques Vallee and Janine Vallee, Challenge to Science: The UFO Enigma, Regnery, 1966, pp. 6–11; Loren E. Gross, UFOs, a History: 1952, September–October, The Author, 1986, pp. 82–84)

October 27 — An FBI memorandum to Alan H. Belmont from Victor P. Keay reports that “Air Intelligence still feels that the so-called flying saucers are either optical illusions or atmospheric phenomena. He pointed out, however, that some Military officials are seriously considering the possibility of interplanetary ships.” (V. P. Keay, “Flying Saucers,” October 27, 1952)

October 27 — 4:00 p.m. Residents of Gaillac, Tarn, France, see a formation of 16 disc-shaped UFOs ranged in twos. An elongated cylinder is in the center of the objects, all of which are discharging angel’s hair like glass wool. (Aimé Michel, The Truth about FS, p. 148; Loren E. Gross, UFOs, a History: 1952, September–October, The Author, 1986, pp. 84–85; Lotharson, “Unidentified Flying Spiders in Southern France?” Shards of Magonia, March 12, 2017)

October 29 — 5:10 a.m. Two USAF F-94 crews see a white luminous object maneuvering at high speed for 20 minutes above Hempstead, Long Island, New York. Lt. William F. Hamilton and Lt. Norman W. Booth write: “Based on my experience in fighter tactics, it is my opinion that the object was controlled by something having visual contact with us. The power and acceleration were beyond the capability of any known aircraft.” (NICAP, “Two F-94’s Encounter Controlled Object”; Sparks, p. 177)
November — Aladino Félix and a friend are climbing a hill near Angatuba, São Paulo, Brazil. When they get to the top, Félix claims they see numerous UFOs flying around. Félix comes back another day by himself; eventually a saucer lands and he is invited inside to meet its crew and examine the technology. Several months later, he is visited at his home in São Paulo by the saucer captain, who claims to come from one or two of the satellites of Jupiter. Félix, under the pseudonym of Dino Kraspedon, writes about his various conversations with the spaceman in Meu Contato com os discos voadores in 1957. He writes other mystical and religious tracts under the names Dunatos Menorá and Sábado Dinotos. In 1967–1968, Félix is operating a right-wing terrorism group that sets off bombs, steals arms and explosives, and robs a bank. He serves three years in prison. (Clark III 661–662; Zirger and Martinelli, The Incredible Life of George Hunt Williamson, Verdechiari, 2016, pp. 164–165)

November 1 — Nuclear test Ivy Mike is the first successful full-scale test of a multi-megaton thermonuclear weapon (“hydrogen bomb”) using the Teller-Ulam design of the airplane hangar. Unlike later thermonuclear weapons, Mike uses deuterium as its fusion fuel, maintained as a liquid by an expensive and cumbersome cryogenic system. It is detonated on Elugelab in the Marshall Islands yielding 10.4 megatons, almost 500 times the yield of the bomb dropped on Nagasaki. The fireball is 3 miles wide and completely destroys the atoll. USAF Capt. Jimmy Priestly Robinson of the 561st Fighter-Day Squadron, is lost near the end of his mission to successfully pilot his F-84G through the mushroom cloud’s stem to collect radiochemical air samples. After re-emerging from the cloud, both he and his wingman, pilot Captain Bob Hagan, encounter difficulties picking up navigational beacons due to “electromagnetic after effects” of the detonation. By the time they are successful in finding the signal four hours later, they are dangerously low on fuel, and before reaching the runway, both have depleted their reserves. While Hagan is able to glide to the runway and achieve a hard landing, Robinson is too far out to follow the same path and therefore attempts to land on water. Neither his plane nor his body has ever been found; his family only learned the truth in 2008 after repeated FOIA requests. (Wikipedia, “Ivy Mike”)

November 4 — Capt. Edward J. Ruppelt and Lt. Robert M. Olsson visit Col. John R. Hood Jr., AMC chief of the Nuclear Powered Aircraft Branch of Wright Air Development Center. Hood had contacted ATIC in December 1950 in regard to certain sightings of UFOs at Oak Ridge National Laboratory, Tennessee, in which he and a naval officer attempted to obtain correlation between sightings and peaks in radiation backgrounds. Now there are indications that there may be some correlation present between unknown radar pickups and rises in radiation, and he suggests that ATIC begin an instrumented radiation program. (“Visit to WADC,” November 4, 1952; Patrick W. Hayes, “Unconventional Aircraft,” Spot Intelligence Report, Dec. 1950)

November 4 — The National Security Agency is established in Fort Meade, Maryland, in a memo by Secretary of Defense Robert A. Lovett, making the new agency responsible for all communications intelligence. The existence of the NSA is not known to the public at this time. (Wikipedia, “National Security Agency”)

November 4–6 — The Baileys and Williamsons come up together for a visit to the Palomar Gardens Café. Adamski tells them he has been making special trips into the desert in hopes of meeting a saucer. Soon Adamski begins channeling space messages in the presence of the Williamsons and the Baileys. At one of these sessions, a space being declares that a face-to-face meeting will take place soon. Williamson and Bailey ask Adamski to call them before he attempts his next contact. (Michael D. Swords, “Strange Days,” IUR 30, no. 4 (Aug. 2006): 23; Zirger and Martinelli, The Incredible Life of George Hunt Williamson, Verdechiari, 2016, p. 357)

November 5 — Dwight D. Eisenhower is elected president.

November 10 — Battelle’s Project Stork notes in its seventh status report that current UFO reports “are now in more detail and often consist of sightings of one object by more than one individual.” 500 copies of a final version of the sighting questionnaire were delivered to ATIC at Wright-Patterson AFB in Ohio. It expects to have all UFO reports dated before June 15, 1952, processed and evaluated by December 10, ready for IBM analysis later. (Clark III 929; “Seven Status Reports for Project Stork, Part 4,” CUFON)

November 16 — Around 5:00 p.m. An air traffic controller at Florence Airport, South Carolina, watches a huge, gleaming disc through binoculars and sees it tilt up sharply before climbing out of sight. About 6 minutes later, people see a group of round, glowing objects north of Landrum, South Carolina. David S. Bunch takes 40 minutes of film with an 8mm camera and telephoto lens before the UFOs disappear to the west. Keyhoe reviews the film along with some Air Force officers. It shows five glowing, oval-shaped objects. (Keyhoe, FS from OS, pp. 4–5; UFOEv, p. 89; Sparks, p. 180)

November 18 — Date of the fake four-page “Briefing Document: Operation Majestic 12. Prepared for President-Elect Dwight D. Eisenhower: Eyes Only.” It states that UFOs are the product of an extraterrestrial civilization, that several had crashed and came into the possession of the US government, and that the US had custody of an alien for some time before it died. It says that Truman established the MJ-12 group in 1947. Called Majestic-12, the group supposedly consists of CIA Director Roscoe Hillenkoetter, Vannevar Bush, Secretary of Defense James Forrestal (replaced by Gen. Walter Bedell Smith in 1950), Gen. Nathan Twining, Gen. Hoyt Vandenberg, Detlev

November 18 — George Adamski telephones George Hunt Williamson and tells him that the space people have informed him a physical encounter will take place on November 20. (Clark III 1284; Michael D. Swords, “Strange Days,” IUR 30, no. 4 (Aug. 2006): 23; Zirger and Martinelli, The Incredible Life of George Hunt Williamson, Verdechiari, 2016, p. 358)

November 19 — Pilot J. Slade Nash reaches 698.5 mph in a North American F-86D Sabre over the Salton Sea, California. (Bryan R. Swopes, “19 November 1952,” This Day in Aviation, 2018)

November 20 — Morning. George Adamski and two associates, Lucy McGinnis and Alice Wells, drive out from the Palomar Gardens Café. They meet the Williamsonsons and the Baileys at Blythe, California, at 8:00 a.m., and they drive to Desert Center, California, taking Desert Center Rice Road 117 toward Coxcomb Mountain. (Clark III 1284; Zirger and Martinelli, The Incredible Life of George Hunt Williamson, Verdechiari, 2016, p. 358)

November 20 — 1:00 p.m. Adamski’s group picnics along the roadside. At 1:30 p.m., they see a cigar-shaped UFO that appears shortly after a US Air Force B-29 passes overhead going in the direction of Parker, Arizona. Adamski asks Lucy McGinnis, accompanied by Alfred Bailey, to drive him a bit more than half a mile away to a flatter area near the foot of Coxcomb Mountain where he can set up his telescope. The cigar-shaped UFO is allegedly following them. (Zirger and Martinelli, The Incredible Life of George Hunt Williamson, Verdechiari, 2016, pp. 54–56, 358–359)

November 20 — 1:57 p.m. Adamski stays behind to set up his equipment as McGinnis and Bailey return to the rest of the group. At 2:04 p.m., another UFO, this time a “Scout ship,” appears near Adamski, who takes seven photos through his telescope. The cigar-shaped UFO is still visible through binoculars. At 2:12 p.m., Adamski takes three more photos of the Scout ship with a Kodak Brownie before it disappears behind a hill. Air Force jet circled the area at least twice. (Zirger and Martinelli, The Incredible Life of George Hunt Williamson, Verdechiari, 2016, pp. 359–360)

November 20 — 2:15 p.m. As he is packing up his telescope, Adamski sees a man waving to him from about a quarter-mile away. He walks over to him and meets an entity named Orthon as his 6 companions watch from a distance. Five-and-a-half feet tall, Orthon [could Adamski have thought of this name from Kodak Ortho film?] is a beautiful being with long blond hair and an extremely high forehead. Through gestures, sign language, a few words, and telepathy, Adamski learns that he is from Venus and the Venusians are visiting earth out of concern for nuclear weapons. The conversation lasts about 45 minutes. Orthon declines to be photographed but asks Adamski to borrow one of his unexposed photos. After Orthon leaves in his Scout ship around 3:04 p.m., Adamski finds tracks in the desert floor. His companions rejoin him at the site. Around 3:45 p.m., Williamson takes casts with plaster of paris, which he just happens to carry with him in case he runs into a stray bone. Each track contains within it a distinct set of symbols. After several hours of assessing the situation and waiting for the plaster to dry, the group returns to Desert Center, California. (Desmond Leslie and George Adamski, Flying Saucers Have Landed, British Book Centre, 1953, pp. 185–215; Adamski Foundation, “The Landing”; James W. Moseley, “Special Adamski Exposé Issue,” Saucer News, no. 27 (October 1957); Curt Collins, “Saucer News Presents: The George Adamski Exposé.” In Honor of James Moseley, May 30, 2014; Zirger and Martinelli, The Incredible Life of George Hunt Williamson, Verdechiari, 2016, pp. 41–89, 360–362; Clark III 39–40, 1284; Michael D. Swords, “Strange Days,” IUR 30, no. 4 (August 2006): 23; Michael D. Swords, “Adamski in the Desert,” IUR 31, no. 3 (October 2007): 22; Rene Erik Olsen, [George Adamski photo analysis], Adamski Foundation; Marc Hallett, A Critical Appraisal of George Adamski: The Man Who Spoke to the Space Brothers, The Author, 2016)

November 20 — 9:00 p.m. The Williamsonsons and the Baileys, with Adamski’s permission, drive to Phoenix, Arizona, and tell the story of their contact to reporters at the Phoenix Gazette. (Zirger and Martinelli, The Incredible Life of George Hunt Williamson, Verdechiari, 2016, pp. 363)

November 21–23 — An Air Force review panel meets at ATIC for three days and recommends that a “higher court” be formed to review UFOs. It schedules this tentatively for late December or early January. (Ruppelt, pp. 200–201)
November 22 — 10:00 p.m. Fr. Carlos Maria, a Capuchin missionary, and five others are driving along the road to Bocaranga, Ubangi-Shari [now Central African Republic] when they notice a large disc speeding overhead. Later, they see four others, motionless. They watch the UFOs for 20 minutes, changing shape and color. (Aimé Michel, The Truth about FS; Jimmy Guieu [pseudonym of Henri René Guieu], Les soucoupes volantes viennent d’un autre monde, Fleuve Noir, 1954; ClearIntent, pp. 128–129)

November 24 — The first printed account of the encounter with Orthon appears in the Phoenix Gazette. The newspaper publishes one of Adamski’s photos as well as a photo of the Williamson and the Baileys. Adamski becomes instantly famous, and Williamson moves to Palomar Gardens for several days. When he tells Adamski he is planning to write a book about his channelings and contacts, Adamski warns him not to mention the contacts have been largely psychic. Adamski discourages him and they have a falling out. Alfred C. Bailey later says he has seen neither spaceship nor spaceman and doubts that anyone else has either. (Zirger and Martinelli, The Incredible Life of George Hunt Williamson, Vergechiari, 2016, pp. 45–52, 99, 358–363; “Palomar Mountain, 1940–1960: From Obscurity to World Fame,” The Adamski Case, September 22, 2019)

November 25 — ATIC Col. Donald L. Bower and Maj. Dewey Fournet brief CIA consultants Frederick C. Durant and Edward Tauss on Blue Book’s top three cases: the Tremonton UFO film of July 2; a dubious sighting of an object seen at Presque Isle and Limestone AFB [now Loring International Airport, Maine, on the night of October 10–11 (which Hynek has already explained as a theodolite miscalibration causing Jupiter and its 4 prominent moons to be visible); and the problematic Florida scoutmaster case of August 19. USAF wants the CIA to think these are good cases until they unravel at the proposed Robertson Panel meeting. (CUFON, “The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts,” May 17, 1996; Clark III 1014)

November 25–26 — Two UFOs are tracked by defense radar in the Panama Canal Zone. (NICAP, “Two Objects Tracked by A/A Gun Radar”; Condon, pp. 168–170)

November 26 — 5:56 p.m. An F-94B from the USAF 59th Fighter-Interceptor Squadron at Goose Bay AFB [now CFB Goose Bay], Labrador, for 15 minutes chases a maneuverable object that changes color from white to red, heading south or southwest. The fighter gets a brief radar lock-on. (Loren E. Gross, UFOs, a History: 1952, November–December, The Author, 1986, p. 44; Sparks, p. 181)

November 30 — 12:30 a.m. Numerous slow-moving 90–100 mph radar targets appear on the MEW VG-2 radar at Washington National Airport in Washington, D.C. Suggestive of anomalous propagation, but they are unlike the July 1952 cases since there is no visual confirmation, no other radars confirming, and no fighters scrambled. A pilot at 6,000 feet sees nothing. CAA Senior Airways Specialist Austin M. Stapf claims the same thing was observed at same time on November 29, and that the Andrews AFB watch supervisor could not visually confirm targets over Andrews displayed on the ARTCC radar scope. (Sparks, p. 181)

December — Maj. Dewey Fournet completes a study of UFOs to assess whether their motions are random or ordered. He concludes that their reported movements show that UFOs are under intelligent control. (Ruppelt, pp. 189–190; Michael D. Swords, “Intelligent Motions,” IUR 33, no. 1 (March 2010): 8–15)

December 2 — CIA Office of Scientific Intelligence Director H. Marshall Chadwell writes another secret memo to Director Walter Bedell Smith on UFOs: “At this time, the reports of incidents convince us that there is something going on that must have immediate attention. The details of some of these incidents have been discussed by AD/SI with DDCI. Sightings of unexplained objects at great altitudes and traveling at high speeds in the vicinity of major U.S. defense installations are of such nature that they are not attributable to natural phenomena or known types of aerial vehicles.” Physicist Julius Adams Stratton and economist Max Millikan tell Chadwell that scientists at the MIT Lincoln Laboratory would like to be a part of any scientific study of the UFO phenomenon, perhaps through Millikan’s MIT Center for International Studies. Stratton indicates that Lab Director Albert G. Hill should organize the study. Attached is a draft of an intelligence directive by Chadwell on behalf of Smith to the National Security Council recommending that the CIA “formulate and carry out a program of intelligence and research activities required to solve the problem of instant positive identification of unidentified flying objects.” But Smith refuses to approve or sign the directive because he is briefing the president directly. (H. Marshall Chadwell, “Unidentified Flying Objects,” December 2, 1952; CUFON, “The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts,” May 17, 1996; Swords 175; Clark III 1013)
December 3 — In another “Flying Saucer” memo, Chadwell admits the Air Force would be suspicious of any MIT Lincoln Lab involvement, and that Princeton or Cal Tech would do, and that “it will be necessary to secure the full backing of the DCI in order that a scientific review of the problem may be laid on.” However, he recommends that this “External Research Project Concerned with Unidentified Flying Objects” be administered by Max Millikan at the MIT Center for International Studies. (P. G. Strong, “Flying Saucers,” December 3, 1952; CUFON, “The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts,” May 17, 1996; Swords 185–186)

December 4 — The CIA Intelligence Advisory Committee recommends that the “Director of Central Intelligence will ‘enlist the services of selected scientists to review and appraise the available evidence in the light of pertinent scientific theories.’” The meeting, chaired by Chadwell, is attended by Robert Amory Jr., Gen. John Samford, Rear Admiral Carl F. Espe, Gen. John M. Willems, William Park Armstrong, Walter F. Colby, Col. Edward R. Porter, and Col. Jere Boggs. This is to be done “immediately” through a National Security Council Intelligence Directive and is essentially the go-ahead for what will be the Robertson Panel. (Robert Amory Jr., “Intelligence Advisory Committee; Minutes of Meeting Held in Director’s Conference Room, Administration Building, Central Intelligence Agency, on 4 December 1952,” December 4, 1952; CUFON, “The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts.” May 17, 1996; Swords 184, 186–187; Hynek UFO Report, p. 20; Clark III 1013)

December 4 — 8:46 p.m. USAF pilot Lt. Robert O. Arnold, 3640th Pilot Training Wing, Laredo AFB [now Laredo International Airport], Texas, is flying a T-28 trainer at 6,000 feet when he sees a bright bluish-white glowing object below him at about 1,500–2,000 feet and rapidly climbing to his level. It shows no navigation lights. He tightens his left turn to keep the object in view, but it suddenly climbs to 9,000 feet in several seconds and drops down to his altitude again, then stops and hovers. Arnold pursues but after 2 seconds the object suddenly heads towards him on a collision course at high speed at 8:53 p.m., wavering slightly at about 300 feet. He sees the object as a blurred reddish-bluish haze smaller than his T-28. It rapidly ascends to 15,000 feet then circles left as if positioning for another pass. In fear Arnold turns off his running lights, spirals down to 1,500 feet while keeping the object in sight as it continues to head towards him in a dive, then pulls up and climbs out of sight. A lighted weather balloon is launched at 8:53 p.m. from Laredo AFB but it is not observed near any aircraft. (NICAP, “The Laredo / ‘Earl Fogle’ Case”; Sparks, p. 182)

December 6 — 5:24 a.m. The 3-man crew of a USAF B-29 (1st Lt. Norman Karas and 1st Lt. William W. Naumann) over the Gulf of Mexico 100 miles south of Louisiana track five unidentified blips on the bomber’s radar. They maneuver around the plane at a speed of 5,240 mph. The crew sees some flashes of light, but the targets are 20 miles or more away. The five UFOs merge with a huge blip that accelerates and vanishes at a speed of 9,000 mph. Additional crewmen involved are 1st Lt. William W. Naumann, Jr., Staff Sgt B. R. Purcell, Staff Sgt. William J. De Rause, 2nd Lt. Robert J. Eckert, and Staff Sgt. Harry D. Shogren. (NICAP, “B-29 Encounters High Speed Objects over Gulf”; Keyhoe, FS from OS, pp. 161–166; Sparks, p. 183; Condon, pp. 148–150; Patrick Gross, “B-29 Radar and Visual Multiple Witnesses Observations, Dec. 6, 1952”)}

December 10 — H. Marshall Chadwell writes to Walter Bedell Smith that OSI has been working with mathematician Howard P. Robertson of Cal Tech to establish a panel of scientists (including astronomer Thornton Leigh Page) and engineers to review the status of UFOs in January. Somewhere along the line, MIT’s Lincoln Labs and CIS have been eliminated. (Thornton Page, [Letter], December 12, 1952; CUFON, “The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts,” May 17, 1996; Swords 187–188)

December 10 — 7:15 p.m. The pilot and radar observer of an F-94 patrolling from Moses Lake AFB [now the Grant County International Airport] spots a light over the Hanford nuclear plant near Richland, Washington, while flying at 26,000 feet. They contact the ground control station, which reports that they know of no planes in the area and that their ground radar shows nothing. They close in on the object, which is large, white, and round and features a dim reddish light coming from two windows. They lose visual contact then get a lock-on from their ARC-33 airborne radar. As they attempt to close in, the object reverses direction and dives away. They attempt several more times to approach the light and have to alter course to avoid a collision that seems imminent. (NICAP, “F-94 R/V with Round Object”; Ruppelt, pp. 61–62; Sparks, p. 185; James E. McDonald, “Statement on Unidentified Flying Objects,” in Symposium on Unidentified Flying Objects, Hearings, US House Committee on

December 12 — The CIA, having learned that ATIC is withholding significant case reports for the upcoming Robertson Panel, sends a three-man team to Wright-Patterson AFB in order to obtain relevant documents. The team includes Robertson himself, CIA Assistant Director H. Marshall Chadwell, and CIA rocket consultant Frederick C. Durant, a personal friend of Ruppelt who urges him to comply. At ATIC they meet with personnel from Battelle Memorial Institute in Columbus, Ohio, which has been studying the UFO data in great secrecy. Battelle requests the CIA to postpone the panel until March so they can finish the study. Robertson agrees to postpone the panel, but is later overruled by CIA Director Gen. Walter Bedell Smith. (CUFON, “The CUFON 1952 CIA UFO-Related Document Sampler, Part 1 of 2 Parts,” May 17, 1996; NICAP, “The 1952 Sightings Wave”; Thomas Tulien, ed., Proceedings of the Sign Historical Group UFO History Workshop, Sign Historical Group, November 2001, p. 47; Clark III 1014)

December 16 — Chadwell tells CIA Acting Deputy Director for Intelligence Robert Amory Jr. that he is unimpressed with the three Blue Book cases, especially since Presque Isle was identified as the planet Jupiter. (Clark III 1014)

December 21 — Evening. J. E. Hawkey, civil commissioner of Fort Victoria [now Masvingo], Zimbabwe, is driving near Mvuma when he sees a bright red light crossing the road about 30 feet in the air, then hovering. Suddenly it shoots straight up and disappears. After a short while it descends some distance away and travels straight down the road. Hawkey follows it at about 80 mph, after which it speeds up and disappears at three or more times the speed. He has the object in sight for about 20 minutes. (Southern Rhodesia Newsletter; Jan Aldrich)

December 22 — Ruppelt finds out that the CIA Robertson Panel is back on again after being postponed on December 12. Apparently under pressure from the Air Force, which is setting a trap to embarrass the CIA with sensational IFO cases dressed up as “best” unknown UFO cases, CIA Director Gen. Walter Bedell Smith reverses the decision to postpone the panel meeting till March 1953 or later. Smith orders the Robertson Panel to be carried out immediately. A rush-to-judgment panel will have no time to reflect on the USAF trickery involved in the IFOs-as-UFOs deception and will just react in dismissive skepticism that there is no scientific evidence for UFO reality, and hence no reason for the CIA to intrude into USAF jurisdiction over air intelligence matters such as unidentified aerial threats (UFOs). Ruppelt calls ADC to say that he will not be able to conduct the ADC UFO briefing tour as previously scheduled due to the CIA meeting now tentatively set in early January 1953 (he confirms the call by teletype December 23). (Thomas Tulien, ed., Proceedings of the Sign Historical Group UFO History Workshop, Sign Historical Group, November 2001, p. 48; Clark III 1014)

December 22 — 7:30 p.m. An instrument technician driving toward Larson AFB [now Grant County International Airport] near Moses Lake, Washington, stops his car to watch a hat-shaped glowing object rising vertically in odd spurts right and left, then level off at high speed. The object glows white with a red side when it is rotated. Halfway through a roll the light disappears, then it holds stationary in the sky with jumpy movements. Duration is about 15 minutes. (NICAP, “Hat-Shaped Object Observed by Technician”; Sparks, p. 16)

December 29 — 7:48 p.m. Col. Donald J. M. Blakeslee, 27th Fighter Escort Wing, while flying near Misawa, northern Honshu, Japan, in an F-84G at 27,000 feet in altitude, observes an object like a rotating cluster of lights colored
white, green, and red. Blakeslee climbs to 35,000 feet, at which point he is level with the unknown object. He attempts a pursuit, but the UFO disappears in 30 seconds. (NICAP, “Col. Blakeslee / F-84 Incident”; Sparks, p. 187; Swords 212–213)

December 29 — 9:05 p.m. Capt. William T. Bowley and Capt. Herbert T. Lange, both of Perrin AFB [now North Texas Regional Airport] near Denison, Texas, are piloting a B-26 on a training flight headed west at 6,000 feet altitude and 300 mph when they see a large, intense, bluish-white light near Vega, Texas. It is about 350 feet long at their 11 o’clock position, paralleling their course at the same altitude and closing slightly. After 5 minutes, the object suddenly climbs vertically 7,000 feet in 5 seconds (about 2,000 mph) to disappear in thin clouds at 13,000 feet and causing the clouds to glow as if lit by a searchlight. Bowley radios the CAA controller in Tucumcari, New Mexico. Shortly after, the object reappears under the clouds and the CAA controller is told to look for it but he can’t see it (possibly because he is told to look in the wrong direction). After 2 minutes, it climbs to the west and disappears. (NICAP, “Object Closing on B-36 Suddenly Climbs”; Sparks, p. 187)

1953

1953 — During off-shore combat maneuvers, a squadron of carrier-based Navy AD-3 attack planes is approached by a rocket-shaped UFO that swoops down on the flight from above. The object levels off about 1,000 feet overhead, slows, and paces the aircraft. When the Squadron Commander leads his flight in pursuit of the UFO, it turns sharply so that its tail is pointed away and shoots upward out of sight in seconds. (Keyhoe, FSTS, pp. 266–267).

1953 — Midday. A member of the crew of a Shell tanker in Hong Kong harbor, China, watches, along with many others on shore and aboard the ship, a silver-white disc hovering at 6,000–7,000 feet. Within a second or so, it moves a full 45° arc to an area where there are some white clouds at about 5,000 feet. It shines through the cloud cover like the moon through a mist. (J. Allen Hynek, “A Daylight Disc in Hong Kong Harbor,” IUR 2, no. 8 (August 1977): wrap)

1953 — Evening. An Air Force pilot and a student are flying an F-84 Thunderjet on the home leg of a training flight over North Texas when the student notes an out-of-place light. At first the pilot thinks it’s Venus, but they realize it is moving. The student steers the plane toward the light, but it zooms past them at high speed. The pilot takes the stick and turns the aircraft to follow it. The light, which now looks like a metallic domed disc with windows, passes them again. The pilot accelerates to more than 500 mph and pursues it; the disc roars past them again. The chase goes on for 10–15 minutes until a final pass when the object shines a bright light into the cockpit. The pilot takes an evasive measure and flies back to base. (CUFOS case file)

1953 — Fred P. Stone founds the Australian Flying Saucer Club in Adelaide, South Australia. It later becomes the Australian Flying Saucer Research Association and publishes the Australian Saucer Record from 1955 to 1963. From 1962 to 1971, it publishes Panorama. (Australian Saucer Record 1, no. 2 (2nd Quarter, 1955); Panorama 1, no. 1 (1962))

January — Beams of microwaves, varying between 2.5 and 4 gigahertz, from Soviet sources aimed at the US embassy in Moscow are first detected, increasing in intensity by 1975. Detected by routine background radiation testing, the beams come from a source in a Soviet apartment building about 325 feet west of the embassy, affecting the west façade of the central building, with highest intensities between the third and eighth floors. The microwave transmissions are only five microwatts per square centimeter, well below the power level of microwave ovens and well below what would be needed to heat anything. Shielding is put in place by 1964, but the discovery is kept secret. (Wikipedia, “Moscow Signal”; J. Mark Elwood, “Microwaves in the Cold War: The Moscow Embassy Study and Its Interpretation,” Environmental Health 11 (2012))

January 1 — 8:45 p.m. While driving on Hwy 91 between Craig and Wolf Creek, Montana, Warner F. Anderson, manager of a photo shop with wartime air spotter experience; Mrs. Greta C. Wills, manager of women’s apparel store; and teenager Marlene Wills see a saucer-shaped object above horizon about 5 miles away to the southwest. The object is an estimated 25–40 feet long and 6–8 or 18–25 feet thick and looks like two soup bowls joined at the rims. It has a red glowing bottom and portholes. The object dives low over the Missouri River to within 150–300 feet away then climbs fast horizontally at an estimated 3,600 mph to the northeast. (NICAP, “The 1953 UFO Chronology”; Sparks, p. 188)

January 3 — The 4602d Air Intelligence Service Squadron (AISS) is created at Ent AFB [now the US Olympic Training Center] in Colorado Springs, Colorado, by Air Defense Command Regulation AFR 24-4. One of its missions is to
collect physical UFO evidence. (Brian Skow and Terry Endres, “The 4602d Air Intelligence Service Squadron and UFOs,” IUR 20, no. 5 (Winter 1995): 9) January 6 — 1:05 a.m. The 147th AC&W Squadron at Duncanville, Texas, is notified by the CAA at Meacham Field [now Fort Worth Meacham International Airport] about a UFO northeast of Dallas. Tinker AFB in Oklahoma City reports a radar target 20 miles southwest of Paris, Texas. An arrowhead-shaped UFO with green and white lights is seen by some witnesses in the Dallas area. (NICAP, “Arrow-Shaped Object Tracked at 600 Knots”; “Flying Arrowhead Seen over Dallas: ‘Not a Star or Plane,’” St. Louis Post-Dispatch, January 6, 1953, p. 1; Sparks, p. 188) January 8 — 7:15–7:30 a.m. USAF ADC 82nd Fighter Interceptor Squadron personnel at Larson AFB [now Grant County International Airport], Moses Lake, Washington, all on the ground, see a green, disc-shaped object about the size of large weather balloon flying to the southwest. It has a vertical bobbing motion and makes sideways movements at about 8,000 feet below scattered clouds. It moves away against the wind until it disappears in the distance. The object is also observed by base personnel at Ephrata, Washington. An F-94 is scrambled at 7:43 a.m. and searches for 30 minutes, but the UFO is gone. (NICAP, “The 1953 UFO Chronology”; Sparks, p. 188; James E. McDonald, “Statement on Unidentified Flying Objects,” in Symposium on Unidentified Flying Objects, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 50–51) January 8 — 10:20 p.m. A triangular object with a brilliant reddish glow is seen for 10 minutes at Mosgiel, New Zealand. It fades, then reappears with a rising and falling motion, accompanied by a small white light. (“The New Zealand Sightings,” Flying Saucer News, no. 1 (Spring 1953): 8) January 9 — Howard C. Cross, a senior staff member at Battelle, writes a letter to Col. Miles E. Goll of ATIC, arguing that “agreement between Project Stork [Battelle’s study] and ATIC should be reached as to what can and what cannot be discussed at the meeting in Washington on January 14–16.” He suggests a “controlled experiment” be undertaken by USAF to obtain physical data. This would consist of “observation posts with complete visual skywatch, with radar and photographic coverage, plus all other instruments necessary or helpful in obtaining positive and reliable data on everything in the air over the area.” The suggestion is that “many different types of aerial activity should be secretly and purposefully scheduled within the area,” meaning that the Air Force would release balloons to generate spurious UFO phenomena. The memo is a desperate effort to buy time for Battelle to finish its statistical analysis. Jacques Vallée speculates that this letter by Cross (to whom Vallée assigns the pseudonym “Pentacle”) could have led to the military setting up artificial UFO waves and simulated cases in selected areas; however, this is clearly not the case, as Jennie Zeidman and Mark Rodeghier elaborately demonstrate in IUR. (H. C. Cross letter to Miles E. Goll, January 9, 1952; NICAP, “The ‘Pentacle Memorandum,’ Including Text of Correspondence with Dr. Jacques Vallée,” August 17, 1993; Hynek, The UFO Experience, Ballantine ed., 1974, p. 191; The Hynek UFO Report, p. 21; Jacobs, The UFO Controversy, Signet ed., 1976, p. 79; Jacques Vallée, Forbidden Science, North Atlantic, 1992, p. 428; Clark III 1214–1215; Thomas Tulien, ed., Proceedings of the Sign Historical Group UFO History Workshop, Sign Historical Group, November 2001, p. 48; Jennie Zeidman, “I Remember Blue Book,” IUR 16, no. 2 (Mar./Apr. 1991): 7–12, 23; Jennie Zeidman and Mark Rodeghier, “The Pentacle Letter and the Battelle UFO Project,” IUR 18, no. 3 (May/June 1993): 4–12, 19–21) January 9 — The CIA/OSI attempts to get Walter Bedell Smith’s approval for “two series” of scientific panels in January and February, which would buy some time, but the suggestion is rejected. (Clark III 1014) January 9 — Radio station KVET in Kerrville, Texas, blames a 75-second interruption in its operation on a red-orange oval object seen by four junior high school students over the city at the same time. Ivan Young, 13, and Edgar Rasmussen, 14, see the object fly in from the west, circle, and disappear to the north. They see two fins on its end shooting out red and green flames. It is making a buzzing noise. KVET engineer Britt Lamb says the radio interference is the weirdest he has ever seen—heavy static “with a roar that traveled up and down the scale.” (“Fiery Object Jams Radio at Kerrville,” Fort Worth (Tex.) Star-Telegram, January 10, 1953, p. 2; Schopick, pp. 78–79) January 9 — 6:50 p.m. An F-94 makes radar contact with a UFO at a range of about 13.5 miles over Misawa Air Base, Honshu, Japan. The radar locks on at 15,000 feet and contact is broken at a range of 600 feet. The radar observer reports unusual interference on the set throughout the mission, but the set appears to be operative both before and after. The radar contact lasts approximately 2 minutes. (NICAP, “F-94 Radar/Visual of Rotating UFO”; Sparks, p. 189) January 9 — 7:27 p.m. B-29 copilot 1st Lt. Charles C. Loveless sees a V-formation of bluish-white lights approaching his aircraft over Santa Ana, California. Pilot 1st Lt. Lowell D. Brandt turns to avoid them. (NICAP, “B-29 Bomber Crew Watch V-Formation”; UFOEv, p. 21) January 10 — 4:45 p.m. Retired Air Force Col. Robert McNab and a Mr. Hunter of the Federal Security Agency see a flat object to the northwest of their location 8 miles west of Sonoma, California. It is traveling about 2,400 mph and
makes three 360° right turns in 2–3 seconds each in about 1/8 the radius required for jets (about 1/4 mile) and two abrupt 90° turns to the right and left, each turn 5 seconds apart. It almost stops, accelerates to its original high speed, almost stops again, speeds up again, and finally flies out of sight vertically. (NICAP, “Flat Object at 2,400 MPH”; Sparks, p. 189)

January 12 — 1:00 p.m. Maurício Ramos is driving on grassy terrain near Santana dos Montes, Minas Gerais, Brazil, when he sees a luminous, metallic disc smaller than a Volkswagen hovering 6 feet from the ground. He approaches to within 6 feet of it, and a door opens. Two entities shorter than 5 feet tall, wearing lead-colored clothing with shiny balls fitted to the shoes, jump out. Ramos thinks they invite him aboard, but he does not answer because he is getting an increasingly severe headache as he watches. When the headache goes away, the disc and creatures have disappeared. (Pesquisas sobre Tripulantes de DV,” Boletim SBEDV, no. 55/59 (1967): 1–2, 8–9; Brazil 25–26)

January 14 — 9:30 a.m. The opening meeting of the Robertson Panel convenes in the OSI conference room at CIA Building “M” in Washington, D.C. Present are scientists Howard P. Robertson, Samuel A. Goudsmit, Luis Walter Alvarez, and Thornton Leigh Page. CIA members Philip Grandin Strong, Lt. Col. Frederick C. E. Oder, David B. Stevenson, and Frederick C. Durant are also present. All are skeptical, if not openly hostile to UFO reports. Page later says that “H. P. Robertson told us in the first private (no outsiders) session that our job was to reduce public concern and show that UFO reports could be explained by conventional reasoning.” The panel first reviews the CIA OSI study from August, the ATIC November 21 meeting, the December 4 IAC decision, the visit to ATIC by Chadwell and Robertson, and CIA concern over potential national security dangers. They watch the Montana and Utah films. Lt. Robert S. Neasham and Harry Woo of the Navy Photo Interpretation Laboratory report on their analyses of both films, which conclude that the objects are unidentified. Ruppelt speaks for 40 minutes on the Blue Book method of UFO investigation. It is possibly here that he first suggests using 4602nd AISS field units to conduct Blue Book field investigations. The meeting adjourns at 5:15 p.m. (Frederick C. Durant, “Report of Meetings of Scientific Advisory Panel on Unidentified Flying Objects, January 14–18, 1953,” memorandum for Assistant Director for Scientific Intelligence, February 16, 1953; Clark III 1014–1015; Michael D. Swords, “Dr. Robertson Requests the Honor of Your Attendance,” IUR 20, no. 4 (July/Aug. 1995): 16–20; Good Above, pp. 335–339; Swords 188–192)

January 15 — The second day of the Robertson Panel. Ruppelt completes his presentation, then Hynek discusses Battelle’s Project Stork. The CIA shows a film of seagulls in flight. Lt. Col. Oder gives a 40-minute presentation on Project Twinkle. In the afternoon, Gen. William M. Garland states his desire to increase the use of thoroughly briefed USAF intelligence officers to investigate UFO reports, declassify as many reports as possible, and enlarge Blue Book. Other USAF representatives discuss the difficulties of setting up instrument watches to monitor sightings. (Frederick C. Durant, “Report of Meetings of Scientific Advisory Panel on Unidentified Flying Objects, January 14–18, 1953,” memorandum for Assistant Director for Scientific Intelligence, February 16, 1953; O’Connell 87–89; Clark III 1015; Michael D. Swords, “Dr. Robertson Requests the Honor of Your Attendance,” IUR 20, no. 4 (July/Aug. 1995): 16–20)

January 16 — The third day of the Robertson Panel. Hynek speaks again, followed by Maj. Dewey Fournet, who talks about his motion studies of UFOs that indicate controlled flight. Physicist Lloyd Berkner joins the panel in the afternoon. In the afternoon, panel members talk about conclusions they have reached, and Robertson agrees to draft a report for review (although it has already been written by Durant prior to the meetings, which Fournet has suspected). (Frederick C. Durant, “Report of Meetings of Scientific Advisory Panel on Unidentified Flying Objects, January 14–18, 1953,” memorandum for Assistant Director for Scientific Intelligence, February 16, 1953; O’Connell 87–89; Clark III 1015; Michael D. Swords, “Dr. Robertson Requests the Honor of Your Attendance,” IUR 20, no. 4 (July/Aug. 1995): 16–20)

January 17 — The final day of the Robertson Panel. The panel reviews Robertson’s draft report (Berkner has already seen it) and puts it into final form. (By 11:00 a.m., both CIA Director Walter Bedell Smith and Gen. John A. Samford have seen and approved the draft.) The scientists agree that since most sightings can be explained, the rest can be accounted for with further investigation, which is a “great waste of effort.” They reject Fournet’s UFO reports as “raw” and “unevaluated.” The Montana film is said to depict aircraft. They reject the Navy analysis of the Utah film, calling the objects “high reflectivity of seagulls in bright sunlight.” Because the “mass receipt of low-grade reports [tends] to overload channels of communication with material quite irrelevant to hostile objects that might some day appear” (a phony issue invented by Thornton Page), the Air Force should embark on a debunking campaign that would “result in reduction of public interest in flying saucers” with the help of scientific pronouncements (suggested by Hynek) and media, including Walt Disney Inc. animated cartoons. Blue Book should be expanded to 18 staff members (it has 5) so that it can educate and debunk effectively, but this never happens. Civilian UFO groups such as CSI and APRO should be watched “because of their potentially great
influence on mass thinking if widespread sightings should occur. The apparent irresponsibility and the possible use of such groups for subversive purposes should be kept in mind.” The panel and report are kept classified until a brief summary is declassified in 1958, and the CIA’s involvement is kept secret until 1966. (Frederick C. Durant, “Report of Meetings of Scientific Advisory Panel on Unidentified Flying Objects, January 14–18, 1953,” memorandum for Assistant Director for Scientific Intelligence, February 16, 1953; Clark III 1014–1016; Michael D. Swords, “Dr. Robertson Requests the Honor of Your Attendance,” IUR 20, no. 4 (July/Aug. 1995): 16–20; Swords 192–200)

January 17 — 3:55 p.m. Geologist/salesman John Townsend Sackett is riding in a bus with about a dozen passengers near Guatemala City, Guatemala, when he observes a brilliant greenish-gold object, shaped like the Goodyear blimp. It is later described as being about twice the size of a DC-3. The object is traveling at about 400 mph straight and level in a northwesterly direction at about 6,500 feet. It almost stops in mid-flight then rises vertically about 1,500 feet, hovers for about 2 seconds, then immediately resumes flight at a new altitude. The object is lost to view because of intervening terrain. (NICAP, “Blimp-Like Object Sighted by Geologist”; Sparks, p. 189)

January 18 — Upon Hynek’s return to Ohio State University from the Robertson Panel, he and his new research assistant Jennie Zeidman come up with the name “Project Henry” to describe his consultancy with the Air Force. It is based on the Flit bug-spray advertisement that has a woman saying, “Quick, Henry, the Flit!” About once a week, a courier from Battelle arrives at Hynek’s office with a manila envelope stuffed with teletype UFO reports for him to examine. Hynek travels to the Blue Book facility in Building 263 at Wright-Patterson about 2–3 times a month, with Zeidman sometimes accompanying him, (Jennie Zeidman, “I Remember Blue Book,” IUR 16, no. 2 (Mar./Apr. 1991): 7–12, 23)

January 20 — Robertson writes a letter to Chadwell, saying “perhaps that I’ll take care of the Forteans for a while” and mentions an upcoming meeting with the “NSA group” on February 5. (Swords 189)

January 20 — Dwight D. Eisenhower is sworn in as president.

January 24 — Ruppell travels to Ent AFB [now the US Olympic Training Center] in Colorado Springs, Colorado, to brief the 4602nd AISS on how they might help Blue Book investigate UFOs. He also puts in for a transfer to Air Defense Command here.

January 26 — Air Force Press Officer Albert M. Chop writes a letter to Keyhoe’s publisher Henry Holt & Co., declaring that all the sighting reports he is using for his upcoming Flying Saucers from Outer Space were cleared and made available to him from Air Technical Intelligence records. (Albert E. Chop, Letter to Henry Holt & Company, January 26, 1953; Good Above, p. 542)

January 28 — 1:06 p.m. R. W. Love and a Mr. Ferrenti, while engaged in retrieving radio-controlled drones on a boat 1,100 yards offshore and south of Naval Air Station Point Mugu [now Naval Base Ventura County] near Oxnard, California, see a white, flat disc with fuzzy or shimmering edges rapidly approach from the northwest flying straight and level, overtake a jet aircraft, pass overhead, and disappear in the haze to the east. (NICAP, “Flat Disc Observed Overtaking Jet”; Sparks, p. 190)

January 28 — 2:20 p.m. Northrop Aircraft test pilot Rex Hardy Jr. is flying over Malibu, California, when he and two other crew members see a formation of four UFOs the size of a B-36. They are circular in shape, aluminum-colored, and flying at 1,200 mph. (Lorenzen, UFOs: The Whole Story, Signet, 1969, p. 50)

January 28 — A Maj. Geyer at Mitchel AFB [now closed] near Uniondale, New York, investigates reports of a UFO seen by both civilian and military witnesses. The UFO is an oval object glowing with different colors and having a tail or projection. He quickly concludes that it is a meteor and submits a report to Blue Book. However, one of the witnesses, author Marie Armstrong Essipoff (Ben Hecht’s first wife), later writes to Keyhoe saying that she had told Geyer that the object wobbled and it had a turret on top. She draws a picture and Geyer says it looks like one of their flight simulators. But it’s “still a meteor,” he says. (Swords 199–200)

January 28 — 9:00 p.m. The control tower at Marine Corps Air Station El Toro [now closed], California, spots a large, luminous, red object and asks Maj. Harvey N. Patton to give chase. He pursues it from Newport Beach to Long Beach and has it in sight for 3–4 minutes but is unable to gain on it. (NICAP, “Marine Fighter Asked to Check on Amber Object”)

January 28 — 9:40 p.m. Maj. Hal W. Lamb, USAF senior pilot at Moody AFB in Valdosta, Georgia, apparently sees the setting planet Venus (although this is disputed) changing color and shape while flying a T-33 (or an F-86). It is also seen by Turner AFB [now Naval Air Station Albany] tower operators in Albany [not Dobbins Air Reserve Base in Marietta], Georgia (with time errors of about 10 minutes). About the same time, two GCA radar maintenance men at Turner AFB radar track three moving targets and a stationary target. At 10:10 p.m., the GCA reports two stationary targets at 17 and 27 miles, both 300° azimuth. No visual confirmation, though binoculars are used. (NICAP, “Several Radar Contacts”; Sparks, p. 191; Loren E. Gross, UFOs, a History: 1953, January–March, The Author, 1988, p. 66; Marler 129–130)
January 29 — **Ruppelt** still thinks that the Robertson Panel has accepted **Garland**’s recommendation to expand Blue Book (it hasn’t) and that its education and debunking recommendation means that UFO information should be released to the public (it didn’t). **Fournet**, **Chop**, and Col. Teabert (Kenneth E. Thiebaud?) of AFOIN-2 think the same. In Washington, Ruppelt hears that the press has heard rumors about the Utah film, and he decides to release it, focusing on the seagull explanation. *(The Hynek UFO Report, p. 236)*

January 29 — A briefing of the Office of Naval Estimates Board by the CIA on UFOs includes the showing of the Utah and Montana films. (Frederick C. Durant, “**Briefing of ONE Board on Unidentified Flying Objects.**” January 30, 1953)

January 29 — 9:55 a.m. A small gray oval-shaped object is seen between Houlton and Chatham, Maine, by 2nd Lt. Fred T. Goetting Jr., pilot of an F-94B. Goetting points out the object to his radar observer, Lt. **Howard C. Kelley**. The object appears to be 10° above the F-94B, which is at 23,000 feet. Goetting attempts to intercept the object at a speed of 0.8 Mach. This chase continues for 8 minutes without the F-94 gaining, and the chase is broken off because of low fuel. The object is seen by at least two fighter aircraft from other squadrons. (NICAP, “**Gray Oval Sighted by 3 Fighter Aircraft**”; **Sparks**, p. 191)

January 29 — 11:30 a.m. A farmer named **Lloyd C. Booth** just north of Conway, South Carolina, hears a commotion of animals, grabs his .22 revolver, and sees an oblong-shaped, lighted object 10 feet above the trees moving slowly or hovering, with a low humming sound. He shoots at the object twice. The first bullet bounces off with a metallic sound; at the second shot the object tilts slightly and ascends at a 65° angle to the west at 600–700 mph and disappears. One of his cows had died the previous evening. (NICAP, “**Man Fires 0.22 at Hovering Object**”; **Sparks**, p. 191; “**Conway S.C. Man Shoots Saucer**,” APRO Bulletin 1, no. 5 (March 15, 1953): 1, 4–5; Donald E. Keyhoe and Gordon I. R. Lore Jr., **Strange Effects from UFOs**, NICAP, 1969, pp. 64–66)

January 29 — 2:20 p.m. Northrup test pilot **Rex Hardy Jr.**, test pilot Chester Mathews, and Northrup photographer Jim Wilkinson see four metallic, disc-shaped object the size of a B-36 flying in squadron formation over Malibu Beach, California. They estimate their height as 20,000 feet and speed as 1,200 mph. They watch for about 5 minutes. (NICAP, “**Four B-36-Sized Discs Observed by 3-Man Crew**”)

February — **Albert K. Bender** appoints **Gray Barker** as IFSB’s chief investigator. (“**IFSB Forms Dept. of Investigation.**” Space Review 2, no. 2 (April 1953): 1; Clark III 189)

February 1 — 9:30 p.m. A T-33 flying 10 miles west of Terre Haute, Indiana, sights a close group of moving lights changing color from red to blue, to green to yellow. The pilot estimates their altitude to range between 15,000 feet to 30,000 feet flying in a manner similar to conventional aircraft. Searchlights from the St. Louis, Missouri, area seem to be following the unidentified lights. (NICAP, “**T-33 Pilot Observes Unidentified Lights**”)

February 3 — 8:00 p.m. **George Hunt Williamson** and his wife Betty Jane watch two UFOs near the ground from their home on Brookside Boulevard in Prescott, Arizona. Another UFO passes over the house at 10:00 p.m. (Zirger and Martinelli, **The Incredible Life of George Hunt Williamson**, Verdechiarri, 2016, pp. 363–364)

February 4 — 1:50 p.m. US Weather Bureau observer Stanley H. Brown in Yuma, Arizona, tracks with a theodolite a white, oblong object. It is surrounded by a thin white mist and flies straight up and levels off. After 20 seconds, the object is joined by a second one that flies away twice and returns. Both are lost to sight behind clouds to the south-southwest. The sighting lasts 5 minutes. (NICAP, “**Theodolite Tracking of Two Elliptical Objects**”; **Sparks**, p. 191; James E. McDonald, “**Statement on Unidentified Flying Objects**,” in Symposium on Unidentified Flying Objects, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 62–63)

February 6 — 1:34 a.m. A B-36 aircraft piloted by Maj. **Leo J. Moffatt** is over Rosalia, Washington, when he sees one round white omnidirectional light at an altitude of approximately 7,000 feet on a southeast course, circling and rising as it proceeds. It is visually observed for a period of 3–5 minutes. The B-36 makes a 180° descending turn toward the light, which is estimated to be moving at a speed of 170–230 mph. Blue Book explains it as a weather balloon launched from Geiger Field [now Spokane International Airport]. (NICAP, “**B-36 Encounters Light at 7,000’**”; **Sparks**, p. 192; James E. McDonald, “**Statement on Unidentified Flying Objects**,” in Symposium on Unidentified Flying Objects, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 67–68)

February 7 — 9:22 p.m. A USAF F-94 crew and other witnesses near Nemuro, Hokkaido, Japan, see a bright orange object change color to red and green at intervals and disappear behind a cloud. It is also tracked by ground radar. (NICAP, “**F-94 Crew in Air and Ground Radar Tracking**”; Condon, p. 122; **Sparks**, p. 192)

February 9 — **Al Chop** has written a press release on the Utah film with the approval of Capt. Harry B. Smith of AFOIN. They decide to also release the USAF (possible aircraft) and Navy (self-luminous or light sources) analyses,
February 9 — CIA agent Hayden Channing writes a memo to the Domestic Contact Division describing a recent [late January?] public meeting of the Civilian Saucer Investigation group in Los Angeles, California. North American Aviation project engineer Walther A. Riedel is a member of the organization, and he describes the analyses of the UFO reports it receives. Only about 25 sightings are unidentified, and these they forward to Project Blue Book.

Channing writes: “Apparently, an eye and interest are also directed to the UFOs by the Department of Defense. The Department of the Air Force alone has had 500 usable reports to date this year. More will certainly be forthcoming.

It is a matter of regret to me that the Department of the Air Force is not more interested in the UFOs. It appears to me that the Department is doing more to discredit them than to establish the fact that they exist. If it was not for the publicity given to the Roswell incident, I would have thought that the Department was not even aware of the situation.

I would like to see the Department of the Air Force give more attention to the UFOs. It is my belief that the UFOs are real, but we can only study them and investigate them if we are interested in them.

February 11 (or 19) — 10:00 p.m. At the Naval Auxiliary Air Station [now Northeastern Regional Airport] in Edenton, North Carolina, Marine 1st Lt. Edward Balocco is on intercept stand-by duty when the alert whistle goes off. Minutes later he is in his F9F Panther jet heading north to Virginia Beach, Virginia, while being vectored to an unknown target by the 2nd Marine Aircraft Wing at Marine Corps Air Station Cherry Point in Havelock, North Carolina. By the time he gets close to the target, it has disappeared from radar at Norfolk, Virginia. After searching the area for 15 minutes, he heads back for fuel. Flying south at 20,000 feet, he notices a light below him on the port side on or near the ocean. After turning his navigation lights back on, he notices that the light has risen to his altitude and is only 2,000 feet away. Closing in on it, he sees it is a disc with blinking red lights. At 350 feet away, his cockpit is bathed in blue-white light and everything seems motionless and silent. He looks at his gloved hand and he can see the bones in his hand like an X-ray. Suddenly there is a flash, and the UFO breaks away as sound and motion return. Balocco tries to pursue it again unsuccessfully. Captain Thomas Riggs, whose F9F Panther has also been scrambled, reports the UFO is moving south along the North Carolina coast. He is debriefed and told not to mention the incident. (“Cherry Point, N.C.,” APRO Bulletin 1, no. 5 (March 15, 1953): 9–10; Good Need, pp. 183–184; Shoot 60–61)

Mid-February — Weapons engineer Chester W. Lyrle Sr., deputy director of operations for SAC’s Eighth Air Force Headquarters, is visiting Eielson AFB near Moose Creek, Alaska, with Gen. William H. Blanchard when he finds out his wife is about to give birth in Chicago, Illinois. Blanchard offers to personally fly him in a bomber to an air force base in Illinois so he can get home quickly. During the long flight, their conversation turns to UFOs. Blanchard unexpectedly mentions the 1947 Roswell incident and that a crashed alien spacecraft had indeed been recovered. He tells Lyrle that four dead humanoid beings had been aboard. (Nukes 478–481)

February 23 — Project Stork’s William T. Reid writes to Miles E. Goll at Wright-Patterson AFB in Ohio, saying that UFO reports have been processed through October 15, 1952, and evaluations completed for reports through July 31, 1952. (“Seven Status Reports for Project Stork, Part 4 of 4 Parts,” CUFON)

February 25 — Pentagon press officer Albert M. Chop writes to Maj. Donald E. Keyhoe and verifies that the files on 41 cases investigated by the Air Force for his upcoming book Flying Saucers from Outer Space were indeed cleared for release by ATIC. (Albert M. Chop, Letter to Donald E. Keyhoe, February 25, 1953; NICAP, “The Chop Clearance List”)

February 25 — Project Second Storey meets for the last known time, chaired by astrophysicist Peter M. Millman of the Dominion Observatory in Ottawa, Ontario, and consisting of military and intelligence officers, as well as Wilbert Smith. It concludes that, because details of most sightings cannot be adequately confirmed, UFO reports do not lend themselves to a “scientific method of investigation.” It determines that UFOs do not require a Canadian armed forces investigation, but reports should still be sent to the Directorate of Scientific Intelligence. (“Wilbert B. Smith,” Northern Ontario UFO Research and Study; Chris Rutkowski and Geoff Dittman, The Canadian UFO Report, Dundurn Press, 2006, p. 229; Good Above, p. 182; Story, p. 276)

Late February — ADC commander Benjamin Chidlaw at Ent AFB [now US Olympic Training Center] near Colorado Springs, Colorado, tells future UFO researcher Robert C. Gardner that he has “stacks of reports about flying saucers. We take them seriously when you consider we have lost many men and planes trying to intercept them.” (Stringfield, 3-O Blue, p. 91; Stringfield, Situation Red, Fawcett Crest, 1977, pp. 137–138)

February 28 — Capt. Edward J. Ruppelt transfers out of Blue Book for a seven-month assignment in Denver, Colorado. He is replaced by Lt. Robert M. Olsson, who has one staff member. (Ruppelt, p. 228)
March — 10:00 a.m. Pilot Howard C. Strand is flying a routine patrol mission in a F-94B out of Selfridge AFB [now Selfridge Air National Guard Base] near Mount Clemens, Michigan, when he is asked to check out a radar target over downtown Detroit. He and his radar operator see tiny specks that seem to be a ragged formation of aircraft. As he approaches, he cannot see any wings or tails. Ground radar has the UFOs as “good, strong targets.” Strand looks at his instruments briefly and when he looks up the objects are gone, though ground radar tracks them another 4 minutes. Gordon Thayer calls it an inferior mirage. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1953 March–July, Supplemental Notes*, The Author, 2002, pp. 24–26; Condon, pp. 151–153)

March — Harvard University astronomer Donald H. Menzel publishes *Flying Saucers*, in which he explains all UFO sightings as known phenomena such as mirages and temperature inversions. It is the first book-length argument against UFOs, one of the few published by an academic institution, and the first UFO book by a scientist. ATIC personnel are displeased that Menzel has used a few classified reports supplied to him for an examination of patterns, which he has never produced. However, he has an imaginative vision of what Venus looks like, with “warm seas” in which life teems. (Donald H. Menzel, *Flying Saucers*, Harvard University, 1953; Getty Images, “Dr. Donald H. Menzel, Harvard Professor and Native Denverite, Refers to His Book,” March 13, 1953; Clark III 742)

March — Gen. John A. Samford is interviewed in See magazine and provides straightforward, factual answers about Project Blue Book, UFOs, and the inadequacy of Menzel’s theories. He claims the view of the Air Force is that “many credible people have seen incredible things.” (Swords 210–211)

March 3 — 1:25 p.m. USAF Capt. Roderick D. Thompson, 3600th Fighter Training Group out of Luke AFB near Glendale, Arizona, is an instructor pilot flying an F-84 at 25,000 feet over Blythe, California. He spots am object 300–500 feet wide leaving a contrail crossing his path from left to right at about 35,000–45,000 feet at about 400 mph. It is visible only by condensation vapor emitted from its manta-ray shaped flat surface. Student pilots flying two F-84s, Lt. Jack E. Brasher and Lt. Thomas W. Hale, also see the object but do not follow in pursuit. When Thompson turns to pursue it, the object makes a slight dipping turn to the northwest and begins climbing at about 20°. It appears to be very thin and immediately begins to form a heavy condensation trail behind it for roughly 1,000 feet and splits in two. Thompson reaches 30,000 feet and closes to within roughly 5–10 miles to a point over the Colorado River north of Parker Dam on the Arizona border. He takes 151 frames of gun camera film of object with a 16 mm N-9 camera, apparently at 16 fps 1/40 second exposure setting. (NICAP, “Three F-94 Pilots Encounter Manta-Ray, Gun Camera Shots”; Sparks, p. 194; Swords 213–214)

March 8 — Journalist Peter H. Wyden’s interview with Ruppelt appears in the *St. Louis Post-Dispatch*. Ruppelt tells him that Project Blue Book “has no evidence of any of these objects being anything other than misinterpretation of known objects…. We can’t say positively because our data isn’t good enough. But we’re not worried.” The lengthy article provides a good overview of Blue Book’s investigations and staff of seven, including Ruppelt’s assistants Lt. Anderson G. Flues and Max Futch. (Peter Wyden, “They’re Still Chasing Flying Saucers,” *St. Louis Post-Dispatch*, March 8, 1953, p. 1G)

March 8 — 9:02 p.m. Physics teacher Leigh Van Etten, two other teachers, and 10 students at Kents Hill School, Maine, watch a big red ball of fire moving west-northwest for 12 minutes before it disappears beyond the horizon. He estimates it is about 40–60 miles away. (Jennie Zeidman, “I Remember Blue Book,” *IUR* 16, no. 2 (Mar./Apr. 1991): 10)

March 14 — 11:43 p.m. Lt. Robert J. Wooten is flying a Navy P2V-5 antisubmarine plane over the Sea of Japan northwest of Nishinoshima, Japan, when he encounters an “electrifying display” of groups of 5–10 colored lights, totaling 90–100, slowly moving to the left side of the aircraft at a range of 3–7 miles and maintaining an extremely precise formation. Some of the objects are also tracked on radar. A 1955 RAND report falsely attributes this to an armada of 100 MiG-15 fighter aircraft (actually only 11) that menaced four US Navy Panther jets from the carrier USS Oriskany, but this earlier incident took place on November 18, 1952, resulting in damage to one of the MiGs. (NICAP, “Groups of Lights / IFF Signals”; Clark III 53–59; Sparks, p. 195; Swords 214)

March 15 — The International Flying Saucer Bureau declares today World Contact Day and calls upon the UFO occupants to make a public appearance on earth. (Albert K. Bender, *FS and the Three Men*, Saucerian, 1962)
March 17 — An FBI agent and two AFOSI officers interview George Adamski and ask him to draft a statement saying that neither the FBI nor Air Force has approved material used in his speeches. (Loren E. Gross, *UFOs, a History: 1953, March–July*, The Author, 1989, pp. 4–5; Clark III 44)

March 18 — Ohio Northern University’s Project A reports that UFOs are usually disc-shaped, silent, and fast-moving. “Our major conclusion to date is that no one explanation fits all sightings, and about 20% of all the sightings definitely fit the category of unnatural phenomena.” (Loren E. Gross, *UFOs, a History: 1953, March–July*, The Author, 1989, pp. 15, 18)

March 22 — 2:00 a.m. Sara Shaw and Jan Whitley, who share an isolated one-bedroom cabin in the forest around Tujunga Canyon north of Burbank, California, wake up when an odd light shines through the window. An eerie silence falls over the cabin and neighboring forest. They get out of bed but feel paralyzed. Then suddenly and inexplicably, it is 4:20 a.m. Shaw, who was originally kneeling on the bed, is now sitting on it with her feet on the floor. The two women flee the cabin. As they run, they pass an apparition or “vaporous something” with the “head and shoulders of a long-haired” person. When they return to the cabin two days later, they feel a sense of dread. Shaw can remember nothing more and the two women move apart. In 1975 Shaw watches a UFO documentary that evokes some memories, and she contacts ufologist Ann Druffel. During three hypnotic regression sessions—December 5, 1975; February 26, 1976; and October 22, 1978—Shaw recalls her abduction by black-garbed aliens. She undergoes a physical examination and the aliens show her a cure for cancer. (Ann Druffel and D. Scott Rogo, *The Tujunga Canyon Contacts*, Prentice-Hall, 1980, updated in New American Library, 1989)

March 23 — Gen. Burgess’s 4602nd AISS plan is approved. It is seen as aiding ATIC and giving AISS personnel valuable experience in field interrogations and cooperating with other agencies (Kevin D. Randle, *The Government UFO Files*, Visible Ink, 2014, p. 249)

March 24 — The Upshot-Knothole Nancy nuclear test at Nevada Test Site Area 4 sends radioactive fallout on livestock across the region, including those grazing at Papoose Lake, Nevada. Sixteen horses and numerous cows belonging to local farmers, the Stewart brothers, die from acute radiation poisoning. The Army compensates them for the horses, but claim the cows died from Vitamin A deficiency. (Wikipedia, “Operation Upshot–Knothole”; Jacobsen, *Area 51, p. 102*)

Spring — After 12:00 noon. RAF Flight Lt. Cyril George Townsend-Withers is asked to test some new ECM radar equipment using an experimental English Electric Canberra aircraft. The jet has been stripped of all removable parts to make it as light as possible. With this modification, he is able to leave RAF Boscombe Down [now MoD Boscombe Down] in Wiltshire, England, and soar to 55,000 feet, then a record for the aircraft. Cruising over Salisbury Plain, Townsend-Withers picks up a blip on his screen. It shows an object traveling 5 miles behind him and maintaining a steady course. His immediate reaction is to curse the “anomalous propagation” effects that they have gone to so much trouble to avoid. However, he soon becomes aware that this was an image of something flying right behind them. The science officer goes up to the turret to take a look and sees, glinting in the sun or pouring out a fantastic amount of its own light, a round shape trailing in their wake. Townsend-Withers calls his pilot on the microphone and tells him that he can see an unknown and suggests trying to outpace it. They reach 260 mph but the thing cannot be shaken off, so the pilot executes a sweeping radius turn. As the Canberra comes around from its turn, the object comes into view dead ahead. For half a minute they are on a collision course, swiftly trying to calculate what to do next. The object is round like a thin disc, but with two small tailfins at the rear. It seems to be metallic and enormous, and it is simply sitting there waiting for them to fly right into it. Suddenly, it flips vertically into the air and climbs upwards at an astonishing rate. Leaving no vapor trail, wake, or detectable sound, the object vanishes within just a couple of seconds. (NICAP, “Canberra Crew Encounters UFO / Radar/Visual”; Jenny Randles, “Collision Course,” *IUR* 27, no. 4 (Winter 2002–2003): 16–18; Jenny Randles, “Scramble, UFO! Part Three, The Team,” *Fortean Times* 388 (January 2020): 31)

April — Wilbert B. Smith is drafting a report on Project Magnet for the Canadian Department of Transport. He writes Keyhoe that their conclusion will probably be that UFOs are alien vehicles. (Clark III 1078)

April–June — The US Army Chemical Corps’ Dew II project involves the secret release of fluorescent particles (zinc cadmium sulfide) and plant spores (*Lycopodium*) from an aircraft over St. Louis, Missouri. (Minneapolis, Minnesota, was a previous target.) It only targets black ghetto sections of St. Louis and arranges for local police surveillance “to minimize the possibility of loss of equipment.” The Army reports “much less curiosity and interference” than Minneapolis. Dew II is described in a 1953 Army report that remains classified at the time of a 1997 report by the US National Research Council concerning the zinc cadmium sulfide dispersion program. (Leonard A. Cole, *Clouds of Secrecy: The Army’s Germ Warfare Tests over Populated Areas*, Rowman & Littlefield, 1988, pp. 63–65)
April 12 — 4:10 p.m. Ten round, flat, metallic objects changing formation are observed traveling at a high rate of speed at an estimated altitude of 7,500 feet over Sweetwater, Nevada. No trail, sound, or exhaust are noted. The objects pass under the right nacelle of the observers’ C-47 aircraft, which is en route to Stead AFB [now Reno Stead Airport]. The copilot takes control of the aircraft and turns to the right in a tight 300° turn for a better view. The objects are then picked up unassisted by two more members of the crew. The objects are seen in a right turn of a greater radius than that of the C-47 and at a lower altitude. They are observed for approximately 120° of their turn and disappear on a heading of 300°. Observers are unable to estimate the speed of the objects because of the distance and the large turn radius. (NICAP, “Ten Round Flat Objects Changing Formation”; Sparks, p. 197)

April 13 — The MKUltra project is launched on the order of CIA Director Allen Dulles and under the direction of Sidney Gottlieb. Its aim is to develop mind-controlling drugs for use against the Soviet bloc, largely in response to alleged Soviet, Chinese, and North Korean use of mind-control techniques on US prisoners of war in Korea. The project attempts to produce a perfect truth drug for use in interrogating suspected Soviet spies, and generally to explore any other possibilities of mind control. Another MKUltra effort, Subproject 54, is the Navy’s top secret “Perfect Concussion” program, which uses subaural frequency blasts to erase memory. However, the program is never carried out. Because most MKUltra records are deliberately destroyed in 1973 by order of then–CIA director Richard Helms, it is difficult, if not impossible, for investigators to gain a complete understanding of the more than 150 individually funded research subprojects sponsored by MKUltra and related CIA programs. A cache of some 20,000 documents survive Helms’s purge, as they are incorrectly stored in a financial-records building and discovered following a FOIA request in 1977. These documents are fully investigated during the Senate Hearings of 1977. (Wikipedia, “Project MKUltra”; US Senate Select Committee on Intelligence, Project MKUltra, The CIA’s Program of Research in Behavioral Modification, 95th Congress, 1st Session, August 3, 1977; John D. Marks, The Search for the “Manchurian Candidate”: The CIA and Mind Control, Times Books, 1978; Jon Ronson, The Men Who Stare at Goats, Simon & Schuster, 2004; “Project MK-Ultra: The CIA’s Experiments with Mind Control,” ZazenLife; Stephen Kinzer, Poisoner in Chief: Sidney Gottlieb and the CIA Search for Mind Control, Henry Holt, 2019)

April 14 — 9:23–11:50 p.m. A Navy P2V Neptune spy plane on an electronic intelligence (ELINT/ferret) mission over the Sea of Japan (about 200 miles southeast of Vladivostok, Russia) is paced and attacked by 10 agile and highly maneuverable UFOs. The encounter takes place with only 400 feet of distance between the aircraft and the sea. The objects make more than “70 aggressive non-firing passes” in “high-speed runs,” many just a few hundred feet directly underneath the Navy aircraft for just over an hour. The UFOs transmit Morse Code light signals (the letter “D”), an unprecedented occurrence in UFO history. The objects are tracked on radar and by the Navy’s ELINT systems (which pick up and analyze radar beams emitted from the objects) for almost two and a half hours. (NICAP, “Two Lights Flashing Morse Code Letter ‘D’”; Sparks, p. 198; Clark III 53–59)

April 16 — 3:45 p.m. The crew of a commercial Maritime Central airliner flying at 9,000 feet above Chatham, New Brunswick, watches a metallic disc approach their plane and pass underneath. (Chris Rutkowski, Canada’s UFOs: Declassified, August Night, 2022, pp. 64–67)

April 19 — 1:00 p.m. Four US Army reconnaissance observers (including pilotLt. Julius T. Morgan, Lt. James O. Rymus, and Lt. Jack E. Myers) in two aircraft see a white, rounded, delta-shaped object 5–7 feet in diameter flying at 60–80 mph with a “vibrating” motion over Communist territory in Korea. An official G-2 Intelligence Report says the object is in the Old Baldy (Hill 266) and Pork Chop Hill areas. Radar supposedly tracks them also moving faster than sound (>767 mph). (NICAP, [news clippings]; Sparks, p. 199; Jennie Zeidman, “I Remember Blue Book,” IUR 16, no. 2 (Mar./Apr. 1991): 9)

April 23 — Gen. Charles P. Cabell becomes deputy director of the CIA.

April 23 — 3:00 p.m. Two witnesses in Iberville [now Saint-Jean-de-Richelieu], Quebec, see a disc the size of a car approach their house while they are eating dinner. It stops 250 feet above the Richelieu River a bit more than a half-mile away. The man runs outside for a better look and sees that it as a dome and is spinning as it hovers. After 15 seconds it flies to the southwest and disappears. (Chris Rutkowski, Canada’s UFOs: Declassified, August Night, 2022, pp. 65, 68–69, 151)

May — A flawed CAA report states the July 1952 Washington National Airport radar returns were weather targets. (Civil Aviation Authority, A Preliminary Study of Unidentified Targets Observed on Air Traffic Control, Technical Development Report 180, May 1953)

May — CIA Assistant Director H. Marshall Chadwell transfers chief responsibility for keeping abreast of UFOs to OSI’s Physics and Electronic Division. Todos M. Odarenko, chief of the division, does not want to take on the problem, saying it requires too much analytic and clerical time. Given the Robertson Panel findings, he proposes to call the project “inactive” and devote only one part-time analyst and a file clerk to maintain a reference file of activities of
USAF and other agencies on UFOs. (Gerald K. Haines, “CIA’s Role in the Study of UFOs, 1947–90,” Studies in Intelligence, 1997, p. 72)

May — The Air Force publishes, under the signatures of Chief of Staff Gen. Hoyt S. Vandenberg and Air Adjutant General Col. Kenneth E. Thiebaud, Air Force Manual 200-3, titled Handbook for Air Intelligence Officers. It is classified Restricted. Intended as a general guide for air intelligence officers conducting any type of investigation, the 6-page manual’s only illustration is of an Air Force plane accompanied by three flying saucers; the caption is “The Air Technical Intelligence center is responsible for the prevention of technological surprises.” It is discovered by Keyhoe in 1961 because someone forgot to reclassify the manual as Confidential in November 1953 when the Restricted classification is retired. (Department of the Air Force, Handbook for Air Intelligence Officers, Air Force Manual 200-3, May 1953, chapter 9, pp. 9-1–9-6; Keyhoe, Aliens from Space, Signet ed., 1974, p. 80)

May 1 — 11:35 p.m. USAF pilot Capt. R. L. Emberry and radar operator 1Lt J. R. Morin are flying an F-94 interceptor at 24,000 feet about 10 miles south of Goose Bay AFB [now CFB Goose Bay], Labrador. Both men and a control tower operator see a white light with a visible afterburner at 10,000 feet. The F-94 pursues it, both climbing to 40,000 feet, but the object climbs out of sight after about 30 minutes. (NICAP, “Unidentified Evades Interception by F-94”; Sparks, p. 199; Chris Rutkowski, Canada’s UFOs: Declassified, August Night, 2022, p. 262)

May 2 — BOAC Flight 783, a de Havilland Comet 1, crashes in a severe thundersquall six minutes after taking off from Calcutta-Dum Dum [now Netaji Subhash Chandra Bose International Airport], India, killing all 43 on board. Witnesses observe the wingless Comet on fire plunging into the village of Jagalgori. A British aviation investigator, J. H. Lett, announces that the plane “collided with a fairly heavy body” and UFO rumors persist for about a year. However, leading investigators suspect structural failure. (Wikipedia, “de Havilland Comet”; Springfield, Situation Red, Fawcett Crest, 1977, p. 141)

May 4 — 1:50 a.m. A witness sees a football-shaped, metallic object caught in the glare of a rotating beacon near Goose Bay AFB [now CFB Goose Bay], Labrador. It is traveling south at high speed and a low altitude, and disappears into low-hanging stratus clouds. She hears a sound “like tins striking together.” (Sparks, p. 199; Chris Rutkowski, Canada’s UFOs: Declassified, August Night, 2022, p. 262)

May 5 — 9:45 a.m. Chemist Wells Alan Webb is standing in a field near the Vacuum Cooling Company plant, not far from Spain Flying Field and about a mile north of Yuma AFB [now Marine Corps Air Station Yuma] near Yuma, Arizona, when he sees a fuzzy-white oblong object at an angle of 45° in the north. He observes it both with the naked eye and with Polaroid glasses with a greenish tint that he uses for cloud observations. It is about one-half the diameter of the full moon. After 5 minutes, the object moves to a position 30° eastward and suddenly becomes circular in appearance, becoming gradually smaller. Three concentric dark rings appear around the object, the largest about six times its diameter when viewed with Polaroid glasses. Webb thinks that the rings are the result of the rotation of polarized light scattered from the atmosphere (Faraday effect). (NICAP, “Polaroid Glasses Expose Concentric Circles around Disc”; Wells Alan Webb, Mars, the New Frontier: Lowell’s Hypothesis, Fearon, 1956, pp. 126–127; UFOEv, p. 51)

May 10 — 6:08 p.m. Capt. B. L. Jones is flying an Australian National Airways DC-3 just south of Mackay, Queensland. He radios the local control tower that a “strange object like a lighted glass dome” is maneuvering around his plane. He and his copilot watch the object for about 5 minutes during which time it climbs and dives at a speed of 200–700 mph. Finally, it crosses the path of the aircraft and disappears swiftly to the west. A Mr. W. Overell, the officer in charge at Mackay tower, sees the light climbing from about 4,000–5,000 feet in the west at great speed, although the radar shows no other aircraft in the vicinity. (Lorenzen, UFOs: The Whole Story, Signet, 1969, p. 52; Swords 377–378)

May 10 — 11:00 p.m. Capt. Bob Jackson is piloting an Australian National Airways DC-3 near Wooronora Dam, New South Wales, when he sees an object with an orange-colored light at the tail flash past toward the east near Wollongong. The radar tower at Mascot shows no traffic in the area. About 2 minutes later, the object reappears, makes a complete circle around the airliner, and speeds away toward the coast. (Swords 378)

May 11 — A declassified MKUltra document indicates hypnosis is a major focus. Experimental goals include: the creation of “hypnotically induced anxieties,” “hypnotically increasing ability to learn and recall complex written matter,” studying hypnosis and polygraph examinations, “hypnotically increasing ability to observe and recall complex arrangements of physical objects,” and studying “relationship of personality to susceptibility to hypnosis.” Experiments are conducted with drug-induced hypnosis and with anterograde and retrograde amnesia while under the influence of such drugs. (Wikipedia, “Project MKUltra”)

May 12 — 3:20 a.m. USAF F-94 pilot Lt. D. C. Rogers and radar operator Lt. J. A. Lane track a radar target about 39 miles northwest of Goose Bay AFB [now CFB Goose Bay], Labrador. Rogers attempts to intercept but cannot
make visual contact. (Sparks, p. 199; Chris Rutkowski, Canada’s UFOs: Declassified, August Night, 2022, p. 262)

May 16 — 8:15 p.m. Photographer Herman Charmanne is near Bouffioulx, Belgium, when he hears a strange metallic vibration. Looking up, he sees a long white trail in the wake of an object that shoots off at a great speed. The object, a luminous sphere, stops and hovers, allowing him to take two photos that depict a fried-egg-looking shape with a long tail. Recent analyses indicate that the photos are likely the result of a chemical reaction during the development process, perhaps a flammable fluid deliberately poured on the image carrier that is then ignited. (Vicente-Juan Ballester Olmos and Wim van Utrecht, Belgium in UFO Photographs, Volume 1 (1950–1988), FOTOCAT Report no. 7, 2017, pp. 12–30)

May 18 — 6:55 p.m. A bright, luminous object is seen over Abadan, Iran. It travels very fast and is visible for 20 minutes. It is also seen over oil fields in Khuze斯坦 Province. (ClearIntent, pp. 129–130)

May 20 — At the junction of Jordan and Marble Creeks in Plumas National Forest, northern California, titanium prospector John Q. Black sees a silvery object, 8 feet in diameter, land on a nearby sand bar. On June 20 the saucer returns, along with a barrel-chested “midget pilot” wearing a “forest-green outfit” and a “peak-billed cap with a cord” around it. The UFO is about 40 feet away, resting on a rock, and has tripod-like landing gear. The pilot fills a rubber-like pail with creek water and goes back inside the craft (which has one small window) after hearing Black step on a stick. The craft takes off at a 45° angle with a hissing sound. Black had seen the same object on March 20, for a total of seven times. Black is alone for each sighting, so his partner John Van Allen cannot corroborate the story. The UFO’s expected return on July 20 does not occur, perhaps because scores of sightseers descend on the Brush Creek area (snack bars are set up so that no one goes hungry during the vigil). (Wallace Kunkel, “The Little Man Who Wasn’t There,” Fate, no. 5 (May 1954): 48–52; Clark III 269; Patrick Gross, URECAT, December 15, 2006; Curt Collins, “Flying Saucer Ambush: Brush Creek, CA, 1953,” The Saucers That Time Forgot, November 17, 2017)

May 21 — 10:00 a.m. Eight disc-like objects are observed maneuvering in the sky for an hour or so above Prescott, Arizona, by sportsmen’s club president Bill Beers, post office employee Ray Temple, and O. Ed Olson. Two of the discs are stationary, while the other six discs participate in maneuvers similar to a dogfight. The six swoop around in formation, peel off, and shoot directly up and down in a maneuver that cannot be duplicated by a plane. When they move, they vary from very slow to speeds faster than a jet plane. (Prescott (Ariz.) Evening Courier, May 22, 1953; Nukes 87)

May 26 — 5:10 a.m. D. Beyers, driving 80 miles south of Brandvlei in Northern Cape Province, South Africa, sees a bright yellowish-green light in the clouds, then emerges. The light has the appearance of “burning hydrogen” and emits three streaks that maintain a fixed position with regard to the main light. He watches it for 50 minutes. (ClearIntent, p. 130)

May 30 — After a small, bright-blue object with a strange irregular motion passes overhead at Palmerston North, New Zealand, numerous filaments of a “substance resembling spider webs, white in color and ashy in texture” float to earth. (“Palmerston North, New Zealand,” APRO Bulletin 2, no. 2 (September 15, 1953): 8; Clark III 124)

Summer — Two F-94 jets are scrambled at Ernest Harmon Air Force Base [now Stephenville International Airport], near Stephenville, Newfoundland, after base radar picks up an unknown target. One of the pilots gets radar and visual confirmation, then radios that he is going into a steep climb to give chase. The jet crashes into a mountain. The base is supposedly placed on red alert. (Stringfield, Situation Red, Fawcett Crest, 1977, p. 142)

Summer — 10:00 p.m. A family is returning home on Scenic Avenue in Central Point, Oregon, when they see three entities along the side of the road only 6 feet away. They stop the car, and the beings glide across the road and
disappear into the woods. They are 4 feet high, white, with satiny fur, and resemble very large geese, but with no beaks or wings. (“No UFO Seen: Just Creatures,” CUFOS Associate Newsletter 5, no. 2 (April/May 1984): 3)

June — Night. An F-94C Starfire with classified electronic gear takes off from Otis AFB [now Otis Air National Guard Base] in western Cape Cod, Massachusetts. Piloted by Capt. Suggs and radar operator Lt. Robert Markhoff, the jet takes off in a westerly direction. Shortly after attaining 1,500 feet over the Base Rifle Range, the engine quits functioning and the electrical system fails. The jet’s nose drops and Suggs signals Barkhoff to bail out. Suggs bails out and he and his parachute wind up in a homeowner’s backyard. The jet should have crashed nearby, but neither Markhoff or the airplane can be located, despite months of searching. Although this account comes from M/Sgt Clarence O. Dargie, and investigator Raymond Fowler obtains the accident report from Norton AFB [now San Bernardino International Airport], California, there appears to be no open record of this incident. The F-94C models, especially at first, have fire-control problems and electrical short circuiting. (Raymond Fowler, UFOs: Interplanetary Visitors, Prentice-Hall, 1974, pp. 287–291; Good Need, pp. 189–191; Bob Pratt, “Conversations with Major Donald Keyhoe,” Mutual UFO Network; Barry Greenwood, “Questions on a 1953 Cape Cod Mystery,” UFO Historical Revue, no. 8 (February 2001): 1–3)

June — Lt. Robert M. Olsson and J. Allen Hynek visit Coral Lorenzen in Wisconsin and try to convince her that it is in the national interest for her to reduce excitement about UFOs by publishing cases. (Swords 197; Lorenzen, FS Hoax, pp. 82–83)

June — Max B. Miller publishes the first issue of Saucers, a digest-sized quarterly of Flying Saucers International in Los Angeles, California. It continues until the Fall 1959 issue. (Saucers 1, no. 1 (1953); Clark III 1033)

June 9 — Sidney Gottlieb approves Project MKUltra’s “Subproject 8” on LSD. Experiments include administering LSD to mental patients, prisoners, drug addicts, and prostitutes—“people who could not fight back,” as one agency officer puts it.

June 17 — 7:30 a.m. Several witnesses in Galveston, Texas, see a large, cigar-shaped object silently flying in from the Gulf of Mexico. One estimates it to be about 300 feet long and no greater than 150 feet in the air. The object makes a cloud and disappears. (Herbert S. Taylor, “Mystery Clouds and the UFO Connection,” IUR 29, no. 4 (July 2005): 19)

June 24 — 11:30 a.m. A weather observer stationed at remote Simiutaq island, western Greenland, is tracking a weather balloon with a theodolite. He notices a rotating red object flying from southeast to northwest and approaching the balloon, which is at 18,000 feet. The object collides with the balloon, disintegrating it. Afterward, it hovers in a circular motion for 15 seconds and departs into the wind. He watches it another 5 minutes until it is lost to view. (Chris Rutkowski, Canada’s UFOs: Declassified, August Night, 2022, pp. 69–70)

June 24 — Night. A flight of US Navy F2H Banshee jets out of NAS Quonset Point [now Quonset Point Air National Guard Station] are on a night training mission over southern Rhode Island when two aircraft in the formation collide in mid-air. The crash occurs at 19,000 feet near or over the Exeter/West Greenwich town lines, and debris is scattered for several miles in all directions. The pilot of one Banshee, Lt. Jg. Jack Oliver Snipes, is killed. An emergency cable sent to the Director of Air Force Intelligence in the Pentagon indicates that “flying objects” are seen by the pilots prior to the accident. Its distribution list includes the fledgling National Security Agency. (“Exeter/West Greenwich, Rhode Island: June 24, 1953,” New England Aviation History, October 2017; Good Above, pp. 272–273, 488)

June 30 — 11:45 p.m. An orange-colored, oval object is seen for a period of 20 minutes in the northern sky moving to the southeast by at least 10 personnel of the US 912th Air Control and Warning Squadron stationed at Ramore Air Station radar site [now CFS Ramore], 3 miles west of Ramore, Ontario. The first person to see it is A/2c Dean McDonald who comes out of the maintenance room to inspect a power unit that has caused a minor breakdown of the search radar set. He calls two other airmen to witness it. One of the two thinks the object is the moon. The first airman gets hysterical and calls the Charge of Quarters at the Domestic Area three miles to the southwest. At least seven witnesses in that area see the object, and two of them report that the moon is visible and the UFO is distinct and separate. The object soon fades away slowly to the north. ([Project Blue Book file])

July — The 4602nd AISS has taken over nearly all of Blue Book’s field investigations. (Ruppelt, p. 232)

July — Lt. Robert M. Olsson of Project Blue Book sends five supposedly unsolved UFO cases of 1953 to Cal Tech physicist Howard P. Robertson in an effort to see if any change in the Robertson Panel’s conclusions is warranted. One of them is the Sea of Japan ELINT case of April 14. Apparently, Robertson’s mind is not changed. He is now
July 1 — 1:00 p.m. A cowherd, Maximo Munoz Olivares [or Hernández], 14, sees a “big balloon” on the ground behind him in Villares del Saz, Cuenca, Spain, after a faint whistling attracts his attention. Shaped like a water jug, the object is metallic. Through an opening come three dwarfs 2 feet tall, with yellow faces, narrow eyes, and oriental features. They speak in a language he cannot understand. They are dressed in blue and have a sort of flat hat with a visor in front and a metal sheet on their arms. One of them smacks the boy’s face, then they reenter the machine, which glows very brightly, makes a soft whistling sound, and goes off “like a rocket.” Footprints and four holes 2 inches deep, forming a perfect square 13 inches in size, are found by police. Possible hoax. (Loren E. Gross, *UFOs, a History: 1953, March–July*, The Author, 1989, pp. 92–93; Antonio Ribera, “The Landing at Villares del Saz,” in Charles Bowen, ed., *The Humanoids*, special issue of *FSR*, Oct./Dec. 1966, pp. 28–30; Clark III 270)

July 7 — Evening. An Atlanta, Georgia, barber named Edward Watters buys a monkey from a pet shop, shaves and kills it, cuts off its tail, then takes it with two friends, Tom Wilson and Arnold Payne, to US Highway 78 near Leland, Georgia, and waits for the first car to stop. They tell the driver, who turns out to be Cobb County policeman Sherley Brown, that they had seen a flying saucer and accidentally killed one of its occupants. They bring the dead animal to the *Atlanta Constitution* office, where reporter Thomas McRae notifies the FBI, which alerts the Air Force at Dobbins AFB [now Dobbins Air Reserve Base] in Marietta. The animal is taken to Emory University Hospital in Atlanta, where Anatomy Professor Marion Hines identifies it properly as a shaved Capuchin monkey. Watters admits the hoax and is fined $40 by a judge. (Wikipedia, “Martian Monkey”; Loren E. Gross, *UFOs, a History: 1953, March–July*, The Author, 1989, pp. 96–102; Clark III 593)

July 19 — 3:00 p.m. After an F-86 has been circling over a particular spot in Oak Ridge, Tennessee, a black object emerges from a high white cloud and takes up its position after the plane has left toward Knoxville. “This object was extremely black in color, having an appearance of a deep black metal exterior with a fine gloss. It did not leave a vapor trail or were there any lights of shine noticed. No sound was heard. The object flew east at a tremendous speed for what appeared to be approximately three miles where it stopped. The object was then joined by two more of these same objects. A formation similar to a spread V was formed and the objects, at a tremendous speed flew in an eastward direction.” The report is made by the Atomic Energy Commission and addressed to Army Adjutant General William Edward Bergin in Washington, D.C. (NICAP, “Black Objects Maneuver over Area nr F-86”; “Air Space Violation at Oak Ridge, Tennessee,” July 27, 1953)

July 20 — Ed Ruppelt returns to Project Blue Book as either acting chief or consultant until August 31. (Sparks, p. 14; Clark III 55)

July 26 — 9:39 p.m. At Perrin AFB [now North Texas Regional Airport] in Sherman, Texas, ground observers see 7 UFOs, each carrying a bright red light, hovering at 5,000–8,000 feet. They are in a formation of two groups of three, and one trailing, then come together to form the letter “Z.” Then they circle, gain altitude, and fade from sight. Citizens in Sherman and Denison also see the objects. Total duration is 16 minutes. This is classified as a “Vital Intelligence Sighting” and sent to the Air Defense Command, the Secretary of Defense, and the CIA. (CIRVIS Report, July 26, 1953)

July 30 — Sciencejournalist John Joseph O’Neill observes through a telescope a feature on the western edge of the lunar Mare Crisium that he interprets as a giant natural bridge. The observation is prematurely confirmed by amateur Welsh astronomer Hugh Percy Wilkins. Although it turns out to be an illusion, the location is still known as O’Neill’s bridge. When viewing conditions are poor or the telescope’s aperture is small, the feature resembles a bridge joining the tips of the capes Promontorium Lavinium and Promontorium Olivium. If viewing conditions are good and the instrument is large enough, the feature is seen as two small, eroded crater pits. (The Moon Wiki, “O’Neill’s Bridge”; Andrew May, “The Lost Ruins of the Moon,” *For t ean Times* 358 (October 2017): 56–57)

July 30–August 1 — A large UFO is seen for three nights over Sequoia and Kings Canyon National Parks in California. Park Superintendent Elvind T. Scoyen and his staff observe it once at close range. On August 1, a squadron of Air Force fighters sees the object streaking downward just before midnight. It stops abruptly then shoots upward. (Keyhoe, *Aliens from Space*, Signet ed., 1974, pp. 40–41)
July 31 — Lt. Robert Olsson leaves Project Blue Book. He later tells Ruppelt his 5-month tenure “was like being president of Antarctica on a nonexpedition year.” He is replaced by Airman 1C Max G. Futch. (Ruppelt, p. 228; Clark III 55; Sparks, p. 14)

July 31 — 7:00 p.m. Five Poles and two Germans see a disc-shaped object about 16 feet in diameter land in a field near a railroad track on Wolin Island, Poland. After several minutes it rises up and flies away at great speed. (Bronislaw Rzepecki, “UFOs and Ufologists in Poland,” IUR 11, no. 2 (Mar./Apr. 1986): 15; Vallée, Magonia, p. 203)

August — Wilbert B. Smith completes his classified report on Project Magnet for the Canadian Department of Transport, writing that it can be deduced that UFOs are 100 or more feet in diameter, they can travel at speeds of several thousand miles per hour, and can reach high altitudes. “It is difficult to reconcile this performance with the capabilities of our technology [and] we are forced to the conclusion that the vehicles are probably extraterrestrial, in spite of our prejudices to the contrary.” The DOT agrees to his proposal to set up an electronic station for a “24-hour watch for flying saucers” in a hut at Shirley’s Bay, off Lake Manitou, Ontario. Equipment includes an ionospheric reactor, electronic sound measurement devices, gamma-ray detector, gravimeter, magnetometer, and radio set. (Clark III 1078–1079)

August 5–6 — Around 8:00 p.m. Ground Observer Corps observer Phyllis Killian spots a UFO in Black Hawk, South Dakota. Soon after, radar at Ellsworth AFB near Rapid City tracks a “well-defined, solid, and bright” object. The base scrambles an F-84 and the pilot sees the UFO. Many witnesses see the object accelerate and climb. The F-84 pursues but can reach no closer than 3 miles. Now low on fuel, the F-84 returns, followed by the UFO. Immediately, another F-84 is sent up. Before long, the pilot receives strong radar returns of a target right in front of him. Fear prevails and he breaks off the chase. The UFO goes off the scope, traveling northeast. Reports soon come from Brunswick of a fast-moving, bright blue object, similar to the Rapid City object. It hovers near an air filter center, performing more maneuvers and disappearing after midnight. Before it leaves, three more UFOs are seen at 10,000 feet for three hours. Ruppelt personally investigates and calls it “the best” in the USAF files, Hyniek writes that the “entire incident...has too much of an Alice-in-Wonderland flavor for comfort.” Menzel blames the star Capella. The official file is several hundred pages long. (NICAP, “The Rapid City / Ellsworth AFB Incident (RV)”; Condon, pp. 132–136; Ruppelt, pp. 232–235; Sparks, p. 203; Loren E. Gross, UFOs, a History: 1953, August–December, The Author, 1990, pp. 2–3; Swords 215; Jan Aldrich; Patrick Gross, “The Ellsworth AFB Radar Multiple Visual Case, 1953”)

August 6 — 5:00 p.m.–12:00 midnight. An estimated 75 objects with lights are seen by many witnesses on the ground around Naval Air Station Barbers Point [now Kalaeloa Airport], Hawaii, from the airport control tower and from the air. Many are also detected by radar. At 9:00 p.m., the crew of a Navy patrol aircraft reports three head-on passes. These close calls alarm the pilot so much he lands immediately. Jet fighters are scrambled and the same night an interceptor pilot sees a “glowing blob” rising rapidly toward him. It comes to a sudden stop just behind him. Fear prevails and he breaks off the pursuit but can reach no closer than 3 miles. Now low on fuel, the F-84 is sent up. Before long, the pilot receives strong radar returns of a target right in front of him. Fear prevails and he breaks off the chase. The UFO goes off the scope, traveling northeast. Reports soon come from Brunswick of a fast-moving, bright blue object, similar to the Rapid City object. It hovers near an air filter center, performing more maneuvers and disappearing after midnight. Before it leaves, three more UFOs are seen at 10,000 feet for three hours. Ruppelt personally investigates and calls it “the best” in the USAF files, Hyniek writes that the “entire incident...has too much of an Alice-in-Wonderland flavor for comfort.” Menzel blames the star Capella. The official file is several hundred pages long. (NICAP, “The Rapid City / Ellsworth AFB Incident (RV)”; Condon, pp. 132–136; Ruppelt, pp. 232–235; Sparks, p. 203; Loren E. Gross, UFOs, a History: 1953, August–December, The Author, 1990, pp. 2–3; Swords 215; Jan Aldrich; Patrick Gross, “The Ellsworth AFB Radar Multiple Visual Case, 1953”)

August 9 — 9:34 p.m. Supervisor Larry E. Towner and other Ground Observer Corps personnel report a glowing disc about 200 feet in diameter over Moscow, Idaho. At 10:10 p.m., the first of two F-86s is scrambled. The object lingers, with other lights seen, until around 5:00 a.m. (NICAP, “Three F-86’s Chase Disc Spotted by GOC”; Loren E. Gross, UFOs, a History: 1953, August–December, The Author, 1990, pp. 3–4)

August 10 — Wilbert B. Smith issues another report on Project Magnet, in which he concludes there is a “substantial probability of the real existence of extraterrestrial vehicles” that use a “technology considerably in advance of what we have.” The report is eventually sent to Prime Minister Louis St. Laurent. (Good Above, pp. 185, 187)

August 12 — The USSR tests its first thermonuclear device, RDS-6s or Joe 4, at the Semipalatinsk Test Site in Kazakhstan. A tenfold increase in explosive power is achieved by a combination of fusion energy and neutron-initiated fission. Scholars dispute the authenticity of RDS-6 as a true thermonuclear device, as it does not manage to produce a yield consistent with a true hydrogen bomb. (Wikipedia, “Joe 4”)

August 16 — Flying Saucers International holds the first UFO conference at the Hollywood Hotel in Los Angeles, California, featuring contactee speakers. However, George Van Tassel’s first Giant Rock Interplanetary Spacecraft Convention launches the same day near Landers, California, for three days with speakers Frank Scully, George Van Tassel, Orfeo Angelucci, George Adamski, and the Amazing Criswell. (Story, p. 91; Orfeo Angelucci, “A Release: On Flying Saucers First Convention,” Interplanetary News Digest 1, no. 2 (October 1953): 1; “Blast from the Past: UFO Conventions from Giant Rock in Landers,” Palm Springs (Calif.) Desert Sun, July 25, 2014)

August 17?— Lina Ivanova Kravets is in her garden in Shtanivka, Ukraine, when she sees a trio of intruders cutting branches off her apple, plum, and cherry trees. Approaching closer, she sees they are 11-foot-tall entities wearing dark overalls, helmets, and gloves. They claim to be extraterrestrials, converse with her about God and their peaceful home world that is prone to natural disasters and somehow affected by the earth’s wars, and insist they are on a mission to rescue a missing scout team. They then point out a silvery sphere hovering just above the ground with similar tall being standing next to it. Before the lengthy encounter ends, the beings offer Kravets a piece of bread the size of a small coin. Breaking it open, she sees something dark and odorless inside, so she refuses it. The beings then walk to the sphere in a peculiar waddling manner, wave as they enter, and take off in the craft at terrific speed. (Peter Rogerson, “INTCAT 1953”; Joshua Cutchin, “The Great Alien Bake-Off,” Fortean Times 332 (November 2015): 44)

August 19 — A small, fast-moving, ricocheting fireball rips a foot-wide hole through a metal billboard at Middlestone Avenue and Front Street in East New Haven, Connecticut. IFSB investigator August C. Roberts and Joseph Barbieri steal a piece of the sign during an investigation by Naval Ordnance personnel. IFSB sends the sample to Col. Robert B. Emerson, an Army physicist at Louisiana State University in Baton Rouge, who contacts friends at Oak Ridge Laboratory in Tennessee to have it analyzed, but nothing else is heard of this sample. APRO arranges for a separate analysis of the deposits on the sign performed by Anderson Laboratories in Milwaukee, Wisconsin, and the Chicago Spectrographic Service Laboratory. They determine that the fragments consist of copper and copper oxide and are not meteoric. Michael D. Swords suggests that Robert’s retrieval of the metal fragments would have attracted the attention of federal officials. (NICAP, “New Haven Signboard Case”; Michael D. Swords, “Tales from the Barker Zone,” IUR 17, no. 6 (Nov./Dec. 1992): 5–7; Clark III 728–729)

August 20 — 9:05 p.m. The crew of a TB-29 sees a grayish oval object near Castle AFB [now Castle Airport Aviation and Development Center], northeast of Atwater, California. The UFO makes four passes at the plane, then dives vertically as if it consists of two objects. (NICAP, “TB-29 Crew Files CIRVIS Report”; Sparks, p. 203)

August 24 — Contactee George Van Tassel gets to step, for the first time, inside a flying saucer, when an extraterrestrial named Solganda wakes him up and leads him to a waiting ship, giving him a tour of the interior and a technique for rejuvenating the human body before dropping him off and shooting back into space. (Jody Rosen, “Welcome to the Integratron,” New York Times Magazine, August 20, 2014; Leslie Miller Schur, “G. W. Van Tassel’s Integratron,” The Haunted Librarian, August 27, 2021)

August 26 — USAF issues Air Force Regulation 200-2, which tightens UFO reporting and investigating procedures, further restricting the release of UFO information and superseding Air Force Letter 200-5. It directs that all confirmed UFO reports be sent electronically to air force intelligence. Tangible evidence must go to ATIC in Dayton. It also confines UFO investigations to three groups: USAF intelligence at the Pentagon, the 4602nd AISs, and ATIC (although ATIC only gets reports after they go to the 4602nd). Sightings are only to be discussed with “authorized personnel.” Reports by USAF personnel no longer go to Project Blue Book, which is now only a PR front. Some good cases still go there, but far fewer unidentifieds. Only solved cases are to be discussed publicly; those still unidentified are to remain classified at the Restricted level. (‘Unidentified Flying Objects Reporting,” Air Force Regulation 200-2, August 26, 1953; Clark III 918; Swords 198–199)
August 27 — 9:45 p.m. A USAF pilot, M/Sgt, and others, all on the ground, see a meandering light for 50 minutes at Greenville AFB [now Mid-Delta Regional Airport], Mississippi. (Sparks, p. 204)

August 28 — A Ground Observer Corps volunteer watches 14 cigar-shaped UFOs silently moving over San Rafael, California. One appears to be leading the formation at about 200 mph. They are first seen heading west through breaks in the clouds, then turn north and disappear behind clouds. (Good Above, p. 278)

August 31 — Edward J. Rupple leaves Project Blue Book permanently, leaving Max Futch in charge as acting chief through December. (Sparks, p. 14; Clark III 55)

September — George Adamski’s account (ghostwritten by Clara John) of his meeting in the desert with the Venusian named Orthon is appended to an already completed manuscript on modern and historical UFO reports by Irish occultist Desmond Leslie and published as Flying Saucers Have Landed. Leslie asserts that the first spaceman (a Venusian) arrived on earth in 18,617,841 B.C. [in the early Miocene Epoch] and claims that early UFOs were called vimanas in Sanskrit epics like the Ramayana. He also argues that the Great Pyramid and megalithic structures were built with levitation techniques derived from space people. (Desmond Leslie and George Adamski, Flying Saucers Have Landed, British Book Centre, 1953; Clark III 40)

September — Airline stewardess Gloria Lee of Westchester, California, begins to hear a voice in her head that identifies itself as “J.W.,” a resident of Jupiter. Lee insists on a physical visit. Not long afterward, as she is hanging wash in her backyard, she hears the voice say, “Well, you’ve been wanting to see me.” She looks up and sees “a saucer, big as life, flying toward Santa Monica.” She has other experiences and founds the Cosmon Research Organization to publish and study J.W.’s teachings, much of which resemble philosophy in the 1882 book Oahspe, produced by automatic writing by John Ballou Newbrough. She goes on the contactee lecture circuit. (Clark III 682–683)

September — Genevieve A. Johnston begins publishing the contactee newsletter Interplanetary News Digest in Joshua Tree, California. It continues through spring 1955. (Interplanetary News Digest 1, no. 1 (September 1953))

September — Gray Barker starts publishing The Saucerian Bulletin in Clarksburg, West Virginia, which covers UFO reports, monster yarns, contactee tales, and the latest rumors about Albert K. Bender. It continues through October 1962. (Saucerian Bulletin 1, no. 1 (September 1953); Clark III 178)

September 7 — 6:30 p.m. Don P. Hollister, a technical writer for Goodyear Aircraft, notices a grayish-blue object heading north directly over his backyard in Cleveland, Ohio, at less than 3,000 feet altitude. It is shaped like an equilateral triangle, but rounded somewhat on the sides and angles. It is rotating on a central axis. The object disappears after 5 seconds. (UFOEv, p. 70)

September 15–19 — Operation Top Hat, a “local field exercise,” takes place at the Army Chemical School [now the US Army CBRN School] at Fort McClellan [now closed], Alabama. The experiments use Chemical Corps personnel to test decontamination methods for biological and chemical weapons, including sulfur mustard and nerve agents. The personnel are deliberately exposed to these contaminants, are not volunteers, and are not informed of the tests. In a 1975 Pentagon Inspector General’s report, the military maintain that Operation Top Hat is not subject to the guidelines requiring approval because it is a line-of-duty exercise in the Chemical Corps. (Wikipedia, “Operation Top Hat”)

September 26 — British pilot Mike Lithgow attains an official world airspeed record of 736 mph in a Supermarine Swift F 4 at Castel Idris, Tripoli, Libya. (Wikipedia, “Mike Lithgow”)

September 28 — Albert K. Bender confides to Gray Barker and a few others that three menacing men dressed in black suits have called on him, told him the answer to the UFO mystery, and insisted that he will go to jail if he repeats it. The experience allegedly terrifies him, and he decides to close the International Flying Saucer Bureau. Barker immortalizes the episode in a 1956 book, They Knew Too Much about Flying Saucers, and Bender breaks his long silence in 1962 with Flying Saucers and the Three Men, in which he claims that the visitors are not government agents but monsters from the distant planet Kazik. Even Barker concedes privately that he cannot swallow Bender’s fantastic tale of abduction to the South Pole by monstrous space beings. Bender does little to promote the book and soon moves to Los Angeles and secures an unlisted telephone number. However, the book does reveal Bender’s long-time obsession with science fiction, horror movies, and the occult. (Gray Barker, They Knew Too Much about Flying Saucers, University Books, 1956; Albert K. Bender, Flying Saucers and the Three Men, Saucerian, 1962; Clark III 189–192, 623; Story, pp. 50–51; Michael D. Swords, “Tales from the Barker Zone,” IUR 17, no. 6 (Nov./Dec. 1992): 6)

September 28 — 7:10 p.m. In Palmdale, California, a UFO appears on an F-94C radarscope for a period of 15 seconds. The object is traveling on a 60° course at an estimated speed of 2,300 mph. It is 4 miles away when first seen and
compares with a C-47 in size on the radarscope. The F-94 was moving at 345 mph at 21,000 feet. The same or another object is observed visually from another F-94C for six seconds at 7:00 p.m. The object is described as round, orange in color, and traveling on the same course as the first object. (NICAP, “F-94C Tracks UFO at 200 Knots”; Sparks, p. 204)

Late September — Night. Baltimore, Maryland, astronomer James C. Bartlett Jr. is observing a transit of the star Fomalhaut when he notices four large lights moving slowly in the sky. He looks at them through binoculars and sees that they are on the noses of two enormous cigar-shaped objects at about 3,000 feet altitude. He can also see an apparent cabin and portholes and he hears a sound like a piston engine. (“Two Huge UFOs Sighted by Baltimore Astronomer,” UFO Investigator 1, no. 5 (Aug./Sept. 1958): 1, 3)

Autumn — Dusk. Cecil Tenney is driving near Dutton, Montana, when he sees a cigar-shaped object about 200 feet away. Apparently in trouble, it belches fire and smoke, and after a few minutes he hears an explosion. Balls of fire rain down from the sky. He tells the story to a highway patrol officer at a nearby bar before driving on to Conrad, Montana. That evening a colonel from Great Falls AFB [now Malmstrom AFB] calls and tells him to show up at the base in the morning. He is interrogated there for 30 minutes, and on the way out sees soldiers carrying bags that he thinks might contain body parts. (Leonard H. Stringfield, “Retrievals of the Third Kind: A Case Study of Alleged UFOs and Occupants in Military Custody,” MUFON 1978 UFO Symposium Proceedings, Mutual UFO Network, 1978, pp. 77–105; Clark III 342)

October — The final issue of Space Review edited by Albert B. Bender states that UFOs are “no longer a mystery. The source is already known, but any information about this is being withheld by orders from a higher source.” (“Statement of Importance,” Space Review 2, no. 4 (October 1953): 1; Clark III 189)

October 1 — Donald E. Keyhoe’s Flying Saucers from Outer Space is published by Henry Holt. Excerpts appear in the October 20 issue of Look. His message is that aliens are here, the military knows it, and they are covering it up from the public to avoid panic. He has gotten clearance from Ruppelt and Chop to include 51 classified UFO reports from the Air Technical Intelligence Center, which runs Project Blue Book. The Air Force states that Keyhoe is misrepresenting their analyses, so he sends a telegram to USAF Secretary Harold E. Talbott and Gen. Sory Smith, saying that if he really misrepresented anything, as a Marine Corps officer he should be disciplined. The Air Force offers no comment. In the book, he takes note of a curious document (never published and now lost) prepared by USAF Col. William C. Odell titled “Planet Earth: Host to Extraterrestrial Life,” in which he speculates on aliens crossing space in search of new planets to live on once their own fails. (Donald E. Keyhoe, Flying Saucers from Outer Space, Holt, 1953; Wikipedia, “Flying Saucers from Outer Space”; Keyhoe, FS Conspiracy, p. 55; Michael D. Swords, “Colonel Odell and the Invasion of Earth,” IUR 30, no. 3 (May 2006): 3–6)

October 9 — 4:30 p.m. Three unidentified objects are tracked on radar at RAF Bawdsey [now Bawdsey Manor], Suffolk, England, at an altitude of 36,000 feet above the Netherlands. Soon they are tracked flying east to west over the Harwich area. Some jets at RAF Waterbeach [now Waterbeach Barracks], Cambridgeshire, are scrambled but can locate nothing. Airmen at Bawdsey can see nothing but four contrails heading north. The objects then reverse and move back across the English Channel at 32,000–34,000 feet. The apparent speed on the approach is 430 mph, increasing to 483 mph on the short leg over the UK and 564 mph on the return. (NICAP, “Three UFOs Flew over Area, Tracked on Radar”)

October 15 — 10:10 a.m. During the tracking of a Project Grab Bag balloon launch, a 40-foot object leaving a brief vapor trail is seen by three General Mills Aeronautical Lab research engineers (James A. Winker, Fletcher L. Bartholomew, and Richard J. Reilly) near Minneapolis, Minnesota. It is traveling south in horizontal flight at 1,100 mph, moving 10° in nine seconds at about 40,000 ft altitude and 25° elevation. The object goes into a vertical dive for about 10-15 seconds, then glows or flashes in the sun two or three times for 1 second each. It is seen in the

October 16 — Harvard astronomer Donald Menzel writes to USAF Director of Intelligence Gen. John A. Samford that he would like to meet with ATIC officers in Washington, D.C. (Good Above, p. 278)

October 16 — 4:00–4:30 p.m. Emerson “Slim” F. Morris watches a large, cigar-shaped object as it approaches Brigantine, New Jersey, from over the Atlantic. It releases several smaller objects from both ends. The smaller discs are white, rotating counterclockwise, and rapidly speed away. Before the large object disappears, it emits a blinding ray of light toward the ground that hurts Morris’s eyes. (Herbert S. Taylor, “Satellite Objects: A Further Look,” IUR 29, no. 2 (Summer 2004): 7)

October 19 — 12:10 a.m. Capt. J. L. Kidd is flying an American Airlines DC-6 between Philadelphia and Washington, D.C., when over the Conowingo Dam, Maryland, his copilot sees something gleaming in the moonlight dead ahead and closing rapidly. Kidd blinks on his landing lights and the UFO beams back a blinding light back at the DC-6. Kidd puts the plane into a steep dive. Caught unaware, the passengers are tossed about the cabin, many suffering injuries. Kidd radios Washington National Airport [now Ronald Reagan International Airport] to report a near collision and complain about air traffic. Air traffic control reports no known aircraft in his vicinity. (Keyhoe, FS Conspiracy, pp. 60–61; Loren E. Gross, UFOs, a History: 1953, August–December, The Author, 1990, pp. 34, 38; Good Above, p. 282)

October 20 — The NSA Robertson Committee report is completed and classified top secret. It recommends better and faster use of electronic intelligence in radar activity that might indicate an imminent attack, noting that the Air Force is not cooperating with the Army or Navy on these matters. (Clark III 55–56)

October 22 — Menzel meets with USAF headquarters personnel (including Col. George E. Perry) and ATIC at the Pentagon. (Good Above, p. 279)

October 25 — 8:15–8:30 p.m. Air Force weather observers at Lubbock, Texas, notice a V formation of 5–7 dull white lights sweep north to south. In three seconds, the formation goes from a point overhead to 3° above the horizon where they disappear. Other groups of two or more lights follow at about 5-minute intervals. (Loren E. Gross, UFOs, a History: 1953, August–December, The Author, 1990, pp. 35–36)

November — Capt. Charles A. Hardin takes charge of Project Blue Book. (Sparks, p. 14)

November — 6:30 p.m. Trygve Jansen and two other witnesses are driving north on the Gamle Mosevei road at the Gjersjøen bridge, Norway, when they see an object rise from behind a hill, swing out over the lake, and move back to the road, circling and following their car. Suddenly it stops and hovers above the road 30 feet in front of them, emitting a green light. Jansen stops, and all three witnesses experience mild electrical shocks until the object rises and disappears. When he returns home, Jansen’s wife points out that the car’s beige paint has turned a bright green. (Carl Olsen, “Chased by a Flying Saucer!” Flying Saucer Review 2, no. 5 (Sept./Oct. 1956): 16; K. Gösta Rehn, “Saucer Blocked Road in Norway,” APRO Bulletin, March 1962, pp. 1, 3)

November 3 — 10:00 a.m. An RAF NF.10 Vampire pilot (Flight Lt. Terry S. Johnson) and navigator (Flying Officer Geoffrey Smythe) flying at 30,000 feet near RAF West Malling [now closed], Kent, England, see a star-like light far above them. Suddenly it moves toward them at tremendous speed. They see it as circular and emitting a bright light around its periphery. The duration is 30 seconds. Air Minister George Ward calls it a “balloon”; when author Desmond Leslie calls him up to suggest this is incorrect, Ward tells him: “I know it wasn’t a balloon. You know it wasn’t a balloon. But until I’ve got a saucer on the ground in Hyde Park and can charge the public sixpence a go to enter, it must be balloons, otherwise the government would fall and I’d lose my job.” It is possible that this object was a Skyhook balloon launched from Holloman AFB in New Mexico on October 27 that failed to drop into the Atlantic after a 12-hour flight. (Desmond Leslie, “Politicians and the UFO,” Flying Saucer Review 9, no. 3 (May/June 1963): 8–9; Good Above, pp. 35, 53; Good Need, p. 154; UFOrfiles2, pp. 57, 62–63; David Clarke, “The Prince and the Saucers,” Fortean Times 406 (June 2021): 18)

November 3 — 2:45 p.m. In Lee, southeast London, a solid target is tracked on radar by the 256th Heavy Anti-Aircraft Regiment moving slowly at a distance of 17 miles. Through a telescope it appears to be a circular white object. The target is tracked for 25 minutes by four aircraft technicians, including Sgt. H. Waller, who says it is about 350–450 feet in diameter and definitely not a balloon. The War Office claims the object is a radiosonde balloon. (NICAP, “Heavy Anti-Aircraft Regiment Tracks UFO”; Good Above, pp. 35–36; Keyhoe, FS Conspiracy, p. 79)

November 5 — President Eisenhower issues Executive Order 10501, abolishing the classification of “Restricted.” UFO sightings are unaffected, as meaningful sightings are classified at higher levels. There are now explicit guidelines for the remaining three classification levels to prevent a systematic flood of classified documents coming from the
Pentagon and other agencies. The Pentagon responds by creating its own “special access” labels to further insulate classified information from outside influence. (“Executive Order 10501”)

November 16 — A fluffy material streams out of a UFO over the San Fernando Valley, California, and falls to the ground. A reporter who examines it describes it as “dead-white, almost ephemeral in its delicacy and apparently electrically charged.” A similar fall occurs in the same area on February 1, 1954. (Keyhoe, *FS Conspiracy*, pp. 227–228; Clark III 124)

November 19 — Bacteriologist Frank Olson is a leading scientist at the army’s Chemical Corps, Special Operations Division at Fort Detrick, Maryland. SOD supplies the CIA with an array of deadly microbes and chemicals that cannot be detected in an autopsy. It also supplies delivery methods for anthrax. The CIA pays SOD $200,000 a year for these services until 1969. Olson is duped into a meeting with MKUltra Director Sidney Gottlieb at a secluded cabin. Olson has a very bad trip and still hasn’t recovered after several days. (H. P. Albarelli Jr., *A Terrible Mistake: The Murder of Frank Olson and the CIA’s Cold War Experiments*, Trine Day, 2009; Stephen Kinzer, “The Secret History of Fort Detrick, the CIA’s Base for Mind Control Experiments,” Politico Magazine, September 15, 2019)

November 20 — Australian Minister for Air William McMahon tells Parliament that all UFO reports “are still being investigated closely and recorded as an aid to further research,” but the RAAF’s approach is a bit more ad hoc. (Swords 377)

November 22 — 10:00 p.m. A man who works in the supply transport office of the RAAF Woomera Rocket Range near Woomera, South Australia, sees a green object like a saucer fly to the north between Woocalla and Birthday Siding. It is emitting blue exhaust. Another man driving the same route around 2:00 a.m. about 50 miles from Woomera sees a bluish-green circular object moving north. It is seen again by another man in the same area around 2:30 a.m. A fourth party sees two orange flares dropping from the sky near Pimba at 3:15 a.m. All of the objects are at an altitude of more than 5,000 feet. (Keith Basterfield, “Listing of Reports from Woomera, South Australia,” 2008)

November 23 — Evening. ADC radar detects an unknown object moving at 500 mph over Lake Superior. An F-89C Scorpion interceptor, piloted by Lt. Felix Moncla Jr., with radar observer Lt. Robert L. Wilson in the rear cockpit, is dispatched from Kinross AFB [now Chippewa County International Airport], south of Sault Ste. Marie, Michigan. The jet heads toward the target under radar guidance. At 8,000 feet, 160 miles northwest of the Soo Locks, the blips of the F-89 and the UFO merge then fade from the screen. Nothing more is heard from the plane and no trace of it is found. A Pentagon spokesman claims the UFO was an RCAF C-47 that was never closer than 3-4 miles to the F-89, which has crashed for unknown reasons. In 2006, a group of divers claimed to have discovered the F-89 and taken photos on side-scan sonar, but the claim is a hoax. (NICAP, “UFO Intercept / Missing F-89 Case”; Keyhoe, *FS Conspiracy*, pp. 13–23; UFOEv, pp. 114–115; Yurko Bondarchuk. *UFO Sightings, Landings, and Abductions*, Methuen, 1979, pp. 106–109; Good Above, p. 273; Andrew Griffin, “Missing! Avoyelles Parish Man’s Disappearance Still a Mystery after 50 Years,” *Alexandria (La.) Town Talk*, July 20, 2003, pp. E1, E3; Clark III 654–656)

November 24 — The British Parliament discusses the November 3 Lee case and others. Nigel Birch, Parliamentary Secretary to the Ministry of Defence, explains the sightings as experimental weather balloons. MP George Isaacs asks, “Will the Minister agree that this story of flying saucers is all ballooney?” (Good Above, p. 36)

November 28 — Frank Olson is depressed, incoherent, and uncommunicative after his LSD dose nine days earlier. His CIA contacts take him to a “doctor” in New York City, who prescribes him alcohol. He then plunges to his death from the 10th floor window of the Hotel Statler in New York City. The US government calls it a suicide, the Olson family alleges murder because, especially in the aftermath of his LSD experience, he has become a security risk who might divulge state secrets associated with highly classified CIA programs of which he has direct personal knowledge. A few days before his death, Olson quits his position as acting chief of the Special Operations Division at Camp Detrick [later Fort Detrick] in Frederick, Maryland, because of a severe moral crisis concerning the nature of his biological weapons research. Among Olson’s concerns are the development of assassination materials used by the CIA. The CIA’s use of biological warfare materials in covert operations, experimentation with biological weapons in populated areas, collaboration with former Nazi scientists under Operation Paperclip, LSD mind-control research, and the use of psychoactive drugs during “terminal” interrogations under a program code-named Project ARTICHOKE. Later forensic evidence conflicts with the

December — Wilbert B. Smith sets up his Department of Transport observatory at Shirley’s Bay, Ontario. His equipment includes an ionospheric reactor, electronic sound measurement devices, gamma-ray detector, gravimeter, magnetometer, and radio set. (Wikipedia, “Project Magnet (UFO)”; Good Above, pp. 185–186)

December — Noall Bryce Cornwell (who uses the pseudonyms Mel Noel and Guy Kirkwood) claims to have been stationed at Lowry AFB [now Wings Over the Rockies Air and Space Museum] in Denver, Colorado, and engaged in several dogfight-type maneuvers with UFOs involving gun-camera film. His stories are bogus, and later he runs phony investment scams and becomes a contactee who describes meeting pink-haired, platinum-skinned, fish-eating Martians said to be running a Mars–Earth transportation system. (Mel Noel, The Mel Noel Story, Saucerian, 1960; Good Above, pp. 273–277; Kevin D. Randle, “Mel Noel / Guy Kirkwood in the 1960s,” A Different Perspective, December 20, 2010; Adam Gorightly, “Mel Noel’s Phony Flying Saucer Trip to the Stars,” Chasing UFOs, April 17, 2020)

December — Australian UFO researcher Edgar Jarrold is visited four times by a mysterious man who swears him to secrecy. What the visitor tells him amazes him “beyond belief,” but he never publicly reveals who the man is. However, it turns out that the man is Gordon Deller, a minor figure in Australian ufology who has some quaint and original theories about the saucers. He believes that UFOs are piloted by etherians from another dimension. however, Jarrold’s obsession with UFOs leads to the breakup of his family and the disintegration of his personal life by 1955. (Clark III 632–633)

December 7 — 9:30 p.m. Pfc Alfred V. De Bonise and Sgt1C James Conley of the 89th Anti-Aircraft Battalion at Fort George G. Meade, Maryland, spot a white object, “shining like a star.” It makes a noise like an artillery shell in flight. It moves erratically and eventually falls out of sight. (Good Above, p. 280; Loren E. Gross, UFOs, a History: 1953, August–December, The Author, 1990, p. 60)

December 7 — Radio Moscow proclaims that saucers are “figments of the imagination of western warmongers.” (Frank Edwards, FS Serious Business, Bantam ed., 1966, p. 156)

December 8 — The CIA reports that UFO sightings have fallen dramatically in 1953, though there are some of “possible scientific intelligence value.” (Jenny Randles, UFO Conspiracy, Cassell, 1987, p. 45)

December 9 — 3:45 p.m. Charles Huaut sees a luminous, golden, round object poised motionless at a high altitude over Saint-Émilion, Gironde, France. After 10 minutes it noiselessly changes position and assumes the form of several horseshoes enveloped in smoke trails. Then it disappears. (Central Intelligence Agency, “Sightings of Unidentified Flying Objects,” April 20, 1954, p. 2; ClearIntent, p. 130)

December 15 — 2:37 p.m. While flying a Transair Sweden DC-3 in the vicinity of Hässleholm, Skåne, Sweden, pilot Ulf Christiernsson and flight mechanic Olle Johansson encounter an “unorthodox, metallic, symmetric, round object” closing in on their aircraft for about 10 seconds. It passes about 1,970 feet under the DC-3 at an altitude of 7,055 feet. Air Force Gen. Bengt Nordenskiöld calls in reports from all relevant Swedish radar stations to identify the object, and the Defence Research Institute spends many hours reconstructing the event. However, the owner of a local perfume company confessed in late December to releasing 300 hydrogen-filled balloons south of Hässleholm as an advertising promotion around 12:30 p.m. that day. (Swords 365)

December 16 — The British Air Ministry sends orders to all RAF stations saying that UFO reports are to be classified “Restricted” and personnel must not communicate any sighting information to unauthorized persons. Reports must be sent to the air intelligence branch DDI (Tech) that is now responsible for UFO investigations. (UFOFiles2, pp. 57–60)

December 16 — 4:58 p.m. Lockheed Skunk Works chief Clarence L. “Kelly” Johnson and his wife Althea (near Agoura, California) and a Lockheed crew (Rudy Thoren, Roy Wimmer, and 3 others) flying the WV-2 Warning Star aircraft near Long Beach, California, independently of each other observe a black flying-wing (or ellipse or crescent-shaped) object about 170–230 feet wide flying at about 15,000 ±2,000 feet altitude to the west, hovering about 30–60 miles away. At 5:04 p.m., after four minutes (to the Johnsons) and six minutes (to WV-2 crew) the UFO suddenly takes off in a shallow climb accelerating to approximately earth escape velocity (25,000 mph) to the west over the Pacific. It disappears in 10–13 seconds (to WV-2 crew) or in 90 seconds (to Johnson using 8x binoculars) after reaching 90+
miles altitude. (NICAP, “The Lockheed UFO Case”; Joel Carpenter, “The Lockheed UFO Case, 1953,” *IUR* 26, no. 3 (Fall 2001): 6–9, 33; Joel Carpenter, “The Lockheed UFO Case,” 2001; Sparks, p. 206)

December 17 — After the crew of a Swedish airliner reports a wingless circular UFO over Hässleholm, Sweden, the Swedish Armed Forces orders a full-scale investigation. Capt. Ulf Christiernsson says the object is an “entirely unorthodox, metallic, symmetrical, and circular object.” Later reports claim it is a radiosonde balloon. (UFOEv, p. 121; Sparks, p. 206)

December 17 — A memo from Todos M. Odarenko, chief of the CIA/OSI physics and electronics division, condescendingly reviews the status of various government UFO efforts. (Todos M. Odarenko, “Current Status of Unidentified Flying Objects (UFOB) Project,” December 17, 1953)

December 23 — USAF Intelligence Col. George E. Perry writes to Gen. Woodbury M. Burgess, ADC Deputy for Intelligence at Ent AFB [now the US Olympic Training Center] in Colorado Springs, Colorado, recommending that when the 4602nd investigates a UFO sighting and it is not a conventional object, personnel should state “The information on this sighting will be analyzed by the Air Technical Intelligence Center at Dayton, Ohio,” and leave it at that. (Col. George E. Perry, Letter to Brig. Gen. W. M. Burgess, December 23, 1953)

December 24 — 8:04 a.m. US Navy Lts. J. B. Howard and L. D. Linhard, flying F9F-2 jet fighters, see 10 silver oval objects flying in formation at 450+ mph, straight and level, over El Cajon, California. (NICAP, “Navy Lts. Encounter 10 Oval Objects”; Sparks, p. 206)

December 26 — The first of a series of articles in the *Washington (D.C.) Times-Herald* by Richard Reilly questions the Air Force’s openness about UFOs. (Dolan, p. 145)

December 29 — Keyhoe has a confrontation with Delos Smith, the science editor of the United Press wire service, and a UP executive editor. Smith is preparing a three-part series debunking Keyhoe’s claims because a “certain Air Force general swears your book is a complete fraud.” Forewarned by Frank Edwards, Keyhoe counters his arguments with documentation. (Keyhoe, *FS Conspiracy*, pp. 85–88)

December 30 — 9:05 p.m. Pfc Norman Viet, on guard duty at the tank park in Marine Corps Base Quantico, Virginia, watches a blinking red light about 18 inches in diameter moving slowly over a tree line about 200 feet away. It soon drops down out of sight. Fifteen minutes later it is seen again, rising up and floating toward the tank shed. Viet says it is completely soundless. At 10:15 p.m. it returns, also witnessed by Sgt. Francis R. Salinder, who alerts the base and a combat team searches the area. At midnight, a red light appears above the search area, spooking a guard. (Wilkins, *FS Uncensored*, Citadel, 1955, p. 202; *Washington (D.C.) Daily News*, January 5, 1954; Loren E. Gross, *UFOs, a History: 1953, August–December*, The Author, 1990, p. 75)

1954

1954 — Jim and Coral Lorenzen move from Wisconsin to Alamogordo, New Mexico, to work as civilian employees at Holloman AFB. (Clark III 50)

1954 — An official in the UK Deputy Directorate of Intelligence (Technical) mentions to investigator Ronald N. Russell that the DDV has 15,000 reports on file since 1947 stored in nine drawers in three wooden filing cabinets with Yale locks, doubly secured by a hinged plate locked with a large padlock. (John Pitt, “Tell Us Please, Mr. Birch,” *Flying Saucer Review* 2, no. 5 (Sept./Oct. 1956): 10–13; Good Above, p. 33)

1954 — A promotional photo of a Martin B-57 Canberra bomber taken near Edwards Air Force Base in California shows a saucer-like object in the upper right portion of the frame. No one actually reports seeing the object, which seems to be trailing the B-57 in flight. NICAP photoanalyst Ralph Rankow points out that the object has dimension, does not appear to be a scratch or rub on the film, and has a pattern of light and shadow consistent with the rest of the photo. (Story, pp. 36–37; Robert A. Schmidt, “The Strange Case of the B-57 Photographs,” *Flying Saucer Review Case Histories*, no. 6 (August 1971): 1–2)

1954 — The powerful Type 80 centimetric radars introduced in the UK this year are plagued by radar “angels” that become a hazard for air traffic controllers. A Fighter Command investigation concludes that most of them are caused by migrating seabirds, and others are the result of “anomalous propagation.” Later computers filter out smaller echoes and increase the strength of those created by aircraft. (David Clarke, “Gremlins and Black Projects,” *Fortean Times* 291 (August 2012): 26–27)
1954 — After RCAF pilots fail to intercept several UFOs in Canadian air space, the Defence Research Board sets up a restricted landing field near the Suffield Experimental Station [now CFB Suffield], Alberta. All RCAF planes and commercial aircraft are restricted from the area. However, the effort is abandoned after the government determines that UFOs are not a national security risk. The project is kept secret until July 1967 when it is revealed by Defence Minister Paul Hellyer. (“UFO Landing Site was 13-Year Secret,” Ottawa (Ont. Journal, July 20, 1967, p. 5)

January — 5:00 a.m. A strange object streaks across the sky over Harts Range, Northern Territory, Australia, seen and heard by four Native Australians. On the same day, an anonymous photographer is taking photos of Mount Gillen, Northern Territory, when suddenly an enormous (150 feet) round object appears from behind it. It moves high, then drops low. He takes a photo, then it shoots off at high speed to the west. The photo, reproduced in the newspaper, shows a dubious-looking round object on edge with six spokes. (Alice Springs Centralian Advocate, January 15, 1954; Alice Springs Centralian Advocate, February 5, 1954; Keith Basterfield, “Cold Case: The Mount Gillen Photograph, Alice Springs, 1954,” Unidentified Aerial Phenomena–Scientific Research, January 12, 2012)

January 1 — 10:15 a.m. Capt. Douglas Barker, a pilot with Australian National Airways, is at his home in Doncaster East, Melbourne, Victoria. He sees a “metallic, mushroom-shaped object” flying over the Yarra River valley toward the Templestowe brickworks in the northwest. He estimates it is traveling at 700 mph at a height of 2,000 feet. Its apparent size is four times that of a DC-4 aircraft. It is oscillating rapidly in and out of thick cloud. It is elliptical with a “long shaft about the same length as its body hanging below it.” Total duration of the sighting is 12 seconds. (NICAP, “Mushroom Flying over Yarra Valley”)

January 1–2 — 10:35 p.m.–12:05 a.m. Navy pilot Lt. JG George G. Morgan of Naval Air Station Lakehurst [now Joint Base McGuire–Dix–Lakehurst], Toms River, New Jersey, police chief Richard Clement, police officer Oliver G. Osborne, and other witnesses see 3–12 round white objects with fuzzy edges slightly smaller than the full moon hovering in the south for 90 minutes as 2 objects circled around another one. They then switch places. Some witnesses attempt to drive toward the objects to investigate. The objects suddenly depart to the southwest at extremely high speed, growing smaller until they disappear in 1–2 seconds. Multiple independent witnesses across a baseline of at least 12 miles allow for triangulation that locates the objects near Beach Haven, New Jersey, from distances of 15–40 miles. At least five witnesses use binoculars. Hynck calculates a departure speed of 90,000 mph, a hovering altitude of 4 miles, and a diameter of 1,500 feet. (NICAP, “Multiple-Witness Sightings Triangulate Location”; Sparks, p. 207; Swords 223–224)

January 4 — Shortly after 9:00 p.m. A round luminous machine, coming from the south, lands at the Marignane Airfield [now Marseille Provence Airport], Bouches-du-Rhône, France. There is only one witness present, a fireman at the airport named Chesneau. The machine disappears while he is telephoning the control tower. Careful scrutiny of the runway the next morning turns up a few pieces of metallic debris. The story is confirmed by a Marseille resident who is driving from Arles to Marseille and sees a large, round, reddish fireball, but places the time at 10:45 p.m. (Jimmy Guieu, Les soucoupes volantes viennent d’un autre monde, Fleuve Noir, 1954; ClearIntent, p. 132; Patrick Gross, “The 1954 French Flap,” March 15, 2003)

January 6 — The Cleveland Press runs the headline “Brass Curtain Hides Flying Saucers” and reveals that ATIC will no longer allow reporters seeking UFO information into Wright-Patterson AFB in Ohio. Its reporter is given the runaround on the Utah film. (“Air Force Closes Brass Curtain,” Knoxville (Tenn.) News-Sentinel, January 14, 1954, p. 3; UFOEv, p. 134)

January 7 — 4:27 a.m. A fiery disk, followed by a luminous trail, is seen in Arras, Pas-de-Calais, France. The disc remains motionless in the sky for an instant, after which it flies away and disappears over the horizon. (ClearIntent, p. 133; Patrick Gross, “The 1954 French Flap,” December 4, 2005)

January 9 — Three residents of Lunévile, Meurthe-et-Moselle, France, see a round object flying from north to south. The object flies more slowly than a jet plane and leaves a luminous yellow trail. It flies noiselessly, although it appears to be at a low altitude. Several students of the College de Lunévile also see the object. (ClearIntent, p. 132; Patrick Gross, “The 1954 French Flap,” December 28, 2004)

January 10 — 5:25–5:40 p.m. James E. McDonald, two other University of Chicago meteorologists, and another passenger are driving on Hwy 83 north of Sonoita, Arizona, when McDonald spots a brilliant white stationary object in the southwest above the Santa Rita Mountains about 10 miles away. They lose sight of it as the car moves on. McDonald searches carefully for alternate explanations, but can find none, so he reports the sighting to the Air Force in a 4-page letter. (Clark III 695; Sparks, p. 207)
January 13 — Mutual Radio broadcaster Frank Edwards alleges on his show that the wreckage of a flying saucer is being held in a “West Coast military field.” (Clark III 330–331)

January 13–16 — Gen. Woodbury M. Burgess chairs a conference at Ent AFB [now the US Olympic Training Center] in Colorado Springs, Colorado, with 4602nd officers Capt. Joseph A. Cybulski and Capt. Bellovin and emphasizes that it is now the agency responsible to ATIC for investigating UFOs. Cybulski says that “We here in Headquarters will keep a complete file on all the sightings. That’s why we want the information copied. We will file them under separate headings, such as the type of personnel involved, military or civilian, or air-lines. We will record it under the type of object it was eventually determined to be.” Capt. Cybulski leaves for Dayton, Ohio, the next day to coordinate activities more closely. He reports that Hynek is “ready to quit” because he is “ridiculed by members of my profession for chasing these imaginary objects.” But Burgess persuades him to stay. (CUFON, “4602d AISS Unit History Sampler, Part 3 of 7 Parts”; Brian Skow and Terry Endres, “The 4602d Air Intelligence Service Squadron and UFOs,” IUR 20, no. 5 (Winter 1995): 9–10; Capt. Joseph A. Cybulski, “How the Air Force Investigated UFOs,” IUR 20, no. 5 (Winter 1995): 11, 30–32)

January 18 — Cosette Weiss of Las Cruces, New Mexico, is visiting the Kilbourne Hole, a maar volcanic crater in the Potrillo Volcanic Field of southern New Mexico, to collect gemstones with a companion, Mrs. Sanders. They discover 25–30 disc-shaped tracks in the sand. The largest are about 2 feet in diameter, perfectly round, and consist of four concentric rings. They find more fresh tracks on January 22. Sanders reports this to White Sands Proving Grounds. Two Army security agents, Capt. Ross Orcutt and CID agent Henry Herman, spend the night of February 6 at the location and report that the tracks are “nothing more than a combination of wind, sand, and roots.” The mystery lights seen in the area by Weiss are labeled “vehicular traffic.” (“Report from the Readers,” Fate 7, no. 6 (June 1954): 109–129; Michael D. Swords, “Fun and Games in the Desert near Las Cruces,” IUR 30, no. 3 (May 2006): 1)

January 18 — 1:30 p.m. Many people in Saint-Arnaud [now El Eulma], Algeria, observe an object that leaves a double trail of white smoke, making an immense circle over the town. Several officers at Bordj de la Remonte fort (southwest of Magra) hear an object make a strange sound. It seems to arrive from the north. A meteorological station near Oued Hmimim (southeast of Constantine) observes a double trail of smoke at 2:00 p.m., but it concludes that the smoke comes from a plane flying at great altitude. At 2:30 p.m., inhabitants of Sétif see an object arrive from the east, emitting bluish smoke trails and moving relatively slowly. After circling above the town for several seconds, it suddenly heads back in the direction of Saint-Arnaud at great speed. Witnesses describe it as being cigar-shaped and flying at high altitude. Finally, at 4:45 p.m., a large, luminous, rectangular-shaped object is seen over Ouled Djellal (125 miles southwest of Sétif) for over 30 minutes following a rectilinear course. The object comes from the east and disappears toward the west. (ClearIntent, p. 133)

January 25 — The British Air Ministry and the British War Office order airmen and soldiers to tell the public nothing about UFOs. (Harold T. Wilkins, Flying Saucers on the Attack, Citadel, 1954, p. 318)

January 25 — 10:00 p.m. A civilian employee and astronomer, Robert D. Schaldach in the Technical Service Unit at White Sands Proving Grounds, New Mexico, is setting up his ballistic camera to monitor a missile test. As he looks at the stars to calibrate his instrument, he notices a yellow-white light moving from northeast to southeast in a shallow arc. It pulses in brightness at regular intervals. At the same time, another observer 17 miles to the southeast also sees the object. They perform some triangulation measurements and determine that the object is about 12 miles distant and moving at 12,000 mph. Schaldach says it is not a meteor. Blue Book, no doubt Hynek, labels it as a meteor. (Michael D. Swords, “Fun and Games in the Desert near Las Cruces,” IUR 30, no. 3 (May 2006): 20–21)

January 27 — The US successfully launches a Redstone surface-to-surface missile that flies 55 miles from Cape Canaveral, Florida. (Wikipedia, “PGM-11 Redstone”)

January 28 — Australian Minister for External Affairs Richard Casey suggests there is a correlation between UFO sightings and “periods of intense meteorite activity.” (Swords 374)

January 29 — Afternoon. Mr. and Mrs. J. A. Whitaker are driving 6 miles south of Santa Ana, California, when they see a round object emitting a blurry light-blue light moving off a hilly field. It passes over their car at an altitude of 25 feet. The radio goes blank and the motor coughs and continues to act roughly after the UFO had gone. Whitaker estimates it is 60 feet in diameter and traveling at 600 mph. It makes a vertical ascent and disappears. (Schopick, p. 5)

February — Civilian Saucer Intelligence of New York is founded by Ted Bloecher, Isabel Davis, and Alexander Mebane. The group holds regular meetings, sponsors lecturers, and begins publishing a CSI Newsletter in February 1955. It disbands in 1959. (Wikipedia, “Civilian Saucer Intelligence”; CSI Publication, no. 0 (April 23, 1954); Clark III 241)
February — Clara John begins publishing The Little Listening Post newsletter in Washington, D.C. It continues through August 1965. (Little Listening Post, February 9, 1954)

February — Mr. and Mrs. Forster of Peekskill, New York, see a UFO on the ground with a woman close by. She holds a tube in one hand and a box in the other, wears luminous clothing and a hood over part of her head. Mrs. Forster has to be taken to the hospital in a state of shock. (Dominick L. Lucchesi, “They Saw a Saucer Woman,” The Saucerian 2, no. 2 (September 1954): 12–17; Vallée, Magonia, p. 205; Clark III 267)

February — Newlyweds Ernest L. Norman and Ruth E. Norman found a contactee group, the Unarius Academy of Science, in Los Angeles, California. Ernest, a spiritualist medium, wants the group to promote the interdimensional science of life expounded in the books he has written, all of them channeled psychically from extraterrestrial intelligences. Both claim impressive credentials from past lives. Ruth styles herself the Archangel Uriel and after the death of Ernest in 1971, she becomes the public face of Unarius. Before her death in 1993, she predicts an increase in UFO sightings and tells the audience their task is to keep its eyes open and be ready to report sightings. (“Unarius Academy of Science”; Clark III 1186–1187; Douglas Curran, In Advance of the Landing: Folk Concepts of Outer Space, Abbeville, 1985, pp. 27–37)

February 4 — 11:00 p.m. A target is detected by the Carswell AFB [now Naval Air Station Joint Reserve Base Fort Worth] Ground Control Approach radar, near Fort Worth, Texas, at a distance of 13–15 miles to the southwest. A “mystery aircraft” passes over Carswell tower at just over 3,000 feet. Seen through binoculars, the UFO has a long fuselage, elliptical wings, some kind of stabilizer, a bright light on its nose and tail, two yellowish lights on the bottom, and possible lights on each wing tip. It is silent. The report is sent directly to the Joint Chiefs of Staff, CIA, and NSA. (NICAP, “Radar/Visual with Two Radars”; Good Above, pp. 281–282, 495–496; Sparks, p. 208)

February 13 — Jim G. Lucas of Scripps-Howard papers reports that representatives of major US airlines will meet in Los Angeles with Military Air Transport Service intelligence officers to discuss speeding up UFO reporting procedures. “Airline pilots are asked not to discuss their sightings publicly or give them to newspapers.” (“Airline Pilots Sighting 5–10 ‘Saucers’ Nightly,’” Pittsburgh (Pa.) Press, February 13, 1954, pp. 1, 3; UFOEv, p. 134)

February 13 — Astronomer Clyde Tombaugh gives a talk to the Astronomical Society of Las Cruces, New Mexico. He predicts an increase in UFO sightings and tells the audience to keep its eyes open and be ready to report sightings. (Keyhoe, FS Conspiracy, p. 99)

February 15 — American syndicated columnist Dorothy Kilgallen writes: “Flying saucers are regarded as of such vital importance that they will be the subject of a special hush-hush meeting of world military heads next summer.” (Dorothy Kilgallen, “Voice of Broadway” column, Dover (Ohio) Daily Reporter, February 15, 1954, p. 8)

February 15 — Aviation Week publishes an article describing new Soviet jet bombers capable of carrying a nuclear bomb to the US. The aircraft is the Myasishchev M-4 Bison. The rumors are soon debated publicly in the press and Congress. The Air Force begins promoting its unfounded myth of a bomber gap, in which the Soviet Union has 500 bombers capable of delivering nuclear weapons. (Wikipedia, “Myasishchev M-4”; David A. Anderton, “Pictures Reveal Reds’ New ‘Sunday Punch,’” Aviation Week, February 15, 1954, pp. 12–13)

February 15 — Morning. Stephen Darbishire, 13, and his cousin Adrian Meyer, 8, set off for an expedition to the Old Man of Coniston, a fell in the Lake District, England, armed with a Kodak box camera. Meyer notices an object above Dow Crag with a silvery, glassy appearance, shining like aluminum. It glides toward them and approaches within 400 yards, travelling at tremendous speed, and then stops suddenly and hovers noiselessly, in the sky. Darbishire takes two photos, which resemble those of scoutships taken by George Adamski in the US. A probable hoax, although Darbishire still refuses to say anything explicit about the photos, which no longer exist. (Clark III 42; Leonard G. Cramp, Space, Gravity, and the Flying Saucer, British Book Centre, 1955; Good Above, p. 377; David Clarke and Andy Roberts, “UFO Hoaxing and the Story of Stephen Darbishire,” Magonia, no. 75 (July 2001)

February 17 — Commercial airline representatives meet with Military Air Transport Service officers at the Roosevelt Hotel in Los Angeles, California, and are told that pilots are subject to JANAP 146 (CIRVIS) and must radio reports to the nearest airport and make no public statements or face a prison term of 10 years and/or a fine of $10,000. (Good Above, pp. 146, 283)
February 19 — CIA agent Morris “Morse” Allen simulates the ultimate experiment in hypnosis: the creation of a “Manchurian Candidate,” or programmed assassin. Allen’s victim is a secretary whom he puts into a deep trance and tells to keep sleeping until he orders otherwise. He then hypnotizes a second secretary and tells her that if she cannot wake up her friend, “her rage would be so great that she would not hesitate to ‘kill.’” Allen leaves a pistol nearby, which the secretary has no way of knowing is unloaded. Even though she has earlier expressed a fear of firearms of any kind, she picks up the gun and pulls the trigger on her sleeping friend. After Allen brings the “killer” out of her trance, she has apparent amnesia for the event, denying she could ever shoot anyone. (John D. Marks, The Search for the “Manchurian Candidate”: The CIA and Mind Control, Times Books, 1978, pp. 182–186)

February 23 — Scripps-Howard papers report that the “nation’s 8,500 commercial airline pilots have been seeing a lot of unusual objects while flying at night, here and overseas.” They confirm that plans for a detailed reporting system were agreed upon at the February 17 meeting in Los Angeles, California, so that the Air Force can investigate quickly. Each airline is to have an “internal security specialist” as a liaison with the military. (“Flying Saucers Reports System to Be Organized,” Albuquerque (N.Mex.) Tribune, February 23, 1954, p. 10; UFOEv, p. 134)

March — Two Native Australians, employees of Arthur Pope, see a UFO at close range 100 miles south of Alice Springs, Northern Territory. One named Sonny is riding up over a ridge when a spherical object flies directly toward him then veers away. Sonny feels a heavy wind when the UFO passes. Others see the object, which has a glassy appearance, with four trails of smoke coming from each side. (Alice Springs Centralian Advocate, April 2, 1954; Keith Basterfield, “Alice Springs: 1954 Encounter,” Unidentified Aerial Phenomena—Scientific Research, February 7, 2012)

March — Cincinnati, Ohio, businessman Thomas B. Eickhoff informs Keyhoe that Flying Saucers from Outer Space was “not submitted to the air force for authentication prior to publication,” although it contains official UFO reports. (Keyhoe, FS Conspiracy, p. 108)

March 1 — 6:45 a.m. Castle Bravo is the most powerful nuclear device detonated by the US and its first lithium deuteride–fueled thermonuclear weapon. The test’s yield is 15 megatons of TNT, 2.5 times the predicted 6.0 megatons (due to unforeseen additional reactions involving lithium–7), which leads to the unexpected radioactive contamination of areas to the east of Bikini Atoll in the Marshall Islands. At the time, it is the most powerful artificial explosion in history. Fallout, the heaviest of which in the form of pulverized surface coral from the detonation, falls on residents of Rongelap and Utirik atolls, while the more particulate and gaseous fallout spreads around the world. The inhabitants of the islands are not evacuated until three days later and suffer radiation sickness. Twenty-three crew members of the Japanese fishing vessel Daigo Fukuryū Maru are also contaminated by the heavy fallout, experiencing acute radiation syndrome. The blast incites international reaction over atmospheric thermonuclear testing. (Wikipedia, “Castle Bravo”)

March 1 — Morning. Airborne Radar Operator W/O Olin H. Hasty is aboard an RB-36 controller aircraft monitoring the Castle Bravo test at Bikini Atoll. Shortly after the detonation, the RB-36 is flying at 40,000 feet and Hasty picks up two or three unidentified targets operating above 60,000 feet. From the cockpit the pilot and copilot can see the objects, which are flying in holding patterns above the area of the blast. Task force headquarters advises them that
the objects are Canberra aircraft flown by the Royal Australian Air Force on air-sampling missions. However, there is only one British Canberra in the area at the time. (Nukes 110–113)

March 1 — Numerous bathers at the beaches near Montevideo, Uruguay, observe a metallic disc emitting yellowish reflections. It remains stationary for 2 minutes at an altitude of several thousand feet. (ClearIntent, p. 133; Lorenzen, The Whole Story, Signet, 1969; Loren E. Gross, UFOs, a History: 1954, January–May, The Author, 1990, p. 45)

March 1 — 2:30 p.m. Employees at Carrasco International Airport in Montevideo, Uruguay, watch a strange oval object above the northeast horizon. It changes shape and ejects a smaller body that moves below and behind. An operator named de Rizzardo in the control tower sees an oval object with protuberances, accompanied by a pair of smaller bodies. Chief Controller Pedro V. Ocampa is still fumbling with binoculars as the objects speed away. (Loren E. Gross, UFOs, a History: 1954, January–May, The Author, 1990, p. 45)

March 5 — Evening. At Nouasseur Air Base [now closed] near Casablanca, Morocco, crews of USAF KC-97 aerial tanker planes and a C-54 transport see one or two white or amber objects or lights make passes at the aircraft on collision courses as they practice ground-controlled approach landings. At 7:15 p.m., KC-97 pilots Capt. G. E. Brown, 1st Lt. L. B. Gordon, and 1st Lt. J. P. Glover, 301st Air Refueling Squadron, 301st Bomb Wing, while flying a KC-97 to a practice landing at 1,500 feet about 5-8 miles southwest of the base, see two white lights to the right on an apparent collision course. The KC-97 takes evasive action. Later [at 8:20 p.m.? 9:20 p.m.], after landing and takeoff, they see the same or similar two white lights on the same course from the south on a collision course and they made an evasive 360° turn. At 7:38 p.m., pilots Capt. Robert R. Zadnick, Lt. Paul R. Fisher, and Lt. George A. Kerr flying another KC-97 at 1,500 feet about 5 miles southwest of Nouasseur base see a light at about the same altitude and the left, apparently headed west on a collision course. As it crosses, they see 2 lights like jets but with no aircraft running lights. One light passes over and one under the KC-97. At 9:55 p.m., senior pilot Capt. William M. Pond, copilot Lt. I. W. Gilchrist, and navigator Capt. James F. Pullen, while flying a C-54 at 2,000 feet at Nouasseur base see a white or amber light like an aircraft landing light at about the same altitude approaching on a collision course heading west 2–3 miles away. It then turns onto a direct head-on course, passing within 2 miles, then suddenly disappears like turning off a light. It then reappears 10–15 seconds later, hovers, descends to the ground, then rises and disappears behind the C-54 after completing its turn onto final landing approach. No radar or other visual contact is made. (NICAP, “Aircraft (2) Encounter Lights on Collision Course”; Sparks, p. 210)

March 5 — A photo supposedly taken near Rouen, France, by a fighter pilot is actually a retouched photo showing the 1950 McMinnville, Oregon, UFO photo taken by Paul Trent. (NICAP, “RAF Flying Review Photo”)

March 8 — 11:07 p.m. A red disc-shaped UFO flies over Laredo AFB [now Laredo International Airport], Texas. It tilts to a vertical orientation and then shoots straight up into the sky. It is reported by a pilot. Ten to twenty nocturnal lights in a crescent formation—possibly a single crescent-shaped object—fly over San Antonio, Texas. They make no sound. (Keyhoe, FS Conspiracy, p. 110)

March 10 — JANAP 146 (C), “Communications Instructions for Reporting Vital Intelligence Sightings from Aircraft and Waterborne Sources.” This directive allows waterborne sources for CIRVIS and adds MERINT reports. Civilian pilots must also report UFOs to the Air Force and refrain from talking about it. (Joint Chiefs of Staff, Joint Communications–Electronics Committee, “JANAP 146(C) Communications Instructions for Reporting Vital Intelligence Sightings from Airborne and Waterborne Sources,” March 10, 1954; Good Above, p. 283; Antonio F. Rullán, “Blue Book UFO Reports at Sea by Ships,” December 10, 2002)

March 10 — Leonard H. Stringfield founds Civilian Research, Interplanetary Flying Objects (CRIFO) in Cincinnati, Ohio. (Clark III 1114)

March 12 — 9:35 a.m. USAF 1st Lt. Robert Johnson, flying an F-86 over Nouasseur Air Base [now closed] near Casablanca, Morocco, chases an object at more than 530 mph for 30 seconds, but is unable to catch it. The object appears to be the size of a fighter plane but has neither tanks nor vapor trails. (NICAP, “F-86 Chases Object at 500 MPH”; Sparks, p. 210)

March 15 — A memo about a recent Project Second Storey meeting show that experiments at Wilbert B. Smith’s Shirley’s Bay detecting station is running experiments correlating UFO reports with magnetic disturbances and gamma radiation. It recommends looking into as yet undiscovered gravity waves. (Good Above, pp. 187–188)

Mid-March — Prince Philip, Duke of Edinburgh, invites probable UFO photo hoaxter Stephen Darbishire to Buckingham Palace in London, England, to relate his story to an aide. A full report of the interview is sent to the duke, who is in Australia. (Good Above, p. 39)
March 18 — 4:25 p.m. Two conservation officers stationed on Hecla Island in Lake Winnipeg, Manitoba, are driving their snowmobile across the frozen lake when they see a slim silver object 100 feet long and only 8 feet thick. They watch the object as it changes orientation from vertical to horizontal and back again. They estimate it is 15,000 feet high and 10 miles away. (Chris Rutkowski, *Canada’s UFOs: Declassified*, August Night, 2022, p. 69)

March 23 — Capt. William B. Nash gives a talk at a Greater Miami (Florida) Aviation Association luncheon at the Seven Seas Restaurant and offers his assessment of the Air Force’s handling of UFO investigations. He suspects that the Air Force has concluded that UFOs are a real phenomenon, but they fear creating a state of panic by admitting as much. (Michael Hall, “Was There a Second Estimate of the Situation?” *IUR* 27, no. 1 (Spring 2002): 11)

March 24 — Night. Civil Defense Deputy Coordinator Adolph Wagner sees 13 sharply defined triangular objects moving west to east over Baltimore, Maryland, in a V formation. They are glowing a fluorescent blue. From the north, a larger object approaches and stations itself in front of the V. When a commercial airliner appears, the objects split formation. Six execute a sharp turn, the color shifts to purplish, and they head toward the airplane in single file. The other 8 objects continue flying east. (“Multiple Object Sightings by Creditable Observers Continue,” *CRIFO Orbit*, July 2, 1954, p. 3; UFOEv, p. 66)

March 25 — 3:20 p.m. USMC Capt. Dan C. Holland is flying one of three jets with the 3rd Marine Air Wing on an easterly heading at Fort Lauderdale, Florida, at about 26,000 feet and 400+ mph. He sees a gleaming white, ball-shaped object with a gold ring around the lower third, about 2 times size of his jet, descending vertically on a collision course. He takes evasive action and radios the other jet pilots to look. The object suddenly stops 3,000–4,000 feet above his jet. He banks toward it and activates the gun camera, but the UFO accelerates and disappears to the east at tremendous speed in about 15 seconds. The other two pilots flying ahead of him do not see the object. (NICAP, “Ball with Golden Rings Stops near F-9F”; Sparks, p. 211; Loren E. Gross, *UFOs, a History: 1954–1960: From Obscurity to World Fame,* The Author, 1990, pp. 61–62)

March 28 — 1:25 a.m. Capt. Willis T. Sperry and his copilot on United Air Lines Flight 600, flying east at 19,000 feet 12 miles east of Cherokee (near Creston), Wyoming, spot a bright green glowing object at 12°15’ above the horizon coming downward at an angle of 30° to the left of vertical and disappearing behind a cloud bank. It is also seen by the pilot of a DC-3 west of Sinclair, Wyoming, at 13,000 feet. (Good Above, pp. 283–284; Sparks, p. 211)

Late spring — Noon. A family living in a cottage on the outskirts of Norco, California, is sitting down for lunch when they hear a metallic droning sound. The mother and daughter go outside and see an object like a rowboat with a transparent dome, 20 feet long and 10 feet wide, pass slowly overhead, then stop and hover over a nearby tree. Inside the dome are five helmeted men staring at the witnesses. Their “rather long faces” are olive-colored, and their eyes and hair are dark. After a minute the droning sound resumes, and the object takes off slowly. (Donald B. Hanlon, “Occupants Observed at Norco,” *Flying Saucer Review* 14, no. 3 (May/June 1968): 15–16; Clark III 267)

April — 2:00 p.m. Two male witnesses watch through binoculars a vividly white object hovering high in the sky for 10 minutes above Kwajalein Atoll in the Marshall Islands. A cone-shaped mist appears on its leeward side, then the object shoots straight up and disappears. (Jessup, *The UFO Annual*, Citadel, 1956; Nukes 114)

April — The Royal Australian Air Force issues its first statement of policy on UFOs, admitting that it does attempt to evaluate reports: “There is no doubt that reliable observers have reported sightings which today are inexplicable within the resources available to the RAAF.” (Project 1947, “The Former Air Board / Department of Air / Current RAAF”)

April — Oak Park, Illinois, contactee Dorothy Martin has been channeling entities through automatic writing. One introduces himself as Sananda, who lives on the utopian planet Clarion. She begins typing up the messages in newsletters and distributing them to readers, including Charles and Lilian Loughead from Detroit, Michigan, whom she met in March. (Clark III 717)

April 4 — Keyhoe meets with Ruppelt at the Hollywood Roosevelt Hotel in Los Angeles, California, and shares recent UFO reports. Ruppelt agrees to write a letter supporting the claim that Keyhoe has used genuine ATIC reports for his book. (Keyhoe, *FS Conspiracy*, pp. 116–120)

April 4–5 — Contactee George Van Tassel holds the first Giant Rock Interplanetary Spacecraft Convention at Giant Rock, a huge boulder in the Mojave Desert near Landers, California. Speakers include Orfeo Angelucci, Truman Bethurum, Daniel Fry, and George Hunt Williamson. It draws a crowd variously estimated at 2,500–6,000. (“Interplanetary Spacecraft Convention Draws 6,000,” *San Bernardino County (Calif.) Sun*, April 5, 1954, p. 9; Clark III 531, 717)
April 5 — Keyhoe appears on The Betty White Show and asserts that, contrary to what the Air Force claims, some UFO reports are kept secret. (Keyhoe, FS Conspiracy, pp. 117–118)

April 7 — Leonard H. Stringfield publishes the first issue of CRIFO Newsletter. (CRIFO Newsletter 1, no. 1 (April 7, 1954; Clark III 1114)

April 7 — 11:05 p.m. US Navy sailors and Marines, as well as nuclear scientists from Los Alamos and Sandia Laboratories in New Mexico, are aboard the AEC flagship USS Curtiss cruising between Bikini and Enewetak atolls in the Marshall Islands just hours after the Castle Koon thermonuclear test on Bikini. An unidentified oval-shaped luminous object, yellowish-orange in color, passes silently over the ship from bow to stern, traveling at a high rate of speed and low altitude. Once it is clear of the ship, the object performs some zigzag maneuvers before racing away at high speed. (Nukes 107–109)

April 8 — 4:30–5:00 p.m. Lelah H. Stoker of 3121 N. Sheridan Road, Chicago, Illinois, sees a brilliant white round-topped disc, parachute-shaped, with a humanoid suspended beneath it, skim back and forth over the water of Lake Michigan. Stoker calls the Coast Guard. A cutter appears after 10 minutes, then the UFO approaches the shore. Stoker sees a short human-like occupant in a green, tight, one-piece suit suspended below the object. It gets out in undergrowth along the shore then walks around. When the cutter gives up searching, the occupant returns to the object which moves back over the lake then takes off at high speed to the east. (NICAP, “Lady Observes Saucer / Small Entity Gets Out”; Clark III 270; Sparks, p. 211)

April 11 — Ruppelt’s letter to Keyhoe states that the request to clear classified UFO reports came from both AF Intelligence and the Office of Public Information, after which his superiors cleared them: Keyhoe has correctly quoted the ATIC material; the Utah film analysis is classified; a 1953 letter from Al Chop to Henry Holt & Co. attacking the “silence group” is quoted accurately; and except in a very few cases, ATIC rejects Donald Menzel’s explanations of halos, sundogs, and mirages for UFOs. (Keyhoe, FS Conspiracy, pp. 119–120, 307–308)

April 14 — Night. Capt. John M. Schidel of United Air Lines Flight 193 is forced to make a sharp climbing turn in order to avoid colliding with an unknown object over Long Beach, California. One passenger (Coles Barber) is thrown to the floor and suffers a knee fracture, and stewardess Naomi J. Penaat breaks an ankle. The object is only in sight for 2 seconds. (“Two Injured As Airliner Banks in Sudden Turn,” Los Angeles Times, April 16, 1954, p. II-3; Keyhoe, FS Conspiracy, pp. 130–132)

April 18 — Colin McCarthy and two other men are driving an Austin sedan in the Australian outback near the border of Western Australia and South Australia when a UFO begins pacing them. They snap some 200 photos and take some ciné film of the object. Shortly after they report the incident, a helicopter suddenly appears and lands in front of their car. An RAAF officer gets out, walks over to their car, and confiscates the photos and film. They are never returned. (Stan Seers and William Lasich, “North Queensland UFO Saga, 1966,” Flying Saucer Review 29, no. 1 (October 1983): 20–21; Good Above, p. 163)

April 18 — Airline pilot William B. Nash writes to his friend Capt. William Joseph Hull about the emphatic denials of UFO reality issued by the Air Force shortly after his March 23 speech. He reveals that in August 1952 he was participating in a TV panel in New York City when someone in the WJZ-TV studio said he had just gotten back from Washington, D.C., where he has been given the “whole story” about the National Airport sightings. He claims the Air Force had operated a radio found in a retrieved saucer and that had caused the flurry of sightings. Nash also admits hearing rumors, especially one from syndicated aviation columnist Robert S. Allen, about a pro-UFO report that USAF was going to release in the fall of 1952 but never did. (Michael Hall, “Was There a Second Estimate of the Situation?” IUR 27, no. 1 (Spring 2002): 11–12)

April 22 — 2:00 p.m. USN Seaman Apprentice James B. Stephens Jr. and Seaman Bernard G. Klein Jr., are driving a vehicle on the Naval Outlying Field San Nicolas Island, California, when they see a 4–6-foot long, gray, cigar-shaped object with a pointed nose traveling just above the ground on a near-parallel course. The object suddenly hits the ground, sends up a cloud of dirt, and disappears from sight. They stop and search for 20+ minutes but find nothing. (NICAP, “April 22, 1954: San Nicholas Island, Calif.”; Sparks, p. 212)

April 22 — 10:30 p.m. Six workers from the Reynolds Metals plant in Jones Mills, Arkansas, are waiting on a carpool near Pearcy, to go to work when they see a gleaming white ball about 10 feet in diameter float 50 feet above a house. It appears alternately as a sphere and an oblong, and sometimes circles and sometimes hovers above the house for a total of 20 minutes. One man claims it approaches him to within a few feet, causing him to duck behind a car. One of the vehicles has a spotlight that they try to point at the object, but it always avoids the beam. (Hot Springs (Ark.) Sentinel-Rhiew, April 23, 1954, pp. 1, 3; “Fire Ball Sighted in Arkansas Skies,” Montgomery Alabama Journal, April 23, 1954, p. 11)

Late April — Afternoon. Roger Mougeolle and Gilbert Doridant are logging in a clearing in a forest area near Bois-de-Champ, Vosges, France, when they hear a noise above them “like the sound of a train passing over a metal bridge.” They then see three metallic, cigar-shaped objects silently approaching them from over a nearby hill.
Two pass over them, but the third slowly descends above their clearing and stops only a few feet from the ground. It is over 600 feet long. Doridant flees, but Moutegol walks toward it and touches it. The object is smooth, cold, and hard like steel. He touches it with his woodsmen’s axe, and he is instantly thrown about 18 feet away toward the base of a large rock. He feels paralyzed for a few minutes, but the object ascends and disappears, and he can move again. (Joël Mesnard, “The ‘Steel Airship’ at Bois-de-Champ (April 1954),” Flying Saucer Review 32, no. 5 (August 1987): 16–19)

April 29 — 10:11 p.m. An unidentified illuminated object is seen above the Second Army Radio Station, Fort George G. Meade, Maryland, by the supervisor radio operator and two coworkers, Cpl. Flath and Pfc. Hough. Described as round, the color of the sun, and 3–4 times the size of a star, the UFO appears in the southwest, blinking on and off. As it reaches the station, it stops blinking and disappears by going straight up. The sighting lasts 7 minutes. (Loren E. Gross, UFOs, a History: 1954, January–May, The Author, 1990, p. 86; Good Above, p. 281)

May 1 — 11:55 p.m. A large explosion is heard, felt, and seen over an 8-mile area near Logan, Utah. The blast nearly upsets cars, throws open heavy doors, and sends an earthquake-like shock through the area. Some people report seeing a glowing ball before the explosion; other witnesses report a flash of light at ground level. Lincoln LaPaz investigates, along with J. Stewart Williams and Clyde T. Hardy at Utah State Agricultural College [now Utah State University]. LaPaz says it is either a falling object of an explosive nature or buried high explosives set off by pranksters. A crater 16 feet in diameter and at least 6 feet deep is found, but no debris, even though LaPaz digs down 25 feet for five days. Nearly 50 years later, Theron Blazzard admits to the Logan Herald-Journal that as a geology student at Utah State he had detonated some dynamite at the spot because he had to dispose of it in order to move out of state. (“Meteor Sought in Crater after Logan Explosion,” Salt Lake Tribune, May 3, 1954, p. 21; Keyhoe, FS Conspiracy, pp. 138–139; Wilkins, FS Uncensored, Citadel, 1955, pp. 223–224; “Friday Finishers: When Meteor Mania Struck Cache Valley,” Logan (Utah) Herald-Journal, November 30, 2018)

May 5 — 4:45 p.m. Sydney Baker is at a radar post in the RAAF Woomera Range Complex in South Australia when he notices a gray, circular object at 60,000 feet maneuvering around an English Electric Canberra aircraft he is monitoring from about 35 miles away. It appears to be traveling three times as fast as the Canberra. He watches it for about 5 minutes before it shoots out of sight to the south at about 3,600 mph. The same object is apparently tracked on Woomera radar at approximately the same time. (NICAP, [case documents]; Bill Chalker, The Oz Files: The Australian UFO Story, Duffy and Snellgrove, 1996, p. 85; Swords 381–383)

May 7 — Naval radar around Washington, D.C., tracks a huge object maneuvering at 90,000 feet and moving down to 15 miles altitude. (Keyhoe, FS Conspiracy, pp. 144–145)

May 8 — George King is washing dishes in his flat in Maida Vale, London, England, when he receives a psychic message telling him that he has been chosen to be the voice of the Interplanetary Parliament. Several days later, while he is in a meditative trance, an Indian yoga master enters his flat and tells him he has been selected to act as the Primary Terrestrial Channel for messages from cosmic intelligences who are visiting Earth. (Douglas Curran, In Advance of the Landing: Folk Concepts of Outer Space, Abbeville, 1985, p. 63)

May 12 — 4:45 a.m. Three USAF Air Policemen (A/1C Mason W. Augst, A/1C George F. Wright, and A/1C Elmer A. Crver) are standing guard next to a hangar at National Airport in Washington, D.C. They see a formation of two UFOs fly over the Capitol building, and again at 5:15 a.m. and 6:10 a.m. The objects are glowing white. They appear just above the horizon to the northeast in a straight line, make a 90° turn, then move away to the south. Each pass takes 45 seconds. (Loren E. Gross, UFOs, a History: 1954, January–May, The Author, 1990, p. 94; Sparks, p. 212; Edwards, FS—Here and Now!, Lyle Stuart, 1967, pp. 84–85)

May 12 — 4:00 p.m. White, silky filaments fall in strands averaging 30 feet in length over Shepparton, Victoria, Australia. A witness gathers some and, although they become wrinkled, they do not disintegrate. An analysis indicates in is a “pure white, silky, odorless, warm on touch like cotton, and different from cobwebs.” The threads are not sticky and stretch easily. It resembles raw silk or nylon, is not water soluble, and burns rapidly. (Keith Basterfield, “Angel Hair: An Australian Perspective,” IUR 27, no. 1 (Spring 2002): 6–7; Brian Boldman, “Angel Hair Physical Analyses: A Review,” JUFOS 9 (2006): 101)

May 14 — Around 12 noon. A flight of Marine Reserve jets led by Maj. Charles Scarborough is headed north near Dallas, Texas. At a point 6 miles west of the city, Scarborough sights 16 unidentified objects in groups of four, dead ahead but at higher altitude, 15° above. He radios Capt. Roy L. Jorgensen, whose jet he has in sight by its contrail. Jorgensen, at a higher altitude, sees the UFOs below his left wing. Just as the two pilots try to box in the UFOs, Scarborough sees them fade from glowing white to orange and disappear, apparently speeding away due north. Triangulation shows that the UFOs were at about 32,000 feet. (‘4 Jet Fighters Report Race with ‘Saucers’ over
Dallas,” Dallas (Tex.) Times Herald, May 18, 1954; NICAP, “Four Navy Fighters Encounter 16 UFOs”; UFOEv, p. 32; Sparks, p. 213)

May 15 — Gen. Nathan F. Twining, USAF Chief of Staff, speaking at an Armed Forces Day dinner at Amarillo AFB [now Rick Husband Amarillo International Airport], Texas, says that the Air Force has the best brains in the country working on the “flying saucer problem.” He adds that about 90% of the reports are pure imagination, with the rest unexplained. (“Air Force Looks into ‘Saucers,’” Miami (Fla.) Herald, May 17, 1954, p. 38; Keyhoe, FS Conspiracy, pp. 145–146)

May 18 — Frank Edwards mentions CRIFO on his radio program, and within a week Stringfield gets 6,000 letters. (Stringfield, Situation Red, Fawcett Crest, 1977, pp. 10–11)

May 20 — FBI officials recommend that Attorney General Herbert Brownell Jr. authorize FBI break-ins to install bugs during national security investigations. The FBI would seek the Attorney General’s prior approval, as with wiretaps. Brownell concurs, but concludes that he “would be in a much better position to defend the Bureau in the event there should be a technical trespass if he had not heretofore approved it.” His directive empowers the FBI to break into homes and offices and install surveillance microphones without having to notify him or obtain advance approval in each case. The FBI has carte blanche on this until 1965. (Bernie Horowitz, “Wiretapping and J. Edgar Hoover,” Unredacted, December 20, 2010)

May 24 — 12:25 p.m. While flying on a photographic mapping mission 10 miles west-northwest of Richmond, Indiana, in a B-17, USAF Maj. Leo N. Brubaker observes and photographs a bright object below the plane for 45 seconds. The aircraft is flying at an altitude of 18,500 feet at 253 mph. The speed of the object is estimated at 506 mph. The object travels six miles at that speed. The photos are taken with a USAF T-11 mapping camera. Brubaker denies the object is a sundog. (NICAP, “B-17 Photographic Mission Case”; Sparks, p. 213)

May 29–31 — The first conference of European and North American political, business, finance, academic, and media leaders later to become known as the Bilderberg group, meets at the Hotel de Bilderberg in Oosterbeek, Netherlands. Its agenda, originally to prevent another world war, is now defined as bolstering a consensus around free market Western capitalism and its interests around the globe. The first meeting is initiated by several people, including Polish politician-in-exile Józef Retinger who, concerned about the growth of anti-Americanism in Western Europe, proposes an international conference at which leaders from European countries and the United States would be brought together with the aim of promoting Atlanticism. Retinger approaches Prince Bernhard of the Netherlands who agrees to promote the idea, together with former Belgian prime minister Paul van Zeeland and the then-head of Unilever, Paul Rykens. (Wikipedia, “Bilderberg meeting”)  

May 30 — 12:25 a.m. David Reese, Christopher Muir, and four others are at the doorstep of a house in East Malvern, Victoria, Australia, when they see an orange, oval-shaped UFO appear in the sky at close range. The UFO maneuvers in a downward curve and then pulls up. A cloud of yellow smoke and flame is seen at the rear. Three of the witnesses see shapes that look like human-shaped shadows inside the craft. (Bill Chalker, The Oz Files: The Australian UFO Story, Duffy and Snellgrove, 1996; UFO Evidence, “Human Figures Seen in Saucer”; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 January–May, Supplemental Notes, The Author, 2002, pp. 46–50)

Summer — George Hunt Williamson spends a few months in Noblesville, Indiana, working at Soulcraft Publications, run by mystic and fascist William Dudley Pelley. Mostly he contributes UFO news for the magazine, but some of Pelley’s anti-Semitic attitudes creep into Williamson’s later writings. (Clark III 1285; Zirger and Martinelli, The Incredible Life of George Hunt Williamson, Verdechiari, 2016, pp. 100–103)

Summer — Late night. A young girl in Arbutus, Maryland, wakes up when a bright light shines into her bedroom window. Looking outside, she sees a triangle of brilliant white lights parallel to the ground, illuminating everything, hanging in the air, and pointing directly at her. All of a sudden they are gone. For the next two days, she has a fever that forces her to stay home from school. (Michael D. Swords, “Timmerman’s Triangles,” IUR 29, no. 2 (Summer 2004): 17)

June 1 — 9:30–9:40 a.m. TWA pilot Capt. Charles J. Kratovil, copilot W. R. Davis, and flight engineer Harold Raney, on a Paris to New York TWA Constellation heading southwest, spot near Boston, Massachusetts, “a large, white-colored disc-like object” overhead, occasionally losing it behind overlying clouds. Flying into west-southwest headwinds at 300 mph, they conclude it cannot be a balloon, and radio Boston airport control tower, which tells them jets are scrambled. They then see the object at about 10,000 feet higher than their 10,000 feet altitude but cannot close with the object. (NICAP, “TWA Crew Spot White Disc / Kratovil Case”; Sparks, p. 214; James E.
June 1 — The Air Force announces that it only received 87 UFO sightings in January–April. (“Most ‘Saucers’ Explainable,” Traverse City (Mich.) Record-Eagle, June 1, 1954, p. 5)

June 5 — 6:23 p.m. Janette Brown, 16, is standing on Princes Highway (M1) at Dandenong, Victoria, Australia, when she hears a loud drumming noise. A large, dark cylinder, about 30 feet long and 15 feet high with a canopy and window on top and a window at each end, appears above a nearby factory. She shines a flashlight on it, and it spins toward her. It hovers about 60 feet away. Her friend, Jeanette Johnston, 13, arrives and watches it before it disappears behind trees. Janette’s wristwatch stops, although it starts running again when it is demagnetized. The case is investigated for the RAAF by University of Melbourne physicist O. H. “Harry” Turner. (UFO Evidence, “Teenage Girls See Saucer”)

June 7–8 — PIO Capt. Robert White at the Pentagon repeats the 87 reports statistic from June 1 and counters that reports are at a three-year-low because of less publicity. Stringfield’s colleague, Cincinnati, Ohio, businessman Tom Eickhoff, storms into the office of ATIC Deputy Commander of Intelligence Col. John O’Mara and demands that ATIC press legal action against contactees Truman Bethrum, George Adamski, and George Hunt Williamson. O’Mara replies that these people are obvious hoaxers and need no special action. But he lets slip that USAF fighters regularly carry movie cameras to take photos of UFOs. Eickhoff says that is a big waste of money if there is nothing to UFOs. O’Mara then states to Stringfield the next day that the Air Force actually receives 700 UFO reports a week, the 87 figure only applies to cases under “special analysis,” over 1,000 leading scientists are working on government UFO projects, the material used by Keyhoe in his book was not cleared through official channels, and the Utah film exists but only shows conventional objects. (Keyhoe, FS Conspiracy, pp. 157–160; “700 ‘Saucer’ Sightings Weekly Reported to Air Force,” CRIFO Newsletter 1, no. 4 (July 2, 1954): 1; “Proof of Air Force Cover-Up,” CRIFO Newsletter 1, no. 4 (July 2, 1954): 1–2; Stringfield, Situation Red, Fawcett Crest, 1977, pp. 85, 167–168; Frank Edwards, FS Serious Business, Bantam ed., 1966, pp. 137–138; Frank Edwards, Flying Saucers—Here and Now! Lyle Stuart, 1967, p. 86)

June 8 — Contactee Frances Swan of Eliot, Maine, has been in telepathic contact with Affa, a spaceman from Uranus, since 1954. She manages to impress her next-door neighbor, retired Adm. Herbert B. Knowles, sufficiently for him to write Rear Adm. Carl F. Espe, head of the Office of Naval Intelligence. He encloses some of Affa’s transcribed messages and suggests that ONI try to communicate with Affa through Band CMM-306, repeating the signal M4M4 AFFA. Two ONI officers, Captains John Bromley and Harry Baltazzi, visit Swan and through her interview Affa, who agrees to communicate with them by radio on June 10. When that does not happen, Espe writes to Knowles saying that ONI will pursue the matter no further. He turns the letters over to the Navy’s Bureau of Aeronautics. (Clark III 1118)

June 12? — Keyhoe and Edwards find out about the O’Mara interview, and Edwards puts it on his radio broadcast, generating more press calls to ATIC. Capt. Charles A. Hardin, head of Blue Book, states that “Colonel O’Mara’s words were misinterpreted. What he meant to say was that if all the sightings were reported to the Air Force, they would total about 700 a week.” (Keyhoe, FS Conspiracy, pp. 157–160; Loren E. Gross, UFOs, a History: 1954–June-August, The Author, 1990, pp. 11–14)

June 12 — 11:30 p.m. Walter L. Tatge of Hyattsville, Maryland, observes a large bluish-green oval or round object circling and hovering in the sky for at least 45 minutes. The Baltimore GOC Filter Center allegedly tracks an object on radar over Wilmington, Delaware, for an hour. Two F-86D fighters are scrambled but cannot reach it. (NICAP, “Object-Tracked / Jets Scrambled”; Keyhoe, FS Conspiracy, pp. 161–162)

June 14 — A UFO is again tracked over Wilmington, Delaware, flying in a rectangular course at 75,000 feet for more than 2 hours. (Keyhoe, FS Conspiracy, pp. 161–162; UFOEv, p. 66)

June 18 — 7:35 p.m. Monsignor Émile Élé Verhille, Apostolic Vicar of Fort-Rousser [modern Owando, Republic of the Congo], reports in the Brazzaville newspaper La Semaine de L’afik that he and others had seen a UFO over Laketi Mission in the Mossaka District. A luminous globe arrives from the north and heads towards Laketi. It suddenly stops, rises, and falls, stops again, gyrates, and seems to shake. A noise like that of an airplane engine is heard until the moment when it also stops. Seen through binoculars, the object has a dark mass in the center with light rays of unequal length coming out of it alternately. It goes through its maneuvers for 15 minutes then shoots back over the northern horizon. (ClearIntent, p. 134)

June 21 — 1:00 a.m. Near Ridgeway, Ontario, Guy and Valeria Baker see a hovering, domed disc about 40 feet in diameter with several rotating, flashing lights around the rim. They drive to get a closer look. The object crosses...
the road in front of them and lands in a field. The car stalls, and they watch as the lights move around the area. They find a large, brown, circular spot in the pasture where the disc has been resting. (Schopick, pp. 6–7; Mark Rodeghier, *UFO Reports Involving Vehicle Interference*, CUFOS, 1981, p. 2; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 June–August, Supplemental Notes*, The Author, 2002, pp. 12–13)

June 21 — 8:14 p.m. An unidentified radar blip located over central Vancouver Island, British Columbia, responds to coded IFF Mode 1 signals from the Naselle Air Force Station radar site [now Fort Stevens Historic Site] in southwestern Washington State, and instantly transmits back the correct coded responses. The blip is tracked on 3 ground radars at both Naselle and McChord AFB [now Joint Base Lewis-McChord] in Tacoma. The UFO splits into two (or consists of two objects in close formation), separates, and outmaneuvers one of two F-86D jet interceptors, both of which also radar-tracked the UFOs. Possible visual sightings of the radar target are called in to sheriff’s offices and news media. The case is forwarded to Project Blue Book, but it does not appear in its files. (NICAP, “Coded IFF Signal from UFO”, Sparks, p. 215)

June 23 — 8:00 or 9:00 p.m. Pilot Capt. Harry Roe Jr., flying an Ohio Air National Guard F-51 Mustang fighter at 240 mph from Dayton to Columbus, Ohio, sees a round white object with no exhaust trailing him in the same position a little above and behind at close range, possibly detected on airborne radar. Roe maneuvers to try to lose it or collide with it, but the UFO remains in relatively the same position until it departs to the southeast. S/Sgt Maynard Harris at Wright-Patterson AFB picks up the plane and the UFO on radar. He scrambles two F-86s in the Columbus area to check it out, but they see nothing. At 10:00 p.m., Maj. Frank J. Gshwandtner and 2nd Lt. Robert P. Lommori, flying in the Columbus area in an RB-47E aircraft, observe a white object the size of a baseball at 25,000 feet. The object is extremely fast and makes a gradual turn to begin a slight climb. It then flies out of sight. The duration is 30 seconds. (NICAP, “F-51 Trailed by Object / Lt. Roe Sighting”, NICAP, “Something Follows C-47 and Observed by RB-47 Crew”; Keyhoe, *FS Conspiracy*, pp. 167–168; Sparks, p. 216)

Late June — Some 300 people in West Berlin, Germany, see three silvery UFOs on several occasions. Moving in a zigzag motion and accelerating at high speed. Rudolf Hermes, a director at Tempelhof Airport [now closed], says the witnesses describe the objects as “shiny.” (“Triangle Saucers Reported Seen near Berlin,” *Lancaster (Pa.) Sunday News*, July 4, 1954, p. 19)

June 26 — 12:40 a.m. The Atomic Energy Commission’s National Reactor Testing Station near Idaho Falls, Idaho, is suddenly lit up by a blinding glow that explodes in the night sky. Kelly Brooks and A. L. Taylor say the source of the light remains motionless for a few seconds, then shoots upwards at a tremendous speed. (Keyhoe, *FS Conspiracy*, p. 168)

June 26 — Around 7:30 a.m. A metallic blob is seen high in the sky near Columbus, Ohio. According to a newspaper article, a crew of an airliner is asked to investigate; the crew circles under the object while the 60 passengers take a look. Zanesville Radio says at 5:55 a.m. a round, silvery object is detected on an azimuth of 80°. At 5:35 a.m., an Air Force charter flight, No. 46 AF 23-24 to Wilmington, Delaware, flying at 3,000 feet observes an object in the Zanesville, Ohio, area at approximately 18,000 to 20,000 feet. (NICAP, “Airliner Investigates Strange Object”)

June 27 — The Obninsk Nuclear Power Plant, at the Institute of Physics and Power Engineering in Obninsk, Kaluga Oblast, Russia, becomes the first grid-connected nuclear power plant in the world. The plan achieves criticality on May 6 and now is set up to provide electrical power to Moscow. (Wikipedia, “Obninsk Nuclear Power Plant”)

June 29 — 5:03 p.m. A BOAC Stratocruiser leaves New York City bound for London, England. 30 minutes later, Capt. James R. Howard receives directions from Boston Air Traffic Center to hold his position over the Rhode Island coast. Howard circles for 10–12 minutes, after which Boston tells him to detour over Cape Cod, Massachusetts. Around 11:30 p.m. while crossing at 19,000 feet near Sept-îles, Quebec, Howard, his copilot Lee Boyd, and navigator H. McDonnell see a large cigar-shaped object and six smaller black ovals moving the same speed as his airliner, 265 mph, on a parallel course. The small objects are strung out in a line, changing relative positions but always at the same level. The large object slowly and continually changes shape, “in a way that a swarm of bees might alter its appearance.” They appear opaque, hard-edged, gray in color, with no lights or flames visible. Goose Bay AFB [now CFB Goose Bay], Labrador, orders an F-94 to vector toward the location. Just as Howard is giving the pilot his position, the small objects disappear. McDonnell says they enter the large object. As the F-94 approaches, the large object dwindles in size and disappears. Howard lands at Goose Bay and is questioned by RCAF and USAF officials (McDonnell says they take the flight logs); when he lands in London, the Air Ministry does the same, telling the pilots they viewed a solar eclipse (which took place at 7:00 a.m. on June 30). Howard later hears that there are UFO sightings in Massachusetts while he is in a holding pattern, and he contests in the December 11 issue of *Everybody’s Magazine* that what he saw was solid, not a mirage. Gordon Thayer of the Colorado project identifies the objects as superior mirages, reflections of the “dark terrain below seen against the

June 30 — 2:17 p.m. Johnny Björnulf and Raun Conradi are aboard one of three Scandinavian Airlines planes flying above the Lifjell plateau, Telemark, Norway, to observe a total solar eclipse. Conradi takes some footage through a window on the north (port) side of one airplane. When developed it shows two small light sources that are fairly obvious window reflections, but media coverage causes much confusion about the circumstances under which the film is shot. (E. Graham, “Scandinavian Eclipse Expedition Films U.F.O.s,” Flying Saucer Review 2, no. 1 (Jan./Feb. 1956): 6–7; UFOEv, p. 5; Clas Svahn, “The Björnulf Solar Eclipse Film,” Clas Svahns Blogg, October 6, 2006)

June 30 — 6:50 p.m. Four civilians and several military personnel at Brookley AFB [now Mobile Aeroplex at Brookley] in Mobile, Alabama, see a brilliant silver or white object with short stubby wings approach from the south, circle over Mobile, then depart to the northeast. A radar contact at 6:30 p.m. with a stationary object is evidently unrelated anomalous propagation. (NICAP, “Object with Short Stubby Wings Tracked on Radar”, Sparks, p. 216)

Summer (or Summer 1955) — Evening. Dianne Vezza and two other teen girls are sitting in a backyard in Marietta, Ohio, when they see a star-like light moving at great speed. Suddenly it comes to a dead stop and two other stars speed in and come to an abrupt stop. The three objects form a perfect triangle. An oval object then becomes visible as the starlike objects disappear. Two other oval objects take up the same triangular position with the first. They then begin a light display with wildly colored lights that continues for a few seconds. The lights go out, and each of the objects beams a bright white light to the center of the triangle. The beams meet in the center for a few seconds and then go out. The oval objects disappear and the starlike lights return, but they soon speed off in different directions faster than a jet. The display is completely soundless. (Michael D. Swords, “Another Type of UFO Display,” IUR 30, no. 2 (January 2006): 11)

July — A saucer-buff zine titled Nexus is first published by James W. Moseley in New Jersey. (Nexus 1, no. 1 (July 1954); Clark III 1032)

July 2 — 11:05 a.m. An F-94C Starfire takes off from Griffiss AFB [now Griffiss Business and Technology Park] in Rome, New York, on an operational training mission. It is only a few miles out when the Griffiss control tower orders the plane diverted to intercept an unidentified aircraft. When Pilot Lt. William E. Atkins cannot find the aircraft, the controller tells him about a second unidentified aircraft, which Atkins identifies as an Air Force C-47. The control tower vectors him back to the first target. Atkins cannot see any aircraft above the cloud cover, so he descends below the clouds. During the descent, a furnace-like heat fills the cockpit and the engine plenum chamber fire warning light goes on. Atkins shuts the engine off, but the light remains on. Atkins and his radar man, Henry F. Coudon [or Condon], eject, landing without injury. At 11:27 a.m., the plane crashes into the town of Walesville, west of Utica, striking a building and an auto, killing 4 people, and injuring 5 others. Atkins tells reporters about the heat but clams up under Air Force pressure. The official investigation confirms the fire was caused by a malfunction of the fire detector circuit. There is no evidence of an in-flight fire. Kevin Randle suspects a balloon is responsible for one of the radar targets, because an apparent balloon is sighted later, from 6:00 to 10:00 p.m., in a 25-square-mile area from Rome to Frankfurt, New York. (“Abandoned Jet Kills 3 in Car, 1 in House,” New York Times, July 3, 1954, pp. 1, 6; “Jet Plane Crashes in Flames, Kills 3 in Auto, One in House,” Syracuse (N.Y.) Post-Standard, July 3, 1954, pp. 1, 3; NICAP, “The Walesville Incident / F-94 Crash”; Kevin D. Randle, “Walesville Revisited,” IUR 25, no. 3 (Fall 2000): 3–5; Frank J. Reid, “Keyhoe’s Context,” IUR 25, no. 3 (Fall 2000): 6–7, 28–29; Kevin D. Randle, “Walesville UFO Jet Chase,” A Different Perspective, March 28, 2009; Keyhoe, FS Conspiracy, pp. 174–177; Condon, p. 161; Keyhoe, Aliens from Space, Signet ed., 1974, pp. 22–23; “‘Balloon’ Excites Utica,” New York Times, July 3, 1954, p. 13)
July 3 — Nine green spheres hover, speed away at 2,600 mph, and are tracked on radar at 24,000 feet 20 miles north of Albuquerque, New Mexico. (UFOEv, p. 85)

July 3 — 8:15 a.m. The captain, officers, and 463 passengers of a Dutch ocean liner watch a “greenish-colored, saucer-shaped object about half the size of a full moon” speed across the sky and disappear in clouds. (Ruppelt, p. 237)

July 8 — 9:25 p.m. Amateur astronomer Harold Hill is at his observatory in Orrell, Greater Manchester, England, when he sees a bright star in the southern sky that he at first thinks is a supernova. Soon it resolves itself into a bright, metallic globe with a cluster of 15–20 smaller, dimmer objects moving around. Clouds intervene and when they clear, he sees two bright objects, gyrating and flashing and moving slowly around each other. The objects are at a great altitude, because even through binoculars they have “shown no sensible size.” (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: January 1, 1947–December 31, 1959, The Author, 2003, pp. 80–81; “An Unusual Sky Phenomenon,” Strolling Astronomer 9 (1955): 48)

July 9 — Die Weltwoche in Zürich, Switzerland, publishes two letters by psychologist Carl Jung, who says he has been interested in UFOs since 1946, but he has difficulty comprehending what they might be, since they seem to have both subjective and objective properties. (Clark III 636–637)

July 11 — UK Air Chief Marshal Hugh Dowding states in an article in the London Sunday Telegraph that “I am convinced that these objects do exist and that they are not manufactured by any nation on earth. I can therefore see no alternative to accepting the theory that they come from some extraterrestrial source.” (UFOEv, p. 122; Good Above, pp. 47–48)

July 20 — Two men are chased in their car by a UFO near Oslo, Norway, and stop to observe it. Afterward, one of the witnesses’ watches stops working and the car’s paint changes color. (Vallée, Magonia, p. 207)

July 20–21 — Ruppelt visits the Project Blue Book office at Wright-Patterson AFB in Ohio to gather information for his upcoming book. He is told that all UFO publicity is handled by a lieutenant colonel in Air Force intelligence. He writes in an August 3 letter to Keyhoe: “They claim to have gotten the unknowns down to about 10% but from what I saw this was just due to a more skeptical attitude. The reports are just as good a

July 23 — The US Navy issues a new directive that orders the immediate reporting of UFO sightings (FLYOBPRPTs) to the director of AFOSI, ATIC, commanding officer of Eastern ADC, director of Naval Intelligence, commanding officer of the Eastern Sea Frontier, and the commandant of the Potomac River Naval Command. The directive cites JANAP 146, AFR 200-2, OPNAV 3820, and Directive 3820.2 and is intended to plug leaks coming from navy and marine personnel. It is unpublicized but unclassified, so it threatens disclosure of AFR 200-2, which is still classified. USAF begins work on a new version of AFR 200-2 without the “restricted” label. (Keyhoe, FS Conspiracy, pp. 188–189, 309–311)

July 24–25 — A security officer at the Naval Bureau of Aeronautics develops a personal interest in the Frances Swan contact case and accepts Adm. Knowles’s invitation to Eliot, Maine, to visit with Swan. On his return, he gives the FBI a report on his visit. On July 29 an FBI agent interviews him, and on August 9 J. Edgar Hoover sends an account of the interview to Rear Adm. Carl F. Espe and to the Army’s Assistant Chief of Staff, G-2. Hoover writes, “No further action is being taken in this matter by this Bureau.” (Clark III 1118)

July 25 — Policeman J. H. Flanagan and friends see 6 UFOs over Enkeldoorn [now Chivhu], Zimbabwe. Nearly stationary, they are visible for about 20 minutes and disappear when night falls. (ClearIntent, p. 134)

July 28 — Wilbert Smith, at the invitation of retired Navy Adm. Herbert B. Knowles, visits contactee Frances Swan in Eliot, Maine, his neighbor. Her two space friends, Affa and Alomar, direct Swan to gather information for his upcoming book. He is told that all UFO publicity is handled by a lieutenant colonel in Air Force intelligence. He writes in an August 3 letter to Keyhoe: “They claim to have gotten the unknowns down to about 10% but from what I saw this was just due to a more skeptical attitude. The reports are just as good a

July 29 — Capt. Jan P. Bos and five officers of the Dutch ocean liner Groote Beer see a moon-like object rising out of the Atlantic Ocean 90 miles east of Cape Cod, Massachusetts. They watch it through a sextant, allowing them to
estimate its rate of ascent at a half degree in 2 minutes. (Loren E. Gross, *UFOs, a History: 1954, June–August*, The Author, 1990, p. 60)

August — 10:30 p.m. An astronomer sees a bright white disc, 20 times the apparent size of the moon, moving from west to northeast at a high rate of speed over Park Hills, Kentucky. The seemingly solid object is about 100 feet in diameter and flying at an altitude of 500 feet. It disappears abruptly after 3–4 seconds. (“Astronomers and UFO’s: A Survey, Part 2, Sightings,” *IUR* 2, no. 4 (April 1977): 3)

August 1 — 11:15 p.m. Desmond O’Reilly and others at Templeogue Tennis Club in Dublin, Ireland, watch an object fly over the Dublin Mountains in the direction of Howth. Initially he thinks he is looking at a meteor because he can only see it when it passes by gaps in the clouds. He watches it split into two pieces. (*Irish Times*, August 5, 1954; Shane Cochrane, “Ireland vs. the Flying Saucers,” *Fortean Times* 317 (September 2014): 54)

August 1 — 11:30 p.m. P. D. McCormack sees a bluish-white object flying at 1,000 mph at an altitude of 5,000 feet above the Dublin Mountains, Ireland, to the south. The trails seem to “fall away from the object at each side.” Two men fishing in the River Dargle near Powerscourt, County Wicklow, see a rocket-shaped object dropping balls of fire. At 11:35 p.m., on the North Beach in Rush, County Dublin, Mrs. W. Gray and others watch an object “like a bright electric bulb” fly overhead from the mountains and out to sea. Possible meteor. (*Irish Times*, August 3, 5, 1954; Shane Cochrane, “Ireland vs. the Flying Saucers,” *Fortean Times* 317 (September 2014): 54)

August 2 — The US Joint Chiefs of Staff direct the establishment of a Continental Air Defense Command. Secretary of Defense Charles Erwin Wilson announces the command’s formation publicly later in the month to integrate “the air defense capabilities of the three military departments into an air defense system responsible to the control of one military commander.” (Wikipedia, “Continental Air Defense Command”)

August 4 — 11:00 p.m.–12:00 midnight. Ten firemen and their chief observe two flying saucers over The Hague, Netherlands. The objects are seen in the clear night air at a high altitude. They move at incredible speed, at times remaining motionless for as long as 30 seconds. They are described as flat ovals with whitish-gray light. All agree that the objects are neither aircraft or balloons. (ClearIntent, p. 134)

August 6 — A bright white ball shoots across the sky over Santa Fe, New Mexico, leaving a luminous trail that persists for 15 minutes. Meteorite expert Lincoln LaPaz says it is not a meteor. It apparently disrupts TV signals and aircraft transmissions, but not ham radio. (Wilkins, *FS Uncensored*, Citadel, 1955, p. 226)

August 7–8 — One of the first UFO meetings in California is held on the slopes of Palomar Mountain, with lectures by George Adamski, Daniel Fry, Truman Bethurum, and Desmond Leslie. (“Palomar Mountain, 1940–1960: From Obscurity to World Fame,” The Adamski Case, September 22, 2019)

August 8 — 3:01 p.m. Project Magnet’s only UFO incident of note occurs when the Shirley’s Bay, Ontario, gravimeter indicates a greater deflection in the gravitational field than a conventional object would cause. Heavy clouds obstruct Wilbert Smith’s view of the sky. (Clark III 1079; “Wilbert B. Smith,” Northern Ontario UFO Research and Study; Good Above, p. 186)

August 10 — The Canadian Department of Transport officially folds Project Magnet but permits Wilbert Smith to continue using its facility on his own time at no expense to the government. Smith continues his work privately until his death in December 1962. (Story, p. 276)

August 11 — Frank Edwards is fired by his sponsor at the Mutual Broadcasting Network, the American Federation of Labor. He had offered to resign on August 7, citing a conflict over the type of material he has been required to report on, including AFL interests and George Meany’s personal outlook. His UFO reportage may or may not be an issue. (Clark III 435; Frank Edwards, “The Plot to Silence Me,” *Fate* 10, no. 6 (June 1957): 17–23)

August 11 — 8:54 p.m. A1C Chase E. Lewis, tower operator at Lawson AFB [now Lawson Army Airfield] in Fort Benning, Columbus, Georgia, sees a strange stationary object in the west. It varies in brightness, changing color from white to red to orange to white again, with seemingly high-speed motions. An Army helicopter piloted by WO R. T. Wade is sent to investigate; he locates the object 20 miles west of Lawson at 2,000 feet. Wade abandons the chase due to low fuel after 2 minutes. At 9:05 p.m., two additional tower operators (including A1C William N. Watson) view the object. A second Army helicopter, piloted by U. S. Tarma, is diverted to the object at 9:27 p.m. He sees it, but it disappears at 9:29 p.m. (NICAP, “Two Helicopters Encounter Venus (CIRVIS)”; Good Above, pp. 284–285; Loren E. Gross, *UFOs, a History: 1954, June–August*, The Author, 1990, pp. 77–80; *Sparks*, p. 219)

August 11 — 8:55 p.m. P. L. Percharde, electrical engineer and assistant manager of the Moeller Shipwrecker Company, of Okinawa, sees a line of blue lights underneath a blue circle with a black center fly over the *SS Docteur Angier* off Yoron-Jima, Japan, and climb, illuminating and agitating the clouds. (Patrick Gross, “Disk Seen from SS Docteur Angier, August 11, 1954”; *Sparks*, p. 219)
August 12 — 2:29 a.m. Four military men on US Army helicopters at Maxwell AFB in Montgomery, Alabama, see a glowing red disc soar around the base tower. There are both ground and air witnesses, as well as radar-visual confirmation. (Good Above, pp. 284–285, 493–494)

August 12 — An updated version of AFR 200-2 is issued by the Department of the Air Force and declassified by Air Force Chief of Staff Nathan Twining. The public can now know that the 4602nd Air Intelligence Service Squadron was brought in to assist ATIC (Blue Book) with preliminary and field UFO investigations, and that USAF considers UFOs to be “any airborne object which by performance, aerodynamic characteristics, or unusual features, does not conform to any presently known aircraft or missile type, or which cannot be positively identified as a familiar object.” It lists the objectives of UFO reporting as: “First as a possible threat to the security of the United States and its forces, and secondly, to determine technical aspects involved.” (Department of the Air Force, “Unidentified Flying Objects Reporting,” Air Force Regulation 200-2, August 12, 1954; Good Above, pp. 489–492)

August 16 — 5:00 p.m. A green ball is seen in the sky over Tananarive [now Antananarivo], Madagascar, and disappears behind a hill. It reappears a minute later and flies over the higher part of Tananarive. When the object flies in front of them, some witnesses see a lentil-shaped device with a silvery metallic aspect enveloped in electric luminous gas. According to Jean-Luc Bruneau, inspector general at the Commissariat à l’Energie Atomique, Gen. Charles de Gaulle is concerned about this sighting and quietly approves having a French study group involved with investigating UFO cases. (“1954, Tananarive, Madagascan: Multiple Witnesses to UFOs,” UFO Casebook, July 30, 2008; Gildas Bourdais, “From GEPAN to SEPRA: Official UFO Studies in France,” IUR 25, no. 4 (Winter 2000–2001): 11; Patrick Gross, “Tananarive, Madagascar, August 1954”)

August 20 — Contactee Dorothy Martin of Oak Park, Illinois, and Charles and Lilian Laughead of Detroit, Michigan, send out a 7-page press release announcing that a geological disaster will cause great environmental changes in North America and Europe. It warns that December 20 will be the last available date for evacuation, as a great flood will strike on December 21. Martin and her followers hope to board a landed flying saucer before doom falls. (Clark III 718)

August 20 — Morning. Edith Jacobsen, 2, and Åsta Solvang, 32, are on a blueberry-picking trip to Øyfjellet, near Mosjoen, Norway, with their uncle, Halvdan Jacobsen. The two sisters wander off to a fen when suddenly they see a man in the distance. They approach him and he smiles and stretches out his palm with it. He has long hair fitting suit with a wide belt. He begins to talk but they can’t understand him. It does not sound like Norwegian, English, German, Spanish, French, or Russian. He takes out a “little mirror” from a pocket and with something like a pencil draws circles, apparently representing planets. He finally indicates he wants the women to accompany him and he takes them to a landed disc in a clearing. It is gray-blue and looks like two giant pot lids put together. He makes a sign to not come too close, then he opens a hatch on the top, crawls in, and shuts the door. The sisters hear a faint humming and the UFO rises while rotating on its own axis. (Gordon Creighton, “Mosjoen: An Early Norwegian CE-III Case,” Flying Saucer Review 34, no. 2 (June 1989): 1–7; Clark III 267–268)

August 23 — 1:00 a.m. Businessman Bernard Miserey has just parked his car in a garage at Vernon, Eure, France, when he notices a sudden illumination. He sees an object like an enormous (300 feet long) cigar standing on end, hovering above the north bank of the Seine River about 1,000 feet away. Suddenly from the bottom of the object comes a horizontal disc that drops, slows, and suddenly dives horizontally across the river at him. It vanishes at a high rate of speed toward the southwest. Three other discs follow in sequence. A fifth disc drops much lower than the earlier ones and remains still for an instant, swaying slightly. During this time the cigar has faded and sinks into darkness. The spectacle has lasted 45 minutes. Two police officers and an Army engineer also see the display. (Clark III 293; Loren E. Gross, UFOs, a History: 1954–June–August, The Author, 1990, pp. 77–80; Sparks, pp. 85–86; Patrick Gross, “The 1954 French Flap,” February 2, 2007; Herbert S. Taylor, “Satellite Objects and Cloud Cigars,” IUR 29, no. 1 (Spring 2004): 4–5)

August 26 — 9:35 p.m. Crowds of people in Bray, County Wicklow, Ireland, see an object traveling at great speed over Bray Head. It is a brilliant blue light, traveling at “2,000 miles an hour” toward the sea before changing direction and moving toward Wicklow. (Irish Times, August 27, 1954; Shane Cochrane, “Ireland vs. the Flying Saucers,” Fortean Times 317 (September 2014): 54)

August 28 — 8:30 p.m. Several USAF fighter pilots pursue a triangular formation of 15 objects near Tinker AFB, Oklahoma City, tracked by ground radar. As the jets approach, the formation breaks, changes to a semicircle, and the objects speed up and vanish to the west. (NICAP, “USAF Fighters Report Formation Tracked by Radar”; Keyhoe, FS Conspiracy, pp. 25–26; Sparks, p. 220)

August 29 — A witness in Mérida, Venezuela, sees a large, intensely yellow, glowing object moving at great speed from west to east. When it reaches the Sierra Nevada de Mérida, it suddenly stops and two disc-shaped blue objects
emerge from it. All three continue to the east and disappear behind buildings. (Lorenzen, *UFOs: The Whole Story*, Signet, 1969, p. 58)

August 29 — 11:05 p.m. First Officer H. G. Gardner and Engineer J. V. D. Whitisy, flying on a Royal Dutch Airlines DC-4, see 3–4 dark, lens-shaped objects over Prins Christianssund radio and weather station, Greenland. They veer north and change position in formation. (NICAP, “Lens-Shaped Objects Veer North”; *Sparks*, p. 220)

August 31 — 7:10 p.m. RAN Lieutenant J. A. “Shamus” O’Farrell is returning to HMAS *Albatross* Naval Air Station near Nowra, New South Wales, after a night cross-country in a Hawker Sea Fury aircraft. After contacting Nowra, O’Farrell sees a very bright light closing fast at one o’clock. It crosses in front of his aircraft, taking up position on his port beam, where it appears to orbit. A second and similar light is observed at nine o’clock. It passes about a mile in front of the Sea Fury and then turns in the position where the first light was observed. According to O’Farrell, the apparent crossing speeds of the lights are the fastest he has ever encountered. He has been flying at 250 mph. O’Farrell contacts *Albatross*, which in turn confirms that it has two radar “paints” in company with him. Radar operator Petty Officer Keith Jessop confirms the presence of 2 objects near the Sea Fury on the GCI remote display. The two lights reform at nine o’clock and then disappear on a northeasterly heading. O’Farrell can only make out “a vague shape with the white light situated centrally on top.” The Directorate of Naval Intelligence at the time writes that O’Farrell is “an entirely credible witness” and that he “was visibly shaken by his experience but remains adamant that he saw these objects.” News of the incident leaks out in December, but the official RAN file remains classified until 1982. (NICAP, “‘Sea Fury’ Encounter”; *Swords* 379–380; James E. McDonald, “Statement on Unidentified Flying Objects,” in *Symposium on Unidentified Flying Objects*, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, p. 70; Good Above, p. 162; An Adelaide UFO Researcher, “The ‘Sea Fury’ Radar Incident Revisited,” 2017; “The Sea Fury Incident,” Australian Disclosure Project, April 30, 2006; Bill Chalker, “The Australian Government and UFOs,” *IUR* 22, no. 3 (Fall 1997): 18–19)

August 31 — Deputy Department of Transport Minister John Baldwin closes the Shirley’s Bay, Ontario, UFO station to save money, although he says Smith can work on his own time. (“Saucer Station Closes,” *The Saucerian*, no. 6 (Spring 1955): 12; Clark III 1079)

September 1 — The Continental Air Defense Command is established, primarily to defend the continental United States against air attack. It is also tasked to support US commanders in the Pacific, Atlantic, Caribbean, Alaska, Northeast, and of Strategic Air Command in their missions to the maximum extent consistent with its primary mission. ADC’s commander, Gen. Benjamin W. Chadlaw, becomes the first CINCONAD, and USAF is designated as the executive agency. (Wikipedia, “Continental Air Defense Command”)

September 2 — Dusk. John Jacob Swaim, 12, is working on a tractor at his family’s farm in Coldwater, Kansas, when he sees a small man about 3 feet tall with long, pointed ears and a pointed nose standing in a crouched position about 20 feet away. It is dressed in a shiny garment and has two cylinders strapped on its back. The being floats to a nearby UFO hovering 5 feet from the ground. The next day his father and Sheriff Floyd Hadley find pear-shaped footprints, wide at the toes and tapering to a narrow heel. (“Little Man in Kansas Wheat Field,” *The Saucerian*, no. 6 (Spring 1955): 12–13; Clark III 270–271; Curt Collins, “A Flying Cucumber Comes to Kansas, Sept. 1954,” *The Saucers That Time Forgot*, February 23, 2018)

September 3 — 4:30 p.m. USAF Maj. Robert J. Waste and the 9-man crew of his B-47 bomber are flying at 25,000 feet in the vicinity of Dallas, Texas, on their way to Barksdale AFB in Bossier City, Louisiana. Carswell AFB [now Naval Air Station Joint Reserve Base Fort Worth] in Texas directs them to be on the lookout for unusual objects. The crew discovers they are being paced by a missile-shaped object only 100 feet overhead that is slightly larger and longer than their own fuselage. It has two rows of oval-shaped portholes along the sides and an orange exhaust. The bottom of the object seems to be glowing. After pacing the B-47 a short time, it shoots ahead and zooms upward at incredible speed. Carswell tells them to pursue, but they can’t keep up. The UFO then descends to within 300 feet of the bomber and begins circling it. The UFO stays with the plane, pacing it above and below, and performing figure-eights and other maneuvers for over an hour. Two other B-47s in the squadron are behind the lead bomber and also view the object. The UFO finally shoots upward and disappears again. Waste takes 32 frames of 35mm color film of the UFO with his personal camera, but his film and that of his copilot is confiscated during a 3-day debriefing at Barksdale. (Paul Cerny, “Close Encounter at 25,000 Feet: Government Coverup,”: *IUR* 8, no. 5 (Sept./Oct. 1983): 6–7)

September 7 — 12:30 a.m. Robert Chovel and two others are driving home from the theater in Hirson, Aisne, France, when they see a luminous red-orange disc flying above the railroad tracks. It stops suddenly across the road, 900–1,200 feet from the ground. When the car reaches the bridge at Buire, the object shoots away at great speed. (ClearIntent, p. 134; Patrick Gross, “The 1954 French Flap,” May 12, 2003)
September 7 — 7:15 a.m. Two bricklayers, Emile Renard, 27, and Yves DeGillerboz, 23, see a bluish-gray object floating in midair over a field as they are bicycling between Harponville and Contay, Somme, France. It looks like an unfinished haystack “with a plate turned upside down on top of it.” When they try to approach, it takes off. It has a diameter of 33 feet, and they notice it has a kind of door. The observation lasts more than 3 minutes, at which point the object releases some smoke as it departs straight up. (Aimé Michel, *Straight Line*, p. 35; Patrick Gross, *The 1954 French Flap*, March 20, 2003)

September 8 — 11:00 p.m. Thomas Farquhar sees a “large oval-shaped disc,” crackling and hissing, fly over Derryhubbert, County Tyrone, Northern Ireland. He thinks it is about 3 feet wide and flying at a height of 2,000 feet. Daniel McWilliam and James Bingham, in Carrickfergus, County Antrim, see a rocket soar into the sky and explode silently. Mr. L. Hauser is on a boat leaving Belfast when he sees a rocket come up out of the sea and explode when it reaches about 15,000 feet. (*Belfast Telegraph*, September 9–11, 1954; Shane Cochrane, “Ireland vs. the Flying Saucers,” *Fortean Times* 317 (September 2014): 54)

September 9 — 2:20 a.m. Mr. K. M. Gibbons of Nelson, New Zealand, gets out of bed and sees through the window three discs hovering above a mudflat 3 miles away in a V-formation. They radiate a blue-white light from their edges. He grabs a camera with a telephoto lens and takes a photo. After 5 minutes, the discs begin to wobble, tip on edge, then shoot vertically out of sight. Other reports come from the area that morning. The photo shows a blurry oval with a small dark area on top. (UFOEv. pp. 89, 92; Wilkins, *FS Uncensored*, Citadel, 1955, opp. p. 96)

September 10 — 8:30 p.m. Antoine Mazaud is walking home from his fields at Mourieras, north of Bugeat, Corrèze, France, when he is confronted by a helmeted being of average height who makes friendly gestures. It shakes hands with him and embraces him while uttering unintelligible words. Then it goes back into the brush, enters a dark area on top. (*UFOEv.* pp. 89, 92; Wilkins, *FS Uncensored*, 1955, opp. p. 96)

September 10 — Around 10:30 p.m. 34-year-old metal worker Marius Dewilde comes out of his house at Quarouble, Nord, France, to see why his dog is barking. He hears hurried footsteps on his right and with his flashlight sees two creatures just beyond his fence walking in single file toward a dark object sitting on the railroad tracks. The creatures are about 3.5 feet tall with wide shoulders, short legs, and helmets covering large heads. No faces or arms are visible. When he tries to cut them off and gets within 6 feet, he finds himself paralyzed as a powerful orange beam of light is projected at him from a square opening in the dark object. The creatures continue toward the railroad tracks, a door closes, the dark object rises to 100 feet, hovers, and speeds away. Five imprints on three wooden railroad ties are found, made by an object that an engineer estimates must have weighed 30 tons. French police and the French Air Force investigate the case. (Wikipedia, “Marius Dewilde”; Aimé Michel, *Straight Line*, 44–46; Marc Thirouin, “Marius Dewilde n’a pas menti,” *Ouranos*, no. 25 (1960): 20–25; Vallée, Magonia, pp. 17–18, 209; Patrick Gross, “The 1954 French Flap,” July 22, 2004; Jean F. Gilles, “The Bankruptcy of the French UFO Research Body, GEPAN,” *Flying Saucer Review* 28, no. 5 (June 1983): 15–16; Mark Cashman, “Behavioral Classification System for UFO Occupants,” *IUR* 24, no. 1 (Spring 1999): 18)

September 12 or 13 — Late afternoon. A witness is driving a van in the vicinity of Quarouble, Nord, France, when he sees a domed disc descending vertically into a small thicket about 160 feet off the road and land. He can see a kind of gallery around the dome where human-like beings are standing. He stops the car, gets out, and walks toward the object, but when he gets closer the object shines a green ray at him. The disc immediately ascends vertically, then moves gently away. His paralysis ceases. A rush of air shakes him at the time it takes off. (Marc Thirouin, “Marius Dewilde n’a pas menti,” *Ouranos*, no. 25 (1960): 25; Patrick Gross, “The 1954 French Flap,” March 23, 2006)

September 14 — 5:00 p.m. Farm worker Georges Fortin, 34, and more than 200 other witnesses in Saint-Prouant, Vendée, France, watch a cigar or carrot-shaped UFO as it emerges from a cloud, tilts toward the ground, hovers, and then elevates its front end quickly into a vertical position. It emits vapor from its lower end. Next, a metallic disc-shaped object flies out, spins around the cigar, and then reenters the vertical object. (Patrick Gross, “The 1954 French Flap,” July 2, 2004; Herbert S. Taylor, “Satellite Objects and Cloud Cigars,” *IUR* 29, no. 1 (Spring 2004): 5; Herbert S. Taylor, “Cloud Cigars: A Further Look,” *IUR* 30, no. 3 (May 2006): 10–12; Clark III 293; Martin Shough and Wim van Utrecht, “Cloud Cigar’ over Saint-Prouant, France,” June 13, 2011)

September 14 — Night. Several people see a circular UFO over Helsinki, Finland. Flying at 2,600 feet, it gives off an intense light and leaves a trail of reddish smoke about 3 times its diameter. It is visible 7 seconds. (ClearIntent, p. 134)

September 15 — Ijapada Chatterjee, the manager of the Kadori mica mine, and hundreds of others watch a disc descend to an altitude of 500 feet over three adjoining villages (Kadori, Barshi, and Mangalda) in the Manbhum district, West Bengal, India. It hovers, then soars upwards at terrific speed, creating a tremendous gust of wind. The UFO
is over a mine that supplies beryllium for the US Atomic Energy Commission. (“800 Biharis See Flying Saucer,” Times of India (Bombay), October 3, 1954; UFOEv, p.124; Project 1947, “UFO Reports, 1954”)

September 16 — 6:00 a.m. The radio transmitter for WMEV in Marion, Virginia, fails as a round, shiny object, 10–15 feet in diameter, flies over the tower toward the east. (“Flying Saucers Are Sighted in Virginia,” Lancaster (Pa.) Intelligencer-Journal, September 17, 1954, p. 44; Schopick, p. 79)

September 17 — Around 4:45 p.m. Hundreds of people see a UFO over Rome, Italy, making staccato thunder sounds as it hovers. It makes a brief dive, returns to position, then zooms straight up, leaving a stream of white smoke behind. Around 5:45 p.m., Lt. Bruno Giustini and other personnel at a military unit at Ciampino Airport in Rome see it as a “half cigar” moving at 179 mph at 3,500 feet. Blue Book receives a teletype about the object, saying it is in the shape of a jellyfish when stationary but in the shape of a cigar when in motion. At 6:49 p.m., radar at Pratica di Mare Air Base south of Rome picks up a target for 20–45 minutes, plotting a slow course along the coast. (Loren E. Gross, UFOs, a History: 1954 September, The Author, 1994, pp. 24–27; 1Pinotti 54–58)

September 17 — 7:15 p.m. A widow named Mellé sees a luminous, orange-yellow, cigar-shaped object near her villa in Gelles, Puy-de-Dôme, France. Her neighbors also see it and watch for 5 minutes. Possible contrail. (Patrick Gross, “The 1954 French Flap,” April 11, 2006)

September 18 — 8:30 p.m. A round glowing UFO is seen approaching then hovering above Danané, Ivory Coast, by many people: a Catholic priest named Fr. Myard, the local chief of police, a Dr. Mariani, a businessman named Sory Diallo, and a group of women. The object moves again at 9:05 p.m., changes from a circle to an ellipse, then flies away. (Aimé Michel, Straight Line, 61; Loren E. Gross, UFOs, a History: 1954 September, The Author, 1994, pp. 28–29)

September 18 — 8:40 p.m. A huge green fireball streaks across Colorado and New Mexico. It zooms above Santa Fe, New Mexico, giving off a blinding glare and takes 30 seconds to cross the sky, disturbing TV and radio signals. Lincoln LaPaz remarks that it does not seem to be an ordinary meteor. (Keyhoe, FS Conspiracy, pp. 198–199; Ruppelt, p. 47; Sparks, p. 220)

September 19 — 10:00 p.m. Yves David, 28, is riding his moped on the D-1 road south of Cenon-sur-Vienne, France, when his headlights begins malfunctioning and he feels a prickling sensation like electricity. He sees a 9-foot-long UFO in the road ahead and a small man in a diving suit coming toward him. It touches David on the shoulder, mutters something incomprehensible, and returns to the object. The object emits a green light that temporarily stuns David before it takes off. (Clark III 269; Patrick Gross, “The 1954 French Flap,” March 20, 2003)

September 20 — 9:00 p.m. Elie Cisterne, a farm worker in the hamlet of La Chassagne, Ussac, Corrèze, France, is returning home on his tractor when he sees a luminous object coming toward him. He jumps off the tractor and lies down, fearful, as the object stops a short distance above the road and hovers silently for several minutes. Cisterne runs away when the UFO starts moving again, flying over his tractor and into the distance. (Patrick Gross, “The 1954 French Flap,” December 29, 2005)

September 21 — 9:45 p.m. A guard at the Santa Maria Airport in Vila so Porto, Azores, sees a 10 x 5-foot, light metallic blue, pecan-shaped object with a clear glass or plastic nose and door, poles or aerials on its nose. It hums or whines as it hovers, then lands vertically 50 feet away. A blond man, 5 feet 10 inches tall, appears, speaks in a strange language, pats the guard on the shoulder, gets in the object, hooks up his harness, pushes a button, takes off with the object’s nose pointed up, then levels off and climbs vertically. (NICAP, “Blond Humanoid Reported by Airport Guard”; Sparks, p. 220)

September 21 — Leonard Stringfield has a private talk with Lt. Col. John O’Mara, USAF Deputy Commander for Intelligence, who tells him that flying saucers do exist—three types, actually: a craft from outer space, a secret US aircraft, and unexplained natural phenomena. (Leonard Stringfield, “Private Talk with Lt. Colonel John O’Mara, Deputy Commander, Intelligence, Confirms the Existence of ‘Flying Saucers.’” CRIFO Newsletter 1, no. 7 (October 1, 1954): 1)

September 22 — Shortly after 8:00 p.m. Mme. Gamundi is driving on the N7 north of Fontainebleau, France, when she notices a light in the sky. She stops and gets out and sees a huge luminous ball hanging motionless. It is reddish and surrounded by a luminous, moving smoke. Suddenly, another bright ball emerges from the bottom, falls, slows, turns, and disappears at high speed. At least 4 other objects emerge. When an aircraft from Orly Airport approaches, the ball rises at high speed and disappears. (Patrick Gross, “The 1954 French Flap,” April 9, 2006)

September 23 — Afternoon. Several residents of Bayonne, Pyrénées-Atlantiques, France, see three mysterious objects high in the sky. One witness, policeman M. Corrions, says they are arranged in the shape of a triangle. Possible helicopters. (Patrick Gross, “The 1954 French Flap,” April 20, 2006)
September 23 — 9:00 p.m. Irene Vrignolles sees a “flying cigar” that lands slowly in a meadow behind a rectory in Lencouacq, Landes, France. (Patrick Gross, “The 1954 French Flap,” December 16, 2005)

September 24 — Hoaxed story of an alleged sighting by Cesar Cardoso at Castelo Branco, Portugal, who sees two entities in shining metal suits emerge from a landed UFO and pick up flowers, shrubs, and twigs. (Patrick Gross, URECAT, December 8, 2006; Mark Cashman, “Behavioral Classification System for UFO Occupants,” IUR 24, no. 1 (Spring 1999): 18)

September 26 — 2:30 p.m. At Chabeuil, Drôme, France, Lucette Leboeuf is walking her dog when she sees a short being wearing a translucent helmet and diving suit. She can see large eyes looking at her through the helmet. The creature approaches her, hopping. The dog barks at it and she runs away and hides in a bush. About 15 feet away, she sees an object about 16 feet in diameter resembling a top with a flat top. It rises above the cornfield and takes off at tremendous speed. Other people notice a circular area about 10 feet in diameter where the ground and grass are tightly packed. Tree branches are broken from above. Shocked, she stays in bed for two days. (Patrick Gross, “The 1954 French Flap”)

September 27 — 8:30 p.m. 12-year-old Raymond Romand and two other children on an isolated farm near Prémanon, Jura, France, see a brilliant rectangular object. He sees two occupants and throws stones at them, but he is thrown to the ground by an “ice-cold invisible force.” Raymond confesses 6 weeks later that he made up the whole story, including making some physical trace marks. (Patrick Gross, “The 1954 French Flap,” March 7, 2003)

September 28 — Around 12:00 midnight. Two witnesses at Rixheim, Haut-Rhin, France, watch an elongated luminous object through binoculars. Ten or more smaller luminous points are circling it in all directions. (Patrick Gross, “The 1954 French Flap,” April 1, 2014)

September 28 — 10:30 p.m. Vintner M. Mercier of Saint-Armand-Montrond, Cher, France, notices that someone has stolen grapes from his vineyard and decides to stay up late and catch the thief. He sees a luminous object descend and three figures emerge. He is then paralyzed and loses consciousness. There is no sign of anything when he wakes up. Probable hoax. (Patrick Gross, “The 1954 French Flap,” April 5, 2007)

September 30 — Gen. Jimmy Doolittle submits a 69-page classified report on clandestine operations directly to President Eisenhower. It negates the Second Hoover Commission’s recommendation on intelligence oversight. It says: “We must develop effective espionage and counterespionage services and must learn to subvert, sabotage, and destroy our enemies by more clever, more sophisticated, and more effective methods than those used against us.” (Richard A. Best Jr. and Herbert Andrew Boerstling, “Proposals for Intelligence Reorganization, 1949–1996,” Report to the US House Select Committee on Intelligence, Congressional Research Service, February 28, 1996, p. 11)

September 30 — Aviation pioneer Eugène Farnier watches an unknown object for 20 minutes above his property at Jouy-sue-Morin, Seine-et-Marne, France. It is swinging back and forth over an area of about 984 feet. Farnier thinks it looks similar to the cigar-shaped object seen at Marignane in October 1952. (Patrick Gross, “UFOs in the Daily Press”)

September 30 — Around 4:30 p.m. Georges Gatay and his team of construction workers at Marcilly-sur-Vienne, Indre-et-Loire, France, see a disc-shaped object on the ground with a small, helmeted being standing nearby. In his hand he holds an elongated object: “It could have been a pistol, or it could have been a metal rod.” On his chest is a light projector. Gatay tries to run, but he finds himself helplessly nailed to the spot. He is thus “paralyzed” during the whole observation until the object leaves. So are his seven coworkers, in a unique case of collective physiological reaction. Almost certainly a hoax. (Patrick Gross, “The 1954 French Flap,” November 8, 2006)

October — London publishing house Frederick Muller publishes a contactee book, Flying Saucer from Mars, allegedly written by one Cedric Allingham, who claims that while vacationing in Scotland in February 1954 he saw a saucer land and talked to its occupant, a human-looking Martian. In 1969, science writer Robert Chapman concludes that no such person as Allingham existed. Christopher Allan and Steuart Campbell allege in 1986 that the book was written by arch-skeptical astronomer Patrick Moore using a pseudonym. His motive was to spoof Adamski and embarrass ufologists, but Moore never admits to the hoax. The photo of “Cedric Allingham” is really Peter Davies, who posed for the photograph with Moore’s reflecting telescope. Davies also edited the book to conceal Moore’s distinctive style of writing. (Cedric Allingham, Flying Saucer from Mars, Frederick Muller, 1954; Clark III 98; Robert Chapman, Unidentified Flying Objects, Barker, 1969; Christopher Allen and Steuart Campbell, “Flying Saucer from Moore’s?” Magonia 23 (July 1986): 15–18; Curt Collins, “Contact! A Close Encounter of the Third Kind from 1954,” The Saucers That Time Forgot, October 13, 2017)

October — Day. RAF pilot Michael Forrest, stationed at RAF Sek Kong [now Shek Kong Airfield] near Hong Kong is scrambled in a de Haviland Vampire ground attack fighter to intercept a target detected by ground radar approaching from China. The target appears to be the size of an aircraft and traveling at high speed with a

October 3 — The Swedish Defense Ministry allegedly requests a secret investigation into UFOs. (Keyhoe, FS Conspiracy, p. 27)

October 3 — 6:45 p.m. Bernard Devoisin and René Condette are bicycling west of Ligescourt in the direction of Vron, Somme, France. They see a glowing orange object shaped like a beehive in the middle of the road. A small entity, about 3 feet tall and dressed in a “diving suit,” is standing close to it. When they get to within 200 feet of it, the object takes off at great speed. (Patrick Gross, “The 1954 French Flap,” May 8, 2004)

October 3 — 7:50 p.m. Mechanic Ernest Delattre, 19, is riding to his home in Croix d’Épine, Oise, France, on his motor scooter when a bright egg-shaped object lands on the left side of the road 45 feet away. He sees short, dark shapes “like potato bags” moving around the object. He speeds up and the UFO changes its color and takes off. (Patrick Gross, “The 1954 French Flap,” March 27, 2003)

October 3 — Around 10:00 p.m. Jean Defiz, a factory worker in Bergerac, Dordogne, France, is returning home on his bicycle when he sees a large shooting star. Later, he sees an intense light in his yard and rushes out to see a disc rise with a whistling sound. It becomes luminous and flies off. A neighbor also sees it and estimates it is 10 feet wide. (Patrick Gross, “The 1954 French Flap”)

October 2 — The French Air Ministry allegedly launches a UFO investigation after 267 citizens come forward to report UFOs. (Wilkins, FS Uncensored, Citadel, 1955, pp. 60–61)

October 2 — 3:45 p.m. A teacher, Mlle. Jaillot, along with 23 schoolchildren, see an elongated object in the sky to the southeast at Les Rousses, Jura, France. It approaches rapidly and they see it is a “cloud cigar.” It switches from horizontal to vertical and hovers. At one point, a gleaming yellow disc emerges from it and moves away. The long object switches to horizontal again and moves away to the northwest. The incident lasts 4–5 minutes. (Patrick Gross, “The 1954 French Flap,” March 25, 2003)

October 2 — Dawn. Stockyard employee Angelo Girardo is going to his job in Bressuire, Deux-Sèvres, France, when he sees a small being wearing a diving suit standing near a circular craft about 10 feet in diameter. It swiftly takes off. Hoax. (Patrick Gross, “The 1954 French Flap,” August 3, 2007)

October 2 — 7:20 p.m. Villagers of Chereng, Nord, France, are having their Ducasse festival meal when they see a fast, luminous object in the sky suddenly stop, give off sparks, and descend to ground level. As people run to the spot, it takes off again. (Patrick Gross, “The 1954 French Flap,” January 9, 2009)

October 2 — 11:15 p.m. Young farmer Jean Allary sees a circular object near Ronsenac, Charente, France, that seems to be gliding on or near the ground, has luminous spots, and lights up as it takes off. He finds flattened and scorched grass over an area 25 feet across. (Patrick Gross, “The 1954 French Flap,” January 31, 2007)

October 4 — 8:00 p.m. In Poncey-sur-l’Ignon, Côte-d’Or, France, Mme. Yvette (or Thérèse) Fourneret sees a luminous orange object about 10 feet wide land in a meadow on her farm. She runs to tell some men, who arrive at the spot with rifles but find nothing. Instead, they discover a strange quadrilateral hole from which soil appears to be sucked up. The roots of plants are not damaged. The French Air Force and local police investigate and learn there are other witnesses. (Patrick Gross, “The 1954 French Flap,” March 10, 2003)

October 5 — 4:00 a.m. M. P. Lucas, a baker in Loctudy, Finistère, France, is getting water from his well when he sees a UFO hovering nearby. A small being comes out of the object; it has an oval head covered with hair and large eyes. The creature touches Lucas’s shoulder and speaks to him in an unknown language. He calls for his boss, and the creature runs into the object and takes off. (Patrick Gross, “The 1954 French Flap,” October 3, 2003)

October 5 — 7:15 a.m. A road worker named Narcy sees an object near a road in Mertrud, Haute Marne, France. He also sees a hairy dwarf wearing an orange, tight-fitting jacket climb through a porthole on the UFO, which consists of a cigar-shaped section under a flat disc. Tracks are found. Probable hoax. (Patrick Gross, “The 1954 French Flap,” March 25, 2003)

October 5 — 3:45 p.m. In Beaumont, Puy-de-Dôme, France, witnesses Brun, Marfaron, Douti, and Marplat see a luminous ball moving west to east 1,500 feet away from them. It approaches to within 450 feet, and they feel paralyzed with faintness as a nitrobenzene odor spreads around them. (Patrick Gross, “The 1954 French Flap,” March 24, 2006)

October 6 — Around 6:00 a.m. Mechanic Joseph Roy is riding to work on his bicycle at Isles-sur-Suippe, Marne, France, and sees a dazzling light at low altitude. It blinks out. When he gets to the spot where it disappeared, he sees a large object like an artillery shell 9 feet long. A small, dark form is standing in front of it. Roy becomes frightened and races to the nearest gendarmerie. Probable confusion, helicopter, and military personnel. (Patrick Gross, “The 1954 French Flap,” January 16, 2006)

October 6 — 9:30 p.m. Two soldiers at the military barracks in La Fère, Aisne, France, watch a luminous craft in the shape of an artillery shell landed on the ground less than a quarter-mile away. As one soldier approaches it, he becomes paralyzed. (Patrick Gross, “The 1954 French Flap,” April 9, 2006)

October 7 — 6:20 a.m. A group of workers at the Renault manufacturing plant at Le Mans, Sarthe, France, are bicycling to work when they feel an unpleasant tickling at the same moment an intense greenish light is emitted from a luminous object hovering above the Route N23 road. They are almost paralyzed, then the UFO leaves, flying low over the fields. (Aimé Michel, *Straight-Line*, p. 143; Schopick, *pp. 8–9*; Patrick Gross, “The 1954 French Flap,” October 22, 2004)

October 7 — The Italian Air Ministry allegedly sets up UFO detection posts for 24/7 vigilance. (Wilkins, *FS Uncensored*, Citadel, 1955, *p. 232*)

October 7 — 2:30 p.m. Farmer René Margaillon goes to work and notices a mysterious object about 300 feet away in a field between Montieux and Althen-des-Paluds, Vaucluse, France. He approaches the object, which is about 8 feet tall and phosphorescent. Suddenly it disappears and he feels suffocated. (Patrick Gross, “The 1954 French Flap,” April 5, 2003)

October 7 — Night. Witnesses at Corbigny, Nièvre, France, see a luminous cylinder that appears orange when vertical and motionless, and white when moving forward horizontally. At one point, two small discs emerge from its lower part. (Patrick Gross, “The 1954 French Flap,” September 12, 2005)

October 8 — 7:30 p.m. Four children—Gilbert Calda, 12, Daniel Hirsch, 9, J. P. Hirsch, 5, and Robert Maguin, 16—are roller skating at Pournoy-la-Chétive, Moselle, France, when they see a luminous object near the cemetery. It is round, about 8 feet in diameter, and standing on three legs. A dwarf, about 4 feet tall, dressed in black, with a face covered in hair and large eyes, emerges and shines a blinding light at them. It says something in an unknown language. The children run away but look back in time to see the object flying away high in the sky. (Clark III 269; Aimé Michel, *Straight-Line*, 154; Patrick Gross, “The 1954 French Flap,” March 7, 2003)

October 9 — The US Air Force releases a press statement saying that after studying 3,500 reports, it has found “no authentic physical evidence” that UFOs are spaceships or weapons. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 October*, The Author, 1991, p. 22)

October 9 — 4:00 p.m. Jean Bertrand is driving near Carcassonne, Aude, France, when he comes upon a metallic sphere in the road ahead. The top half seems to be transparent, and he sees two human-shaped figures inside. As he approaches, the object takes off at high speed. Probable helicopter. (Patrick Gross, “The 1954 French Flap,” March 26, 2003)
October 9 — Around 7:00 p.m. Roger Barrault, a worker in Lavoux, Vienne, France, is riding a bicycle when he is stopped on the road by a double beam of light coming from a 4-foot-tall figure that looks like a diver. It wears boots without heels and has brilliant eyes and a large moustache. Hoax. (Patrick Gross, “The 1954 French Flap,” March 26, 2003)

October 9 — 8:30 p.m. Jean-Pierre Mitto and his two cousins are driving on Road 631 from Toulouse to Briatexte, Tarn, France, at a crossroads known as “La Caiffe” when they see two small figures about the size of 11-year-old children cross the road. They enter a pasture where a convex disc rises vertically and shoots upwards rapidly. It is about 20 feet in diameter and orange. Brown, oily residue is found at the site. (Patrick Gross, “The 1954 French Flap,” March 26, 2003)

October 9 — 10:15 p.m. Max Favell, a representative of a German firm in Beirut, Lebanon, sees a white flying object land. It takes off vertically, spinning, and is lost to sight. (Vallée, Magonia, pp. 222–223)

October 9 — Evening. As he is driving home from his job as a movie projectionist in Rinkerode [now part of Drensteinfurt], North Rhine-Westphalia, West Germany, Willi Hoge sees a blue light to one side of the road. He looks closer and sees four small figures with big heads and chests and small, thin legs, apparently doing repair work on a spindle-shaped machine. All are dressed in one-piece elastic body suits. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 October, The Author, 1991, p. 24; Wilkins, FS Uncensored, Citadel, 1955, p. 233)

October 10 — The Royal Observatory of Belgium in Uccle announces it will act as a clearinghouse for UFO reports. (Wilkins, FS Uncensored, Citadel, 1955, p. 233)

October 10 — A cylindrical UFO with red and green lights is seen over Alexandria, Egypt. (Wilkins, FS Uncensored, Citadel, 1955, pp. 232–233)

October 10 — 11:30 a.m. Marius Dewilde, along with his 14-year-old son, allegedly has a second encounter with a UFO occupant at Quarouble, Nord, France. (Patrick Gross, “The 1954 French Flap,” April 3, 2003)

October 10 — In a newspaper interview, Alfred Loedding alludes to the 1948 Estimate of the Situation without calling it that. Loedding shows a study of some 100+ UFO reports to one of the “country’s leading scientists,” who glances at it briefly, then declares that “flying saucers are a figment of the imagination.” Shortly afterwards, the skeptics in Project Sign win out, and Loedding’s efforts are ignored. (Trenton (N.J.) Sunday Times-Advertiser, October 10, 1954; Michael Hall, “Was There a Second Estimate of the Situation?” IUR 27, no. 1 (Spring 2002): 13, 32)

October 11 — 4:15 a.m. Baptiste Jourdy is delivering milk near Fonfrède, Loire, France, when the truck engine dies and the headlights fail. He gets out to investigate and sees a glowing, multicolored object, moving at great speed, cross the road and disappear in the distance. The headlights return and he starts the truck again. (Aimé Michel, Straight-Line, p. 157; Schopick, pp. 11–12; Patrick Gross, “The 1954 French Flap,” April 6, 2003)

October 11 — 4:30 a.m. Two merchants, Henri Gallois and Louis Vigneron, are traveling to a fair in a van near Clamency, Nièvre, France, when they both feel electrical shocks. The van motor dies, and the headlights go out. They become paralyzed and see on the ground, 150 feet away, a round object with three small figures around it. The figures go inside the object, which then leaves rapidly. The headlights come back on, the paralysis ends, and the engine can be restarted. Hoax. (Aimé Michel, Straight-Line, p. 158; Schopick, pp. 12–13; Patrick Gross, “The 1954 French Flap,” April 7, 2003)

October 11 — 6:00 a.m. Baptiste Potin of Méral, Mayenne, France, is riding a bicycle to his workplace when he spots a huge orange ball in the sky that seems to be above Saint-Poix. It apparently descends to the ground as he approaches, barring the road. After watching it 8–10 minutes, it rises slowly and disappears in the northwest. He finds when he arrives at a farm that he is covered in white fluff embedded in his clothes. Probably an observation of the moon, accompanied by plant seeds. (Patrick Gross, “The 1954 French Flap,” April 14, 2003)

October 11 — The Romanian magazine Contemporanul claims that UFOs are US propaganda designed to “stir up against Moscow a flying-saucer psychosis.” (“Saucers Are Not!” Cincinnati Enquirer, Oct. 12, 1954, p. 4; Ruppelt, p. 238)

October 11 — 9:50 p.m. Julia Juste, Maria Barbereau, and Marion Tanneur are driving along D14 about 1 mile from Chateauneuf-sur-Charente, Charente, France. Two luminous globes, one smaller than the other, appear in the sky ahead of them at low altitude, and their car stalls and the headlights go out. The larger one becomes brilliant white with a reddish halo. After 5 minutes, they move out of sight in the Charente valley. (Aimé Michel, Straight-Line, p. 160; Schopick, p. 13; Patrick Gross, “The 1954 French Flap,” April 6, 2003)
October 12 — Morning. A UFO supposedly lands in a populous district on the south side of Tehran, Iran. It is said to have tried to kidnap a terrified man, Ghasim Faili, who says that on waking up he sees the UFO within 60 feet of him. It emits a magnetic force to capture him, but he shouts and neighbors gather, forcing the apparatus to take off. Later sources add some dubious details. (Patrick Gross, *URECAT*, July 20, 2007)

October 12 — Afternoon. A French engineer driving to Kenitra, Morocco, sees a small figure in a metallic suit climbing aboard a UFO that quickly lifts off and flies away. The location is said to be Mamora Forest, which could be modern Mehdyah, on the coast. (Lorenzen, *Occupants*, Signet, 1967, p. 95)

October 12 — Around 2:00 p.m. A math professor at Lisieux named Bon is in Saint-Germain-de-Livet, Calvados, France, when he sees a silvery disc with a diameter of 21–24 feet hovering over a wooden area off the road. It dives toward the ground, then rises suddenly and silently into the sky at tremendous speed. (Patrick Gross, “The 1954 French Flap,” October 24, 2004)

October 13 — 7:35 p.m. Three witnesses (Olivier, Perano, and a third man) see a reddish disc about 12 feet in diameter near Bourraisol, a suburb of Toulouse, France. A small being about 4 feet tall is standing nearby wearing a diver’s suit. Its head is large, and it has enormous eyes. One witness approaches to within 60–70 feet and is paralyzed. The UFO soon takes off. Definite hoax. (Patrick Gross, “The 1954 French Flap,” April 24, 2003)

October 14 — 6:30 a.m. A resident of Shamsabad [which one?], Iran, sees a star-like object about 300 feet away from his house. Approaching to 60 feet, he sees a “short young man” who is standing on a circular piece of metal in the middle of the object and glancing around him. The man seems to be “laughing” at the witness. The UFO shoots up into the air and vanishes. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 October*, The Author, 1991, p. 42)

October 14 — *Keyhoe* hears from an informant that the 4602nd AISS has a “crashed object” program. His contact Lou Corbin thinks the Air Force already has some recovered material. (Keyhoe, *FS Conspiracy*, pp. 214–215)

October 14 — A farmer and his wife see a light green object traveling at tremendous speed, possibly 3,000 mph, in Kenya. (Wilkins, *FS Uncensored*, Citadel, 1955, p. 234)

October 14 — 12:00 noon. Farmer Antonio Crepaldi is leading his cows to a pond near Ca’ Pisani, Rovigo, Italy, when an egg-shaped object emitting intense heat swoops over his house at an altitude of 50 feet. The cows panic and run away, apparently suffering burns. Some haystacks catch fire. The sighting lasts 2 minutes. (Pinotti 59)

October 14 — 3:30 p.m. Casimir Starovski, a miner, meets a strange figure in Erchin Forest, near Leward, Nord, France. It has large, slanted, protruding eyes and a squat, furry body. Its nose is flat, it has thick lips, and it wears a skulcap on its oversized head. (Clark III 269; Patrick Gross, “The 1954 French Flap,” December 21, 2005)

October 14 — 6:20 p.m. André Cognard is driving on the D60 road to the east of Gueugnon, Saône-et-Loire, France, when a brilliant reddish fireball passes near his car to the west at low altitude. It is so bright that he stops his car. Probable meteor. (Patrick Gross, “The 1954 French Flap,” April 20, 2003)

October 14 — Twilight. A witness is riding a moped on the road between Saint-Romain-sous-Gourdon and Les Brosses Tillots, Saône-et-Loire, France. Suddenly his motor fails and, as he gets off the cycle, a bright circular object bursts ahead of him. He walks back with his moped and is able to start it again. (Aimé Michel, *Straight-Line*, p. 175; *Schopick*, p. 14; Patrick Gross, “The 1954 French Flap,” September 25, 2004)

October 15 — Early in the morning. A large, luminous, red object streaks across the sky above Hungary. A teacher from Győr-Moson-Sopron county takes two photos of what is an apparent meteor. (Hobana and Weverbergh 199–201)

October 15 — In Boaria Pisani, Padua, Italy, a farmer is leading his cows to a pond when he sees an object fly over his house. The cows panic and run away, knocking a girl to the ground, while the object emits a burst of light. The farmer runs to the house and then faints. Three other persons see the craft depart. It is dark in color but surrounded by short blue and yellow flames. The object is egg-shaped, flies at 50 feet above the ground, and emits intense heat. The little pond is found desiccated, and haystacks catch fire as it flies over while the cattle suffers burns. (Vallée, *Magonia*, pp. 229–230)
October 15 — Afternoon. Farmers near the Po della Donzella river channel, Veneto, Italy, see a disc-shaped object land then take off vertically. At the site is a deep crater about 18 feet in diameter. Poplar trees are partially burned. (Aimé Michel, Straight Line, p. 181)

October 15 — Evening. Veterinarian Henri Robert of Londinières in Normandy, France, is driving on route RN 314, near Baillolet, Seine-Maritime, France. He sees four orange objects flying one above the other at 1,000 feet. One floats down like a leaf, landing about 350 feet in front of his car. Robert feels an electric shock and his engine dies for 20 seconds and the object disappears. Robert continues driving. As he is going through the village of Bailleul-Neuville, he sees in his headlights a four-foot-tall bluish-gray figure with arms and legs spread. His headlights go off then on again. He then sees on his left a 27-foot-long cigar-shaped object at the edge of a slope. It takes off vertically and quickly moves toward the north. Possible hoax. (Aimé Michel, Straight-Line, pp. 184–185; Schopick, pp. 15–16; Patrick Gross, “The 1954 French Flap,” April 7, 2004)

October 15–25 — Thousands of witnesses in the former Yugoslavia report low-flying UFOs and high-flying cigar-shaped objects, especially around Ljubljana, Slovenia; Sarajevo, Bosnia; and Belgrade, Serbia. Yugoslavia announces on October 27 that it intends to launch an official investigation. (Lorenzen, UFOs: The Whole Story, Signet, 1969, p. 61; Hobana and Weverbergh 90–91)

October 17 — Around 9:30 a.m. Guy Puyfourcat is returning from the fields near Cier-de-Rivièrè, Haute-Garonne, France, with his mare on a halter. The horse suddenly becomes restless and jumpy. A gray object about 4 feet in diameter rises from one side of the road and passes over them. The mare rises about 9 feet into the air and Puyfourcat releases her, and the animal falls to the ground and is unable to move for 10 minutes. The UFO moves away at high speed. (Patrick Gross, “The 1954 French Flap,” October 16, 2007)

October 18 — 5:30 p.m. A M. Bachelard is driving a light truck southeast of Gelles, Puy-de-Dôme, France. As he goes around a bend, he feels paralyzed and his truck slows down to less than 20 mph. In a nearby field he sees an elongated object about 5 feet high. A few minutes later he reaches the village of Coheix, which is off his normal route, and starts telling people about the event. Later ufologists suspect there may be some missing time involved. (Aimé Michel, Straight-Line, p. 198; Schopick, pp. 16–17; Patrick Gross, “The 1954 French Flap,” March 20, 2003; “The Landing at Gelles,” Flying Saucer Review Case Histories, no. 5 (June 1971): iii)

October 18 — 6:00 p.m. Two farmers near Saint-Cirgues, Haute-Loire, France, watch two bright balls connected by a rod for 15 minutes. They disappear at a fast pace. (Patrick Gross, “The 1954 French Flap,” December 21, 2006)

October 18 — 9:00 p.m. M. and Mme. Labussière are driving on the N150 southwest of Saints, Charente-Maritime, France, when they see a balance-shaped object in the sky. One side is red and the other orange, while the rod connecting them is a luminous green. The object pauses above a field near their car, which they pull over to watch more closely. The green rod soon dissipates, and the two balls settle in the field. In the dim light emitted by the objects, the Labussières see a small creature emerge from each, walk toward each other, pass without stopping, and enter the other object. (Patrick Gross, “The 1954 French Flap,” December 29, 2003)

October 19 — 8:00 p.m. A M. Fillonneau is driving in Criteuil-la-Madeleine, Charente, France, when he sees a bright fireball. His headlights go out and the engine stops, and he finds that his battery is completely dead and the headlight bulbs burned out. (Patrick Gross, “The 1954 French Flap,” February 5, 2007)

October 19 — Around 12:00 midnight. Renzo Pugina has just put his car in his garage at Parravicino, Como, Italy, when he sees a humanoid about 4 feet 3 inches tall in a scaly, luminous suit standing near a tree. The lower part of its body is like a cone. It aims a light beam at Pugina that paralyzes him briefly. He only manages to move some fingers, but with some concentration makes a clenching motion with his fist on the garage keys that he holds in his hand. Freed from the temporary paralysis, he runs to attack the intruder, who flees with a soft whirring sound. A police investigation finds a spot of oil at the location. (Vallée, Magonia, pp. 235–236; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 October, The Author, 1991, p. 74; 1Pinotti 60)

October 20 — 6:30 p.m. Jean Schönbrunner is driving a truck southbound near Turquestein-Blancrupt, Moselle, France, when he sees a bright glow ahead on route N393. He continues to drive but feels paralyzed, his hands glued to the wheel. At about 30 feet away, his engine stops and the yellow-orange glow rises slowly and heads northwest. He feels a sensation of warmth and sees that the glow contains a cone-shaped object. (Aimé Michel, Straight-Line, p. 203; Schopick, pp. 17–18; Patrick Gross, “The 1954 French Flap,” April 21, 2003)

October 20 — 9:15 p.m. Jean Lalle (or Jean Lasse) is riding a motorcycle between Biozat, Alliers, and Effiat, Puy-de-Dôme, France, when his engine dies suddenly. He sees an egg-shaped object with a bright trail climbing in the sky. The motorcycle restarts once the object has left. (Patrick Gross, “The 1954 French Flap,” December 21, 2005)

October 21 — A young man hears a rustling sound and sees a landed UFO outside Melito di Napoli, Italy. It gives off a powerful bronze-green light. He then sees an occupant dressed in a diving suit emerge. A dog begins barking and...

October 21 — Evening. A motorist is driving on the D220 road with his 4-year-old son between Pailé and Pouzou, Charente-Maritime, France. He feels a tingling like electric shocks all over his body. The child cries, the engine stops, and the headlights go out as a luminous red body with a tail flashes briefly in front of them. (Aimé Michel, Straight-Line, p. 204; Schopick, pp. 18–19; Patrick Gross, “The 1954 French Flap,” April 21, 2003)

October 21 — 9:25 p.m. Three observers at the Woomera Test Range in South Australia see an erratic, dancing light adjacent to rocket Launcher Apron 1, Range B, approximately 500 feet away. The light alternates from deep orange to yellow and is egg-shaped. Its apparent size is three times the magnitude of Venus. (NICAP, “Dancing Light Adjacent to Rocket Launcher”)

Mid-October — A merchant and his deliveryman are driving a van northeast of the village of Erquières, Pas-de-Calais, France, when they see a blinding light in front of them. As it passes over the van, the engine stalls and the headlights fail. Both men feel an electric shock. (Aimé Michel, Straight-Line, pp. 204–205; Schopick, p. 19; Patrick Gross, “The 1954 French Flap,” March 12, 2005)

October 22 — Afternoon. Roger Reveillé is walking in the Fôret de Lusigny, Aube, France, when he hears a rustling noise. He looks up and sees an oval-shaped object about 20 feet long at treetop level. At the same time he feels an intense heat that also seems to be creating a thick fog. After a few minutes the object disappears upward, but the heat continues. Although it is raining, the ground underneath where the object had been is dry. (Aimé Michel, Straight-Line, p. 204; Schopick, p. 18; Patrick Gross, “The 1954 French Flap,” September 28, 2003)

October 22 — 3:00 p.m. Principal Rodney Warrick and teacher Mrs. George Dittmar of Jerome, Ohio, Special School watch a large, silvery, cigar-shaped object hanging motionless in the sky. Soon it takes off, and in its wake it leaves a trail of whitish, web-like substance that floats down and begins to hang from wires along the road. It descends in both strands and balls for 45 minutes. Both adults get greenish stains on their hands from it. All of it dissipates, but the substance placed in closed jars dissipates more slowly. (“Strange ‘Flying Cigar’ Puzzles Union Coundians,” Marion (Ohio) Star, November 2, 1954, pp. 1, 10; “Web-Spinning Saucer Visits Marysville, Ohio,” CRIFO Newsletter, December 3, 1954, p. 5; Michael D. Swords, “Angel Hair: Spindrift between Worlds,” IUR 32, no. 1 (August 2008): 3–4)

October 23 — 1:30 a.m. A woman in Cincinnati, Ohio, has fallen asleep listening to the radio. Suddenly it makes a harsh shrieking noise and the volume increases. Dogs begin barking in the neighborhood, so she looks outside and sees a large reddish-orange disc with a halo around it moving in a circle overhead. After a minute it moves off to the south. (“The Fort Wayne and Cincinnati Tie-In,” CRIFO Newsletter 1, no. 9 (December 3, 1954): 5)

October 23 — 3:00 a.m. A farmer named Carmelo Papotto near Tripoli, Verona, Italy, watches a UFO land 150 feet away with a sound like a compressor. It seems to be an oval machine with six wheels and complex machinery. The top half is transparent and flooded with bright light. Aboard are six men in yellowish overalls resembling ski suits. When he touches part of the object, he gets an electric shock. One occupant warns him to stay away. For the next 20 minutes he watches them fiddle with instruments. The object then rises to 150 feet and takes off at a dizzying speed. (Vallée, Magonia, p. 237; 1Pinotti 61–62; Mark Cashman, “Behavioral Classification System for UFO Occupants,” IUR 24, no. 1 (Spring 1999): 17–18)

October 24 — Rocket expert Hermann Oberth writes in the American Weekly: “It is my thesis that flying saucers are real and that they are space ships from another solar system. I think that they possibly are manned by intelligent observers who are members of a race that may have been investigating our Earth for centuries.” He thinks UFOs might fly by “distorting the gravitational field.” (Hermann Oberth, “Flying Saucers Come from a Distant World,” American Weekly, October 24, 1954, in Cincinnati Equirer; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 October, The Author, 1991, p. 83; Hermann Oberth, “Lecture Notes for Lecture about Flying Saucers, 1954,” Australian UFO Bulletin, September 1991, pp. 4–9)

October 24 — A small man with strange glowing eyes is seen near Ain El Turk, Algeria, along the coast. (Vallée, Magonia, p. 237)
October 24 — 1:00–6:00 p.m. Officers and men at the Canoas Air Force Base near Porto Alegre, Brazil, watch a number of “circular silver-colored” objects moving at high speed. They are also seen by personnel of Varig airlines and some civilians. There are more than 100 witnesses. The chief military witness, jet pilot Lt. H. Ferraz de Almeida, sees a dull silver object moving apparently slowly above the base in a zigzag fashion. He estimates its altitude as 40,000–45,000 feet and suggests that its real speed must be tremendous. Maj. J. Magalhaes Mota is watching the same object as another one rapidly approaches the first and stops next to it. The second object then moves rapidly, abruptly changes course, and flies off in an arc. When the object is in motion, it is surrounded by a misty halo, and when it stops the halo disappears. Their movements appear mechanical and intermittent. The report is forwarded to the Air Ministry in Rio de Janeiro with a request to investigate. Brazilian Air Force Chief of Intelligence Col. João Adil de Oliveira heads the investigation, which concludes on December 2 that the “saucers appear to be some kind of revolutionary aircraft” that are not “conventional phenomena or illusions.” (UFOEv, p. 119; Swords 461–462)

October 25 — 6:15 a.m. Several UFOs, some described as spear-shaped and others as egg-shaped, speed over Belgrade, Yugoslavia [now Serbia], trailing bluish tails for about an hour. Witnesses include aeronautical engineer Vladimir Ajvas, AF Capt. Stjepan Djitalok, and staff at the nearby Zemun Polje Airport. The event is a culmination of UFO sightings over Yugoslavia since October 15, few of which make the newspapers. (UFOEv, p. 123; Hobana and Weverbergh 90–91)

October 25 — Lucien Jeune, mayor of Châteauneuf-du-Pape, Vaucluse, France, following numerous UFO sightings, issues a police order prohibiting “The overflight, landing, and take-off of aircraft, so-called flying saucers or flying cigars, on the communal territory.” The announcement, which also threatens the confiscation of any craft and the arrest of occupants, is done as a publicity stunt. Claude Avril, the city mayor in 2016, refuses to rescind it. (Louis de Gouyon Matignon, “The French Anti-UFO Municipal Law of 1954,” Space Legal Issues, May 29, 2019)

October 25 — 7:30 p.m. Farmer Gilbert Hée is gathering pears on his farm at Les-Jonquerets-de-Livet [now Mesnil-en-Ouche], Eure, France, when he sees an elongated object about 7 feet long with a green and a red light at both ends resting in the pasture. Some cows have gathered around it. The object is moving slowly and stops at a barbed wire fence. Hée goes inside. At 11:00 p.m., his son-in-law René Marais and a friend, Jean Chéradame, arrive on a motorcycle. Chéradame agrees to ride into the field and take a look, but he only goes 300 feet along the road before the engine fails. He falls from the bike and sees two short creatures walking stiffly and wearing bright clothes. (Patrick Gross, “The 1954 French Flap,” April 11, 2004)

October 26 — 10:45 p.m. Aimé Bousard is returning on his bicycle from the town hall at Alleyrat, Creuse, France, to his residence at La Vauville when he sees a figure crouching on the roadway. When he stops, the figure stands up and points two powerful light-blue lights at him. The entity is 5 feet 3 inches tall and dressed in a diver’s suit. It has two green lights on either side of its head. Bousard is paralyzed for 10 minutes while the lights are aimed at him. Then the entity crosses the road and disappears and Bousard can move again. Gendarmes investigate and note that his right hand is swollen and he has difficulty writing. They find a 27-inch circle of disturbed earth at the site. (Patrick Gross, “The 1954 French Flap,” September 6, 2007)

October 27 — 1:30 p.m. More than 10,000 soccer fans witness two luminous discs during a game at Florence, Italy. A large amount of “white filaments” falls that clings to everything. Engineering student Alfredo Jacopozzi collects samples in a jar and takes it to Prof. Cozzi at the Institute of Chemistry at the University of Florence. The lab finds the samples have a “fibrous structure, with mechanical resistance to contraction and torsion, burns rapidly, leaving a transparent residue.” It contains calcium, silicon, aluminum, magnesium, iron, and boron. (“Italy, Too!” Flying Saucer News, no. 7 (Winter 1954–1955): 6; Brian Boldman, “Angel Hair Physical Analyses: A Review,” JUFOS 9 (2006): 101; Michael D. Swords, “Angel Hair: Spindrift between Worlds,” IUR 32, no. 1 (August 2008): 5–6; 1Pinotti 63–64)

October 30 — 1:00 p.m. UFO researcher Alberto Pereggi is driving past the church of Santa Maria Maggiore in Rome, Italy, when he notices a crowd of about 100 people gazing up at the sky. He sees two “white dots” moving toward the south then vanish in opposite directions. Later, two other objects appear and move to the north at an altitude of

Late October–early November — The UK War Office receives six reports of 40–50 unidentified radar targets that appear from nowhere, usually at midday, flying at a height of 12,000 feet. The targets first appear in a U-formation, then converge into two parallel lines and take up a Z-formation before disappearing. The location of the radar trackings is not revealed. (Good Above, pp. 38–39)

November — Gen. John A. Samford summons Col. John O’Mara from Dayton and directs him to clear up any confusion about Keyhoe’s use of USAF data. O’Mara writes Eickhoff and says he had misunderstood and that Keyhoe’s book does contain officially released Air Force UFO reports. (Keyhoe, FS Conspiracy, p. 231)

November — The Hungarian government gets an “expert” to state that UFOs do not exist because all reports “originate in bourgeois countries, where they are invented by the capitalist warmongers.” (Ruppelt, p. 238)

November 1 — 6:00 a.m. Jack Holloway sees a large, round object that leaves a vapor trail that sprays sparks and moves at high speed for a few seconds to the south of Salem, Oregon. (NICAP case file)

November 1 — 6:30 a.m. Rosa Lotti Dainelli sets out for the church at the castle of Cennina, Arezzo, Italy. As she passes through a wooded area, she sees a spindle-shaped object standing upright next to a cypress tree. It has two portholes and a little door, through which she can see two chairs. Two little men come out from behind the object; they are dressed in gray suits, cloaks that come down to their waists, and red helmets. They speak in an unintelligible language and snatch flowers from her hands and throw them inside the UFO. Dainelli flees, glancing back only once. (Clark III 228–229; 1Pinotti 65–74; Northern Ontario UFO Research and Study, “The 1954 Cennina Landing and Encounter with Humanoids”; Società Cooperativa Dramatica Filarmonica di Ambra, “Incontro con umanoidi di Rosa Dainelli nei Lotti”)

November 2 — 10:30 a.m. Taxi driver Maurillo Braga Godoi leaves the streetcar trailer at Santo Amaro, a suburb of São Paulo, Brazil, and starts to walk home. When he arrives at the corner of Rua Andaguara, he is startled to find a glowing, circular object landed in an empty lot. It is about 90–120 feet in diameter and surrounded in a violet glow. He approaches it hesitantly from 60 feet away, feeling like running but he is rooted to the spot and is unable to call for help. The anxiety dissipates, and he walks toward it again, noticing a sliding door on the object. He goes inside, entering a circular room illuminated by a soft light. On a table he sees some maps, including one of South America with mushroom-shaped marks on it. He looks up and sees three humanoids less than 5 feet tall with dark brown skin and dressed in a light gray coverall and a belt that holds what might be a weapon. They appear to be conversing in an unknown language. He tries talking to them, but they don’t understand. He backs out of the object, dragging his feet. He jumps out of the door and runs away. Looking back at the object from 30 feet away, he sees it is hovering 30 feet above the ground then takes off swiftly and silently. Godoi is examined by psychiatrists, who find him neither neurotic nor psychotic. (Lorenzen, Occupants, Signet, 1967, pp. 198–199)

November 4 — A laborer named Jose Alves of Pontal, São Paulo, Brazil, is night fishing in the Rio Pardo at high speed for a few seconds to the south of Salem, Oregon. (NICAP case file)

November 4 (or 7) — 3:15 p.m. A motorcyclist, Gianni Cambosu, sees a silvery, disc-shaped object about 50 feet in diameter land near the road at Monte Ortobene, Sardinia, Italy. He swerves sharply to avoid it and falls off his cycle. A taxi driver, Francesco Tanca, stops to observe the object, which is making a soft whirring sound before it takes off. (Wilkins, FS Uncensored, Citadel, 1955, pp. 237–238; 1Pinotti 76)

November 5 — 10:09 a.m. A witness in La Roche-en-Brénil, Côte d’Or, France, sees an orange object making a noise like a generator land in a nearby pasture. He notices three men standing near it. One is holding a box that emits a beam of light and the other two hold objects that look like weapons. Physical traces are found at the landing site: a white substance and a circle 10 feet in diameter. (Patrick Gross, “The 1954 French Flap,” April 16, 2003)
November 6 — 11:00 a.m. Alberto Perego is in the Tuscolana district in Rome, Italy, when he sees dozens of small, white objects in the sky at a height of 4–5 miles. They are moving at variable speeds, as high as 750–850 mph. At first he calculates that there are about 50 of them, but later realizes there are 100. Sometimes they are single, other times in pairs, threes, fours, sevens, or twelves. Frequently they are in diamond formations of four or V-formations of seven. At 12:00 noon, a formation of 20 objects appears from the east, followed by another 20 moving from the west. The two V-formations converge until their vertices form a St. Andrews cross, with 10 objects to each bar. The convergence takes place over the Trastevere–Monte Mario district above Vatican City. The cross then performs a three-quarter turn on its axis, turning into an X-formation, then breaks off into two separate curves that take off in opposite directions. Another concentration of about 100 objects appears 10 minutes later and Perego notices shining filaments falling from the sky. He grabs a handful of the glassy substance, which evaporates in a few hours. (Alberto Perego, “The Great ‘Cross’ above the Vatican,” Flying Saucer Review Case Histories, no. 15 (June 1973): 4–5; 1Pinotti 76–80)

November 7 — 11:30 a.m. Alberto Perego is returning from the Tuscolana district of Rome, Italy, when he sees more formations of about 50 white objects that remain for about two-and-a-half hours. They arrive from different directions and always in formation. More filamentous material falls from the sky. (Alberto Perego, “The Great ‘Cross’ above the Vatican,” Flying Saucer Review Case Histories, no. 15 (June 1973): 5; 1Pinotti 80)

November 8 — 6:00 p.m. Witnesses near Voussac, Allier, France, in the Vacheresse Forest watch a luminous sphere land and then dim, fading to black. Investigators find an area 12–15 feet in diameter where there are no leaves and the ground seems excavated. (Patrick Gross, “The 1954 French Flap,” April 18, 2003)

November 8 — 7:30 p.m. Blacksmith André Chaillou is riding a moped one mile north of Loublande, Deux-Sèvres, France, when he notices a small blue light in front of him. His engine fails and he nearly falls off the bike. The blue dot is projecting a strong light and hovering about 6 feet in the air. He finds himself temporarily paralyzed with a tingling in his hands. The blue light goes out and he is able to move again and restart his moped, but the light reappears about 450 feet away, seemingly 18 feet above him. A whistling sound. (Patrick Gros)

November 10 — An agronomist and his family encounter a landed UFO along a road in Porto Alegre, Rio Grande do Sul, Brazil. Two men with long hair and one-piece suits emerge and approach them with raised arms. The witnesses speed away. (Clark III 268; Lorenzen, FS Hoax, pp. 48–49)

November 12 — 11:30 a.m. Alberto Perego watches even more formations of white objects over Rome. He has contacted the Italian air defense office, which tells him that the objects would be out of radar range. This time the objects are also observed by Fr. Zilwes, a Brazilian priest at the Vatican Observatory in Castel Gandolfo, Italy. (Alberto Perego, “The Great ‘Cross’ above the Vatican,” Flying Saucer Review Case Histories, no. 15 (June 1973): 5–6; 1Pinotti 81–82)

November 12 — 3:00–6:00 p.m. A white, motionless object appears over Louisville, Kentucky. A radar unit 30 miles southwest of Louisville tracks the object but loses sight about 12 miles northwest of Godman Army Airfield at Fort Knox. It is later sighted at Bedford, Indiana. Kentucky National Guard pilot Lt. Col. Lee J. Merkel notifies Wright-Patterson AFB near Dayton, Ohio, which sends an F-86 to investigate. The pilot sees nothing and returns to the base. Merkel and another National Guard pilot give chase in F-51 Mustangs, but they are also unsuccessful. Merkel says the object is moving into the wind, which is not likely for a balloon. Henry P. Julliard, deputy director of Standiford Field [now Louisville International Airport] follows the object for 45 minutes on the weather bureau’s theodolite; he says the object has no more motion than a star and that after sundown the object turns amber. (“That ‘Thing’ in the Sky Still ‘Unidentified Object,’” Louisville (Ky.) Courier-Journal, November 13, 1954, pp. 1, 12; “Louisville Stops Work to Watch Saucer,” CRIFO Newsletter 1, no. 9 (December 3, 1954): 3–4; NICAP, “Sphere Startles Thousands”; UFOEv, p. 134; Hynek UFO Report, pp. 51–52)

November 13 — 2:00 a.m. A witness is driving in Buchy, Seine-Maritime, France, and sees a luminous object take off as he feels a mild electric shock and is paralyzed. His car engine slows but does not stall. The object leaves, the paralysis goes away, and the car returns to normal. (Patrick Gross, “The 1954 French Flap,” October 22, 2006)

November 14 — 3:30 a.m. Railroad worker Jose Rodrigues comes across three figures in tight-fitting suits inspecting the ground with the help of luminous objects near railroad tracks near Urai, Paraná, Brazil. They see him and run back into the UFO. (NICAP, “Railroad Men See ‘Men’ Inspecting Tracks”)

November 14 — Two or three tractor drivers in Forli, Italy, watch a bright-red, luminous UFO approach them in a farm field. As it approaches, the engine that works by internal combustion fails, but the diesel engine still runs. The men run away; when they return, the UFO has departed. The engine that failed still causes some trouble after the sighting. (Lorenzen, UFOs: The Whole Story, Signet, 1969, pp. 62–63, 145)

November 14 (or 11) — 7:45 p.m. Near Isola, Spezia, Italy, Amerigo (or Americo) Lorenzini sees a cigar-shaped UFO land and a trio of small creatures wearing diving suits emerge. They walk over to Lorenzini’s rabbit cages and
stare at the animals, talking in a strange language. He runs inside to grab his gun and tries to pull the trigger as they are taking some rabbits to the UFO, but he becomes paralyzed. The UFO takes off, leaving a bright trail. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 November–December*, The Author, 1991, pp. 20–21; 1Pinotti 88)

November 17 — 4:10 p.m. Iden K. Zimmerman is standing just under the roof of a shed by the railing of gate number six of the Willamette Falls Locks in Oregon City, Oregon. His gloved hands are resting on the railing. He feels something like “icy rain” on his hands. The rain seems to penetrate his clothing and gloves as if his arms are bare. He feels the same thing on his legs, from the knees down. Looking up, he sees a bright orange object as large as the full moon flying in a straight line from west to east. It disappears over the Crown Zellerbach Paper Mill roof across the river. He can find no trace of rain on the wooden deck or cement walks, and the moisture disappears from his clothing. A few minutes later he begins to feel dizzy and has trouble maintaining his balance. The effect wears off in about one hour. (Donald E. Keyhoe and Gordon I. R. Lore Jr., *Strange Effects from UFOs*, NICAP, 1969, pp. 16–17)

November 21 — 11:30 a.m. Copilot Cmdr. Armando Braulino, pilot Cmdr. Pedro Luiz Teixeira, steward, radio operator, and passengers of National Airlines Douglas PP-ANM airliner at 9,000 feet over Paraíba do Sul, Rio de Janeiro, Brazil, see a UFO formation, described as disc-shaped with cupola or dome on top, like aluminum with a polished surface. The formation is coming from the northeast at 7,200 feet and passes below the airliner at high speed. The duration is 40–50 seconds. (NICAP, “Shiny Objects Encountered by Airliner”)

November 22 — Charles Laughead is forced to resign his position at Michigan State College [now Michigan State University] in East Lansing, Michigan, because of his flying saucer activities. (Clark III 718)

November 22 — Anor Ferreira da Silva, a bored telegraph operator in Caratinga, Minas Gerais, Brazil, transmits a Morse code message to his friend Geraldo Bastos in Belo Horizonte, claiming that a flying saucer has crashed in a nearby quarry. His messages continue for an hour, repeatedly asking the authorities to defend the city from Martian invaders. Bastos takes the messages seriously, and a friend looking over his shoulder runs out to the nearest newspaper office to relay the news. The telephone system of Caratinga shuts down from all the press inquiries, and soon the Brazilian military investigates, finding nothing amiss in the city. (John Gosling, *Waging the War of the Worlds*, McFarland, 2009, pp. 114–119)

November 23 — Afternoon. A UFO follows three 10-year-old girls (Anne Storedal, Tora Storedal, and Tora Moy Haug) returning home from school in Torpo, Viken County, Norway. It descends and hovers only 3 or 4 feet away from them. It is round, about 10 feet in diameter, and the bottom is black, trimmed with yellow spots which could have been lights, with a number of small “red jags.” The upper part is a transparent dome; a man who is operating controls is visible inside. He wears black trousers, a black jacket, and immense red goggles over his eyes. He stares at one of the girls. When the craft ascends it collides with a high tension power line making a shower of sparks, and the girls run away. They notice a smell “like fried sausages.” A “streak” is found in the snow, apparently left by the craft having brushed the surface of the ground. (Clark III 268; Center for UFO Studies, *HUMCAT Index 1954*, p. 160)

November 28 — 2:00 a.m. Meat merchants José Ponce and Gustavo Gonzáles are driving a panel truck along Calle Bella Vista in Petare, Caracas, Venezuela. They find their way blocked by a 10-foot-wide, glowing ball hovering 6 feet above the street. When they get out to investigate, they are confronted by a dwarfish creature covered with stiff, bristly hair. Gonzáles grabs it, but it tosses him to one side. Two more dwarfs, gathering dirt and rocks nearby, approach. Ponce sees them and runs to find a police station. Gonzáles recovers in time to see two of the entities climb through an opening in the UFO. The third comes toward him, claws extended, and Gonzáles tries to stab it in the shoulder with his knife, but the blade glances off. One of the dwarfs inside the UFO points a tube at Gonzáles that emits a brilliant beam of energy. He is paralyzed and temporarily blinded but manages to stagger to the police station. A doctor at the emergency room at Esquina de Sálas hospital treats an abrasion on Gonzáles’s left side. Other witnesses to a UFO in the area come forward. (Lorenzen, *FS Hoax*, pp. 57–58; Lorenzen,
November 28 — A group of peasants at Palmarito, Mérida, Venezuela, see a strange craft land. Three small-statured beings emerge from it. (Patrick Gross, URECAT, November 5, 2006)

December — Aviation inventor Bill Lear sees a flying disc giving off greenish light near Palm Springs, California. It hovers for 2 seconds then swiftly moves out of sight. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 November–December, The Author, 1992, p. 22)

December — The US Air Force acknowledges that it is contemplating a “New type of jet aircraft, powered by a turbine larger than any now in use, [that] is expected to take off, land vertically, and be able to hover. It may cruise at 1,500 knots and have a range of 15,000 nautical miles.” It speculates: “If the Soviets now have such an aircraft in operational use, would the United States air defense system be able to detect, identify, intercept and destroy a bomber or reconnaissance aircraft moving at a 1,500 knot clip at an altitude of 65,000 feet?” (“The Flying Disc,” Air Intelligence Digest 7, no 12 (December 1954): 6+)

December — Contactee Orfeo Angelucci, now working in Twentynine Palms, California, is at Tiny’s Café when he meets someone named Adam, who claims to have read his book and gives him some kind of mind-altering pill. After taking the pill, Angelucci finds himself in an “exalted state” and talks freely with Adam about outer space and politics. Prior to this time, Angelucci has caught the attention of the FBI because he has been approached several times by a group of seeming left-wing agents. (Orfeo Angelucci, The Son of the Sun, DeVors, 1959; Kremlin 100–107)

December — Charles Laughhead and his wife Lillian meet George Hunt Williamson at a lecture he is giving in Detroit, Michigan. (Zirger and Martinelli, The Incredible Life of George Hunt Williamson, Verdeciani, 2016, p. 103)

December 1 — President Eisenhower approves the development of the Lockheed U-2 reconnaissance plane as a CIA project under the direction of Allen Dulles. (Wikipedia, “Lockheed U-2”)

December 3 — Morning, Victoriano Maeso, Luis Brugeda, and Francisco Huertos are at Las Gastanas farm about 3 miles from Granja de Torrehermosa, Badajoz, Spain, when they hear an unusual noise and notice an object in the branches of an oak tree about 165 feet away. It is pyramid-shaped and about 8 feet high and 2 feet in diameter, with four fins and a box suspended from it by apparent ropes. They approach it, but the object rises and disappears toward the west. This observation is the first of about a dozen others reported over the next two weeks in Badajoz, Zaragoza, Teruel, Guipúzcoa, and Huelva provinces that seem to involve wayward balloons released in Germany by Radio Free Europe that carry leaflets intended to be dropped in the Soviet bloc. (Vicente-Juan Ballester Olmos and Juan Carlos Victorio Uranga, “Los ovnis de diciembre de 1954,” Academia.edu)

December 5 — 8:15 a.m. Miguel Sevil is hunting in the Montes de Zuera north of Zaragoza, Spain, when he hears a prolonged whistle and sees a luminous, transparent object landed about 165 feet away. It has several rods protruding from it, each apparently with a propeller. Two men about 6 feet tall with blond hair and speaking an unintelligible language enter the UFO through a door on the side. It rises vertically at tremendous speed and disappears. Probable hoax. (Vicente-Juan Ballester Olmos and Juan Carlos Victorio Uranga, “Los ovnis de diciembre de 1954,” Academia.edu)

December 7 — A Project Blue Book memo acknowledges the many “Foreign Sightings” in Europe, but attributes the cause to an increase in “meteorite activity” and overseas translations of Keyhoe’s book Flying Saucers from Outer Space. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 November–December, The Author, 1991, pp. 49)

December 7 — 1:15 p.m. R. H. Kleyweg, officer-in-charge of the meteorological station at Upington, Northern Cape, South Africa, is looking for a red balloon he has just released. He sees an object just east of the sun, moving slowly west, but when he begins tracking it with a theodolite, he realizes it is white, not red. It looks like a half circle with sunlight gleaming from its sloped top. He follows it for 3 minutes, but then it accelerates and he cannot keep it in sight. (James E. McDonald, “Statement on Unidentified Flying Objects,” in Symposium on Unidentified Flying Objects, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, p. 63)

December 9 — Giovanni Aquilante, a farmer of Gricignano d’Aversa, Caserta, Italy, disappears after leaving home to work in the fields. His family and police fail to find him. On December 10, near 12:00 midnight, two of Aquilante’s sons and a friend see two mysterious entities with luminous eyes in a field. They quickly vanish. Aquilante returns home on the morning of December 11, silent and shocked, and explains that he met two “dwarfs” in the field wearing multicolored suits. They float him in the air and take him to “unknown places.”
They release him, but promise to come back for him later. Aquilante is terrified of being abducted again. (1Pinotti 89)

December 9 — Evening. Farmer Olmiro de Costa e Rosa is feeding his animals at Linha Bela Vista, said to be 2.5 miles from Venâncio Aires, Rio Grande do Sul, Brazil, when he hears a sound like a sewing machine that causes some of his cows to run. An object shaped like an “enormous polished brass kettle” with a rectangular structure on top is hovering in the air with an oscillating motion. Two small humanoids “enveloped in a kind of yellow sack from head to toe” are standing in a nearby field. As he approaches, one runs toward him and the other raises its arm. The first one kneels down and plucks a tobacco plant from the field, then both jump into the craft, which vanishes within a few seconds. (Patrick Gross, URECAT, December 27, 2007)

December 9 — Night. Lorenzo Flores and Jesús Gómez are hunting rabbits near an unfindable town called Carera along the Transandean Highway in Venezuela. They run across a huge red UFO like two washbowls put together hovering above the road with flames spurting out. Four small hairy figures, 3 feet tall, scramble out and grab Gómez and try to drag him toward the craft. Flores strikes one with his gun butt, but it has no effect and feels like striking rock. The wooden rifle butt cracks from the impact. Gómez faints from fright, and both men are scratched and bruised. A passing motorist takes them to a police station, their clothes torn and skin abraded. When they tell their story to the police, it is obvious that their shirts have been shredded into ribbons. (“Hunters Clawed and Beaten,” APRO Bulletin 3, no. 4 (January 15, 1955): 2; Lorenzen, FS Hoax, pp. 56–57; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 November–December, The Author, 1991, pp. 51–52; Mark Cashman, “Behavioral Classification System for UFO Occupants,” IUR 24, no. 1 (Spring 1999): 18)

December 10 — 6:30 p.m. A doctor is driving near Generalissimo Francisco de Miranda Air Base in Caracas, Venezuela, when he and his father see two little men running near the road and ducking into shrubbery. Moments later a UFO rises up from the same spot and zooms away. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 November–December, The Author, 1991, p. 52; “Doctor Sees Little Men, Disc,” APRO Bulletin 3, no. 4 (January 15, 1955): 4)

December 14 — 11:00 a.m. Three bright lights appear in the sky above Curitiba, Paraná, Brazil. Around 12:00 noon, they descend to a lower altitude, and witnesses see they are metallic discs. The Brazilian Air Force scrambles some jets, but they fail to intercept any of the objects. By 1:00 p.m., several groups of witnesses around the city are watching when two of the objects take off to the south, while the third comes closer and approaches some buildings in the city center. Chief of Police Col. Carlos Assunção sees a “reddish and slightly bluish object” moving at incredible speed. Maxim Cicaida, a professional photographer for Foto Heisler, snaps a photo of the disc above a building. He sends the negatives to the Brazilian Naval School in Rio de Janeiro, but they are never returned, and no analysis is released. (Brazil 29–31)

December 15 — A man is fishing in a river near Campo Grande, Mato Grosso do Sul, Brazil, when he sees an unusual object landing a few hundred feet away. His dog gets nervous and begins to howl. He uses his telescopic gunsight to get a closer look. He sees two spheres of different sizes, the smaller one revolving around the larger one, which is about 6 feet above the ground and has three balls attached to its underside. Soon he sees small beings come down from the large object, moving rapidly. One is holding a phosphorescent bucket, and another has a metallic tube that is cone-shaped at one end. They use these tools to collect calcareous soil from the riverbank. They take two buckets’ worth inside the craft, which then takes off. The witness later finds square-shaped holes in the riverbank. Col. Adil de Oliveira of the Brazilian Air Force has the soil analyzed and it yields a composition of 61% silica, 19% aluminum oxide, 11% magnesium and iron, with other trace elements. (Lorenzen, Flying Saucer Occupants, Signet, 1967, pp. 195–196)

December 16 — Jesús Paz, Luis Mejía, and another young man are driving home after dinner at a restaurant in San Carlos, Venezuela, when Paz stops to relieve himself in a park. He claims he is jumped by a hairy dwarf from a flying disc (both of which his friends see when he screams). His friends rush the unconscious Paz to a hospital. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1954 November–December, The Author, 1991, p. 60; Mark Cashman, “Behavioral Classification System for UFO Occupants,” IUR 24, no. 1 (Spring 1999): 18)
December 19 — 11:00 p.m. José Parra, an 18-year-old jockey, watches a disc-shaped UFO land in Valencia, Venezuela. Six 3-foot-tall humanoids disembark and set about collecting vegetation samples and loading stones into the disc. When he tries to approach them, he is paralyzed by a violet beam aimed at him by one of the creatures. All the short beings enter the craft and it takes off. The UFO leaves behind ground traces. (Clark III 270; ““Little Men’ Fail in Kidnap Attempt!”’ APRO Bulletin 3, no. 4 (January 15, 1955): 3; Patrick Gross, URECAT, November 24, 2006)

December 20–21 — A group of Dorothy Martin’s followers has gathered at her Oak Park, Illinois, home to await the midnight arrival of a flying saucer that is to rescue them from planetary disaster. They have left jobs, college, and spouses, and given away money and possessions to prepare for their departure. When no spaceman arrives, the group sits in stunned silence. Martin begins to cry, and at 4:45 a.m. she receives a message by automatic writing saying that the God of Earth has decided to spare the planet from destruction. The cataclysm has been called off: “The little group, sitting all night long, had spread so much light that God had saved the world from destruction.” The group begins an urgent campaign to spread its message to a broader audience. (Leon Festinger, Henry Riecken, and Stanley Schachter, When Prophecy Fails, Harper Torchbooks, 1956; Wikipedia, “When Prophecy Fails”; Clark III 718–719)

December 26 — Dorothy Martin has been tasked with reviewing UFO reports in the RAAF files and writing an assessment for the Australian Directorate of Air Force Intelligence. Now in England, he sends the report to the Secretary, Department of Air, in Melbourne, Victoria. He writes: “If one assumes these Intelligence reports are authentic, then the evidence presented is such that it is difficult to assume any interpretation other than that unidentified flying objects are being observed…. Indeed, the superiority is such that it is highly improbable that such objects have a terrestrial origin…. The evidence presented by the reports held by the RAAF tend to support the above conclusion—namely that certain strange aircraft have been observed to behave in a manner suggestive of an extra-terrestrial origin.” Turner goes on to recommend appointing at least one full-time investigator; publicity to encourage more people to report sightings; a liaison with the USAF to exchange information and verify Keyhoe’s claims; liaison with the RAF and the possibility of forming a panel to assist in analyzing reports. The Director of RAAF Intelligence checks with USAF on the reliability of Keyhoe’s work, and they ultimately reject it as impractical and unjustified. (Project 1947, “The Former Air Board / Department of Air / Current RAAF”; Bill Chalker, “UFO’s Sub Rosa, Down Under: The Australian Military and Government Role in the UFO Controversy,” 1996; “The Project Interviews Harry Turner,” Disclosure Australia Newsletter, no. 16, September 2004)

December 26 — 8:30 p.m. Willis St.-Jean, a hoistman at the Agaunico Mine on the shore of Lake Timiskaming northeast of Cobalt, Ontario, sees a bright white light maneuvering in the sky. He calls John Hunt, a reporter at the North Bay Nugget office in Cobalt, to drive 3 miles to the mine to view it. The light is emanating from a large, rotating, slightly wedge-shaped disc. They watch the object for an hour after he arrives there. It circles, moves away, dances in the sky, disappears (apparently when it banks), and returns repeatedly, and at one point it flies over the lake, illuminating the surface. It disappears for good shortly after 10:15 p.m. (John Hunt, “Reporter Sees ‘Saucer’ over Cobalt Mine,” North Bay (Ont.) Nugget, December 27, 1954, p. 1)

December 27 — Elizabeth Klarer, having been alerted by her sister May that the local Zulu people are reporting appearances of a mythical lightning bird in the sky, travels from Johannesburg, South Africa, with her children to a hill southwest of Rosetta, KwaZulu Natal, that she later calls Flying Saucer Hill. There she claims to see a star ship descend and hover 8 feet above the ground, emitting a soft hum. Its hull is spinning, though its central dome remains stationary. The friendly extraterrestrial Akon, with whom she has been in telepathic contact, is clearly visible through one of three portholes, but a blast of heat emanating from the ship prevents her from approaching. The UFO leaves by shooting high into the sky. (Clark III 657; Elizabeth Klarer, Beyond the Light Barrier, Howard Timmins, 1980)

December 28 — The NSC 5412/2 Special Group, often referred simply as the Special Group, is an initially secret, but later public, subcommittee of the US National Security Council responsible for coordinating government covert operations. Presidential Directive NSC 5412/2 assigns responsibility for coordination of covert actions to representatives of the Secretary of State, the Secretary of Defense, and the President respectively. All proposals pass through the Special Group on the way to Richard Helms at the CIA, who is responsible for covert operations. It changes names several times to avoid public exposure. In 1964, it is known as the 303 Committee, and in 1970 it is renamed the 40 Committee. Within this organization—which includes such familiar names as Nelson Rockefeller, Robert McNamara, McGeorge Bundy, Gordon Gray, and Allen Dulles—is a subcommittee dealing with science and technology. It is here that the connection between the corporate and financial world and government-held technological secrets can be found. (Wikipedia, “Oversight of United States covert operations”
December 30 — Fifty residents of Lima, Peru, watch a flight of 5 iridescent silver UFOs for at least 5 minutes. (La Nación, December 31, 1954)

1955

Early 1955 — A secure test site is needed for the CIA Project Aquatone (the Lockheed U-2 spy plane). Lockheed test pilot Kelly Johnson sends project pilot Tony LeVier and Skunk Works chief foreman Dorsey Kammerer on a two-week survey mission to scout locations for a new base in an unmarked Beechcraft V-35 Bonanza. CIA official Richard M. Bissell Jr reviews 50 potential sites with USAF liaison Col. Osmond J. Ritland. None seem to meet the stringent requirements of the program. They reject Johnson’s proposed Site I (Mud Lake?) because it is too close to populated areas. Ritland recalls a “little X-shaped field” just off the eastern side of Groom Lake, Nevada, just outside the AEC nuclear proving ground at Yucca Flat. (Peter W. Merlin, “Groom Lake Timeline: The First Fifty Years,” Secret Heroes, November 10, 2021)

1955 — Project Rover, a US project to develop a nuclear-thermal rocket, is initiated at the Los Alamos Scientific Laboratory, New Mexico, and runs until January 1973. It begins as an Air Force project to develop a nuclear-powered upper stage for an intercontinental ballistic missile. The project is transferred to NASA in 1958 after the Sputnik crisis. It is managed by the Space Propulsion Office, a joint agency of the Atomic Energy Commission and NASA. Project Rover becomes part of NASA’s Nuclear Engine for Rocket Vehicle Application (NERVA) project and henceforth deals with the research into nuclear rocket reactor design, while NERVA involves the overall development and deployment of nuclear rocket engines and the planning for space missions. (Wikipedia, “Project Rover”; Wikipedia, “NERVA”; Jacobsen, Area 51, pp. 303–312)

1955 — Otis T. Carr founds OTC Enterprises in Baltimore, Maryland, to advance and supply technology originating from ideas of Nikola Tesla. Carr claims he met Tesla while working as a night clerk in New York City’s Hotel Pennsylvania, where Tesla was living in the late 1920s. Tesla befriended Carr and revealed to him secrets he was not ready to make public yet. Carr attracts the funding of local businessman Wilfred C. Gosnell. Soon he hires a promotions man named Norman Evans Colton and sends out regular information bulletins to investors. (Clark III 860)

1955 — After selling his share of Fate magazine to Curtis and Mary Margaret Stiehm Fuller, Ray Palmer founds a would-be competitor, Mystic (later Search) and several short-lived SF titles. Other Worlds evolves in 1957 into Flying Saucers, a more or less nonfiction magazine that features articles of widely varying credibility and a column of saucer fan-club news. (Clark III 873)

1955 — George Adamski’s Inside the Space Ships, ghostwritten by Adamski follower Charlotte Blodget, is published by Abelard Schuman in the United States and Foster and Scott in Canada. Adamski claims that Orthon arranged for him to be taken on a trip to see the Solar System, including the planet Venus, the location where Orthon said the late Mary Adamski had been reincarnated. He claims that in another voyage he met the 1,000-year-old “elder philosopher of the space people,” who is called “the Master.” Adamski says he and the Master discussed philosophy, religion, and the “Earth’s place in the universe.” Adamski learns that he has been selected by Nordic aliens to bring their message of peace to Earth people and that other humans throughout history have also served as their messengers, including Jesus Christ. Adamski further claims that aliens are peacefully living on Earth, and that he has met with them in bars and restaurants in Southern California. (George Adamski, Inside the Space Ships, Abelard-Schuman, 1955; Clark III 40; Lou Zinsstag and Timothy Good, George Adamski: The Untold Story, Ceti, 1983; David Stupple, “The Man Who Talked with Venusians,” Fate 32, no. 1 (January 1979): 30–39)

Early January — Dorothy Martin leaves the Chicago area for Prescott, Arizona, home of the like-minded George Hunt Williamson, after being threatened with arrest and involuntary commitment. She later founds the Association of Sananda and Sanat Kumara. Under the name Sister Thedra, she continues to practice channeling and participate in contactee groups until her death in 1992. (Clark III 719)

January 3 — 4:00 p.m. Félix Galarraga and Gerardo Izuesta see a red balloon-like object about 7–10 feet in diameter land near Oiartzun, Spain. Galarraga rushes towards it, but the UFO rises and speeds away. From a separate location, brothers Miguel and Martín Arraspio also see the object descend. Possibly another Radio Free Europe balloon

January 7 — The Air Force Information Services Letter warns that service members are talking too much about UFOs. (Ruppelt, p. 228)

January 14 — 5:30 p.m. A luminous UFO drops from the sky near Idyllwild, California. Immediately afterwards, a B-47 pilot reports to March AFB [now March Air Reserve Base] near Riverside, California, that an “unknown object just hit our wing.” The pilot guides the plane to a landing. No trace of a crashed object can be found. (Keyhoe, *FS Conspiracy*, pp. 247–248)

January 31 — 2:00 a.m. Peruvian Air Force Commander Guillermo Serpa and Col. Juan Rodriguez Caverio are returning to El Pata Air Force Base near Talara, Peru, by car through the Sechura Desert on the Pan-American Highway 1N when they see a bright light in the sky ahead. The object, a deep red domed disc, draws nearer and Serpa stops the car to observe it. It tilts slightly toward them, making occasional clicking sounds. Several minutes later it accelerates quickly in their direction, changing to a bright orange color then to a bright white as it shoots past them at terrific speed. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs a History: 1955, January–June, Supplemental Notes*, The Author, 2002, pp. 14–18)

February 1 — 7:55 p.m. Instructor Capt. Delwyn F. Ritzdorf and aviation cadet Frederick W. Miller are flying a TB-25 bomber-trainer about 20 miles east of Cochine, Arizona, at 13,000 feet and 238 mph when they see a bright round object with red and white hues. It approaches them then hovers off the left wing for 5 minutes about 5° above the horizontal. Radio interference prevents Ritzdorf from reporting the sighting. The object climbs rapidly on a parallel flight track for 3 minutes before pulling away at 500–600 mph and disappearing. (NICAP, “Huge Metallic Disc Paces B-25”)

February 2 — Aviation inventor Bill Lear, during a press conference in Bogotá, Colombia, states his belief that “flying saucers came from outer space and are piloted by beings of superior intelligence.” He suspects that they might use gravitational fields as propulsion. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 January–June*, The Author, 1992, p. 18)

February 2 — 11:15 a.m. A Venezuelan Aeropostal airliner piloted by Captain Dario Celis is flying between Barquisimeto and Valera, Venezuela, at 7,500 feet. Celis and his copilot B. J. Cortes spot a strange, round “apparatus” flying swiftly toward the plane. Rotating counterclockwise, the object shines with a greenish light. Around its center is a red ring or band that emits flashes of bright light. Above and below this band are lighted portholes. Hurriedly the pilot cuts in his mike to call the Barquisimeto radio station. After reporting the UFO, he waits for an answer, but the receiver is dead. Later the radio operators state that just as the pilot began his report, communication is cut off. The copilot banks toward the rotating UFO. Instantly the object whirls downward, then levels off, and races away at tremendous speed. (NICAP, “Plane Encounters Saucer and Radio Goes Dead”; Keyhoe, *FS Conspiracy*, pp. 249–250)

February 6 — Several witnesses in Greymouth, New Zealand, see a dazzling, silvery, cigar-shaped object moving inland at a high speed. Two observers see it consisting of two parts, with the leading part larger than the other. A loud explosion like a thunderclap is heard, causing the earth to tremble slightly. (“World Roundup,” *Flying Saucer Review* 1, no. 2 (May/June 1955): 8)

February 10 — 9:30 p.m. Many residents of Caracas, Venezuela, see a strange object crossing the sky silently from northeast to southwest. José Agustín Díaz in Altamira clocks its time as 6–8 minutes. It looks like a disc with two bright, pulsating, bluish lights on the underside. (Lorenzen, *UFOs: The Whole Story*, Signet, 1969, p. 64)

February 15 — ATIC sends a memo to Maj. Joseph A. Cybulski, commander of the 4602nd AISS at Ent AFB [now the US Olympic Training Center] in Colorado Springs, Colorado, complaining about the high number of unknowns. It suggests that AISS and ATIC “strive to reach as many case solutions as possible, thereby reducing the percentage of the unknowns to a bare minimum.” As long as there is sufficient information, most cases “will fit to some extent one of the hypotheses.” The probable and possible cases are merged into the “identified” category. (Maj. T. G. Connair Jr., “Evaluation of Unidentified Flying Objects,” February 15, 1955, in CUFON, “4602d AISS Unit History Sampler, Part 7 of 7 Parts”)

February 18 — The nuclear Teapot Wasp test takes place at the Nevada Test Site. Ground forces take part in Exercise Desert Rock VI, which includes an armored task force Razor moving to within 3,000 feet of ground zero, under the still-forming mushroom cloud. (Wikipedia, “Operation Teapot”)

...
February 21 — Early morning. “Cobwebby gray fibers” fall in Horseheads, New York, covering one-half square mile. Some “ragged sheets” are many feet in length. Chemist Charles B. Rutenber of Elmira College in Elmira, New York, describes it as “badly damaged, slightly radioactive cotton fiber” that might have come from a Nevada atomic test. He concludes it is a “short-staple cotton, possibly lint from waste cotton used in industrial plants.” John B. Diffenderfer, a chemist at a local Westinghouse laboratory, finds it is 30% carbon, with calcium, silica, aluminum, iron, and 10 other trace elements. He thinks it comes from powdered milk residue, perhaps from the Dairylea milk processing plant in Elmira. But milk plant chemists Louis R. Hermani and Robert L. Mix say the material is composed of “cotton and wool fibers with pieces of fine copper wire mixed in” and looks like it comes from a carpet sweeper bag. (“Further Tests Made of Fibers Collected in Horseheads Area,” Elmira (N.Y.) Star-Gazette, February 23, 1955, p. 13; Brian Boldman, “Angel Hair Physical Analyses: A Review,” JUFOS 9 (2006): 101–102)

February 23 — 8:30 a.m. Frederick S. Briggs, a bricklayer and former army sergeant employed at Broadlands, Romsey, Hampshire, England, the manor then owned by Lord Mountbatten, Prince Philip’s uncle, sees a large disc-shaped UFO over a nearby meadow as he is bicycling to work. The object is shaped like a spinning top, metallic, and about 20–30 feet in diameter with portholes around the center. Watching from less than 100 yards away, Briggs estimates that the object is 80 feet above the ground. He sees a humanoid figure dressed in what look like overalls and a helmet descend from the craft on some sort of column with a platform at the bottom. He is then dazzled by a bright blue light from the craft and falls over, unable to move, as if held by a strange force. The UFO then flies off at high speed. Mountbatten takes a personal interest in this incident, interviews Briggs, and searches the area of the meadow over which the UFO is seen. He subsequently has a statement prepared, detailing Briggs’s claims. This story is written up by Desmond Leslie in Flying Saucer Review in 1981. Mountbatten’s signed statement on the incident is held with many of his other private papers at the Broadlands Archive. (Desmond Leslie, “Did Flying Saucers Land at Broadlands?,” Flying Saucer Review 26, no. 5 (January 1981): 2–4; Good Above, pp. 40–42, 451–454)

March — Technician and businessman Morris K. Jessup publishes The Case for the UFO, the first book to use the relatively new US Air Force term “UFO” instead of flying saucer. He engages in speculation about Fortean phenomena, ancient astronauts, levitating forces to explain megalithic structures, and experiments in ancient times with flight and even space flight. He identifies 1877–1887 as an “Incredible Decade,” in which astronomers observe strange space objects, and meteorologists note strange falls from the sky. He speculates that mysterious disappearances of ship crews might constitute a curiosity among “our space friends” on “what has happened to us since they put us down here.” (Morris K. Jessup, The Case for the UFO, Citadel, 1955; Clark III 634; Story, p. 51)

March — James S. Rigberg, owner of the Flying Saucer Bookstore in New York City, begins publishing Flying Saucer News as the official publication of the Flying Saucer News Club of America, founded in 1953. It is published twice a year until at least May 1982. (Flying Saucer News 1, no. 1 (March 1955))

March — The CIA obtains quantities of Hemophilus pertussis, whooping cough bacteria, from Fort Detrick in Frederick, Maryland. The agency field tests it covertly along Florida’s Gulf Coast. The incidence of whooping cough triples this year, but the CIA’s role remains unknown until 1979. (Bill Richards, “Report Suggests CIA Involvement in Fla. Illnesses,” Washington Post, December 17, 1979)

March 1 — The Douglas Aircraft Company is conducting a study of “Unconventional Propulsion Schemes/Systems” for the USAF Air Technical Information Center from 1954 to 1955, headed by Wolfgang Klemperer, who writes a memo to E. P. Wheaton that says: “Our studies of the possible merit or significance of occasionally appearing publications concerning Unconventional Propulsion Systems have been carefully continuing since the first memo (MTM-622) about the progress to mid-December 1954.” Apparently the project examined some UFO reports (including Willis Sperry’s) and UFO books. (Douglas Aircraft Company, “Unconventional Propulsion Schemes,” MTM-622, March 1, 1955; Keith Basterfield, “Documents Located from that 1955 ‘Secret’ UAP Study by Douglas Aircraft Company,” Unidentified Aerial Phenomena—Scientific Research, January 11, 2019)

March 11 — 7:50 p.m. Lawrence Grab and his son see a brilliant flash of light from their home at 714 West Lakeside Street in Madison, Wisconsin, then watch a phosphorescent object speed over the city from southwest to northeast. (“Season’s First Saucer Flies in at High Speed,” Madison Wisconsin State Journal, March 12, 1955, p. 7)

March 12–13 — George Van Tassel’s second Giant Rock Interplanetary Spacecraft Convention in the Mojave Desert near Landers, California, attracts a smaller crowd than the first. This time George Adamski is in attendance, along with Charles Laughead, Dorothy Martin, George Hunt Williamson, Dana Howard, Daniel Fry, Truman Burhunum, and Dick Miller. Retired USAF Project Blue Book head Edward J. Ruppelt is in the audience and writes up a report.

March 24 — 2:30 p.m. The pilot of a private Beechcraft plane is flying at 1,500 feet with a student in the Ryukyu Islands, Japan. They see a domed disc with three windows about 900 feet on their left that appears to change color from white to orange and back again. Over the next few minutes, the object flies over, in front of, and under the airplane. When the pilot puts the plane into a dive, the craft stays with it. The plane’s instruments stop working. The pilot makes a steep right turn but the object still paces the plane. When the Beechcraft’s engine begins to stall, the pilot calls Naha Airport on Okinawa, which alerts the US Kadena Air Base. Two jets are scrambled, but by the time they arrive the object is long gone. (Lorenzen, UFOs: The Whole Story, Signet, 1969, pp. 65–66)

March 29? — Early morning. A bus driving past Wright-Patterson AFB near Dayton, Ohio, sees a silver, triangular object hovering above the base for 15 minutes. (“Sightings,” APRO Bulletin, August 1955, p. 9)

April — Flying Saucer Review is launched in London, England, as a small-circulation quarterly, with aviation journalist and former RAF pilot Derek Dempster as its first editor. (Denis Montgomery, “How It All Began: Founding the Flying Saucer Review,” May 5, 2004; Flying Saucer Review 1, no. 1 (Spring 1955); Clark III 498)

Early April — Pentagon press officer Capt. Robert White writes to Claude H. Mark Jr., an interested citizen in Colorado, that Dewey Fournet’s motion studies project was a personal endeavor, that the probability of UFOs being spacecraft is “extremely remote,” and that the Air Force does not try to influence public opinion on the matter. (Swords 209–210)

April — U-2 project director Richard M. Bissell Jr. secures a presidential action adding the Groom Lake area in Nevada to the AEC proving grounds for CIA use. Kelly Johnson meets with CIA officials in Washington, D.C., and discusses progress on Project Aquatone, proposing to use the name “Paradise Ranch” for the new base. (Peter W. Merlin, “Groom Lake Timeline: The First Fifty Years,” Secret Heroes, November 10, 2021)

April 5 — 9:55–10:15 a.m. Three or four fireballs fall in various places in southern New Mexico. Air Force Sgt. Camilla Saenz is stationed on Sacramento Peak near Cloudcroft when she sees a yellow fireball with a red tail traveling fast from east to west on the south side of the peak. An airplane from Biggs Air Force Base [now Biggs Army Airfield] in El Paso, Texas, sees an apparent meteor strike near Weed, New Mexico, but USAF planes comb the area for 2 hours afterward without finding anything. Bill Watson sees a dark object smash into the earth near Oil Center, New Mexico, but he can find no fragments. Lincoln LaPaz reports that heavy shortwave and TV interference accompanied the appearance of the fireballs. (“Fireballs Shower on State,” Alamogordo (N.Mex.) Daily News, April 6, 1955, p. 1)

April 5 — Producer Ivan Tors debuts Science Fiction Theatre, a science fiction anthology TV series that presents scientifically plausible stories in an unsensational manner. Many episodes deal with UFO or alien themes, including the season opener, “Beyond,” in which a test pilot bails out and loses his plane because he thinks he’s going to crash into a UFO. The program runs 78 episodes through 1957 and is hosted by veteran announcer Truman Bradley. Each episode opens with Bradley on a laboratory set, sometimes quoting from a recent Scientific American article, and he discusses and demonstrates a scientific principle that plays a role in the story he is introducing. (Internet Movie Database, “Science Fiction Theatre”; Curt Collins, “The UFO Message of Science Fiction Theatre,” The Saucers That Time Forgot, January 18, 2019)

April 6 — Night. Three unusual green fireballs pass over New Mexico. Radio and TV interference are reported over a wide area. (Keyhoe, FS Conspiracy, pp. 264–265)

April 8 — 9:25 p.m. Three residents of Albuquerque, New Mexico, watch a blue-green fireball streak west over the city. It appears to have a rose-orange tail. (“Fire Balls Again Seen over City,” Albuquerque Journal, April 9, 1955, p. 1)

April 25 — 1:00–1:30 a.m. Residents and motorists see a brilliant fireball streak across the sky above Council Bluffs, Iowa. State Highway Patrolman John Ebert says the light was as bright as an arc welder. One resident sees the light burst into flame and drop to earth. Witnesses in Nebraska think the fireball descends about 3 miles southeast of Waverly, Nebraska. (Council Bluffs (Iowa) Nonpareil, April 25, 1955; Nukes 93)

April 30 — A member of the Soviet Academy of Sciences tells a radio audience that UFOs do not exist. (Ruppelt, pp. 238–239)

May — The UK Air Ministry announces that the report in March on a five-year investigation into UFOs by the RAF has been submitted to high-ranking officers, but the results cannot be released publicly for security reasons. MP Maj.
Patrick Wall asks the Under-Secretary of State for Air George Ward to confirm whether or not he would publish a report. Ward replies that only 10% of UFO reports are unidentified and that is because of lack of data. (Derek Dempster, [Editorial], Flying Saucer Review 1, no. 2 (May/June 1955): 1; Good Above, p. 43; UFOFiles2, p. 60–61)

May — 15-year-old Jacques Vallée and his mother see a “gray, metallic disc with a clear bubble on top” hovering above a church in Pontoise, France. (Jacques Vallée, Forbidden Science, North Atlantic, 1992, pp. 15–16)

May 4 — A survey team arrives at Groom Lake, Nevada, and lays out a 5,000-foot north to south runway on the southwest corner of the lakebed and designates a site for a base support facility. The “Ranch” initially consists of little more than a few shelters, workshops, and trailer homes in which to house its small team. In a little over three months, the base consists of a single paved runway, three hangars, a control tower, and rudimentary accommodations for test personnel. The few amenities include a movie theater and volleyball court. There is also a mess hall, several wells, and fuel storage tanks. (Wikipedia, “Area 51”; Peter W. Merlin, “Groom Lake Timeline: The First Fifty Years,” Secret Heroes, November 10, 2021)

May 22 — Journalist Dorothy Kilgallen writes in the Los Angeles Examiner that “British scientists and airmen” have examined the wreckage of a crashed flying saucer. Her informant is a “British official of Cabinet rank,” who tells her that the “saucers were staffed by small men—probably under four feet tall.” Flying Saucer Review editor Gordon Creighton later researches this story in detail and thinks Kilgallen’s source is First Sea Lord Louis Mountbatten. Some suggest that Kilgallen picked the story up at a cocktail party hosted by Mountbatten. Her story is widely dismissed as a hoax, but other events put her claims in a new light. (“U.F.O. Crash in Britain?” Flying Saucer Review 1, no. 3 (July/Aug. 1955): 6; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 January–June, The Author, 1992, p. 69; Good Above, pp. 43–44)

May 23–26 — At the Fifth AISS Commander’s Conference at Ent AFB [now the US Olympic Training Center], Colorado Springs, Colorado, an analysis of UFOs and science fiction is presented that notes: “General public not qualified to evaluate material propounded in science fiction. Absurd and fantastic theories given credence solely on the basis of ignorance.” Also, “Abnormal predisposition to attach belief to the more fanciful aspects of UFOBs, e.g. ‘Flying Saucers’ would tend to negate the source’s reliability as a factual observer.” (“Report of Fifth Commander’s Conference, 23 May to 26 May 1955,” in History of 4602d Air Intelligence Service Squadron, vol. 2, January 1–June 30, 1955, reprinted in CUFON, “4602d AISS Unit History Sampler, Part 7 of 7 Parts”)

May 24 — 7:48 p.m. GOC spotter Charlotte Whitecott and another woman at Loveland, Ohio, watch four UFOs in formation pass low over their enclosure, then zoom to the north. They report the incident to the Columbus Filter Center. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 January–June, The Author, 1992, p. 71; Isabel Davis and Ted Bloecher, Close Encounter at Kelly and Others of 1955, CUFOS, 1978, pp. 145–146)

May 25 — Around 3:30 a.m. Robert Hunnicut is driving along the Loveland-Madeira Road in the Branch Hill area of Loveland, Ohio. At the Hopewell Road intersection, his headlights illuminate three short figures kneeling next to the road. They are grayish humanoids with a wide slit for a mouth, an indistinct nose, and normal eyes without eyebrows. The heads are hairless with prominent wrinkles on the forehead. They are wearing one-piece grayish garments. One arm seems longer than the other and the upper torso is lopsided. One of the figures is holding a rod emitting blue-white sparks. Hunnicut gets out of the car and walks towards them. They look towards him and there is a 3-minute standoff. Hunnicut goes to the police station and returns with Police Chief John K. Fritz. No trace of anything is found. (Stringfield, 3-0 Blue, CRIFO, 1957, pp. 66–68; Stringfield, Situation Red, Fawcett Crest, 1977, pp. 115–116; Isabel Davis and Ted Bloecher, Close Encounter at Kelly and Others of 1955, CUFOS, 1978, pp. 138–148; Clark III 270; Rob Ryder, “On the Trail of the Loveland Frogman,” Fortean Times 361 (Christmas 2017): 38–41)

Summer — 12:30 a.m. Dumitru Coca watches a strange object emitting a ring of white sparks at an altitude of 3,000 feet above Hărşeni, Romania. It is blue with white stripes and flying noiselessly at high speed. He watches it for 3 minutes. (Hobana and Weverberh 229–230; Romania 11)
June — **James W. Moseley** renames *Nexus* as *Saucer News* and it becomes a popular bimonthly UFO magazine. (Clark III 1032)

June — Cincinnati, Ohio, businessman Thomas Eickhoff buys a copy of **George Adamski**’s *Inside the Space Ships*. Upset with Adamski’s statement that his space contacts can be corroborated, he takes steps to take him to federal court to make him prove his story or face fraud for using the US mail system to sell his book. Eickhoff’s lawyer brings in a government adviser who advises them to drop the lawsuit. Eickhoff’s efforts eventually bring a reply from a lawyer for CIA Director **Allen Dulles**, who says the problem is that Adamski could “prevent anyone from testifying in court concerning this book because maximum security exists concerning the subject of UFOs.” The lawyer says he would be subject to a countersuit. (Stringfield, *Situation Red*, Fawcett Crest, 1977, pp. 169–170; Good Above, pp. 341–342)

June 4 — A Boeing RB-47 reconnaissance aircraft of the Air Force Special Security Service (air arm of NSA?) tracks an unknown object visually and by radar for 9 minutes near Melville Sound, Nunavut, Canada. The crew chief describes it as “glistening silver metallic.” The crew obtains gun camera film, but of poor quality. The object speeds off to the north. (Good Above, p. 285; Sparks, p. 226)

June 5 — 7:30 p.m. François-Gilbert Muyldermans is cycling on a deserted road near Saint-Marc, near Namur, Belgium, when he sees a bright disc moving at a high speed at an altitude of around 4,900 feet. He takes out his camera and snaps a photo. The object descends, then rises again emitting a cloud of white smoke. He takes two more photos. Anomalies in the blurred grain, inconsistencies in orientation, and the circumstances by which the story entered UFO lore suggest a deliberate hoax, perhaps with the help of a journalist. (“A ‘Classic’ from Belgium,” *BUFORA Journal* 4, no. 12 (March/April 1976): 12–13; Vicente-Juan Ballester Olmos and Wim van Utrecht, *Belgium in UFO Photographs, Volume 1* (1950–1988), FOTOCAT Report no. 7, 2017, pp. 38–69)

June 7 — An RB-47 en route to Eielson AFB, Fairbanks, Alaska, registers an electronic contact southeast of Banks Island, Northwest Territories, Canada, at 10,500 feet range. The radar return is small and rectangular. (Good Above, p. 286; Sparks, p. 227)

June 13 — **Frank Edwards** travels with a TV film producer to the Navy Department at the Pentagon and asks for some unclassified photos of rockets. When the Navy learns that Edwards wants to show them on TV during a panel discussion on UFOs, the office refuses to cooperate. (Keyhoe, *FS Conspiracy*, p. 269)

June 23 — 12:15 p.m. A Mohawk Airlines DC-3 is cruising at 3,000 feet in good daylight visibility about 15 miles east of Utica, New York, on a heading to Albany. Both pilot and copilot see an object come over the top of the aircraft from behind, an estimated 500 feet above their altitude. They estimate the length of the object at about 150 feet. It is described as “light gray, almost round, with a center line .... Beneath the line there were several (at least four) windows which emitted a bright blue-green light. It was not rotating but went straight. [The lights] seemed to change color slightly from greenish to bluish or vice versa [as the object receded]. A few minutes after it went out of sight, two other aircraft (one, a Colonial DC-3, the other I did not catch the number) reported that they saw it and wondered if anyone else had seen it. The Albany control tower also reported that they had seen an object go by on Victor-2 [airway]. As we approached Albany, we overheard that Boston radar had also tracked an object along Victor-2, passing Boston.” (NICAP, “150’ Object Passes over DC-3 Crew from Behind”; Condon, p. 143)

June 25 — 10:45 p.m. Two civilian and two military witnesses see a yellow, shining sphere with a trail 4–5 times its length over Hillcrest Heights, Maryland. It appears to oscillate in the air, stops, oscillates again, then finally moves away at high speed. It travels nearly overhead and then is lost in the sky at a 45° elevation. It is visible for 7 minutes. (Michael D. Swords, “Air Force UFO Investigations in the Mid-1950s,” *IUR* 29, no. 3 (Fall 2004): 8–10)

June 26 — Several civilian and military witnesses in Holt, Florida, see a disc with blinking lights. (Sparks, p. 227; Michael D. Swords, “Air Force UFO Investigations in the Mid-1950s,” *IUR* 29, no. 3 (Fall 2004): 10; Hynek UFO Report, p. 45)

June 26 — 10:45 p.m. A brilliant round object with a trail 4–5 times its own length approaches National Airport in Washington, D.C., stops, oscillates, and moves off at high speed. Ceiling lights at the airport go out when the object approaches and return to operation when the UFO leaves. Searchlights are trained on the object, but when they catch it in their beams, the searchlights go out. A check with the Silver Hill Observatory in Hillcrest Heights, Maryland, determined that a small weather balloon carrying a magnesium flare was released about the same time as the visual sighting. (Aimé Michel, *Straight-Line*, p. 236; Schopick, p. 21; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1955–January–June*, The Author, 1992, pp. 84–85)

June 29 — The Second Hoover Commission presents its final report to Congress on streamlining procedures in the executive branch. Gen. **Mark W. Clark**, heading the commission’s task force on intelligence, notes the CIA’s lack of accountability and recommends establishing an intelligence oversight committee. (Wikipedia, “*Hoover Commission*”; Richard A. Best Jr. and Herbert Andrew Boerstling, “Proposals for Intelligence Reorganization,”...
June 30 — The 4602nd AIISS reports that of its 194 preliminary UFO reports for 1955, it has made 23 field investigations and has 25 unsolved reports, or an unknown rate of 13%. Going back to August 12, 1954, and removing cases of insufficient evidence, the percentage of unknowns is lower: 23 unknowns from 306 reports, or about 7.5%. In reality, however, none of these numbers mean much; they reflect the creativity and audacity of the explainers at ADC and ATIC.

Late June or early July — Early evening. A 19-year-old Civil Defense worker named Carlos Flannigan is driving a truck across a bridge over the Little Miami River near Loveland, Ohio, when he notices 4 small figures about 3 feet high on the riverbank. A terrible smell hangs over the area. He only watches them for about 10 seconds then immediately drives to police headquarters to report the incident. (Isabel Davis and Ted Bloecher, Close Encounter at Kelly and Others of 1955, CUFOS, 1978, pp. 129–132; Patrick Gross, URECAT, February 14, 2008)

July — Construction of the Groom Lake base in Nevada is completed and the CIA begins utilizing it, along with the US Air Force, for Project Aquatone, the development of the Lockheed U-2 strategic reconnaissance aircraft, the nation’s first aerial espionage program. It consists of one paved runway, three hangars, a control tower, a makeshift mess hall, and rudimentary accommodations. A movie theater and volleyball court are added. CIA officer Richard Newton is assigned as base commander. Other key organizations are briefed on Area 51’s existence—the National Advisory Committee for Aeronautics, the US Navy, the National Security Agency, and the Defense Intelligence Agency. A small group of four Lockheed test pilots, two dozen Lockheed mechanics and engineers, a handful of CIA officers who double as security guards, and some of Col. Ritland’s staff take up residence. (Jacobsen, Area 51, pp. 5, 51–53; Peter W. Merlin, “Groom Lake Timeline: The First Fifty Years,” Secret Heroes, November 10, 2021; “Pilots of the U-2,” Secret Heroes, November 10, 2021)

July — 2:00 p.m. Col. William T. Coleman is flying a B-25 out of Miami, Florida, with a copilot, flight engineer, a Lockheed test engineer, and a General Motors jet engine technician. As he is moving northward into southern Alabama, he spots at 2 o’clock high what he calls a “craze” in the windshield. He calls the others’ attention to it. He gives chase to it at low altitude over farmland and sees its shadow on the ground, as well as two vortices coming out of the shiny metallic disc that kicks up dust on the ground. When he tries to cut it off at a maximum speed of 345 mph, the object is gone, leaving behind the vortices on the ground. Duration of the sighting is 10–11 minutes. (NICAP, “Col. Coleman Case / Chases UFO at Low Altitude”)

July 1 — CRIFO Newsletter becomes CRIFO Orbit. This issue reviews several airplane crashes and disappearances that Stringfield thinks might be related to UFO activity. (“World’s Air Forces, in Joint Operations, Challenge Incursion of UFO’s,” CRIFO Orbit 2, no. 4 (July 1, 1955): 1–2; Clark III 460, 1114)

July 3 — 3:30 a.m. Margaret Symmonds is driving on US 129 seven miles south of Stockton, Georgia, when four small humanoid figures with caps and huge eyes are caught in the headlights. They seem to be digging a hole in the road with some sticks. She yells and swerves the car, driving past them. The figures seem oblivious. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1955–September 15th, The Author, 1992, pp. 2–3; Stringfield, 3-O Blue, CRIFO, 1957, pp. 63–64; Clark III 270; Isabel Davis and Ted Bloecher, Close Encounter at Kelly and Others of 1955, CUFOS, 1978, pp. 149–160; Patrick Gross, URECAT, February 16, 2008)

July 5 — 3:00 a.m. USAF pilot Lt. Homer H. Speer Jr and copilot Lt. Paul Daily, call sign Archie 29, and pilotLt. Robert W. Schneck and copilot Lt. David Cueldner, call sign Archie 91, are flying Boeing KC-97 Stratofreighters at 20,000 feet on a refueling mission off the coast of Newfoundland. They see two bright objects at 20,000 feet, apparently stationary. Ground radar picks up several objects, some in a distant cluster flying erratically. Speer is able to maintain visual contact, calling direction change of the object to the radar site by radio. The objects are tracked on radar for 49 minutes. (NICAP, “Archie 29 KC-97 Radar Case”; Sparks, p. 228; Chris Rutkowski and Geoff Dittman, The Canadian UFO Report, Dundurn Press, 2006, pp. 296–297; Chris Rutkowski, Canada’s UFOs: Declassified, August Night, 2022, pp. 263–264)

Late July — A man, a female companion, and two children are picnicking on a Lake Ontario beach in St. Catharines, Ontario, when a silvery disc approaches them rapidly across the water, then hovers above them before heading to another family nearby. It swings back to the original group, “moving like a clock pendulum.” The man flees to his car but finds it will not start. Through the windows of the UFO, just a few feet above the ground, the witnesses see the faces of four pale-faced men with black hoods covering their ears and heads, sitting straight and rigid. The object shoots over the lake, ascends rapidly, and disappears. (Clark III 268)

July 24 — The Groom Lake “Ranch” in Nevada receives its first delivery of U-2s from Burbank, California, in a C-124 Globemaster II cargo plane, accompanied by Lockheed technicians on a Douglas DC-3. Regular Military Air
Transport Service flights are set up between Area 51 and Lockheed’s offices in Burbank. To preserve secrecy, personnel fly to Nevada on Monday mornings and return to California on Friday evenings. (Wikipedia, “Area 51”)

July 26 — A brilliant round object with a trail 4–5 times its own length approaches National Airport [now Ronald Reagan Washington National Airport] in Washington, D.C., stops, oscillates, and moves off at high speed. Ceiling lights at the airport go out when the object approaches and returns to operation when the UFO departs. (UFOEv, p. 135)

July 29 — President Eisenhower announces a program to launch a scientific satellite during the International Geophysical Year. The program will be run by the National Science Foundation and the National Academy of Sciences, with advice coming from the Department of Defense. (Amy Shira Teitel, “How the Stage Was Set for the Satellite Race,” Popular Science, January 3, 2016; Amy Shira Teitel, Breaking the Chains of Gravity: The Story of Spaceflight before NASA, Bloomsbury Sigma, 2017)

July 29 — 8:30–9:30 p.m. An aircraft engineer and four others notice a “2nd magnitude star” in the vicinity of Saturn at Lake Ronkonkoma on Long Island, New York. The star moves in a perfect circle around Saturn, heads east until it gets to the Moon, where it executes a half-circle pass and disappears. The object then appears 120° away and moves horizontally until it takes an abrupt turn vertically. It disappears again at about 70° above the horizon. Then it reappears in a straight dive-like descent until it reacquires its original 30° elevation. It proceeds horizontally again, makes an abrupt angular shift again downwards, and is lost in the trees. Through binoculars the object looks spherical and yellowish. (Michael D. Swords, “We Know Where You Live,” IUR 30, no. 2 (January 2006): 8–9; Swords 227)

August — Hundreds of people gather each night at the Black Arch, on the Antrim Coast Road near Larne, County Antrim, Northern Ireland, to watch a mysterious display of lights at sea. The light flashes three or four times in quick succession, then flashes again about 6 minutes later. The Larne police suspect that the lights are flares dropped from aircraft. (Larne Times, August 18, 1955; Shane Cochrane, “Ireland vs. the Flying Saucers,” Fortean Times 317 (September 2014): 54–55)

August 1 — The first test flight of the Lockheed U-2 takes place at Groom Lake, Nevada. During a high-speed-taxi test in the first U-2, Lockheed’s chief test pilot, Tony LeVier, inadvertently becomes airborne after accelerating the U-2 to 70 knots. He is unable to land the U-2 on his first attempt, and it bounces back into the air, but he manages to successfully bring it down on a second try. Damage to the prototype U-2 is very minor. (Wikipedia, “Lockheed U-2”; “Area 51 and the Accidental Test Flight,” Central Intelligence Agency, August 6, 2015)

August 1 — 8:45 p.m. William M. Sheneman, the owner of a radio/TV store in Willoughby, Ohio, pulls into his driveway and walks across the street to check his mailbox. He sees a red light about 1,000 feet away coming at him at a right angle. He thinks it is a plane about to crash. Then the ground is illuminated with two brilliant lights aimed directly from the object. He runs back into the house as the UFO moves over his garage about 50–100 feet in the air. He sees a big red light at the front and a green light at the rear. Then all the lights turn off and the object moves away over the woods. He and his wife can now see the outline of a dome lit up with tiny lights inside. It hovers there for 5 minutes then moves away. (UFOEv, p. 114; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 July–September 15th, The Author, 1992, pp. 31–32; Isabel Davis and Ted Bloecher, Close Encounter at Kelly and Others of 1955, CUFOS, 1978, p. 180; Clark III 244–245)

August 2 — Frederick C. Durant informs the Sixth Congress of the International Astronautical Federation in Copenhagen, Denmark, that President Eisenhower has decided to back the launch of a US scientific satellite during the upcoming International Geophysical Year. Not to be outdone, Soviet delegate Leonid I. Sedov calls a press conference and announces that Russia can launch an artificial satellite within the next 2 years that will be more sophisticated than the Americans’ efforts. (Amy Shira Teitel, “How the Stage Was Set for the Satellite Race,” Popular Science, January 3, 2016; Amy Shira Teitel, Breaking the Chains of Gravity: The Story of Spaceflight before NASA, Bloomsbury Sigma, 2017)

August 8 — The CIA’s Todos Odarenko writes an office memorandum recommending that the CIA should maintain a file of UFO sightings but deny that all investigations are inactive, and separate explainable UFOs from unidentifiable reports. (Jacobsen, Area 51, pp. 75–76)

August 11 — 9:30 p.m. A witness in Cairo, Illinois, sees a triangular-shaped UFO low on the horizon above the trees, heading silently north and slightly west. Its front end is dark, its middle section bluish green, and its end very bright. (“Sightings,” APRO Bulletin, August 1955, p. 9)
August 16 — Early morning. Truck driver Ernest Suddard and his 13-year-old son are returning home to Bradford, West Yorks, England, when their headlights light up a small figure in the street. It is 4 feet tall, dressed in skin-tight black clothes, and is hopping forward in a series of jerky movements. A circular, silvery object, perforated with holes, appears on the figure’s chest just below its throat. It approaches the truck then turns away abruptly into a passage. Suddard alerts the police, but they find nothing. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 July–September 15th, The Author, 1992, p. 50; Patrick Gross, URECAT, February 19, 2008)

August 16 — 3:55 p.m. Mechanic Hugh Saunders sees a silver object above a white cloudbank above Cave Hill in Belfast, Northern Ireland. It is flat and moves swiftly. (Belfast Telegraph, August 17, 1955; Shane Cochrane, “Ireland vs. the Flying Saucers,” Fortean Times 317 (September 2014): 55)

August 19 — 2:00 p.m. A “shining, glittering ball” zigzags across the sky over Lisburn, Northern Ireland. It is seen by many people for about 10 minutes. Jeffrey Moore, 17, says it looks like a steel ball at first, then as it gets closer it appears “cross-shaped.” It moves in a variety of directions before disappearing into the clouds. (Belfast Telegraph, August 20, 1955; Shane Cochrane, “Ireland vs. the Flying Saucers,” Fortean Times 317 (September 2014): 55)

August 20 — 10:45 p.m. The president of a small Canadian air service and his nightwatchman are checking their seaplanes in their dock at Kenora, Ontario, when they see an object “shaped like two saucers with their open tops touching, one above the other” streaking from the west. It is silvery-white in color and sending out rays from its surface or sparkling “as if some electric force or very hot air was flowing from all the surfaces.” It tilts on its side about 600 feet from them, then straightens out with the flat side parallel with the ground and hovers about 225 feet from them and 40 feet above the surface of the lake. It is completely silent and looks to be only 4–5 feet across. (J. Allen Hynek, The UFO Experience, Ballantine ed., 1974, pp. 111–112)

August 21–22 — About 7:00 p.m. Billy Ray Taylor goes into the backyard of the Elmer “Lucky” Sutton farmhouse 7 miles north of Hopkinsville, Kentucky, and sees a bright object come from the south-southwest, pass over, and descend into a gully about 500 feet north and about 35–40 feet lower elevation. Glennie Lankford and 6 other adults (Elmer Sutton, Vera Sutton, John Charley Sutton, Alene Sutton, June Taylor, O. P. Baker) plus 3 children (Charlton, Lonnie, and Mary Lankford), see several gremlin-like creatures float down from trees and approach the house from the dark. They are about 3 feet high with roundish heads, elephantine ears, slit-like mouths extending ear to ear, huge and wide-set eyes, no visible necks, and long arms ending in clawed hands. They wear glowing silver clothing. When they run, they drop on all fours. When one of them approaches the house, Sutton and Taylor fire shotguns through the window screen, scoring a direct hit. The creature is knocked over, but gets up and scuttles off. Taylor walks out the door and one of the creatures grabs at his head. This activity continues the greater part of the night and includes heavy gunfire at times. Sutton fires point blank at it, knocking it from the roof, but it just “floats down.” At about 11:00 p.m. they run out of ammunition, and the entire group flees in terror in two cars and drives at high speed into Hopkinsville to report the incident to the police. A state patrolman leaves the Shady Oaks restaurant 3 miles north of Hopkinsville in a car to respond to the call and sees several meteor-like objects streaking over him sounding like artillery fire. He sees two in a series looking like meteors coming from the southwest, headed towards Kelly, a small US Army installation. City, county, state, and military police and reporters drive out to the Sutton farm to investigate from 11:30 p.m. to 2:00 a.m. The UFO entities return at about 2:30 a.m. Glennie Lankford is trying to get to sleep when she sees one outside her window stretching its claw-like hands up to the screen. Elmer Sutton again shoots at them without effect. The last one is seen at about 5:15 a.m. Clark writes that investigations by “police, Air Force officers from nearby Fort Campbell, and civilian ufologists found no evidence of a hoax”; however, Brian Dunning reports that “the claim that Air Force investigators showed up the next day at Mrs. Lankford’s house has been published a number of times by later authors, but I could find no corroborating evidence of this.” Dunning also observes that “the four military police who accompanied the police officers on the night of the event were from an Army base, not an Air Force base.” Skeptic Joe Nickell notes that the family could have misidentified great horned owls, which are nocturnal, fly silently, have yellow eyes, and aggressively defend their nests. He thinks Taylor and Sutton were drinking heavily. Meteor sightings also occurred at the time that could explain Billy Ray Taylor’s claim that he saw “a bright light streak across the sky and disappear beyond a tree line some distance from the house.” (Wikipedia, “Kelly–Hopkinsville encounter”; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 July–September 15th, The Author, 1992, pp. 54–75; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 July–September 15th, Supplemental Notes, The Author, 2002, pp. 18–36; J. Allen Hynek, The UFO Experience, Ballantine ed., 1974, pp. 172–178; Story, pp. 190–192; Clark III 642–
August 23–24 — 11:50 p.m. Personnel at the Ground Observer Corps tower in Hamilton County, Ohio, notice three white spheres between Columbus and Cincinnati. Tracking the UFOs on radar, they notify SAC at Lockbourne AFB [now Rickenbacker Air National Guard Base], which scrambles jets to investigate. The UFO approaches the tower and hovers in pendulum-like motions directly above it. The interceptors give chase, but the UFO disappears at an incredible speed. The Greater Cincinnati Airport also tracks unidentified blips on radar. To his surprise, Stringfield obtains clearance to write about these sightings in CRIFO Orbit. But when he tries to interest the Cincinnati newspapers, they are not interested. A Wright-Patterson AFB spokesperson denies the incident to the press and claims to know nothing about Stringfield’s relationship with ADC. (Stringfield, Situation Red, Fawcett Crest, 1977, pp. 12–14; Sparks, p. 230; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 July–September 15th, The Author, 1992, p. 75)

August 25 — 8:30 p.m. Mrs. Lloyd Wright and Mrs. Lester Parsons of Bedford, Indiana, see a huge white object with a black streak down the center. The object seems to expand and contract regularly as it hovers over Mrs. Parsons’s home. The houselights appear to dim and pulse in rhythm with the object. (Schopick, p. 114)

August 30 — 9:30 a.m. Pedro Navarro, 25, takes a photograph of some swirling storm clouds over Dudignac, Buenos Aires province, Argentina. When he develops them, he notes that the disturbance looks more like a giant disc. The newspapers reproduce enhanced versions of the photo, but it is never critically analyzed until several decades later. The best guess is that the photo shows a round cloud. (Vicente-Juan Ballester-Olmos, “Exegesis of the Dudignac Saucer of 1955,” UFO FOTOCAT Blog, December 26, 2021; Vicente-Juan Ballester Olmos, “Exegesis of the Dudignac Saucer of 1955,” January 2022)

September — Austrian Countess Zoe Wassilko von Serecki writes an article for American Astrology in which she conceives of UFOs as living animals that inhabit the ionosphere and are attracted to electrical sources. (Zoë Wassilko-Serecki, “Startling Theory on Flying Saucers,” American Astrology 23 (September 1955): 2–5; Clark III 1099–1100)

September 2–4 — 9:05 p.m. Eddy Geddes notices a fireball as he is driving to Kalispell, Montana, from Whitefish. He stops at a Ground Observer post and notifies the women stationed there. Jets are scrambled from Malmstrom AFB in Great Falls and arrive shortly after midnight, long after the object is gone, but another fireball is apparently seen later. The same scenario occurs on September 4 when five F-94C Starfire jets (as well as other aircraft from Great Falls and Spokane, Washington, are sent to the Kalispell area. (“Air Force Jets Called in Search for ‘Fireball’ over Kalispell,” The Missoulian, September 5, 1955, p. 7; “Recent Sightings,” APR Bulletin, September 15, 1956, p. 19)

September 8 — Test pilot Ray J. Goudey reaches an altitude of 65,000 feet in a Lockheed U-2 at Groom Lake, Nevada, a feat not revealed until declassification in 1998. “From where I was up above Nevada I could see the Pacific Ocean, which was 300 miles away.” (Wikipedia, “Lockheed U-2”)

September 9 — Capt. Hugh McKenzie of the Air Defense Command in Columbus, Ohio, contacts UFO researcher Leonard Stringfield in Cincinnati and asks for CRIFO’s cooperation in providing them with new UFO reports. He also says that Ground Observer Corps in southwestern Ohio is to report UFO activity to CRIFO for screening. Screened reports are then to be forwarded to the ADC filter center using the code “Fox Trot Kilo 3-0 Blue.” All expenses will be reimbursed by the Air Force. (Stringfield, Situation Red, Fawcett Crest, 1977, p. 11; Clark III 1114)

September 20 — In response to a September 13 letter from Rep. Gordon H. Scherer (R-Ohio) about the contactee claims of George Adamski, CIA Director Allen Dulles replies that the “CIA shall have no police, subpoena, law-enforcement powers, or internal-security functions” over mail fraud related to UFOs. (Allen W. Dulles, Letter to Gordon H. Scherer, September 20, 1955)
October — President Eisenhower gives the CIA control over the U-2 spy plane program and Area 51. (Jacobsen, Area 51, p. 58)

October — 8:00 p.m. A student at St. Joseph’s Minor Seminary in Peterborough, New Hampshire, sees four glowing, bluish-white objects to the southwest. One appears to be on the ground with 3–4 figures beside it. He goes into the recreation room to find more witnesses. When they go outside, the objects are slowly moving above the school building toward the northeast. (“New Hampshire,” CUFOS Associate Newsletter 6, no. 2 (April/May 1985): 4–5)

October 3 — A B-47 from Davis-Monthan AFB in Tucson, Arizona, crashes northwest of Lovington, New Mexico. The lone survivor, 2nd Lt. William Daniel Borggen, says the plane is flying at 15,000 feet when three instruments go out after it breaks away from a refueling plane in a pre-dawn flight. The crew drops 5,000 feet, then the bomber hits something and crashes. (“B-47 Crash Is Probed,” Clovis (N.Mex.) News-Journal, October 3, 1955, pp. 1-2)

October 4 — 7:10 p.m. Senator Richard B. Russell Jr. (D-Ga.), chairman of the Armed Services Committee, on a trip to the USSR, is on a Soviet train near Baku, Azerbaijan, when he spots a disc-shaped craft taking off near the tracks. Russell sees the “first flying disc ascend and pass over the train” and goes “rushing in to get Mr. Efron [Reuben Efron, his interpreter] and Col. Hathaway [Col. E. U. Hathaway, his aide] to see it,” the report says. “Col. Hathaway stated that he got to the window with the Senator in time to see the first [UFO], while Mr. Efron said that he got only a short glimpse of the first. However, all three saw the second disc and all agreed that they saw the same round, disc-shaped craft…as the first.” A fourth witness is unidentified. “One disc ascended almost vertically, at a relatively slow speed, with its outer surface revolving slowly to the right, to an altitude of about 6,000 feet, where its speed then increased sharply as it headed north,” the report states. “The second flying disc was seen performing the same actions about one minute later. The take-off area was about 1–2 miles south of the rail line.” The Air Force report is written by Lieut. Col. Thomas Ryan, who interviews Russell’s companions in Prague, Czechoslovakia [now Czech Republic], on October 13, after they arrive there from Russia shortly after the sighting. The report remains Top Secret until April 30, 1959, and Secret until March 1985 when Stanton Friedman manages to get it declassified following a FOIA request. (NICAP, “Senator Russell Observes UFO from Train”; Clark III 1049–1050; Sparks, p. 231; Joel Carpenter, “The Senator, the Saucer, and Special Report 14,” IUR 25, no. 1 (Spring 2000): 3–7; Swords 227–228; Good Above, pp. 224–226)

October 7 — Retired Gen. Douglas MacArthur tells Achille Lauro, the mayor of Naples, that he does not think there will be a war with the Soviet bloc, but that “because of the developments of science all countries on earth will have to survive and to make a common front against attack by people from other planets.” The meeting takes place in the Waldorf-Astoria Hotel in New York City. (“M’Arthur Greets Mayor of Naples,” New York Times, October 8, 1955, p. 7; “Space War Possible Is MacArthur Hint,” CRIFO Orbit 2, no. 8 (November 4, 1955): 1; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 September 15th–December 31st, The Author, 1993, pp. 15–17)

October 10 — The Air Force releases a statement from Fort Worth, Texas, saying that anyone reporting flashing lights for the next two months across the US is seeing wind-driven experimental plastic balloons that might travel as fast as 110 mph. (Keyhoe, FS Conspiracy, p. 206; Keyhoe, FSTS, p. 43)

October 18 — CIA Director Allen Dulles informs the joint Intelligence Advisory Committee about Senator Russell’s sighting. (Joel Carpenter, “The Senator, the Saucer, and Special Report 14,” IUR 25, no. 1 (Spring 2000): 7)

October 25 — Project Blue Book Special Report No. 14 is released, months after it is completed by analysts at Battelle Memorial Institute in Columbus, Ohio, using cases supplied by the Air Force and tabulated on IBM punch cards. The original report by Battelle is about 300 pages, but the Air Force distills this down to 100. It is accompanied by a press release in which Secretary of the Air Force Donald A. Quarles states: “On the basis of this study we believe that no objects such as those popularly described as flying saucers have overflown the United States.” (At the same time, Quarles states that the Air Force is working on radical new aircraft that “are sure to be mistaken for flying saucers.”) Only 100 copies are printed initially, but scientist Leon Davidson prints and sells copies of it beginning in 1956, along with his analysis and commentary. The report includes 3,201 reported UFO sightings. Battelle employs four scientific analysts, who divide cases into knowns, unknowns, and a third category of insufficient information. They also break down knowns and unknowns into four categories of quality, from excellent to poor. For a case to be called identified, two analysts must independently agree on a solution; for a case to be called unidentified, all four analysts must agree. A report classified as unidentified is defined as: “Those reports of sightings wherein the description of the object and its maneuvers could not be fitted to the pattern of any known object or phenomenon.” Out of 3,201 cases, 69% are judged to be identified, 22%
are unidentified, and 9% have insufficient information to make a determination. The report further breaks these results down based on whether the identification is considered certain or merely doubtful. For example, in both the astronomical and aircraft IFO categories, 12% are considered certain and 9% are doubtful. Overall, of the 69% listed as IFOs, 42% are thought to be solved with certainty, while 27% are still considered doubtful. In addition, if a case is lacking in adequate data, it is placed in the insufficient information category, separate from both IFOs and UFOs. A key feature is to statistically compare IFOs and UFOs by six characteristics: color, number of objects, shape, duration, speed, and brightness. If there are no significant differences, the two classes are probably the same, the UFOs then representing merely a failure to properly identify prosaic phenomena that can already account for IFOs. On the other hand, if the differences are statistically significant, this suggests IFOs and UFOs are indeed distinctly different phenomena. In the initial results, all characteristics except brightness test significant at less or much less than 1% (brightness is greater than 5%). By removing astronomical sightings from the knowns and redoing the test, just two categories, number and speed, are significant at less than 1%, the remainder having results between 3% and 5%. This indicates that there is a statistically significant difference between the characteristics ascribed to UFOs and IFOs, but perhaps not as significant as the initial results suggested. For two characteristics, brightness and speed, the significance actually increases with the revised test.

Hynék later calls the Battelle report a “shamefully biased interpretation of statistics to support a preconceived notion.” Keyhoe asks Ruppelt what he thinks. Ruppelt says the report “was a shock to me. I was the one that had the IBM system tried out. It didn’t prove a thing, and I had written it off as worthless before I left the project… also this report was drawn up in 1953, yet the Air Force released it as the latest hot dope in October, 1955.” The Air Force releases a second edition, with a new preface and an addendum that brings the subject up to date, in July 1957. In the 1990s, after interviewing three men (Art Westerman, Perry Rieppel, and William T. Reid) who had participated in the Battelle project, Mark Rodeghier and Jennie Zeidman of the Center for UFO Studies conclude that the engineering mindset at Battelle had caused a disconnect between its data and its conclusions. Because the project cannot reverse engineer a UFO from the reports (because of faulty witness testimony, multicausal UFOs, etc.), the engineers conclude that a structured craft does not exist. (Wikipedia, “Identification studies of UFOs”; Wikipedia, “Project Blue Book”; US Air Force Air Technical Intelligence Center, Special Report No. 14; Analysis of Reports of Unidentified Flying Objects, May 5, 1955; Leon Davidson, Flying Saucers: An Analysis of Project Blue Book Special Report No. 14, [1956], 3d ed., Ramsey-Wallace, 1966; “Plan Radical New Aircraft,” Franklin (Pa.) News-Herald, October 26, 1955, p. 1; Clark III 929–932; Jacobs, UFO Controversy in America, Signet ed., 1976, pp. 123–126; Keyhoe, FSTS, p. 770; Jennie Zeidman, “I Remember Blue Book,” IUR 16, no. 2 (Mar./Apr. 1991): 7–8; Jennie Zeidman and Mark Rodeghier, “The Pentacle Letter and the Battelle UFO Project,” IUR 18, no. 3 (May/June 1993): 4–12, 19–21; Joel Carpenter, “The Senator, the Saucer, and Special Report 14,” IUR 25, no. 1 (Spring 2000): 3, 9; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 September 15th–December 31st, The Author, 1993, pp. 30–63; Swords 220–224, 239–241)

October 25 — A mysterious object passes over Serbia and is seen throughout the country. Milorad B. Protić and other astronomers at Belgrade Observatory track the object and determine that it is not a meteor. After the launch of Sputnik in November 1957, Protić decides that the object must have been an experimental Soviet satellite. (Lorenzen, UFOs: The Whole Story, Signet, 1969, p. 68)

October 27 — Afternoon. Hosea D. Lambeth, principal of Whitsett Elementary School, North Carolina, and about 100 students watch 10 objects like “steel balls” dart through the sky for 25 minutes. Light-colored wispy material in 2–3-inch strips falls from the sky at the same time. Nearby Burlington Industries tests a sample and declares it not a synthetic material. No spiders are found in the strands. (Clark III 124; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 September 15th–December 31st, The Author, 1993, pp. 72–75)

November — J. Heinrich Ragaz begins publishing Weltraumbote in Zürich, Switzerland. It continues through June 1961. (Weltraumbote, no. 1 (November 1955))

November 1 — 8:06 p.m. A flying light paces New Zealand National Airways DC-3 Flight 108 west of Waitara, New Zealand, at 8,000 feet for about 5 minutes. Capt. William T. Rainbow and Copilot Stanley G. Trounce spot the object behind them flying along the coast on a parallel course. Changing color from white to yellow to gold to red, it overtakes the aircraft and flies alongside it for 15 miles, then picks up speed and disappears into the distance ahead. Rainbow estimates it is traveling at 850 mph. (UFOEv, p. 125; “1955: ‘Flying Light’ Seen by NAC Captain and Crew,” Ufocus.nz, June 15, 2021)

November 20 — 5:20 p.m. Operations Officer Capt. Edward G. Denkler Jr. and 5 men of the USAF 663rd AC&W Squadron see two oblong, bright orange, semi-transparent objects fly erratically at terrific speed toward and away from each other, over Lake City [now Rocky Top], Tennessee. (NICAP, “Seven Witnesses Observe Maneuvering Objects near Oak Ridge Plant”; Sparks, p. 232)
November 22 — The first Soviet test of a true thermonuclear bomb takes place at the Semipalatinsk Test Site in Kazakhstan. (Wikipedia, “RDS-37”)

November 30–December 2 — The New York Herald Tribune and Miami Herald publish two articles by aviation journalist Ansel Talbert in which he lists the names of aerospace firms conducting gravity-control propulsion research, including Glenn L. Martin Company, Convair, Bell Aircraft, Lear Inc., Clarke Electronics, and Sperry Gyroscope Division. The Gravity Research Group indicates these companies have constructed “rigs” to improve the performance of Thomas Townsend Brown’s gravitators through attempts to develop materials with high dielectric constants. Articles about the gravity propulsion research by the aerospace firms cease after 1974. Follow-up studies on Brown’s work and other claims are conducted by R. L. Talley in 1990 and 2013 US Air Force studies, NASA scientist Jonathan W. Campbell in a 2003 experiment, and Martin Tajmar in 2004 paper. They find that no thrust can be observed in a vacuum and that Brown’s and other ion-lifter devices produce thrust along their axis regardless of the direction of gravity—consistent with electrohydrodynamic effects. (Wikipedia, “United States gravity control propulsion research”; Wikipedia, “Anti-gravity”; Ansel E. Talbert, “Scientists Taking First Steps in Assault on Gravity Barrier,” Miami Herald, November 30, 1955, pp. 1–2; Ansel E. Talbert, “Future Planes May Defy Gravity and Air Lift in Space Travels,” Miami Herald, December 2, 1955, p. 8)

December 11 — 9:00 p.m. Near Jacksonville, Florida, two airline pilots and ground observers see a fast-maneuvering, orange-red, round object, with ground radar tracking. Two USN jets on a practice night-flying mission are vectored to the object by a Naval Air Station Jacksonville controller. On approach the object suddenly rises up to 30,000 feet then dives back down in a circle, buzzing the jets. (Sparks, p. 232)

1956

1956 — Morris K. Jessup publishes The UFO Annual, an anthology of newspaper and magazine articles about UFOs, and UFO and the Bible, the first book-length attempt to connect biblical miracles with space visitors. Jessup is the first writer to use the term “ufology” in his introduction (dated December 31, 1955). (Morris K. Jessup, The UFO Annual, Citadel, 1956; Clark III 106, 634–635)

1956 — Soviet polar aviator Valentin Akkuratov is flying a Tupolev Tu-4 aircraft near Cape Morris Jesup, Greenland, performing strategic ice reconnaissance. Dropping down below the clouds, he sees an unknown object moving on the port side parallel to his course. It looks like a “large pearl-colored lens with wavy, pulsating edges.” Thinking it is a US aircraft, Akkuratov heads back into the clouds. After flying for 40 minutes to the southeast, the cloud cover ends and Akkuratov encounters it again. He decides to approach the object, which changes course and paces the airplane at the same speed. After 15–18 minutes, the UFO sharply alters course, speeds ahead, and rises quickly until it disappears. (Felix Ziegel, “Unidentified Flying Objects,” Soviet Life, no. 137 (February 1968): 27–29; Good Above, pp. 226–227)

1956 — Fishermen at lake Ozero Blagodati, Primorsky Krai, Russia, allegedly see an enormous silvery object with an apparent diameter of 4,900 feet rapidly flying above them at 1,960 feet. It resembles a hat with red portholes around its rim and is accompanied by loud grinding sounds and black smoke. The object emits numerous thin metal threads resembling horse hairs that the fishermen pick up the next day. The object crashes into the Sea of Japan. (Stonehill and Mantle, Russia’s USO Secrets, Flying Disk, 2020, pp. 113–114)

1956 or 1957 — 7:45 p.m. W. J. Kyncy is aboard the destroyer USS Maddox in the North Pacific between Midway Island and Japan. He and some 30 other sailors on the stern see a steady orange light coming toward them at about 50 mph. It stops for 2 minutes about 1,300 feet away at about 400 feet altitude. It begins moving again at 35 mph then blinks out after 5–10 seconds. (“Correspondence,” CUFOS Associate Newsletter 3, no. 4 (Aug./Sept. 1982): 6)

January — The US Army Chemical Corps begins classified human experiments at its Edgewood Arsenal facility at the Aberdeen Proving Ground, Maryland. The Medical Research Volunteer Program (1956–1975) is driven by
intelligence requirements and the need for new and more effective interrogation techniques. Overall, about 7,000 soldiers take part in these experiments that involve exposure to more than 250 different chemicals. Some of the volunteers exhibit symptoms at the time of exposure to these agents but long-term follow-up is not planned as part of the Department of Defense studies. The experiments are abruptly terminated by the Army in late 1975 amid an atmosphere of scandal and recrimination as lawmakers accuse researchers of questionable ethics. Many official government reports and civilian lawsuits follow in the wake of the controversy. The chemical agents include VX, sarin, mustard gas, atropine, scopalamine, 2-PAM chloride, LSD, PCP, cannabinoids, riot control agents, alcohol, and caffeine. (Wikipedia, “Edgewood Arsenal human experiments”)

January — Edward J. Ruppelt’s Report on Unidentified Flying Objects is published. His candid opinions about UFOs contradict many of the positions taken on UFOs by the Air Force. He has personally seen the Estimate of the Situation, he confirms the existence of Fournet’s motion study, and he first describes the basic contours of the Robertson Panel. (Edward J. Ruppelt, The Report on Unidentified Flying Objects, Doubleday, 1956; Michael D. Swords, [Review], JUFOS 3 (1991): 179–183)

January 9 — The CIA’s Applied Science Division takes on the job of holding UFO reports. (ClearIntent. p. 135)

January 15 — An object the apparent size of a washtub is seen falling into the sea 150 feet offshore Busan, South Korea, by large numbers of townspeople. The glow continues for an hour and a half before the object sinks. Korean and American military authorities are alerted. Military Police Cpl. Ben Elliot observes the glow, which resembles burning alcohol or benzene. (Samuel Norman, “Recent UFOs over Japan,” Fate 9, no. 6 (June 1956): 22–24)

January 31 — 3:24 p.m. Kentucky National Guard pilot Lt. Col. Lee J. Merkel is flying an F-51 Mustang out of Standiford Field [now Louisville International Airport] in Louisville, Kentucky, on a maintenance test flight. His aircraft crashes 10 miles north of Bedford, Indiana, following some confusing information from various sources about an unknown radar target or visual observation in the vicinity. (ClearIntent, pp. 62–63; Good Need, pp. 215–216)

February 9 — 1:30 a.m. Patrolmen Marvin Poer and John Freeland see a ball of fire plunge behind the breakwater at Redondo Beach, California. It bobs on the water’s surface before sinking into 15 feet of water some 300 feet off the shore. Five county lifeguards row out to look for it and retrieve a US Army Signal Corps battery light that was dropped from an airplane. (“Sea Cools Mystery of Hot Disk,” Los Angeles (Calif.) Mirror-News, February 9, 1956, p. 8; “Sea-Saucer or Searchlight?” CRIFO Orbit 2, no. 12 (March 2, 1956): 4)

February 9 — In a memo, “Responsibility for Unidentified Flying Objects,” the CIA’s Applied Science Division retains files for incoming raw reports that might provide information on foreign weapons R&D. Other (more significant?) reports are forwarded to the Fundamental Sciences Area for review of information on foreign science developments. Still others are to be destroyed. (ClearIntent, pp. 135–136)

February 12 — 10:55 p.m. Two F-89D fighters flying at 20,000 feet, one crewed by pilot Bowen and radar observer Crawford, suddenly see a green and red object 40 miles southeast of Goose Bay AFB [now CFB Goose Bay], Labrador. It rapidly circles their jet, and the other fighter tracks it on radar but cannot see it visually. About 15 minutes later, operators at Goose Bay paint a stationary target about 40 miles southwest of the base. The two pilots vectored toward the object and obtain radar contact, but it vanishes when they get within 8 miles. (Sparks, p. 233; Chris Rutkowski, Canada’s UFOs: Declassified, August Night, 2022, p. 262)

February 17 — 10:50 p.m. Air traffic controllers at Orly Airport, Paris, France, see a target appear on their radar screens that is twice the size of a conventional aircraft. It cruises around, hovers, and accelerates at fantastic speeds, and is tracked for a total of 4 hours. When it first appears on radar it is directly above Gometz-le-Châtel, Seine et Oise, and 30 seconds later it is 19 miles away, having moved at nearly 2,500 mph. A second, smaller target appears, identified as an Air France DC-3 airliner flying over the Les Mureaux military base, Yvelines, at 4,500 feet (800 feet lower than the UFO). Orly radios the pilot to alert him to the unidentified target. Radio Officer Beaupertuis sees the object through a window on the starboard side of the plane—enormous in size, indistinct in outline, and
lit in some areas with a red glow. Capt. Michel Desavoye confirms the sighting, saying he and the crew watch the object for 30 seconds and are certain it is no civil airliner. The sighting duration is nearly 3 hours. (NICAP, “Large UFO Tracked on Ground Radar”; “A Saucer Shows Up over Paris and Creates a Stir in a Radar Room and a Cockpit,” Flying Saucer Review 2, no. 2 (March/April 1956): 3; Patrick Gross, “Orly Airport, France, February 1956”)

February 18 — Stringfield receives a letter from Lord Hugh Dowding that says he doesn’t think there is an official “British attitude to UFOs.” (Stringfield, Situation Red, Fawcett Crest, 1977, p. 165)

March — Mechanix Illustrated publishes a story on the Avro Canada MX-1794 (Y-2, or Silver Bug) vertical take-off gyroplane under development by the US Air Force. The cover proclaims, “U.S. Air Force Reveals Our Flying Saucer.” Through 1958, Avro spends $2.5 million and the USAF $5.4 million funding the project. Numerous models are built, and wind-tunnel testing is undertaken at MIT and Wright-Patterson AFB. The design includes eight Armstrong Siddeley Viper turbojet engines, a very large center rotor/impeller with Lundstrom compressor turbines, with the cockpit mounted in the top center. Control is achieved through eight small exhausts at the outer edge, directed either through the top or bottom, in addition to the main turbine exhaust through the bottom center of the craft. A multiengine test rig is built and tested in 1956, resulting in powerful thrust, a great deal of noise, and vibrations. In 1957, the USAF provides additional funding to extend the project, by then highly classified and designated as Weapon System 606A. The concept developed is for a circular-winged, supersonic aircraft. Over 1,000 hours of wind-tunnel testing are performed. Drawings developed by Avro show an aircraft that appears to be a merging of a flying saucer with more conventional fuselage shapes—a tailless aircraft with circular wings. (Wikipedia, “Avro Canada”; Willy Ley, “How the Flying Saucer Works,” Mechanix Illustrated 52 (March 1956): 78–81; Good Need, p. 215; Charles Mandel, “A Saucer from Mars? Nope, Canada,” Wired, July 5, 2001)

March 10 — British pilot Peter Twiss reaches an official airspeed of 1,132 mph in a Fairey Delta 2 over Chichester, England. (Wikipedia, “Peter Twiss”)

March 16 — Stringfield receives a letter from Gen. John A. Samford that ends his affiliation with ADC. (Stringfield, Situation Red, Fawcett Crest, 1977, p. 14)

Spring — The Flying Saucer Discussion Group begins meeting on a more-or-less monthly basis at the YWCA in Washington, D.C. It is begun by Mrs. Walton C. “Clara” John, the publisher of a mimeographed zine called The Little Listening Post, which often covers UFOs. (“Toward a Broader Understanding...”; The Story of How NICAP Began,” UFO Investigator, October 1971, p. 2)

April — USAF Capt. George T. Gregory succeeds Capt. Charles Hardin as director of Project Blue Book. (Sparks, p. 14)

April — An annotated copy of the paperback edition of Morris K. Jessup’s The Case for the UFO (1955) is sent in a manila envelope from Seminole, Texas, to Adm. Frederick R. Furth, chief of the Office of Naval Research. The annotations are written in three different colors of ink, apparently by three persons, A, B, and Jemi, who claim to know a great deal about the UFO intelligences. They mention space people, underwater cities, force fields, and much more. The book falls into the possession of Maj. Darrell L. Ritter, USMC aeronautical project officer at ONR, who brings it to the attention of ONR Capt. Sidney Sherby and ONR Projects Officer Cmdr. George W. Hoover, who become interested and get permission (as long as it does not involve official naval personnel) to send the copy to the Varo Manufacturing Company, in Garland, Texas, which has contracts with the military. Varo publishes 25 spiral-bound copies of the book in black and red ink, which shows the annotations. Meanwhile, Jessup has been receiving at least two strange letters (January 13 and May 25, 1956) from someone calling himself Carlos Miguel Allende, who claim that as a result of a strange experiment at sea utilizing principles of Einstein’s Field Theory, a destroyer (identified by some as the USS Eldridge and others by the USS Engstrom, which were not in the Philadelphia Navy Yard at the time) and all its crew became invisible in October 1943, but the sailors showed side effects. Allende says he has witnessed all of this. Sherby talks to Jessup about the Varo edition; Jessup isn’t much interested but tells him about the Allende letters, which talk about the same things as the annotations and are obviously written by the same person. Gray Barker’s Saucerian Press publishes the Varo edition in July 1972. Sometime in the 1970s, Carlos Allende appears at APRO headquarters and confesses that the whole annotations thing was a hoax, but he surfaces a few years later saying that the CIA coerced him into saying it was a hoax. In the late 1970s, Robert A. Goerman identifies Allende as Carl Allen, who lives near him in Pennsylvania. In the October 1980 issue of Fate, Goerman explains the entire mess, saying that Allen had written all three of the annotation types. Bill Moore and Charles Berlitz take the whole thing seriously enough to write The Philadelphia Experiment in 1979, which links the force fields back to T. Townsend Brown, later the founder of NICAP. (Morris K. Jessup, The Case for the UFO, annotated Varo ed., Saucerian, 1972; Wikipedia, “Philadelphia Experiment”; Ivan T. Sanderson, “Jessup and the Allende Case,” Pursuit 1, no. 4 (September 30,
April 3 — CIA agent Joseph Bryan III writes to Ruppelt, saying that while he served as special assistant to Air Force Secretary Thomas Finletter, he tried to have him prepare a statement for release when communication was established with a saucer. Finletter declines to do so. (Michael David Hall and Wendy Ann Connors, Captain Edward J. Ruppelt: Summer of the Saucers, Rose Press International, 2000, p. 10)

April 7 — Elizabeth Klarer returns to Flying Saucer Hill southwest of Rosetta, KwaZulu-Natal, South Africa, drawn by a strange compulsion. The spaceship is waiting for her, and Akon takes her in his hands and says, “Not afraid this time?” He leads her on board the craft, which she learns also carries a second alien, who looks much like Akon except he is darker and more muscular. As the ship first rises into space, Akon says he has been watching her for some time. He lets her look at the earth below through a viewing lens that also has x-ray capability. The saucer goes to a “mother ship” filled with friendly space people. At one point a huge video image projected on the wall allows her to view scenes from their home planet, Meton, in the Alpha Centauri system. They serve her a vegetarian meal. Klarer and Akon begin a lifelong romantic attachment that includes sexual activity. (“Landing in South Africa,” Flying Saucer Review 2, no. 6 (Nov./Dec. 1956): 2–5; Elizabeth Klarer, Beyond the Light Barrier, Howard Timmins, 1980; Clark III 657; Paul Seaburn, “Woman from Earth Claimed to Have Already Been to Proxima b,” Mysterious Universe, August 31, 2016)

April 8 — 10:15 p.m. Capt. Raymond E. Ryan, First Officer William Neff, flight attendant Phyllis Reynolds, and many passengers take off on American Airlines Flight 715 from Albany, New York, heading north then nearly due west at 260 mph and 6,000 feet north of Schenectady, when a brilliant white light about 2–3 miles away is spotted about 90° to the left appearing like an airliner heading in to land at Albany. The white light moves about 90° to dead ahead position about 8–10 miles away at high speed, estimated at about 800–1,000 mph, where it changes color to orange and seems to block the airliner’s path or risk collision. It disappears briefly and reappears as an orange light again but standing still ahead of the airliner to the west. The Convair airliner contacts Griffiss AFB [now Griffiss International Airport], Rome, New York, where controllers ask Ryan to turn his lights off and on to help identify aircraft. He is told the airliner is seen and the orange UFO are to the south. The airliner is ordered to maintain course to follow the UFO to the west, skipping its scheduled landing at Syracuse after nearly 30 minutes of following the object. The promised fighter jet interception is never seen. The object disappears at high speed to the northwest towards Oswego, New York. (NICAP, “Air Force Requests Plane Loaded with Passengers to Chase UFO”; Sparks, p. 236; “Cover-Up Suspected in Reported Air–UFO Chase,” UFO Investigator 1, no. 3 (January 1958): 10–12; UFOEv, p. 117)

April 16 — An interview with Ryan and Neff is taped on the TV show Meet the Millers. They claim that Griffiss AFB “asked us our next point of landing and to identify the aircraft. I told them Syracuse and identified the flight number. Then they told us: ‘Abandon that next landiat-postcardat-postcarding temporarily. Maintain your course and altitude. We’re sending two jets to intercept the object.’” About the UFO, Ryan says, “This was absolutely real. I’m convinced there was something fantastic up there.” Keyhoe obtains a copy of the tape. (NICAP, [transcript of Meet the Millers program, April 16, 1956])

April 28 — At the third Giant Rock Interplanetary Spacecraft Convention near Landers, California, contactee Dick Miller plays tape recordings allegedly made by Mon-Ka, a Martian, in which he asks Los Angeles radio stations to shut down for two minutes at 10:30 p.m. on November 7, 1956, so that Mon-Ka can speak from his spacecraft. As a publicity gimmick, two radio stations (KATY [now KYNS] of San Luis Obispo and KBIA of Los Angeles) go off
the air at that time, and KTTV in Los Angeles sends up an airplane to watch for the approaching spacecraft. Nothing happens. (Clark III 531, 766–767)

May 1 — USAF Gen. Joe W. Kelly writes to Sen. Harry F. Byrd (D-Va.) that there is a “total lack of evidence that [UFOs] are interplanetary vehicles.” (“How about Those Three Secret Reports, General Kelly?” CSI News Letter, no. 5 (September 21, 1956): 1) May 1 — Air Force Manual section 190-4 goes into effect. It affects all USAF official press releases, statements to Congress and the public, and publications about UFOs. It requires the Secretary of the Air Force Office of Information to “delete all evidence of UFO reality and intelligent control, which would, of course, contradict the Air Force stand that UFOs do not exist.” NICAP is made aware of the regulation in 1962 when former USAF information spokesman Maj. William T. Coleman admits to a NICAP member that Maj. Lawrence J. Tacker’s book Flying Saucers and the US Air Force was reviewed under AFM 190-4. (“Air Force Reveals Censorship Controls,” UFO Investigator 2, no. 4 (July 1962): 1) May 1 — 7:55 p.m. Koto Ward, a factory worker, along with many others, see a large bright object flying low over the rooftops in Tokyo, Japan. Turuko Kurihara, in a different location, sees a greenish object at 7:59 p.m. The object makes no noise but causes severe distortion on the TV sets in the area. (Schopick, p. 103) May 3 — Hollywood producer Clarence Greene releases a semi-documentary about the UFO phenomenon in the US, U.F.O. Edward J. Ruppelt, Dewey Fournet, and Albert M. Chop assist in the production. The principal character is Chop, played by Los Angeles Examiner journalist Tom Towers, and examines his career going from skeptical USAF public information officer to Pentagon UFO press spokesman. The film uses only one professional actor, Harry Morgan, in a voiceover part. UFO witnesses Delbert Newhouse, Nicholas Mariana, and Willis Sperry play themselves, and Los Angeles policemen stand in for Ruppelt, Fournet, and Gen William Garland. The Air Force carefully monitors its reception and readies itself to counter the film’s impact. The documentary analyzes two famous pieces of UFO footage: the Montana film of 1950 and the 1952 UFO Utah film (both shown for the first time in public). It concludes with the famous 1952 Washington, D.C., UFO incident, in which Chop played a central role, and recreates his experiences. At the end of the documentary, Chop states his belief that UFOs are a real, physical phenomenon of unknown origin. (Wikipedia, “UFO (1956 film)”; Internet Movie Database, “Unidentified Flying Objects: The True Story of Flying Saucers”; Robert Barrow, “Unidentified Flying Objects, Accidental Epic,” IUR 30, no. 2 (January 2006): 3–6; Robert Barrow, “Tom Towers: The Other Al Chop,” IUR 30, no. 4 (August 2006): 17–19; Clark III 1188–1189; Swords 222; Curt Collins, “Project Blue Book: UFO, the Motion Picture,” The Saucers That Time Forgot, August 24, 2018)

May 4 — 9:30 p.m. Rev. Charles Burmeister, an amateur astronomer, sees five “orange blobs” flying in a U-shape formation east to west at high speed over Marinette, Wisconsin. His son joins him to watch. One more object passes in the same flight path, then a group of six, then one more, followed by another. Blue Book classes the sighting as meteors without even consulting Hynek, who later says that meteors do not fly in formation. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1955 May–July, The Author, 1993, pp. 2–7; Swords 229–230)

May 22 — 11:05 p.m. USAF 1st Lt. Earl D. Holwadel and 1st Lt. Curtis Carley are piloting a T-33 jet at 18,000 feet 58 miles northwest of Monroe, Louisiana, when they see a bright light due east. They see it again in the east at 11:15 p.m. Holwadel banks right to the southeast somewhat behind the object, which is now a great distance away. The object suddenly comes straight at them at high speed, passing in front of the T-33 at about 225 feet away. It flashes an intensely bright white light from a “greenhouse-shaped dome” or cockpit window at its front end that lights up the canopy of the T-33. The object is about 30-40 feet long, elliptical in shape, shorter than a C-47 but wider, a small steady red running light in the center, with no wings, only stubby protrusions extending 3-4 feet and 25 feet long on each side. The bottom surface is like steel with ribs extending down 2–4 feet with a wave-like appearance. It moves away then returns at high speed on a westerly course with “fantastic” maneuverability. It never changes flight attitude at any time. (NICAP, “Elliptical Object Comes Straight at T-33”; Walter N. Webb, “Inside Building 263: A Visit to Blue Book, 1956,” IUR 17, no. 5 (Sept./Oct. 1992): cover, 5; Sparks, p. 237)

Summer? — Morris K. Jessup is invited to the Office of Naval Research to examine the mysteriously annotated version of his The Case for the UFO. He becomes convinced that his correspondent Carl Allen has written all or most of it. Capt. Sidney Sherby and Cmdr. Hoover ask for the Allen letters and these are included in a special printing of the annotated book by the Varo Publishing Company of Garland, Texas. In 1969, Allen confesses to APRO that he had written the annotations, but he retracts the confession later. (Clark III 95–97; Andrew H. Hochheimer, “The Varo Edition,” The Philadelphia Experiment from A–Z, December 13, 2016)

Summer — 11:30 p.m. A cigar-shaped UFO with lighted portholes is seen by two witnesses in the southwest part of Springfield, Illinois. The car driven by one of the witnesses quits, and the UFO seems to affect the traffic lights as
well. The object looks slightly smaller than a blimp. After about 30 seconds it moves straight up and disappears. (Michael D. Swords, “The Timmerman Files,” IUR 26, no. 4 (Winter 2001–2002): 14, 30)

June (or June 1957) — RNZAF Airman Derek Mansell is a passenger in a Bristol 170 Freighter Mk 31M near Wellington, New Zealand, when the aircraft encounters severe turbulence and its compass and other instruments spin wildly. All communications fail and the engine spurs intermittently for 25 minutes before everything returns to normal. When the Freighter lands at RNZAF Base Ohakea near Bulls, the pilot of a Douglas C-47 Dakota lands and asks them whether they had seen a huge metallic disc about 250 feet in diameter with a blue light on top and a red light on the bottom, which he had observed just above the Freighter pacing it. The Dakota crew apparently took photos, but these have not turned up. After a two-hour debriefing, both crews are told never to discuss the matter. (Good Above, pp. 432–433)

June — 10:00 p.m. Two women are driving north toward New Hampshire, Ohio, when a bright light approaches them from a small wooded area. They stop their car to look at it. The light is attached to a large rectangular object resembling a railroad box car that settles near the ground at the edge of the highway opposite to them about 30 feet away. Suddenly the side of the object facing them lights up from inside with a pale green light and they can see three small entities. One is standing next to a console “operating some kind of controls,” and the two others are also active. For 5 minutes, they appear to be observing the women. The entities have dark hair on their heads and arms and are wearing short-sleeved smocks. The object moves up and away toward the southwest and disappears. (“Unreported 1956 CEIII Discovered in Ohio,” CUFOS Associate Newsletter 3, no. 3 (June/July 1982): 4–5)

June 13 — Earth vs. the Flying Saucers, an American black-and-white science fiction film from Columbia Pictures, produced by Charles H. Schnee, directed by Fred F. Sears, starring Hugh Marlowe and Joan Taylor, and with special effects by Ray Harryhausen, is released in Los Angeles. The film’s storyline is suggested by Donald E. Keyhoe’s nonfiction Flying Saucers from Outer Space (1953), but bears little resemblance to the content. Keyhoe has sold the rights to Clover Productions in Hollywood. (Wikipedia, “Earth vs. the Flying Saucers”; Internet Movie Database, “Earth vs. the Flying Saucers”; Clark III 434)

June 25 — ATIC’s Col. John Eriksen, writing for Secretary of the Air Force Donald A. Quarles, replies to a query from Rep. John E. Moss (D-Calif.), explaining why USAF is not handing out multiple copies of Blue Book Special Report no. 14 and that it does not intend to withhold UFO information from the public. (Swords 223)

July — Brinsley Le Poer Trench, 8th Earl of Clancarty, takes over as editor of Flying Saucer Review from Derek Dempster. (Flying Saucer Review 2, no. 4 (July/Aug. 1956); Clark III 498)

July — US parapsychologist Andrija Puharich and Dutch psychic Peter Hurkos accidentally meet Charles Laughead and his wife Lillian in Acámbaro, Guanajuato, Mexico, both groups in town to view the famous figurines of Waldemar Julsrud, during the time that Hurkos is being studied by Puharich at his medical facility in Glen Cove, Maine. The Laugheads are convinced that Puharich and Hurkos are space people come to assist them, based on the channelings of their associate George Hunt Williamson (although they do not name him). (Andrija Puharich, Uri: A Journal of the Mystery of Uri Geller, Bantam, 1975, pp. xviii–xxiv; Zirger and Martinelli, The Incredible Life of George Hunt Williamson, Verdeckiari, 2016, p. 104)

July 4 — Pilot Hervey Stockman makes the first of eight U-2 flights over Soviet Russia, Mission 2013. He flies from Wiesbaden over East Germany and Poland before crossing the Soviet border near Grodno, Belarus, then over bomber bases at Minsk, Belarus; Leningrad [now St. Petersburg], Russia; and the Baltic states. The mission is tracked by Soviet radar; a number of MiG fighters unsuccessfully try to intercept the U-2. (Spyflight, “Lockheed U-2”; Jacobsen, Area 51, pp. 86–88)

July 9 — One early U-2 mission, Mission 2020, flown by Martin Knutson, flies over Engels-2 airfield, near Saratov, Russia, and photographs 20 M-4 Bison bombers on the ramp. Multiplying by the number of Soviet bomber bases, the intelligence suggests the Soviets are already well on their way to deploying hundreds of aircraft. Ironically, the U-2 has actually photographed the entire Bison fleet; there is no bomber at any of the other bases. Similar missions over the next year finally prove that. At least in official circles, the bomber gap is disproven. (Spyflight, “Lockheed U-2”)

July 10 — The Melbourne, Victoria, Australia, coastline and suburbs are draped with “angel hair” that hangs from utility lines and trees. It vanishes within hours, but a sample is recovered for analysis by the Commonwealth Scientific and Industrial Organisation. It cannot be identified, although six scientists rule out wool, cotton, feathers,

July 16 — 7:00 p.m. Lawyer (or law professor) João de Freitas Guimarães is taking a walk on the beach at Caraguatatuba, São Paulo, Brazil, when he observes a hat-shaped, luminous object leave the sea between São Sebastião and Ilhabela and land only a few yards away from him. A door opens, a metallic stairway emerges, and two tall, human-looking men with long, fair hair emerge wearing green jumpsuits. Through gestures, they encourage him to enter the craft. Inside, the saucer takes off and the crew communicate with him telepathically, telling him about a radiation protection system that exists around the ship and that they have left the atmosphere. They are supposedly from Venus. His alleged trip lasts an hour. When he returns, his watch no longer works. (Luiz do Rosário Real, “Caso Dr. Freitas Guimarães,” April 1976; Clark III 548–549; Vallée, Magonia, pp. 257–258; Equipe UFO, “João de Freitas Guimarães, o advogado que passeou em um UFO,” Portal UFO, October 1, 2013; Brazil 32–35)

July 17 — Elizabeth Klarer takes several photos of a silvery disc as it is hovering around Flying Saucer Hill, southwest of Rosetta, KwaZulu-Natal, South Africa. (Clark III 657–658)

July 19 — Naval Air Station Hutchinson [now Hutchinson Air Force Station], Kansas, reports tracking “a moving unidentified object” on radar, observed visually by state police as a “teardrop shaped” light source. Witnesses report “noticeable maneuvers of UFO vertically and horizontally over a wide area of the sky.” (NICAP, “NAS Tracks UFO”)

July 20 — In a lecture delivered at a meeting of Clara John’s Flying Saucer Discussion Group, author Morris K. Jessup declares that it is time for a new UFO organization. A consensus is reached that a Washington, D.C.–based agency should investigate UFOs, and T. Townsend Brown offers to draft a preliminary proposal. (Clark III 792; “‘Toward a Broader Understanding…’: The Story of How NICAP Began,” UFO Investigator, October 1971, p. 2)

July 20 — Three witnesses in the Panorama City neighborhood of Los Angeles, California, independently observe a huge, ball-shaped object from which emerge three beings. They are nearly 6 feet tall and have long, blond hair, and wear tight, green suits. (Donald B. Hanlon, “Questions on the Occupants,” in Charles Bowen, ed., The Humanoids, special issue of FSR, Oct./Dec. 1966, p. 64)

July 22 — 5:30 a.m. Mrs. Ray Brown sees an egg-shaped object giving off a green-colored light from its rear end over Highway City, California. (Lorenzen, UFOs: The Whole Story, Signet, 1969, p. 72)

July 22 — 11:00 a.m. USAF Maj. Merwin Steners is flying at 16,000 feet over Pixley, California, in a Convair C-131D and is suddenly staggered and knocked to the right by a terrific blow. He makes an emergency landing at Kern County Airport [now closed] in Lost Hills. An examination shows that more than half of the left elevator control surface is gone or smashed, leading to speculation that the airplane had been hit by something. However, an accident investigation team finds that a series of rivets had popped, jamming a rod that controls the elevator servotab and causing the elevator to get stuck. (“Plane’s Dive Is Laid to Control Device Failure,” Fresno (Calif.) Bee, July 25, 1956, p. 4-B; Lorenzen, UFOs: The Whole Story, Signet, 1969, pp. 71–73; Frank Edwards, FS Serious Business, Bantam ed., 1966, pp. 39–40)

Late July — A group of US Navy pilots based at Naval Air Station Los Alamitos [now Joint Forces Training Base–Los Alamitos], California, tell news reporters from Orange County News Service that they have orders to shoot down any UFOs that seem hostile. The pilots say this is a standard command issued to pilots on the US to Hawaii run. (“Unanswered Questions: No. 4, Have UFOs Been Fired Upon?” Flying Saucer Review 3, no. 1 (Jan./Feb. 1957): 18–19)

July 26 — Two disc-shaped objects are suspended in mid-air, one above the other, over the aircraft carrier USS Franklin D. Roosevelt as it is berthed in the port of Rio de Janeiro, Brazil. They are 75–100 feet in diameter and have two rows of counter-rotating lights. The upper one releases a ball of fire that drops into the top of the lower one. Within seconds they vanish with tremendous speed. One of the witnesses is Petty Officer 3rd Class (OI) Leon Treadwell, who signs papers agreeing he will tell no one for 20 years. Chief Warrant Officer John C. Hau reports that the ship’s radar tracked a cigar-shaped object the day before or after. (Good Need, p. 231)

July 26 — 8:20 p.m. Physician J. L. Bennet and his wife watch two spinning, powder-blue lights for 10 minutes outside his home in Kilburn Estate, in District 21 near King Albert Park, Singapore. They dart about the sky “like fish in a tank,” come together, hover, and separate at great speed, disappearing from sight. He manages to take several photos, one of which shows two objects, one a nearly perfect oval, the other blurred. (Lorenzen, UFOs: The Whole Story, Signet, 1969, p. 73)

July 28 — 9:55 p.m. Seven witnesses in Brentwood, California, see a sparkling green light flash through the sky and seemingly land in an orchard. Television reception is briefly interrupted. Sheriff’s deputies and reserve officers search a square-mile area for 3 hours but find nothing. (“Mystery Light Falls in Contra Costa Co.,” Oakland
August — FBI Director J. Edgar Hoover launches COINTELPRO (counter-intelligence programs). These are employed against American dissidents and their organizations; the first one targets the American Communist Party. Typical methods are anonymous or fictitious letters, false defamatory or threatening information, forged signatures, and other disinformation. The FBI blackmails insiders to spread false rumors or promote factionalism. It creates bogus organizations to attack or disrupt a bona fide group, and instigates hostile actions through third parties, such as employers, elected officials, and the media. It enables the FBI to investigate any political organization on the pretext of checking for Communists, including the NAACP, women’s rights groups, and gay rights groups. These programs prompt nearly 330,000 FBI investigations and create a Security Index of over 200,000 dangerous Americans to be detained in the event of war. Documents relating to these programs are marked “Do not file,” offering no clues that they exist. (Wikipedia, “COINTELPRO”)

August — George King forms the Aetherius Society in London, England, as the result of what King claims are contacts with extraterrestrial intelligences, whom he refers to as “Cosmic Masters.” The main goal of the believer is to cooperate with these Cosmic Masters to help humanity solve its current earthly problems and advance into the New Age. Life on other planets is described as free from war, hatred, disease, want, and ignorance. According to King, the civilizations of Atlantis and Lemuria both vanished during an atomic war. (Wikipedia, “Aetherius Society”; Clark III 52–53; Douglas Curran, In Advance of the Landing: Folk Concepts of Outer Space, Abbeville, 1985, pp. 62–69)

August — Late night. Two young men are camping near Newark, Ohio, when they see five bright lights in a rigid V-formation. They fly in erratic, sharp-turning patterns for about 5 minutes, including sharp 30° turns. One man takes a photo. They report the sighting to the newspapers and the Air Force, but a USAF officer confiscates both the print and the negatives; the newspaper’s copies are also taken. (Michael D. Swords, “Timmerman’s Triangles,” IUR 29, no. 2 (Summer 2004): 16)

August 3 — A press leak from the Air Force Association reveals that proposals for two types of UFO-detecting satellites are under development. A television subsystem is cancelled as impractical, but an infrared subsystem requires much lower data transmission rates. Lockheed has signed an Air Force contract. The CIA’s Richard M. Bissell later reveals that the CIA Office of Scientific Intelligence Deputy Director Gen. Philip G. Strong has been pushing the Air Force to develop an infrared tracking satellite. The infrared system actually begins as planned in 1968, with initial operational status in 1970. (Clark III 813, 1032)

August 13–14 — 9:30 p.m. A radar-visual UFO sighting begins at RAF Bentwaters [now Bentwaters Parks], Suffolk, England. A blip traveling approximately 4,000–8,000 mph on an east-west course is picked up on radar. It moves in a straight line to a position about 15 miles northwest of Bentwaters. Within a few minutes, about a dozen normal targets are spotted 8 miles southwest, moving northeast at about 100 mph. In front of the targets are three objects in a triangular formation, about 1,000 feet apart. All the targets then appear to converge into one extremely large target (several times the size of a B-36), which continues moving to the northeast, then stops for a few minutes, then resumes, and is lost to radar. The entire sighting up to this point takes 25 minutes. Five minutes later, another solid target appears, flying east to west at 4,000 mph or more, then vanishes when it moves out of range. A T-33 trainer from the 512th FighterInterceptor Squadron crewed by 1st Lts. Charles Metz and Andrew Rowe is sent to investigate the radar contacts, but sees nothing. No visual sightings of the objects are made from Bentwaters in this period, with the exception of a single amber star-like object which was subsequently identified as probably being Mars. At 10:55 p.m., another target is picked up 30 miles to the east, traveling west at 2,000–4,000 mph. It passes directly overhead and is seen as a white light by both air (a C-47 at 4,000 feet reports it passed underneath him) and ground observers. Bentwaters notifies RAF Lakenheath, also in Suffolk, about what is going on, and Lakenheath personnel see a luminous object stop, then zoom off to the east. Also, two white lights are seen joining from different directions, which are tracked on two screens at Lakenheath. According to T/Sgt. Forrest Perkins, watch supervisor at the Lakenheath radar center, at midnight Lakenheath notifies RAF Neatishead, Norfolk, that a strange object is buzzing the base. A de Havilland Venom night fighter is scrambled, directed by Neatishead radar controller Flight Lt. Freddie H. C. Wimbeldon. Perkins and Wimbeldon claim the jets are sent up around midnight, but the crews think it is at 2:00 a.m. The Venom, crewed by Flight Officers David Chambers and John Brady from 23 Squadron at RAF Waterbeach [now closed] in Cambridgeshire, finds the object on radar north of Cambridge and sees it as a bright white light, which then disappears. The navigator says it is the “clearest target I have ever seen on radar.” The object, however, is behind the plane and stays there for some time, despite climbs,
divers, and circling. Ground radar operators say that the object is glued right behind the fighter. After 10 minutes, the fighter heads back. The UFO follows briefly, then stops and hovers. Another Venom, crewed by Flight Officers Ian Fraser-Ker and Ivan Logan, is scrambled at 2:40 a.m. but experiences engine problems and aborts. Ministry of Defence officer Ralph Noyes says that one of the Venom pilots has taken a gun-camera film, which was later shown at a briefing in Whitehall. The object is tracked on two radars, leaving the area at 600 mph. The encounter is classified until 1969, when it is analyzed by the Colorado project. Gordon Thayer suggests that the “apparently rational, intelligent behavior of the UFO suggests a mechanical device of unknown origin as the most probable explanation of this sighting.” A later investigation is conducted by David Clarke, Andy Roberts, and Jenny Randles.

In contrast to the reports given in the original classified teleprinter message (from 3910th Air Base Group to ADC at Ent AFB, now the US Olympic Training Center) three days after the event and in the accounts of both Wimbledon and Perkins, the air crews now state that the radar contacts were unimpressive and that no “tail-chase” or action on the part of the target occurred. They also assert no visual contacts were made. Chambers and Brady comment that “my feeling is that there was nothing there, it was some sort of mistake,” while Ivan Logan, the second Venom’s navigator, states that “all we saw was a blip which rather indicated a stationary target.” At the time 23 Squadron decides that the radar contact had, if anything, been with a weather balloon. Martin Shough concludes that there are actually several incidents at different times and places and that the relationship between each is unclear. (Wikipedia, “Lakenheath-Bentwaters incident”; NICAP, “Several Incidents of R/V at Bentwaters”; Center for UFO Studies, [case documents 1, case documents 2, case documents 3]; Condon, pp. 163–164, 248–256; James E. McDonald, “UFOs over Lakenheath in 1956,” Flying Saucer Review 16, no. 2 (Mar./Apr. 1970): 9–17, 29; J. Allen Hynek, The UFO Experience, Ballantine ed., 1974, p. 91; RAF Fighter Controller (Rtd.), “UFOs over Lakenheath,” Flying Saucer Review 24, no. 1 (June 1978): 31; Ian Ridpath, “New Light on Lakenheath,” IUR 3, no. 8 (August 1978): 6–7; Martin L. Shough, “Background & History”; Martin L. Shough, “Radar and the UFO,” UFOs 1947–1987, Fortean Tomes, 1987, pp. 219–226; Clark III 665–670; Good Above, pp. 44–46; Sparks, p. 238; Ivan Logan, [Letter to Dave Clarke], October 23, 2000; Don Berliner, with Marie Galbreath and Antonio Huneeus, UFO Briefing Document: The Best Available Evidence, Dell, 2000, pp. 64–66; UFOFiles2, pp. 66–69)

Mid-August — 10:15 p.m. North American Aviation research technician Edward F. Carpenter observes a formation of five flat, circular, pinkish UFOs over Boulder City, Nevada. (Center for UFO Studies, [case documents]; UFOEv, p. 58)

August 16 — The CIA’s Richard M. Bissell assembles a group of advisers to begin work on solving the problem of Soviets tracking the U-2 flights. Among the group are Edwin H. Land, Edward Mills Purcell, and Kelly Johnson. They look into radar-absorbing paint. (Wikipedia, “Lockheed A-12”)

August 22 — 3:40 p.m. A man named Sheetz and another civilian in a car chases a 50-foot, black, bell-shaped object bearing two bright, white lights at the top several miles east of Naval Air Station Cecil Field, near Jacksonville, Florida. Their engine stalls when the object hovers 10 feet away. The underside resembles a disc with fins. When a jet takes off from the airfield, the object shoots out of sight almost instantly. The car battery is completely dead. Noise from the object compares to a helicopter, but there is no helicopter in the area. (NICAP, “Car Chases Bell-Shaped Object, Engine Stalls”; Sparks, p. 246)

August 22 — 8:50–11:59 p.m. Radars on the island of Bornholm, Denmark, first report 2–3 objects on an easterly heading at 800 mph. Approximately 2 hours later, four objects appear and orbit over the location. About 90 minutes later, the tracks fade. (NICAP, “Objects Orbiting Location and Tracked on Radar”)

August 27 — 7:20 p.m. Royal Canadian Air Force pilot Robert James “Chick” Childerhose is flying nearly due west over the Canadian Rockies near Fort Macleod, Alberta. He is flying at 36,000 feet in the second position (far left side) of a formation of four F-86 Sabre jet aircraft. While approaching a large thunderhead (cumulonimbus) at a ground speed of about 460 mph, he sees at a much lower altitude a “bright light which was sharply defined and disc-shaped” or “like a shiny silver dollar sitting horizontal.” He takes a color photo. An analysis suggests that it would have been radiating in excess of a gigawatt of power within the spectral range of the film. (NICAP, “RCAF Pilot Photographs Object Radiating Power”; Jacques Vallée, “Estimates of Power Optical Output in Six Cases of Unexplained Aerial Objects with Defined Luminosity Characteristics,” Journal of Scientific Exploration 12, no. 3 (1998): 346–348; Richard F. Haines, “Analysis of Photograph of a High-Speed Ball of Light,” JUFOS 8 (2003): 27–48; Chris Rutkowski and Geoff Dittman, The Canadian UFO Report, Dundurn Press, 2006, pp. 68–69)

August 28 — 11:30 p.m. León Febres, Miguel Talavera, Jesús Prada, and Tomás Hernández are returning home in Calabozo, Venezuela, when the ground around them is lit up by a bright white light. Looking up, they see a large disc hovering silently. Several smaller objects emerge from the large disc, leaving behind a wake of
phosphorescent smoke that dissipates quickly. The whole group flies off to the west in a V formation with the large object in the lead. (Lorenzen, *UFOs: The Whole Story*, Signet, 1969, p. 74)

August 30 — Day. Two RAF Gloster Javelin interceptors, one piloted by E. H. "Wilbur" Wright, are flying west over the English Channel south of the Isle of Wight, England, when one of the navigators obtains a radar return at 19 miles distance (later calculations indicate it has a diameter of 600 feet). The pilots get permission to abandon their test exercise and investigate the object. Wright turns north toward the object on his right wing, but it has apparently slowed down and is maintaining its position. The second Javelin pilot has caught up from behind and confirms radar and visual sightings. The two aircraft bank steeply so the object is at 15 miles dead ahead on the radar screen. They close the distance to 10 miles and see that the object has a metallic gray appearance. At 8 miles distance, the object suddenly climbs vertically too fast for radar to track (estimated at 18,000 mph) and vanishes. After landing at RAF Odiham in Hampshire, the crews are told that ground radar at RAF Sopley [now closed] has tracked the object. They are ordered not to speak about the event. (Jenny Randles, "Scramble, UFO!" *Fortean Times* 386 (December 2019): 26–27)

September — The General Physics Laboratory of the Aeronautical Research Laboratories (ARL) at Wright-Patterson Air Force Base, Dayton, Ohio, launches an intense program to coordinate research into gravitational and unified field theories with the hiring of Joshua N. Goldberg. The precise rationale for creating the program and justifying its budgets and personnel may never be determined. Neither Goldberg nor USAF Deputy for Scientific and Technical Information Walter Blados can locate the founding documents. Roy Kerr, a former ARL scientist, says the antigravity propulsion purpose of ARL was "rubbish" and that "The only real use that the USAF made of us was when some crankpot sent them a proposal for antigravity or for converting rotary motion inside a spaceship to a translational driving system." (Wikipedia, "United States gravity control propulsion research")

September — Just before 8:00 a.m. A domed, disc-shaped craft allegedly lands within White Sands Proving Ground, New Mexico, just 150 feet away from US Highway 70. Radios and ignition systems of passing cars go dead, as witnesses—including two USAF colonels, two sergeants, and dozens of base personnel—observe the object as it takes off with a whirring sound. All personnel at Holloman AFB are assembled in a hangar, debriefed, and sworn to secrecy. (Ralph and Judy Blum, *Beyond Earth: Man’s Contact with UFOs*, Bantam, 1974; Good Need, pp. 219–220)

September 4 — Several fireball-like objects fly over Copenhagen, Denmark, tracked by radar at about 1,800 mph. (UFOEv, p. 79)

September 7 — 12:30 p.m. Thomas J. and Maud Hutchinson watch an object drop out of low clouds and land in the middle of a bog at The Loup (near Moneymore), County Derry, Northern Ireland. They wade 600 feet into the bog until they come upon the small (3 feet high, 18 inches in diameter), red, rubbery, motionless object. There are 3 white stripes around the middle and it is pointed at both ends. Hutchinson kicks the object, which rolls over then resumes its upright position. He picks it up and is surprised at its lightness (estimated 2 pounds); the top is spinning while the bottom (a small, saucer-shaped base) remains stationary. It appears to be made of canvas-like material. They try to take it back with them, but Thomas has to put it down to negotiate a hedge, and the object takes off and disappears. ("Irishman Caught a ‘Saucer,‘" *The Guardian* (UK), September 8, 1956, p. 10; Desmond Leslie, "The Strangest UFO Case of All," *Flying Saucer Review* 2, no. 5 (Sept./Oct. 1956): 2–4; Lorenzen, *UFOs: The Whole Story*, Signet, 1969, pp. 74–76; Clark III 328)

September 7 — Test pilot Iven Carl Kincheloe Jr. reaches an altitude of 126,283 feet in the Bell X-2. (Wikipedia, "Iven Carl Kincheloe Jr.")

September 8 — 9:30 p.m. Frank C. Clark is observing Mars with a 12.5-inch reflector in Las Cruces, New Mexico, when he sees a faint starlike object passing in a direction opposite to the apparent drift of Mars. It is visible for 10 seconds before passing out of the field. Clark moves the telescope and is able to see it again for another 10 seconds. It is a yellowish color. (Frank C. Clark, "An Observation of an Unidentified Celestial Object," *The Strolling Astronomer* 10 (May/June 1956): 67–68)

September 11 — The Smithsonian Astrophysical Observatory officially launches Operation Moonwatch, an effort to enlist amateur astronomers in tracking an artificial satellite that the US intends to launch during the International Geophysical Year. The announcement is made at a news conference by Armand Spitz, coordinator of visual satellite observations. The program is largely the brainchild of Harvard University’s Fred Whipple, who recruits J. Allen Hynek as assistant director to help with the central operation. Until professionally manned optical tracking

September 15 — About 6:30 a.m. A married couple is driving in Salem, Indiana, when they notice a saucer hovering about 100 feet away in a field by the road. They stop the car and get out for a better look. The object is gunmetal gray in color and looks like two shallow bowls with a dark gap between them. Wisps of smoke are coming from the gap. The object looks as large as the town’s courthouse. It begins undulating as it hovers. After 5 minutes, it tips over on its edge and vanishes. (NICAP case file)

September 25 — Leonard Stringfield’s wife Adelia observes several white tufts of angel’s hair floating down in the front yard of their home in Cincinnati, Ohio. She places it in an airtight jar. After the Stringfields contact the Air Force, M/Sgt Oliver D. Hill retrieves the sample on October 12. Analysis was done by C. G. Cocks and L. Leatherland, who find that the fibers are “multifilament bundles” that are characteristic of “regenerated cellulose fibers, either viscose or cuprammonium rayon,” perhaps from a defective filter. (Brian Boldman, “Angel Hair Physical Analyses: A Review,” JUFOS 9 (2006): 102–103)

Fall — More than 30 pilots, navigators, and flight engineers are on their way home from special duty in Europe on a US Navy Super Constellation transport. When they are about 50 miles northeast of Gander, Newfoundland, the pilot notices a cluster of lights beneath the aircraft. Suddenly, the lights dim and spread out, the largest light ascending on an apparent collision course with the transport. As it reaches the plane’s altitude, it tilts, shoots to one side, and paces them at a distance of 300 feet. It is a huge metallic disc, 30 feet thick at the center and 350–400 feet wide, with a blury glow around the rim. Gradually it pulls ahead, tilts upward, accelerates, and zooms away in 5–8 seconds. Gander Airport confirms that it had a radar target near them. (Keyhoe, FSTS, pp. 16–19; Keyhoe, Aliens from Space, Signet ed., 1974, pp. 78–84; Yurko Bondarchuk, UFO Sightings, Landings, and Abductions, Methuen, 1979, pp. 104–106)

Fall — A man in Falls City, Nebraska, sees a winged human with a demonic face that approaches him from three blocks away. It is about 8–9 feet tall and approaches him closely, hovering in the air about 25 feet away. As it passes over him, the man feels numb and paralyzed. The episode haunts him for the next 23 years when he talks to an investigator. (Clark III 778)

Fall or winter — Shortly after 12:00 noon. An Air Force Convair RB-36H of the 28th Strategic Reconnaissance Wing based at Ellsworth AFB, Rapid City, South Dakota, captained by Lt. C. Lenny Marquis, is flying in northern South Dakota at 423 mph when one of the crew sees a metallic disc 100 feet in diameter fly toward the airplane from the left and take up a fixed position on the left wing less than 300 feet away. Other crew members rush to the portholes to take photos. The object has a low dome at the top with three round openings or light sources. The bottom is nearly flat. Its narrow vertical sides are populated by many separate light sources, each a different color. The rest of the disc is a “light golden” hue. After 5–8 minutes, the object suddenly accelerates in parallel with the B-36 and then rises about 30° above the horizontal. The peripheral lights become brighter and turn greenish as it speeds out of sight in several seconds. Both inflight and ground radars detect the object. Substitute navigator Lt. Jimmie Lloyd says the crew turned in all photos, logs, and equipment to an intelligence unit after landing. (Richard F. Haines and Franklin Carter, “A 1956 Military Aircraft–UFO Close Encounter,” IUR 25, no. 1 (Spring 2000): 22–25)

October — Karl L. Veit founds the Deutsche UFO/IFO-Studiengemeinschaft in Wiesbaden, Germany, which publishes the newspaper-format UFO-Nachrichten. (“60 Jahre UFO-Nachrichten,” 2016)

October 2 — 3:45 a.m. Harry J. Sturdevant is on duty as a night watchman at Herbert Elkin and Company, a construction firm in Trenton, New Jersey. He sees a cigar-shaped object some 60–100 feet long and 15 feet in diameter swiftly descending toward him. Emitting a red glow, the object is making a hissing noise like steam and generating a foul odor. It swoops past him and vanishes. He loses his sense of taste and smell, possibly permanently. His face is burned to the point where he cannot shave for two weeks. He begins to lose hearing in his right ear. When he returns to work the next day, he finds leaves on the ground that have burned up like tissue paper. Sturdevant applies for workmen’s compensation from the state for his medical expenses. An adjudicator awards him the
money based on the fact that he may have only thought he saw something, but was injured when he went to investigate it, which his job required. (Emil Sloboda, “He Collected on a Flying Saucer,” *Fate* 10, no. 6 (June 1957): 66–69; Donald E. Keyhoe and Gordon I. R. Lore Jr., *Strange Effects from UFOs*, NICAP, 1969, p. 7)

October 7 — 10:45 p.m. UFO reports by police and civilians around Merced, California, reach Castle AFB [now Castle Airport Aviation and Development Center] and a lighted elliptical object about 100–120 feet in diameter is seen by the tower. Two interceptors are scrambled. The object ducks under and above a narrow cloud bank. The pilots can see it from various angles and as close as a few hundred yards. It appears to be a flattened circular shape. The pilots decide to fly one above and one below the overcast. Ground radar picks up the planes but not the UFO. One pilot breaks off to return but sees that the UFO is now chasing his buddy’s plane. Several officers arrive from another base to debrief the pilots and they appear very knowledgeable about UFOs. They seek “confirmation, not information” and tell the pilots not to discuss the sighting at all. Citizen witnesses are told the pilots were chasing ducks or geese. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1956 November–December*, The Author, 1994, pp. 52, 59; Richard H. Hall, *Uninvited Guests*, Aurora, 1988, pp. 242–244; *Sparks*, p. 239)

October 29 — Howard Menger, a sign painter from High Bridge, New Jersey, goes public on the *Long John Nebel* show on WOR-AM in New York City with a story of his contacts with “Aryan-type” Venusians in spaceships. Menger reports that his contacts started in childhood, when he experienced flashbacks of life on another world and sightings of flying discs. In 1932 he met a beautiful blonde woman who could read his mind, and in 1946 he again sees her stepping out of a flying saucer. She is supposedly 500 years old, although she looks 25. Many contacts follow. (Clark III 738)

November 4 — NICAP issues its first news release. T. Townsend Brown emphasizes the group’s “growing membership of responsible citizens from every walk of life and profession” and stresses that “there does exist more than enough evidence of certain and obvious aerial phenomena to justify independent evaluation.” (NICAP, “*Project Skylight*,” November 4, 1956)

November 11 — 10:00 p.m. Stig Ekberg and Harry Sjöberg are building a house on the island of Väddö, about 56 miles northwest of Stockholm, Sweden. Ekberg is driving his Ford V8 pickup when they see a bright flying object with the shape of a flattened sphere 24 feet wide and 9 feet high approaching from the east. It moves about a half mile in front of them at an altitude of 300 feet. As it makes a sharp turn toward them, the truck engine sputters and dies and the headlights go out. The object starts “slowly gliding down,” rocks back and forth, and comes to a stop in the middle of the road, about 300 feet in front of them, 3 feet above the ground. The object illuminates the surrounding landscape with such a tremendous amount of light that a nearby barn is clearly visible. The air smells of ozone and smoldering insulation. After about 10 minutes the object gets brighter, lifts off the ground, moves to the left and up, makes a sudden turn, and speeds away in the direction it had come. Ekberg restarts the truck and the headlights come back on. Seeing that the grass at the landing site is flattened, they investigate further and find a shiny rock that is hot to the touch. It is a heavy, three-sided piece of metal about the size of a matchbox. After several unsuccessful attempts to have the sample studied, it is taken to the Saab aircraft company where Sven Schalin conducts a thorough analysis. Other tests are later run in laboratories in Sweden, Denmark, and Germany. The general conclusion is that the rock is composed of tungsten carbide and cobalt, consistent with manufactured products. (Jacques Vallée, “*Physical Analyses in Ten Cases of Unexplained Aerial Objects with Material Samples*,” *Journal of Scientific Exploration* 12, no. 3 (1998): 365–366)

November 14 — 10:10 p.m. Captain William Joseph Hull and his copilot Peter H. Macintosh are flying Capital Airlines Flight 77 from New York City to Mobile, Alabama. While approximately above Jackson, Alabama, they see something like a brilliant meteor flash by the aircraft. The object stops, hovers, and engages in a range of acrobatics (crazy gyrations, lazy 8’s, square chandeliers) for several minutes before shooting out over the Gulf of Mexico at “fantastic speed.” (Sign Historical Group, “*Captain Joe Hull’s UFO Sighting*”; Condon, pp. 127–129; *Sparks*, p. 240; Swords 230–231)

November 21 — 8:23 p.m. A customs officer named Ueda and a maritime safety officer named Kume are walking along Number 1 Pier, Kobe, Japan, when they hear an explosion. They see something resembling fireworks on the bay and watch as two whirling balls of fire submerge. (Sanderson, InvRes, p. 46)

November 25 — 4:30 a.m. Police radio at Hot Springs, South Dakota, picks up transmissions made by a jet interceptor from the 54th Fighter Interceptor Squadron at Ellsworth AFB in Rapid City that makes three passes at a brilliantly lit UFO bobbing up and down in the sky. On the third pass, the pilot reports that the object registers on his radar. It is rumored that a blip is picked up on ground radar by the 740th Aircraft Control and Warning Squadron. A sheriff and deputy at Rapid City watch a green stationary UFO with a flashing red light for 30 minutes; an upward-shining white light appears at intervals. (NICAP, “Gnd/Air/Visual, Jets Scrambled”; “Saucers’ Stir Speculation,” Rapid City (S.Dak.) Daily Journal, November 26, 1956, p. 1; “Hills Residents Tell of Shining Objects,” Rapid City (S.Dak.) Daily Journal, November 26, 1956, pp. 1, 7; Pierre (S.Dak.) Capitol Journal, November 26, 1956; UFOEv, pp. 22, 79; Richard F. Haines and Franklin Carter, “A 1956 Military Aircraft–UFO Close Encounter,” IUR 25, no. 1 (Spring 2000): 25)

December — Chemical engineer Leon Davidson begins to distribute privately printed copies of Project Blue Book Special Report No. 14, together with his analysis and commentary. He has become convinced that UFOs are secret devices developed by the US government and that Special Report No. 14 is a clever attempt to hide the fact. Mostly, however, he focuses on discrepancies in the Air Force’s public announcements and the actual data in the report. Davidson publishes further editions in October 1957, July 1966, January 1971, and 1976. (Leon Davidson, Flying Saucers: An Analysis of Project Blue Book Special Report No. 14, [1956], 3d ed., Ramsey-Wallace, 1966; Clark III 930)

December 1 — 12:20 a.m. A round object, red to orange in color, is observed moving at approximately 1,000 foot above Valley City, North Dakota. It moves rapidly up, down, sideways, and hovers. A police car approaches it, but the car loses radio contact with the station. Valley City also loses contact with Jamestown, South Dakota. All radio contact returns after the object leaves the area. (NICAP, [Blue Book file])

December 2 — Dorothy Martin sets off from Prescott, Arizona, with the Laughheads, ufologist brothers Ray and Rex G. Stanford, and George Hunt Williamson, his wife Betty, and toddler son Mark. They are acting in response to a series of Williamson channelings that had begun April 18 when Lord Aramu-Murú announced that “those we have commissioned” are to establish a priory of the Brotherhood of the Seven Rays “in a remote area of another country to the south.” After spending some time in Mexico, they head for Moyobamba, Peru, under the direction of their spirit masters. The Laughheads (who apparently were in Mexico in July) and Stanfords leave around this time. After a while, those remaining move to the Valley of Pariahuanca east of Lima, Peru, and set up the Outer Retreat of the Monastery of the Seven Rays, which has some cult-like attributes. There they attract new members, including Williamson’s later coauthor John McCoy. Williamson devotes himself for several years to paranormally guided archaeological expeditions. (Clark III 719–720, 1286; Zirger and Martinelli, The Incredible Life of George Hunt Williamson, Verdeckhiri, 2016, pp. 105–115)

December 10 — 2:00 p.m. A US Air Force pilot sees a silver object with a “straight wing, having engine rods or large wing pods [or] intakes” flying at 56,000–62,000 feet for 15 minutes at Victoria, Texas. The pilot’s description is a dead ringer for a secret U-2 aircraft, which is what Blue Book suspects. (Mark Rodeghier, “The U-2 Spy Plane and Blue Book: Another Look,” IUR 27, no. 3 (Fall 2002): 20–21)

December 15 — 11:00 a.m. While out gathering Christmas greens near Derry, New Hampshire, A. G. Horne looks up and sees a 2-foot tall green dwarf with a high-domed head, floppy ears, a face like a bloodhound, and lidless eyes like a snake. His skin hangs in folds like an elephant’s. After a few minutes, the being “started for me with a kind of screeching sound,” and Horne flees. (Center for UFO Studies, HUMCAT Index 1956, p. 23; Clark III 271)

December 17 — 4:20 p.m. Near Itazuke Air Base [now Fukuoka Airport] in Fukuoka, Japan, a USAF pilot flying an F-86D interceptor picks up a large blip on airborne radar. The pilot sees a tan object, round on top, at 9.2 miles and closes to within 5.7 miles. The object starts to pull away from the fighter and at 13.8 miles all radar disappears.
December 17 — Night. Marie Carow goes outside her home in Conashaugh, Pennsylvania, with a flashlight and discovers two little men, 3.5 and 3 feet tall, standing motionless in her back lawn. Both wear helmets and snug-fitting suits of silvery material. Carow shines the light on them for 3 minutes, then runs back to tell her husband. 15 minutes later, they are gone. (Berthold Eric Schwarz, “UFO Occupants: Fact or Fantasy?” Flying Saucer Review 15, no. 5 (Sept./Oct, 1969): 16–18; Clark III 269; Patrick Gross, URECAT, October 18, 2007)

1957

1957 — Morris K. Jessup publishes The Expanding Case for the UFO, which argues that human “little people” (like the pygmy peoples of the Congo basin) were “planted” from UFOs thousands of years ago. Citing reports of anomalous lights on the moon, Jessup speculates that the pygmy races either colonized the moon or came to the Earth from there. They are the remnants of an advanced civilization that developed levitation, teleportation, and space flight, but had to leave Earth when Atlantis and Mu were sinking into the oceans. (Morris K. Jessup, The Expanding Case for the UFO, Citadel, 1957; Clark III 106–107, 635; Jerome Clark, “Vimanas Have Landed: Ancient Astronautics in Ufology,” IUR 22, no. 3 (Fall 1997): 26)

1957 — Metaphysical author George Hunt Williamson writes Other Tongues—Other Flesh (although it bears a copyright date of 1953), the first of three books that set forth an alternative occult history shaped by Atlantis, Lemuria, reincarnation, and space people—both benign and malevolent. He writes that space people first arrived 1 billion years ago [prior to the earliest known multicellular life on land], were 12 feet tall, and built an underground city beneath Lake Titicaca, Peru. Migrants from the “Sirius system” arrive during the Miocene Epoch [23–5 million years ago] looking for terrestrial bodies to inhabit—they select the evolving apes. The next visitation took place in Arizona in 10,000 B.C. [the beginning of the Neolithic Revolution] when Venusians land and interact with the Lemurians. Records documenting earth’s unknown history are hidden in various inaccessible places (“secret places of the lion”) around the globe. Williamson’s book Secret Places of the Lion follows in 1958 and Road in the Sky in 1959. These are among the first ancient astronaut books. In the latter book, Williamson claims that the Hopi’s ancestors are Martians, while their neighbors the Navajo are from Maldek, the planet whose destruction formed the asteroid belt. (George Hunt Williamson, Other Tongues—Other Flesh, Amherst, [1957]; George Hunt Williamson, Secret Places of the Lion, Destiny Books ed., 1996; Clark III 104–106, 1286; Jerome Clark, “Vimanas Have Landed: Ancient Astronautics in Ufology,” IUR 22, no. 3 (Fall 1997): 23–26; Zirger and Martineili, The Incredible Life of George Hunt Williamson, Verdeckhari, 2016, pp. 113–120, 235–243)

1957 — New Jersey contactee Howard Menger releases an album of “Authentic Music from Another Planet,” featuring a narrative by Menger and bland piano music written by his wife Connie (under her nom de plume Marla Baxter, sister of the blonde spacewoman he had met in 1946). (Discogs, “Authentic Music from Another Planet”; Authentic Music from Another Planet by Howard Menger,” Libertad450 YouTube channel, February 22, 2016)

1957 — Otis T. Carr announces his invention of a fourth-dimensional space vehicle, a Circular-Foil Spacecraft powered by an Ultronic Electric Accumulator that makes use of the “free energy of the universe.” (Clark III 860)

1957 — Ground Saucer Watch is established in Phoenix, Arizona, by Ted Starrett. William H. Spaulding is the Western Division Director, with James A. Spaulding as the Eastern Division Director in Cleveland, Ohio. It publishes Ground Saucer Watch Bulletin from 1976 to 1982. By 1979, GSW has analyzed nearly 700 UFO photographs and films, of which they verify 38 as bona fide. (Margaret Sachs, The UFO Encyclopedia, Putnam, 1980, p. 132)

1957 — Hayden C. Hewes founds the International UFO Bureau in Edmond, Oklahoma. It publishes the Interplanetary Intelligence Report from 1965 to 1966.

1957 — Engineer Pantelimon Mizof and others see an object in the Bucegi Mountains, Romania, pass over them silently and land. Some of them approach to get a better look, but when they are 150 feet away, it takes off suddenly. (Hobana and Weverbergh 158–159)

1957 — The Victorian branch of the Australian Flying Saucer Research Society becomes a separate organization, the Victorian UFO Research Society. It publishes the Australian UFO Bulletin from 1957 to September 2007, edited
January — Contactee **Gabriel Green** establishes the Los Angeles Interplanetary Study Groups, which in 1959 evolves into Amalgamated Flying Saucer Clubs of America in Los Angeles, California. It assumes that UFOs are piloted by friendly extraterrestrials. Around the same time, Green announces his meeting with flying saucer crewmen from the hitherto unknown planet Korendor, orbiting the triple star Alpha Centauri. At its peak, AFSCA has more than 5,000 members. (Wikipedia, “**Gabriel Green**”; Clark III 99; *Thy Kingdom Come*, no. 4 (April/May 1957))

January 1 — Shortly before 12:00 midnight. Herbert Naderson and his wife and sons are driving northeast to their home in Ashby, Minnesota, when they see a triangular object traveling slowly at a high altitude. They watch it for 45 minutes. (*Fergus Falls (Minn.) Daily Journal*, January 3, 1957; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1957 January–March 22nd*, The Author, 1995, p. 2)

January 14–16 — T. Townsend Brown has proven so financially inept that the NICAP board asks him to step down. **Delmer S. Fahrney** replaces him as board chairman, **Keyhoe** steps in as director, and Fahrney convenes a press conference in which he announces that UFOs are under intelligent control, but that they are not American or Soviet aircraft. **Stringfield** is made public relations adviser. (T. Townsend Brown, *Letter to NICAP Board of Governors*, January 16, 1957; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1957 January–March 22nd*, The Author, 1995, pp. 14–20; “High Speed Objects Reported in the Sky,” *New York Times*, January 17, 1957, p. 31; Stringfield, *Situation Red*, Fawcett Crest, 1977, p. 15; Clark III 792)

January 16 — 8:00 p.m. The crews of two Air Force B-25s are flying about 90 miles north of Sweetwater, Texas, when they see a round white object make rapid maneuvers. Pilot Lt. Col. **Howard T. Wright** notes that his radio compass starts pointing directly toward the object, following its movements. The entire object begins blinking on and off. When the aircraft gets within range of Lubbock, Texas, the object flies off on a straight-line course in about 12 seconds. One of the B-25s refuels and is sent on a 4-hour search of the vicinity with no results. (NICAP, “Object Maneuvers near B-25’s / EME”; Sparks, p. 241; Swords 244–245)

January 21 — 10:45 a.m. Near Kagnew Station [now closed], Asmara, Eritrea, five enlisted men of the US Army’s 4th Detachment of the Second Signal Service Battalion (M/Sgt Billy J. Woodruff, Sgt. Frank Haverly, SP2 Robert O. Clewell, SP2 George R. Dean, and SP3 Gerald L. Fennell) watch a large, shiny, metal sphere hovering at about 2,000 feet. It suddenly disappears but reappears later for a few minutes, then disappears again. Later in the day, Woodruff and Capt. Jesse M. Strong see two brownish, disc-shaped objects maneuvering in formation at a high altitude. One breaks away from the other, moving at high speed. (UFOEv, p. 29)

January 31 — U.S. Army Order number 30-13, “Sightings of Unconventional Aircraft,” stipulates that personnel involved in sightings must “not discuss or disseminate such information to persons or agencies other than their superior officer(s) and other personnel authorized by the Acting Chief of Staff, G-2, this headquarters,” by order of Col. **Charles L. Olin**. (“Air Force Sees Plenty: Tells Nothing,” *CSI News Letter*, no. 8 (July 25, 1957): 7–8)

February — Project MKUltra chief **Sidney Gottlieb** organizes field trials of psilocybin for injection into 9 black inmates at the Addiction Center in Lexington, Kentucky. **Allen Dulles** approves psychiatrist **Donald Ewen Cameron**’s application for mind-control experiments to be administered at the Allan Memorial Institute of McGill University in Montreal, funded through the Society for the Investigation of Human Ecology, a CIA cutout organization. Cameron does not know that the money originates from the CIA. In addition to LSD, Cameron experiments with various paralytic drugs, electroconvulsive therapy at 30–40 times the normal power, and sensory deprivation in a “sleep room.” This is a dimly lit dormitory of about 20 beds, which the nurses call “The Zombie Room.” His “psychic driving” experiments consist of putting subjects into drug-induced comas for weeks at a time (up to three months in one case) while playing tape loops of noise or simple repetitive statements. His experiments are typically carried out on patients who have entered the institute for minor problems such as anxiety disorders and postpartum depression, many of whom suffer permanently from his actions. His treatments result in victims’ incontinence, amnesia, forgetting how to talk, forgetting their parents, and thinking their interrogators are their
parents. The Canadian government is apparently unaware of these activities. Naomi Klein argues that Cameron’s research and his contribution to the MKUltra project is actually not about mind control and brainwashing, but about designing “a scientifically based system for extracting information from ‘resistant sources.’” In other words, torture.” (Gordon Thomas, Journey into Madness: The True Story of Secret CIA Mind Control and Medical Abuse, Bantam, 1989; Anne Collins, In the Sleep Room: The Story of the CIA Brainwashing Experiments in Canada, Lester & Orpen Dennys, 1988; John D. Marks, The Search for the “Manchurian Candidate”: The CIA and Mind Control, Times Books, 1978; Naomi Klein, The Shock Doctrine: The Rise of Disaster Capitalism, Picador, 2008; Jim Keith, Mind Control, World Control: The Encyclopedia of Mind Control, 2014)

February 13 — 2:30 a.m. The USAF operations director and three tower controllers at two radar sites within Lincoln AFB [now Lincoln Airport, Nebraska], the GCA and NCOIC, track several targets flying behind an airliner at a distance of 5–6 miles and traveling twice as fast. There is no IFF response. The objects hover and move at high speed. One splits into two objects, another executes an 180° turn. The radar blips are the size of a B–47. (NICAP, “Radar/Visual at Lincoln AFB”; Sparks, p. 241; J. Allen Hynek, The UFO Experience, Ballantine ed., 1974, pp. 96–97)

February 13 — 9:40 p.m. Amateur astronomer Steve Papina is walking south in Placerville, California, when he notices off to his left the ionized track of what he takes to be a meteor. It is about 20° above the eastern horizon, rising at a 70° angle. The trail begins widening at about 35° above the horizon and veers in a westerly direction. Suddenly a black disc appears directly in front of the trail, whose diameter is approximately the width of the trail and the size of a nickel held at a distance of 5 feet. Its surface is not smooth but crisscrossed with grooves. It continues to move from east to west and acquires a white, dusty appearance before speeding directly away from Papina at high speed. (“ALPO Refers Sighting to APRO,” APRO Bulletin, July 1957, p. 3)

February 15 — 10:00 p.m. A large, circular object is seen by independent witnesses in Wardle, Lancashire, England. Shortly afterward, a commercial aircraft is seen following the same course as the UFO and displaying unusually powerful lights. Later, at a point along the flight path, a small radio transmitter like those attached to balloons is found, then another piece of meteorological equipment in another spot. In the House of Commons, MP Tony Leaver asks the Secretary of State for Air for an explanation. On March 20, Under-Secretary of State for Air Ian Orr-Ewing responds, saying that the objects were toy balloons illuminated by a flashlight bulb released by Neil Robinson, a laundry mechanic from Rochdale. But on April 17, the Air Ministry sends an investigator to interview the witnesses and tells them not to talk about the sighting. Robinson says he has no idea how to launch a balloon, but there is some evidence that he has considerable technical know-how and a penchant for pranks. (Clifford Thornton, “The Wardle Mystery,” Flying Saucer Review 3, no. 3 (May/June 1957): 4; Geoffrey Norris, “Something in the Sky,” Royal Air Force Flying Review, July 1957, pp. 14–16, 46; Good Above, pp. 46–47; David Clarke, “The Wardle ‘Thing,’” Fortean Times 196 (June 2005): 40–41)

February 19 — In testimony before the House Appropriations Committee, National Advisory Committee on Aeronautics officials Hugh Latimer Dryden and Jimmy Doolittle are asked about UFOs. They “flatly denied the existence of such space vehicles.” When asked why they don’t speak out more often, they remark that they “cannot compete with the science-fiction people.” (US House Appropriations Committee, Hearings, Independent Offices Appropriations for 1958, National Advisory Committee on Aeronautics, February 19, 1957, pp. 1417–1419)

February 26 — UK Air Chief Marshal Hugh Dowding writes to retired Italian diplomat Alberto Peregó that he is most interested in “accounts of intelligible contacts between human beings and the occupants of interplanetary ships.” (Good Above, p. 48)

March 1 — Leonard H. Stringfield publishes the final issue of CRIFO Orbit. (CRIFO Orbit 3, no. 12 (March 1, 1957); Clark III 1114)

March 6 — 2:00 p.m. Hearing the family dogs barking in the backyard, a Mrs. Martin who lives on Hope Road near Great Meadows, New Jersey, looks outside and sees the dogs looking at a white hovering object that looks like a “huge derby hat” about 50 feet in diameter. It is rocking slightly in the air and makes a low, rumbling sound. Beneath it are “streamers or lines” that “twinkle like the fragile strands” of Christmas tinsel. (Hynek UFO Report, pp. 150–154; Sparks, p. 241)

March 8 — A pilot watches a UFO from the ground at Baudette, Minnesota. It is circular, 15–18 feet in diameter, and its odd glow shines on the snow-covered ground. It is flying so low that it seems to suck the loose snow up under it as it passes. (Keyhoe, FSTS, p. 56; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1957 January–March 22nd, The Author, 1995, p. 74)

March 8 — 9:45 p.m. Victor Hancock and Guy Miller are flying a DC-3 owned by the Tennessee Gas Transmission Company above Pasadena, Texas, when they see a UFO bearing three brilliant white lights. After the UFO speeds by the aircraft, it slows down. When the DC-3 catches up, it speeds ahead. This cat-and-mouse chase continues

March 9 — 4:33 a.m. Capt. Matthew A. Van Winkle, piloting a Pan American World Airways DC-6A airliner at a point over the Atlantic Ocean approximately 350 miles northeast of Jacksonville, Florida, observes a “burning greenish white round object” to the right of the aircraft that appears to be on a collision course. Van Winkle pulls the plane upward in a climb to avoid the object. This sudden maneuver causes four of the passengers to be thrown out of their seats, resulting in injuries. Copilot Dion W. Taylor and Flight Engineer John Washuta also observe the object. Washuta says the UFO is a high-intensity light that appears to stand still for approximately four seconds until it is lost to sight during the evasive action. Ed Perry, piloting Pan Am Flight 269 about 175 miles behind him, also sees it. Miami Air Traffic Control sends a flash message to the Civil Aeronautics Board describing the incident: “Pilot took evasive action, object appeared to have a brilliant greenish-white center with an outer ring which reflected the glow from the center. … Above description fits with what seven other flights saw…. Miami reports no missile activity…. Original reports of jet activity discounted.” The Air Force quickly explains the sighting as a meteor, but the CAB declares it unexplained after a thorough investigation. (NICAP, “DC6-A Crew Take Evasive Action”; Keyhoe, FSTS, pp. 54–56; Swords 245–246; Frank Edwards, FS Serious Business, Bantam ed., 1966, pp. 38–39; Good Above, pp. 282–283)

March 22–23 — Mrs. Robert Beaudoin, the wife of an Air Force officer, along with her 17-year-old daughter Carol Litten, sees a series of unusual lights at 11:15 p.m. northeast of Camarillo, California. First they see a large, soundless, and pulsing light, with something like a pole on top, making fast and erratic motions. She calls a military friend and then 1st Lt. Leonard E. Ott at nearby Oxnard AFB [now Camarillo Airport]. At 12:30 a.m., they see a green object accompanied by two smaller red lights below the horizon of the Los Palos Hills. The green object seems to be hovering over the North American Rocketdyne plant in the Simi Hills. At this time both the green object and the red objects seem to jump around, and the two red objects are zooming past the green object at tremendous velocities. Ott inquires about radar and a Lt. Martin tells him that radar is detecting a stationary object in the same area. The sheriff’s office is contacted, and they send a patrol car. Deputy Sheriffs Segura and Rausch confirm Beaudoin’s report, with the exception that by that time there are five red objects flying well below the green one. All are in motion and constantly changing altitude. Radar calls Ott back and says they have a scramble underway and they will have the aircraft check the area upon their return. Upon the arrival of the interceptors from Oxnard the red objects join the green object and speed away up and to the east. The aircraft are unsuccessful and return to base. At this time two Navy aircraft are sent to the area. Somehow, between the time of this report to Oxnard and the later Air Force investigation by the 4602nd, these red objects are changed, on the report, to stars and the moon above. This happens despite the witness stating that the red lights were below the hills on the horizon. To deal with that, the Air Force adds the theory that a temperature inversion caused light to bend the images of the stars, or, alternatively, the witness saw lights on a barn. Beaudoin herself is judged hysterical due to her pregnancy. The Air Force’s explanation is completed without anyone bothering to interview the teenage daughter or taking anything associated with the airbase into account (for example, the radar returns). (NICAP, “Objects Seen, Radar Tracked, Jets Scrambled”; Keyhoe, FSTS, pp. 58–61; Hynek UFO Report, pp. 53–54; Sparks, p. 242; Swords 246–247)

March 23 — Agriculturist Luis Petriera, along with several others, watches a glowing object plunge into Lake Maracaibo, Venezuela. No planes are missing. Officials drag the lake but find nothing. (“Report from Venezuela,” APRO Bulletin, July 1957, p. 10)

March 28 — AEC physician and Navy Capt. Charles Wesley Shilling releases a press statement saying that “excessively hot baths can be as damaging to the human sex glands as radioactive fallout in the amount received in the last five years from the testing of atomic weapons.” It is intended to counter the antinuclear activism of biochemist Linus Pauling. (“Says Hot Baths As Bad for Sex Glands As Fallout,” Newport (R.I.) Daily News, March 29, 1957, p. 2)

Early April — USAF Brig. Gen. Arno H. Leuhman, director of Air Force information, tells the press that “There’s no valid evidence that there are flying saucers.” (“AF Intelligence Chief Visits Here,” Miami (Fla.) News, April 14, 1957, p. 12A)

April — 7:30 a.m. An anonymous resident of Córdoba, Argentina, is motorcycling to Río Ceballos when his engine stops. He sees a large UFO hovering nearby, from which a human-like occupant emerges. He entices the man to enter the UFO with him. Inside, he sees 5–6 screens and intricate equipment, at each of which a similar occupant is seated. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1957 March 23rd–May 25th, The Author, 1995, pp. 63–64)

April 4 — Pilot Robert L. Sieker takes a U-2 covered in radar-deflecting paint for a test run out of Area 51 and flies almost 90 miles without incident when suddenly the paint causes the aircraft to overheat, spin out of control, and
crash near Pioche, Nevada. Sieker ejects but is killed when a piece of metal hits him in the head. (Aviation Safety Network, “[Wikibase Occurrence #155905](https:// Aviation Safety Network)”) April 4 — Five unusual radar contacts are detected simultaneously on three tracking radars of the Bombing Trials Unit based at RAF West Freugh [now MOD West Freugh], southeast of Stranraer, Scotland, and followed for 36 minutes. The three radars are located at two different sites near Luce Bay, Wigtownshire, Scotland. The object flashes across the sky at 60,000 feet, dives to 14,000 feet, circles, and speeds away. Wing Commander Walter Whitworth, in command at West Freugh, is ordered to say nothing about the object. (NICAP, “[Three Radars Track Maneuvering UFO](https:// UFOFiles)”; Good Above, pp. 48–49; UFOFiles2, pp. 51–53; Martin Shough, “[Study of Unusual Radar Observations near RAF West Freugh, Wigtownshire, SW Scotland, April 4, 1957](https:// UFOFiles).” March 2010; Patrick Gross, “[The West Freugh Incident, 1957](https:// UFOFiles).”) April 8 — USAF Maj. Gen. Joe W. Kelly answers a question from Rep. Lee Metcalf (D-Mont.) and denies that the Air Force has muzzled pilots. “Answers are provided on any unidentified flying objects which have attracted national attention.” He admits that interceptors are still sent up “as a matter of security.” (Keyhoe, FSTS) April 10 — Delmer S. Fahney leaves NICAP’s board of directors for urgent and personal reasons, partially because his wife is seriously ill, but also because of the ridicule generated by his peers in the military. (Clark III 792–793) April 14 — 3:00 p.m. Marie Garcin and Julia Rami are walking along road D24 a half-mile east of Vins-sur-Caramy, Var, France, when they hear a deafening noise and see a 5-foot-tall, 3-foot-wide, metallic, top-shaped object covered with vibrating sharp spines that is landing near a road sign. The sign starts to vibrate loudly, then the object hops over the road at a height of about 15–30 feet. Another witness, Jules Boglio, is about 1,000 feet away and sees the object land a second time in the adjoining road, then jump over another road sign which then vibrates loudly. Two other witnesses see the object at a much greater distance. (NICAP, “[Top-Shaped Object Hovers at 300'](https:// UFOFiles); Jimmy Guieu, “[Vins-sur-Caramy (Var), 14 avril 1957](https:// UFOFiles).” Ouranos, no. 21 (1957): 50–52; Lorenzen, UFOs: The Whole Story, Signet, 1969, pp. 145–146; J. Allen Hynek, The UFO Experience, Ballantine ed., 1974, pp. 154–156) April 19 — 11:52 a.m. Two metallic discs are seen entering the Pacific Ocean about 300 miles southeast of Tokyo, Japan, by Japanese fisherman aboard the Kitsukawa Maru. A violent turbulence disturbs the ocean after they submerge. The objects are 30 feet long and wingless. (NICAP, “[Two Discs Enter Pacific](https:// UFOFiles)” April 24 — 6:27 a.m. Project 57 is an open-air nuclear “dirty-bomb” test conducted in Area 13 at the Nellis Air Force Range, Nevada. The high explosives of a nuclear weapon are detonated asymmetrically to simulate an accidental detonation of an XW-25 warhead in an airplane crash. The purpose of the test is to verify that no yield would result, as well as study the extent of plutonium contamination. Some 4,000 galvanized steel pans sprayed with tacky resin are set up around a 10-by-16-square-mile block of land to capture plutonium samples. Some 68 air-sampler stations equipped with micropore paper are spread over 70 square miles. Mock-ups of sidewalks, curbs, and asphalt are set up in the desert; cars and trucks are added; giant air-sampling balloons are tethered in place; 9 burros, 109 beagles, 10 sheep, and 31 white rats are put in cages. Afterward, the contaminated area is fenced off and the contaminated equipment buried in place. Data from the test confirms that plutonium has a 24,000-year half-life; many of the test animals are killed, but security guard Richard Mingus manages not to inhale any particles. A radiological survey team detects alpha radiation, but no serious beta or gamma radiation. In 1981, the US Department of Energy decontaminates and decommissions the site. Hundreds of thousands of cubic yards of soil and debris are removed from Area 13 and disposed of in a waste facility at the Nevada Test Site. (Wikipedia, “[Project 57](https:// Wikipedia);” Jacobsen, Area 51, pp. 100–116) Late spring — Between 6:30 and 7:00 p.m. Airman 2nd Class Wallace Fowler is sitting on the front steps of his barracks at Ellsworth AFB near Rapid City, South Dakota, when a silver domed disc with portholes appears directly above him. Shadows are moving behind the portholes. The UFO is motionless and the size of a house. After about 2–3 minutes it takes off straight up at high speed. Many others on the base have seen the object as well, and jets are scrambled. The UFO maneuvers around the jets as if toying with them. One of the pursuing jets allegedly goes missing and the wreckage is never found. (Good Need, pp. 218–219) May — NICAP is fed a phony UFO crash story in the Everglades, Florida, by an Associated Press employee who is a “former Signal Corps engineer” with possible ties to the NSA. He admits faking the story but refuses to give any motive. (Keyhoe, FSTS, pp. 64–68) May — 4:50 a.m. A truck driver pulls over at the edge of the disused RAF Winkleigh Airfield [now the site of the West of England Transport Collection], Devon, England, to drink some coffee. He notices an object like a metallic, fluorescent-blue submarine with tail fins sitting at the end of the runway. It is about the size of an airliner. He watches it a while, then gets out of the truck and approaches it. He has the object in sight a total of 10–15 minutes and realizes it is hovering just above the ground. When he is 600 feet away, he encounters a type of force field that prevents him from approaching. The object then rises straight up into the sky to about 1,200 feet and shoots
off to the north. The force field disappears. (Ron Toth, “UFO Landing at War-time Aerodrome,” Pegasus 2, no. 3 (May-June 1970): 2–4)

May — 6:00 a.m. Frances Stichler is working in her barn in Milford, Pennsylvania, when she hears a whirring sound and sees a bowl-shaped object approaching at a height of 15 feet. It is 15 feet in diameter with a rim about 3 feet wide. It hovers with one side tilted toward her 50 feet away. Its lone occupant, a helmeted figure with a long, olive-colored face and a shiny, light gray suit, gazes at her with a quizzical expression on his tanned face. It is sitting on the far rim with feet and legs hidden by the lower part of the object. Inside the open vehicle, she can see levers. After a minute, the object takes off to the southwest making a spinning sound. Her chickens do not seem disturbed by any of this. (Berthold Eric Schwarz, “UFO Occupants: Fact or Fantasy?” Flying Saucer Review 15, no. 5 (Sept./Oct. 1969): 14–15; Clark III 268; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1957 May 24th–July 31st, The Author, 1996, p. 10; Patrick Gross, URECAT, December 17, 2006)

May 1 — 7:00 a.m. A man driving a motorcycle about 9 miles from Pajas Blancas International Airport in Córdoba, Argentina, sees a UFO shortly after his engine fails. It is 65 feet in diameter and 16 feet thick, hovering about 50 feet above the ground. He hides in a ditch and sees the craft come down, making a sound similar to air escaping from a valve. A lift descends from its base almost to the ground. In it is a man of average height who makes friendly gestures. He is dressed in a plastic diving suit. The witness enters through a valve. A lift descends from its base almost to the ground. In it is a man of average height who makes friendly gestures. He is dressed in a plastic diving suit. The witness enters the machine and sees several people inside seated in front of instrument panels, lit by an extraordinary light. He is then escorted out, and the disc rises to the northwest. During the next hour, there are 6 other sightings made by independent witnesses. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1957 March 23rd–May 25th, The Author, 1995, pp. 61–64; Mark Cashman, “Behavioral Classification System for UFO Occupants,” IUR 24, no. 1 (Spring 1999): 19)

May 2 — 6:55–7:20 a.m. Frank E. Baker, supervisor of civilian camera operators at Edwards AFB, California, sends the standard two-man crews out to their Anskania tracking telescopes for their daily shifts. Veterans James D. Bittick and John R. Gettys Jr. are in their pickup expecting a normal day. As they approach their station in the Mojave Desert, they see a bright object in the sky. It is initially at about a 45° elevation and seems to be hovering. They need to get permission from Baker to photograph anything, so they call it in, begin readying the scope, load the film, and wait for the okay. Gettys says the base of the object has a circular appearance when high in the sky. Baker gives them his approval and they begin filming, each viewing the object through spotting scopes while the film rolls. They shoot about 100 feet then stop. During filming, the object moves from 1 mile away to 5 miles. What they see is a disc-shaped object with a low dome on top. They contact the base, which scrambles two jets, but they are too late. After they turn the film in, three officers show up and interrogate them. Future astronaut Gordon Cooper claims he was there that day, involved with the tracking. (NICAP, “Edwards AFB Case”; Unidentified Flying Object Filmed, Studied,” Miami (Fla.) News, May 12, 1957, p. 2; James E. McDonald, “Statement on Unidentified Flying Objects,” in Symposium on Unidentified Flying Objects, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 75–76; Michael D. Swords, “As Great an Enigma As the UFOs Themselves,” IUR 30, no. 1 (October 2005): 10–12; Sparks, p. 243; Astronaut Gordon Cooper Talks about UFOs,” Elhardt YouTube channel, December 27, 2007; Swords 247–248; Gordon Cooper and Bruce Henderson, Leap of Faith: An Astronaut’s Journey into the Unknown, HarperTorch, 2000, pp. 83–86; Good Need, pp. 220–222)

May 10 — After 10:45 p.m. At Beaucourt-sur-l’Ancre, Somme, France, a 29-year-old Hungarian refugee named Fekete is cycling when he is “dazzled by a strange projectile.” He sees four men 4–5 feet tall approaching him in a threatening manner. One of them carries a bright light which prevents him from seeing much detail. He flees on his cycle to a nearby home, where others look out and see the occupants 300 feet away. The UFO is emitting red and white (or yellow) rays of light alternatively. They watch for about 20 minutes until 11:15 p.m. when the UFO takes off at a 45° angle. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1957 March 23rd–May 25th, The Author, 1995, pp. 69–72)

May 11 — While attending the Giant Rock Interplanetary Spacecraft Convention in the Mojave Desert near Landers, California, Wayne Sulo Aho goes for a walk and sees a “majestic egg-shaped light.” He directs a telepathic message to it, and the UFO lands 2 miles away. He begins receiving subtle psychic messages on his earthly mission. That night, Aho undergoes a “cosmic initiation.” (Clark III 59; Wayne S. Aho, Mojave Desert Experience, May 11, 1957, New Age, 1972)

May 20? (or 1956?) — Near 12:00 midnight. USAF Lt. Milton Torres is flying F-86D Sabre fighters with the 406th Bomber Wing based at RAF Manston [now closed], Kent, England. He receives an order from an RAF controller, who is tracking an unidentified target from Kelvedon Hatch Secret Nuclear Bunker [now closed] in Essex, to go
up with a wingman to 32,000 feet over East Anglia in pursuit. Over the radio he receives an order to fire a salvo of rockets at the target; the order is so unusual that Torres seeks authentication before firing. Torres locates the large target on his aircraft radar, but when he closes in on it, it shoots away at tremendous speed, disappearing from the radar screens. The target might be explained by a secret CIA-MoD experiment, codenamed Palladium, to simulate an aircraft blip on Soviet radar screens. On his return to base, Torres is debriefed by a secret service agent and told his mission is top secret. (NICAP, “Milton Torres / Intercept Mission”; UFOFiles 2, pp. 69–72; David Clarke, “Intercept and Destroy,” Fortean Times 242 (December 2008): 34–35; Paul Crickmore, “Project Palladium: Testing Soviet Radars,” Tails Through Time, January 3, 2011; Curt Collins, “Area 51, the CIA, and Cold War UFOS: T. D. Barnes,” Blue Blurry Lines, January 9, 2014)

May 26 — An article in the UK Empire News on “Flying Saucer Clubs Probe: Peace Messages ‘from Outer Space’” reveals that George King’s Aetherius Society has been publishing channeled messages in its Cosmic Voice newsletter that are antiwar and anti-nuclear. It attracts the attention of Scotland Yard’s Special Branch, thanks to an informant on the newspaper. King writes to explain that his group is religious and not political. A Special Branch officer visits King in his home in London, England, on May 31, and the group’s writings and activities are watched for at least the next two years. (Kremlin 121–126)

May 28 — Boltzmann, the first of 29 nuclear tests in Operation Plumbbob, takes place at the Nevada Test Site. At 12 kilotons, it is about the same size as the Hiroshima bomb and causes Area 51 personnel 11 miles away to be temporarily evacuated. Another test blast buckles aircraft hangar doors in Area 51, shatters windows in the mess hall, and breaks a dormitory ventilator panel. The Plumbbob tests continue until October 7, 1957. While most tests contribute to the development of warheads for intercontinental and intermediate range missiles, they also test air defense and anti-submarine warheads with small yields. (Wikipedia, “Operation Plumbbob”)

May 31 — 7:17 a.m. A British airliner is flying over Kent, two miles south of Rochester, England, when both the captain and first officer see a brilliant light approaching them. All radio communications cut out. The UFO blinks out and the radio equipment goes back into operation. (Schopick, pp. 122–123; Good Above, p. 50)

June 3 — 9:35 p.m. Shortly after takeoff from Shreveport (Louisiana) Airport, Capt. Lynn Kern and Flight Officer Abbey Zimmerman, flying Trans-Texas Airlines Flight 103, are told by the control tower that a small light is visible nearby. They see the star-like, blue-green object at about 400 feet altitude. It then climbs rapidly to 1,000 feet and parallels the airliner at a higher altitude and about a half-mile away. Kern flashes his landing lights, and the object responds with a beam of light. A second blue-green, pulsating object joins the first on the opposite side of the airliner (then at 9,000 feet). A crew from the air tower confirms that it has both objects on radar and visually through binoculars. The objects head south, climbing to about 10,000 feet, and follow the airliner to Converse, Louisiana, where the pilot queries ADC radar site, England AFB [now Alexandria International Airport], which confirms the two targets in the airliner’s vicinity. The objects disappear from sight in a cloud deck to the southwest. (NICAP, “Flight 103 & 2 UFOs Tracked on Radar”; Sparks, p. 244; J. Allen Hynek, The UFO Experience, Ballantine ed., 1974, pp. 94–96)

June 5 — AEC Commissioner Willard Libby tells Congress that nuclear weapons testing is a “small risk” that must be measured against the “risk of annihilation.” (“Bomb Testing Is Viewed As Risk to Be Compared with Annihilation,” Spokane (Wash.) Chronicle, June 5, 1957, p. 2)

June 11 — CIA operative Wallace R. Lampshire sends a memo to CIA operative Richard M. Bissell Jr., explaining that the agency’s involvement with UFOs is passive, handing off reports to its geophysics or former weapons units. Lampshire has talked with Gen. Philip J. Strong, who knows of no Soviet technology that might be responsible for UFOs. (Swords 264–265)

June 15 — A report in the UK weekly newspaper Reynold’s News claims that the Air Ministry conducts top secret UFO research in Room 801 of one of its offices on Northumberland Avenue, London, England. A ministry spokesman is quoted as saying the room has “something like 10,000 sightings” on file and a large map of the British Isles with thousands of colored pins representing sightings. Flying Saucer Review editor Gordon Creighton says the office belongs to the Deputy Directorate of Intelligence (Technical), which employs UFO researchers full-time. (Good Above, p. 49)

June 15 — 5:06 p.m. George Marsden watches a Saturn-shaped UFO with portholes through a telescope at Mawdesley, Lancashire, England. (UFOEv, p. 146; Center for UFO Studies, [case documents])

June 18 — 8:00 p.m. Captain C. G. Wertz and the crew of the Matson freighter Hawaiian Fisherman see two brightly lit objects off the port beam as they are steaming 150 miles off San Francisco, California. A third object joins them at 8:15. They appear as small moons, giving off a cold, white, unchanging light. The three move off in a V formation and pace the ship for a short time. The lights continue their controlled flight as dusk turns to night. (Lorenzen, UFOs: The Whole Story, Signet, 1969, p. 78)
June 20 — Mysterious radar echoes begin turning up on Bluff Hill, near Invercargill, New Zealand, for several months. The targets are visible from several minutes up to an hour and are located somewhere in the ionosphere. Michael Gadsden of the Imperial College in London is in New Zealand for the International Geophysical Year and he says the targets’ movements are unusual and suspects that ionized particles are the cause. (Lorenzen, UFOs: The Whole Story, Signet, 1969, pp. 81–82)

Summer — P. Craig Phillips, curator of the Miami Seaquarium, and two other scientists witness a fall of angel hair for two hours as they are sailing northward toward the Florida Keys. Assuming them to be cowwebs from migrating airborne spiders, Phillips takes some samples and puts them in a mason jar. But when he uncaps the jar later in his office, no trace of the material is found, which is uncharacteristic of spider web. (UFOEv, pp. 99–100; Brian Boldman, “An Analysis of Angel Hair, 1947–2000,” IUR 26, no. 3 (Fall 2001): 15)

Summer — Early morning. Contactee Trevor Constable and an associate named James Woods take many infrared photos of the desert sky over southern California. When developed, the film reveals a variety of shapes from vague blobs and amoeba-like forms to clearly defined discs. Constable calls them “critters” and thinks they are some kind of life form invisible to the naked eye. (Clark III 1102; Trevor James [Constable], They Live in the Sky, New Age, 1958)

Summer — Allan Haney and some friends “on a number of occasions” climb onto someone’s roof in Levelland, Texas, to watch 3–4 objects hovering over Reese AFB [now Reese Technology Center] in Lubbock, 26 miles to the east. (Donald R. Burleson, “Levelland, Texas, 1957: Case Reopened,” IUR 28, no. 1 (Spring 2003): 5)

July — The Air Defense Command disbands the 4602nd AISS and reassigns UFO investigative duties to the 1127th Field Activities Group of the 1006th AISS at Norton AFB [San Bernardino International Airport], California. Soon afterwards, the Air Force reduces funds for the unit, impairing its investigative ability. (Clark III 919)

July — NICAP publishes the first issue of The UFO Investigator. (UFO Investigator 1, no. 1 (July 1957); Clark III 793)

July — NICAP learns that the US Senate Subcommittee on Investigations is considering hearings on UFOs and wants its assistance. Hillenkoetter suggests withholding the best cases, at least initially. Keyhoe asks Ruppelt, who is now an engineer with Northrup Aircraft, to join the NICAP board at a rehearsal for the I’ve Got a Secret Show on which he is appearing. Ruppelt considers it an honor. (Keyhoe, FSTS, pp. 70–79)

July 5 — During the 74-kiloton Plumbbob Hood nuclear test at the Nevada Test Site, the Marine Corps conducts a tactical maneuver involving the use of a helicopter airlift, tactical air support, and an amphibian tractor called the LVTP5. Despite the AEC’s assurance that no thermonuclear devices are being tested, Hood is thermonuclear and is the largest atmospheric test in the continental US. All Area 51 personnel are evacuated prior to the blast, but the military neglects to secure the sensitive information in the buildings with security guards. Seventy anesthetized Chester White pigs in military uniforms (as test fabrics) are placed in cages a short distance from ground zero. Several types of wood houses are constructed to see how each handles the blast. The Mosler Safe Company sponsors the construction of a steel vault to withstand the blast. Some 100 soldiers, lying in trenches, are stationed to gauge the psychological impact of the bomb. The flash is visible from Canada to Mexico and 800 miles out in the Pacific. The blast wave reaches Los Angeles 25 minutes later. Afterwards, security guard Richard Mingus has to drive through a highly radioactive ground zero to reach the buildings at Area 51 ten miles away. Area 51 remains an evacuated ghost town until the summer of 1959. (Wikipedia, “Desert Rock exercises”; Jacobsen, Area 51, pp. 119–123)

Mid-July — Keyhoe meets with US Rep. James C. Healey (D-N.Y.) regarding USAF secrecy about UFOs. He shows Healey the 1949 Grudge report and apparently convinces him that the Air Force’s explanations for the 24 cases are “sheer speculation” or “deliberately fitted.” He also presents him Gen. Joe W. Kelly’s April 8 letter to Lee Metcalf, indicating serious interest in UFOs. (Keyhoe, FSTS, pp. 81–82, 91, 96)

July 16 — 1:56 p.m. 1st Lt. Clifford E. Pocock, scope operator A2C Walter Lyons, and control technician A1C Armand Therrien at Las Vegas Air Force Station [now closed] at Angel Peak, Nevada, are using the FPS-3A L-band search radar and track an inbound target at about 6,200 mph when it “stopped abruptly” and “remained stationary” for 12 seconds to the east-northeast 85 miles away to the north of Grand Canyon in Arizona. Then it heads outbound at about 7,000 mph before disappearing at the radar’s maximum range at 224 miles (near Marble
July 17 — Before dawn. The crew of a USAF RB-47 reconnaissance aircraft is flying out of Forbes Field [now Topeka Regional Airport], Kansas, on an electronic warfare training flight over Mississippi, Louisiana, and Texas. The RB-47 is carrying a 6-man crew, of whom three are electronic warfare officers manning ECM gear in the aft portion of the aircraft. Their names are Lewis Dormon Chase, pilot; James H. McCoid, copilot; Thomas H. Hanley, navigator; John J. Provenzano, No. 1 monitor; Frank B. McClure, No. 2 monitor; and Walter A. Tuchschere. No. 3 monitor. The crew detects on its Electronic Intelligence (ELINT) equipment an airborne radar source that mimics some but not all of the signal characteristics of a common air defense ground radar. Aircraft normally do not carry such high-powered radars. As the key ELINT officer on the RB-47 puts it, “an antenna bigger than the airplane” would be required to emit as strong a signal as he detected from the UFO. Because the UFO signal appears to have comparable or greater received signal strength than the one-megawatt ground radar beam and the UFOs distance is about 5 times closer than the ground radar, a crude estimate of the UFO radar power output using the inverse-square law would be about 40 kilowatts. The maneuvering radar signal coincides in location with a bright UFO. At times the signal moves ahead of the RB-47, then circles around as if airborne, highly maneuverable, and flying faster than the RB-47. The 55th Strategic Reconnaissance Wing Intelligence report states that the Wing’s director of intelligence “has no doubt the electronic D/F’s coincided exactly with visual observations by a/c numerous times thus indicating positively the object being the signal source.” An air defense radar station near Dallas, Texas, reportedly confirms tracking a UFO at the same location reported by the RB-47 crew but later tries to deny it in an unclassified message to ATIC. The UFO is reportedly tracked by the RB-47’s airborne navigation radar as well, though the crew has differing recollections on this point. Twice the UFO blinks out visually when pursued by the RB-47. At the same time the strange signal disappears, either that, or the ground radar site and the RB-47 onboard radar loses the object from their scopes. At least once, the UFO suddenly reappears visually at about the same time the ground radar regains tracking of the object. The main part of the incident occupies 30 minutes over the Fort Worth, Texas, area from 5:30–6:00 a.m. Some earlier ELINT and visual incidents are noted as early as about 4:30 a.m., but they catch the crew off guard, and consequently reports at the time and later recollections have had to be carefully reconstructed. The UFO may have trailed the RB-47 up to 6:40 a.m. following the main events, for a total duration of possibly more than 126 minutes. The RB-47 incident is the first conclusive instrumented proof for the existence of UFOs. Calibrations of the RB-47’s electronic measurements provide an irrefutable case. When the Colorado Project scientists asked the Air Force for the Blue Book file on the RB-47 case, the file could not be found. Ultimately, the case was put together by better file searching at Blue Book, James E. McDonald’s success at locating several crew members and interviewing them, and FOIA searches that located more of the lost documents. Particularly in the George T. Gregory years at ATIC, this sort of rejection of the need to clarify almost any significant aspect of a UFO case was constant. If we did not know, from our earlier information, what Captain Gregory understood to be his duty as chief of Blue Book, we would label this as reckless and incompetent. Colorado project investigator Gordon Thayer declares the case unexplained, and later describes the official USAF explanation (airliner) as “literally ridiculous.” Brad Sparks sums it up in 1998 (and in 2018): “This case certainly now ranks as among the best documented unexplained UFO incidents in history, and it has the potential for further revealing disclosures if records of an extremely highly classified investigation can be found and released. All of the UFO observations by multiple visual observers, multiple ELINT receivers, and multiple radar sets, as well as the serendipitous calibrations of the UFO signals against the separately identifiable Duncanville radar signals, provide a unique, tight, interlocking web of intrinsically fitted evidence.” (NICAP, “RB-47 Incident”; Sparks, p. 244; Condon, pp. 56, 136–139, 260–266; James E. McDonald, “The 1957 Gulf Coast RB-47 Incident,” Flying Saucer Review 16, no. 3 (May/June 1970): 2–6; Gert Herb, “A Rebult of Philip J. Klass’s Analysis of the RB-47 Incident of July 17, 1957,” CUFOS Bulletin, Summer 1977, pp. 3–10; Philip J. Klass, [response to Gert Herb], CUFOS Bulletin, Fall 1977, pp. 7–10; Gert Herb, “Gert Herb Replies,” CUFOS Bulletin, Fall 1977, pp. 9–10; Swords 248–249; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1957 May 24th–July 31st, The Author, 1996, pp. 64–71; Center for UFO Studies, [case interviews]; Center for UFO Studies, [case documents]; Center for UFO Studies, [more case documents]; UFOs Yes, 126–127; Clark Iii 953–999)
July 18 — 10:46 p.m. Capt. Claiborne F. Bickham and a radar crew at Mount Lemmon Air Force Station [now closed] northeast of Tucson, Arizona, using both MPS-7 L-band search and MPS-14 S-band height-finder radars, track a stationary target at 42,000 feet to the northwest about 82 miles away south of Chandler. The target responds to encrypted military IFF Mode 3 transponder signals and transmits encrypted responses that result in “normal Mode 3 paint” on radar scopes. A very slight strobe comes from the object that appears like ECM jamming. (NICAP, “Ground Radar Track Responds to IFF Mode 3”; Sparks, p. 245)

July 19 — The Plumbbob John nuclear test at Yucca Flats, Nevada, is the only test of the Air Force’s AIR-2 Genie missile with a nuclear warhead. On the ground, the Air Force carries out a public relations event by having five Air Force officers and a videographer stand under ground zero of the blast, which takes place at between 18,500 and 20,000 feet altitude, with the idea of demonstrating the possibility of the use of the weapon over civilian populations without ill effects. (Wikipedia, “Operation Plumbbob”)

July 22 — Night. Capt. G. M. Schemel, the pilot of a TWA Constellation aircraft, is flying at 18,000 feet near Amarillo, Texas, when a big red and green light bears down on his plane in a collision course. He puts the aircraft into a dive and the object passes above him. Schemel has to make an unscheduled landing at Amarillo to hospitalize one passenger who is injured during the maneuver. (“Kenosha Pilot Tells of Mysterious Object,” Kenosha (Wis.) News, July 24, 1957, p. 1)

July 24 — Russian antiaircraft batteries on the Kuril Islands, Sakhalin Oblast, Russia, in the Pacific Ocean open fire on luminous, fast-moving UFOs. No hits are made. The US claims it has no aircraft in the area. However, at 10:00 a.m., two USAF pilots flying F-86s are scrambled to intercept a disc-shaped object over the Nemuro Strait, north of Hokkaido, Japan, that is tracked by ground radar and seen by ground witnesses. (Keyhoe, Aliens from Space, Signet ed., 1974, p. 42; Sparks, p. 245)

July 24 — White Sands Missile Flight Safety Director Nathan Wagner is driving with his wife Alma south of Las Cruces, New Mexico, when they see a large, fast object at high altitude moving east toward the Organ Mountains. They watch it for 30 seconds until it disappears. (“Space Vehicles Sighted?” El Paso (Tex.) Times, July 30, 1957, p. 1; NICAP, “Missile Safety Chief Says Object Unknown”)

July 25 — 4:00 a.m. Several workers are taking a break at the Daye Steel Plant in Huangshi, Hubei, China, when they hear a humming sound. They notice a bright spot in the clear sky that is increasing in apparent size. As it comes closer, it is seen as a circular plate giving off a dazzling white light and leaving a white trail. It flies above the observers at an altitude of 3,300 feet and produces a whistling sound that is louder than a jet. As the object approaches the witnesses, the low pitch changes to a high pitch. (Wendelle Stevens and Paul Dong, UFOs over Modern China, UFO Photo Archives, 1983)

July 28 — A Douglas Aircraft Company employee named Edward K. Current Jr. makes an emergency landing on the former U-2 airstrip at Groom Lake, Nevada. He claims he has been on a cross-country training flight when he became lost and ran low on fuel. The area is still evacuated for nuclear testing. (Jacobsen, Area 51, pp. 125–126; T. D. Barnes, “False Emergency Landings at Groom Lake,” Roadrunners Internationale, November 22, 2021)

July 30 — 10:30 a.m. Jack Stephenson is walking his dog four miles south of Galt, Ontario, when he sees an aluminum-colored object with a dome. It circles, stops, and hovers, then lands in a gulley surrounded by woods. He watches it for 45 minutes as it hovers about 2 feet off the ground. It finally takes off at a 45° angle to avoid a power line, then shoots away. Local residents examine the area and find burned patches on the ground and small tree limbs that are broken. There are four burned or charred areas, each about 1 foot 3 inches in diameter, forming a four-sided figure with these measurements: 20 feet x 20 feet x 6.5 feet x 11.5 feet. Two large three-toed prints are also found, but the relationship of the prints to the object is unknown. (“Boy Reports ‘Saucer,’” Brantford (Ont.) Expositor, August 3, 1957, p. 1; “Says He Saw Flying Saucer for 45 Minutes,” Milk River (Alberta) Review, August 25, 1957; Donald E. Keyhoe and Gordon I. R. Lore Jr., Strange Effects from UFOs, NICAP, 1969, pp. 51–53)

August — Radar technician Edward Lovick Jr. begins work at Lockheed’s secret Advanced Development Projects facility (the Skunk Works) in Burbank, California. His first assignment is to investigate radar-deflecting technology for the U-2 aircraft. (Jacobsen, Area 51, pp. 126–127)

August — Night. A young woman is driving home after work in Peru, Indiana, and notices people standing along the road looking at the sky. She stops, and they point to a large black object hovering above some nearby trees at about 100 feet. It is about 1,000 feet long and has a “soft delta” shape with rounded corners and window-like lighted areas underneath. There seems to be movement within the lighted areas. In the middle of the bottom is a round area that looks like it might be the outline of an entryway. It moves slowly away, making a noise like a quiet vacuum cleaner. (Michael D. Swords, “Timmerman’s Triangles,” IUR 29, no. 2 (Summer 2004): 16)

August 3 — 7:45 p.m. 1st Lt. Robert J. Springer Jr., T/Sgt. Herman L. Giles, and 16 other air crewmen, while on routine Airborne Operations Center radar early warning patrol over the Pacific Ocean about 175 miles southwest of San Francisco, California, aboard an RC-121D aircraft, detect a radar target on IFF Mode 2 transponder only. At 7:56 p.m., the IFF target becomes a direct radar “skinpaint.” At 8:02 p.m., the IFF equipment APX-6/APX-7 is turned off, but the target is still tracked on airborne radar. At 8:15 p.m., the target is at a 2 o’clock position 10 miles away when the aircraft starts a right turn to reverse course, putting the target dead ahead. It suddenly takes off to the northwest at very high speed, disappearing 58 miles away. Radar contact is regained at 8:18 p.m. as the target is tracked moving right to left, crossing in front of the aircraft again, and closing distance to 8 miles at 11 o’clock. At 8:20 p.m., the target turns to head on a parallel path. The crew loses contact at 8:24 p.m., 15 miles behind the plane. No visual confirmation. (NICAP, “RC-121D Has IFF Radar Targets”; Sparks, p. 246)

August 4 — An Italian Air Force noncommissioned officer on duty in the control tower at Naples International Airport, Italy, and about 30 other witnesses see a number of luminous, disc-shaped objects passing above them. (Lorenzen, UFOs: The Whole Story, Signet, 1969, p. 80)

August 5 — 10:00 p.m. Policeman Ernst W. Akerberg and his wife Karin are at their summer cottage on the island of Gotland, Sweden, in the Baltic Sea when they see a disc-shaped object heading toward them from the sea. When it reaches the shore about 600 feet away, the object changes course and executes a sharp turn at less than 10° of arc and turns on its edge, swaying briefly. The disc moves toward the southeast and makes another sharp turn just over a half-mile away, again turning on its edge and fluttering before passing out of view. A second, smaller object approaches and goes through the same maneuvers. Air currents from both objects make the water surface ripple and the treetops swing. Estimated to be about 80 feet in diameter, the objects seem to be made of shining metal, and the upper part rotates slowly over the lower part. Both objects have a kind of tube with two red lights. They are silent except for a hollow clicking sound. (Story, pp. 152–153; Clas Svahn, “1957 Diskusarna svängde framför polismannen,” Rikorganisationen UFO-Sverige)

August 14 — 8:55 p.m. Varig Airlines pilot Capt. Jorge Campos Araujo and First Officer Edgar Onofre Soares observe a domed disc pacing their C-47 cargo plane at 6,300 feet over Joinville, Santa Catarina, Brazil. The UFO speeds up and crosses just in front of them, hovers briefly, then dives into the undercast at 5,700 feet. When the object hovers, it affects the engines, which cough and wheeze, and dims the cabin lights. (UFOEv, p. 120; Olavo T. Fontes, “Top Secret Report Unveiled,” APRO Bulletin, September 1959, pp. 1, 5; Schopick, pp. 123–127; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1957 August–September, Supplemental Notes. The Author, 2003, pp. 11–13; Lorenzen, FS Hour, pp. 153–155)

August 20 — 11:28 a.m. Shinichi Takeda takes a photo of a silvery disc near Enoshima Beach, Kanagawa, Japan. The object is also seen by his sister, who calls his attention to it. It gives off a brilliant glow at an estimated altitude of 3,000–4,000 feet, traveling north to south. The object makes a 90° left turn, speeds up, and disappears in the clouds. The photo shows capsule-shaped image near bank of cumulus clouds. A few minutes later, 15 people on the beach report a similar object that passes over at high speed. (NICAP, “Capsule-Shaped Object in Clouds / Takeda Photo”)

August 20 or 22 — A member of the Argentine Air Force guarding a downed aircraft is in a tent near Quilinos, Córdoba, Argentina, when he hears a high-pitched hum. Dashing out, he sees a disc slowly descending, making the grass and plants flutter wildly. Reaching for his revolver, he feels that something is preventing him from drawing his weapon, which seems glued in his holster. A voice from the disc tells him in Spanish that spacecraft have a base in the Salta region and that they are here to warn about nuclear energy. The craft rises vertically and speeds off to the north. Probable hoax. (“UFO Bases in South America?” Flying Saucer Review 11, no. 4 (July/Aug. 1965): 30–31; Patrick Gross, URECAT, December 8, 2006)

August 22 — 3:40 p.m. A couple named Sheetz in a car at Naval Air Station Cecil [now Cecil Airport] in Jacksonville, Florida, chase a 50-foot, black, rotating, bell-shaped object bearing two bright white lights at the top. Their engine stalls when object hovers 10 feet away. Its underside resembles a disc with fins. When a jet takes off from the airfield, the object goes out of sight almost instantly. The car battery is completely dead. Noise from the object is compared to a helicopter, although there are no helicopters in the area. (NICAP, “Car Chases Bell-Shaped Object, Engine Stalls”; Mark Rodeghier, UFO Reports Involving Vehicle Interference. CFOS, 1981, p. 7)

August 27 — Russia makes the first successful long flight of an ICBM, the R-7 Semyorka, from the Baikonur Cosmodrome in Kazakhstan. The dummy warhead lands in the Pacific Ocean. (Wikipedia, “R-7 Semyorka”)

August 30 — Night. A Capital Airlines pilot is flying a Viscount at 12,000 feet approaching Norfolk, Virginia, with a Northeast Airlines DC-6 directly above on the same heading at 20,000 feet. The Viscount pilot sees a brilliant object that “flew fast and then abruptly halted 20 miles in front of us at 60,000 feet altitude.” The Northeast pilot
tries to acquire the object on radar. With the antenna at 0° elevation, nothing is detected, but with the antenna elevated to 15° he acquires “an excellent blip right where I told him to look for the object.” According to the Viscount pilot, the object “dissolved right in front of my eyes, and the crew above lost it from the scope at the same time. They said it just faded away.” The entire incident lasts several minutes. (NICAP, “Two Aircraft Observe Object / Excellent Blip on Radar”; Condon, pp. 128–129)

August 31 — After nuclear test Plumbbob Smokey, Army troops conduct an airlift assault. (Wikipedia, “Desert Rock exercises”)

August 31 — Sen. Barry Goldwater (R-Ariz.) sends a letter to a constituent about UFOs, saying, “I, frankly, feel that there is a great deal to this.” (UFOEv, p. 173)

September — Soviet defector Nikolai Khokhlov suffers a sudden and severe illness while attending an anti-Communist meeting in Frankfurt, Germany. He is treated for thallium poisoning and survives. This case is often claimed to be the first radiological attack by the KGB, especially when compared to the poisoning of Alexander Litvinenko in 2006, although it remains unclear what isotope was used, if any. Former KGB officer Stanislav Lekarev claims, however, that Khokhlov is poisoned by radioactive polonium (not thallium), exactly as Litvinenko is later. Litvinenko’s poisoning is also initially mistaken for thallium. A unique mechanism for administering poison is described by a knowledgeable source at the time as a pneumatically operated poison ice “atomizer” that leaves no wound or other evidence of the cause of death. (Wikipedia, “Nikolai Khokhlov”; Andy Wright, “The Russian Spy Who Convinced America to Take ESP Seriously,” Atlas Obscura, January 13, 2017; Christopher Andrew and Vasili Mitrokhin, The Sword and the Shield: The Mitrokhin Archive and the Secret History of the KGB, Basic Books, 1999; David Kurlander, “Ending in a Fall: America’s Response to the Poisoning of Soviet Defector Nikolai Khokhlov,” Café, September 3, 2020)

Early September — Several people fishing near Ubatuba, São Paulo, Brazil, watch a disc dive down from the sky and explode, showering the area with flaming fragments. One of the witnesses writes an anonymous letter and sends three pieces to O Globo, but no witnesses to the event have ever come forward. APRO representative Olavo T. Fontes examines the fragments, which are dull gray, irregular, and strongly oxidized. One sample is shot through with microscopic cracks and shows a fissure running through two-thirds of its length. All three have whitish smears of a powdery substance like cinders. Fontes takes one sample to the Mineral Production Laboratory of the Ministry of Agriculture for analysis, which shows it to be “magnesium of a high degree of purity.” Chemist Luisa Maria A. Barbosa, who conducts a spectrographic analysis, says that not even trace elements are apparent. Fontes also has it analyzed by chemist Elson Teixeira and the Brazilian Army. The Laboratory of Crystallography conducts some X-ray diffraction work. All conclude that the material is pure magnesium, while one gives it a density of 1.866 (normal magnesium is 1.741). APRO sends a second fragment to the US Air Force, which accidentally destroys it. The third sample is sent to the Colorado Project in February 1968. Roy Craig runs tests on it at the Alcohol and Tobacco Tax Division of the IRS in Washington and Dow Chemical’s Metallurgical Laboratory. Both determine that the level of purity is not as high as was determined in 1957 (although this is now seen as a major misrepresentation of the actual results). APRO does two further tests with University of Arizona metallurgical engineer Walter A. Walker and Robert W. Johnson of the Materials Research Corporation at Orangeburg, New Jersey. Walker and Johnson both find that the sample “had undergone a directional crystal growth type of manufacture.” Walker concludes that the material was likely exposed to the earth’s atmosphere at elevated temperatures. Researchers Brad Sparks and Michael Swords examine Roy Craig’s archived original notes from the Colorado Project and find that the team had covered up the fact that an abnormal concentration of magnesium isotope Mg-26 had indeed been found and knowingly misrepresented the sample to APRO as “essentially the same as terrestrial magnesium,” blaming them for cherry-picking the Brazilian lab results. Peter A. Sturrock acquires the remnant of the samples from APRO and performs further analysis on two of them in 1997. In 2018, Michael Swords and Robert Powell borrow one Ubatuba sample from Sturrock and arrange for further tests at an accredited lab, finding variations well outside the normal range for magnesium, strontium, copper, and barium. (NICAP, “The Ubatuba Incident”; “Physical Evidence,” APRO Bulletin, March 1960, pp. 1, 3; Olavo T. Fontes, “A Report on the Investigation of Magnesium Samples from a UFO Explosion over the Sea in the Ubatuba Region of Brazil,” 1962; Lorenzen, FS Hoax, pp. 104–145; Lorenzen, UFOs: The Whole Story, Signet, 1969, pp. 212–216; Condon, pp. 94–97, 257–260; Michael D. Swords, “Analysis of Alleged Fragments from an Exploding UFO near Ubatuba, Brazil: An Introduction,” JUFOS 4 (1992): 1–5; Walter W. Walker and Robert W. Johnson, “Further Studies on the Ubatuba UFO Magnesium Samples,” JUFOS 4 (1992): 6–25; Walter W. Walker, “Scientific Studies of the Ubatuba Magnesium Fragments: A 1992 Perspective,” JUFOS 4 (1992): 26–37; Peter A. Sturrock, “Letter: Ubatuba,” IUR 18, no. 2 (March/April 1993): 19; Paul R. Hill, Unconventional Flying Objects: A Scientific Analysis, Hampton Roads, 1995, pp. 226–234; Peter A. Sturrock, “Composition
September 20 — 3:05 p.m. A national defense alert is called when the first of two or three supersonic objects, varying in speed for the next 30 minutes from 800 to 12,000 mph and varying in altitude from 50,000 to 135,000 feet, is picked up over the Atlantic by NORAD radar at Montauk, New York. A second (or same) UFO heads straight toward SAC headquarters in Omaha, Nebraska, in what is perceived as a threat trajectory potentially aiming for a nuclear knockout kill of the entire US nuclear force. At 3:10 p.m., interception is attempted by two F-102 jets from Kinross AFB [now Chippewa County International Airport] south of Sault Ste. Marie, Michigan, and later from Truax AFB [now Truax Field Air National Guard Base] northeast of Madison, Wisconsin. At 3:24 p.m., another UFO joins the first on a similar trajectory 150 miles behind. It passes over Ontario, Michigan, Illinois, and Iowa. The UFO sends radio replies to IFF interrogation signals, on different frequencies, confirming its location on the radar plots and making it impossible to explain as a malfunction or interference. Interception is impossible at these speeds and altitudes. SAC goes on high alert and apparently launches nuclear bombers toward
Russia, but the alert is called off when the UFOs disappear. NORAD triggers a White House alert. High-level meetings of CIA and USAF intelligence, and the Intelligence Advisory Committee meet in executive session. The CIA Director of the Office of Scientific Intelligence, Herbert Scoville Jr., suggests that the object might be a maneuverable Soviet cruise missile, but that is not yet in the Soviet inventory. President Eisenhower is briefed multiple times. One year later, NORAD still cannot identify any malfunction that could possibly make the radar targets agree with the IFF signals. (NICAP, “Multiple Radars Track 4,500 MPH Target”; Clark III 802–804, 814–824; Sparks, pp. 249–250; Swords 266–267)

September 29 — 4:20 p.m. A nuclear waste storage tank explodes spontaneously at the Mayak plutonium production site (Chelyabinsk-40) for nuclear weapons and fuel reprocessing at Ozyorsk, Chelyabinsk Oblast, Russia. It launches a kilometer-tall pillar of dust and smoke into the sky. Gray radioactive ash and debris settles over the industrial zone. There are no immediate fatalities, though up to 200+ additional cancer deaths perhaps ensue from the radioactive contamination of some 20,000 square miles; 270,000 people are exposed to dangerous radiation levels. Over 30 small communities are removed from Soviet maps between 1958 and 1991. (Wikipedia, “Kyshtym disaster”)

October — Leonard H. Stringfield privately publishes Inside Saucer Post...3-0 Blue that summarizes his early years as a UFO investigator and as director of Civilian Research, Interplanetary Flying Objects. (Leonard H. Stringfield, Inside Saucer Post...3-0 Blue, The Author, 1957)

October — 10:00 p.m. Mrs. James Masterson and her sister Bernice Childers while driving see a reddish-orange disc, 30 feet in diameter, just above the treetops in Allen Park, Michigan. They chase it for a block or two before it streaks off. One of the women sees two figures wearing white Navy uniforms in a window on the lower section. (Center for UFO Studies, HUMCAT Index 1957, p. 17; Clark III 268)

October 4 — The USSR launches the first artificial earth satellite, Sputnik 1, which transmits radio pulses for 21 days. Some 4% of Americans claim to have seen Sputnik in orbit. However, what most are actually seeing is the 100-foot-long R-7 rocket core stage, outfitted with reflective panels that make it a first magnitude object, trailing 600 miles behind the 22-inch satellite until October 26 when the batteries run out. The satellite is barely visible at sixth magnitude. (Wikipedia, “Sputnik 1”; Walter N. Webb, “Allen Hynek As I Knew Him,” IUR 18, no. 1 (Jan./Feb. 1993): 7)

October 4 — 10:00 a.m. A tadpole-like UFO is seen at Ichinoseki, Iwate Prefecture, Japan. Afterwards, material like spider web falls in great profusion around Saguramachi Middle School for about 2 hours. Chemical analysis reveals that it is organic, dissolvable in hydrochloric acid, and burns. The crystal structure is different from spider web. (“Angel Hair,” Flying Saucer Review 4, no. 1 (Jan./Feb. 1958): 21; Robert N. Webster, “Things That Fall from UFO’s,” Fate 11, no. 10 (October 1958): 26; George M. Eberhart, “Postcards with a UFO Theme,” IUR 29, no. 2 (Summer 2004): 21; Brian Boldman, “Angel Hair Physical Analyses: A Review,” JUFOS 9 (2006): 103; Clark III 124–125)

October 5 — 11:00 p.m. Antonio Villas-Boas gets up from bed on his family’s farm near São Francisco de Sales, Minas Gerais, Brazil, to open a window and notices a silvery reflection over the corral. After a short time, it moves towards the window. He and his brother watch as an object approaches and lights up the room. It disappears. (Clark III 1226)

October 6 — 4:15 p.m. Amateur astronomer Earl Sydow spots a bright object with the magnitude of the planet Venus through his telescope over Tucson, Arizona. Six other observers also watch the object, which measures approximately 3 minutes in diameter along its major axis and 1 minute along its minor axis. Smaller flat-white or silver-white objects, as many as 6–10, seem to emerge from the primary object as observations continue. The smaller objects are apparently short traces of light at some times and semi-wedge-shaped at other times. The smaller objects disappear from the field of the telescope until only the original object is visible, and it disappears as if moving directly away. (Lorenzen, UFOs: The Whole Story, Signet, 1969, p. 80)

October 8 — Day. Four Fijians in a punt with an outboard motor off Nabouwalu, Viti Levu, Fiji, see a white, circular object, which is hovering about 20 feet above the ocean. They approach it. It appears to be revolving, and they can see the figure of a man standing on the outside. The figure shines a blinding light at their boat, which makes them feel dazed and weak. As they draw closer, the figure disappears and the object rises rapidly upward, disappearing straight up. R. O. Aveling, an official of the Seventh-Day Adventist Church, sees a similar object at the same time but at a different location. It is hovering at about 5,000 feet and swinging in a balloon-like fashion. Its color varies from bright white to deep, flashing red. (“Fiji Reports Sighting Object Like Texas Saucer,” Honolulu (Hawaii) Advertiser, November 5, 1957, p. 1; “Strange Object Seen in South Pacific Skies,” Long Beach (Calif.) Press-Telegram, November 5, 1957, p. 3; Lorenzen, UFOs: The Whole Story, Signet, 1969, p. 81; Loren E. Gross, The
October 9 — Evening. Fire ignites Windscale Pile Number One, an air-cooled, graphite-moderated, uranium-fueled reactor used for plutonium and isotope production at the Windscale facility [now Sellafield] in Cumbria, England. It burns for three days, and there is a release of radioactive iodine that spreads across the UK, contaminating surrounding dairy farms, as well as the rest of Europe. (Wikipedia, “Windscale fire”)

October 9 — Night. Radio station CKOV in Kelowna, British Columbia, after reports on Sputnik, rebroadcasts Orson Welles’s 1938 War of the Worlds radio drama. Some 60 phone calls come in from listeners who think that Russians have landed in North America. (“Welles, ‘Moon,’ ‘Terrify Town.’” Windsor (Ont.) Star, October 10, 1957, p. 28)

October 9 — 7:24 p.m. The tower operator at Naval Air Station South Weymouth [now the Shea Field Naval Aviation Historical Museum], Massachusetts, sights a constant, conical, greenish-blue object with a phosphorescent glow through binoculars. In sight approximately 90 seconds, the observer sees no navigation lights. It is traveling faster than a jet plane on a track from northeast to south-southwest. The object comes out of the horizon and toward the end of its path makes three “crazy” gyrations then vanishes, possibly behind cloud cover. The object has no trail like a meteor. (Walter N. Webb, “Allen Hynek As I Knew Him,” IUR 18, no. 1 (Jan./Feb. 1993): 7)

October 10 — 4:00 a.m. A huge fireball plunges from the sky near Myton, Utah, just missing a US Navy DC-6 transport plane out of NAS Alameda [now closed], California, with 36 persons aboard. Pilot Lt. Cmdr. W. F. Norris reports the incident to Salt Lake City Airport. (“Big Fireball Perils Plane,” Oakland (Calif.) Tribune, October 10, 1957, p. 1)

October 10 — The coffee truck driven by Miguel Espanhol Navarrete and his driver stalls northwest of Ceres near Quebra Coco, Goiás, Brazil, as a UFO lands nearby. They see an intense light as they begin a steep ascent, and then realize that the flying object appears to be more than 600 feet long. It lights up the entire area, even though it is gliding at a great height. The driver panics and tries to speed away, but the truck’s engine stalls as the object approaches and flies over the vehicle about 130 feet away. The object is about 3 feet in diameter by 40 inches high and is unevenly oval, with the upper section greener or bluer in color. It makes a loud whirring noise as it hovers. When it starts ascending at a 22° angle, its color changes from pink to light blue and the combine stops working. He notices two stalled cars on a nearby road.

October 12 — 9:15 p.m. Many witnesses see a luminous oval object pass over Ciudad Bolivar, Venezuela, at great speed. The same or a similar object is seen at Coro at 9:25 p.m. and at Trujillo at 12:00 midnight. (Lorenzen, UFOs: The Whole Story, Signet, 1969, p. 82)

October 14 — 7:00 p.m. The Naval Air Station North Island tower in San Diego, California, directs a Navy S2F-1Tracker anti-submarine aircraft toward a bright light over Point Loma. The aircraft, piloted by Lt. Allen L. Ries, tracks the UFO on airborne radar at some points suddenly moving at 1,700 mph average speed (3,500 mph at peak) and 1,100 mph average relative to the aircraft’s (peak 2,200 mph). Radar indicates the object is about 12 miles ahead. After 3 minutes the aircraft loses the object visually and on radar. Blue Book explains this as the star Arcturus, which is in the wrong direction in the sky, then changes the explanation to a balloon. (NICAP, [Blue Book documents]; Clark III 389–390)

October 15 — Afternoon. Robert Moudy sees a glowing object hovering above his combine in Franklin County, Indiana, at about 1,500 feet. It appears to be silver and platter-shaped, perhaps 12 feet in diameter, with a pink flame coming from its base. It makes a loud whirring noise as it hovers. When it starts ascending at a 22° angle, its color changes from pink to light blue and the combine stops working. He notices two stalled cars on a nearby road. (“Indiana Farmer Says ‘Whatsit’ Was Overhead,” Indianapolis News, November 5, 1957, p. 17)

October 16 — 1:00 a.m. Antonio Villas-Boas is plowing alone near São Francisco de Sales, Minas Gerais, Brazil, when a red, egg-shaped object appears above him. His tractor motor and lights fail. It lands nearby and something grabs him as he tries to run away. Three small figures bring him into the object, where he is subjected to tests and made to have sex twice with an odd-looking woman. Afterwards, she points to her belly then points to the sky. Then he is given a tour of the craft and taken outside again around 5:30 a.m. (“The A.V.B. Contact Case,” Boletim URECAT, February 16, 2007)
Late October — Day. Nurse Ella Louise Fortune is driving north of Tularosa, New Mexico, when she sees a brilliant-white, elliptical object hovering in a deep-blue sky. It seems to have a faint exhaust trail at one edge. She stops her car and snaps a 35mm Kodachrome photo. Analysts generally agree this is a bright lenticular cloud with a trail of ice crystals. (Walter N. Webb, “The Fortune Photo Revisited,” IUR 18, no. 5 (Sept./Oct. 1993): 14–15)

October 16 — Evening. Former Australian Air Marshal George Jones and his wife see a round object like a “flying balloon” moving silently at the speed of a jet over their home in Mentone, Victoria, Australia. It moves from south to north at an altitude of 1,000–1,500 feet. (George Jones, “Former Air Chief Sees Saucers,” Flying Saucer Review 4, no. 3 (May/June 1958): 6)

October 25 — On a farm near Petrópolis, Rio de Janeiro, Brazil, a housekeeper (pseudonym = Anazia Maria) is taking care of a family member who is dying of stomach cancer. She claims that two diminutive, long-haired beings emerge from a landed UFO, come inside the house, examine the girl for an hour with a device that looks like a flashlight, communicate telepathically to the family, cure the girl, and leave behind some medication to give her. (Olavo T. Fontes, “Dying Girl Saved by Humanoid Surgeons,” Flying Saucer Review 13, no. 5 (Sept./Oct. 1967): 5–6)

October 30 — 9:00 p.m. Hugh Pulju and Shirley Moyer are driving 10 miles north of Casper, Wyoming, when a round, shiny object appears in the road about 250 feet ahead. Pulju tries to turn around, but the engine keeps stalling. It works well once he reaches a main highway. (“Mystery Object’ Is Reported Here,” Casper (Wyo.) Tribune-Herald, November 5, 1957, p. 1; Aimé Michel, Straight-Line, pp. 237–238; Schopick, p. 24)

October 31 — Keyhoe meets with Rep. James C. Healey again, who tells him the Air Force has “made a strong attempt to disprove your claims.” (Keyhoe, FSTS, p. 113)

October 31 — A businessman and his wife at Longchaumois, Jura, France, see a large lighted object with openings. It hovers close to the ground and takes off with a great increase in brightness, silently, at high speed. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1957, October 1st–November 2nd, The Author, 1997, p. 83)

October 31 — 8:00 p.m. Barbara Jean Stokes, her husband Paul, and another couple are driving in Lumberton, North Carolina, when they spot an object about 200 feet long in the sky. Suddenly the object rises straight up and flames. As this happens, the car stalls until the object disappears a few seconds later. (“Woman Says She Saw Ball of Fire on Road,” Charlotte (N.C.) Observer, November 5, 1957, p. 1)

Late October — Late one afternoon, a British RAF team is planning to return home from the Maralinga, South Australia, nuclear test site where the Operation Antler series of blasts have occurred (September 14, 25, October 9). They go outside and see a silvery-blue, metallic UFO with a flat base and a dome on top. Several squarish portholes are
visible around the center. The object tilts at 45° and hovers. After 15 minutes, the UFO shoots up out of sight without a sound. One of the witnesses is Derek Murray, later a Home Office photographer. (Bill Chalker, “The UFO Connection: Startling Implications for Australia’s North West Cape, and for Australia’s Security,” Flying Saucer Review 31, no. 5 (July 1986): 18–19; Jenny Randles, UFO Conspiracy, Cassell, 1987, pp. 94–95; Good Above, p. 163)

November — Gene Duplantier launches the quarterly magazine Saucers, Space, and Science in Willowdale, Ontario. It continues through 1972. (Saucers, Space & Science, no. 1 (November 1957))

November 1 — 9:15 a.m. More than 50 workers at the Luipaardsvlei mine near Krugersdorp, Gauteng, South Africa, watch two UFOs hanging motionless in the air at a great height until the afternoon. A Sabre jet from the South African Air Force is sent up to investigate. It climbs to 45,000 feet, but the objects are still above it. One of the witnesses is Maj. G. Ogilvie-Watson, from an ACF squadron at Pretoria. They move off at great speed. (“Jet Unable to Reach UFO,” Flying Saucer Review 4, no. 1 (Jan./Feb. 1958): 2; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1957, October 1st–November 2nd, The Author, 1997, p. 85)

November 2 — 3:30 a.m. Three miles west of Canadian, Texas, S/Sgt. Alfred A. Calvin and a civilian witness see a submarine-shaped object, red and white, about 40–60 feet long and about 10 feet high, at ground level. A figure is near the object holding a white flag. When he stops the car, a flash of light from the object coincides with the sudden failure of the headlights. (NICAP, “Submarine-Shaped UFO, Entity, E-M Case”; Sparks, p. 253; Randle, Levelland, 2021, pp. 11–12)

November 2 — 8:30 p.m. A witness is driving between Seminole and Seagraves, Texas, on US Highway 62 when he sees lights on the road ahead. As he approaches them, his headlights go out and his engine dies. A few seconds later, the lights rise into the air and disappear. (Hobbs (N.Mex.) News-Sun, November 5, 1957; Schopick, p. 25)

November 2 — 11:55 p.m. Two married couples driving near Shallowater, Texas, see a flash of orange light in the southwestern sky. The headlights and radio of their car fail for three seconds as they see the light. The car motor is not affected. (Mark Rodeghier, UFO Reports Involving Vehicle Interference, CUFOS, 1981, p. 9; Randle, Levelland, 2021, pp. 16, 220–221)

November 2 — About midnight. José Alvarez is driving along Route 51 in Whittharral, Texas, when he comes across a 200-foot-long object sitting in the road. His car engine stops as he approaches, and the headlights go out. At that point, the object rises quickly into the air. (UFOEv, p. 168; Schopick, pp. 27–28; Donald R. Burleson, “Levelland, Texas, 1957: Case Reopened,” IUR 28, no. 1 (Spring 2003): 4; Randle, Levelland, 2021, p. 19)

November 2 — About midnight. Jim Wheeler sees a 200-foot-long, egg-shaped, brightly lit object on Route 114 four miles east of Levelland, Texas. As he gets close to it, his engine and lights cease functioning. He gets out of his car as the light ascends; its lights blink out, and his engine and lights resume functioning. (UFOEv, p. 168; Schopick, p. 27; Donald R. Burleson, “Levelland, Texas, 1957: Case Reopened,” IUR 28, no. 1 (Spring 2003): 4; Randle, Levelland, 2021, pp. 17–18)
November 3 — 12:05 a.m. Texas Tech college student Newell H. Wright is driving west one mile west of Smyer, Texas, when the ammeter gauge on his car dashboard starts fluctuating wildly. The car motor gradually goes out then the headlights and radio die. He gets out to check and sees a white or aluminum-colored, oval-shaped object flat on the bottom like a loaf of bread, with a blush-green tint, about 75–125 feet long. After a few minutes, the object suddenly rises up from the road ahead and ascends almost vertically at great speed slightly to the north, disappearing in seconds. Afterward the car can start again. (NICAP, “Oval-Shaped Object & EME on Ammeter”; UFOEv, p. 168; Schopick, pp. 28–29; J. Allen Hynek, The UFO Experience, Ballantine ed., 1974, p. 143; Sparks, p. 254; Donald R. Burleson, “Levelland, Texas, 1957: Case Reopened,” IUR 28, no. 1 (Spring 2003): 4; Swords 253–256; Randle, Levelland, 2021, pp. 16–17, 212–214)

November 3 — 12:15 a.m. Frank Williams, a farmer, is near Whitharral, Texas, when he encounters an object described as an egg sitting on the crossroads. The UFO pulsatess steadily; each time it glows bright, the car’s power goes on and off. The object leaves with a thunderous sound. (UFOEv, p. 168; Schopick, pp. 29–30; J. Allen Hynek, The UFO Experience, Ballantine ed., 1974, pp. 143–144; Donald R. Burleson, “Levelland, Texas, 1957: Case Reopened,” IUR 28, no. 1 (Spring 2003): 4; Randle, Levelland, 2021, p. 17)

November 3 — Around 1:00 a.m. Levelland (Texas) Fire Marshall Ray Jones, while out driving around and looking for some explanation of the many UFO reports, sees a “streak of light” north of the Oklahoma Flat. His headlights dim and engine sputters as he sees the light. (UFOEv, p. 168; Schopick, p. 32; J. Allen Hynek, The UFO Experience, Ballantine ed., 1974, pp. 144–146; Randle, Levelland, 2021, p. 21)

November 3 — 1:15 a.m. James Long is 5 miles northwest of Levelland, Texas, on a far-to-market road. He reports a bright object that is egg or oval-shaped, about 200 feet long, 200 feet away, sitting in the road. He hears a “thunderclap.” The car’s lights and motor quit. The object rises quickly and speeds away. (UFOEv, p. 168; Schopick, p. 31; J. Allen Hynek, The UFO Experience, Ballantine ed., 1974, pp. 144–145; Randle, Levelland, 2021, p. 19)

November 3 — About 3:00 a.m. Two MPs at White Sands Missile Test Range, New Mexico, Cpl. Glenn H. Toy and Pfc. James E. Wilbanks are making rounds in their jeep when they notice a bright object high in the sky. It drops down to about 150 feet and the light goes out. A few minutes later the light goes on again and it drops to the ground in a bunker area 3 miles away and goes out. The UFO is egg-shaped and about 225–300 feet in diameter. (NICAP, “Three MPs Report Object over White Sands Base”; Schopick, pp. 37–38; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1957 November 3rd–5th, The Author, 1997, p. 6; UFOEv, p. 169; Sparks, p. 254; Swords 259; Randle, Levelland, 2021, pp. 23–27)

November 3 — 7:00 p.m. Edna Ireland is driving with two friends near Sibbald, Alberta, when a blinking light appears in the sky and passes nearly above the car toward the northwest. Their engine coughs and the headlights flicker. (Winnipeg (Man.) Tribune, November 7, 1957; Aimé Michel, Straight-Line, p. 239; Schopick, pp. 42–43)

November 3 — 8:00 p.m. Army Specialist 3rd Class Henry R. Barlow and Specialist 3rd Class Forest R. Oakes, Army Garrison Detachment 5, are in a jeep patrol driving west near the site of the first A-bomb explosion, Trinity Site, in White Sands Proving Ground, New Mexico. They see a pulsating red light that turns to white, possibly 200–300 feet in size and 4–5 miles away. It brightens and dims then sometimes goes out, rising in the sky from the ground or from about 500 feet over the bunker up to about 45° elevation until it looks like a star or point source. They watch it for 25 minutes before it disappears. Possibly Venus in the southwest, which sets at about 8:30 p.m. (Sparks, p. 254; Schopick, p. 38; Randle, Levelland, 2021, pp. 27–31)

November 3 — The USSR launches Sputnik 2 carrying Laika the dog. (Wikipedia, “Sputnik 2”)

November 4 — Portuguese Air Force Capt. Lenos Ferreira is conducting a training mission at the head of three jet fighters over Grenada, Spain, when he observes a luminous object changing color from an intense green to bright red. The object maintains a constant altitude while oscillating. Ferreira orders a change of course toward Córdoba, but the object follows his group for 40 minutes, dropping four smaller objects that also accompany the jets. Suddenly the objects go into a dive and disappear. (Patrick Gross, “UFO Chasing Jet Fighter Squadron, Lisbon, 1957”)
November 4 — After 12:00 midnight. A young couple are returning to Amarillo, Texas, from Palo Duro Canyon when they see a glowing object in the middle of the road, surrounded by fog. As they drive closer and enter the fog, the car engine and battery die. Another car has to push them into town to get the battery recharged. (Amarillo (Tex.) Daily News, November 4, 1957; Schopick, pp. 43–44)

November 4 — 1:30 a.m. Chief Pilot Captain Jean Vincent de Beyssac and his copilot are flying a Varig Airlines C-46 cargo plane from Porto Alegre to São Paulo, Brazil. They are near Araranguá, Santa Catarina, when de Beyssac notices a red light on his left. It seems to be getting bigger, so he banks towards it out of curiosity. The light gets much bigger then begins to glow more brilliantly. The pilot and copilot smell smoke and, as they are looking for the source, the light disappears. De Beyssac returns to Porto Alegre. It turns out that the right engine’s magnetor (or generator), automatic direction finder, and the radio (both receiver and transmitter) have burnt out, allegedly simultaneously. (NICAP, “Aircraft Encounters UFO / ADF, etc. Affected”; Olavo T. Fontes, “Top Secret Report Unveiled,” APRO Bulletin, September 1959, pp. 5–6; Lorenzen, FS Hoax, p. 155; Schopick, pp. 126–127; Patrick Gross, “UFO / Aircraft Close Encounter in Brazil, 1957”)

November 4 — 2:00 a.m. Two sentries at the Fortaleza de Itaipu in Praia Grande, São Paulo, Brazil, watch an orange object approaching the fort. It holds its course until it is directly above them. Its diameter is at least as large as the wingspan of a DC-3 and scarcely 300 feet away. Suddenly there is a strange buzzing noise and the men feel a wave of glowing heat. One of them collapses on the spot, but the other succeeds in reaching safety in the shadow of the gun emplacements. His shouts of alarm rouse his comrades inside the fort, where the lights suddenly go out. In the meantime, the emergency power is switched on but immediately gives out. Only a few minutes after the alarm, two other men are out of the fort and at their sides. They too see the UFO, which is now heading out to sea. It leaves a luminous trail as it shoots away across the Atlantic. The two sentries are taken to a hospital in Rio de Janeiro. They suffer second and third-degree burns on large areas of their body, chiefly in areas covered by clothing. Afterwards, Brazilian Army and USAF personnel, along with investigators of the Brazilian Air Force, fly to the fort to interview them. There is some reason to think that Olavo T. Fontes made this case up, as no first-hand witnesses to the event have come forward. (NICAP, “Fort Itaipu Incident”; Wikipedia, “Casar do Forte de Itaipu”; Olavo T. Fontes, “Top Secret Report Unveiled,” APRO Bulletin, September 1959, pp. 6–7; Jules Lemaître, “A Strange Story from Brazil,” Flying Saucer Review 6, no. 1 (Jan./Feb. 1960): 9–11; Schopick, pp. 135–140; Kevin D. Randle, “Fort Itaipu and Footnotes,” A Different Perspective, October 12, 2014; Kevin D. Randle, “Fort Itaipu and Olavo Fontes Revisited,” A Different Perspective, June 15, 2016; Clark 537)

November 4 — 3:12 a.m. At Elmwood Park, Illinois, three policemen (Clifford Shaw, Joseph Lukasek, and Dan Digiovanni) see a bright cigar-shaped object in the sky. The headlights and spotlight on the squad car dim. The car chases the UFO for a mile and a half, which dips and rises before speeding off. Fireman Bob Volz also sees a reddish-orange UFO about the same time. (NICAP, “Bright Cylinder Chased by Police, E-M Effects”; Aimé Michel, Straight-Line, p. 239; Keyhoe, FSTS, p. 117; Schopick, pp. 90–91; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1957 November 3rd–5th, The Author, 1997, pp. 22–27; Sparks, p. 255)

November 4 — 1:10 p.m. James W. Stokes, electronics technician at Holloman AFB, New Mexico, is driving on US 54 about 8 miles south of Orogrande, New Mexico. The car radio fades, and the car slows as if the battery is failing. Stokes notices 6–12 cars ahead of him have also stopped and drivers are out looking at the sky (looking behind him to the northeast), including a Mr. Duncan and Allan D. Baker. Stokes stops and gets out, sees a pearl-white oval or egg-shaped object about 500 feet wide with a slight purplish tinge heading south at an estimated speed of 1,500–2,000 mph. It is below the elevation angle of the Sacramento Mountains ridgeline, descending from about 5,000 feet above ground level in a shallow dive to about 1,500–2,500 feet altitude as it swerves to pass to the south of Stokes and the other stopped cars. At its closest it is about 2–5 miles away. It then circles around headed west and disappears. The same or another object appears in the northeast (as if the object has completely circled) and performs the same rounded course but passing farther to the south of the parked cars and disappears in the west. Duncan takes a 35mm film of the object. Stokes notices a wave of heat from the object at closest approach. Later that evening he is sunburned, but it clears up the next day. The Air Force calls it a hoax based on the Levelland sightings. (NICAP, “Stokes Incident”; “The New Mexico Story,” APRO Bulletin, November 1957, pp. 1–2; L. J. Lorenzen, “The Stokes Case,” APRO Bulletin, January 1958, pp. 2, 6; UFOEv, p. 169; Schopick, pp. 39–42; Sparks, p. 255; Swords 256–259; Randle, Levelland, 2021, pp. 32–42, 228)

November 4 — 7:30 p.m. A Texas state border inspector is driving 3 miles southeast of El Paso Airport in Texas when his car engine stalls and the headlights go dim then out. He gets out and notices an object approaching that is making a whirring sound like an artillery shell. It passes above his car at about 150 feet, heading west and changing altitude occasionally. When it gets to the Franklin Mountains, it lifts into the air vertically. (NICAP, “Egg-Shaped Object Stalls Car”; Hynek UFO Report, p. 181)
November 4 — 10:00 p.m. Jan Boucher, a policeman in Kodiak, Alaska, sees a red ball of fire with a greenish-yellow trail as he is patrolling on Mission Road. It apparently moves 50 feet above a nearby school. He tries to radio in a report but his radio gets interference for 2 minutes after the sighting. (Anchorage (Alaska) Daily News, November 7, 1957; Schopick, pp. 89–90)

November 4 — 10:45 p.m. CAA air traffic controllers R. M. Kaser and E. G. Brink see a highly maneuverable 15–20-foot egg-shaped object with a white light at its base circle over one end of Kirtland AFB in Albuquerque, New Mexico, at 150–200 mph. It comes down in a steep 30° dive as if landing on Runway 26 to the north of the tower at about 1,500 feet. Radar tracks part of this maneuver. The object then crosses the flight line, runways, and taxiways heading towards the tower at about 50 mph and 20–30 feet above ground, observed through 7x binoculars until it reaches about 3,000 feet near the northeast corner of the flood-lit restricted Manzano Nuclear Weapons Storage Area and a B-58 bomber service site. It hovers for 20–60 seconds, then heads east again at about 200–300 feet altitude. Suddenly it shoots up in a steep climb. Controllers contact Radar Approach Control, which tracks the object on CPN-18 radar traveling east, then turning south, circling the Albuquerque Low Frequency Range Station. It then heads north, disappearing at 10 miles and reappearing 20 minutes later to follow 1/2 mile behind a USAF C-46 that has just taken off to the south. It continues for 14 miles until both go off the scope. A hovering radar target then appears to the north over an outer marker for 90 seconds before fading. (Wikipedia, “Kirtland AFB UFO sighting”; NICAP, “Kirtland UFO Incident / Radar Case”; Sparks, p. 256; J. Allen Hynek, The UFO Experience, Ballantine ed., 1974, pp. 87–90; Condon, pp. 141–143; James E. McDonald, “The Kirtland Airfield UFO,” Flying Saucer Review 16, no. 5 (Sept./Oct. 1970): 6–8; Swords 259–260)

November 5 — 5:10 a.m. The US Coast Guard Cutter Sebago (WHEC-42), Commander Clarence H. Waring Jr., cruising in the Gulf of Mexico about 200 miles south of Mobile, Alabama, tracks a radar target at a range of 22 miles moving at 650 mph. It disappears at 55 miles range. Three other unusual radar contacts are made in the next 10 minutes. A visual object like a brilliant planet is seen at 5:21 a.m. speeding north to south for five seconds by Ensign Wayne Schotley, Lt. Donald E. Shaffer, 1stClass Quartermaster Kenneth Smith, and radio operator Thomas Kirk. The Air Force ascribes it to confused radar operators who mistake ordinary plane blips for a UFO. (NICAP, “The Coast Guard Cutter Sebago Case”; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1957 November 3rd–5th, The Author, 1997, pp. 50–51; Condon, pp. 165–167; Sparks, p. 256; Swords 260–262)

November 5 — Late afternoon. Grain buyer Reinhold O. Schmidt is driving through the countryside near Kearney, Nebraska, when he notices a large, cigar-shaped object resting in a field. He is soon escorted inside the spaceship, which turns out to be crewed by completely human-looking space aliens, four males and two females, who apparently speak perfect German and claim to be from the planet Saturn. They also claim to be interested in the recently launched Russian sputniks and the satellite-launching plans of the US. Later Schmidt brings local police to view the landing site, where they find deep imprints and some “mysterious green residue.” Schmidt also claims subsequent visits to the spaceship and many friendly conversations with its learned crew. Schmidt notices they drink MJB brand coffee, and also carry in their cigar-shaped craft an ordinary terrestrial MG sports car, which they use for running errands and buying groceries. (A schematic drawing of the ship’s interior in Schmidt’s later booklet depicts a Volkswagen Beetle.) Unlike most spaceships, the Saturnian ship has large propellers at both ends. Eventually Schmidt gets a ride up to earth orbit and a tour of the mother ship. On October 26, 1961, Schmidt is convicted in Oakland, California, for grand theft after bilking a widow out of $5,000 for a worthless mining venture in Tulare County, where he claims to have seen huge quartz crystals from a spaceship. Judge Donald K. Quayle sentences him to 1–10 years in prison. (Clark III 1038–1039; Swords 262; Curt Collins, “The Trial of a UFO Gold Digger,” The Saucers That Time Forgot, August 27, 2020)

November 5 — The Department of Defense Office of Public Affairs issues a new UFO fact sheet, emphasizing the high percentage of explained cases and the lack of a threat to national security. (UFOEv, p. 107; Swords 262)

November 5 — 6:30 p.m. Larry and Marilynn Beaman are driving near Antioch, Illinois, when they notice a ball of fire fluctuating from white to yellow pacing their car on the right side, about 1,000 feet up. It goes out for a time then switches back on. At its largest, it seems 30 feet in diameter. It follows them all the way to Ringwood and then lands in some trees behind a school building two blocks from where they live. It glitters like a welder’s arc and makes a sound like water swishing. Beaman rounds up some other witnesses and goes back to the landing site, but the object takes off, changes to purple, and moves away to the southwest. TV sets in town dim, finally losing both picture and sound during the same time period. (Schopick, pp. 104–109)

November 5 — 8:43 p.m. A witness in Woodstock, Illinois, sees a large, red, triangular object with a green light in the front and a yellow light in the rear. It makes a low droning sound and moves west to east. Woodstock police officers and another individual in Genoa City see the same object. At 10:15 p.m., an amber or orange UFO 200
November 5 — 9:30 p.m. Civil service employee Lon Yarborough is driving along US Highway 81 about 1.5 miles southwest of San Antonio, Texas, when he sees an extremely bright object settle down in a ravine about 600 feet from him. The egg-shaped object is approximately 60 foot long and causes the lights and engine of his car to fail. The object rests a few minutes and finally takes off to the northeast. (San Antonio (Tex.) Light, November 6, 1957; NICAP, “60’ Egg-Shaped Object Disables Auto”, Schopick, pp. 44–45)

November 5 — 11:00 p.m. Two young men see a red light north of US Highway 62 at a point 38 miles west of Hobbs, New Mexico. They watch for 9–10 minutes, thinking it is an oil flare, but the light suddenly rises straight up. After pacing their car for a few minutes, the light turns toward the car, passes over it, and hovers over the Permian Basin Pipeline plant. As it passes overhead, the car engine sputters, then dies, and the lights go out. After the men coast the car down the road, the motor restarts and they drive away. The battery is found to be dead the following morning and the dashboard clock is stopped. (Schopick, pp. 45–47; Mark Rodeghier, UFO Reports Involving Vehicle Interference, CUFOs, 1981, p. 12)

November 6 — Just after 12:00 midnight. A taxicab company owner, Joe Martinez, and one of his drivers, Alberto Gallegos, sees a UFO approach them in Santa Fe, New Mexico. They hear a humming sound as it comes close. The object is egg-shaped and multicolored. As it passes over their car, the engine stalls and the dashboard clock stops. The UFO then pulls up and moves rapidly into the southeast. One witness later discovers that his wristwatch has also stopped at the time of sighting. (Aimé Michel, Straight Line, pp. 246–247; Schopick, pp. 47–48; Mark Rodeghier, UFO Reports Involving Vehicle Interference, CUFOs, 1981, p. 12)

November 6 — 4:30 a.m. William Rush II is driving on Long Point Road in Houston, Texas. A brilliant red, egg-shaped UFO kills his car engine and causes static on his radio. (Houston (Tex.) Chronicle, November 6, 1957; Schopick, p. 48)

November 6 — 5:40 a.m. Richard Kehoe is driving along Vista Del Mar in Playa Del Rey, California, when his engine fails. Two other cars on the highway are also affected, and the drivers (Ronald Burke and Joe Thomas) all get out. They see an egg-shaped object that seems to be wrapped in a blue haze. It is tan or cream-colored and has two metallic rings around it. Two smallish men, about 5 feet 5 inches tall and wearing black leather pants, a white belt, and a light-colored jersey, exit the object. They ask Kehoe and the others where they are and what time it is in something approaching English. They walk back to the object, which takes off. After it leaves, Kehoe’s car starts with no problem. (Lorenzen, Flying Saucer Occupants, Signet, 1967, pp. 126–127)

November 6 — 6:30 a.m. Everett Orain Clark, 12, of Dante, Knoxville, Tennessee, lets his dog Frisky outside and sees an object like an elongated egg in a field 300 feet away from his house. 20 minutes later, he calls to bring the dog back and sees Frisky with other dogs on the other side of the road close to the object. Clark walks toward the UFO and sees two men and women, apparently dressed in a normal manner. One of the men tries to catch Frisky who grunts and moves away. They are speaking in a foreign language that sounds like German to him. The four people go into the craft by seemingly walking right through the wall. Journalist Carson Brewer goes back to the site with Clark and finds an “oblong ring of pressed grass” 24 feet by 4.5 feet. In the afternoon, two men from the Oak Ridge National Laboratory (engineer Wallace Russell Gambill and physicist N. D. Greene) collect soil samples and check for radiation (they find none). ("Scientists Check 'Space Ship' Field," Knoxville (Tenn.) News-Sentinel, November 7, 1957, pp. 1, 12; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1957 November 6th, The Author, 1997, pp. 17–19; Clark III 672; 37; 62–673; Patrick Gross, URECAT, August 17, 2006)

November 6 — US scientists are “pretty shook up” about the recent UFO sightings, according to astronomer Charles F. "Chick" Capen in the November 7 El Paso Times. However, Capen talks more about missile launches and lunar photography than UFO sightings. ("Sighting 'Shakes' Scientists," El Paso (Tex.) Times, November 7, 1957, p. 21; "El Paseans Take Look at Sputnik," El Paso (Tex.) Times, November 7, 1957, pp. 1, 3; Swords 264)

November 6 — 5:00 p.m. Two Malay fisherman are in a waterway near Bagansiapiapi, Sumatra, Indonesia, when they see a black and red object swiftly approaching their boat and trailing black and greenish smoke. The top and bottom of the object are curved like discs. When it is 60 feet away it stops in mid-air about 35 feet above the water, and the bottom part continues to rotate as the water foams below it. The object is a triangular shape and white smoke is coming out from each point. The object speeds up and disappears, leaving behind black and greenish smoke lines. (Marler 133)

November 6 — Early evening. Varine “Rene” Gilham sees a brilliant object radiating a strong red light as he is using an outhouse on his farm near Merom, Indiana. The whole farm and surrounding area are bathed in the light for 10 minutes. A small object joins the larger one and the light grows more intense. The two objects fly away. The next day, Gilham has “sunburn” in many places. Two days later he is admitted to a hospital for treatment. (NICAP, “Merom/Gilham Incident”; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1957

November 6 — 8:02 p.m. Six people in Toronto, Ontario, watch a yellow-white light travel silently from south to north across the eastern sky. One experiences static on his TV set as the object passes, slower than a meteor. (Aimé Michel, *Straight-Line*, pp. 248–249; *Schopick*, pp. 80–81)

November 6 — Night. Two state policemen in Danville, Illinois, observe a brilliant white light that changes color successively to amber and orange. They chase it for 15 miles because the light appears to be low in the sky. During the chase, their communications radio does not function. The light eventually flies out of sight. (“2 State Troopers See ‘Object,’” *Hammond (Ind.) Times*, November 7, 1957, p. 12; *Schopick*, pp. 91–92)

November 6 — 9:00 p.m. Jacques Jacobsen and three others are in a hunting lodge on the Baskatong Reservoir, Quebec, listening to a battery-powered radio. Outside, they see a glowing, yellow-white sphere 2–3 miles away to the southwest. It remains in place for 15 minutes. During this time the radio goes off, and one of the men’s shortwave radios is working on only one frequency that emits a strong, rapidly modulated tone that sounds like, but is not, Morse code. The UFO rises into the clouds and the radios function normally again. (Aimé Michel, *Straight-Line*, pp. 248–249; *Schopick*, pp. 79–80; Randle, *Levelland*, 2021, p. 114)

November 6 — 9:43 p.m. Kenneth J. Delano, who is participating in aurora and meteor watches for the International Geophysical Year, is observing the sky at St. Mary’s Seminary in Baltimore, Maryland, when he sees a brilliant white light in the northwest. He watches it approach until it is nearly overhead. Then a faint, silvery-gray, elliptical disc is visible for a few seconds above the light. It is silent, except for a faint whirring sound. He watches it for a total of 4 minutes until it passes behind some buildings. (Kenneth J. Delano, “UFO over Baltimore,” *IUR* 32, no. 4 (October 2009): 17–18, 24)

November 6 — 11:30 p.m. Olden J. Moore is driving home in Montville, Ohio, when he sees an object like a bright meteor split into two pieces, one of which heads straight up. The other becomes larger while its color changes from bright white to blue green. It hovers about 200 feet above a field and lands with a soft whirring sound, perhaps 500 feet away. Moore watches cautiously for 15 minutes, then approaches it. The UFO is shaped like a “covered dish,” and is about 50 feet in diameter, 15 feet high, with a cone on top about 10 feet high. It is pulsating slowly, and a haze surrounds it. Moore goes home to get another witness (his wife) but when they return the UFO is gone. Mrs. Moore reports the sighting to County Sheriff Louis Robusky the next morning, and a civil defense director, Kenneth Locke, visits the site. Locke finds high levels of radioactivity (a maximum of 150 microroentgens/hour, suggestive of an approximately one-hour radionuclide half-life or less) two perfectly formed holes six inches in diameter, and unusual footprints that come from nowhere and go nowhere. (NICAP, “Olden Moore Case / Close Encounter”; UFOEv, pp. 169–170; Center for UFO Studies, [case files]; Clark III 772–773, 950; *Sparks*, p. 257)

November 7 — 1:45–1:55 a.m. Seven airmen at Holloman Air Force Base near Alamogordo, New Mexico—Bradford Rickets, James Cole, Dennis Murphy, Wayne Hurlburt, and Harry Uhrlberg—see a UFO while on duty at a salvage yard on the north side of the base. The object makes a whistling noise and turns from white to orange to red. (Lorenzen, *FSHoax*, pp. 100–101)

November 7 — 7:25 a.m. Truck driver Melvin Stevens stops one mile east of House, Mississippi, because a silvery “blimp” about 5 feet high and 2 feet long is blocking the road. He walks toward it, a sliding door opens, and three small, pasty-faced men about 4.5 feet tall emerge. Stevens feels paralyzed. After a short time, the beings make a military about-face and reenter the UFO, which takes off vertically. (Center for UFO Studies, *HUMCAT Index 1957*, p. 32; Clark III 269)

November 7 — 9:20 a.m. Trent Lindsey and his wife and son Byron are driving on US Highway 54 near Orogrande, New Mexico, when Byron notices that the speedometer is jumping wildly back and forth from the top to the bottom of its range. It then stops just as suddenly. The three witnesses later see a metallic-appearing UFO high in the sky to the southwest. It continues moving away for three minutes until it was lost from view over the Organ Mountains. The speedometer functions normally after the UFO is gone. (“Family Reports Seeing Large Object over NM,” *Albuquerque Tribune*, November 8, 1957, p. 1; Lorenzen, *FSHoax*, pp. 99–100)

November 7 — 9:38 a.m. Mysterious radio signals on the 108 megacycle radio band are recorded by RCA Communications at Riverhead, Long Island, New York. The signal is a continuous, tone-modulated hum at a low pitch of 200 cycles per second. The FCC admits it is baffled, but suspects that it comes from a radio amateur or equipment testing in the New York City area. Another report claims that Vanguard and Federal Communications Commission watchers at 18 monitoring stations throughout the Western Hemisphere are picking up signals at 14.286 megacycles, possibly connected with Sputnik 2. The signal is a long note of low pitch followed after a few
November 7 — Night. Paul Rutledge, a packinghouse worker at Waterloo, Iowa, sees an object hovering above his garage. He can see two figures walking around inside. The object is about 30 feet long and has a shiny bottom and a glass top. (Lorenzen, *UFOs: The Whole Story*, Signet, 1969, p. 84; Patrick Gross, *URECAT*, January 24, 2007)

November 8 — 3:03 a.m. Polish-Australian astronomer Antoni Przybyski and Dutch-American astronomer Bart Bok see a vivid pink object moving slowly across the sky at Mount Stromlo Observatory near Canberra, Australia. It is visible to the naked eye for two minutes. Przybyski has just finished observing Sputnik 1 and 2, so it wasn’t a satellite or a meteor. Assistant Director Arthur Robert Hogg thinks it might be circling the earth like a satellite. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1957*, November 7th–12th, The Author, 1998, p. 36; Michael D. Swords, “Gazing at the Moons,” *IUR* 32, no. 4 (October 2009): 10–11; Center for UFO Studies, “Moonwatch Mystery Satellites, 1958–1962”)

November 8 — 6:22 a.m. Connie Foster watches a lighted triangular object flying from southeast to northwest over Camarillo, California. It is moving with the base facing forward and has bright lights on the tips of the triangle. She watches it for nearly 30 minutes before it disappears. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1957*, November 7th–12th, The Author, 1998, p. 37)

November 8 — Spencer Whedon, chief of Air Intelligence at Wright-Patterson AFB near Dayton, Ohio, tells the press that of 5,700 UFO reports received by his office since 1940, 97% have been identified satisfactorily and the other 8% remain unidentified due to insufficient information. (“Seeing Things? No, Sky Really Red,” *Cincinnati (Ohio) Post*, November 7, 1957, p. 8)

November 8 — 6:00 p.m. Pan Am Flight 7, a Boeing Stratocruiser flying across the Pacific mysteriously crashes midway between San Francisco and Honolulu. One of the crew is UFO witness Capt. William H. Fortenberry. The cause of the crash is never determined. Fortenberry’s journalist son, Ken H. Fortenberry, suspects that the bereaved and mentally unstable purser Oliver Eugene Crosthwaite, has deliberately caused the crash, killing himself and murdering 43 innocent people in the process. (Wikipedia, “Pan Am Flight 7”; Ken H. Fortenberry, *Flight 7 Is Missing: The Search for My Father’s Killer, Fayetteville Mafia, 2020*)

November 8 — Night. 12 female and 4 male farmworkers are in a truck on the Newhailes Road returning to Edinburgh from picking Brussels sprouts in a nursery at Musselburgh, Scotland. One of them spots a gray, round object seemingly following the truck at a distance of 60 feet. Mary Horne says it is domed on the top and bottom. It follows them for 5–10 minutes then moves off towards Portobello leaving a double vapor trail. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1957*, November 7th–12th, The Author, 1998, pp. 54–55)

November 9 — 12:15 a.m. A man is driving in Sacramento, California, when his car engine and headlights fail. He looks up and sees an elongated egg-shaped object with delta-shaped wings, 150–200 feet long and 40–50 feet wide. The wings come back to about 30 feet from the rear of the fuselage. It has a bright bluish hue and leaves a bluish fluorescent trail. The sighting lasts 2–3 minutes. (Herbert S. Taylor, “An Update on Vehicle Interference Reports, Part Two,” *IUR* 34, no. 1 (September 2011): 19)

November 9 — 9:15 a.m. Eastern Airline pilot Capt. Truman Gile Jr. is preparing to take off from Lafayette (Louisiana) Airport when he sees a big silvery object about 20,000 feet in the air. Gile watches it for 3 minutes and it doesn’t move. He alerts copilot James E. Hall, the stewardess, and the ground agents, and they all watch it another 5 minutes before it fades away. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1957*, November 7th–12th, The Author, 1998, pp. 61–62)

November 9 — 7:20 p.m. Several witnesses are driving 12 miles northeast of Carrizozo, New Mexico, on US Highway 54 in the vicinity of White Oaks when a large, rapidly moving light approaches their car from the south and apparently causes the vehicle’s lighting system to fail. The light changes course and speeds off to the southwest. Jim and Coral Lorenzen are driving east on US Highway 380 about 10 miles east of Carrizozo when they spot an anomalous light that might be the same object. (Lorenzen, *FSHoax*, pp. 101–102)
November 10 — 1:25 a.m. Leita Mae Kuhn is checking the stove in her Doberman dog kennel at Madison, Ohio, when she notices a glowing, domed disc hovering 60 feet above the rear of the kennel. It is about 40 feet in diameter and emitting puffy clouds of smoke. Her eyes begin to burn after watching it for 20–30 minutes, and she runs back into the house and locks the door. She has rashes and her eyes hurt so badly she visits a doctor. (Donald E. Keyhoe and Gordon I. R. Lore Jr., *Strange Effects from UFOs*, NICAP, 1969, pp. 11–12; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1957, November 7th–12th*, The Author, 1998, pp. 69–71; Michael D. Swords, “Messing Around with the Force,” *IUR* 31, no. 4 (March 2008): 30–31; Michael D. Swords, “Can UFOs Cause Physiological Effects? Part 1,” *IUR* 33, no. 4 (May 2011): 10)

November 10 — Residents of Skaryszew, Poland, watch a huge, radiant, cigar-shaped object slowly moving west. (Poland 20)

November 10 — Evening. UFO witness Olden Moore of Montville, Ohio, is visited by Sheriff Robusky, a deputy, and a USAF officer who asks him to go with them to Youngstown to be interviewed by military officers. They drive him to the field where the encounter took place and put him aboard a military helicopter. He is interviewed in Youngstown, then he is returned to the field at 11:00 p.m. (Clark III 773)

November 10 — 5:55 p.m. Wilfred S. Hardy, an assistant safety engineer at the Tokyo, Japan, Engineer Supply Center, sees (along with his wife and a Japanese boat boy) a huge cigar-shaped object with lighted portholes above Lake Imba-numa 10 miles away. He estimates it is about 200–500 feet long. The object lights up the entire lake, then disappears to the south 10 seconds later. (Lorenzen, *UFOs: The Whole Story*, Signet, 1969, p. 86)

November 10 — 7:00 p.m. Many people see a UFO at Hammond, Indiana. Two policemen (Sgt. Charles J. Mauder, Office Steve Betuslak) see a red and white light hovering 500–1,000 feet overhead. They hear a beeping sound and there is interference on the police radio while the object is in view. Another witness sees a green light on a basket-shaped object; his car radio fails. The lights fly away when anyone tries to approach. (Aimé Michel, *Straight-Line*, p. 268; Schopick, pp. 92–95; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1957, November 7th–12th*, The Author, 1998, pp. 73, 75)

November 10 — Night. French astronomer Jacques Chapuis at Toulouse Observatory in France observes a maneuvering, yellow, star-like object for 5 minutes. It ascends straight out of sight. (UFOEv, p. 50)

November 11 — A silvery elliptical UFO is seen flying below Western Airlines Flight 61 over the desert east of Los Angeles, California. Robert D. Hahn, a jewelry designer, is a passenger and describes it as a large, elliptical, metallic object with dark patches zigzagging about 200 feet above the ground. (UFOEv, p. 67)

November 13 — An object explodes over the State Hospital at Crawsville, Maryland, and two or three burned pieces of metal fall on the hospital grounds. It is recovered by employees William A. Zick and J. Caswell. The pieces are checked for radiation and confiscated by army intelligence officers at Fort George G. Meade. They are apparently sent to the Air Research and Development Center in Baltimore. An ARD colonel tells NICAP member and WFBR news director Lou Corbin that he has no idea what the metal is. Some of the material is perhaps sent to ATIC. (“Metal Object from Skies Rushed to ATIC for Analysis,” *UFO Investigator* 1, no. 3 (January 1958): 5–6)

November 14 — Afternoon. Evalyn Riead hears a sputtering noise like someone is pulling into her driveway in Tamaroa, Illinois. She looks outside and sees a bright, moon-shaped object with a tail moving above the trees bordering US Highway 51. It disappears after 5–6 booms and 3 flashes of light. As soon as this happens, the lights in her home go out. Electrical power in a 4-mile area between Tamaroa and Du Bois is interrupted for 10 minutes. Power is restored when the company closes an open circuit breaker, but they could find no cause. (“Current Cut Off As Flying ‘Thing’ Appears in Illinois,” *Lima (Ohio) Citizen*, November 15, 1957, p. 10; Schopick, pp. 140–141)

Mid-November — The US Senate Committee on Government Operations, chaired by Sen. John L. McClellan (D-Ark.), begins an inquiry into UFOs. Ruppelt is called to give testimony. (Ruppelt, 1960 ed., p. 253)

November 16 — Afternoon. Cynthia Appleton blacks out unexpectedly at her home in 87 Fentham Road in Aston, a suburb of Birmingham, England. On November 19, she feels faint again as the light outside dims, and a man with blond hair and wearing coveralls materializes in the center of the room. She hears him speaking to her telepathically. He tells her not to be afraid and that he is from a world he calls Gharnasvarn (which we know as Venus) and he shows her what seems to be a holographic image of two spaceships. She has other visitations by entities on January 7 and February 7, 1958. In September 1958, the spaceman informs her that she is pregnant, which is apparently true, as she gives birth on June 2, 1958, to a boy with blond hair that she and her husband Ron name Matthew. Appleton says the Venusians visited her a few more times, but the trail grows cold in July 1960. (“Birmingham Woman Meets Spacemen,” *Flying Saucer Review* 4, no. 2 (March/April 1958): 5–6; Jenny Randles, “A Visitor from Gharnasvarn,” *IUR* 13, no. 4 (July/Aug. 1988): 4–8; *Birmingham Sunday Mercury*, January 26, 2003; Andy Roberts, “The Space Baby,” *Fortean Times* 191 (December 2004): 32–38; Bill Chalker, “Flying Saucery, Cosmic Bethlehem, and Midwich Cuckoos: The Cynthia Appleton Contacts (1957–1959),” Australian UFO Researcher Bill Chalker, 2005)
November 17 — An Air Force car with two officers comes to UFO witness Olden Moore’s house in Montville, Ohio. He is told they are taking him to Washington, D.C., for extended questioning. They drive him to a waiting airplane, which stops briefly at Wright-Patterson AFB to pick up one officer and drop another off. In Washington, Moore is housed in a building said to be a federal courthouse [US Court of Appeals for the Armed Forces?]. He is kept there and interrogated for several days. Officers watch him constantly, even when he is sleeping. Toward the end of his stay, Moore is shown slides of UFO photos and a UFO film taken from inside a military plane. Moore is asked to sign a document that swears him to secrecy. (UFOEv, p. 114; Clark III 773)

November 21 — Merchant Hans Haugaard Hansen is driving out of Gsten, Denmark, on the road to Egholt when he sees a triangular UFO moving low over a field some 300–600 feet away. It is emitting a red or orange light and makes no sound. The bottom of the object is solid, but the upper part is transparent, and he can see two figures inside. He stops the car to watch as it moves about 40 mph. Similar objects are seen at Jordrup and Vorbasse. (“Flying Saucer Reports Pour in from Denmark,” Flying Saucer Review 4, no. 4 (July/Aug. 1958): 19; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1957, November 13th–30th, The Author, 1998, p. 56; Willy Wegner, “UFO bogen, Kapitel 19: Rumfolkene viser sig,” Skeptika, September 1, 2004)

November 21 — Night. Frank Dickenson and two friends are driving up Reasty Hill near the village of Silpho, North Yorkshire, England, when their car stalls and they see a glowing object in the sky that appears to fall to the ground on a ridge above Broxa Forest. Dickenson leaves the car with a flashlight, climbs up a bank, and finds in a patch of bracken a metallic saucer shaped like a “large flattish spinning top,” 18 inches in diameter and weighing 33 pounds. As he returns to tell his friends, he passes a young couple walking toward the scene. When the tree men return to search for it, the disc is gone. Dickenson places an advertisement in a Scarborough newspaper about the disc, and he is able to recover it for £10 from a man who claims he was the mystery man on the moor. Photos taken by UFO researcher John Dale show that the copper base of the object is inscribed with a mystery script. The top of the disc is made from layers of laminated metal that has been painted with a white substance. The two halves are stuck together with a grayish substance resembling cellulose, and a pencil-thick iron rod runs through a “white metal bearing” in the top. When the bearing is drilled out, they find a heap of ash inside the cavity, as well as pieces of fused glass and a tightly rolled cylinder of copper. Also inside is a tiny booklet of 17 sheets of thin copper foil fastened at one edge. The booklet is engraved with script similar to that found on the outside. The coded script is translated by a café proprietor from Scarborough named Philip Longbottom, who claims the 2,000-word inscription is from an alien named Ulo, with later text added by an apparently female companion named Tarngee. A metallurgist at the University of Manchester analyzes the disc and finds the outer casing is made primarily from lead, and the copper foil is triple laminated an unusually free from impurities. In 2017, David Clarke discovers that five specimens from the Silpho disc have been preserved in a tin cigarette box housed in London’s Science Museum. The specimens were sent to aviation historian Charles Harvard Gibbs-Smith in 1963 by Essex ufologist C. C. Stevens for analysis. Gibbs-Smith judged the items to be of terrestrial origin, and they were donated to the Science Museum with his papers after his death in 1981. Veteran Scarborough Evening News editor Mick Jefferson said in 2003 the newspaper had long ago exposed the object as a hoax made from a “domestic hot-water cylinder.” However, the hoaxers have never surfaced. (“The Silpho Moor Mystery,” Flying Saucer Review 4, no. 2 (March/April 1958): 4; “Silpho Moor Controversy,” Flying Saucer Review 4, no. 4 (July/Aug. 1958): 19; Philip Longbottom, “The Silpho Moor Mystery,” Flying Saucer Review 4, no. 6 (Nov./Dec. 1958): 15–17; Jenny Randles, UFO Retrievals, Blandford, 1995, pp. 77–82; David Clarke, “The Return of the Silpho Moor Saucer,” Fortean Times 364 (March 2018): 42–46)

November 23 — 6:10 p.m. Fighter pilot 1st Lt. Joseph F. Long’s car engine stalls 30 miles west of Tonopah, Nevada. He hears a high-pitched whining noise and sees four 50-foot, domed, saucer-shaped UFOs landed on the right side of the road about 900–1,200 feet away. They are glowing brightly and equipped with three landing gears. Long estimates they are about 10–15 feet tall. When he approaches to within 50 feet of the closest object, the hum increases in intensity and Long’s ears begin to hurt. The objects take off abruptly, retracting the landing gears. The rise about 50 feet into the air and proceed across the highway to the north at about 10 mph. The total time of the sighting is 20 minutes. Shallow, bowl-shaped ground impressions in the shape of a triangle are found at the landing site. (NICAP, “Four Huge Saucers Land near Car, Engine Stalls”; Hynek UFO Report, pp. 182–186; Good Need, pp. 222–223, 228: Sparks, p. 259; Randle, Levelland, 2021, pp. 101–106)

November 23 — 7:30 p.m. Six truck drivers watch a strange object with three lights in a triangular pattern hovering above a field off State Highway 8 just north of the Butler Valley Turnpike exit in Richland Township, Allegheny
County, Pennsylvania. It has a green light at the bottom, a red light at the right corner, and a yellow light at the left corner. They get out of their car and approach the object, but when they are 75 feet away, it moves to the east, then south. They go back to the car and shine their lights on the object, which is about 20 feet above some trees. The lights go out and the object disappears. ("3-Lighted ‘Whatsit’ Floats over Field," Pittsburgh (Pa.) Sun-Telegraph, November 27, 1957, p. 3)

November 25 — 10:00 p.m. All the lights in the town of Mogi Mirim, São Paulo, Brazil, suddenly dim and fail. Numerous people see a circular light traveling directly overhead. Two similar lights follow a short time later. The blackout only lasts 5 minutes, but the power station has no explanation. (Schopick, pp. 141–142)

November 27 — The director of an engineering firm and four of his staff members see five black, disc-shaped objects hovering in the French Alps for 8 minutes. The group performs a series of maneuvers, after which a parachute-shaped object emerges from one of them. Suddenly they all shoot away at supersonic speed toward the Swiss border. (Lorenzen, UFOs: The Whole Story, Signet, 1969, p. 87)

November 28 — 8:30 p.m. Regino Lacuesta is driving on the Hawaii Belt Road near Ninole, Hawaii, when his car engine begins missing. Suddenly he sees a bright flash of light 20 feet above the highway in front of him. The engine dies, the headlights go out, and the car rolls to a stop at the point where the light had been. Lacuesta feels numb and cannot move. Soon the headlights come on and the car starts up again, although it is in high gear and he has not touched the starter. He drives straight home. (Schopick, pp. 49–51)

November 29 — 2:30 a.m. Capt. Fred Sutton, skipper of the fishing trawler Ella Hewett, is 4 miles off Port Jack, Douglas, Isle of Man, when an orange ball of fire crosses the sky. As it passes over the hull of the small boat, the vessel grows luminous, with firefly-like sparks of luminescence everywhere. The fireball bursts like fireworks, seen by others on the island as well as Scotland. The crew notices that the white paint on the metal railings at the edge of the boat has disappeared, leaving only the red undercoating. At daybreak, however, the paintwork is perfectly normal again. (Jenny Randles, “Mysterious Island: The UFO Legacy of the Isle of Man,” IUR 29, no. 1 (Spring 2004): 13–14)

November 29 — Two German expatriates, G. R. Miczaika and Eberhart W. Wahl, form Project Space Track in Building 1535 of the Geophysics Research Directorate at the Air Force Cambridge Research Center at Hanscom AFB in Bedford, Massachusetts. Its mission is to track and compute orbits for all artificial earth satellites and space probes, including US and Soviet payloads, booster rockets, and debris. (Wikipedia, “Project Space Track”)

December — National Intelligence Estimate (NIE) 11-10-57 predicts that the Soviets will “probably have a first operational capability with up to 10 prototype ICBMs” at “sometime during the period from mid-1958 to mid-1959.” The numbers of the missile gap start to inflate. (Wikipedia, “Missile gap”)

December — A classified Canadian Department of National Defence memorandum states that the “RCAF has no official policy concerning the subject” of UFOs and “there has never been a serious investigation of any report on file” at RCAF headquarters. (Gregory M. Kanon, UFOs and the Canadian Government, Part One, no. 22 (1975): 22)

December — Several UFO sightings take place along the Finland-Russia border. A cigar-shaped object is seen by two Finnish farmers moving horizontally at a high altitude from west to east. (Good Above, pp. 307–308)

December — Walter K. Buhler launches the Sociedade Brasileira de Estudos sobre Discos Voadores in Rio de Janeiro, Brazil. It publishes the Boletim SBEDV through 1988. (Boletim SBEDV, no. 1 (December 1957))

December — Night. Edmund Rucker is awakened by a roaring noise in El Cajon, California, and watches a strange object land near his house. Its windows are lighted and he can see some strange-looking heads inside. An opening becomes visible, and four creatures emerge. They have large heads, dome-like foreheads, and bulging eyeballs. They deliver a message to Rucker in English, saying they have philanthropic and scientific purposes. (Patrick Gross, URECAT, July 28, 2007; Mark Cashman, “Behavioral Classification System for UFO Occupants,” IUR 24, no. 1 (Spring 1999): 19)

December — Keyhoe is invited to appear on the CBS Armstrong Circle Theater anthology drama TV program hosted by Douglas Edwards to talk about UFOs with Kenneth Arnold and Clarence S. Chiles. Others invited are Edward J. Ruppelt, Donald Menzel, and an Air Force representative. But Keyhoe finds out that it will not be a panel discussion but a scripted conversation, and he will only have 7 minutes. He is promised he will have final say over his part of the script, and he agrees. However, writer Irve Tunick cuts out critical portions of Keyhoe’s material (including references to the Estimate of the Situation and the Robertson Panel), saying it is too long. Ruppelt, Chiles, and Arnold soon withdraw from the program, expanding Keyhoe’s segment to 11 minutes. (Clark III 167–168)

December 1 — 1:30 a.m. Swissair pilot Walter Borner is flying a DC-6B at 18,000 feet over Ras El-Kanayis, Egypt, when he sees a “giant, red, burning cylinder falling down vertically, leaving a yellowish trail.” It is possible that this is
December 3 — 2:30 p.m. Z. Thad Fogl, radio officer of the SS Ramsey, claims to have taken a photo of a saucer off the coast of San Pedro, California. The photo appears in Flying Saucer Review in 1959 and Life in 1966. However, in 1967 Fogl admits that he had faked the photo using parts of plastic airplane models. (NICAP, “Disc with Landing Gear Photo / Fogl Case”; “Radio Officer’s Amazing Story: UFO Snapped from Ship,” Flying Saucer Review 5, no. 1 (Jan./Feb. 1959): 6–7; “A Hoax Exposed,” Flying Saucer Review 12, no. 5 (Sept./Oct. 1966): 7)

December 3 — 7:00 p.m. Many residents of the Menastash Ridge area of Ellensburg, Washington, watch a “strange ball of fire” for 20 minutes. A truck driver sees the light hovering above his truck, causing the motor to cough and sputter. His engine does not stop completely, however, so he drives away. The night is misty, but the object is so bright that it lights up the sky as if it were daytime. (Schopick, pp. 51–52)

December 4 — Blue Book Capt. George T. Gregory complains that as a result of pressure from the press and public, “Assistant Secretary of Defense requested that ATIC immediately submit a preliminary analysis to the press” of the Levelland, Texas, cases, even though he has “limited data.” (J. Allen Hynek, The UFO Experience, Ballantine ed., 1974, p. 147)

December 7 — 10:00 p.m. In western Victoria and eastern South Australia, witnesses see a moon-like object explode with a vivid flash. Unexpected blackouts are reported in the area. (Lorenzen, UFOs: The Whole Story, Signet, 1969, p. 87)

December 8 — 5:30 p.m. A disc-shaped UFO with a dome and three pads on the underside suddenly comes toward a car with three passengers at Woodward, Oklahoma. The car heater, wipers, and radio fail and finally the car stalls out as the UFO hovers overhead at 200 feet. It emits a high-pitched whining sound. It is over 50 feet in diameter and has portholes. The whine increases in pitch after about two minutes, and the UFO rises vertically out of sight. The headlights come on and the engine of the car starts by itself. The driver spends 4 hours with two officers from Kirtland AFB in New Mexico who tell him of similar observations. (Vallée, Magonia, pp. 267–268)

December 8 — 9:00 p.m. Eight people traveling together in two cars on Highway 17 between Coulee City and Soap Lake, Washington, see a huge, fiery object pass overhead from north to south. Both cars stall out and their headlights also fail as the UFO passes overhead. In addition, the inside dome lights come on, even though they aren’t turned on. The cars remain stalled until the object passes out of sight. Police say the object stalled as many as six cars along that sparsely traveled road. (Schopick, pp. 52–53)

December 11 — Night. Mexican pilot Gilberto Castillo del Valle is flying at 10,000 feet near Mexico City when a brilliant light illuminates his cockpit. He turns off the aircraft lights and sees a large luminous object darting from left to right and back again ahead of him. Passengers and crew also see the light, as do personnel at the Mexico City control tower. (Lorenzen, UFOs: The Whole Story, Signet, 1969, p. 88)

December 5 — Morning. An unidentified beeping sound is picked up for three minutes on KBR Rural Public Power Radio in Ainsworth, Nebraska, operating at 72.3 AM. (“Unidentified Beeping Heard on KBR Power Radio on Thursday,” Ainsworth (Neb.) Star-Journal, December 12, 1957, p. 1)

December 12 — 5:45 p.m. At least 13 witnesses see a bright light over the Sea of Japan. The object is tracked on radar and seen through binoculars. At 7:22 p.m., a scramble is ordered and two F-86D’s take off from Misawa Air Base, Japan. Multiple radar and visual sightings take place over the next three days. (NICAP, “Jets Scrambled after Radar/Visual UFO”; Sparks, p. 261)

December 14 — Night. Ed Waslashi sees a lighted green object fall into a haystack on his farm at Langdon, North Dakota. He picks out a strange metallic substance from the ashes of the burned hay. The material finds its way to geologist Nicholas N. Kohanowski at the University of North Dakota, who finds that it is light, porous, and mostly magnesium dioxide. (“What Is It?” Winona (Minn.) Daily News, December 17, 1957, p 1; Lorenzen, UFOs: The Whole Story, Signet, 1969, p. 87)
December 15 — 1:00–2:00 a.m. Three young men see a huge light in the sky at Almind, Denmark. It is oval-shaped, emits red or orange rays, and appears to be descending. They watch it for 18–19 minutes as it hovers at a 10° angle and quivers. Suddenly it becomes still and from its center emerge two small objects that drift away in a northerly direction and soon disappear. The large object lies on its side and quivers some more. Later it ascends and a fan-shaped tail of light spreads after it. The UFO is seen later along the coast and photographed. (“Flying Saucer Reports Pour in from Denmark,” Flying Saucer Review 4, no. 4 (July/Aug. 1958): 2; Herbert S. Taylor, “Satellite Objects: A Further Look,” I/R 29, no. 2 (Summer 2004): 25)

December 16 — Between 2:00 and 3:00 a.m. Mary M. Starr, a resident of Old Saybrook, Connecticut, and a former teacher with a master’s degree from Yale, is awakened by a bright light in her room. A cigar-shaped object, brightly lit and with square portholes, hovers just above her clothesline. She can see men inside. The object is approximately 20–30 feet long and dark gray or black in color, hovering motionless about 5 feet above the ground. Through its lighted windows Starr sees two figures that pass each other, walking in opposite directions. (Donald E. Keyhoe and Gordon I. R. Lore, eds, UFOs: A New Look, NICAP, 1969, pp. 27–28; Clark III 269)

December 17 — Skandinavisk UFO Information is founded in Denmark by Hans-Christian Petersen under the name Sydjysk UFO Information. It publishes the journal UFO-Nyt from 1958 to 2010. (Wikipedia, “Skandinavisk UFO Information”)

December 18 — Luis E. Corrales of Caracas, Venezuela, finds an odd luminous streak on a photographic plate recording the passage of Sputnik 2. It is a luminous trail running parallel to the satellite’s trail, then veering away. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1957 December, The Author, 1998, p. 57)

December 21 — 6:30 p.m. Yvonne Torres de Mendonça, her three small children, and a servant are traveling in a jeep driven by her mechanic, Marcio Gonçalves, towards Ponta Porã, Mato Grosso do Sul, Brazil, along the Paraguayan border. They see a large ball of light about the size of the full moon that starts moving toward them, and they realize that it is two lights flying silently side by side. The lights straddle the road, oscillating from one side to the other in a strange wobbling motion and spinning on their axes. One of them stops in mid-air and dives toward the ground in a falling-leaf motion 60 feet ahead of them, while the other maneuvers in circles around the jeep. The lights are spherical and encircled by a Saturn-like ring at the center. The upper hemisphere and rim are fiery red, while the lower hemisphere is silvery white. The two objects follow the jeep for 2 hours, all the way to town, maneuvering intelligently around them, especially when the jeep stops twice to evaluate the objects. (Olavo T. Fontes, “Shadow of the Unknown, Part II: UAOs Chase Cars,” APRO Bulletin, March 1959, pp. 3–6; Lorenzen, UFOs: The Whole Story, Signet, 1969, pp. 148–150; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1957 December, The Author, 1998, pp. 60–63; Clark III 245–246)

December 30 — Night. George Chowanski is cutting wood at his home in Schooley’s Mountain, New Jersey, when his two dogs begin to bark and howl. He hears a whirring noise like an electric shaver that persists for one minute. Then he sees a saucer-shaped object, 5 feet high and 15 feet wide, hovering about 2 feet above the ground in a grove of trees 100 feet from the back porch. Three individuals come out of the craft and walk about in the clearing. One of them bends over to pick something up and carries something heavy back to the object. After 2–3 minutes, it slowly rises, spiraling through the tall trees, and flies off. (Lorenzen, UFOs: The Whole Story, Signet, 1969, pp. 88–89)

1958

1958 — The Atomic Energy Commission puts a barbed wire fence around Area 13 at the Nellis Air Force Range, Nevada, where the Project 57 “dirty bomb” had been detonated in April 1957, with signs indicating “do not enter / nuclear material.” (Jacobsen, Area 51, p. 297)

1958 — Project Orion, an effort to build a nuclear-powered spacecraft, begins at a maximum-security facility in Area 25 of the Nevada Test Site. Led by Ted Taylor of General Atomics and physicist Freeman Dyson, its initial focus is to send astronauts to Mars and back. The spaceship would be 16 stories tall and piloted by 150 men. Soon ARPA and the Air Force take over the project and redesign it for a space-based battleship that could launch nuclear missiles from space. But no one builds Orion and it is effectively disbanded by the 1963 nuclear test ban. (Wikipedia, “Project Orion (nuclear propulsion”); Jacobsen, Area 51, pp. 304–305)

1958 — French ufologist Aimé Michel publishes Flying Saucers and the Straight-Line Mystery, an examination of the UFO wave of September–October 1954 in France. The book’s preface is written by Gen. Lionel-Max Chassign, in which he expresses his opinion that UFOs are genuinely mysterious (“That strange things have been seen is now
January — The US Senate Committee on Government Operations asks to meet with representatives from the Secretary of the Air Force Office of Legislative Action to discuss the possibility of holding open hearings on the Air Force UFO program. USAF fears “uncontrolled publicity,” but agrees to go along with it. Soon, however, Richard E. Horner, USAF assistant secretary for research and development, persuades the committee’s chief counsel, Donald O’Donnell, that hearings are “not in the best interest of the air force,” nor necessary for national security. Horner says Project Blue Book has things well in hand, and he tells Sen. Barry Goldwater (R-Ariz.) that allegations about the Air Force withholding information are “entirely in error.” People who report UFOs simply want confidentiality, and the Air Force respects that. (Jacobs, UFO Controversy in America, Signet ed., 1976, pp. 140–141, 144)

January — Lackland AFB in San Antonio, Texas, asks for Keyhoe’s permission to use The Flying Saucer Conspiracy to develop a script for closed-circuit broadcast at the base. Keyhoe agrees. (Keyhoe, FSTS, p. 218)

January — 1:30 a.m. A woman is driving along the New York State Thruway near Niagara Falls, New York, when she sees an illuminated 50-foot pole in the center parkway ahead. It seems to be retracting and getting shorter. As she closes in on it, her engine stops and the headlights go out. The pole is attached to a saucer-shaped object, and she sees shadowy figures floating around it. The UFO rises and moves away, and she starts the car again. An area of snow a foot in diameter has melted dry where the pole has been. (Michael D. Swords, “Messing Around with the Force,” IUR 31, no. 4 (Mar. 2008): 16)

January 3 — Cliff DeLacey, a 23-year-old college student from Vallejo, California, shoots 90 seconds of film of UFOs at Diamond Head, Hawaii. DeLacey sees nine UFOs flashing across the sky and immediately grabs his camera. He is careful enough to shoot the tops of nearby trees, allowing a reference to the height and relative speed of the unknown objects. The objects appear to be about 3–4 miles away from the camera, flying at an altitude of 7,000–8,000 feet, and moving at a speed slightly greater than that of a jet. The silvery globules appear to be no more than 20 feet in diameter. They are spherical, and no tail fins or protrusions of any kind are visible. The film, in color, is said to be clear and to show at least two of the nine UFOs in considerable detail. (NICAP, “Genuine Flying Saucer…Caught on Movie Film”; Max B. Miller and Norman S. Kossuth, “How to Film Unidentified Flying Objects,” Saucers 6, no. 3 (Autumn 1958): 8)

1958 — Trevor James Constable writes They Live in the Sky, which explains UFOs as ethereal (good) and astral (bad) entities that are engaged in a battle for control of earthly minds. He bases this on his analysis of occult texts and channeled communications from cosmic informant Ashtar. The astral entities are based inside the earth, but they can leave it through an opening in the South Pole and fly 125,000 miles into space. Only the atomic bomb can penetrate the astral realm, which is why astrals disguised as benevolent Space Brothers argue fervently for nuclear disarmament. The men in black are reincarnated versions of Richard Shaver’s deros. (Trevor James [Constable], They Live in the Sky, New Age, 1958; Trevor James [Constable], “Scientists, Contactees, and Equilibrium,” Flying Saucer Review 6, no. 1 (Jan./Feb. 1960): 19–21; Clark III 1102)

1958 — Night. A sergeant in charge of a fire truck crash crew at an air base in South Korea is positioned near the runway awaiting an emergency landing by an American jet fighter low on fuel. The men see a bright light approaching from across the Yellow Sea. It grows bigger and, within several hundred yards of the shore, stops and hovers. The control tower operators, watching the object through binoculars, do not know what it is. Suddenly the object shines a beam of light straight down on the water. It soon goes out, but the water remains luminescent for a while before fading out. The object again shines a light on the water and turns it off a minute or so later. By this time, the jet that is low on fuel is landing. A second jet is asked to check out the object, which instantly shoots back and center parkway ahead. It seems to be retracting and getting shorter. As she engine stops and the headlights go out. The pole is attached to a saucer-shaped object, and she sees shadowy figures floating around it. The UFO rises and moves away, and she starts the car again. An area of snow a foot in diameter has melted dry where the pole has been. (Michael D. Swords, “Messing Around with the Force,” IUR 31, no. 4 (Mar. 2008): 16)
January 10 — Day. Capt. Chrysólogo Rocha is sitting with his wife on the porch of a house in Guarujá, São Paulo, Brazil, overlooking the South Atlantic. He is trying to focus with his binoculars on what appears to be a small island. When he does get focused, he realizes the island is getting bigger and is in two parts, both a clear, gray color. One part is in the sea, while the other seems suspended above it. Without warning, both parts suddenly sink out of sight. Shortly afterwards, a steamer comes into view, on a course that will take it very close to the object. About 15 minutes later, when the ship is out of sight, the object again rises slowly out of the sea. He now sees clearly that the two parts are joined by several narrow upright shafts or tubes that are bright and visible to the naked eye. These shafts, “like beads on a necklace” pass in a “disorderly and simultaneous movement.” Shortly afterwards the two parts of the object close up again, and it disappears below the waves. Probably an inferior mirage of an island in combination with a towering effect. (Charles Bowen, “A South American Trio,” Flying Saucer Review 11, no. 1 (Jan./Feb. 1965): 20–21; Wim van Utrecht, “A UFO Dives in and Out of the Ocean,” Caelstra)

January 13 — 11:45 p.m. Brian Crittenden sees a dome-shaped light with a long narrow light underneath coming directly towards him as he is leaving a friend’s house southwest of Casino, New South Wales, Australia. He jumps into his car and heads home. The UFO chases his car along Benns Road, practically touching the telephone poles. His car radio develops interference while the UFO approaches him. It follows him all the way to town, 7 miles away. (Schopick, p. 81; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1958 January–February, The Author, 1998, p. 21)

January 16 — Around 12:00 noon. As the International Geophysical Year research ship Almirante Saldanha is anchored on the south side of Ilha da Trindade, Brazil, 730 miles off the coast in the Atlantic Ocean, the commander and many crew members, including photographer Almiro Baraúna, see a Saturn-shaped object maneuvering over the island. It reportedly comes toward the island from the east, flies towards the Pico Desejado, makes a steep turn, and goes away very quickly to the northwest. Baraúna takes four photos with a Rolleiflex 2.8 model E. Commander Paulo Moreira da Silva of the Brazilian Navy Hydrography and Navigation Department (who technically outranks the ship’s captain, José Santos de Saldanha da Guma), is apparently an eyewitness and states, “the object was encircled by a greenish glow, our [meteorological] balloon was of a red color.” Baraúna is officially there to take photos of the island, underwater photos, photos of the IGY activities, and the ship’s operations. The radar detection of an unexplained supersonic target reportedly occurs the day before, at about 12:05 p.m. There is a power failure on the ship when the object is seen; the power returns upon the object’s departure. Instruments like radio transmitters and apparatus with magnetic needles cease operating while the flying object remains in the island’s proximity. Willy Smith’s April 20, 1983, interview of Baraúna takes on more significance: “I asked if the object had been detected by ship’s radar. He [Baraúna] replied that it hadn’t because all the electrical power aboard ship was out at the time. He was sure of the reality of the power outage because just before the object appeared a launch was being hauled up from the water by electric pulley, and it stopped midway just as the UFO appeared!” The ship’s log is provably incomplete since it does not even mention the UFO photo incident. A 1999 analysis by Martin J. Powell seems to indicate that the object photographed is an airplane, distorted by Baraúna through a double-exposure process. In August 2010, a major TV show in Brazil airs information stating that the original photographer had made hoax photographs in the past. (Wikipedia, “Trindade Island UFO hoax”; Wikipedia, “Caso da Ilha da Trindade”; NICAP, “Trindade Island Photo (E-M, Radar, AR) Case”;

January 22 — The “UFO: The Enigma of the Skies” segment of Armstrong Circle Theater airs on CBS. USAF Reserve Lt. Col. Spencer Whedon from ATIC says all UFOs are explainable. Keyhoe comes on and starts reading his script for a few minutes, then shocks everyone by deviating from it, saying “And now, Mr. Edwards, I would like to make a disclosure, something which has never been revealed to the public. For the last six months our committee has been working with a Senate committee which is investigating official secrecy on UFOs. If the
February 3 — Capt. G. H. Oldenburgh, public information officer at Langley AFB, Virginia, writes to a NICAP member who has been denied a request to place an ad in the base newspaper asking for UFO reports: “I felt it would encourage Air Force personnel to violate present Air Force policy and specifically AF Regulation 200-2.” (Frank Edwards, FS Serious Business, Bantam ed., 1966, p. 51)

January 26 — 4:00 p.m. Some chemical workers at Shimada, Japan, see a bright object land and claim that beings fell from the sky without parachutes. They wear strange suits and speak an unknown language. (“They Are Landing in Japan, Too,” Flying Saucer Review 4, no. 3 (May/June 1958): 33)

January 28 — Hillenkoetter announces that “two committees on Capitol Hill” are investigating the UFO controversy. Rep. William Hanes Ayres (R-Ohio) writes a letter to constituent Melvin V. Knapp, saying that “Congressional investigations have been held and are still being held on the problem of unidentified flying objects (UFO’s). Since most of the material presented to the committees is classified, the hearings are never printed. When conclusions are reached, they will be released if possible.” (“Flying Saucer Proof Clouded by Air Force, Private Probers Say,” Rochester (N.Y.) Democrat and Chronicle, August 3, 1958, p. 8; UFOEv, p. 173)

January 30 — 11:45 p.m. Attorney José Valencia Dongo, his wife, and their nephew feel an electric shock as they are driving between Arequipa and Lima, Peru, at a point (roughly around the Yauca District) along the Pan American Highway 220 miles northwest of Arequipa. Several seconds later the headlights and engine of their car fail. They then see an inverted mushroom-shaped object, about 15 feet in diameter, descending from the sky. It hovers for about 8 minutes at a 150-foot altitude, glowing red. A truck and bus are also affected. (Civilian Saucer Intelligence, “Shapes in the Sky,” Fantastic Universe, 10, no. 4 (October 1958): 111; Charles A. Maney and Richard Hall, The Challenge of Unidentified Flying Objects, NICAP, 1961, p. 82; Schopick, pp. 58–59; Mark Rodeghier, UFO Reports Involving Vehicle Interference, CUFOS, 1981, p. 14)

January 31 — A meeting is held in the office of Assistant Secretary of the Air Force Richard E. Horner under the auspices of the Subcommittee on Investigations of the Senate Committee on Government Operations, even though Sen. John L. McClellan (D-Ark.) and other senators are absent. The Air Force is represented by Maj. James F. Byrne, Maj. Joseph E. Boland, and Maj. Lawrence J. Tacker who meet with the subcommittee’s FBI liaisons. Tacker declares that USAF does not want a congressional investigation, and the McClellan effort dies immediately. (Swords 275)

January 31 — 10:48 p.m. The US launches its first satellite, Explorer 1, from Cape Canaveral Missile Annex, Florida. It is the first spacecraft to detect the Van Allen radiation belt. (Wikipedia, “Explorer 1”)

February — Keyhoe meets again with Rep. James C. Healey and tells him that the Armstrong Circle Theater incident was Air Force censorship. A few days later, Healey tells Keyhoe that the Air Force is claiming that the program proves “there are no such things as flying saucers.” Keyhoe gives Healey the facts about the 1956 Ryan case pointing to USAF ordering a commercial flight to pursue UFOs, citing the Meet the Millers tape from April 16, 1956, which he has obtained. He offers to get the committee a transcript. (Keyhoe, FSTS, pp. 166–167, 182–184)

February 2 — An elliptical UFO with two porthole-like markings is seen somewhere in New South Wales, Australia. (UFOEv, p. 137)

February 3 — OTC Enterprises runs a two-page ad in a Baltimore, Maryland, newspaper and distributes a well-printed brochure announcing that Otis T. Carr has approached the US government and offered to build it a working spacecraft called the OTC-X1—circular, 45 feet in diameter and 15 feet high—for $20 million. He sets a date of December 7, 1959, to take a three-man crew on the spacecraft on a round trip to the Moon. Some press accounts treat Carr as if he is a real scientist. (Clark III 860)
February 5 — The Air Force revises AFR 200-2 and recreates the system of air base commanders conducting initial investigations of sightings in their areas. It also continues ATIC’s responsibility to “reduce the percentage of unidentifieds to the minimum.” (Department of the Air Force, “Intelligence: Unidentified Flying Objects (UFO),” Air Force Regulation 200-2, February 5, 1958; Department of the Air Force, “Intelligence: Unidentified Flying Objects (UFO),” Air Force Regulation 200-2A, July 3, 1958)

February 7 — In response to the launching of Sputnik, President Eisenhower creates the Advanced Research Projects Agency and houses it in the Pentagon. (Wikipedia, “DARPA”)

February 17 — Evening. Flora Evans and Bernice McIntosh twice encounter an intensely brilliant orange light about 15 feet in diameter that sends out peculiar grid-like or diamond-shaped patterns and lights up a canyon northeast of Alcalde, New Mexico, along State Highway 68. The two women are temporarily blinded. Their trip home to Albuquerque inexplicably takes 4 hours instead of the normal 2 hours. Both witnesses are exhausted and have burned or reddened areas on their skin, some on their kneecaps and the back of their lower legs, even though they have not left the car. Evans has a reddened area shaped like a triangle on her back. An acquaintance, Paul Boyett, has a Geiger counter, with which he gets a high radiation count from both women on February 19. The next day Evans, who is working in some capacity in civil defense, goes to her doctor at the Lovelace Clinic in Albuquerque, New Mexico, along State Highway 68.

February 28 — USAF Director of Information Gen. Arno H. Luehman naively inquires of the McClellan Senate subcommittee whether, based on its “preliminary informal investigation,” it would state that the Air Force is investigating UFOs and not withholding information. (Swords 275)

February 28 — Brig. Gen. João Adil Oliveira, chief of the Brazilian Air Force’s General Staff information service, tells O Globo that the UFO phenomenon is a “fact confirmed by material evidence. There are thousands of documents, photos, and sighting evidence demonstrating its existence.” (Good Need, p. 233)

February 28 — Police detective Faustin Gallegos and his wife Dorothy see something like a “large medicine ball” descend and land in their back yard in Miami, Florida. Outside, he sees a football-shaped object 20 inches long and 8 inches high, lined with “thousands of minute cells resembling those of a honeycomb. It is clear and pulsating. He touches it and his fingers leave marks. They put it in a jar, but it evaporates on the way to the police station. (Faustin Gallegos, “The Pulsing Honeycomb from Space,” Fate 11, no. 9 (September 1958): 40–43; Clark III 1102)

March — The Air Force releases parts of the 1953 Robertson Panel report, a mere three paragraphs recommending that “the national security agencies take immediate steps to strip the Unidentified Flying Objects of the special status they have been given and the aura of mystery they have unfortunately acquired.” (“CIA Evades, Then Denies Charge of Attempted UFO Censorship,” UFO Investigator 1, no. 4 (June 1958): 4)
March — A French Foreign Legionnaire on sentry duty at Bouamama, near Sidi Chami, Algeria, hears a whistling noise and sees an enormous, elliptical-shaped object descend and hover 115–131 feet above the ground 165 feet away. The object is surrounded by pale green light, and a relaxing emerald-green beam of light is coming from its base to the ground. Seemingly paralyzed, he stares at the object for 45–50 minutes. The noise returns, the object rises gently, and flies off at tremendous speed. (Joël Mesnard, “TRANQUILLIZING VISITATION AT BOUAMAMA: AN ALGERIAN REPORT OF 1958,” Flying Saucer Review 19, no. 3 (May/June 1973): 17–18)

March 2 — The Brazilian Navy, after an analysis of the January 16 Ilha da Trindade sighting and photos, offers an ambiguous conclusion: “the existence of personal testimonies and of a photographer, of some value given the circumstances involved permit the admission that there are indications of the existence of the UFO.” (Brazil Department of the Navy, “Clarification of the Observation of Unidentified Flying Objects Sighted on the Island of Trinidad, in the Period of 12/5/57 to 1/16/58,” March 2, 1958)

March 3 — Gen. Joe W. Kelly responds to Luehman, falsely stating that the Air Force has done “considerable work” with the McCellan subcommittee. (Swords 275–276)

March 8 — A USAF radar site in Korea tracks a UFO slowly descending from 77,000 to 25,000 feet. (UFOEv, p. 80)

March 8 — Keyhoe appears on ABC’s The Mike Wallace Interview and mentions the Estimate of the Situation, Fournet’s motion study, and the CIA Robertson Panel. Wallace surprises him by saying Assistant Secretary of the Air Force Richard E. Horner told his producers that the Senate Committee “show no interest in any hearings.” This is news to Keyhoe. Wallace also quotes from the Robertson Panel summary that was just released. A few days later, Keyhoe receives two letters from the Senate Committee confirming that it “does not intend to investigate the United States Air Force.” (“MAJOR DONALD KEYHOE INTERVIEWED BY MIKE WALLACE (1958),” pfreal1 YouTube channel, August 25, 2012; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1958 March–April, The Author. 1998. p. 9; Keyhoe, FSTS, pp. 189–190; Swords 272–273; “MIKE WALLACE INTERVIEW OF MAJ. DONALD E. KEYHOE: A SEQUEL TO THE ARMSTRONG CIRCLE THEATER,” Journal of UFO History 2, no. 1 (March/April 2005): 8–11)

Late March — NICAP begins a new campaign to open another government UFO investigation. This time it approaches the Department of Justice, the National Security Council, the CIA, and the US Army. It receives rebuffs and denials. (Keyhoe, FSTS, p. 191)

April — Edgar Sievers begins publishing a pro-Adamski newsletter titled Approach in Pretoria, South Africa. It folds in March 1960. (Approach 1, no. 1 (April 1958))

April — 6:00 a.m. At some place along the Brazilian coast between Maceió and Paripueira, Alagoas, Brazil, Wilson Lustosa stops to ask some fishermen what they are looking at. He hears a humming sound and sees a disc-shaped object hovering about 50 feet above the ocean and 120 feet away. It has a small lighted dome on top and a band of square portholes around its midsection through which a red light is shining. Under the UFO the water seems disturbed. The object is visible for an hour. (Gordon W. Creighton, “A BRAZILIAN SIGHTING,” Flying Saucer Review 10, no. 6 (Nov./Dec. 1964): 18)

Early April — Night. A 2-foot red blinking light frightens children over the Walnut housing area in Ellwood City, Pennsylvania. Police officers Joseph Scala and Emanuel Mavero investigate and watch the bright disc for 10 minutes. Their police radio malfunctions. They try to get closer, but it disappears when they get to the top of a hill. (C. W. Fitch, “MONITORING AND SCANNING DISCS,” APRO Bulletin, September 1964, p. 5)

April 9 — A family in Cleveland, Ohio, sees a flight of nine UFOs that suddenly separates into two groups of four and five objects. (UFOEv, p. 15)

April 9 — 7:15 p.m. Mr. and Mrs. B. Mills are driving on St. Vincent Street in Nelson, New Zealand, when they see a bright-red triangular object with white lights around its perimeter. It is descending from the northeast at a 45° angle and moving across Tasman Bay. They see the object again, somewhat dimmer, around 8:00 p.m. from a friend’s house on Matipo Terrace. (“TRIANGULAR OBJECT OVER NEW ZEALAND,” Flying Saucer Review 4, no. 4 (July/Aug. 1958): 6)

April 10 — A Danish fighter pilot reports seeing a formation of UFOs. They are also tracked on radar at Skrydstrup Airport in Vojens, Denmark. The pilot attempts to overtake them, but they accelerate and disappear. The commander of Fighter Wing Skrydstrup appeals to the public to report any UFOs. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1958 March–April, The Author, 1998, p. 69)

April 13 — 9:40 p.m. Lester Billheimer and Carl Kern watch an object shaped like a “solid right angle” glowing like a white neon light over Allentown, Pennsylvania. It travels northwest at first, then turns west and disappears after three seconds. (NICAP case file)

April 15 — Day. A witness in Broager, Denmark, sees a large, black, low-flying, triangular object. As it flies over town, a number of horseshoe-shaped objects emerge, emitting a strong light. Twenty other witnesses see a triangular

April 25 — The officer for UFO investigation in Denmark, Lt. Col. Hans-Christian Petersen, tells the magazine *B-T* that multiple-witness sightings are commonplace and that the current Danish wave is comparable to that of the US 1952 wave. “Nothing is gained by rejecting all the accounts as fantasy,” he tells reporters. Petersen has founded the Skandinavisk UFO Information group in December with five other Danish military jet pilots. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1958 March–April*, The Author, 1998, pp. 97–99)

May 4 — Dewey Fournet confirms, in a statement to NICAP, the existence of the Estimate of the Situation and his own motion study from 1952. (UFOEv, p. 110; Swords 509)

May 5 — 3:40 p.m. Experienced pilot Carlos Alejo Rodriguez is flying his Piper Cub in the vicinity of Capitán de Corbeta Naval Air Base [now part of Capitán de Corbeta Carlos A. Curbelo International Airport] near San Carlos, Uruguay, when a brilliant top-like object (symmetrical above and below) suddenly approaches his plane head-on. The UFO is about 45–60 feet in diameter, stops about 6,500 feet away and “rocked twice, in a balancing motion.” Rodriguez feels strong heat, so he removes his jacket and opens the aircraft windows. The UFO takes off abruptly toward the sea “at a fantastic speed,” leaving a thin vapor trail. (NICAP, “Top-Like Object Heats Up Piper Cub”; UFOEv, p. 120; Donald E. Keyhoe and Gordon I. R. Lore Jr., *Strange Effects from UFOs*, NICAP, 1969, p. 16)

May 6 — In a letter to NICAP member George Stocking of St. Petersburg, Florida, Ruppell says he is “now convinced that the reports of UFO’s are nothing more than reports of balloons, aircraft, astronomical phenomena, etc. I don’t believe they are anything from outer space.” (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1958 May–July*, The Author, 1999, p. 5)

May 7 — Keyhoe’s friend Lou Corbin has received from a military friend of Gen. Nathan Twining news that Twining is still concerned about UFOs. Keyhoe writes to him and receives a note from Twining’s executive officer, Col. James C. Sherrill: “No effective means have been developed for the establishment of communication by radio or otherwise with unknown aerial objects. The technical obstacles involved in such an endeavor, I am sure, are quite obvious to you.” (Keyhoe, FSTS, pp. 198–199)

May 13 — 12:15 p.m. A Royal Canadian Air Force Dakota DC-3 is flying to RCAF Station Cold Lake, Alberta, from Victoria, British Columbia. When it changes its heading about 25 miles southwest of Calgary, Alberta, a large, thick, black cloud suddenly appears directly across their flight path at the same altitude. Their VHF communications with Cold Lake and Calgary suddenly cease working. The cloud has indistinct, hazy edges, and it increases in size as they approach at about 155 mph. The pilot unsuccessfully tries to radio Calgary to request a flight path change to avoid the cloud, which is now about 10 miles away. Suddenly he sees a brilliant white pinpoint of light materialize in the dark mass. It grows in size, forming a brilliant ball that quickly approaches the aircraft on a collision course. He braces himself, but the light disappears, and the black cloud vanishes. (Don Ledger, “Two Spherical UAP Cases Witnessed by Pilots in Canadian Airspace,” *IUR* 33, no. 2 (July 2010): 7–9)

May 15 — The Soviets launch Sputnik 3 from Baikonur Cosmodrome in Kazakhstan. (Wikipedia, “Sputnik 3”)

May 15 — Lackland AFB’s chief of education planning for the officer candidate school, Maj. Warren Akin, suggests, at a meeting of the Junior Chamber of Commerce in San Antonio, Texas, that UFOs are spacecraft. (“Visitors from Outer Space Already May Have Visited Us, Major Says,” *San Antonio (Tex.) Express*, May 16, 1958, p. 2)

Summer — At an unidentified Air Force base in the Southwest US, two jets are vectored in on two UFOs flying together as seen on radar. As the jets close in, one UFO disappears from the radarscope and quickly reappears behind the first jet. The first pilot reverses his course and again tries to close in. The UFO climbs out of range. The second pilot has the same difficulty with the other UFO. (“UFO Chase by AF Jets Revealed to NICAP,” *UFO Investigator* 1, no. 8 (June 1959): 7)
Summer — Evening. A mechanic at Holloman AFB, New Mexico, allegedly sees a disc-like craft hovering silently above the tarmac. As the object retracts its landing gear, he manages to alert another mechanic in time for them both to see it take off at high speed. The Air Force officers who interrogate them tell them the object was also seen by control tower operators. (Good Need, p. 223)

June — A USAF officer secretly meets with Keyhoe and gives him three UFO reports and warns him that the Air Force will ask him for “certain UFO information. Think it over carefully before you decide.” NICAP could be in trouble, he says. Two days later, NICAP receives a request from the Air Force requesting any cases that indicate intelligent maneuvers by UFOs. Keyhoe refuses the request, sensing a setup. (Keyhoe, FSTS, pp. 199, 232–233)

June — Richard H. Hall joins NICAP as executive secretary and associate editor. (Keyhoe, FSTS, pp. 30, 208)

June — Lackland AFB in San Antonio, Texas, has prepared a 17-page TV script based on a straightforward interpretation of Keyhoe’s The Flying Saucer Conspiracy, even including the 1953 Moncla case. The script states that “the most logical explanation is that the saucers are interplanetary.” It also says that USAF has “concealed information which was thought to be of danger because of the impending possibility of hysteria and panic.” Keyhoe approves the script, but Lackland withdraws it from consideration by December. (Keyhoe, FSTS, pp. 219–227)

June — 4:00 a.m. A woman doctor at a resort at Sinaia, Romania, sees a silvery domed disc traveling slowly and silently toward the southeast at 1,500 feet. On its underside it has a bluish triangular section with rounded points. It passes within 900 feet of her hotel. (Hobana and Weverbergh 159–160)

June — 9:00 p.m. B. Muratov and his father are returning home to Chimbay, Uzbekistan, after a fishing expedition to the Aral Sea. They notice a disc-shaped object approaching them directly at low altitude from the northeast. It flies over them and see that its diameter is about 82 feet and it is traveling at 150–180 mph. Its hull is shiny and one side shines with a red color. A pipe is attached to one side, and it gives off a steady “zing zing zing” sound. (Stonehill and Mantle, Russia’s USO Secrets, Flying Disk, 2020, p. 123)

June 1 — 11:15 a.m. Bjorn Taraldsen, Nils M. Turi, Kate Julsen, and Rasmus Hykkerud watch a silent “unknown aircraft” like a twin-engine, delta-wing jet with no identifying marks plunge into the Altafjord, Troms og Finnmark, Norway. A column of water rises up, and dead fish float to the surface. The frigate KNM Arendal and the submarine KNM Sarpen, along with divers, search fruitlessly for more than a week, although the Arendal does get a sonar reading of a mobile object. (Ole Jonny Brænne, “Observations of Unidentified Submarine Objects in Norway,” IUR 20, no. 1 (Jan./Feb. 1995): 12)

June 3 — Physicist Freeman Dyson in Princeton, New Jersey, writes a speculative paper on “The Search for Artificial Stellar Sources of Infrared Radiation” in which he discusses how an advanced civilization might be visible from Earth. He suggests that the logical endpoint of the drive to capture as much energy from a sun would be for engineers to completely enclose it in a hollow sphere. Once the builders have completed it, the only light visible from their star would be the muted infrared glow of radiation heat. Such a structure, which becomes known as a “Dyson sphere,” would be a sure sign of an advanced race. (Freeman J. Dyson, “Search for Artificial Stellar Sources of Infrared Radiation,” Science 131 (1960): 1667–1668; Wikipedia, “Dyson sphere”)

June 6 — Keyhoe writes to NICAP member George Stocking saying that Ruppelt has a job at an aircraft company that might be playing it safe about UFOs. (Clark III 1023)

June 10 — MP George Chetwynd in the UK House of Commons asks the Air Ministry how many instances of UFOs were reported in the past 12 months and what steps were taken to look into them. Under-Secretary of State for Air Ian Orr-Ewing replies that 54 reports were received and that most were meteors, balloons, aircraft, and satellites. (“Unsatisfactory Answer to M.P.’s Question on UFOs by Undersecretary for Air,” Flying Saucer Review 4, no. 4 (July/Aug. 1958): 5; Good Above, p. 51)

June 25 — 8:05 p.m. Rádio Renascença in Lisbon, Portugal, broadcasts a Portuguese-language version of The War of the Worlds with only the names of characters and places changed. The Martians are supposedly landing in Caracavelos, Portugal. A certain amount of confusion results. (John Gosling, Waging the War of the Worlds, McFarland, 2009, pp. 120–129)

June 26 — The New York sector becomes the first operational component of the Semi-Automatic Ground Environment, a system of large computers that coordinates data from many radar sites and processes it to produce a single unified image of airspace over a wide area. SAGE directs and controls the NORAD response to a Soviet air attack,
operating in this role from the late 1950s into the 1980s. Its enormous computers and huge displays remain a part of Cold War lore. (Wikipedia, “Semi-Automatic Ground Environment”)

June 28 — Otis T. Carr and Norman Evans Colton appear on the Long John Nebel show on WOR-AM in New York City. After Carr praises his mentor, Nikola Tesla, another guest asks Carr to enumerate one or two of his discoveries. Carr feigns a memory lapse, then later is unable to recite even one of Newton’s three laws of motion. (Clark III 860)

June 28–29 — Lee Childers Jr., a baker from Detroit, Michigan, speaks at a flying saucer convention near Mountain View, Missouri, in the Ozarks hosted by contactee Buck Nelson. He claims that since April 1955 he has made 21 trips to other planets (and even to “Wolf Star 359 in the Titanian system” that has 2 planets revolving around it) on a saucer piloted by a spaceman named Commander Marcosan. He also went to a space station 2,000 miles in diameter called Trijanon. Other people tell their personal fantastic stories, among them Wayne Aho and Buck Nelson himself. (“Out-of-This-World Ozark Convention,” St. Louis Post-Dispatch, July 6, 1958, p. 71; Clark III 915)

June 29 — Day. Former RAF Flight Engineer Peter Spencer is flying in an Auster aircraft piloted by Dennis Jackson at 800 feet near the docks at Grimsby, Lincolnshire, England. A large black dumbbell appears below them, flying against the wind. Suddenly it rises up to their height and flies along with them for a while at their speed. Then it accelerates in a terrific burst of speed to a position above them. They try to follow it, but it speeds out over the docks at 1,000 feet and 800 mph. Spencer manages to take three photos of it, but the images show a speed blur. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1958, May–July, The Author, 1999, p. 59)

July — President Dwight Eisenhower requests permission from Pakistan to establish a secret US intelligence facility at Badaber (Peshawar Air Station) to fly U-2 reconnaissance missions over the Soviet Union. (Wikipedia, “1960 U-2 incident”)

July — Dusk. Michael D. Swords and his brother Tom are at home in St. Albans, West Virginia, and listening to WCHS-AM radio where someone is calling in a UFO report. They rush to a window and see a domed disc with a revolving top cruise quietly across the landscape. (Michael D. Swords, “We Know Where You Live,” IUR 30, no. 2 (January 2006): 12; Michael D. Swords)

July — Night. A 509th Refueling Mission is returning to an Air Force Base in New Hampshire [Pease AFB in Portsmouth?] from Goose Bay [now CFB Goose Bay], Labrador. The crew is flying a KC-97 at about 17,000–18,000 feet. A light like a “moving star” appears. It approaches below the cloud cover and seems to be spherical and as bright as Venus. It soon becomes the apparent size of the Moon, lighting up the clouds above it. The light is a brilliant blue-white with two dark spots, possibly indicating a structure. The object angles upwards and speeds out of sight in 5 seconds. (Michael D. Swords, GrassRoots UFOs: Case Reports from the Tisserman Files, Fund for UFO Research, 2005, pp. 24–25)

July–September — A civilian in Washington, D.C., manages to repeatedly photograph “geometrically shaped flying objects as they passed between his telescope and the moon.” The photos are “remarkably clear and certainly indicated a phenomenon for which he had no ready explanation.” The writer of an October 1 memo, a CIA employee, requests advice on “how we might get our hands on these materials to examine them firsthand and to make a more complete analysis of them.” (ClearIntent, pp. 136–137)

July 17 — Keyhoe writes to Ruppelt to say he is puzzled about his current stance on UFOs, but understands that he might be under pressure from the Air Force. (Michael Hall and Wendy Connors, “The Forgotten Correspondence of Edward J. Ruppelt: The Story behind Report on Unidentified Flying Objects,” pp. 15–16)

July 18 — 8:30 p.m. High-school student Chris Kauffman is gazing at the night sky in Albuquerque, New Mexico, when he sees an object shaped like an equilateral triangle pass directly overhead in a north to south direction at 70–100 mph and 1,000 feet altitude for 10 seconds. It is flying with one point of the triangle as a forward edge and has 12 small orange lights along its edges. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1958, May–July, The Author, 1999, pp. 76–77)

July 29 — The National Aeronautics and Space Administration succeeds the National Advisory Committee on Aeronautics. The new agency is to have a distinctly civilian orientation, encouraging peaceful applications in space science. (Wikipedia, “NASA”)

July 30 — Ruppelt writes Keyhoe back, saying he has “always been convinced that UFO’s were nothing more than reports of balloons, aircraft, atmospheric phenomena, etc.” He says he is not being intimidated, he is just not interested in UFOs anymore and too busy. (Michael Hall and Wendy Connors, “The Forgotten Correspondence of Edward J. Ruppelt: The Story behind Report on Unidentified Flying Objects,” p. 16)

July 30 — MP George Chetwynd presses further questions in the UK House of Commons by asking the Secretary of State for Air George Ward what action is taken to identify unexplained UFOs. Ward replies that the unidentified reports are “not sufficiently precise.” (“More Questions in House of Commons,” Flying Saucer Review 4, no. 5 (Sept./Oct. 1958): iv; Good Above, pp. 51–52)

August — Polish Air Force pilot Apoloniusz Czernów of the 3rd Fighter Regiment in Warsaw, is returning from an attempted balloon interception in the area around Świdnica, Poland. Flying at 26,000 feet, he sees another possible balloon 9 miles away at a height of 3,200 feet and turns his MiG-17 toward it. But when he approaches it, he sees it is a cigar-shaped object tilted at a 45° angle, silvery-orange in color, and pulsating with a weird light. He gets closer and the object ascends at high speed, heads north, changes to orange-red, and disappears. Base radar has detected nothing. (Poland 63–64)

August 1 — The Teak thermonuclear test, part of Operation Hardtack I, is launched from Johnston Atoll in the North Pacific Ocean and carries a payload of 3.8 megatons. The warhead is carried on a Redstone missile, which has a “program failure,” causing it to go straight up and detonate directly above the island. In a sanitized film record of the event, men in flip-flops and shorts can be seen ducking for cover as a phenomenal fireball consumes the sky overhead. During the Teak test, all crew on and around Johnston Atoll are given protective eyewear to prevent flash blindness from the explosion. Besides the hazard of blindness, thermal radiation is another concern—even at an altitude of 50 miles. A crew member on Johnston at the time is said to have received a slight sunburn from the amount of thermal radiation that had reached the island. While only slight to the crew member, it creates issues for the local fauna. Many birds are seen in distress. Unsure if this is caused by blindness or thermal radiation, the project members decide to take precautions to protect local wildlife during the next test. The explosion can be seen from Hawaii 806 miles away and is said to be visible for almost half an hour. After the explosion, high-frequency, long-distance communication is interrupted across the Pacific. Due to this failure, Johnston Atoll personnel are unable to contact their superiors to advise of the test results until about 8 hours after the detonation. The detonation disturbs Wernher Von Braun so greatly that he leaves the island shortly after comms are restored. The explosion causes the blue sky to turn red, white, and gray, and it creates an aurora 2,100 miles long along the geomagnetic meridian. (Wikipedia, “Operation Hardtack I”; Jacobsen, Area 51, pp. 170–171)

August 3 — 2:25 a.m. A sudden violet-orange brightness illuminates the sky over Rome, Italy, for about 3 seconds. Lights in the city dim, failing completely in some areas. Physician Angelo Corsi witnesses it 37 miles southeast of Rome in Sgugrola. After his car radio fails, and the house and streetlights go out, he sees a long whitish trail like a fan in the sky. At 2:22 a.m., in Rieti a sergeant and some guards see a yellow-green cigar-shaped object moving rapidly toward the southeast. It leaves a luminous trail that lights up roads, mountains, and houses for several seconds. A similar sight is seen in Naples. (Schopick, pp. 142–143; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1958 August–September, The Author, 1999, pp. 1, 3)

August 8 — An informal two-hour hearing on UFOs is held by the House Subcommittee on Atmospheric Phenomena, chaired by Rep. William Natcher (D-Ky.), which is part of the Select Committee on Astronautics and Space Exploration, chaired by Rep. John W. McCormack (D-Mass.). Although McCormack wants an extended hearing in closed secret session, unrecorded, ATIC Capt. George T. Gregory persuades him to allow the Air Force to give a briefing, while allowing people like Menzel, Ruppelt, and Keyhoe to offer their opinions later. NICAP as a whole should be excluded, he emphasizes. The main witnesses turn out to be Gregory and Maj. Tacker. The subcommittee, which also includes Kenneth Keating (R-N.Y.) and Lee Metcalf (D-Mont.), commends Gregory for his presentation on Project Blue Book’s “improved” methods. The hearings were to have been extended to the following week, but they decide to call no more witnesses at the suggestion of scientific consultant Dr. Charles S. Sheldon II, who thus maneuvers Keyhoe out of appearing. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1958 August–September, The Author, 1999, pp. 5–27; Swords 277–279)

August 9 — Carl Jung issues a denial to the Associated Press about his “extraterrestrial” statement, saying that witnesses are “in need of fantasy.” He thinks “something is being seen,” but his interest is more in what they think they are seeing. (“Dr. Jung Says Flying Saucers Are a New ‘Savior Myth,’” St. Louis Post-Dispatch, August 9, 1958, p. 5)

August 11 — The Orange thermonuclear test is launched by Redstone missile from Johnston Atoll with a yield of 3.8 megatons. Although Orange is visible from Hawaii, it is not the great spectacle Teak had been. The light from the 28-mile-high blast is visible for about 5 minutes, but does not cause a large communication interruption; however,
some commercial flights to Hawaii are said to have lost contact with air traffic controllers for a short period of time. (Wikipedia, “Operation Hardtack I”)

August 16 — Around 5:00 p.m. Several persons on Lake Geneva, Switzerland, watch a bright light descending. It comes to hover about 45 feet above their boat. It is saucer-shaped, about 39 feet in diameter, and has a cabin on top with several windows. It causes a noticeable current in the water. After several leaps in the air, it flies off at high speed. (Vallée, Magonia, p. 272)

August 18 — 7:05 or 7:10 p.m. Typewriter repairman Alex Donald Chisholm is at home at 21950 Cunningham Avenue in Warren, Michigan, with Walter Mollanion and his wife and possibly a young daughter, when he sees a light much brighter than Venus in the vicinity of a flight of four military aircraft. He watches the object through 8x30 mm Japanese artillery-observer field glasses. It looks to be a Saturn-shaped grayish object like a “fried egg in pan.” Later it flips over, and another more elongated ring can be seen surrounding it. The object is about 60 feet long and is stationary for 5–8 minutes. However, the object is probably a Skyhook balloon launched from the University of Minnesota on August 17. (Clark III 392; NICAP, [case file])

August 27–September 6 — In Operation Argus, three nuclear warheads are launched from X-17 rockets from the deck of the USS Norton Sound in the South Atlantic Ocean off the coast of South Africa. They explode approximately 300 miles into space. The tests are proposed by Nicholas Christofilos in an unpublished paper of the Livermore branch [now the Lawrence Livermore National Laboratory] of the Lawrence Radiation Laboratory in Berkeley, California, as a means to verify the Christofilos effect, which argues that high-altitude nuclear detonations will create a radiation belt in the extreme upper regions of the Earth’s atmosphere (they do create artificial electron belts that persist several weeks), or an electronic pulse that could hypothetically damage the arming devices on Soviet ICBM warheads (they do not). (Wikipedia, “Operation Argus”)

September — NICAP fires its office manager, treasurer, and typist Rose Hackett Campbell after she gives membership cards to George Adamski and other contactees. Richard H. Hall begins work at NICAP as associate editor. (“Resignations,” UFO Investigator 1, no. 5 (Aug./Sept. 1958): 2; “Richard Hall Becomes Assoc. Editor,” UFO Investigator 1, no. 5 (Aug./Sept. 1958): 2)

September — Around 9:00 p.m. The USS Franklin D. Roosevelt is on a shakedown cruise in the Caribbean Sea out of Guantanamo Bay Naval Base, Cuba, when at least 25 of the 3,000 crew members notice a light following the aircraft carrier. Fireman’s apprentice Chester C. Grusinski watches it as it comes close and sees a cigar-shaped object with portholes and figures inside looking out. Grusinski can feel heat coming from the object, and some of the ship’s power apparently goes out. After a few minutes, the object turns red-orange and takes off. (Chester C. Grusinski, “UFOs Seen by Crew of an American Aircraft Carrier (1952–1958),” Flying Saucer Review 40, no. 3 (Autumn 1995): 1–4; Gordon Creighton, “Confirmation of an Important U.S. Naval Sighting,” Flying Saucer Review 46, no. 2 (Summer 2001): 17–20; Good Need, pp. 234–236)

September 8 — 6:40 p.m. At Offutt AFB, Omaha, Nebraska, SAC Operations Officer Maj. Paul A. Duich, plus several officers from USAF Ballistic Missiles Division, Los Angeles AFB in El Segundo, California; many other air base officers and airmen; and Offutt air traffic control tower personnel see a brilliant-white, elongated, cylindrical object hovering in the west just after sunset. The object is oriented vertically with the blunter end highest. After several minutes, the object turns dull orange-red and becomes sharper in outline. A swarm of about 10 “black specks” appears to “cavort” around the lower end of the object for about one minute before disappearing. Then the cylindrical object begins to rotate counterclockwise and starts drifting slowly to the south from due west and drops in elevation angle over about 5 minutes. During the final 5-minute observation, the object continues angular descent and gradually decreases in angular size, but it begins rotating clockwise until it disappears by fading into the slight atmospheric haze. A USAF colonel takes several color photos with a 35mm camera on a tripod but later claims nothing came out. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1958 August–September, The Author, 1999, pp. 59–63; UFOEv, pp. 25, 27; Herbert S. Taylor, “Satellite Objects and Cloud Cigars,” IUR 29, no. 1 (Spring 2004): 5–6; Sparks, p. 265; Swords 280)

September 12 — The Operation Hardtack II series of 37 nuclear tests takes place at the Nevada Test Site through October 30, all within 18 miles of Area 51. (Wikipedia, “Operation Hardtack II”)
September 21 — 3:00 a.m. Mrs. William H. Fitzgerald of Sheffield Lake, Ohio, sees through her east-facing bedroom window a metallic domed disc, 12–22 feet in diameter and 6 feet thick. It sweeps in over the front lawn heading north and descending in a falling-leaf oscillating motion to about 6 feet altitude, then crosses over her driveway, and stops for several seconds about 40 feet away. It then reverses course heading south and hovers 5 feet above the lawn about 25 feet away, making a jetlike sound. The object wobbles and emits gray smoke, makes two tight clockwise turns, then rises and takes off straight up over the house towards the east. Her 10-year-old son also observes the event from another room. (NICAP, “12’ Diameter 6’ Thick Disc within 40’”; UFO Ev, p. 113; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1958 August–September, The Author, 1999, pp. 68–72)

September 25 — The Project Moonwatch team in Portland, Oregon, is looking at the Moon when they see objects crossing the lunar disc. Occasionally they recognize the transit as a bird, but there are “tiny dark objects” that behave differently. All the object pass in the same direction and in the same location for about one second. Supervisor Alex Geddes, who was not present, sends a supportive letter to the observers, thanking them for the data. (Michael D. Swords, “Gazing at the Moons,” IUR 32, no. 4 (October 2009): 15)

September 29 — 5:30 a.m. Pvt. Jerome A. Scanlon, stationed at Nike missile base W-93 in Derwood, Maryland, is walking from his sentry post to the barracks to sound reveille when he hears a humming sound above him. He looks up and sees a teardrop-shaped object 300 feet up and coming in for a landing at 30 mph. It moves over trees, breaking branches, and lands about 1.5 miles away. Exhaust flames issue from its rear, and its luminous green skin illuminates the terrain. It rises again and disappears. Scanlon runs to inform Riney Farris, the sergeant of the guard, who has also seen the object. They go to the landing site and find broken branches and a scorched strip of earth and vegetation about half a mile long. After the story appears in newspapers, the Air Force explains it as repair trucks doing welding jobs. (“Brass to Hear GI’s Account of Fiery ‘Saucer,’ ” New York Journal-American, October 7, 1958; “‘Saucer’ Landed, Say Two Soldiers,” Goldsboro (N.C.) Record, October 9, 1958; Lorenzen, UFOs: The Whole Story, Signet, 1969, pp. 90–91; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1958 August–September, The Author, 1999, p. 79)

October — Maj. Robert J. Friend takes over as head of Project Blue Book, relieving Capt. George T. Gregory. About this time, a new USAF fact sheet states that investigative improvements have reduced unsolved sightings to 1.8%. The “refinement” comes from lumping “probable” and “possible” identifications into “identified.” At the same time, a secret staff study by USAF intelligence officers addresses the public relations problems caused by Keyhoe, who is characterized as a “political adventurer” allied with Ruppelt, both of whom are in the UFO “business” strictly for the money. Yet together “they represent a formidable team from which plenty of trouble can be expected.” The study recommends that 18–20 personnel be assigned to temporary UFO investigation duty. They would solve reports that have not been sent directly to Blue Book. Though ATIC urges implementation of the plan, Air Force Headquarters kills it. (Jacobs, UFO Controversy in America, Signet ed., 1976, pp. 146–151; Clark III 920; Hynek UFO Report, pp. 25–27; Sparks, p. 14)

October 1 — NASA begins operations. It includes three major labs: Langley Aeronautical Laboratory [now Langley Research Center] in Hampton, Virginia; Ames Aeronautical Laboratory [now Ames Research Center] in Mountain View, California; and Lewis Flight Propulsion Laboratory [now Glenn Research Center] in Brook Park, Ohio. It incorporates elements of the Army Ballistic Missile Agency and the US Naval Research Laboratory. (Wikipedia, “NASA”)

October 2 — Shortly after 5:00 p.m. Naturalist Ivan T. Sanderson sees a dull-gray object, shaped like a pickle with a flat bottom, fly erratically in loops over the Delaware Water Gap near Stroudsburg, Pennsylvania. (NICAP, “Nickel-Shaped Object Flies Loops (Sanderson Case)”; UFOEv, p. 52; Sparks, p. 266)

October 3 — 3:10 a.m. A Monon Railroad freight train is traveling between Owasco and Kirklin, Indiana, when a formation of four odd white lights crosses ahead of the train. The entire crew watch the UFOs turn and traverse the full length of the train, front to back (about a half mile). After passing the rear of the train, the objects swing east, turn back, and follow the train. The bright glow conceals their exact shape, but they appear flattened and sometimes fly on edge. The objects follow the train until the conductor shines a bright light on them. Immediately the objects speed away, but return quickly and continue to pace the train. Total time of observation is about 1 hour 10 minutes. Finally the UFOs move away to the northeast and disappear. (NICAP, “The Monon RR UFO Incident”; “They’re Back Again—in Indiana,” APRO Bulletin, November 1958, 1, 3; Frank Edwards, “UFO Buzzes Train,” Fate 12, no. 2 (February 1959): 25–30)

October 7 — 2:55 p.m. Joseph Gwooz, master of the SS Nantucket, sees a gray, oval object in the sky at an altitude of 8,000–10,000 feet at the entrance to the Nantucket Channel, Massachusetts. It remains stationary for more than one minute, then shoots up and away to the northeast. (UFOEv, p. 71)
October 7 — 6:02 p.m. Chemist John R. Townsend, special assistant for research and engineering to the Assistant Secretary of Defense, sees a large, stationary, sharply outlined Saturn-shaped silvery object (with a “gossamer” surface appearance and a rim or girdle around its equator) in a clear sky in Alexandria, Virginia. It rapidly rises at an estimated speed of 1,000 mph and disappears to the south after 40 seconds. At one point a passing Capitol Airlines Flight 407 flies directly between his line of sight and the UFO at 2 miles distance, allowing him to estimate the UFO’s size as about 500 feet. Townsend reenacts the timing by walking the half block down Lee Street to get a better feeling for its distance and size. (NICAP, “Saturn-Shaped Object Observed, Object Confirmed by Pilot”; Swords 282; Sparks, p. 267)

October 26 — 10:30 p.m. Alvin Cohen and Phillip Small are rounding a curve on Maryland Route 146 some 600–900 feet south of the bridge at Loch Raven Reservoir, Maryland. They see a large (100 feet long) egg-shaped object hanging 100–150 feet above the bridge. When they drive to within 75 feet of it their car stalls and the dash lights turn off. They get out of the car and watch the UFO from behind it for 30–45 seconds. The UFO flashes a beam of white light and they feel heat on their faces. They also hear a dull explosion. The UFO rises vertically and disappears in 5–10 seconds. They are able to start the car and drive into Towson, Maryland, to make a phone call to the Ground Observer Corps and the police. Police Cpl. Kenneth Hartmann and Patrolman Richard Fink drive up and they tell them the story, then they go to St. Joseph’s Hospital in Baltimore and are given a cursory examination for burns. Other people in the neighborhood either see an object at the time or hear the boom. (“Baltimore’s Flying Saucer,” Baltimore (Md.) Evening Sun, December 15, 1958, p. 21; NICAP, “Egg-Shaped Object & E-M Effects over Bridge”; Schopick, pp. 62–63; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1958 October, The Author, 1999, pp. 73–86; J. Allen Hynek, The UFO Experience, Ballantine ed., 1974, pp. 132, 139–140; Sparks, p. 268; Clark III 686)

November — Skandinavisk UFO Information in Denmark begins publishing UFO-Nyt. (UFO-Nyt, November 1958)

November 3 — 2:01 p.m. At Minot, North Dakota, M/Sgt. William R. Butler, a medic, sees one bright-green object, shaped like a 10-cent piece, and one smaller, silver round object. The first object explodes, then the second object moves toward the location of the first at high speed. Sighting lasts 1 minute. (Sparks, p. 268)

November 4 — 9:03 p.m. The pilot of a KB-50 USAF tanker is in the downwind leg of the traffic pattern during a ground-controlled approach to Pope AFB [now Pope Field] in Fayetteville, North Carolina, when he notices an object on a collision course. He and his flight crew also notice that “strange lights were observed in his cockpit while he was on the final approach...” He executes a go-around maneuver and climbs in altitude to await the disappearance of the object. Air Force tower personnel also see the UFO hovering above the airport, watching it through their binoculars for 20 minutes. They are convinced it is not an atmospheric phenomenon. They say that “the UFO presented a hazard to aircraft operating in the area.” (NICAP, “Object on Collision Course with KB-50 Tanker, Circles”; Richard F. Haines, “Aviation Safety in America: A Previously Neglected Factor,” NARCAP, October 15, 2000, pp. 53–54; Sparks, p. 268)

November 5 — MP Roy Mason asks the Air Minister in the UK House of Commons to what extent official records are kept of UFO sightings and what departments are involved. Air Minister George Ward replies in writing that reports involving national security are investigated but “nothing suggests that they are other than mundane.” (“Come Off It, Mr. Ward! ‘Nothing Suggests That They Are Other Than Mundane,’” Flying Saucer Review 5, no. 1 (Jan./Feb. 1959): 2; Good Above, p. 52)

November 9 — Residents of Trinidad, Rio Dell, and other towns in northern California report showers of cobweblike material, some in strands 5–6 feet long. Two fishermen at sea, George Korkan and Jack Curry, say the substance settles on their boat in such quantity that it makes the boat appear “a million years old.” A sample obtained at McKinleyville is examined by biologist Erwin Bielfuss at Humboldt State College. He rules out mold or an animal product and suggests it is plant material or plastic. (“Cobweb Like Substance in Area Mystifies Zoologist,” Eureka (Calif.) Humboldt Standard, November 10, 1958, p. 5; UFOEv, p. 99)

November 9 — 10:00 p.m. Two carpenters, Stig Ekberg and Harry Sjöberg, are returning from Stockholm, Sweden, to their cabin on Väddö island, about 20 miles to the northeast. About 6 miles north of Älmstä their car engine begins to sputter and fail, and the headlights go out. They see a huge, shining object descending toward them and making a turn above Väddö Bay to the left of the road. It lands in the middle of the road about 300 feet in front of their car, its neon glow illuminating the landscape. They estimate it is 53 feet long and 20 feet high, with a bright glow underneath the object and a dazzling mist surrounding it. They watch the object for about 10 minutes, then it rises from the road and shoots into the sky to their right. Afterward, the air is stifling and hot, but the engine starts up right away. A few minutes later they return to the landing site and find flattened grass and a still-hot, smooth, triangular piece of metal the size of a matchbox, which they retrieve. They submit the metal to several labs over the next few years, apparently without ambiguous results, but in the process it is split into three pieces. Finally, an
engineer in Linköping named Schalin finds the metal has the hardness of sapphire and a specific weight of 15.2. It can take several thousand degrees C. heat without getting red hot. One of the pieces is submitted to the US Air Force and not returned. In the early 1970s, another piece is examined by James Harder at the University of California, Berkeley, who establishes it is composed of tungsten carbide, cobalt, and traces of titanium, and that it has been manufactured. (Christer Nordin, “The Väddö Case,” Nordic UFO Newsletter, no. 1 (1981): 2–6)

November 11 — 1:35 a.m. A Mrs. Kinney, who is a Lt. Col. in the Civil Air Patrol in Topeka, Kansas, wakes up when her bedroom floods with an amber-colored light and her three dogs begin barking. The source is a 25-foot diameter sphere that is sitting on the walkway in the yard about 30 feet away. Kinney opens a door to go out on a porch, but the light zooms straight up and out of sight. She goes back to bed and the phone rings; it is a neighbor who has seen the light going toward her house. At 7:30 a.m., the phone rings again; this time it is the controllers at the Philip Billard Municipal Airport, who know her well and tell her about the light they saw. In the evening, she finds there is an electrical failure on the east side of the house. Lights, radios, and refrigerators are not working. Kinney replaces some fuses, but not everything turns on again. An electrician comes and replaces some wiring on November 12, but Kinney’s eyes develop subconjunctival hemorrhages and sensitivity to bright light. She begins to wear sunglasses regularly. Both of her male dogs develop catacaracts. (Swords 287–288)

November 17 — 10:03 p.m. Somewhere in Russia a luminous object hovers and lands. It is seen for 2 minutes. (Vallée, Magonia, p. 273)

November 30 — Tom Gerber of the Boston Herald features interviews with unnamed Air Force officers who proclaim an “undeclared war on phony organizations that capitalize on the ‘mystery’ of flying saucers.” Supposedly, the Air Force has evidence that “perhaps as many as 100,000 persons belong to these UFO organizations” and are “making a wad of money.” As many as 16% of the UFO sightings investigated by USAF are “hoaxes originated by members or officials of these organizations”—an obvious swipe at NICAP. (Swords 282–283)

December — The Jet Propulsion Laboratory in Pasadena, California, is transferred to NASA from the Army, becoming the agency’s primary planetary spacecraft center. (Wikipedia, “Jet Propulsion Laboratory”)

December — Some 450 airline pilots have signed a petition protesting the official policy of debunking UFO sightings. One pilot describes the policy as a “lesson in lying, intrigue, and the ‘Big Brother’ attitude carried to the ultimate extreme.” Of the signatories, more than 50 personally have reported UFO sightings but are told by the Air Force that they are mistaken. USAF warns them that they face up to 10 years in prison under JANAP 146 if they reveal details of their sighting to the media. Because of situations like this, Maj. Friend unsuccessfully requests that Blue Book be transferred from ATIC to Air Research and Development Command on the grounds that UFOs are a scientific, not a military problem. His staff complains that the work is time-consuming and unproductive, and ARDC could speak to the public with authority and persuasiveness. ARDC briefly considers, then declines, the offer. (Good Above, p. 284; Clark III 922)

Early December — Contactee Lee Childers visits a New York City group called the Bureau of UFO Research and Analysis to present a lecture. By now he is calling himself Prince Neosom of Tythan, which is 8.5 light years from Earth. He also answers to the name Dana. (Clark III 915)

December 6 — Between 6:38 and 6:40 p.m. Along the border of Russia and India, an observer sees a bright UFO cross his field of vision through his telescope from north to south as he is observing Mars. He thinks it might be Sputnik 3, but the location and direction of the object do not bear that out. (ClearIntent, pp. 137–138)

December 6 — 5:44 a.m. The first launch of a Juno II, carrying Pioneer 3, at LC-5 at Cape Canaveral, Florida, suffers a premature first-stage cutoff, preventing the upper stages from achieving sufficient velocity. Pioneer 3 cannot escape Earth orbit but transmits data for some 40 hours before reentering the atmosphere. A malfunction in a propellant depletion circuit is found to be the cause of the failure, although the exact nature of it cannot be determined. The circuit is redesigned afterwards. (Wikipedia, “Juno II”)

December 19 — John Lester, a writer for the Newark (N.J.) Star-Ledger, has polled 1,000 US government radar operators over the past month and found that 80% have observed UFOs traveling at fantastic speeds, executing perfect 90° turns, steep vertical climbs, and hovering stops. They fly in formation and manage to stay just ahead of USAF jets scrambled to intercept them. Tacker responds immediately that the UFOs are natural phenomena (“lightning, meteors, and meteorites”). (Newark (N.J.) Star-Ledger, December 19, 21, 1958)

December 20 — 2:55 a.m. Hans Gustafsson, a 24-year-old truck driver, and Stig Rydberg, a 30-year-old student, claim that while driving home to Helsingborg, Sweden, from a dance they see a strange light in a glade on their right near Domsten. They leave the car and walk up to the object, which turns out to be a disc-shaped vehicle 16 feet in diameter resting on 3 legs. The two are suddenly attacked by four gray creatures about 4 feet tall who try to drag them to the UFO. In January 1959, a medical doctor, Lars-Erik Essén, hypnotizes the men in what is perhaps the first use of hypnosis of a UFO witness, but the two manage to fool Essén. In the late 1980s, Gustafsson’s brother
December 21 — A group of more than 50 commercial airline pilots, all of whom have had at least one UFO sighting, tell reporter John Lester with the Newark (N.J.) Star-Ledger that the Air Force policy of censorship and denial regarding reports is the “Big Brother attitude carried to the ultimate extreme.” Most express disgust with the USAF methods of interrogating civilian pilots and complain about the gag order about publicly talking about their sightings under penalty of 10 years in prison or $10,000 in fines (JANAP 146). “Nuts to that. Who needs it?” (Newark (N.J.) Star-Ledger, December 22, 1958; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1958 November–December, The Author, 1999, p. 55)

December 22 — 3:00 p.m. Stanislaw Kowalczewski, a physician, takes a photograph of a dark, disc-shaped object over Muszyna, Poland. (Hobana and Weverbergh 67–68; Wiki Meteoritica, “Muszyna 1958”; Poland 21–23)

December 30 — 3:30 p.m. Joseph Bennett, a farmer in Portgleneone, County Antrim, Northern Ireland, is out walking and hears a noise like a rush of wind. A black object 7 feet across comes hurtling through the air about 20 feet above the ground. Moving from south to northwest, it crashes into an oak tree, splitting it in two at a height of 10 feet, then ascends and disappears in seconds. The tree has no burn or scorch marks. (“UFOs Collide with Tree, Roof,” APRO Bulletin, March 1959, p. 2; “We’re Not Roswell, We’re Portgleneone,” Fortean Ireland, March 17, 2019)

1959

1959? — According to weapons specialist David Middleton, sometime in the late 1950s a few hours prior to a nuclear weapons test at the Nevada Test Site, he and several other technicians watch two silver discs race across then swoop down and maneuver near the detonation tower where the atomic weapon is mounted. The two objects fly a tight circle around the tower before zooming off at high velocity. The test is immediately postponed by senior AEC personnel. Middleton is debriefed and sworn to secrecy. (Nukes 58–59)

1959 — The original US Navy Space Surveillance System goes into operation. From 1960 until the early 1990s the system is used in conjunction with a network of Baker-Nunn cameras that can see an object the size of a basketball at 25,000 miles. The system is operated by the US Navy for NORAD from 1961 to October 2004. Initially independent, it is run by Naval Space Command from 1993 to 2002, and then by Naval Network and Space Operations Command from 2002 to 2004, when it is taken over by the Air Force. (Wikipedia, “Air Force Space Surveillance System”)

1959 — The US Army and CIA at Edgewood Arsenal at Aberdeen Proving Ground, Maryland, show significant interest in deploying a new drug, 3-quinuclidinyl benzilate (BZ), as a chemical warfare agent. The drug’s effects last for three days, perhaps as long as six. Between 1959 and 1975, some 2,800 soldiers are given BZ at Edgewood. (Reid Kirby, “Paradise Lost: The Psycho Agents,” The CBW Conventions Bulletin, no. 71 (May 2006): 1–5)

1959 — Psychologist Carl Jung publishes Flying Saucers: A Modern Myth of Things Seen in the Skies in the UK, a translation of Ein moderner Mythus von Dingen, die am Himmel gesehen werden, published in Zürich, Switzerland, in 1958, in which he compares the discs to archetypes, dreams, visions, paintings, and the metaphysical symbol of a mandala: “the rounded wholeness of the mandala becomes a space ship controlled by an intelligent being.” However, he remains puzzled by the physical evidence. (Carl Jung, Flying Saucers: A Modern Myth of Things Seen in the Skies, Routledge & Kegan Paul, 1959; Clark III 637–638)

1959 — Author Hugo Correa founds UFO Chile in Santiago, Chile. Its newsletter appears from August 1967 to May 1969. (Hugo Correa, “¿Que es ‘UFO Chile’?” UFO Chile, no. 1 (August 1967): 1)

1959 — The Soviet KGB has created its own disinformation Department D (Dezinformatsiya) in the First Chief Directorate, which under Yuri Andropov is later renamed Department A (for “active measures”). It specializes in the fabrication and dissemination of forged documents, tapes, letters, manuscripts, photos, rumors, and false intelligence. (Wikipedia, “Active measures”; John Barron, KGB: The Secret Work of Soviet Secret Agents, Bantam, 1974; Richard H. Shultz and Roy Godson, Dezinformatsiya: Active Measures in Soviet Strategy, Pergamon-Brassey’s, 1984)

1959 — Contactee Howard Menger publishes From Outer Space to You, an account of his meetings with space people. (Howard Menger, From Outer Space to You, Saucerian, 1959; Clark III 739)

1959 — George Van Tassel claims the space people have taught him a method of rejuvenating the human body. Using his new-found knowledge and funds provided by Howard Hughes, he completes the outer structure of the Integraton at Giant Rock, California, a four-story domed structure, 55 feet in diameter, built mostly of wood without nails, screws, iron, or steel. Van Tassel claims it will harness the EMF energy required for recharging the cells in our

January 1 — Rocket scientist Wernher von Braun, on holiday in Germany, makes a cryptic statement about the failed launch of Pioneer 3 by a Juno II rocket on December 6, 1958: “We find ourselves faced by powers which are far stronger than we had hitherto assumed, and whose base is at present unknown to us. More I cannot say at present. We are now engaged in entering into closer contact with those powers, and in six or nine months’ time it may be possible to speak with more precision on the matter.” (Good Above, p. 370)

January 1 — 4:55 p.m. Deputy Fred Gunzelman of the Harbor Department in Corona del Mar, California, spots a bright object outside department headquarters. He summons Deputy Elmer Sandling and Sgt. Bruce Young and the three watch the object through binoculars, where it appears to be a disc-shaped object with a rotating tail. They notify the lifeguard headquarters at Newport Beach, where Lt. Mike Henry, Guard Jack Bell, and Lt. Jim Richards also see the UFO. The planet Venus is clearly visible in the same section of sky. During the 15 minutes it is visible, it starts moving to the southeast and then splits into four parts. Two rise vertically at high speed, another heads southeast, and the last remains stationary. (UFOEv, p. 137; Lorenzen, UFOs: The Whole Story, Signet, 1969, p. 95)

January 11 — Wilbert Smith speaks on UFOs at the Illuminating Engineering Society’s Canadian Regional Conference in Ottawa, Ontario. He claims that “Various items of ‘hardware’ are known to exist, but are usually clapped into security and are not available to the general public.” (Frank Edwards, FS Serious Business, Bantam ed., 1966, p. 48)

January 13 — 7:00 a.m. Robert Collins is driving a pickup truck south on Hartstown Road across Pymatuning Lake, Pennsylvania, when he sees a bright light approaching from the east and illuminating the ground. It stops above his truck, hovering 200 feet above it for several minutes. The truck’s electrical system fails, the engine dies, and the headlights and radio go out. The object’s light illuminates an area about 300 feet in front of him. It takes off and disappears in seconds, and the truck begins working again. (“Area Man’s Encounter with Unidentified Flying Object Called Weirdest Experience,” Greenville (Pa.) Record-Argus, January 31, 1959, pp. 1–2)

January 17 — George Adamski arrives in Auckland, New Zealand, on the first stop on his world lecture tour where he is received by North Island Adamski Correspondence Group leaders Henk and Brenda Hinfelaar for a 6-week engagement starting with a talk in Kaiakohe on January 20. (“World Lecture Tour,” The Adamski Case, October 5, 2019; Marc Hallet, A Critical Appraisal of George Adamski: The Man Who Spoke to the Space Brothers, The Author, 2016)

January 18 — Eight people see a UFO over Stigsjö, Sweden. The round object, 18–24 feet in diameter, approaches slowly from the south over Lake Länsjön at a height of 900 feet. It is surrounded by a luminous ring 6 feet wide. It is visible for 3 minutes. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History; 1959 January–March, The Author, 1999, p. 25)

January 21 — 6:00 a.m. A flying object is seen crashing into the waters of the harbor at Gdynia, Poland. Rumors later claim that a rust-free fragment is retrieved by divers and, after being examined by the Polish navy, sent to Gdynia Polytechnic University [possibly the Polish Naval Academy]. A few days later, an injured occupant of the craft is allegedly found wandering in the area. He speaks no known language, wears an odd uniform, and apparently has burns on the face. He is taken to a hospital, but he dies when doctors attempt to remove an armband. His remains are said to have been shipped to the Soviet Union. (Hobana and Weverbergh 1–2; Poland 25–28, 115)

January 21 — MP Roy Mason asks the Air Minister another question in the UK House of Commons: What instructions have been sent to RAF stations about collecting military UFO reports, and what collaboration is there with Canada and the US? Air Minister George Ward replies that RAF units have standing instructions for handling reports, and there is no special collaboration with those countries. (“Roy Mason Asks Another,” Flying Saucer Review 5, no. 2 (March/April 1959): 2; Good Above, p. 52)

January 28 — At a Symposium on Aerospace Technology by the Institute of the Aeronautical Sciences at the Astor Hotel in New York City, USAF Maj. Gen. Donald J. Keirn, assistant deputy chief of staff on development for nuclear systems, talks about nuclear aircraft propulsion. He mentions that if intelligent extraterrestrials do exist, “it is entirely possible that some of them may have passed through our stage of evolution, and may have already
achieved a higher level of social and technological culture than our own.” He suggests using electromagnetic emissions to detect them, as they may be doing with us. (US Congress, Joint Committee on Atomic Energy, Hearings, Aircraft Nuclear Propulsion Program, July 23, 1959, p. 153)

January 31 — The US Ground Observer Corps is deactivated with the advent of automated Army (Missile Master) and Air Force (SAGE) radar systems. (Wikipedia, “Ground Observer Corps”)

February — 9:30 p.m. The people of Digeliotika, Greece, hear a humming noise coming from the direction of the sea. Running out of their homes, many people see a luminous disc circling the village for about 10 minutes. Radios fail to operate and the electrical current in one house fails completely. When the disc flies low over the house of the priest, Papa Costas, there is a loud noise and the whole house shakes. The object moves off to the west.

March 10, 2002

February 1 — JANAP 146(D) integrates Canada into the CIRVIS reporting instructions. The Canadian Department of National Defence launches a series of Communications Instructions for Reporting Vital Intelligence Sightings in line with the JANAP procedures. (Gregory M. Kanon, “UFOs and the Canadian Government,” Canadian UFO Report 3, no. 7 (Spring 1976): 17–18; Antonio F. Rullán, “Blue Book UFO Reports at Sea by Ships,” December 10, 2002)

February 17 — Hynek wants to start bringing together ATIC and Blue Book personnel for monthly meetings where scientific and PR problems are reviewed. To get it going, he meets with Air Force Intelligence, Secretary of the Air Force officials, and Blue Book staffers in the Pentagon. This meeting includes, besides Hynek, Maj. Robert J. Friend, Col. Leonard T. Glaser, Alex Francis Arcier, Maj. James F. Byrne, Maj. Joseph E. Boland, Maj. Lawrence J. Tacker, and Burgoyne Lee Griffing. The group agrees that eventually the term “UFOs” should be jettisoned and older unsolved cases reexamined in the light of “greater scientific knowledge” that will move them from unknowns to knowns. (Jacobs, UFO Controversy in America, Signet ed., 1976, pp. 148–149; Clark III 919; Swords 286; “Saucer Reading Fest,” Saturday Night Uforia, January 25, 2019)

February 20 — Pfc. Bernard G. “Gerry” Irwin, on leave from Fort Bliss in El Paso, Texas, is driving near Cedar City, Utah, when he stops to investigate what seems to be a crashing plane. He is later found unconscious in the snow and treated at the Cedar City hospital. He suffers from amnesia, continues to have fainting spells, and returns more than once to the site in some kind of fugue. He soon deserts and perhaps disappears

February 2 — Just as the first working models of the Army’s VZ-9 Avrocars are being manufactured, the Canadian government cancels the Avro CF-105 Arrow program. Almost all Avro Canada employees are laid off, including those with the Special Projects Group. However, three days later, many of the Special Projects employees are rehired, but it isn’t quite business as usual. The USAF Project Office devoted to the Avro projects recommends that the WS-606A and all related work (including the Avrocars) be cancelled. However, in May the USAF authorizes Avro to continue its “flying saucer” programs. (Wikipedia, “Avro Canada VZ-9 Avrocars”)

February 24 — 8:20 p.m. Capt. Peter W. Killian is flying an American Airlines flight from Newark to Detroit when he encounters three bright lights flying in a precise line. The initial detection takes place when the aircraft is flying at 8,500 feet and 50 mph about 13 miles west of Williamsport, Pennsylvania. At first Killian thinks he is seeing Orion’s sword, but he can see those stars elsewhere. One of the objects abruptly leaves formation and approaches the plane, slows down before Killian takes evasive action, then rejoins the other two. Killian alerts copilot James John Dee and then announces on the intercom for the passengers to take a look. He also puts out a call to nearby aircraft, and five other commercial airline pilots indicate that they can see the objects. The lights remain at about the 9 o’clock position for 40 minutes, providing an opportunity for many of the 35 passengers to observe them. They are also seen by the crews of two other planes flying much farther to the south, as well as by the tower operators in Pittsburgh. The Air Force quickly identifies the objects as the three Orion stars, changes that to an aerial refueling operation, then accuses Killian of being drunk. But an independent sighting of the UFOs by an Air Force transport plane 150 miles further south confirms Killian’s observation, and no refueling routes exist in central Pennsylvania. Brad Sparks uncovers new evidence in 2016 that supports the witnesses’ story. (NICAP,

February 24 — 10:00 p.m. A 17-year-old male is home babysitting the family pets and his younger brother in Victorville, California, when he sees a bright light shining in his bedroom window. The dogs begin to howl and run around. He goes outside and sees a luminous object like an “elongated egg,” dull red with purple waves inside it, flying in a descending path toward his house. It passes over the front yard at a height of only 8–10 feet. As the object returns, he goes inside to get a gun, but as he goes outside the object is making a third pass and he goes back inside. When the parents return home, they find the dogs in a terrified state. (Hynek UFO Report, pp. 167–170; Swords 286–287)

Late February–April 15 — George Adamski continues his world lecture tour in Sydney, Perth, Adelaide, Melbourne, and Brisbane, Australia. (“World Lecture Tour,” The Adamski Case, October 5, 2019)

February 25 — 8:30 a.m. Jim Dobbs Jr. is driving south on State Highway 18 south of Hobbs, New Mexico, when he sees an egg-shaped object glowing like radium on a watch dial. He estimates it is 10° above the southern horizon and traveling fast. His radio fades out and produces only a steady succession of two dots and a dash. The object disappears in the east after 30 seconds. (“Hobbs Man Sees Glowing UFO, Hears Signals,” APRO Bulletin, March 1959, p. 1)

February 25 — Lt. Col. Lee B. James, chief of the Liaison Branch of the Army Ballistic Agency in Huntsville, Alabama, gives a talk at the Detroit Chapter of the Michigan Society of Professional Engineers on space flight. Because of the recent Killian incident, he is asked about UFOs. Referring to the witness on that aircraft, he says: “If they (35 passengers and several crew members) saw what they really saw, it would have to come from outer space—a civilization decades before ours.” (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1959 January–March, The Author, 1999, p. 68)

February 25 — 7:25 p.m. A pale-yellow light is seen by officials above one of the runways at London Airport [now Heathrow], England. Airport and air defense radars do not pick up any target. RAF Fighter Command Headquarters says the light fluctuates in intensity and is about 200 feet from the ground. It stays in one position for 20 minutes then climbs away at high speed. (Charles H. Gibbs-Smith, “Venus and the Nose-Cone Light: A Study in the Lunacy of Explainists,” Flying Saucer Review 5, no. 3 (May/June 1959): 10–11, 31; Good Above, p. 52; UFOEv, p. 122)

February 28 — The US Air Force launches Discoverer 1, the first of a series of satellites that are part of the Corona spy program. The mission is a failure due to problems with the Agena upper stage. (Wikipedia, “Discoverer 1”)

March — On the Baltic Sea coast near Kolobrzeg, Poland, soldiers watch the sea become turbulent as a triangular object, 12 feet in diameter, emerges, circles the barracks, and flies away at high speed. (Vallée, Magonia, p. 275)

March 11 — Rear Admiral George J. Dufek, on his way back from commanding Operation Deepfreeze in Antarctica, tells reporters in Wellington, New Zealand, that he does not think the existence of UFOs can be discounted: “I think it is very stupid for human beings to think no one else in the universe is as intelligent as we are.” Asked years later why he said this, he explains that it was because of sightings related to him by people who worked with him at the South Pole. (Swords 290)

March 12 — Several witnesses at Bergen, Norway, see a bright object passing north to south, taking two minutes to move from horizon to horizon. Several minutes later another appears, following the same course. This is soon followed by three more in succession. (ClearIntent, p. 138)

March 13 — 2:00 a.m. Percy Briggs is driving from Purnong to Mannum, South Australia, with a load of vegetables and Claypans Postmaster C. Towill as passenger. They have just climbed Cournamont Hill near the Purnong Ferry over the Murray River. They see to the left of the road a huge dome-shaped object with 8–9 red and blue lights about 20 feet apart. The UFO soon rises from the ground at a 15° angle and moves away to the southwest. The separate lights merge into one big light. They watch it recede for about 10 minutes. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1959 January–March, The Author, 1999, pp. 79–80)

March 18 — 8:50 p.m. Jesse Wilson of Denville, New Jersey, is taking photos of the Moon through a telescope and captures an image of two groups of multiple objects. (Center for UFO Studies, [case documents])

March 19 — USAF spokesman Maj. Lawrence J. Tacker retracts the dubious Orion explanation for the Killian case and says instead that the pilots saw B-47 bombers refueling in flight from a KC-97 tanker. Killian tells the papers, “I don’t care what the air force says,” he knows what refueling looks like and the UFOs were “at least three times the size of any tanker or bomber we have. They could travel at 2,000 mph. And they were not conventional
March 20 — 5:30 p.m. Witold Sambrowski, an electronics engineer, sees two noiseless cigar-shaped, reddish-pink objects flying over Ostroleka, Poland. They are traveling horizontally at a speed greater than a jet. When the two vanish, a third appears and follows the path the others have taken. (Hobana and Weyverbergh 211–212)

March 22 — 1:30 a.m. Mr. and Mrs. Gary Bond are driving near Ann Arbor, Michigan, when they see an intensely lighted object hovering about 2 miles to the southeast. It is about 200 feet in the air and just south of a main road. Intense shafts of light are shining from two oval ports at the bottom. As they drive closer, they can hear no sound and find it is about 50–75 feet from the road. The UFO parallels their car at first, then the light shafts go out, and a circle of 8–10 red lights appear on the bottom. Then it rises rapidly and disappears in seconds. A local radio astronomer, Allen Barrot, claims the couple saw the lights of his telescope. But the Air Force finds that the couple were never looking in the direction of Barrot’s observatory. (Swords 288–289; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1959 January–March, The Author, 1999, pp. 87–90)

March 27 — Lou Corbin has told Keyhoe that Rep. Samuel Friedel (D-Md.) is “all set to hop on this Killian business” and begins to plan for Killian to meet with him. But Killian’s wife now tells Keyhoe that he is under strict orders from the Air Force not to talk to anyone about the sighting or risk losing his job. Soon afterwards, the Air Force releases a statement from Killian that says, “Having never seen night refueling of jets by a tanker, I suppose that that could be what we saw.” (Keyhoe, FSTS, pp. 27–36; UFOEv, pp. 116–117)

March 31 — 11:30 p.m. Barry Neale, operator of the Port Elliot movie theater, is driving home to Goolwa, South Australia, and sees a dome-shaped, reddish-orange object with a row of evenly spaced portholes around it. He estimates it to be about 15 feet wide, and it is on the ground about 900 feet from the road. He sees it disappear to the east. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1959 January–March, The Author, 1999, pp. 99–100)

Spring — Keyhoe meets with Hillenkoetter at the New York Yacht Club to discuss NICAP strategy. USAF Public Information Officer Lawrence J. Tacker has sent the organization a letter asking it to stop writing to Air Force personnel about UFOs. Keyhoe tells Hillenkoetter that three scientists have contacted a certain congressman to report UFO sightings. Hillenkoetter advises, “we’ll have to do something to speed things up.” (Keyhoe, FSTS, pp. 15, 247–248)

Spring — Soviet radar and Air Defense personnel observe UFOs circling and hovering for more than 24 hours above the headquarters of the Tactical Missile Command at Sverdlovsk, Russia. Fighter aircraft sent to intercept them report that the UFOs easily outmaneuver them and zigzag to avoid machine gun fire. (Flying Saucers, no. 47, May 1966, pp. 6–10; Good Above, p. 227)

Spring — Early evening. A weather officer with the US Fifth Air Force in Tokyo, Japan, is in the operations center when the staff tracks a UFO near Misawa Air Base on the north end of Honshu. One of the officers says this happens frequently, that the objects travel at 2,000 mph, and they often stop in one position and hover for 30 minutes to several hours before taking off westward along the Tsugaru Strait and disappearing in a burst of speed. The center commander orders the pilots of two specially equipped F-106s based at Misawa to intercept the target. One of the planes is having instrumentation problems, but the other goes up. After 10 minutes he is being guided toward the target through Misawa. The pilot says the object is circular and metallic with a cockpit on top. The commander calls the Pentagon for authorization for the pilot to fire on the UFO, and he gets permission for the pilot to make a firing pass. The pilot fires two missiles, but they detonate just at the edge of the object, as if it is protected. The UFO then turns toward the terrified pilot, and the command center watches as the two blips merge into one. The blip disappears. Crews search for wreckage for 4 days but find none. (Bruce Maccabee, “Hiding the Hardware,” IUR 16, no. 5 (Sept./Oct. 1991): 8–9)

April 1 — An Air Force C-118 plane with four on board crashes between Sumner and Orting, Washington, about an hour after taking off from McChord AFB [now Joint Base Lewis-McChord] in Tacoma. Their last radio message indicates that they hit something or that something hit them. Bob Gribble and other UFO investigators find witnesses who claim to have seen two orange or yellow objects closing in on the plane. Best guess is that the plane hit a tree and the UFO observations are unrelated. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1959 April–June, The Author, 1999, pp. 2–4)

April 7 — 8:00 p.m. Control tower operators at CFB St. Hubert [now Montreal/Saint-Hubert Airport], Quebec, spot a red, glowing light hanging in the sky for a few minutes at 3,000–7,000 feet altitude. It suddenly darts to the north at supersonic speed. (Lorenzen, UFOs: The Whole Story, Signet, 1969, p. 100)
April 11 — Two businessmen at Woodlands, New Zealand, watch a glowing 40-foot-long object with a balloon-like attachment on the underside hovering just above the trees. As they approach it in their car, it speeds off to the north. (Lorenzen, UFOs: The Whole Story, Signet, 1969, p. 100)

April 12 — 8:00 p.m. Control tower personnel and airport officials at St. Hubert Air Defence Command Base [now CFB St. Hubert], Quebec, as well as local residents watch a red ball of light hovering above the airfield at 3,000–7,000 feet. Descriptions vary from a black ball with a red light to a long red cigar. Radar does not pick it up. Suddenly it takes off toward Montreal to the north. (Yurko Bondarchuk, UFO Sightings, Landings, and Abductions, Methuen, 1979, pp. 94–96)

April 17 — George Adamski meets with Sisir Kumar Maitra, head of the Department of Philosophy and dean of the Faculty of Arts of Banaras Hindu University in Varanasi during a stopover in Kolkata, India. (“World Lecture Tour,” The Adamski Case, October 5, 2019)

April 18–May 14 — Adamski arrives in London, England, and appears on the TV show In Town Tonight on April 18 and on the BBC program Panorama on April 20 where he debates with astronomer Patrick Moore, a show that is seen by 9 million viewers. Both Gen. Frederick Browning and RAF Commander Peter Horsley meet with Adamski and Desmond Leslie during their visit to a private address in London. Adamski gives further lectures in Tunbridge Wells, Weston-super-Mare, Bournemouth, at Caxton Hall in London (on April 28), Birmingham University (April 29), Manchester (May 1), and several more around the British Isles. (“World Lecture Tour,” The Adamski Case, October 5, 2019; David Clarke, “The Prince and the Saucers,” Fortean Times 406 (June 2021): 19)

April 19 — 3:00 p.m. Otis T. Carr and Norman Colton, who have been in Oklahoma since February, pretend to attempt the launch of their OTC-X1 spacecraft in a gravel pit 6 miles east of the Frontier City amusement park northeast of Oklahoma City. Frontier City obligingly erects a model of the spacecraft as a ride. However, Carr comes down with a mysterious throat ailment and goes to Mercy Hospital on April 17. He invites Long John Nebel to have a brief glimpse of the model, but Nebel thinks it looks like a jumble of unconnected parts. As it turns out, the OTC-X1 develops a “mercury leak” and the launch is delayed then canceled. Those who have come for the April 19 launch hear contactee Dana Howard talk about her trip to Venus, and Margaret Storm (Carr’s “publications editor” in Baltimore) declares that Carr is inspired by the “Divine Master St. Germain.” (“Difficulties Put Off Flying Saucer Test,” Oklahoma City Daily Oklahoman, April 20, 1959, pp. 1–2, 13; Clark III 860–861)

April 20 — Ufologist Morris K. Jessup commits suicide in a Dade County park, Florida, from carbon monoxide poisoning. Some theorists connect his involvement with the Allende letters and the Philadelphia experiment to his death, but friends say Jessup has been discussing suicide with them for several months. (Clark III 635; “Jessup and the Allende Case,” Pursuit 1, no. 4 (September 30, 1968): 8–10)

May — The first Avrocar, #58-7055, rolls out of the Avro Malton factory in Mississauga, Ontario. From June 9 to October 7 it is tested in a static hover rig. A second Avrocar is completed in August. (Wikipedia, “Avro Canada VZ-9 Avrocar”)

May 4 — Otis T. Carr and his attorney are summoned to the county courthouse in Oklahoma City, Oklahoma, to answer questions about stock sales by OTC Enterprises, including a block of 21,000 shares to Frontier City promoter Jimmy Burge, oilman Frank Buttram, and publisher Edward K. Gaylord. Carr pleads the Fifth Amendment. (Clark III 861)

May 18 — George Adamski has an audience with Queen Juliana and Prince Bernhard of the Netherlands at Soestdijk Palace in Baarn on his world lecture tour, amid fiercely critical media coverage. The royal audience, scheduled to last 45 minutes, goes on for two hours, making Adamski 20 minutes late for his lecture in The Hague. The royal couple claim that the British royal family, especially Prince Philip, are also keen to meet Adamski. After the audience, Dutch Aeronautical Association president Cornelis Kolff says “The Queen showed an extraordinary interest in the whole subject.” Royal Netherlands Air Force Chief of Staff Lt. Gen. Haye Schaper says, “The man’s a pathological case.” (“World Lecture Tour,” The Adamski Case, October 5, 2019; David Clarke, “The Prince and the Saucers,” Fortean Times 406 (June 2021): 19)

May 20 — 5:30 p.m. Antonio Sanchez and Ernesto Fogliani are hunting rabbits about 7 miles from Pehuelches station, Buenos Aires, Argentina. They see a saucer-shaped, silvery machine resting on the ground about 980 feet away. They approach to about 490 feet when the object rises into the sky and disappears. At the spot where it was, they

May 22 — The UFO Advisory Panel meets to “determine the type of information which should be used for correlation in bringing Special Report #14 up to date.” (“Saucer Reading Fest,” Saturday Night Uforia, January 25, 2019)

Late May — Ruppelt tells Keyhoe he is revising his book to bring it more up to date and requests NICAP’s most recent information. He says the Air Force is giving its full cooperation and he is “middle of the road” on the UFO question. (Keyhoe, FSTS, pp. 258–260)

May 26, 29 — Adamski gives two lectures in Zürich, Switzerland. At the second talk, he meets with organized resistance by a group of 300 students (in an audience of 700) who have been led to believe he will discredit Swiss astronaut Fritz Zwicky. When a reporter afterwards asks if he will accept an apology, Adamski replies that it should not be given to him, but to the Swiss public. Due to recurring heart problems, Adamski cancels his remaining lectures in Switzerland, Italy, Austria, and Denmark. (“World Lecture Tour,” The Adamski Case, October 5, 2019)

May 28 — Otis T. Carr and two OTC Enterprises employees (Lari Kendrick and Charles O. Rhoades) are barred by a federal court order from selling any further stock in the company. The SEC contends that they have been selling unregistered securities fraudulently since November 18, 1955, using the US mail to do so. Contactee associate Wayne Aho escapes arraignment, while Norman Colton has fled the state and cannot be located. (Clark III 861)

May 28 — Night. Two observers on a Project Moonwatch team in San Antonio, Texas, see two silvery objects through their telescopes that shoot across the sky in less than one second, one curving away in a parabolic path, the other executing a more gradual hyperbolic curve. (Michael D. Swords, “Gazing at the Moons,” *IUR* 32, no. 4 (October 2009): 13–14; Center for UFO Studies, “Moonwatch Mystery Satellites, 1958–1962")

June — The Argentine Navy bottles up a fast, submarine-like object in the Buenos Aires harbor, Argentina. It is shaped like a huge fish, is silver in color, and sports a tail like the stabilizer on a B-17. (Lorenzen, *UFOs over the Americas*, Signet, 1968, pp. 52–53)

June — The radiation effects reactor at Lockheed’s Georgia Nuclear Aircraft Laboratory [now closed] in the Dawson Forest outside Dawsonville, Georgia, is brought up to full power and unsheathed for the first time. It is a water-cooled 10-megawatt nuclear reactor in a shielded underground shaft with the purpose of irradiating military aircraft as well as the forest itself to determine the effects of nuclear war on wildlife. The experiment exposes everything within a 1,000-foot radius to a lethal dose of radiation. Bugs fall from the air, and small animals and the bacteria living in and on them are exterminated, in a phenomenon the technicians call “instant taxidermy.” Oak trees turn brown, yet crabgrass is seemingly unaffected. Pine trees are the hardest hit of all. Clear Coca-Cola bottles turn brown, hydraulic fluid coagulates into chewing gum, transistorized equipment stops working, and rubber tires become rock hard. Documents about the reactor remain highly classified, and the entrance to the underground portion of the facility has been buried. The area is closed in 1971, and only objects left above ground were the concrete foundations on which the buildings and reactors were placed. (Wikipedia, “Georgia Nuclear Aircraft Laboratory”; Adam Higginbotham, *Midnight at Chernobyl*, Simon & Schuster, 2019, p. 30)

June 12 — Keyhoe writes an open letter to Ruppelt that lists his past statements on UFOs and urges him not to let the Air Force intimidate him into retracting. (Donald E. Keyhoe, “Capt. Ruppelt Revising His UFO Book: Air Force Rumored to Be Pressuring Former Project Chief,” *UFO Investigator* 1, no. 8 (June 1959): 5–6)

June 13 — Charles S. Sheldon II, technical director of the House Science and Astronautics Committee, writes to Richard H. Hall at NICAP to say that while he thinks UFOs are “extremely interesting,” they do not pose a national security threat.” (Swords 290)

June 13 — Adamski, along with follower Lou Zinsstag, meets with diplomat Alberto Perego and Mario Maioli at Ristorante La Cisterna in the Trastevere area of Rome, Italy, then go on an all-night taxi ride around the city. He returns to the United States via Copenhagen, Denmark, on June 17. (“World Lecture Tour,” The Adamski Case, October 5, 2019; IPinotti 106)

June 22 — 8:00 p.m. A large, luminous UFO passes over Salta, Argentina, and blacks out all electrical power for several minutes. (Bernardo Passion, “Report from Argentina,” *APRO Bulletin*, November 1959, p. 9; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1959 April–June*, The Author, 1999, p. 56)

June 26–28 — 6:45 p.m. At Boianai Mission, Papua New Guinea, Rev. William Booth Gill and 38 others watch a platform-shaped object with legs that appears in the sky above Venus. It has an electric blue spotlight and is hovering about 500 feet away at a height of 300–400 feet. On top of the object, four humanlike figures, their bodies surrounded by illumination, are busy with some unknown task. The men and spotlight disappear at 7:20 p.m. and the object vanishes into the clouds. It reappears at 8:28 without the men or spotlight but now joined by second, third and fourth objects at 8:29, 8:35, and 8:35–8:50 p.m., coming and going through the clouds. The

July — The Air Force reassigns UFO investigative duties to the 1127th Field Activities Group stationed at Fort Belvoir, Fairfax County, Virginia, replacing the 1006th AISS. The unit will also be responsible for Project Moon Dust and Operation Blue Fly. (Jacobs, UFO Controversy in America, Signet ed., 1976, p. 134; Kevin D. Randle and Donald R. Schmitt, "Secret Projects and Open Eyes: A Response," IUR 19, no. 3 (May/June 1994): 16–17)

July 5–6 — US Navy Cmdr. Julius Larsen, an ONI liaison officer to the CIA’s Photographic Intelligence Center in Washington, D.C., rediscovers the Swan–Knowles–Affa correspondence from 1954 in a file and decides to follow up on it. He goes to Eliot, Maine, to visit Adm. Knowles and interview Frances Swan. Larsen tries his hand at automatic writing and channels a message from Affa. Back in Washington on July 6, Larsen goes to director of the Photographic Intelligence Office, Arthur C. Lundahl, and tells the story to him and his assistant Lt. Robert S. Neasham. They urge Larsen to try to contact the extraterrestrials. Larsen goes into a trance, asks Affa questions, and writes the answers down. When Neasham challenges Affa to appear in person or let them see his spaceship, Larsen stops writing and tells Neasham to go to the window. Lundahl sees nothing unusual, but Neasham insists a spaceship is hiding behind some fluffy clouds. He also insists that he later contacted Washington National Airport and heard from the radar tower that the sector where the UFO appeared had been “blocked out.” Neasham urges Project Blue Book’s Maj. Robert Friend to come over for a briefing. He shows up on July 9 and hears Neasham’s version of the story, and Larsen even channels some messages. Friend goes back to Dayton, Ohio, and prepares a memo for his boss. (Jacobs, UFO Controversy in America, Signet ed., 1976, pp. 153–154; Clark III 1118–1119; Robert Emeneeger, UFOs: Past, Present, and Future, Ballantine, 1974)

July 8 — Night. Mrs. Napau Abednego and other indigenous people on Prince of Wales Island in the Torres Strait off Queensland, Australia, see a huge, glowing red object land on top of a hill at Port Lihou. The same night, residents of nearby Thursday Island see a green UFO flying low, and a strange object is also reported at Mapoon Mission on the west coast of Cape York. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1959 July–September, The Author, 2000, p. 13)

July 11 — 6:02 a.m. A Pan American Boeing Stratocruiser piloted by Capt. George Wilson flying over the Pacific Ocean about 1,035 miles northeast of Honolulu, Hawaii, encounters a large bright light with 3–4 satellite lights in a line below, behind, and to the left of the main object. It makes a sharp right turn and disappears to the south. Copilot
Richard Lorenzen and Flight Engineer Bob Scott also see the UFOs. Another Pan Am flight sees essentially the same phenomenon, as well as an Air Force bomber crew, a Slick Airways plane, and a Canadian Pacific airliner. (UFOEv, p. 125)

July 13 — 5:30 a.m. Eileen Moreland, a farmwoman in Blenheim, New Zealand, goes to the barn to milk her cows and sees a huge object, about 20–30 feet in diameter, with two intense green lights on its underside descend towards her and hover at rooftop height. It bathes her in green light. Two rows of jets around the middle shoot out orange flames. She can see two men inside, dressed in close-fitting suits of shiny material and opaque helmets. The jets turn on again, the object tilts, and it shoots up vertically at great speed, making a high-pitched sound. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1959 July–September*, The Author, 2000, pp. 25–28; Richard H. Hall, “Dyad ‘Scout Craft,’” *IUR* 25, no. 4 (Winter 2000–2001): 23; Patrick Gross, *URECAT*, November 2, 2006)

July 14 — 8:22 p.m. TV sets in Salisbury, North Carolina, mysteriously go dead as residents see a flash of light and hear a loud vibrato noise. (*Schopick*, pp. 111–113)

July 20 — A shuttlecock-shaped UFO is seen over the RAAF Woomer Range Complex in South Australia. (Lorenzen, *UFOs: The Whole Story*, Signet, 1969, p. 100)

July 27 — The UFO Advisory Panel meets at Wright-Patterson AFB in Ohio to discuss trends and statistics and recent sightings. (“Saucer Reading Fest,” Saturday Night Uforia, January 25, 2019)

July 28 — 2:10 p.m. Ray Stanford and a friend simultaneously take 8mm and 16mm film footage of three cigar-shaped objects maneuvering in the sky above his parents’ home at 2629 Lynch Street, Corpus Christi, Texas. A fourth UFO appears about 5 minutes later. At one point a jet aircraft appears to alter its course to fly closer to one of the objects. (Ray Stanford, “*The July 28 Movies,*” *Saucers* 7, no. 3/4 (Fall/Winter 1959/1960): 20–23; “*Out of the Past,*” *CUFOS Associate Newsletter* 5, no. 4 (Aug./Sept. 1984): 5–7; “*Out of the Past,*” *CUFOS Associate Newsletter* 5, no. 5 (Oct./Nov. 1984): 7–8)

August — Stan Seers, president of the Queensland Flying Saucer Research Bureau [now UFO Research Queensland], is contacted by a man who requests a meeting with him in a Brisbane car park and offers him important information on UFOs. At the meeting he finds out that the man is an agent of the Australian Security Intelligence Organisation, who indicates he knows quite a bit about the group and its officers. By suggesting that ASIO could offer them significant information, the agent subsequently infiltrates the group and causes dissension and confusion. Some QFSRB members are pacifists, apparently, and are seeking to contact Russian scientists about the UFO phenomenon through the Soviet cultural organization VOKS. (Good Above, pp. 164–166; Kremlin 137–144)

August — 2:00 p.m. A son and his father are driving near Skiatook, Oklahoma. Upon nearing a bridge, the car engine dies. Another car is stopped on the other side of the bridge with its hood up. They see a metallic, domed disc with a flexible hose hovering less than a foot above the water of a creek. They watch it for 5 minutes, then the hose dies. Another car is stopped on the other side of the bridge with its hood up. They see a metallic, domed disc with a hose hovering less than a foot above the water of a creek. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1959 July–September*, The Author, 2000, pp. 59–61; Michael D. Swords, “Messing Around with the Force,” *IUR* 31, no. 4 (March 2008): 16–17)

August — Kathleen O’Rourke is asleep with her two children in her bedroom in New Matamoras, Ohio, when her son yells her awake. There are a dozen globes of yellow light circling about a foot above his bed. They are about 3 inches in diameter. Then a second group enters the room, passing through the screen. They split, half joining the first and half sailing over Kathleen. They all then move to her bed and circle above her. Not one of the lights goes to her daughter’s bed. She presses the light switch, and the lights turn into straight-edged streaks of light and disappear. There are no holes in the screens. (Michael D. Swords, “A Trick of the Light,” *IUR* 31, no. 2 (June 2007): 10)

August 9 — 7:30 p.m. Petroleum engineer Armando Uribe is returning home from Cerro Sombrero, Tierra del Fuego, Chile, with his wife and an 11-year-old housemaid when their pickup runs out of fuel. As they are waiting for another vehicle, the girl spots a bright blue light around 7:54 p.m. that is swinging in the air with a pendulum-like motion. As it approaches, they see it is an object like a metallic egg standing on end with two shafts of white light projecting from the bottom. A rose-colored, rotating device is on top. The object makes a quick movement when Uribe gets out of the truck, but then moves closer. Uribe points a rifle at it, and it quickly recedes and disappears. (Lorenzen, *UFOs over the Americas*, Signet, 1968, pp. 14–16; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: 1959 July–September*, The Author, 2000, pp. 53–54)

August 13 — 4:00 p.m. Pilot Jack H. Goldsberry, flying a Cessna 170 from Hobbs to Albuquerque, New Mexico, at 8,000 feet, notices halfway between Roswell and Corona, that his Magnesyn electric compass has suddenly moved...
around a slow 360° rotation in about 4–5 seconds. His other standard magnetic compass is spinning wildly. About this time, he sees three small, gray, and slightly fuzzy elliptical objects in close echelon formation passing in front from left to right and around his plane at a distance about 450–600 feet at a speed of about 200 mph. The Magnesyn compass follows the objects’ position as they circle the plane, and after one full circle they disappear to the rear. Then both compasses settle back to normal. The controller at Albuquerque cancels his flight plan and orders him to land at Kirtland AFB, where he is interrogated by a USAF major, who tells him that he might become ill from the experience. (NICAP, “Former Navy PBY Pilot Encounter / EME”; Clark III 950; Sparks, p. 278; Swords 287; “AF Secretly Warns Pilot of Danger,” UFO Investigator 3, no. 1 (March/April 1965): 5; Schopick, pp. 127–128)

August 13 — Around 9:45 p.m. Orville Shanks is driving with three passengers on Highway 332 north of Freeport, Texas, when they see a bright object with two satellite lights approach at low altitude. The car motor stalls and the headlights go out. The two lights appear to land, the main object follows them, continually changing colors and varying the intensity of its light. The motor and lights come back on when the UFOs cross the road, and Shanks drives on. About midnight they return, and the object is still there. Shanks gets out and approaches, but the UFO starts glowing brightly and making a noise, and they drive off again. (“Object Lands in Texas, U.S.,” APRO Bulletin, September 1959, p. 3; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1959 July–September. The Author, 2000, pp. 55–60)

August 17 — The automatic keys at the power station in Uberlândia, Minas Gerais, Brazil, suddenly disconnect power to all four trunk lines. A technician at a substation 45 miles away reports that all the keys disconnected as a UFO passes overhead, traveling toward the main station along the power lines. The chief engineer resets all the keys but they turn off again. Outside he sees a bright object approaching at high speed. As soon as it passes, the entire system returns to normal. (Lorenzen, FS hoax, pp. 179–180; Schopick, pp. 143–145; Lorenzen, UFOs: The Whole Story, Signet, 1969, pp. 152–153; McCampbell, Ufology, 1976, pp. 66–67; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1959 July–September. The Author, 2000, pp. 66–67)

August 25 — 11:00 a.m. At Eveking, North Rhine-Westphalia, Germany, Lutz Holtman walks towards a bright object in a forest and faints after he gets close to it. When he regains consciousness, he sees the UFO take off silently and vertically. The object is circular, has a tripod landing gear and two rows of bright openings, and is about 90 feet in diameter. (Vallée, Magonia, p. 277)

September — Employees of Lockheed’s Skunk Works are the first to return to Area 51 in Nevada to develop an aircraft that will replace the U-2. The Archangel-12 (A-12) spy plane will be designed to reduce its radar cross section by 50%. Following tests with wooden models at Burbank, California, proof-of-concept tests are to be carried out at Area 51 with full-scale mockups elevated onto 50-foot pylons. The CIA program to develop the follow-on aircraft to the U-2 is code-named Project Oxcart. EG&G agrees to move its radar test facility here. (Jacobsen, Area 51, p. 131; Peter W. Merlin, “Groom Lake Timeline: The First Fifty Years,” Secret Heroes, November 10, 2021)

September — Waveney Girvan takes over the editorship of Flying Saucer Review from Brinsley Le Poer Trench. (“Trench Resigns,” Flying Saucer Review 5, no. 5 (Sept./Oct. 1959): 2; Clark III 498)

September — Harvard University psychologist Henry Murray begins what are widely considered unethical experiments, in which he uses 22 Harvard undergraduates as research subjects in Cambridge, Massachusetts. Among other purposes, experiments focus on measuring people’s reactions under extreme stress. The unwitting undergraduates are submitted to what Murray calls “vehement, sweeping, and personally abusive” attacks. Specific, tailored assaults on their egos, cherished ideas, and beliefs are used to cause high levels of stress and distress. The subjects then repeatedly view recorded footage of their reactions to this verbal abuse. Among them is 17-year-old Ted Kaczynski, a mathematician who goes on to become the Unabomber, a domestic terrorist targeting academics and technologists for 18 years. Alston Chase’s book Harvard and the Unabomber connects Kaczynski’s abusive experiences under Murray to his later criminal career. His participation in these experiments and his service in the OSS have led many to believe that Murray was a part of the MK Ultra program. His experiments are not so much for observing stress reactions, but for a study of brainwashing and enhanced interrogation techniques. (Wikipedia, “Henry Murray”; Alston Chase, Harvard and the Unabomber: The Education of an American Terrorist, Norton, 2003)

September 7 — 2:00 a.m. Rural mail carrier Walter E. Ogden sees a glowing, pumpkin-shaped object about 40 feet above the trees in his pasture at Wallingford, Kentucky. After a minute, a blush blaze of fire comes from the bottom and it rises about 500 feet, leaving a circular smoke ring. It then zooms away horizontally. Six days later, a 12-foot depressed ring of scorched earth is discovered on the spot, along with a kerosene smell. Air Force investigators show up and declare it a hoax. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1959 July–September. The Author, 2000, pp. 74–75, 77–80)

September 13 — 9:58 p.m. A radar target is tracked at Kirtland AFB in Albuquerque, New Mexico, moving at 2,300 mph at an altitude of 60,000 feet and heading northwest. A total of four radar stations track the object. (Lorenzen, UFOs: The Whole Story, Signet, 1969, p. 103)

September 14 — Air Force Regulation 200-2 is revised, with additional emphasis on reducing the number of unknowns. This version devotes five full paragraphs to public release of information, which is now restricted to the Secretary of the Air Force’s Office of Information Services at the Pentagon. Local base commanders can release information only if an object is positively identified. Air Force personnel are not to contact private individuals on UFO cases or discuss their operations unless ordered to. (“USAF UFO Program,” September 28, 1959; Clark III 920–921)

September 14 — The CIA emphasizes antiradar study, aerodynamic structural tests, and engineering designs, selecting the Lockheed A-12 over rival Convair’s Kingfish. Edward Lovick’s suggestion for adding cesium to the A-12’s fuel in order to ionize the exhaust and mask it from radar is also persuasive. Lockheed has also added twin canted fins instead of a single right-angle one. Project Oxcart is officially established. The A-12 design, a combination of their A-7 and A-11 submissions, emphasizes low radar cross section, extremely high altitude, and high-speed performance. (Wikipedia, “Lockheed A-12”) “

September 21 — The Air Technical Intelligence Center is renamed the Aerospace Technical Intelligence Center. (NASIC, “National Air and Space Intelligence Center Heritage”)

September 24 — About 4:55 a.m. In Redmond, Oregon, police officer Robert Dickerson sees a bright white light rapidly descending north of the airport. It stops abruptly and hovers about 200 feet above ground for several minutes, lighting up the juniper trees below. Dickerson drives toward it on the Prineville Highway, then turns toward the airport. The object turns reddish-orange and moves rapidly to about 10 miles northeast of the airport to hover again. Dickerson arrives at the airport to report his sighting in person to the FAA Air Traffic Communication Station. Flight Service Specialist Laverne Wertz, Dickerson, and others view the object through binoculars as flat and round with occasional flames extending from its edge. The FAA reports the UFO to Seattle Air Route Control Center in Washington at 5:10 a.m., which in turn reports it to Hamilton AFB [now closed], Novato, California, which scrambles six F-102 jets from Portland to intercept the object. FAA station observers see the object hover and emit long tongues of red, yellow, and green light that extend and retract at irregular intervals. As the jets approach the object from the southeast, it turns into a mushroom shape, emits red and yellow flames from the lower side, and ascends rapidly, disappearing above scattered clouds at about 14,000 feet. The object’s departure forces one F-102 to swerve to avoid collision. Another nearly loses control from the UFO’s turbulent wake. The UFO is tracked on one F-102 gunsite radar, but the jets cannot intercept. The UFO reappears about 20 miles south of Redmond at about 25,000 feet. The Seattle Center reports at 6:20 a.m. radar contact with the object about 25 miles south. The USAF Air Defense Center radar site at Klamath Falls, Oregon, tracks a large target abruptly changing course and vectors B-47 and F-89 aircraft to identify it. Redmond FAA controllers lose sight of the object. Seattle FAA reports at 7:11 a.m. that Klamath Falls radar still is tracking it at 25 miles south of Redmond but varies in altitude from 6,000 to 52,000 feet. The Air Force claims the UFOs are caused by false radar returns, with excitable witnesses imagining the glow. But locals notice the FAA is checking for abnormal radioactivity, so the Air Force changes its explanation to weather balloon. And NICAP obtains FAA logs showing all the details. The Air Force again changes its explanation to Venus. (NICAP, “Huge Disc Sparks Scramble”; UFOEv, pp. 44, 48, 113–114, 138; Keyhoe, Aliens from Space, Signet ed., 1974, pp. 33–36; WFAA, Dallas, Texas, “Archive 1959: Fighter Jets Sent to Intercept Redmond UFO,” May 12, 2016; Patrick Gross, “The Redmond UFO Incident, USA, September 24, 1959”)

September 28 — ATIC issues a staff study by Col. Richard R. Shoop reassessing its UFO investigating role. It recommends that the UFO program be transferred to the Air Research and Development Command, which has better scientific capabilities, and then implement an effective public relations campaign with the goal of “the eventual elimination of the program as a special project.” (“USAF UFO Program,” September 28, 1959; “Saucer Reading Fest,” Saturday Night Uforia, January 25, 2019; Jacobs, UFO Controversy in America, Signet ed., p. 151)
September 29 — Maj. R. O. Braswell, flying an Air Force C-47 at 6,500 feet over Texas, sees a “large red fire” that looks like a mushroom cloud. It is 5° above his plane, with its base at 12,000–15,000 feet and its top at 16,000 feet. (Keyhoe, *Aliens from Space*, Signet ed., 1974, pp. 160–161)

September 29 — The first attempt to hover a tethered Avrocar is made. After the vehicle becomes airborne, an uncontrollable roll and pitch-coupled oscillation starts that forces each of the three wheels into the ground in turn. The pilot, W. D. “Spud” Potocki, immediately shuts down all engines. Changes are made to the stability system to provide more control authority, while new tethers are investigated to improve the ability to control the problem. (Wikipedia, “Avro Canada VZ-9 Avrocar”)

September 30 — Night. During a training flight with a student over Poznań, Poland, a pilot named Leszczyński sees two large circles of light with another pair some 12 miles away. He makes a close approach, but one of the objects shoots off while the other grows dimmer. After a short while, the dark object moves away. (Poland 63)

October — 10:00 a.m. Fr. Raimundo Nascimento Teixeira, a professor at Don Bosco College, is walking in the Núcleo Bandeirante region in Brasília, Federal District, Brazil, when he sees a crowd watching a strange object moving and stopping in the blue sky. He sees a student of his with a box camera, and he takes six photos of what he calls a flying saucer. A few days later, Teixeira meets with another witness, Israel Pinheiro, president of the New Building Company, who takes the negatives of his three best photos to forward to the Brazilian Navy for analysis. A few months later, the Navy returns different photos and offers no technical report. (Clark III 197; Roberto Affonso Beck, “Um Fenômeno Desafiador,” September 2005, pp. 35–36)

October 1 — 9:20 a.m. A radar target moving at 719 mph on a northwest course is tracked at Kirtland AFB in Albuquerque, New Mexico. At 10:29 a.m., another radar target is detected moving at 1,000 mph to the northwest. Its altitude is 41,000 feet. Two F-89J Scorpion fighters are scrambled to intercept it but they can see nothing. (Lorenzen, *UFOS: The Whole Story*, Signet, 1969, pp. 103–104)

October 2 — 12:20 a.m. For three hours, a Hercules radar site (#13) at McChord AFB [now Joint Base Lewis-McChord] near Tacoma, Washington, tracks a total of five objects that usually appear in pairs. The radar returns are said to be “weak.” Visually, at least one soundless, round, “quarter sized,” blue-white light is seen in the sky. ARTC reports no air traffic in the area of the radar site during the time of contact. The first object on radar is seen at 10° elevation. The last object seen on radar was at 20° elevation. The visual object is at 10° degrees elevation. When last observed, the visual object is 20° elevation. Flight patterns are erratic. Range changes from 12,000 feet to 24,000 feet, and azimuth from 190° to 170°. Objects seem to fade from the scope and visual contact when finally lost. Visual contact is disrupted by intermittent fog. (NICAP, “Hercules Site Tracks Objects for Three Hours”; Condon, pp. 145–148; Swords 287)

October 8 — Night. Two amateur astronomers in Mobile, Alabama, observe an unknown object traverse the Moon’s disk from west to east directly over the crater Copernicus. They watch the fast-moving shape “every night the weather permitted for a period of 33 days.” They write to Project Moonwatch about the observations, but they reply that no other lunar observers have seen the phenomenon, so it must be closer to the Mobile observers. (Michael D. Swords, “Gazing at the Moons,” *IUR* 32, no. 4 (October 2009): 15)

October 12 — 1:00 p.m. Multiple witnesses at Washington, Sharon, and Crawfordville, Georgia, watch “brown or black footballs” traveling southeast to west, followed by angel hair covering a vast area. The substance consists of “threads from 10’ to 50’ long connected at 34º intervals by minute particles resembling snowflakes.” The material falls for about 2 hours. Five samples are collected and sent to the Chemicals and Materials Laboratory at Robins AFB, Georgia. No unusual elements are discovered except for high amounts of silver in one and some silver in three others. The conjecture is that “cloud seeding with a silver salt could have caused the phenomenon.” (Brian Boldman, “Angel Hair Physical Analyses: A Review,” *JUFOS* 9 (2006): 103–104)

October 13 — In his syndicated column, Joseph Alsop goes so far as to describe “classified intelligence” as placing the Soviet missile count as high as 1,500 by 1963, and the US will have only 130 at that time. (Joseph Alsop, “True Missile Gap Picture Belies Pentagon Response,” *Eugene (Oreg.) Register-Guard*, October 13, 1959, p. 10)

October 22 — Night. Three witnesses are driving through Cumberland, Maryland, when they see a metallic disc emitting a bluish-green light around its edge. The driver abruptly stops, but leaves the car running. Suddenly the object drops down to 50 feet altitude and hovers 100 feet away in front of the car, making a humming vibration. As two of the witnesses open the door to get out, the car engine, lights, and radio fail. Shortly afterward, the disc shoots straight up, then forward, makes a 90° angle, then disappears in clouds. The car begins functioning normally
Late October — 6:55 p.m. Electrician Gideon Johansson is at home in Mariannelund, Småland, Sweden, when there is a power failure. He goes outside to look at the power lines when he bumps into his son Rolf, who points out a brilliant white object hovering above a three-story building. The object descends slowly and appears to be heading toward Johansson’s garden. The machine oscillates three times and smashes into the top of a maple tree, descends through the branches and hovers about 18 inches above the ground. Only about 10 feet away, Johansson can see the object has a large window, through which two entities are visible. Their heads have high crown and they have big, friendly eyes. They have mall mouths and pointed chins and are wearing white uniforms with broad black belts. One seems to be working at an instrument panel. They are only the size of a 14-year-old. Soon the object moves up and shoots away in a flash. Glassy deposits are found on some power lines in addition to the damaged tree, and Johansson gets prickly pains in his lower body. (Anders Liljegren, “Mariannelund UFO and Occupants,” Flying Saucer Review 16, no. 6 (Nov./Dec. 1970): 14–17)

October 31 — Soviet Col. Georgy Mosolov reaches an airspeed record of 1,484 mph in a Mikoyan-Gurevich MiG-21 over the Soviet Union. (Wikipedia, “Georgy Mosolov”)

November 2 — 12:00 noon. A substance described as angel hair falls from two UFOs seen in Evora, Portugal, and is collected and analyzed under a microscope by a school director, Dr. Amaral, and later by armed forces technicians and scientists at the University of Lisbon. The scientists conclude that the substance is produced by a small insect or some strange kind of single-celled organism about 4 millimeters in length. (Hayley Price, “Evora Angel Hair,” UFO Weekly News; Nicole Guardiola, “An Extraterrestrial Living Being, Captured and Studied Eighteen Years Ago,” translated from El País, October 13, 1978)

November 8 — A large, luminous object is seen moving at great speed over Kandahar, Afghanistan, to the northwest. Shortly afterward it explodes with a loud roar in nearby mountains, causing some slight earth tremors. Possible Russian missile test. (Good Above, p. 308)

November 12 — The first completely free flight of an Avrocar takes place. This test proves the nozzle control system unacceptable. (Wikipedia, “Avro Canada VZ-9 Avrocar”)

November 16 — 8:00 p.m. Czech Air Force officer Commander Duchoň is driving with another officer named Bezák to a Czechoslovakian airfield [now in the Czech Republic] to supervise night-flying exercises. At about 6 miles from the airfield, the car engine begins to stall. Suddenly they see a light sapphire-colored band moving at high speed at an altitude of 1,600–2,600 feet. It is completely silent. Some minutes later they are able to start the car again. Personnel at the airfield tell them they had seen a flaming ball that rotated, made a 90° turn, and passed over the airfield again. The tower tracks the object on radar at an altitude of 3,000 feet during its second pass. The object is about 500 feet in diameter with a glowing ring around it. (“Saucers and the Iron Curtain: A Report from Czechoslovakia,” Flying Saucer Review 6, no. 4 (July/Aug. 1960): 31–32)

November 19 — Otis T. Carr is convicted in federal court of selling unregistered securities to Gurney G. Warnberg, a pilot and railroad man in Yukon, Oklahoma, and fined $5,000. Unable to pay, Carr works off his fine in jail at a dollar a day. (Clark III 861)

December — The new edition of Ruppelt’s The Report on Unidentified Flying Objects is published with three new UFO debunking chapters, the last of which is completely different in tone from the rest of the book. He claims there is no Air Force secrecy on UFOs and NICAP is just a bunch of grandstanding nuts. (Clark III 1024; Michael Hall and Wendy Connors, “The Forgotten Letters of Edward J. Ruppelt,” IUR 24, no. 4 (Winter 1999): 20–26, 30, 32; Swords 301)

December — The London UFO Research Organisation is founded by Paul Teugells, Nigel Stephenson, Susanne Stebbing, and Roy Stemann, and begins publishing a monthly magazine, LUFORO Bulletin. (LUFORO Newsletter, no. 1 (December 1959))

December — Project Space Track moves to a new building in Cambridge, Massachusetts, the National Space Surveillance Control Center (NSSCC), which is formally dedicated on February 9, 1960. The NSSCC is part of the Air Force
Command and Control Development Division, Air Research and Development Command. Harold O. Curtis of Lincoln Laboratory is the director of the NSSCC. (Wikipedia, “Project Space Track”)

December — 5:45 a.m. Larry Jensen is driving to work on US Highway 99 near Proberta, California, when his radio begins making “snapping” noises, and his lights dim. He pulls over to the side of the road and gets out to check his headlights, which he finds are shining feebly. He notices a huge, bright, bluish-green, crescent-shaped object hovering about 60 feet above the road a quarter of a mile behind him. It appears to be 80–90 feet across and 15–20 feet thick. Suddenly and inexplicably, he finds his clothes are soaked and he feels an alarming feeling as if he is getting crushed inside. He also feels as if he is being sucked up into the object. He grabs for a car door, then collides with a side mirror and staggers backward, but manages to get inside. Looking out the right-door window, he sees the UFO a few miles away, heading northeast and climbing at a shallow angle over the Sierra foothills. It vanishes within 10 seconds. Jensen’s car lights come back on. He resumes driving, but 600 feet away is forced to stop because he smells burning rubber. The battery caps are blown out, and the battery is swollen out of shape. Later, he finds it odd that he has not encountered another single car during or after the episode. (Clark III 866; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1959 October–December, The Author, 2000, pp. 56–59)

December 1 — At a NASA news conference in Washington, D.C., Cal Tech geochemist Harrison Brown suggests that boneless animals similar to jellyfish abound in oceans on Venus. The speculation comes in the wake of the discovery that the planet’s atmosphere contains water vapor. (“Scientist Says Jellyfish May Live on Venus,” Wilmington (Del.) News Journal, December 2, 1959, p. 29)

December 2 — A bright, circular object is seen in the sky heading southwest over Ghazni, Afghanistan. It disappears after 2 minutes. (Good Above, p. 308)

December 5 — After five flights, testing of the Avrocar is temporarily halted, by which time it has logged 18.5 hours of test time in total. (Wikipedia, “Avro Canada VZ-9 Avrocar”)

December 11 — A memo reaches CIA head Allen Dulles’s desk recommending the removal of Fidel Castro. He sets the wheels in motion.

December 13 — Karl Lars Dersson is walking on the deck of the Danish tanker Dorte Mærsk just north of La Orchila Island, Venezuela. He sees a brilliant cone-shaped object descending from the sky and alerts the crew. It gets brighter as it nears the surface of the Caribbean, and the crew hear a loud concussion as it enters the water. The surface becomes turbulent and brilliant with many colors. (Lorenzen, UFOs over the Americas, Signet, 1968, pp. 50–51)

December 13 — Early evening. A rocket project officer at Fort Bliss in El Paso, Texas, is out looking at the Moon with binoculars when a lighted object approaches the Moon very slowly in the six o’clock position. Once nearly in line with the lunar edge, it begins a precision journey, skirting the edge until it reaches three o’clock. It then leaves on a straight track directly away. During the observation, the man calls his wife and two neighbors to watch the performance. (Michael D. Swords, “Gazing at the Moons,” IUR 32, no. 4 (October 2009): 14–15)

Late December — 10:00 p.m. Lorentz Johnsen sees a dark, silent object with a row of windows fly slowly by at an altitude of 500 feet, headed in the direction of Namsenfjorden, Trøndelag, Norway. It descends to about 160 feet, grows fiery red, then explodes with a crash and falls into the water. He says that it looks like a cover is torn off in one piece like a “curved sheet of metal.” (Ole Jonny Brænne, “Observations of Unidentified Submarine Objects in Norway,” IUR 20, no. 1 (Jan./Feb. 1995): 13)

December 24 — Maj. Gen. Richard E. O’Keefe, acting inspector general of the Air Force, issues instructions pertaining to “UFO business” to every air base commander in the US. The document is not intended for public distribution, but NICAP obtains a copy. Across the top are the words “UFOs Serious Business.” It says that UFOs “must be rapidly and accurately identified as serious USAF business in the ZI [Zone of Interior]” and specifies that UFO investigators “should be equipped with binoculars, camera, Geiger counter, magnifying glass and have a source for containers in which to store samples.” O’Keefe asks that UFO explanations be “reasonable and knowledgeable.” (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: 1959 October–December, The Author, 2000, pp. 61, 65–66; Swords 286; Good Need, pp. 226, 229)
1960

Early 1960 — Night. Vice Chief of Air Staff Gen. Curtis LeMay is conducting an exercise to test his bombers’ capability to penetrate US air space. An F-89J Scorpion jet instructor pilot and his radar observer, 1Lt. Joe Meyer, have just successfully intercepted a B-47 and are descending to land at James Connally AFB [now TSTC Waco Airport] near Waco, Texas. They notice a pinpoint of light at their level 12 miles away over Waco and decide to approach and attack it as if they are armed. As they approach on a collision course, they see the object has four bright blue-white lights on it and it is stationary. They estimate it is 25–30 feet in diameter. But the object shoots straight up at incredible speed before they reach it. They look up and see the object is bright blue white on its underside. It disappears at about 90,000 feet altitude. (“Pilot Finally Reveals UFO Encounter,” MUFON UFO Journal, no. 375 (July 1999): 17)

1960 — Jim Lorenzen is hired as senior technical associate with the Kitt Peak National Observatory, so he and Coral move to Tucson, Arizona, from Alamogordo, New Mexico. On their third day in Tucson, an “exterminator” visits them, offering to inspect their rented premises for free. He fails to mention the name of his company, nor does he seem interested in his occupation. He talks with Coral about their reason for moving, where Jim is employed, and UFOs. (Clark III 50; Lorenzen, Encounters with UFO Occupants, Berkley Medallion, 1976, pp. 3, 251)

1960 — Brinsley Le Poer Trench, 8th Earl of Clancarty, publishes The Sky People, in which he claims that Adam and Eve, Noah, and many other characters in the Bible originally lived on Mars. Trench believes that Adam and Eve were experimental creations of extraterrestrials. The biblical description of the Garden of Eden is inconsistent with what Earth is like, and because Mars contains canals, the Garden of Eden must have been located on Mars. He further claims that the north polar ice cap melted on Mars, causing the descendants of Adam and Eve to move to Earth. The Book of Genesis is a symbolic version of what actually happened to groups of people on Mars, he writes, with the Great Deluge referring to the flooding of Atlantis and Lemuria, which were populated with Adamic migrants. (Brinsley Le Poer Trench, The Sky People, Spearman, 1960; Jerome Clark, “Vimanas Have Landed: Ancient Astronauts in Ufology,” IUR 22, no. 3 (Fall 1997): 26–27)

1960 — Contactee George Hunt Williamson legally changes his name to Michel d’Obrenovic, said to reflect an ancestral connection to the throne of Serbia. However, John Griffin says the real reason is that Williamson’s sensational claims have rendered his anthropological work (such as it is) completely unacceptable. (Clark III 1287; Zirger and Martinelli, The Incredible Life of George Hunt Williamson, Verdiechiari, 2016, pp. 119–124)

1960 — Night. During a pause in army maneuvers near Brno [now in the Czech Republic], soldiers see a peculiarly colored light above the city. After hovering a while, it vanishes but reappears in another part of the sky. Their commanding officer tells them to look at it with binoculars and check the radar. Headquarters sends up interceptors to chase the object, but every time one of them gets near, the light disappears from the radar screen, only to turn up elsewhere. The incident goes on for an hour before the light disappears for good. (Hobana and Weverbergh 90)

1960 — The invention of transponders that transmit an electronic identification signal from aircraft to ground control helps to further reduce clutter on air traffic control radars. This means that “aerial phenomena” appear on radar only if they intrude on flight paths and create a near miss of the type investigated by the Civil Aviation Authority. (David Clarke, “Gremlins and Black Projects,” Fortean Times 291 (August 2012): 26–27; National Air Traffic Controllers Association, A History of Air Traffic Control, 2019)

January — The first issue of the Australian Flying Saucer Review is published jointly by the Victorian Flying Saucer Research Society and UFOIC, edited by Peter E. Norris and Andrew P. Tomas. It will continue until December 1972, various issues confusingly sponsored by each group, plus the Queensland Flying Saucer Research Bureau and the renamed Victorian UFO Research Society. (Australian Flying Saucer Review 1, no. 1 (January 1960))

January 18 — 10:45 p.m. Leo Haley and Bert C. Baker are driving on US Highway 2, some 9 miles west of Lakota, North Dakota, when the headlights dim just as a brilliant green flash lights up the sky. In a field to the north about 1 mile away they can see a 5–6 foot crescent-shaped object with a 9-foot exhaust tail. (Schopick, p. 69)

January 26 — Richard Bissell notifies Kelly Johnson that the CIA is authorizing the delivery of 12 A-12 aircraft that will be five times faster than the U-2 and fly three miles higher. Skunk Works will move into production at Area 51 in Nevada to work on Project Oxcart. (Wikipedia, “Lockheed A-12”; Jacobsen, Area 51, pp. 134–135)

February — The US Navy reportedly detects a “dark satellite” thought to be a Soviet spy satellite in orbit. However, a follow-up article alleges that the object was “the remains of an Air Force Discoverer VIII satellite that had gone

February 5 — The office of the AF Chief of Intelligence is informed of ARDC’s rejection (by Maj. Gen. James Ferguson) of the ATIC proposal. (“Saucer Reading Fest,” Saturday Night Uforia, January 25, 2019)

February 5 — 11:15 p.m. Many people see a distinctly round UFO hover and maneuver slowly over or near the intersection of Sunset Boulevard and La Brea Avenue in Hollywood, California. Cars are stopped bumper-to-bumper, according to employees of several businesses around the intersection, with people gaping at the object overhead. Persons on hotel and apartment rooftops go out to see a bright “cherry-red, circular light.” Two service-station attendants at the intersection, Jerry Darr and Charles Walker, say that “hundreds of people saw it—everybody was looking” as the light hovers for at least 5 minutes over a busy drive-in. Pen Meyer, another service station attendant a third of a mile to the north, watches it hovering for about 10 minutes. Harold Sherman, his wife, and two others watch it as it resumes motion very slowly eastward. After proceeding east for a distance of a block or two, it veers southeastward and passes out of sight. No sound is heard over street-noise background. (Los Angeles NICAP Subcommittee case files; James E. McDonald, “Statement on Unidentified Flying Objects,” in Symposium on Unidentified Flying Objects, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 54–57)

February 6 — 11:15 p.m. The red object reappears over Hollywood, California, this time about one block further east, above Sunset Boulevard and Sycamore Avenue. A number of witnesses observe it hovering for about 10 minutes at an altitude of 500–600 feet. Then with a loud explosion it emits a brilliant bluish-white flash that extends downward and to the west, lighting up the ground all around La Brea Avenue. A mushroom-shaped cloud appears and dissipates. As the red light is extinguished, an object described by most witnesses as long, tubular, and about 70 feet long shoots upwards. A few seconds later, the red light appears about 1,000 feet above Sunset and La Brea for about 8 minutes. It then begins drifting slowly eastward, turns sharply toward the north-northeast, accelerates and climbs steeply, not stopping again until it is at a very high altitude well to the north. (Los Angeles NICAP Subcommittee case file; James E. McDonald, “Statement on Unidentified Flying Objects,” in Symposium on Unidentified Flying Objects, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 54–57)

February 27 — NICAP sends photocopies of O’Keefe’s 1959 “UFOs Serious Business” memo to the media and to committees in the House and Senate, calling for congressional hearings. NICAP Board member Rear Adm. Roscoe Hillenkoetter adds a statement: “Behind the scenes, high-ranking AF officers are soberly concerned about the UFOs. But through official secrecy [AFR 200-2] and ridicule, many citizens are led to believe the unknown flying objects are nonsense.” NICAP board member Albert Baller writes: “If the UFOs are believed a threat, it would seem incumbent on the armed forces to waste no time in alerting the people. Any sudden, hostile act against a nation left in relative ignorance could have serious consequences.” (“UFO Warning Issued: Flying Objects ‘Now Serious Business,’” Lincoln (Neb.) Journal Star, February 27, 1960, p. 1; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: January–June 1960, The Author, 2003, p. 37)

March — The Ottawa Flying Saucer Club begins publishing Topside, edited by Wilbert B. Smith until 1962. It continues until winter 1971. (Topside, no. 1 (March 1960))

March 6 — 5:15–5:27 a.m. Photographer Esse Jansson of Norrtälje, Sweden, goes out early in the morning to try to take a photo of an unidentified satellite, termed 1960 Alpha [however, the designation of 1960 Alpha 1 is reserved for the Pioneer 5 space probe, which isn’t launched until March 11], “which was expected to pass the Stockholm latitude in a southerly direction about 0525 hours.” He sees two objects that come from the north and move in a southeasterly direction. They are similar to phenomena he has seen before, but these objects reverse direction completely. One of his plates shows a third object. The CIA takes note of this and another mystery satellite viewed by a Swedish airplane and reported in Dagens Nyheter, March 8. (Central Intelligence Agency, “UFO’s Sighted, Photographed in Sweden: Unidentified Satellite Seen,” FDD Note 1107, March 17, 1960)

March 8 — Holzman forwards Hynek’s letter up the chain of command. (“Saucer Reading Fest,” Saturday Night Uforia, January 25, 2019)

March 17 — President Eisenhower signs off on a CIA paper titled “A Program of Covert Action against the Castro Regime.” The order gives the agency authorization to create an organization of exiled Cubans to manage opposition programs, begin a propaganda offensive to draw support for the movement, create an intelligence gathering network inside Cuba, and develop a paramilitary force to be introduced into Cuba to organize, train, and lead resistance groups against the Castro regime. Its budget is $4.4 million. Under the Cuban Project and under
the direction of CIA Directorate for Plans Richard M. Bissell, MKUltra’s Sidney Gottlieb proposes spraying Fidel Castro’s television studio with LSD and saturating his shoes with thallium to make his beard fall out. Gottlieb also hatches schemes to assassinate Castro, including the use of a poisoned cigar, a poisoned wetsuit, an exploding conch shell, and a poisonous fountain pen. (Wikipedia, “Sidney Gottlieb”; Kris Hollington, Wolves, Jackals, and Foxes: The Assassins Who Changed History, St. Martin’s, 2008; Wikipedia, “Operation Mongoose”)

March 24 — Two policemen are in the vicinity of Lambert–St. Louis International Airport in Missouri, one on the north side, the other on the south side. A bright light illuminates the entire area. Three objects in a V-formation whisk overhead. They are round, white, and 9 feet in diameter. (Swords 293)

April 8 — Project Ozma, set up only a few days earlier by Frank Drake at the National Radio Astronomy Observatory at Green Bank, West Virginia, seems to hit paydirt. As he slews his antenna off Tau Ceti and onto Epsilon Eridani, Drake is greeted with a strong, periodic, pulsed signal on 1420 MHz, the hyperfine transition emission line of interstellar hydrogen atoms proposed for SETI by Giuseppe Cocconi and Philip Morrison, and still favored as a promising hailing frequency for interstellar communications. Drake is ready with a second, low-gain antenna. The pulses are there as well, sadly disproving their extraterrestrial origin. But they are not exactly terrestrial interference, either. The rate at which the phantom signal traverses the sky suggests that it is emanating from an aircraft cruising at unprecedented altitude—perhaps 80,000 feet. At the time, no known aircraft can reach the stratosphere. Such an aircraft, as it happens, doesn’t “come into existence” until the following month, when Francis Gary Powers is shot down over the Soviet Union. (Drake wisely decides to withhold publication of this positive result, so he never receives proper credit for “discovering” the U-2.) The project only lasts through July. (Wikipedia, “Project Ozma”; H. Paul Shuch, “Project Ozma: The Birth of Observational SETI,” in Searching for Extraterrestrial Intelligence, Springer, 2011, pp. 13–18; Seth Shostak, “Project Ozma,” SETI Institute, July 2021)

April 9 — The U-2 spy plane piloted by Francis Gary Powers crosses into the Soviet Union from Pakistan and flies over the Semipalatinsk Test Site in Kazakhstan; the Dolon Air Base in Semy, Kazakhstan; a SAM test site near Saryshagan, Kazakhstan; and the Baikonur Cosmodrome near Tyuratam, Kazakhstan. The plane is detected by Soviet Air Defense Forces but avoids intercepts by a MiG-19 and a Su-9. Powers lands at an Iranian airstrip at Zahedan. A 1994 CIA monograph by Gerald K. Haines, “CIA’s Role in the Study of UFOs, 1947–90,” claims that “According to later estimates from CIA officials who worked on the U-2 project and the Oxcart (SR-71, or Blackbird) project, over half of all UFO reports from the late 1950s through the 1960s were accounted for by manned reconnaissance flights (namely the U-2) over the United States.” (Wikipedia, “1960 U-2 incident”; Gerald K. Haines, “CIA’s Role in the Study of UFOs, 1947–90,” Studies in Intelligence 40, no. 5 (1997): 67–84)

April 30 — George Adamski appears on Long John Nebel’s late-night TV show on WOR. (“Long John Nebel, The Flying Saucer Story (George Adamski interview),” ThriftStoreVinyl YouTube channel, September 4, 2018; “Final Years,” The Adamski Case, June 11, 2009)

May — The CIA begins to recruit anti-Castro Cuban exiles in the Miami, Florida, area. Infantry training is carried out at a CIA-run base that is code-named JM Trax near Retalhuleu in the Sierra Madre mountains of Guatemala. (Wikipedia, “Brigade 2506”)

May 1 — 6:26 a.m. A US U-2 spy plane, flown by CIA pilot Francis Gary Powers, takes off from Peshawar, Pakistan, and performs photographic aerial reconnaissance over Baikonur, Kazakhstan, and Chelyabinsk, Russia. Powers has orders to continue across Siberia to get a look at the new Plesetsk Cosmodrome, but at 8:53 a.m. local time he is hit by an S-75 Dvina (SA-2 Guideline) surface-to-air missile fired by a defense battalion near Kyshtym, Russia. The U-2 crashes near Sverdlovsk [now Yekaterinburg]. The Soviet Air Defense Forces have anticipated the flight and give orders to “attack the violator.” Powers parachutes safely and is captured. This is the first time in five years of overflights that the US is caught. (Wikipedia, “1960 U-2 incident”)

May 5 — NASA issues a press release saying a weather research aircraft has “gone missing” north of Turkey and speculates that the pilot has fallen unconscious and the plane has crashed. Under the impression that the pilot has died and that the plane has been destroyed, a U-2 plane is quickly painted in NASA colors and a photo is shown to the media at NASA Flight Research Center [now the Armstrong Flight Research Center] at Edwards Air Force Base in California. Premier Nikita Khrushchev announces the shoot-down to the Soviet parliament but does not reveal yet that the pilot has survived. (NASA, “U-2,” September 4, 1997)

May 7 — Khrushchev now reveals to the Soviet parliament that Powers is alive and much of the U-2 technologies have survived the crash.

May 9 — Director of Central Intelligence Allen Dulles tells Congress that all U-2 flights are used for aerial espionage and are flown pursuant to “presidential directives.”
May 10 — House Appropriations Chair Clarence Cannon (D-Mo.) reveals to the press that the U-2 is a CIA plane engaged in aerial espionage over the Soviet Union “under the aegis” of the president. The press begins to suggest that Eisenhower has lost control of the intelligence agencies. (Wikipedia, “1960 U-2 incident”)

May 13 — 7:00 p.m. More than 100 people at Paracuru, Ceará, Brazil, watch a disc-shaped UFO. Flying about 600 feet in the air at low speed, the silent object maneuvers over the downtown area or a long time. About 60 feet in diameter, it hovers at an angle by a church. A strong bluish light is on top of it. The same day, 20 cities and towns in Ceará state, four in Rio Grande do Norte, three in Pernambuco, two in Paraíba, two in Bahia, and one each in the states of Piauí and Maranhão report UFO sightings. ( Lorenzen, UFOs: The Whole Story, Signet, 1969, pp. 220–221; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: January–June 1960, The Author, 2003, p. 92–93)

May 14 — 4:00 a.m. Fisherman Raimundo Ursulino dos Santos sees two metallic discs landed on a sandy hill by the beach at Paracuru, Ceará, Brazil. As he approaches, he sees two humanlike beings outside, talking to each other. They are small and pallid. One is dressed in a blue suit with a helmet. Dos Santos turns and runs away. Marks in the sand are found later. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: January–June 1960, The Author, 2003, p. 93; Patrick Gross, URECAT, September 29, 2007)

May 19 — A silver-colored round object, 20–25 feet wide with hanging appendages, hovers 50–100 feet away from Indigenous observers in the village of Ekuk, Alaska, south of Dillingham. It barely clears electric wires 12 feet above the ground. It sucks up two empty five-gallon trashcans and drags them swirling along the ground. It flies between two houses and crosses to the other side of a ridge for 100 yards, drops the trashcans and sucks up some swirling grass, makes a loud sucking sound, then ascends rapidly. Thomas M. Conrow, chief of intelligence at a nearby Air Force Base, interviews the witnesses and concludes that “there still appears to be no logical explanation of the sighting.” At Wright Patterson AFB, Blue Book analysts classify it as a “weather balloon with a radar reflector,” even though it is traveling against the wind. (Hynek UFO Report, pp. 146–149; Sparks, p. 284; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: January–June 1960, The Author, 2003, pp. 99–101)

May 22 — 9:33 a.m. An observatory on Majorca, Balearic Islands, Spain, sees a white, triangular object one-quarter the size of the moon spinning on its own axis and maintaining a steady course. It cables a report to NASA in Washington, D.C. (UFOEv, p. 123)

May 28 — Engineer Ronald N. Bracewell, suggests that extraterrestrials may already be in our neighborhood through an autonomous interstellar space probe (now called a “Bracewell probe”) sent for the express purpose of communicating with alien civilizations. (Ronald N. Bracewell, “Communications from Superior Galactic Communities,” Nature 186 (1960): 670–671)

Summer — 2:00 a.m. Two brothers are alerted by their journalist brother about an elusive UFO that local police in Walkerton, Ontario, have been pursuing for about an hour. They drive out along country roads until they get within 300 feet of the object, which is hovering around a large tree. The object is circular and apparently about 3 feet in diameter. It is very bright and changes color repeatedly. It then circles the tree purposefully for several minutes. The brothers climb a fence and approach it, but the UFO suddenly accelerates and disappears to the south. (J. Allen Hynek, The UFO Experience, Ballantine ed., 1974, pp. 54–56)

June 1 — Bulkley Griffin, chief of the Worcester (Mass.) Evening Gazette’s Washington, D.C., Bureau, writes a well-reasoned story about the Air Force’s unilateral control of UFO information and its national security implications. He quotes Adm. Hillenkoetter’s opinion that UFOs are intelligently controlled and are neither US nor USSR devices, which is why he is pushing for a Congressional investigation. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: January–June 1960, The Author, 2003, pp. 111–112)

June 12 — 3:00 or 4:00 p.m. Following a sonic boom above Quebec, a fiery object falls from the sky from an altitude of 1,000–2,000 feet and splits into two pieces that fall into the St. Lawrence River near Les Écureuils, about 20 miles upriver from Quebec City, Quebec. A beachcomber runs across the pieces, one closer to the shore and visible at low tide, the other one further out and mostly submerged. He retrieves a smaller piece (800 pounds) and sells it to a scrap-metal dealer, who fails to recognize it as ferrous and possibly ships it to Japan. The other piece is picked up by the Canadian Armament Research and Development Establishment [now DRDC Valcartier] near Quebec City. Wilbert Smith’s Ottawa Flying Saucer Club [later the Ottawa New Sciences Club] tells its members that the material is high-strength metal that is 6 feet in diameter and 2 feet thick at the center with an embedded tube, an “electronic potting can,” and a transistor. CARDE’s analysis is said to have revealed an alloy with a high manganese content, although it was identified as the “normal product of a foundry, consisting of slag with semi-molten scrap embedded in it,” likely coming from Sorel Iron Foundries in Sorel, Quebec. Smith rejects those findings and and conducts his own tests (although he is an electrical engineer and not a metallurgist) on a chunk
the club retrieves from the river around July 1, supposedly engaging in a "tremendous amount of detective work on this metal." In November 1961, Smith tells Ohio UFO researchers C. W. Fitch and George Popovitch: "We are speculating that what we have is a portion of a very large device which came into this solar system...we don’t know when...but it had been in space a long time before it came to Earth; we can tell by the micrometeorites embedded in the surface. But we don’t know whether it was a few years ago—or a few hundred years ago.” In June 1968, the Colorado project’s Roy Craig is in Ottawa and offers to examine the club’s chunk of metal because they had offered it to Condon a year earlier. Craig obligingly takes a piece with him but does not analyze it since there is no connection to a UFO and it looks like foundry slag anyway. Later, the Montreal UFO Society’s Ronald Anstee has a piece of it analyzed by an independent metallurgist, who finds that the composition “does not correspond to any known commercial manganese steel.” In September 1967, Eric Smith of the Canada Department of Energy, Mines, and Resources visits the Ottawa club and examines their large artifact, but fails to report back. In 1969, the National Research Council’s Peter Millman takes a look and is convinced that it is ordinary manganese steel from the Sorel plant. (“The Mysterious Chunks of Hardware at Ottawa,” Topside, no. 20 (Spring 1966): 4–6; Frank Edwards, FS Serious Business, Bantam ed., 1966, pp. 48–49; “The Mystery of UFO Hardware,” Topside, no. 24/25 (Spring/Summer 1967): 10–11; “Unidentified Hardware Mystery Deepens,” Topside, no. 27 (Winter 1968): 4–9; “Latest Report on the Mystery Metal,” Topside, no. 29 (Summer 1968): 11–12; Condon, pp. 133–135; “Canada’s Mysterious Chunk of Metal,” Spacelink 6, no. 2 (January 1970): 6–9; “More Mystery Added to Ottawa’s Mysterious Chunk of Hardware,” Topside, no. 33 (Winter/Spring 1970): 13–17; “Latest Report on Ottawa’s Mystery Metal,” Topside, no. 34 (Summer/Fall 1970): 22–23; “New Developments on Ottawa’s Mystery Metal,” Topside, no. 35 (Winter 1971): 29–33; Story, pp. 208–209; John Robert Colombo, UFOs over Canada, Hounslow, 1991, pp. 53–56; Roy Craig, UFOs: An Insiders’ View of the Official Quest for Evidence, University of North Texas, 1995, pp. 121–132; Good Above, pp. 188–189; Chris Rutkowski, Canada’s UFOs: Declassified, August Night, 2022, pp. 166, 229–249)

June 21 — NICAP sends a confidential report to the US Congress on “Dangers of Secrecy on UFOs (Unidentified Flying Objects) and Digest of Documented Evidence” urging legislators to go on the record about the reality of UFOs. (Donald E. Keyhoe, “Confidential NICAP Report to Congress: Dangers of Secrecy on UFOs (Unidentified Flying Objects) and Digest of Documented Evidence,” June 21, 1960)

June 22 — 6:20 p.m. John Person is setting up camp at Clan Lake, Northwest Territories, on a prospecting expedition and is waiting for his partner. He hears a noise like an aircraft approaching and something bounces and hits the surface of the lake about 1,700 feet behind him. Person sees an object 4–6 feet wide with arms or spokes is rotating rapidly in the water, but gradually slows down and stops spinning. When his partner arrives, they get into a canoe and travel to the impact area. They find an area of burned grass and another area where grass it cut up in small pieces. They use a pole to probe the lake bottom and find a channel that is one foot deeper at one end and three feet deeper at the other. RCMP Cpl. Matheson flies to the lake in a seaplane on July 19 and August 15 and finds the impact area as Person has described but no submerged object. (Royal Canadian Mounted Police, “Report of Strange Object Striking Clan Lake, Clan Lake Dist., N.W.T.,” July 19, July 25, and August 25, 1960; Chris Rutkowski, Canada’s UFOs: Declassified, August Night, 2022, pp. 98–102)

July — Members of the US Senate Preparedness Committee and the House Science and Astronautics Committee, as well as the CIA, ask for hearings on USAF's handling of UFOs. (Clark III 922)

July 1 — 10:30 a.m. Four witnesses at the Leefe Mine in Lincoln County, Wyoming, see a shiny disc move in from the south and hover above a slag heap. It has a diameter of at least 185 feet and is 14 feet thick. Five transparent bubbles are visible on the bottom as it rocks gently before moving off to the south at high speed. (Lorenzen, UFOs: The Whole Story, Signet, 1969, p. 221)

July 2 — Early morning. A couple driving in the vicinity of Kankakee, Illinois, see the landscape light up with a bright blue light as a ball of fire approaches out of the south. It passes above their car dragging a trail of bluish light behind it. The inside of the car heats up uncomfortably, waking up their daughter and her husband who are asleep in the back. The light gradually fades and disappears in the north. (Lorenzen, UFOs: The Whole Story, Signet, 1969, pp. 221–223)

July 3 — 4:30 p.m. Argentine Air Force Capt. Hugo F. Niotti is driving north near Villa General Belgrano, Córdoba, Argentina, when he notices a dark object hovering to the right of the road. He stops his car, grabs his camera, and takes a photo of the object, which is moving slowly over a field. As he is winding the film to take another shot, the object accelerates and disappears into the clouds. The photo shows a conical object low above the ground, as well as a horse whose attention is attracted to the object. Analysis shows that the object is about 23 feet high, 20 feet in diameter, and 56 feet above the ground. (Guillermo C. Roncoroni and Gustavo J. Alvarez, “Foto de OVNI Avalada por la Fuerza Aerea Argentina,” UFO Press 1, no. 3 (April 1977): 32–38; “Cone-Shaped UFO

July 13 — The Air Force gives a preliminary briefing to associate counsel Stuart French, staff member of the Senate Preparedness Committee, who wants to know about USAF explanations for the Washington National Airport and Levelland cases. (Jacobs, UFO Controversy in America, Signet ed., 1976, p. 156)

July 26 — Lt. Col. Lawrence J. Tacker writes to Springfield that “There is absolutely no truth in the charge that the Air Force or any other governmental agency is withholding information on the subject of UFOs from the general public.” (Springfield, Situation Red, Fawcett Crest, 1977, p. 167)

August — The US severs diplomatic relations with the Dominican Republic. The CIA’s Special Group decides to arm Dominicans in hopes of an assassination of generalissimo Rafael Trujillo. The CIA disperses three rifles and three .38 revolvers, but things pause in 1961 as John F. Kennedy assumes office.

August 10 — The Discoverer 13 Corona KH-1 photoreconnaissance satellite is launched from Vandenberg AFB [now Vandenberg Space Force Base], California. The primary goal of this series of satellites is to replace the U-2 spy plane in surveilling the Sino-Soviet Bloc, determining the disposition and speed of production of Soviet missiles and long-range bombers assess. The Corona program is also used to produce maps and charts for the Department of Defense and other US government mapping programs. On August 11, after 17 orbits, the satellite splashes down in the North Pacific and its payload is recovered. It represents the first-ever successful recovery of an object from orbit. (Wikipedia, “Discoverer 13”)

August 11 — 3:10 p.m. Ray Hawks is operating a farm tractor at Left Hand Canyon near Altona, Colorado, when he hears a muffled explosion. Looking up, he watches a disc dropping vertically out of the cloud cover. It stops in midair about 650 feet away from him and 200 feet above the ground, wobbling a bit. When it stabilizes, he sees it looks like two concave discs joined together at the rim and dull aluminum in color. Bluish smoke is issuing from an apparent gap in its surface. An electric hum seems to come from inside the object. The section where the smoke is issuing is withdrawn inside, and a new section appears to replace it, settling in with a click. The hum increases in intensity, and the object appears to be surrounded by a heat haze. It then shoots up into the clouds and vanishes. (Lorenzen, UFOs: The Whole Story, Signet, 1969, pp. 223–225)

August 12 — NASA’s Echo 1 balloon satellite is launched by a Thor-Delta rocket and becomes the first passive communications satellite. Microwave signals are bounced off the satellite from one point on earth to another. (Wikipedia, “Project Echo”)

August 13–14 — 11:50 p.m.–2:05 a.m. Highway Patrol officers Charles A. Carson and Stanley E. Scott, plus three others at Red Bluff, California, are on patrol when see what they think at first is an airliner about to crash. It turns out to
be a maneuvering, silent red light with five white lights, descending to 100–200 feet altitude. It suddenly reverses course, climbs to 500 feet, hovers, sweeps the ground with a red beam, performs aerial gymnastics, then heads east, chased by the police car. It is joined by a similar object from the south, then it disappears in the east. A local radar operator confirms the UFO at the time but denies it the next day. Tehama County sheriff’s officers also see the UFO and another similar one the same night. (NICAP, “Red Bluff Incident”; “False AF Answer in Red Bluff Case,” NICAP Special Bulletin, October 1960, pp. 1, 4; Schopick, pp. 96–100; Lorenzen, FSHoax, pp. 180–182; Lorenzen, UFOs: The Whole Story, Signet, 1969, pp. 153–156, 225; Hynek UFO Report, pp. 92–94; Clark III 1002–1006; Sparks, p. 284; UFOEv, pp. 61–62, 112; Swords 295–297; “Red Bluff: 1960,” Saturday Night Uforia, February 16, 2017)

August 16 — Night. A woman in Charleston, South Carolina, takes a photo of a mystery satellite that is in the same part of the sky as Echo I, which is also in the photo. (Michael D. Swords, “Gazing at the Moons,” IUR 32, no. 4 (October 2009): 13)

August 17 — The trial for downed U-2 pilot Francis Gary Powers begins in Moscow.

August 18 — The Discoverer 14 Corona KH-1 spy satellite is launched. It is the first completely successful mission and returns images of the Mys Schmidtka airfield in Siberia. (Wikipedia, “Discoverer 14”)

August 25 — The National Security Council recommends to President Eisenhower the establishment of a top secret National Reconnaissance Office to coordinate USAF and CIA reconnaissance satellite activities because of management problems with the USAF satellite program. (Wikipedia, “National Reconnaissance Office”)

August 26 — 9:00 p.m. Director Robert I. Johnson and other staff at the Adler Planetarium in Chicago, Illinois, observe a faint reddish object in the sky moving from east to west, apparently the same mystery satellite seen and photographed by the Grumman observers. (Michael D. Swords, “Gazing at the Moons,” IUR 32, no. 4 (October 2009): 13; Swords 294; Center for UFO Studies, “Moonwatch Mystery Satellites, 1958–1962”)

August 31 — Rep. Leonard G. Wolf (D-Iowa) makes a statement in the House on NICAP’s “Dangers of Secrecy on UFOs” report, saying that it is “imperative to end the risk of accidental war from defense forces’ confusion over UFOs.” He mentions NICAP board member Adm. Roscoe Hillenkoetter’s request that “Congress inform the public as to the facts.” Based on a three-year NICAP study, Wolf states that all defense personnel “should be told that the UFOs are real and should be trained to distinguish them—by their characteristic speeds and maneuvers—from conventional planes and missiles…. The American people must be convinced, by documented facts, that the UFOs could not be Soviet machines.” (“NICAP UFO Report: Extension of Remarks of Hon. Leonard G. Wolf of Iowa in the House of Representatives, Wednesday, August 31, 1960,” Congressional Record, Proceedings and Debates of the 86th Congress, Second Session, vol. 106, Part 14, pp. 18955–18956; Good Need, p. 261)

Late August — Two men in a car near Butte Falls, Oregon, see a pale-white light hovering 300 feet ahead of them. They watch it for 15 minutes, then decide to drive closer. The light then rises to 100 feet and recedes, then changes to orange. No sound is heard. The light performs geometrical maneuvers, creating rectangle paths and other zigzags. It then accelerates, changes back to white, and zooms off. (Swords 294)

Late August or early September — Evening. Rhodes McCarrol and his grandfather, sitting on the upstairs back porch of their home in Memphis, Tennessee, notice a glowing basketball-sized globe in the soil by the hedge. They watch it for 5 minutes, then see a figure standing behind the ball. It is a glowing nude, generally humanlike figure, about 6 feet tall, holding a light at chest level. The figure is square-shouldered and has disproportionately long legs that are narrow and pointed between the knees and ankles. The witnesses watch another 5 minutes, at which point the globe and the entity begin to fade and are gone from sight in another 5 minutes. (Clark III 279–280)
September — Groom Lake in Nevada receives the name “Area 51” when A-12 test facility construction begins, including a new 8,500-foot runway (Runway 14/32) to replace the existing one built for the U-2. (Wikipedia, “Area 51”)

September — CIA officer Richard M. Bissell Jr. and DCI Allen W. Dulles initiate talks with two leading figures of the Mafia, Johnny Roselli and Sam Giancana. Later, other crime bosses such as Carlos Marcello, Santo Trafficante Jr., and Meyer Lansky become involved in the first plot against Fidel Castro. The strategy is managed by Sheffield Edwards, Robert Maheu, a veteran of CIA counterespionage activities, is instructed to hire the Mafia to kill Castro. The advantage of employing the Mafia for this work is that it provides the CIA with a credible cover story. The Mafia are known to be angry with Castro for closing their profitable brothels and casinos in Cuba. On September 14, Maheu meets with Roselli in a New York City hotel and offers him $150,000 for the “removal” of Castro. James O’Connell, who identifies himself as Maheu’s associate but is really the chief of the CIA’s operational support division, is present during the meeting. Declassified documents do not reveal if Roselli, Giancana, or Trafficante accept a down payment for the job. According to CIA files, it is Giancana who suggests poison pills to add to Castro’s food or drinks. Such pills, manufactured by the CIA’s Technical Services Division, are given to Giancana’s nominee named Juan Orta. Giancana recommends him as being an official in the Cuban government with access to Castro. Allegedly, after several unsuccessful attempts to introduce the poison into Castro’s food, Orta abruptly demands to be let out of the mission, handing over the job to another unnamed participant. Later, a second attempt is mounted through Giancana and Trafficante using Tony Varona, the leader of the Cuban Exile Junta, who has, according to Trafficante, become “disaffected with the apparent ineffectual progress of the Junta.” Varona requests $10,000 in expenses and $1,000 worth of communications equipment. However, it is unknown how far the second attempt goes, as it is canceled due to the launching of the Bay of Pigs Invasion. (Wikipedia, “Sam Giancana”, Wikipedia, “Assassination attempts on Fidel Castro”)

September — MKUltra chief Sidney Gottlieb brings a vial of poison concealed in toothpaste to the Democratic Republic of the Congo with plans to place it on Prime Minister Patrice Lumumba’s toothbrush. The plot is abandoned, allegedly because CIA station chief Larry Devlin refuses permission. (Wikipedia, “Patrice Lumumba”)

September — The USAF Assistant Chief of Staff for Intelligence turns down ATIC’s request for one additional staffer for Project Blue Book (raising it to 3) and additional funding. (Clark III 922)

September 2 — 11:30 p.m. Richard Ireton and his wife are driving on US Highway 1 in Westbrook, Connecticut, when they notice what seems to be an aircraft about to crash. It veers close to the shore and the Iretons drive to the beach to look for it. They see a triangular-shaped object flying silently at the speed of a Piper Cub airplane, alternately hovering and moving horizontally and vertically. When it reaches the public beach, it takes off at great speed toward Long Island, New York. They see a similar object the next evening around 9:30 p.m. at Chalker Beach in Old Saybrook, Connecticut. (“Flying Triangle’ Seen in State.” Hartford (Conn.) Courant, September 17, 1960, pp. 1–2)

September 8 — Night. Witnesses in Consett, South Shields, and Newcastle upon Tyne, England, see a triangular formation of lights with a red light in the center. (London Evening Chronicle, September 9, 1960; Marler 76)

September 10 — A married couple in Scituate, Massachusetts, sees a trio of brilliant discs parked in a triangle formation in the sky. About 12” to the objects’ left is a huge cylinder. One witness watches them through binoculars, and the brilliance hurts his eyes for two hours. Two more discs seem to be attached to the top of the cylinder. Small domes sprinkle their surface. The large object disappears too quickly for the eye to follow. (Swords 294)

September 10 — 9:50 p.m. Mr. and Mrs. M. G. Evans see 2 light-gray glowing objects, saucer or boomerang-shaped, that swish when accelerating, over Ridgecrest, California. (Swords 294; Sparks, p. 285)

September 14 — 2:50 a.m. A dispatcher in Lorain, Ohio, is taking a coffee break when he sees a light that he thinks is the Echo 1 satellite. As he watches it, knowing it is not the right time for Echo 1, he sees four objects traveling in a perfectly spaced line of flight. It makes a surprising right turn, after which the objects move on their way, apparently at a great height. (Michael D. Swords, “I’ve Seen the Light…But What Was It?” IUR 32, no. 3 (July 2009): 3; Swords 294–295)

September 15 — 7:30 a.m. A witness sees a UFO hovering 300–400 feet above the Douglas Aircraft plant in Santa Monica, California, and calls it into the West Los Angeles police station. Desk Officer Don Anderson goes outside and sees a dark triangular object moving slowly to the northeast at 3,000 feet. It disappears in the vicinity of Santa Monica Boulevard and Beverly Glen Street. (“Officer Reports Flying Triangle,” San Pedro (Calif.) News-Pilot, September 15, 1960, p. 1)

September 15 — Ruppelt dies of a heart attack in Long Beach, California, at age 37. (Clark III 1024)

September 29 — 9:25 p.m. Five people are out looking for the Echo 1 satellite in New Westminster, British Columbia. After they spot it, they remain for a few minutes talking. One of them sees three objects come up from the
southeast, pass overhead, and disappear over the rooftops in 10 seconds. The objects are luminous, round-cornered triangles. (Michael D. Swords, “Timmerman’s Triangles,” IUR 29, no. 2 (Summer 2004): 16)

October 30 — Tiffany Thayer’s widow Tanagra Thayer formally disbands the Fortean Society. (Clark III 516)

October — Reynolds Electrical and Engineering Company begins construction of “Project 51” at the Nellis AFB complex in Nevada with double-shift personal schedules. They mark an Archimedean spiral on Area 51’s dry lake approximately two miles across so that an A-12 pilot approaching the end of the overrun can abort instead of plunging into the sagebrush. Area 51 pilots call it “The Hook.” For crosswind landings, they mark two unpaved airstrips (runways 9/27 and 03/21) on the dry lakebed. (Wikipedia, “Area 51”)

October 4 — 6:10 p.m. Rev. Lionel Browning and his wife are looking at a rainbow outside their rectory in Cressy, Tasmania, when they see a gray, cigar-shaped object emerge from a raincloud. It has 4 or 5 vertical, dark bands around its circumference and an aerial array that projects from the top. Browning estimates it to be 100 feet long and about 4 miles distant. It moves north at about 60–70 mph at about 400 feet altitude. After one minute, it stops and is joined by 5–6 smaller objects that emerge from a cloud. After another minute, all the UFOs abruptly reverse back into the rain squall at the same speed. (“Mysterious Ships in the Sky,” Australian Flying Saucer Review 1, no. 4 (February 1961): 1–2; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: July–December 1960, The Author, 2003, pp. 104–107; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: January–June 1961, The Author, 2003, pp. 35–36; Clark III 350–352; Bill Chalker, “The Australian Government and UFOs,” IUR 22, no. 3 (Fall 1997): 19–20; Swords 385–388)

October 5 — A formation of UFOs is detected by the new Ballistic Missile Early Warning System at Thule Site J in Greenland. The objects appear to be heading directly toward North America from the direction of Russia. Within seconds, Strategic Air Command headquarters in Omaha, Nebraska, scrambles the crews of B-52 bombers armed with nuclear warheads to prepare a retaliatory strike. But at the last moment checks reveal that the objects are spurious radar echoes. Unusual atmospheric conditions create phantoms on the BMEWS that cannot be seen by other radars. (Eric Schlosser, Command and Control: Nuclear Weapons, the Damascus Incident, and the Illusion of Safety, Penguin, 2013, pp. 253–254, 542)

October 20 — Australian MP Gil Duthie asks Frederick Osborne, Australian Minister for Air, whether he has read the account of the UFO seen at Cressy, Tasmania. Osborne responds that he has, and he admits that the Department of Air receives UFO reports and shares them with the RAF and the US Air Force. However, all of them are “explainable on a perfectly normal basis.” (Clark III 352; Swords 387)

October 31 — Most guerrilla infiltrations and supply drops directed by the CIA into Cuba have failed; these are replaced by a plan to mount an initial amphibious assault with a minimum of 1,500 men.

November 3 — 4:30 p.m. Two 8-year-old boys are walking over a small hill in rural Price County, Wisconsin, when they hear an odd high-pitched, humming noise. The air has become unusually warm. They look back and see an aluminum-colored object on the hill behind them. They run back toward it, but it lifts off and shoots away. They find the soil of the hill to be warm to the touch. (“Small Boys See Warm, Landed UAO,” APRO Bulletin, January 1961, pp. 1, 4)

November 4 — House Majority Leader John W. McCormack (D-Mass.) writes to Keyhoe that “it was pretty well established by some, in our minds, that there were some objects flying around in space that were unexplainable.” (“Congressmen Confirm AF Secrecy: Pressure for Investigation Increasing,” UFO Investigator 1, no. 11 (Dec./Jan. 1960/1961): 1; UFOEv, p. 175)

November 15 — 10:40 a.m. A USAF B-57 Canberra reconnaissance aircraft operating out of RAAF Base East Sale, Victoria, Australia, encounters a UFO 15 miles north of Launceston, Tasmania. Capt. Douglas G. Ludlam and Capt. Joseph W. Ivins say it looks like a balloon about 70 feet in diameter and is flying at 35,000 feet, just below the B-57, and traveling at about 920 mph. It is in sight for 5–7 seconds before it disappears under the left wing. (Bill Chalker, “Australian A.F. UFO Report Files,” APRO Bulletin 30, no. 11 (December 1982):4; Clark III 352; Sparks, p. 285)

November 18 — Director of Central Intelligence Allen Dulles and CIA Deputy Director for Plans Richard Bissell brief President-elect John F. Kennedy on the Cuban invasion. Dulles is confident that the CIA can overthrow the Cuban government.

November 29 — Eisenhower meets with the chiefs of the CIA, Defense, State, and Treasury departments to discuss the new concept of a Cuban invasion. No one expresses objections, and Eisenhower approves the plans with the intention of persuading John F. Kennedy of their merit.

December 8 — Richard Bissell presents an outline for the Cuban invasion to the Special Group, while declining to commit details to written records.

December 9 — 8:30 p.m. Mme. Dhelens in the Château des Mailles (31 miles south of Carignan-de-Bordeaux), Gironde, France, sees a luminous oval object twice the size of an automobile hovering just above the ground in the château’s park. It has two round portholes, behind which she sees indistinct shadows moving. It takes off, leaving a 12-foot circle of yellowed grass, which later dies. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: July–December 1960*, The Author, 2003, p. 138)

December 14 — The Brookings Research Institute in Washington, D.C., releases a 186-page report prepared for NASA titled *Proposed Studies on the Implications of Peaceful Space Activities for Human Affairs*. It is later published as a 272-page Committee Print for the House Committee on Science and Astronautics on March 24, 1961. The report includes a section on “Implications of a Discovery of Extraterrestrial Life.” It is sent to the House Committee on Science and Astronautics for approval by Rep. Overton Brooks (D-La.) and discusses the effects of meeting extraterrestrial life: “It is possible that if the intelligence of these creatures were sufficiently superior to ours, they would choose to have little if any contact with us.” It also speculates on the possibility of finding alien artifacts on earth and the possibility that contact might result in social disintegration. (Wikipedia, “Brookings Report”; *Proposed Studies on the Implications of Peaceful Space Activities for Human Affairs*, committee print prepared for NASA by the Brookings Institution, Report of the US House Committee on Science and Astronautics, 87th Congress, First Session, March 24, 1961, pp. 215–216, 225–226 (note 34))

December 14 — The first Single Integrated Operational Plan, titled SIOP-62, is completed. It describes a massive strike with the entire US arsenal of 3,200 warheads, totaling 7847 megatons, against Russia, China, and Soviet-aligned states with urban and other targets being hit simultaneously. Nine weapons are to be “laid down” on four targets in Leningrad [now St. Petersburg], 23 weapons on six target complexes in Moscow, and 18 on seven target areas in Kaliningrad. Weapons scientist George W. Rathjens looks through SAC’s atlas of Soviet cities, searching for the town that most closely resembles Hiroshima in size and industrial concentration. When he finds one that roughly matches, he asks how many bombs the SIOP “laid down” on that city. The reply: one 4.5 megaton bomb and three more 1.1 megaton weapons in case the big bomb is a dud. The execution of SIOP-62 is estimated to result in 285 million dead and 40 million casualties in the Soviet Union and China. Presented with all the facts and figures, USAF Gen. Thomas D. White finds the plan “splendid.” Disregarding the human aspect, SIOP-62 represents an outstanding technological achievement. (Wikipedia, “Single Integrated Operational Plan”; Daniel Ellsberg, *The Doomsday Machine*, Bloombury, 2017, pp. 90–103)

December 27 — Blue Book officer Maj. Robert Friend and his boss at ATIC, Philip G. Evans, write a memo to Air Force Intelligence in the Pentagon. Friend complains about civilian UFO organizations supported by people for “financial gain, religious reasons, pure emotional outlet, ignorance, or possibly to use the organization as a ‘cold war’ tool.” He is upset by their accusations that the Air Force is withholding UFO information. (Swords 292)

1961 — The first American to publish on the microwave auditory effect is biophysicist Allan H. Frey. In his experiments, the subjects are able to hear appropriately pulsed microwave radiation from a distance of 328 feet from the transmitter. This is accompanied by side effects such as dizziness, headaches, and a pins-and-needles sensation. (Allen H. Frey, “Human Auditory System Response to Modulated Electromagnetic Energy,” *Journal of Applied Physiology* 17 (July 1, 1962): 689–692; Wikipedia, “Microwave auditory effect”)
1961 — Ray Palmer begins publishing The Hidden World, a quarterly magazine in trade-paperback format that runs through 1964. It consists of reprints of Richard Shaver stories and readers’ contributions. (Clark III 873)

1961 — George Adamski publishes Flying Saucers Farewell, signaling his intention to refocus his efforts on teaching about life and consciousness. (George Adamski, Flying Saucers Farewell, Abelard-Schuman, 1961; “Final Years,” The Adamski Case, June 11, 2009)

1961 — An Antonov AN-2P mail biplane takes off from an airfield at or near Sverdlovsk, Russia, bound for Kurgan with seven people on board. About 80–100 miles from Sverdlovsk, the aircraft disappears from the radar screen. Ground control cannot regain contact, so a search is launched with helicopters and troops. The aircraft is found in a small clearing in a dense forest, completely intact. The authorities state that it looks like it was placed there gently from above. All the mail is intact, and there is no sign of anyone on board. No marks or footprints are seen. A 100-foot wide, clearly defined circle of scorched grass and depressed earth is found at a distance of 328 feet from the plane. A report by the Moscow Aviation Institute claims that a UFO was tracked on radar at the control tower and that strange radio signals were heard at the time of the disappearance. (Good Above, pp. 228–229)

1961 — A UFO appears above the iron-ore mine of Catalina Huanca, owned by the Marcona Mining Company, near Apongo, Peru. It hovers for 5–15 minutes, only about 300 feet away from a young mining engineer. It is round and glowing, with windows on the upper part. The engineer gets a look at it through his theodolite, but it still looks fuzzy. The object reappears throughout the day, allowing all the mine workers (about 70) to view it. The following day it follows a supply truck for several hours as it exits the mine heading south over a dirt track. (S. Parker Gay Jr., “Peru, 1961,” IUR 24, no. 3 (Fall 1999): 29)

January — Day. Government topographer Adolfo Paolini Pisani is driving a jeep along the highway between La Victoria and El Vigía, Mérida, Venezuela, when a truck passes him. A few minutes later, a brilliant metallic disc like polished blue steel swoops down and passes dangerously close above the hood of the truck. The truck rises a few feet into the air and over turns in the direction taken by the object, falling in a sandbank with its wheels in the air. The object ascends and is lost to view in a few seconds. Pisani stops his jeep to assist, but fortunately the lone driver has only a few scratches. (Horacio Gonzales, “Disc Upsets Truck,” APRO Bulletin, September 1961, pp. 1, 3)

January 3 — President Eisenhower severs diplomatic relations with Cuba.

January 3 — 9:01 p.m. An explosion at the US Army’s SL-1 nuclear power reactor in Idaho Falls, Idaho, causes a meltdown, killing three operators. The direct cause is the improper withdrawal of the central control rod, responsible for absorbing neutrons in the reactor core. The event is the only reactor accident in the US that results in immediate fatalities. (Wikipedia, “SL-1”)

January 4 — The CIA Deput y Director of Plans Richard Bissell plans for a “lodgement” by 750 men at an undisclosed site in Cuba, supported by considerable air power.

January 8 — Pravda asserts that “some regions” (including Uzbekistan and Tajikistan) of the USSR are reporting UFOs. It quotes physicist Lev Artsimovich saying that “it is about time that these tales be stopped no matter how breathtaking they may be.” (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: January–June 1961, The Author, 2003, pp. 5–6)

January 10 — A US Navy A-1 Polaris missile is launched from a ground pad at Cape Canaveral, Florida. A disc, whose diameter is close to the length of the Polaris, alters its tracking, but does not block the missile firing, since the tracking system continues to follow the object and later returns to again to track the Polaris downrange. The diameter of the disc is approximately 20–25 feet and it is about 6–8 feet thick at its center. It is visually lost to ground observers and the primary witness (Clark C. McClelland, with 10x50 binoculars) as it continues downrange. The original investigation is conducted by McClelland and his Florida NICAP subcommittee. (NICAP, “UFO ‘Alters’ Tracking of Navy Polaris Test”; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: January–June 1961, The Author, 2003, pp. 6–7; Sparks, p. 286)

January 12 — In a press conference in Moscow, Russia, Minister of Merchant Marine Viktor Bakaev charges that US military aircraft and ships are systematically conducting “provocative actions” against Soviet vessels around Cuba. He is probably referring to close approaches to Cuban airspace by Fort Bliss–based reconnaissance aircraft that are testing the responses of Soviet electronic countermeasures. (Jacobsen, Area 51, pp. 155–157)

January 17 — DRC Prime Minister Patrice Lumumba is executed by firing squad near Élisabethville [now Lubumbashi], Democratic Republic of the Congo. CIA Station Chief Larry Devlin has helped direct the search to capture Lumumba for his transfer to his enemies in Katanga, he is involved in arranging Lumumba’s transfer there, and he is in direct touch with the killers the night Lumumba is killed. The Congolese leaders who kill Lumumba, including Mobutu Sese Seko and Joseph Kasa-Vubu, receive money and weapons directly from the CIA. John Stockwell writes in 1978 that a CIA agent had the body in the trunk of his car in order to try to get rid of it.
Stockwell, who knows Devlin well, feels Devlin knows more than anyone else about the murder. However, documents released in 2017 reveal that the US role in Lumumba’s murder was only under consideration by the CIA and never carried out. (Wikipedia, “Patrice Lumumba”)

January 17 — Eisenhower delivers a farewell address in a TV broadcast. Perhaps best known for advocating that the nation guard against the potential influence of the military–industrial complex, a term he is credited with coining, the speech also expresses concerns about planning for the future and the dangers of massive spending, especially deficit spending, the prospect of the domination of science through federal funding, and, conversely, the domination of science-based public policy by what he calls a “scientific-technological elite.” (Wikipedia, “Eisenhower’s farewell address”)

January 17 — 6:17 p.m. A former weather officer at Holloman AFB is driving with some companions near Cimarron, New Mexico, when they see three different groups of amber UFOs flying in V-formation about 15 miles away at 30,000 feet. There are six lights in the first group and eight in the second and third. They fly away to the southwest and then return to where they first appeared. (Lorenzen, UFOs: The Whole Story, Signet, 1969, pp. 226–227)

January 19 — A USAF press release proclaims that “not even a minute fragment of a so-called ‘flying saucer’ has ever been found.” (Frank Edwards, FS Serious Business. Bantam ed., 1966, p. 48)

January 22 — 4:45 p.m. An elliptical, metallic-looking UFO approaches Eglin AFB near Valparaiso, Florida, from over the Gulf, makes a U-turn and speeds back over the Gulf. Harry Caslar is filming his son on the beach with 8mm movie film and captures the UFO. (UFOEv, p. 95)

January 28 — President Kennedy is briefed, together with all the major departments, on the latest plan (code-named Operation Pluto) that involves 1,000 men landed in a ship-borne invasion at Trinidad, Cuba, about 170 miles southeast of Havana at the foothills of the Escambray Mountains in Sancti Spiritus province. Kennedy authorizes the active departments to report progress.

February — Forester Vasili Brodski finds a mysterious crater 100 feet long, 50 feet wide, and 10 feet deep on the bank of a frozen lake in Karelia, Russia. It had not been there two days earlier. The base is remarkably smooth, and around the edge are lumps of grass and soil but no trace of the excavated dirt. Six investigators from Leningrad [now St. Petersburg] arrive and find odd, crumbling black pellets on the edge of the lake. Divers discover a 330-foot strip where the soil has been displaced along the floor of the lake, as if something slid along the ground and submerged, ploughing up the soil. Geologist Vsevolod Charmov examines ice, water, and soil samples but cannot explain a green discoloration on some of the submerged pieces of broken ice. The pellets seem to be an inorganic substance. (Hobana and Weverbergh 61–63)

February 5–7 — Many people report strange lights flashing around in the sky over Maine. Some blink and move up and down. A Portland Press Herald editorial, February 9, says: “Mysterious objects ‘lit up like a ball of fire and going fast’ zoom over Portland. Unidentified shapes with green, yellow, and red lights hover over Brunswick, then dart away with ‘unbelievable quickness.’ Strange things are happening. . . . The military had us just convinced that nothing such objects existed. The only trouble was that many people—good, reliable observers—continued to see these things.” (UFOEv, p. 138)

February 28 — 3:20 a.m. Clarence Blackwood and his wife hear a roaring sound in the sky at their home in Lakewood, Massachusetts. They look out the bedroom window and see a fiery cigar-shaped object moving at low altitude to the northeast. It is bright yellow in the middle with a bright red edge and surrounded by thin clouds of black smoke. The object rolls back and forth rapidly and travels slowly to the southwest. It passes directly above their house, illuminating the bedroom. The lights that they have left on in the kitchen dim three times and go out for 4–5 minutes. The object returns at 3:40 and the kitchen lights repeat their previous actions. (Schopick, pp. 115–117)

March — House Majority Leader John W. McCormack tells Keyhoe privately that he has urged the Science and Astronautics Committee, headed by Rep. Overton Brooks (D-La.), to investigate Air Force UFO secrecy. (Keyhoe, Aliens from Space, Signet ed., 1974, p. 76)

March 16 — 6:15 p.m. Brazilian meteorologist Rubens J. Villela, on the deck of the USS Glacier, watches a tear-shaped fireball over Admiralty Bay, South Shetland Islands, Antarctica, in slow, level flight. It leaves a long orange trail like a tracer bullet, then abruptly divides in two as if exploding. It disappears after 10 seconds. (UFOEv, pp. 53–54; James E. McDonald, “Statement on Unidentified Flying Objects,” in Symposium on Unidentified Flying
March 16 — 8:45 p.m. Mr. F. Reynolds and his 15-year-old son Lloyd are camped in their trailer 900 feet from the Murray River, at Bowna, New South Wales, when they see what appears to be a huge trailer with four windows and a red light at the end standing by the water. A fire is visible to the right of the object, and they can see four figures moving quickly between the object and the fire. Reynolds watches through binoculars and sees the entire array moving sideways in a jerking manner. After 45 minutes, it is all gone from sight. In the morning they can find no traces on the soft mud flat. (‘UFO Landing?’ Australian Flying Saucer Review, no. 5 (July 1961): 1–2)

Spring — Late evening. A couple parking in Millville, New Jersey, watch a bright light silently moving northward. It hovers, reverses direction, and maneuvers for 5 minutes. At one point it races directly at a star, abruptly stops, draws a neat, right-angled, half-box around it, and goes racing on. Finally it speeds out of sight in about 5 seconds. (J. Allen Hynek, The UFO Experience, Ballantine ed., 1974, p. 44; Michael D. Swords, ‘We Know Where You Live,’ IUR 30, no. 2 (January 2006): 10)

April — Maj. Tacker is removed from his job as Pentagon UFO spokesman and reassigned to Europe. He is replaced by Maj. William T. Coleman. (‘Tacker Replaced As Spokesman,” UFO Investigator 1, no. 12 (April/May 1961): 1–2; UFOEv, p. 108)

April 4 — President Kennedy approves the Bay of Pigs plan (also known as Operation Zapata) for the invasion of Cuba because it has an airfield that does not need extending to handle bomber operations, it is farther away from large groups of civilians than the Trinidad plan, and it is less noisy militarily, which would make any future denial of direct US involvement more plausible. (Wikipedia, “Bay of Pigs invasion”)

April 12 — Soviet cosmonaut Yuri Gagarin becomes the first human to go into outer space when his Vostok spacecraft completes an orbit of the earth. (Wikipedia, “Yuri Gagarin”)

April 17 — The Bay of Pigs invasion takes place in Cuba. A counter-revolutionary military (made up of Cuban exiles), trained and funded by the CIA, Brigade 2506 fronts the armed wing of the Democratic Revolutionary Front (DRF) and intends to overthrow the increasingly communist government of Fidel Castro. Launched from bases in Guatemala and Nicaragua, the invading force is defeated within three days by the Cuban Revolutionary Armed Forces under the direct command of Castro. (Wikipedia, “Bay of Pigs invasion”)

April 18 — 11:00 a.m. Joe Simonton hears a whining sound on his farm four miles from Eagle River, Wisconsin, and sees a silvery object, 30 feet in diameter and 12 feet high, with exhaust pipes around the periphery, land nearby. A door opens and a man appears, about 5 feet tall and wearing a black, turtle-neck pullover with a white band at the belt, and black trousers with a vertical white band along the side. Two other figures are visible inside. The creature is holding a metallic jug and making gestures suggesting he wants a drink. Simonton takes the jug into his basement, fills it with water, and returns it to the man. Simonton notices one man frying on a flameless grill and motions for some food. Simonton receives four ordinary pancakes or cookies, 3 inches in diameter, perforated with small holes. The object takes off after 5 minutes. Simonton gives one of the pancakes to Judge Frank Wellington Carter, who then passes it on to the National Investigations Committee on Aerial Phenomena; another he gives to J. Allen Hynek for Project Blue Book; and the third he keeps for himself. A thorough analysis is performed on one of the pancakes by the US Department of Health, Education, and Welfare, and the food is found to be made of terrestrial but tasteless ingredients, including hydrogenated oil and buckwheat flour. The Air Force concludes that Simonton is honest but has mistakenly conflated the reality of his breakfast with a dream. (Sparks, p. 287; Vallée, Magonia, pp. 23–25; Clark III 421–426; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: January–June 1961, The Author, 2003, pp. 32–34; Center for UFO Studies, [Hynek case documents]; Center for UFO Studies, [case photos]; Center for UFO Studies, [Lex Mebane case files]; Center for UFO Studies, [NICAP case documents]; Jerome Clark, “The Pancakes of Eagle River,” IUR 21, no. 1 (Spring 1996): 3–8, 27; Joshua Cutchin, “The Great Alien Bake-Off,” Fortean Times 332 (November 2015): 42–44)

April 19 — 7:40 p.m. Commanding Officer C. J. Peterson of the minesweeper HMS Maxton sees a swiftly moving object as the ship is 33 miles off San Vito Lo Capo, Sicily, Italy. It is green and leaves an orange trail as it moves higher and disappears to the northwest. The ship’s crew sees a similar object on April 20 at 4:50 a.m. when it is 25 miles south of Capo Carbonara, Sardinia, Italy. (1Pinotti 112–113)

April 25 — US Air Force Intelligence Collection Guidance Letter no. 4, originally classified Confidential, describes and provides guidance for Project Moon Dust reporting. Several items of interest appear in the document: classification level of Moon Dust Alerts and reports, focus of Moon Dust on “foreign earth satellite vehicles,” and destination agencies for Moon Dust reports among them. Project Moon Dust is a covert project to exploit the discovery of Soviet hardware when it temporarily lands in American hands. (Department of the Air Force, Objects, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 64–65)

April 29 — Around 4:00 p.m. Contractor John P. Gallagher is working at a home adjacent to Bailey’s Beach, Newport, Rhode Island. He sees a red spherical object bobbing on the ocean waves about 600 feet from the shore. Suddenly the object rises into the air to 60 feet and moves out to sea at about 100 mph. (“‘Head’ Floats—Flies,” *APRO Bulletin*, July 1961, p. 4)

May 5 — Astronaut Alan Shepard becomes the first American in space (for 15 minutes and 22 seconds) when his Freedom 7 capsule is launched from Cape Canaveral, Florida, as the first manned Project Mercury launch. (Wikipedia, “Mercury-Redstone 3”)

May 10 — Late evening. Richard Vogt, driving on a rural road south of Osakis, Minnesota, sees a “ball of fog approximately 3 feet in diameter” swiftly descending toward him at a 45° angle from a clear sky. Unable to take evasive action, Vogt can only stare as the object hits the upper part of his hood and windshield. The noisy impact generates a tremendous amount of heat; the windshield becomes extremely hot to the touch. The object leaves pit marks burned in the windshield, circular tracks on the glass, and burned specks in the finish of the hood. (C. W. Fitch, “*Monitoring and Scanning UFOs*,” *APRO Bulletin*, July 1963, p. 5; Clark III 716)

May 15 — An order approved by President Kennedy results in the dispersal of four machine guns to insurgents in the Dominican Republic. President Rafael Trujillo dies from gunshot wounds on May 30. In the aftermath, Robert Kennedy writes that the CIA has succeeded where it has failed many times in the past, but in the face of that success, it is caught flatfooted, having failed to plan what to do next. (Wikipedia, “Rafael Trujillo”)

Summer — Near Rybinsk, Yaroslavl Oblast, Russia, crews are setting up new missile batteries as part of Moscow’s defensive network. A huge disc-shaped object allegedly appears at an estimated altitude of 12.5 miles, surrounded by a number of smaller objects. A nervous battery commander panics and gives unauthorized orders to fire a salvo at the disc. All the missiles explode at an estimated distance of 1.2 miles from the target. A third salvo is not fired, because at that point the smaller objects stall the electrical apparatus of the entire missile base. After the smaller disc rejoin the big UFO, the electrical systems return. (Good Above, pp. 227–228; *Flying Saucers*, no. 47, May 1966, pp. 6–10)

Summer — Capt. Robert Filler andLt. Phil Lee, based with the 82d Fighter Interceptor Squadron at Travis AFB in Fairfield, California, are scrambled in their F-102 Delta Dagger jets to intercept a radar target that has been hovering at 50,000 feet for 30 minutes. They get a radar lock-on 20 miles out above the Sacramento Valley. The target is still stationary until they are 5 miles away, then the target moves quickly several times to a higher altitude. Filler estimates it is moving at 36,000 mph. (Good Need, pp. 245–246)

Summer — Day. Glenn E. Bradley watches a group of six metallic discs pass over his farm near Beloit, Ohio, at a low altitude. They are traveling in single file at about 30 mph and are spaced 1–2 miles apart. The objects are each about 60 feet in diameter at the bottom with a 30-foot dome on top. Within a transparent section in the center he can see two figures on each side. The objects begin banking to the left about 200–300 feet away. (“Soup Bowls over Ohio,” *CUFOS Associate Newsletter* 6, no. 1 (Feb./March 1985): 4, 6)

June 3 — 6:35 a.m. Giacomo Barra, Giuseppe Pordoi, Filippo Marin, and Silvano Guardinfante are in a motorboat off Savona, Italy, when the boat begins to roll badly. More than one-half mile away, they notice the surface of the sea is “bulging like an enormous ball, with long billows going out.” An object emerges from the sea and stops still for a few seconds at a height of 30 feet and rocks slightly. A halo forms around the base and it shoots away quickly across the sea and vanishes towards the northwest. (Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: January–June 1961*, The Author, 2003, p. 50; IPinotti 117–118)

June 3 — A civilian weather observer sees an object through a theodolite at Mercury, Nevada. It remains in sight for 2 hours at an altitude of 80,000–120,000 feet. Project Blue Book evaluators correctly identify the object as a probable U-2 aircraft flying out of Nellis AFB. (Mark Rodeghier, “The U-2 Spy Plane and Blue Book: Another Look,” *IUR* 27, no. 3 (Fall 2002): 21)
June 4 — Mrs. James W. Annis, a librarian, sees a large, narrow, elliptical object hovering low in the sky to the north of Blue Ridge Summit, Pennsylvania. Farther to the east, a cluster of smaller objects is hovering. She then watches the smaller objects streak across the sky to the larger one. All then move out of sight behind trees to the north-northwest. (UFOEv, p.71; Herbert S. Taylor, “Satellite Objects: A Further Look,” IUR 29, no. 2 (Summer 2004): 25)

June 5 — 2:30 a.m. Patrolman Jaime de Miranda and Astorgildo de Medeiros are called to the scene of a sighting on the Rodovia Anchieta highway 30 miles northwest of Santos, São Paulo, Brazil. When they arrive, they find about 20 cars stopped along the road and people watching a luminous disc-shaped object maneuvering in the area. The patrolmen try to signal the object by shining a spotlight on it, but they get no response. When they focus a red light on it, the object moves toward the cars at high speed. They take cover. Another responder, Marshal José Otavia Leite, is about to shoot at the object but other police prevent him. After 3 hours, the object gets dimmer. At 5:30 a.m., it is still visible through binoculars when it lands on the ground some distance from the highway. By daybreak it is no longer visible. (Lorenzen, UFOs: The Whole Story, Signet, 1969, pp. 227–228)

June 9 — A second USAF/NASA flight evaluation of the Avrocar is conducted on a modified second prototype at the Avro facility in Mississauga, Ontario. During these tests, the vehicle reaches a maximum speed of 20 knots and shows the ability to traverse a ditch 6 feet across and 18 inches deep. Flight above the critical altitude proves dangerous if not nearly impossible due to inherent instability. The flight test report further identifies a range of control problems. (Wikipedia, “Avro Canada VZ-9 Avrocar”)

June 11 — 11:00 p.m. José-Gregorio Darnaude y Rojas Marcos, 28, is lying in a hammock in the front of his house on the Fuenteluega Estate in Sevilla, Spain, when he feels a peculiar pricking sensation throughout his whole body but particularly in his head. His dogs are cowering, the sheep go completely crazy, and the crickets and cicadas become silent. Suddenly, a luminous disc about 15 feet in diameter appears from behind the house, flying from northeast to southwest. It makes an abrupt 90° turn and moves directly toward him, hovering about 600 feet away from him and 80 feet in the air, changing colors from white to orange to red to purple several times. Darnaude runs inside, but the disc turns bright white and shots away at enormous speed. (Vicente-Juan Ballester Olmos, “Twelfth Night: And a UFO,” Flying Saucer Review Case Histories, no. 18 (September 1974): 11)

June 19 — A flying object hovers for more than an hour above an airport at Exeter, Devon, England. Officials say: “We do not know what it is. It was seen on the radar screen and we had it under observation for some time. We think it is pretty big. It appears to be shining brightly and is about 50,000 feet up.” (UFOEv, pp. 80, 139)

June 30 — 2:00 p.m. Residents of Warsaw, Poland, see a large, luminous, roughly spherical, slowly moving object in the sky. It supposedly remains visible for more than 8 hours. (Poland 29–31)

July or August — Dusk. Florin Gorănescu is staying at a villa in Lacul Roșu, Romania. He and two colleagues notice on top of a nearby high cliff an intensely red light that remains motionless until it begins moving slowly northeast. (Romania 13)

July 1 — ATIC is removed from USAF Intelligence and added to the new Air Force Systems Command. Its name is changed to the Foreign Technology Division. Project Blue Book is included in the reorganization. (Sparks, pp. 12–13; Wikipedia, “National Air and Space Intelligence Center”)

July 1 — A new squadron that will become the 1st Aerospace Surveillance and Control Squadron becomes operational under the USAF Air Defense Command at Ent AFB [now the US Olympic Training Center], Colorado Springs, Colorado, part of NORAD’s Space Detection and Tracking System. The first squadron commander is Col. Robert Miller. The Space Track organization at Hanscom Field, Bedford, Massachusetts, assumes a backup role for squadron operations. (Wikipedia, “1st Space Operations Squadron”)

July 11 — 10:35 p.m. Jacques Vallée and others at the Paris Observatory in Meudon, France, see a mystery satellite as part of Project Moonwatch. The following day the director of the project confiscates all their data and destroys it, apparently in fear of being laughed at by the press, scientific colleagues, and the Americans. (Jacques Vallée, Forbidden Science, North Atlantic, 1992, pp. 41–42; Michael D. Swords, “Gazing at the Moons,” IUR 32, no. 4 (October 2009): 11–12)

July 17 — 2:00 a.m. Two people driving about one mile north of Bonnie Springs Ranch [now the Ranch at Red Rock] in the Red Rock Canyon National Conservation Area, Nevada, see in the rear-view mirror a low-flying object that overtakes their car, followed by a rush of cold air. It stops, circles the vehicle, flies off, and is lost to sight behind the mountains, where it might have landed, but an investigation by the military finds no trace. (Vallée, Magonia, p.282; Sparks, p. 288)

August — Construction of essential facilities is completed at Area 51 in Nevada; three surplus Navy hangars are erected on the base’s north side. The original U-2 hangars are converted to maintenance and machine shops. Facilities in
the main cantonment area include workshops and buildings for storage and administration, a commissary, control tower, fire station, and housing. The Navy also contributes more than 130 surplus Babbitt duplex housing units for long-term occupancy facilities. Older buildings are repaired, and additional facilities are constructed as necessary. A reservoir pond surrounded by trees serves as a recreational area one mile north of the base. Other recreational facilities included a gymnasium, a movie theater, and a baseball diamond. (Wikipedia, “Area 51”)

August 12 — 9:00 p.m. College seniors J. B. Furkenhoff and Tom Phipps see a large oval object with a fin extending from one edge to the center, like a sled with lighted car running boards, near Old Mission High School on 50th Street in Kansas City, Missouri. It hovers at 50 feet altitude for 3–5 minutes, then flies straight up, disappearing in about 5 seconds. (Patrick Gross, “Kansas City 1961, a Blue Book ‘Unknown’”; *Sparks*, p. 289)

Mid-August — House Committee staff consultant Richard P. Hines visits ATIC in Dayton, where Col. Robert Friend, Hynek, and other officials give him a tour, tell him that Project Blue Book has the UFO problem at hand, and that Rep. McCormack has been pressured by NICAP to hold hearings. Hines leaves ATIC “favorably impressed.” (Jacobs, *UFO Controversy in America*, Signet ed., 1976, pp. 160–161; Swords 293)

August 22 — Adm. Roscoe Hillenkoetter signs a NICAP letter to Congress urging “immediate congressional action to reduce the dangers from secrecy about UFOs, including accidental war and the Russians falsely claiming UFOs are Soviet weapons. (Keyhoe, *Aliens from Space*, Signet ed., 1974, p. 85)

August 25? — Five people at Toulouse, France, see a luminous, yellow object, 24 feet in diameter, flying about 30 feet above a road. The object has horizontal and vertical bands of darker tone that give the appearance of “windows.” The UFO flies upwards very quickly when the car reaches town. (Vallée, *Magonia*, p. 282)

August 28 — Rep. Karth writes a harsh letter to Keyhoe and attacks him for trying to defame and ridicule the Air Force. He had thought Keyhoe would be proving the existence of spaceships, but he knows now he cannot do this. Therefore, he is no longer interested in holding hearings. He tells a newspaper reporter that he will not be part of Keyhoe’s “cheap scheme to discredit the Air Force.” (Jacobs, *UFO Controversy in America*, Signet ed., 1976, pp. 161–162)

September — A National Intelligence Estimate concludes that the USSR has no more than 25 ICBMs and will not possess more in the near future, effectively discrediting the missile gap myth. (Wikipedia, “Missile gap”)

September 2 — 4:40–4:50 p.m. A man named Ziegler is reclining outside his home in the northeast section of Albuquerque, New Mexico, when he sees a shiny round white object moving erratically to the west. At two different times it emits several small silvery objects about one-sixth the size of the main object. It fades out of sight to the south. (NICAP, “Silver Object and Smaller Ones Emitted”; *Sparks*, p. 289; Herbert S. Taylor, “Satellite Objects: A Further Look,” *IUR* 29, no. 2 (Summer 2004): 25)

September 6 — The National Reconnaissance Office is officially launched with headquarters in Chantilly, Virginia. It designs, builds, launches, and operates the reconnaissance satellites of the federal government, and provides satellite intelligence to several government agencies, particularly signals intelligence (SIGINT) to the National Security Agency, imagery intelligence (IMINT) to the National Geospatial-Intelligence Agency, and measurement and signature intelligence (MASINT) to the Defense Intelligence Agency. Its existence remains top secret until September 18, 1992. The move creates a protocol that requires the CIA deputy director and the undersecretary of the Air Force to co-manage all space reconnaissance and aerial espionage programs. The public face of the NRO is the Office of Space Systems. (Wikipedia, “National Reconnaissance Office”; Jacobsen, *Area 51*, pp. 168–169)
September 16 — Rep. Overton Brooks dies of a heart attack; the August 24 meeting about UFO evidence has not taken place. He is replaced on the House Science and Astronautics Committee by Rep. George Paul Miller (D-Calif.) who indicates he will not order UFO hearings. (Keyhoe, Aliens from Space, Signet ed., 1974, p. 78)

September 18 — Fourth Officer G. Gendall of the cargo ship Queensland Star, in the Indian Ocean, sees a white UFO through a cloud formation. It vanishes into the clouds and then reappears, dropping toward the sea. The water in the surrounding area grows intensely bright. Particles of white matter continue to fall into the sea after the object disappears, and the sky and water are illuminated for several minutes. (Sanderson, InvRes, pp. 47–48)

September 19 — 5:22 a.m. The North Concord Air Force Station [now closed] at East Mountain, Vermont, picks up an unidentified radar target at 62,000 feet for 18 minutes. It moves at a slow speed on an erratic course. (NICAP, “Radar Tracks Object before and after Hill Abduction”)

September 19 — Keyhoe has smoothed things over with Rep. Karth, who writes: “Now that we better understand each other, I would hope we could properly proceed with a hearing early next year—providing the new chairman [Miller] authorizes hearings.” (“Majority Leader Support Indicates Early Congressional Action: Chairman Karth backs Open Hearings,” UFO Investigator 2, no. 2 (October 1961): 1–2)

September 19–20 — 10:30 p.m. Barney and Betty Hill are driving home to Portsmouth, New Hampshire, from a vacation in Quebec, going south on US Highway 3. Near Groveton, New Hampshire, Betty sees a bright light moving upward and erratically, growing larger. Later, Barney stops the car at a scenic picnic area south of Twin Mountain. Through binoculars, Betty sees a solid object against the moon that “appeared to be flashing thin pencils of different colored lights.” Barney thinks it’s a plane, though it might be “playing games” with them. Barney drives slowly through Franconia Notch, watching the object. At one point it passes near the Old Man of the Mountain. About one mile south of Indian Head (north of Lincoln), the object rapidly descends toward their vehicle, causing Barney to stop in the middle of the highway. The huge, silent craft hovers approximately 80–100 feet above the Hills’ 1957 Chevrolet Bel Air and fills the entire field of view in the windshield. It reminds Barney of a huge pancake. Carrying his pistol in his pocket, he steps away from the vehicle and moves closer to the object. Using the binoculars, Barney claims to see about 8–11 humanoid figures who are peering out of the craft’s windows, seeming to look at him. In unison, all but one figure move to what appears to be a panel on the rear wall of the hallway that encircles the front portion of the craft. The one remaining figure continues to look at Barney and communicates a message telling him to “stay where you are and keep looking.” Barney has a recollection of observing the humanoid forms wearing glossy black uniforms and black caps. Red lights on what appears to be bat-wing fins begin to telescope out of the sides of the craft, and a long structure descends from the bottom of the craft. The UFO approaches to within 50–80 feet overhead and 300 feet away from him. Barney tears the binoculars away from his eyes and runs back to his car. In a near hysterical state, he tells Betty, “They’re going to capture us!” He sees the object again shift its location to directly above the vehicle. He drives away at high speed, telling Betty to look for the object. She rolls down the window and looks up. Almost immediately, the Hills hear a rhythmic series of beeping or buzzing sounds which seem to bounce off the trunk of their vehicle. The car vibrates and a tingling sensation passes through them. At this point in time they experience the onset of an altered state of consciousness that leaves their minds dulled. A second series of beeping sounds returns them to full consciousness. They find that they have traveled nearly 35 miles south, but have only vague, spotty memories of this section of road. They recall making a sudden, unplanned turn, encountering a roadblock, and observing a fiery orb in the road. At 5:00 a.m., they arrive home, about two hours later than expected. Barney feels compelled to examine his genitals, and they both take long showers. Betty notices a pinkish powder and a tear in her dress. There are shiny, concentric circles on their car’s trunk that were not there the previous day. Betty and Barney experiment with a compass, noting that when they move it close to the spots, the needle whirls rapidly. But when they move it a few inches away from the shiny spots, it drops down. (Wikipedia, “Betty and Barney Hill”; NICAP, “The Betty and Barney Hill Case”; Clark III 577–581; Sparks, p. 289; John G. Fuller, The Interrupted Journey, Dial, 1966; J. Allen Hynek, The UFO Experience, Ballantine ed., 1974, pp. 178–184; Mark Rodeghier, “Hypnosis and the Hill Abduction Case,” IUR 19, no. 2 (March/April 1994): 4–6, 23–24; Robert H. Coddington, “The Hill Experience,” IUR 19, no. 3 (May/June 1994): 18–19; Michael D. Swords, GrassRoots UFOs: Case Reports from the Timmerman Files, Fund for UFO Research, 2005, p. 143; Greg Sandow, “The Hill Case and the Limits of Ufology,” IUR 31, no. 4 (March 2008): 3–7, 19–28; Stanton Friedman and Kathleen Marden, Captured! The Betty and Barney Hill UFO Experience, Weiser, 2007; Mark Cashman, “Behavioral Classification System for UFO Occupants,” IUR 24, no. 1 (Spring 1999): 19)

September 20 — 2:14 a.m. Pease AFB [now Pease Air National Guard Base] in Portsmouth, New Hampshire, picks up an unidentified radar blip 4 miles away from the base, with no visual contact. (NICAP, “Radar Tracks Object before and after Hill Abduction”)
September 21–22 — Betty Hill calls Pease AFB and reports her UFO incident (without mentioning the figures). Maj. Paul W. Henderson of the 100th Bomb Wing calls back with a few questions.

September 26 — Betty Hill writes to Donald E. Keyhoe (mentioning the figures Barney remembers seeing) and asks for more information. She mentions that she and Barney are considering hypnosis. (Mark Rodeghier, “Hypnosis and the Hill Abduction Case,” IUR 19, no. 2 (March/April 1994): 4–6, 23–24; Michael D. Swords, “Radio Signals from Space, Alien Probes, and Betty Hill,” IUR 29, no. 4 (July 2005): 15)

September 27 — Allen Dulles resigns as director of central intelligence. John A. McCon replaced him.

September 27 — 7:57 a.m. The radar operator on a USAF Airborne Early Warning and Control aircraft off the California coast spots five targets on his scope. Three of the objects are on a heading of 90°, and all of them are moving at a high rate of speed. They soon disappear into sea clutter. Three minutes later, two objects appear heading 70° then also disappear into sea clutter. The speed of one of the objects is measured at about 2,070 mph over a distance of 230 miles. While the two objects are on the scope, a single stationary object also appears. After remaining stationary for about two minutes, it moves on a heading of 265° at 70 mph and is lost in the sea clutter. The objects can only be painted with the IFI on. The radar is an APS-95. (NICAP, “Uncorrelated Targets on APS-95”; Sparks, p. 290)

September 29–October 3 — Betty Hill has a series of intensely vivid dreams in which she and Barney encounter a strange roadblock and are approached by a group of men. She loses consciousness and awakes on board a craft where they are given a medical examination by “intelligent, humanoid beings.” (Clark III 581–583)

Autumn — Evening. Emanoil Manoliu, son of the prominent novelist Mihail Sadoveanu, is at the Neamț Monastery west of Târgu Neamț, Romania, when he sees a blinding, multicolored light. After a few seconds it rises quickly and he can see it looks like a disc with a concave base about 20–23 feet long and 10 feet broad. It vanishes “like a tornado in the air” and he feels the rush of wind. The next day he goes to the site with a priest and finds an area of singed grass and a light imprint in the soil. (Hobana and Weverbergh 167–168)

October 1 — The Defense Intelligence Agency, created at the request of Defense Secretary Robert S. McNamara to integrate all military intelligence operations, begins work with a handful of employees in borrowed office space. Its mission is the continuous task of collecting, processing, evaluating, analyzing, integrating, producing, and disseminating military intelligence for the Department of Defense and related national stakeholders. Other objectives include more efficiently allocating scarce intelligence resources, more effectively managing all DoD intelligence activities, and eliminating redundancies in facilities, organizations, and tasks. (Wikipedia, “Defense Intelligence Agency”)

October 2 — Around 12:00 noon. Waldo J. Harris, private pilot and real-estate broker, is getting ready to take off in a Mooney M20A from Utah Central Airport [now closed] in Granger, Utah, when he sees a bright spot in the sky. After he takes off, he notices that the light is still in the same location. He flies toward the object to get a better look, and sees that the UFO has no wings or tail and is hovering with a slight rocking motion. He later estimates the diameter at 35–50 feet, with a thickness of about 4 feet, and the appearance of sand-blasted aluminum. Harris estimates he has approached within 2 miles of the object before it rises abruptly and zooms away for 10 miles before it resumes a rocking hover. He approaches again, but it departs in about 2–3 seconds. Several other people, including airport controller Jay Galbraith, also see the UFO from the airport. Investigators from Hill AFB near Ogden arrive quickly. Airport attendant Russell M. Woods tells them he thinks the object was at 2,500 feet altitude. On October 9, Douglas M. Crouch forwards the Hill AFB official report, including transcripts of interviews, to Wright-Patterson AFB in Ohio, saying “No unusual meteorological or astronomical conditions were present to account for the sighting.” Nonetheless, Blue Book wanders from Venus to a research balloon to a sundog (an assessment James E. McDonald calls “nonsensical”) as explanations. (Clark III 1025–1028: UFOEv, pp. 1–2; James E. McDonald, “Statement on Unidentified Flying Objects,” in Symposium on Unidentified Flying Objects, Hearings, US House Committee on Science and Astronautics, 90th Cong., 2nd Sess., July 29, 1968, pp. 49–50)

October 4–5 — Two IBM engineers, C. D. Jackson and Robert E. Hohmann, have lunch in Washington, D.C., with Donald Keyhoe, who shows them the letter from Betty Hill. (Michael D. Swords, “Radio Signals from Space, Alien Probes, and Betty Hill,” IUR 29, no. 4 (July 2005): 15)

October 14 — 5:00 p.m. Mrs. Erwin Riley, a summer resident in Two Harbors, Minnesota, sees a large object slide into the water of Lake Superior about one mile from shore and bob about on the surface. She summons a neighbor, Jack Ray, and they both watch through binoculars, but they can’t make out what it is. At dusk, the Lake County Sheriff responds to their call, but he can’t see much due to swells on the lake surface. He calls the Air Force and Coast Guard to make sure it’s not part of a training exercise. Shortly afterward, Riley sees the object rise into the
air and travel southeast at about the speed of a car. A Coast Guard search the next day turns up only a floating log. ("Flying Log?" APRO Bulletin, November 1961, p. 3)

October 14 — 5:30 p.m. Mayor Michael Burson and his wife watch two pairs of UFOs move to the east above Sunset, Utah. The first pair looks like puffy cotton joined together by “stringy stuff,” and the second pair are metallic discs. ("More Discs in Utah," APRO Bulletin, March 1962, p. 2)

October 15 — 5:00 p.m. Mrs. John P. Vanicky and Norine Gribble are driving from Marquette, Michigan, to Hurley, Wisconsin, when they see a brown cigar-shaped object spouting fire from its rear and moving southeast. They stop the car and watch for 20 minutes until it disappears. (Duluth (Minn.) News-Tribune, October 19, 1961; "Flying Log?" APRO Bulletin, November 1961, p. 3)

October 19 — NICAP secretary Richard H. Hall writes to Walter N. Webb at Hayden Planetarium in Boston, Massachusetts, and asks him to talk to Betty and Barney Hill. (Clark III 578–579)

October 21 — 2:00 a.m. A brilliant fireball flashes in front of Richard and Rhonda DuBois’s car on US Highway 60 as they are driving between Datil and Pie Town, New Mexico. It then veers into the sky. Later, as they approach a canyon they see that the light is traveling along in front of them. It breaks into four lights that move along with the car, even as DuBois drives at 100 mph, until they stop at a roadside motel. The lights then zoom straight up and disappear. (“Woman Says Flying Objects Chase Car,” Garden Grove (Calif.) News, October 23, 1961; Lorenzen, UFOs: The Whole Story, Signet, 1969, p. 231; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: July–December 1961, The Author, 2003, p. 97)

October 21 — Webb, initially skeptical, watches up interviewing the Hills for 6 hours. He finds that their amnesia concerning some parts of the episode has unsettled them, and Betty tells him she had vivid nightmares for six straight nights a couple weeks after the incident. (Clark III 581)

October 30 — The Soviet RDS-202 hydrogen bomb, the 50-megaton Tsar Bomba, is supposedly the most powerful nuclear weapon ever tested. It is detonated at the Sukhoy Nos Cape of Severny Island, Novaya Zemla, Arkhangelsk Oblast, Russia. It flattens entire villages in surrounding areas and breaks windows in Finland 1,000 miles away. (Wikipedia, “Tsar Bomba”)

November 1 — At a small, informal conference on SETI at the National Radio Astronomy Observatory’s facility in Green Bank, West Virginia, astronomer Frank Drake writes this equation on a chalkboard: \[ N = R f p n e f l f i f c L, \]
the equation, the Green Bank Formula, summarizes the main concepts that scientists must contemplate when considering the question of extraterrestrial life capable of communicating by radio across space. It is more properly thought of as an approximation rather than as a serious attempt to determine a precise number. (Wikipedia, “Drake equation”; Lee Billings, The Alien-Life Summit, Slate, September 27, 2013)

November 3 — 4:30 p.m. Mr. E. Adkins observes a brilliant object with an orange center flying south over Eyres Monsell, Leicester, England, at an estimated 600 mph. It is triangular in shape and about 300 feet wide. (“Triangular Object over Eyres Monsell,” Flying Saucer Review 8, no. 2 (March/April 1962): 24)

November 13 — The AFCIN-1E-0 Draft Policy letter (Betz Memo) is prepared by Lt. Col. Norman M. Rosner for Col. Ward Reid Betz. Among other things, it specifies three peacetime functions of the 4602d Air Intelligence Service Squadron at Ent AFB [now the US Olympic Training Center], Colorado Springs, Colorado: UFO investigations, Project Moon Dust (an exploitation program to locate, recover, and deliver descended foreign space vehicles), and Operation Blue Fly (to facilitate delivery to the Foreign Technological Division of Moon Dust and other items of great technical intelligence interest). These three functions involve “employment of qualified field intelligence personnel on a quick reaction basis to recover or perform field exploitation of unidentified flying objects, or known Soviet/Bloc aerospace vehicles, weapons systems, and/or residual components of such equipment.” (Paul Dean, The Rejuvenated ‘Betz Memo,’ UFOs: Documenting the Evidence, May 8, 2016)

Late November — Evening. A group of four friends are hunting on a Sunday in the area of Harvey, North Dakota. As they are returning in the car, the two men in the front seat notice a descending glowing object in the sky ahead of them. Assuming they are witnessing a plane crash, they rush to the scene of its landing, where they find at 150 yards distance, a “silhouette-shaped craft which was sticking in the ground with this glow around it.” The men shine a hand spotlight and shine it on the object, whereupon they see four human-looking individuals standing around it. At this point they seem to hear an explosion and “everything went out.” The principal witness wakes up from dozing in the back seat as the car is negotiating soggy ground looking for the craft and crew. They return to the spot where the landing takes place, and they see the figures again, wearing white coveralls and standing 5 feet
high. They get out of the car and one figure waves them away. Eventually, the men agree to return to a small town, possibly Martin, North Dakota, 11 miles away, where they find a police officer, who listens to the story and agrees to accompany them back to the site. They see red lights moving in the field and both cars go in pursuit of them. The lights go out, the police officer drives away, and the four men resume driving home. Two miles down the highway, the silo-like object reappears, landing gently 150 yards away with two of the figures watching them. Two of the men get out of the car again and shine the spotlight on the craft. One of the men is carrying a rifle; he drops on the ground and shoots, apparently hitting one of the figures in the right shoulder. The figure spins around, goes down on his knees, gets help from the other figure, then yells, “Now what the hell did you do that for?” Weirdly, as soon as the men return to the car, the two who have remained inside insist the rifle had not been removed and no shot was fired. The primary witness (who remains in the car) has no recollection of what happened to the craft and figures. By the time they get home, dawn is breaking, and their wives are waiting for them. They all know it has taken longer than it should have to return. A few hours later, around 12:00 noon, the principal witness is at work when three well-groomed, official-looking men visit him. He presumes they are Air Force intelligence officers who say they have a “report” about the previous night’s event. They ask him what clothes he was wearing and what the object looked like, but they never ask about the shooting. Later, they show up at his house and ask to see his hunting gear and boots. They tell him not to say anything more about the incident. In January 1968, US Border Patrol agent [later BATF agent] Donald E. Flickinger manages to interview the primary witness, who works as a supervisor at Minot AFB hospital, and two of the others, one a small-town high school superintendent and the other an active-duty Air Force sergeant. They all are “extremely reliable and responsible,” Flickinger says. (J. Allen Hynek, *The UFO Experience*, Ballantine ed., 1974, pp. 164–165; Clark III 825–827)

Late November — 9:30 p.m. Real estate agent Cavalheiro Mendes is walking along the beach in Balneário Pinhal, Rio Grande do Sul, Brazil, when he sees a huge light 900 feet away. As he walks toward it, he sees it is a huge disc resting on the sand. He feels compelled to approach it and sees two helmeted figures come from behind the object. They seem to be telling him telepathically not to resist. Mendes finds he is completely unable to move. He feels one of them scratching his forearm with an instrument, then he blacks out. When he wakes up, he is nearly back to his beach house and it is 11:30 p.m. After a few weeks he feels anxious and sad for no apparent reason. He refuses to be hypnotized. (Lorenzen, *Flying Saucer Occupants*, Signet, 1967, pp. 199–200)

November 25 — IBM engineers C. D. Jackson and Robert E. Hohmann interview the Hills. One of them expresses surprise at how long the drive took. They are mysteriously interested in whether nitrates or chemicals containing nitrates are in their car. For the first time, Barney and Betty realize that there are two hours they cannot account for. Also present is a friend of the Hills, retired USAF Maj. James McDonald, a former intelligence officer. He suggests that Betty and Barney consult a hypnotist. (Clark III 583; Mark Rodeghier, “Hypnosis and the Hill Abduction Case,” *IUR* 19, no. 2 (March/April 1994): 6, 23–24; Michael D. Swords, “Radio Signals from Space, Alien Probes, and Betty Hill,” *IUR* 29, no. 4 (July 2005): 15)

November 30 — Covert operations against Fidel Castro are officially authorized by President Kennedy after being given the name Operation Mongoose at a White House meeting on November 3. The operation is led by USAF Gen. Edward Lansdale and goes into effect after the failed Bay of Pigs Invasion. A document from the Department of State confirms that the project aims to “help Cuba overthrow the Communist regime,” including Castro, and it aims “for a revolt which can take place in Cuba by October 1962.” One of Lansdale’s ideas is to project a huge image of the Second Coming of Christ above the island, spread the word that Castro is the anti-Christ, shoot starburst shells from a submarine into the air, and hope for an uprising. US policymakers want to see “a new government with which the United States can live in peace.” (Wikipedia, “Operation Mongoose”; Kremlin 131–133)

December — Funding runs out for the Avrocar and it and related WS-606A supersonic VTOL programs are officially cancelled by the US military. (Wikipedia, “Avro Canada VZ-9 Avrocar”)
1962

1962 — According to a “former Project Blue Book Chief” (probably Maj. Friend) gun-camera films obtained during jet interceptor UFO chases are routinely referred to the CIA’s National Photographic Interpretation Center (established in 1961) for analysis. Richard H. Hall writes, “This cannot be documented at present, but I heard him say so to a UFO researcher colleague. None of the photoanalysis data in these cases has been released, nor has the existence of these films ever been acknowledged.” (Richard H. Hall, *Uninvited Guests*, Aurora, 1988, p. 179)

1962 — The Air Force tries once again to get rid of the UFO program, but its attempts to get NASA or the National Science Foundation to handle the program prove futile. It finally gives up the entire idea. The program remains at FTD as a special project and without expanded resources. (Jacobs, *UFO Controversy in America*, Signet ed., 1976, p. 164)

1962 — Day. An Air Force pilot is flying a brand new B-52 with a full crew out of Wichita, Kansas, headed for an air base in the southwest. He notices a bright flash of sunlight in his left side and turns to see a metallic object “like polished chrome.” It is pacing the aircraft near its left wingtip. The object is 4–8 feet in diameter and has no seams or markings. His First Officer is watching an identical object off the right wing, and the crewman in the tail reports that there is a round shiny metal ball following close behind the B-52. The top and bottom gunners also see spheres above and below the plane. The pilot goes into an evasive maneuver, but after 10–15 minutes the objects are maintaining their positions. He returns to his previous assigned altitude and heading. After a few minutes, the five objects leave, one at a time, first the bottom one, then the top, then the tail. The two objects on the wings shoot away at the same time and climb out of sight parallel to each other. After landing, the crew is told not to talk about the sighting at all. (Richard F. Haines, “NARCAP’s Project Sphere: Are Spherical UAP a Threat to Aviation Safety?” *IUR* 33, no. 2 (July 2010): 5–6)

1962 — 12:00 midnight. Actor Jamie Farr and his wife Joy Ann are driving through the desert near Yuma, Arizona, when they notice a light moving erratically at the top of a mountain. It zig-zags across the sky as it approaches them, moving to within 150 feet, then 60 feet of their vehicle. They can see two lights, red and blue, revolving beneath the silent object. It paces them for a short time then moves away at incredible speed. (“Jamie and Joy Farr Report UFO Sighting,” *CUFOS Associate Newsletter* 1, no. 8 (December 1980): 3, 5)

1962 — The Argentine Navy creates a permanent commission for the study of UFOs, and the Argentine Air Force establishes a division for the same purpose. (Vicente-Juan Ballester Olmos, “Argentina: UFO Declassification,” UAPSG–GEFAI, July 29, 2020)

1962 — René and Francine Fouéré establish the Groupe d’Étude des Phénomènes Aériens in Paris, France, with an initial group of 60 interested members. The following year GEPA launches a magazine, *Phénomènes Spatiaux*, which is published through 1978. In 1964, Lionel–Max Chassin, now retired from the army, takes over as president. (Wikipedia, “Groupe d’Étude des Phénomènes Aériens”)

1962 — French composer Paul Misraki writes *Les Extraterrestres* using the pseudonym Paul Thomas. He links modern UFO sightings with biblical and mythological tales and claims that angels are aliens, that the Bible and other ancient texts are filled with many UFO flying saucer sightings, and that throughout human history extraterrestrial visitors have intervened in human affairs. Misraki is also one of the first authors to suggest that apparitions may be UFO-related phenomena. (Paul Thomas [Paul Misraki], *Les Extraterrestres*, Plon, 1962; Jerome Clark, “Vimanas Have Landed: Ancient Astronautics in Ufology,” *IUR* 22, no. 3 (Fall 1997): 28–29)

January — The Federal Aviation Administration expands the restricted airspace in the vicinity of Groom Lake, Nevada, and the lakebed becomes the center of a 600-square-mile addition to restricted area R-4808N. (Wikipedia, “Area 51”)

January — The IBM 7950 Harvest computer, designed to be used for cryptanalysis, is delivered to the National Security Agency. It includes Tractor, a large automated tape cartridge library. An NSA-conducted evaluation finds that Harvest is more powerful than the best commercially available machine by a factor of 50–200, depending on the task. It remains in use until 1976. One purpose of the machine is to search text for keywords from a watchlist. From a single foreign cipher system, Harvest is able to scan more than 7 million decrypts for any occurrences of some 7,000 key words in under four hours. The computer is also used for codebreaking, and this is enhanced by a system codenamed Rye, which allows remote access to Harvest. (Wikipedia, “IBM 7950 Harvest”; “Timeline of the IBM Stretch/Harvest Era (1956–1961),” computerhistory.org)

January 29 — A Royal Dutch Air Force pilot flying an F-86 Sabrejet sights a UFO over eastern Netherlands. The jet’s radar also picks up the object and control tower radar (somewhere) is also tracking it. He attempts to give the object an urgent warning by radio, but it goes unheeded. He arms a Sidewinder rocket and tries to close in, but the
UFO pulls away swiftly before he can fire. (“New Sightings by Navy, FAA, and Airline Observers: Dutch Jet Pilot Tries to Down UFO,” UFO Investigator 2, no. 5 (Aug./Sept. 1962): 1–2)

February — Richard M. Bissell Jr. leaves the CIA and is replaced as head of the Directorate of Plans by Richard Helms.
February — Maj. William T. Coleman is replaced as Pentagon UFO spokesman by Maj. Carl R. Hart.
February — Vice-Admiral Roscoe Hillenkoetter resigns from NICAP, stating that NICAP has gone as far as it can and should no longer criticize USAF investigations. (Keyhoe, Aliens from Space, Signet ed., 1974, pp. 85–86)
February — The Hills begin making numerous trips over several months to try to find their encounter site but are unsuccessful. (Clark III 583)
February — Alec Birch, 14, snaps an out-of-focus photo of five domed discs that he and two friends see hovering 500 feet above his backyard in Mosborough, Sheffield, England. Alec and his father show the photo later to the Air Ministry, which pronounces them “temperature inversions” in October. However, in an interview on BBC-2 television on October 6, 1972, Alec confesses that he had superimposed images painted on glass over the backyard scenery, fooling even his father. (“Schoolboy Snaps Saucer,” Flying Saucer Review 8, no. 5 (Sept./Oct. 1962): 4; Gordon Creighton, “No Kidding This Time. My Flying Saucers Photo Is Genuine!” (–Alec Birch),” Flying Saucer Review 45, no. 2 (Summer 2000): 9–11; Clark III 603)
February 6 — USAF issues the last of its UFO fact sheets (no. 179-62). In the future it will issue press releases. (UFOEv, p. 108)
February 10 — CIA pilot Francis Gary Powers is exchanged for Soviet spy Rudolf Abel on the Glenonicke Bridge that connects Potsdam to West Berlin, Germany.
February 20 — Astronaut John Glenn pilots the Friendship 7 Project Mercury capsule for three orbits and just short of 5 hours flying time, becoming the first American to orbit the earth. (Wikipedia, “Mercury-Atlas 6”)
February 24 — NORAD Requirement 64-73 states that its radar coverage “would provide warning from all directions, not just northern approaches.” (Clark III 811)
February 28 — The first A-12 test aircraft covertly arrives at Groom Lake, Nevada, from Burbank, California. (Wikipedia, “Area 51”)

March — Chemical engineer Leon Davidson writes a two-part article in Saucer News explaining how he has become convinced that the CIA, especially under the influence of Allen Dulles, has engineered disinformation about UFOs and even manufactured some seemingly legitimate radar sightings as a tool in the Cold War. Its aim is to cause the Soviet Union to waste time and effort in preparing defenses against fictitious aircraft and weapons that the US might be developing. Furthermore, UFOs can be used to capture headlines, diverting attention from unwelcome news coverage of espionage operations. Davidson writes that Dulles has resorted to using contactees and UFO organizations as a propaganda vehicle. Messages supposedly from spacenmen calling for a halt in nuclear testing could influence public opinion in a test ban treaty that, in effect, would benefit the US more than the Russians, since the Soviets were seen as overtaking the American lead in weapons development. Davidson attributes CIA involvement in the claims of George Adamski and Daniel Fry. He also points out that electronic countermeasures (ECM) equipment is capable of creating fake radar returns and goes so far as to say that secret working models of saucers, perhaps piloted by “midgets,” are responsible for some sightings. (Leon Davidson, “An Open Letter to Saucer Researchers,” Saucer News, March 1962, April 1962; Leon Davidson, “ECM + CIA = UFO: Or, How to Cause Radar Sightings,” Flying Saucer Review 6, no. 2 (March/April 1960): 9–12; Gerald K. Haines, “CIA’S Role in the Study of UFOs, 1947–90,” Studies in Intelligence 40, no. 5 (1997): 67–84)
March — Betty and Barney Hill meet with Patrick J. Quirke, a psychiatrist at the Baldpate Sanitarium in Georgetown, Massachusetts, but he is unsympathetic and discourages them from undergoing hypnosis. (Clark III 583)
March 25 — The Hills meet with a psychiatrist (Duncan Stephens of the Exeter Clinic, New Hampshire) who rules out simultaneous hallucination. Around this time, Barney develops a series of warts in an almost geometrically perfect circular ring in his groin but does not associate his malaise with the UFO incident. (Clark III 583–584)
March 25 — Evening. Mrs. R. H. Chappell and her sister Janie Kidd watch two triangular objects, one larger than the other, hovering 40–50 feet above the water at Saanich Inlet, British Columbia. They have flashing ruby-red lights. After two minutes, the lights change to orange and they move off silently and gracefully. Mrs. L. Austin Wright sees a stationary flashing yellow light around the same time. (Dan Lloyd, “Are They Really Seeing Things over Canada?” Flying Saucer Review 12, no. 6 (Nov./Dec. 1966): 27)
March 27–30 — George Adamski claims to attend a Twelve Councellors Meeting on Saturn that addresses the threat of nuclear war on Earth. In the report that he publishes in June, Adamski writes that the “present explosions of atomic energy are going in the wrong direction, and if these experiments do not stop, the only results will be a lost civilization… This is even affecting their planets.” Ridiculed by many, some of Adamski’s descriptions in the
report about his trip clearly show this was a deeply spiritual experience for him, which may have unbalanced him for some time. (George Adamski, George Adamski’s Special Report: My Trip to the Twelve Counsellors Meeting That Took Place on Saturn, March 27–30, 1962, Science of Life, 1962; “Final Years,” The Adamski Case, June 11, 2009)

Spring or summer — All base personnel on flying status attend a briefing in the theater at the Clinton-Sherman AFB [now the Clinton-Sherman Industrial Airpark] near Burns Flat, Oklahoma. The airmen are shown a short 20–30-minute Air Force film showing, spliced together without interpretation, five or six gun-camera clips apparently documenting attempts by aircraft to intercept UFOs. Afterward, the commander of the 4213d Strategic Wing reads a statement (probably JANAP 146(D)) stipulating fines and jail sentences for anyone publicly reporting a UFO sighting and hands out UFO sighting forms in the event of an incident. One technician recalls there is a section on reporting any electronic signature emitted from the UFO picked up by specific ECM devices. (Nukes 123–125)

April 18 — Evening. A red, glowing object is first seen at a great height over Oneida, New York, heading west silently. There are reports from Kansas and Colorado. NORAD radar picks up the object; ADC alerts several bases, including Nellis AFB near Las Vegas, Nevada. Fighters are scrambled from Luke AFB near Phoenix, Arizona, and the jets are possibly heard over Nephi, Utah, after the object passes overhead. Capt. Herman Gordon Shields, flying a C-119 two miles west of Levan, Utah, sees it as a slender object. A man in Silver City, Utah, claims that the object is a glowing ball of light about the size of a soccer ball. He says it is white with a yellowish tint and a bright yellow jagged flame coming from the rear: “As the object passed over Robinson [in Ogden, Utah?], it slowed down in [the] air, and after, [a] gasping sound was heard, the object spurred ahead again. After this procedure was repeated three or four times, the object arched over and began descending to earth which after which the object turned bluish color and then burned out or went dark. After the object began to slow down it began to wobble or fishtail in its path.” Several people see the object over Eureka, Utah, apparently crashing and interrupting electrical service from a power plant close to the landing site. It is described as a “glowing, orange oval which emitted a low, whirring sound.” It takes off a few minutes later, continuing to the west. The object lights up the streets of Reno, Nevada, and then turns to Las Vegas. It blares brightly like a “tremendous, flaming sword” over Nellis AFB and then disappears from their radar scopes at 10,000 feet. Witnesses say the object is traveling almost horizontally northeast of Las Vegas until a final explosion occurs from the direction of Mesquite, Nevada. Sheriff’s deputy Walter Bun, who leads the search and rescue unit, moves the unit into the Spring Mountain area in jeeps to search for wreckage. They search through the night, and when the sun comes up they continue using aircraft. They do not find anything of importance except some ashes that might easily be the remains of a campfire started by a hunter some weeks earlier. When no one reports a downed or missing aircraft, Bun and the other deputies call off the search. The object seems to have changed direction, because at Reno it passes west to east, in Utah it is seem going southeast to northwest, and at Nephi it travels west. The duration of the sighting, from New York to Nevada, is only 32 minutes, giving a speed of 4,500 mph, below the speed of meteors. On May 8, the Air Force sends Hynek and Lt. Col. Robert Friend to Utah with Douglas M. Crouch, chief of criminal investigation at Hill AFB, south of Ogden, Utah. They determine it is a bolide. Blue Book lists it as two sightings: a multiple radar sighting at Nellis on April 18 with no visual (despite hundreds of observers in Las Vegas), and a bolide over Utah that it claims occurs on April 19. In reality, the Utah and Nevada sightings are only minutes apart (8:15 p.m. Mountain Time). However, there is quite a bit of information from numerous sources concerning this major incident, including Project Blue Book documents, and now possible confirmation by a radar man at ATIC. The case is also not explained in a Blue Book monthly sighting listing for April 1962. It is interesting that every one of these states except Utah has or was in the process of obtaining ICBM bases: New York (Plattsburg AFB); Kansas, (Forbes AFB and McConnell AFB); Utah (Minuteman production at Air Force Plant 77 at Hill AFB); Idaho (Mountain Home AFB); Montana (Malmstrom AFB); New Mexico (Walker AFB); Wyoming (F. E. Warren AFB); Arizona (Davis Monthan AFB); California (Beale AFB). (NICAP, “National Defense Alert”; Frank Edwards, Strange World, Ace ed., 1964, pp. 38–41; “Meteor Lands in Utah, Lights Western Skies,” Los Angeles Times, April 19, 1962, p. 15: “Brilliant Fireball Flashes in Skies,” Salt Lake City Deseret News, April 19, 1962, pp. 1, 5; Las Vegas Sun, April 19, 1962; Kevin D. Randle, A History of UFO Crashes, Avon, 1995, pp. 79–94; Clark III 333–335; Sparks, p. 291; Randle, Levelland, 2021, pp. 87–99)

April 24 — 7:45 p.m. Alice W. Gasslein and her mother are driving near their home in Springfield, Delaware County, Pennsylvania, when they see a large domed object emitting flashes of green light moving over the roofs of nearby homes. A rotating band around the main body consists of a series of square windows from which come shafts of bright white light. They drive back home to alert her husband, Joseph A. Gasslein, an aviation worker. By that time, the UFO is about a half-mile distant, giving off colored lights. Around 8:10 p.m., the object returns flying
toward the Gassleins’ home (south of Walsh Park) only 20 feet above ground level and passes over their backyard before making a sharp left turn and moving away to the east. (“Out of the Past: A Very Close CE-1,” IUR 10, no. 1 (Jan./Feb. 1985): 9–10, 14; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: January–June 1962, The Author, 2005, pp. 56–57)

April 25 — The A-12 is taken on its first (unofficial and unannounced) flight with Lockheed test pilot Louis Schalk at the controls. Intended as only a taxi run, the A-12 unexpectedly takes flight and Schalk lands it 2 miles past the runway. (Wikipedia, “Lockheed A-12”; Jacobsen, Area 51, pp. 177–178)

April 26 — Schalk makes another unofficial low-altitude, 40-minute test flight with the A-12. The takeoff is perfect, but after the A-12 gets to about 300 feet it starts shedding all the “pie slice” fillets of titanium on the left side of the aircraft and one fillet on the right. (On later aircraft, those pieces are paired with triangular inserts made of radar-absorbing composite material.) Technicians spend four days finding and reattaching the pieces. Nonetheless, the flight pleases Kelly Johnson. (Wikipedia, “Lockheed A-12”; Jacobsen, Area 51, pp. 178–179)

April 30 — Schalk takes the A-12 up to 30,000 feet on its first official flight at Area 51 for 59 minutes. His top speed is 400 mph. (Jacobsen, Area 51, p. 179)

April 30 — Just before 10:00 a.m. During a free-flight test (Flight 52) of the X-15 to a height of 246,700 feet (46.7 miles) by NASA pilot Joseph A. Walker from Edwards AFB, California, to Ely, Nevada, the instruments photograph 5–6 cylindrical objects. No visual confirmation. On May 11, at NASA’s Second National Conference on the Peaceful Uses of Space in Seattle, Washington, Walker mentions the objects photographed (and perhaps shows the slides; it is not mentioned in the proceedings). NICAP is unable to obtain the photos. NASA claims the objects are ice flaking off the aircraft (“fireflies”). They are described by a NASA spokesman as “barbell shaped, bright-orange in color, and passing in groups up to six behind the X-15.” Opinion ranges from “definitely something up there,” to “film spots,” to “sun rays on the lens.” Jacobsen implies it was the A-12 test the same day. (“AF Criticizes NASA Release of ‘Mystery Object’ Photo,” UFO Investigator 2, no. 5 (Aug./Sept. 1962): 8; UFOEv, p. 139; Los Angeles Herald-Examiner, May 11, 1962; MUFON UFO Journal, November 1989, pp. 6–7; Good Above, p. 366; Proceedings of the Second National Conference on the Peaceful Uses of Space, Seattle, Washington, May 8–10, 1962, NASA Office of Scientific and Technical Information, November 1962; Curtis Peebles, “Fireflies: The X-15 ‘UFO’ Sighting Controversy,” Magonia 78 (June 2002); Jacobsen, Area 51, p. 205)

Late April or early May — Three women and a 10-year-old boy are driving home to Granby, Connecticut, when two bright yellow lights appear in the sky ahead. The lights cross the road and disappear behind some shrubbery. Driving nearer and stopping, the witnesses see the lights hovering above a field, one above the other. The objects realign horizontally and move toward the car. The driver starts the car up and speeds away, but the lights are right behind her, only a few feet from the rear window and matching the car’s speed. The yellow lights are only a few feet in diameter and have a reddish patch that rotates. They follow the car for four minutes then turn away. (Swords 299–300)

May 4 — The A-12 achieves supersonic speed of Mach 1.1 at 40,000 feet during a test at Groom Lake, Nevada.

May 12 — 4:10 a.m. Three truckers (Valentino Tomassini, Guro Tomassini, and Humberto Zenobi) are driving from Bahía Blanca to Jacinto Aráuz, La Pampa, Argentina, when they see a lantern-like light resting in a nearby field. It brightens and dims alternately. As they slow down, a row of 20–30 lights come on. When they approach to within 210 feet of the object, it rises up and crosses the road at a height of 12 feet. Its lights go out, a reddish flame comes from the bottom, and it makes a soft humming noise. The UFO then divides into two parts that fly off in different directions. Navy Capt. Luis Sanchez Moreno, chief of intelligence at the Puerto Belgrano Naval Base, interviews the witnesses. At the landing site, grass is burned over an area 180 feet in diameter, and there are damp, gray-colored patches. These are taken for analysis to either or both the Puerto Belgrano Naval Base and Universidad Nacional del Sur, both in or near Bahía Blanca. It consists of calcium carbonate and potassium carbonate. (UFOEv, pp. 170–171; “In Argentina,” APRO Bulletin, July 1963, pp. 2–4; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: January–June 1962, The Author, 2005, pp. 60–61; Oscar A. Uriondo, “Preliminary Catalogue of Type 1 Cases in Argentina,” Flying Saucer Review Case Histories, no. 12 (December 1972): 10)

May 13 — 4:00 a.m. Near Onativa, Córdoba, Argentina, two women driving from Rosario see a long object flying at moderate altitude and emitting a powerful, multicolored light. They enter a fog and see through the trees a sort of “little house” on the ground, with green, red, and yellow lights set in an arrow-shaped arrangement. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: January–June 1962, The Author, 2005, p. 62;

May 21 — Miguel Thomé, a reporter for *La Nueva Provincia*, takes several photos of a luminous object above Bahía Blanca, Argentina, one of which is exactly at a point when the object changes course. (UFOEv, p. 170; ClearIntent, pp. 138–139; “Un avistaje de OVNI en Bahía Blanca aparece en los archivos de la CIA de Estados Unidos,” *La Nueva* (Bahía Blanca), February 3, 2016)

May 21 — Day. Capt. Gordon Pendleton and First Officer J. P. Murphy are flying an Aer Lingus Vickers Viscount airliner above southern England at 17,000 feet when they see a brown globe-shaped object approaching head-on. It speeds 3,000 feet below the aircraft at about 700 mph. The object has a number of antenna-like projections on its surface. (*Irish Times*, May 22, 1962; UFOEv, p. 122)

May 22 — 7:10–7:45 p.m. A formation of Navy planes, led by flight instructor Lt. Rodolfo César Galdos, near Comandante Espora Air Naval Base in Bahía Blanca, Argentina, observes several UFOs over a 35-minute period. Witnesses at the control tower also see an object. Student pilot Roberto Wilkinson sees a luminous object trailing his plane. It lights up his cockpit and his radio transmission is disrupted as it passes underneath. (UFOEv, pp. 119, 171; Schopick, p. 129; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: January–June 1962*, The Author, 2005, pp. 65–67; Scott Corrales, “Saucers in My Backyard: Argentina’s Trancas Case,” *Inexplicata*, May 8, 2007)

May 22 or 24 — A woman is hospitalized after she and her husband see an object land near Winifreda, Las Pampas, Argentina. Two large “robot-like creatures” emerge. Argentine Air Force investigators find a circle of scorched grass. (*Lorenzen, Encounters with UFO Occupants*, Berkley Medallion, 1976, p. 152)

May 25 — USAF Pentagon spokesman Maj. Carl R. Hart tells NICAP that Air Force investigations involve hundreds of intelligence officers, as well as “the best scientific brains available in the laboratories of all government agencies,” also scientific investigators in commercial laboratories, wherever needed. He adds that Hynek has consulted with the “world’s leading scientists.” Around the same time, Lt. Col. Spencer Whedon from ATIC informs NICAP that the Air Force spends about $10,000 on each major sighting investigation. (“AF Admits UFO Probe Still in Full Operation,” *UFO Investigator* 2, no. 4 (March/July 1962): 2)

Summer — Col. Joseph J. Bryan III, special assistant to the Secretary of the Air Force and advisor to NATO, joins the board of NICAP. In 1959 he had contacted Keyhoe and asked to see some of his “really hot cases.” It is later revealed that he was also founder of the CIA’s psychological warfare staff. Bryan never discloses his CIA background to NICAP or Keyhoe. Although Bryan, the father of later UFO author C. D. B. Bryan, makes strong pro-UFO statements, he is later suspected of helping to discredit Keyhoe and undermine NICAP; his son and Richard H. Hall deny it. (“AF Colonel, Noted Astronomer, Join Board,” *UFO Investigator* 2, no. 5 (Aug./Sept 1962): 2; “Col. Joseph Bryan,” *UFO Investigator* 3, no. 8 (May/June 1966): 5; “NI-CIA-AP or NICAP?” *Just Cause* 1, no. 7 (January 1979): 5–13; “CE4K Author C. D. B. Bryan Dies;” *Rigorous Intuition*, December 18, 2009)

Summer — Around 9:00 p.m. Harvey Packard and five other men are fishing near East Peru, Maine, when three orange globes show up across the pond and begin dancing about. The globes move toward the witnesses, who get scared and jump in their car and speed away. The globes follow the car, one in the rear and the others on each side. The objects appear to be transparent, 3-foot spheres that easily pace the speeding vehicle. Occasionally they leave their positions and form into a triangle with squarish bridges between them, then split up and continue the car chase. The car radio is filled with static. Finally, they veer off and fly into the woods. (NICAP case file; Swords 300)

Summer — Donald MacKenzie, a shepherd, discovers some strange wreckage in a remote moor near Ardgay, Sutherland, Scotland, that he thinks is related to Sputnik. In October, a team from RAF Kinloss [now Kinloss Barracks] on the Moray Firth arrives to investigate. They find a strange box-shaped object, large enough to have carried a person and containing spaces for cameras and a brass panel that explains, in pictures, what the finder should do in the event of discovery to claim a reward. Buried nearby are a number of bottles of colorless fluid. The team is mystified and suspects something Russian but can’t confirm it. The debris now seems likely to have come from a secret spy balloon, one of many launched in 1955–1956 by the US Air Force from RAF Evanton [now closed], to take reconnaissance photos of Russian military and nuclear facilities. Once clear of Soviet territory, the balloons were designed to drop into the Pacific Ocean where its VHF beacon would guide recovery efforts. (David Clarke, “The Scottish Roswell?” Dr. David Clarke: Folklore and Journalism, July 29, 2012)

June 6 — 11:20 a.m. Six silent objects are seen at intervals over Caroda, New South Wales. A trail of shiny, web-like filaments falls and gradually disintegrates as they drift through the air. Witnesses say they are up to 5 feet long. (Keith Basterfield, “Angel Hair: An Australian Perspective,” *IUR* 27, no. 1 (Spring 2002): 7; Keith Basterfield, “A Catalogue and Analysis of Australasian ‘Angel Hair’ Cases,” March 2001)

June 7 — A brilliant white light, approximately 20 times brighter than first magnitude stars, is seen at Hallett Station [now closed], Cape Hallett, East Antarctica, at 250° (true) azimuth, and 30° elevation. Over 5 minutes it remains stationary and is viewed both with binoculars and the naked eye. It appears circular. It is a dazzling gold color and observed between two mountain peaks. The sun at the time is below the horizon. After 5 minutes it moves in a southerly direction and is lost to view behind a peak. Project Blue Book concludes it is Jupiter, even though that planet’s position is only at 5° elevation. (NICAP, *Blue Book documents*; Sparks, p. 292; Swords 298)

June 25–26 — 9:00 p.m.–2:00 a.m. John, 14, and James Westmoreland, 12, are camping out in their backyard at 7466 East 18th Street, Tucson, Arizona, with a friend, Ronald Black, 11. About 9:00 p.m. John notices a bright star in the west that moves occasionally, dips, and hovers. Around 11:45, they notice that the star is brighter and has moved closer, taking the shape of a triangle. At 12:15, the object noiselessly emits three green flares that take on a speedy horizontal flight path. They notice a second, ball-shaped object that races from west to east, flips, and stops at a higher elevation than the first. A “flare-like” light approaches the second and seems to be absorbed by it. The first UFO spits out more green flares, two of which disappear into the second object a few minutes later. The second object shoots out a rocket that disappears in the sky. A third whitish object, larger and disc-shaped, appears above Pontano Wash with a cone-shaped superstructure. Three stiltlike protruberances appear briefly then are drawn back in. The third object also drops something like a rope that extends to the ground for 3–5 minutes. The boys soon get sleepy and retire after a while, telling the mother, *Pansy Westmoreland*, about it in the morning. (“*Saucers, Rockets Inhabit Night Sky*,” *Tucson (Ariz.) Daily Citizen*, June 26, 1962, p. 17; Coral E. Lorenzen, “*Saucers Shoot Rockets over Tucson, Arizona*,” *APRO Bulletin*, July 62, pp. 1, 3–4; Lorenzen, *UFOs over the Americas*, Signet, 1968, pp. 114–118)

July — APRO refers to NICAP as merely a “lobbying” effort in *APRO Bulletin*, while APRO is “gradually drawing the endorsements of the scientific community.” (“*Support NICAP!*” *APRO Bulletin*, July 1962, pp. 1–2; Clark III 50)

July 7 — Soviet Col. *Georgy Mosolov* reaches 1,665 mph in a Mikoyan Gurevich Ye-166 (a modified Ye-152) over Russia. (Wikipedia, “*Georgi Mosolov*”)

July 7 — 11:10 p.m. C. B. Taylor, chief scientist at Hallett Station [now closed], Cape Hallett, East Antarctica, sees an intense light followed by two smaller lights pass over the facility in a few seconds leaving a clearly visible trail. Its passage is registered by an all-sky camera used for the study of auroras. Probable bolide. (NICAP, *Blue Book documents*; NICAP, “*Object Filmed by All Camera (IFO)*”)

July 17 — Maj. *Robert Michael White* is piloting Flight 62 of the X-15 at Edwards AFB, California. He flies it to 314,750 feet (59 miles), qualifying him for USAF astronaut wings. For this, he is featured on the cover of the August 3 issue of *Life*. At the top of his climb he sees a small grayish object “like a piece of paper” about 30–40 feet away. He exclaims, “There are things out there. There absolutely is!” (“*Space: Inside the Sky*,” *Time*, July 27, 1962; *MUFON UFO Journal*, November 1989, pp. 6–7; Good Above, p. 366)

July 28 — Before dawn. The skipper of a chartered fishing boat 6 miles southeast of Avalon, Santa Catalina Island, California, sees several stationary lights low in the water dead ahead. Through binoculars he sees a squat, lighted structure in which several men are working, apparently the stern of a submarine with no markings and dacks almost awash. He and another crew member see five men, “two in all-white garb, two in dark trousers and white shirts, and one in a sky-blue jumpsuit.” The craft swept in their direction toward the open sea, still on the surface, and the skipper has to turn hard to keep clear. It makes no noise and leaves no wake. (Marvin Miles, “*Report Studied on Soviet Sub off Catalina*,” *Los Angeles Times*, October 25, 1962, pp. 1, 10)

August — 7:00 p.m. Three witnesses are driving south toward San José de Métan, Salta, Argentina, when they see a light against the mountains to the west. It approaches, growing as large as the full moon when it is 300 feet ahead of it. There is a bulge at the top and reddish-pink, green, and white blinking lights. It continues to approach and passes above a Fiat truck in the road ahead of them. The truck stops, and the witnesses stop their car as well, two of them walking into some nearby bushes to observe. The object now seems to be the diameter of a DC-3’s wingspan and is 150 feet in the air. The truck’s lights go out, and the object rocks back and forth, taking off to the north at a great rate of speed. Five minutes later, they drive up to the stopped truck, whose driver is scooping up dirt to cool its overheated engine down. (Lorenzen, *UFOs: The Whole Story*, Signet, 1969, pp. 157–158)

August — Night. Marilyn Chenarides, her younger brother Roger, and their mother Mildred Anderson are vacationing in a cabin on Movil Lake, Minnesota. The two women see a glowing red, domed disc with large windows hovering
above the boat dock 50 feet away. Silhouetted in the windows are three entities who seem to be looking at them. The women shut off the cabin lights for a better look, and the UFO switches off its own lights. Anderson runs out of the cabin toward the object, which lifts and disappears rapidly. ("The 1962 Occupants Case," APRO Bulletin 21, no. 2 (Sept./Oct. 1972): 6)

August 2 — Around 12:00 midnight. Air traffic control operators at Cambá Punta Airport [now Doctor Fernando Piragine Niveyro International Airport], near Corrientes, Argentina, see an unidentified light approaching the airport. They call the airport manager, Luís Harvey, who arrives from home in a hurry and sees the light circling at high speed. Harvey orders a landing strip freed up but the light, apparently a spherical object, comes down, hovering and revolving a few feet above the same spot on the runway for 3–4 minutes, emitting strong blue, green, and orange flashes. Then it climbs and vanishes at staggering speed. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: July–December 1962, The Author, 2005, pp. 18–19; Patrick Gross, “Cambá Punta, Argentina, August 2, 1962”)

August 7 — Midnight. A contract worker at the not-yet-operational Titan II launch complex of the 570th Strategic Missile Squadron near Oracle, Arizona, sees a brilliant light descending over the site. He is joined by a colleague as the light gets larger. Both men go inside and contact Davis-Monthan AFB outside Tucson, which sends out two jet interceptors. When the aircraft arrive, the light takes off to the north and disappears rapidly. After the jets circle and head back, the light returns, descends toward the silo, and takes off vertically. (Lorenzen, UFOs: The Whole Story, Signet, 1969, pp. 235–236; Nukes 220–221)

August 17–19 — Evening. Walking home, diamond prospector Rivalino Mafra da Silva sees two small beings, about three feet tall, digging a hole near Duas Pontes, 17 miles north of Diamantina, Minas Gerais, Brazil. On August 19, Mafra da Silva and his sons are in bed when they are awakened by sounds and see a shadowy figure, apparently floating in the room. In the morning, he and his son Raimundo see two humming balls floating outside. They merge into one larger ball that moves toward Rivalino, enveloping him in yellow smoke. Raimundo says: “Then the yellow smoke dissolved. The balls were gone. The ground below was clean as if the dust had been removed by a big broom.” He tells his story to Lt. Wilson Lisbôa, chief of police at Diamantina, who conducts a search for 10 days. Only a few drops of blood are found. (“The Brazilian Abduction: Boy’s Story Unshaken,” Flying Saucer Review 8, no. 6 (Nov./Dec. 1962): 10–12; Clark III 418–419; Brazil 123–127; Patrick Gross, URECAT)

Late August — 2:00 p.m. Ann Druffel and Aileen Cummings are at Long Beach, California, when they see a small rectangular cloud over the Santa Catalina Channel. Its vapor appears to churn and it doubles in size, then elongates to 20–30 times its original size. (Ann Druffel, “Santa Catalina Island Recurring ‘Cloud Cigars,’” in Proceedings of the 1976 CUFOS Conference, Chicago, 1976, pp. 63–64; Ann Druffel, “Santa Catalina Channel Cloud Cigars,” IUR 31, no. 1 (January 2007): 12–13)

Late August — 7:00 p.m. Three witnesses are driving in a rural area about 87 miles from Salta, Argentina, when two of them (the third sleeps through the event) see a light against the mountains to the west that grows larger and moves about 300 feet above the road ahead of them. It is a domed disc with flashing reddish-pink, green, and white lights around its perimeter. The object illuminates a truck ahead of them. The truck stops, and the two witnesses get out of their car and hide in some bushes to see what happens next. The object appears to be nearly 100 feet wide and 150 feet above the truck. The truck’s lights go out and the object takes off to the north at a high rate of speed, climbing out of sight within seconds. They drive up to the truck, whose drivers are throwing dirt into its smoking engine compartment and are more concerned about an insurance claim than a UFO encounter. (Lorenzen, UFOs over the Americas, Signet, 1968, pp. 12–13)

August 26 — 12:05 a.m. Geraldo Bíchara, 18, is standing guard at the Escola de Sargentos das Armas in Três Coronaços, Minas Gerais, Brazil, when an electrical blackout occurs in the city. Suddenly he is paralyzed by a light beam from an unseen object, apparently for a few minutes. In 1980, Bíchara undergoes hypnosis and discovers that the incident was an abduction in which he is taken aboard a UFO by beings wearing pumpkin-colored jumpsuits and subjected to a medical examination. He attempts to flee at one point and grabs his rifle lying nearby, but he is still paralyzed. After about 2 hours he is returned to the guardhouse. (Brazil 60–66; “Caso Giraldo Bichara,” Grupo de Amigos que Estudam Mistérios e Ufologia, May 2014)

August 26 — 12:30 a.m. Walter T. Jones Jr. watches a triangular formation of 6 white lights and one green light pass silently over Philadelphia, Pennsylvania, for 3–5 minutes. ("Another ‘Mother’ Ship?" APRO Bulletin, July 1963, p. 3)

August 29 — Afternoon. A U-2 spy plane flying over Cuba spots an SA-2 surface-to-air missile site under construction at La Coloma, eight Komar-class guided missile patrol boats, and a cruise missile site at Banes. (Kenneth Michael Absher, Mind- Sets and Missiles, US Army War College, 2009)
August 30 — 7:35–7:55 p.m. While having supper at an outdoor restaurant near Port-au-Prince, Haiti, three men, one of whom works for Techint Engineering Company, watch a UFO that approaches and hovers for 20 minutes. The engineer has a portable theodolite with him, and they set it up and track the object. It is a silvery-gray disc, like two rounded hubcaps together, and is spinning on its axis. It has an antenna on the top and exhaust ports all around its mid-line, and it is surrounded by gaseous emissions that run through all the colors of the spectrum. The object flips to a vertical alignment, showing its base, and then tips over so that its original topside is on the bottom. The object silently accelerates and disappears in 5 seconds. Project Blue Book concludes that the men were watching the planet Venus. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: July–December 1962, The Author, 2005, p. 33; Swords 298–299)

September — California contactee Gloria Lee takes channeled blueprints for a spaceship to Washington, D.C., to show to government officials. She gets nowhere, but while in town she gets messages from her space contact J.W. saying that the space people are upset with human wars and nuclear weapons. J.W. orders her to go on a fast for peace until he sends a “light elevator” to take her to Jupiter. Her fast lasts from September 23 to November 28. No one pays attention. After about 66 days without eating, Lee’s husband, aircraft engineer William H. Byrd, summons an ambulance to take her to George Washington University Hospital. She dies there on December 3. Lee continues to channel post-mortem information through a medium named Nada-Yolanda (Pauline Sharpe) in the Miami-based Mark-Age MetaCenter. (Clark III 682–683; Tristan, “The Airline Stewardess Who Starved Herself to Death for Aliens,” Bizarre and Grotesque, December 18, 2016)

September — Thomas M. Comella, writing under the pseudonym “Peter Kor,” proposes that UFOs originate, not from space (as he apparently thought when he favored the extraterrestrial hypothesis in the December 1955 issue of Fate), but from a reality “so strange that it cannot be confined to our three-dimensional world.” (Clark III 877; Thomas M. Comella, “Why the Real Saucer Is Interplanetary,” Fate 8, no. 12 (December 1955): 17–23; Peter Kor [Thomas M. Comella], “The Solution to the Flying Saucer Mystery,” Flying Saucers, September 1962, pp. 68–74)

September 1 — The USSR publicly announces an agreement to supply arms and military technicians to Cuba.

Construction begins on SS-5 IRBM sites in Guanajay. (Wikipedia, “Cuban Missile Crisis”)

September 5 — U-2 photos reveal for the first time the presence of MiG-21 jet fighters in Cuba.

September 15 — Construction begins on Soviet SS-4 MRBM sites at San Cristobal, Cuba.

September 15 — 5:00 p.m. Two bright discs are seen over Oradell, New Jersey. At 6:00 p.m., former Navy flying officer J. J. McVickers sees two discs just across the state line near Oradell. At 7:50 p.m., Victor Cipolla sees a glowing object descend toward Oradell. Two other witnesses see one round object with a fin on top and another under it at darting back and forth near Oradell Reservoir. At 7:55 p.m., three teens see and hear a bright, oval object land in the reservoir with a loud splash. A moment later, it lifts off and climbs silently at high speed. (“Disc Landing Reported in New Jersey,” UFO Investigator 2, no. 6 (Oct./Nov. 1962): 3–4; UFOEv, p. 140; Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: July–December 1962, The Author, 2005, pp. 48, 49; Sparks, p. 292)

September 20 — Construction begins on Soviet SAM sites at Los Angeles, Chaparra, and Juguani, Cuba.

Fall — Arlene Cook is awakened by her young, terrified son, at their home in Anaheim, California. He says something is in his bedroom, so they go to investigate and see a half-dollar-sized light on his bed. The spot stays visible when she puts her hand on the bed or when she removes the covers, but she can find no source for the light. It then just switches off and does not return. (Michael D. Swords, “A Trick of the Light,” IUR 31, no. 2 (June 2007): 8)

Fall — Patricia Ellingson is seeing “glowing, flame-like lights” in her bedroom in Azusa, California, every evening. She thinks they appear only when she is mentally calm. The lights are the size of a quarter, sometimes switch off abruptly, and other times fade out slowly. At times they do not appear for months, and she feels sad when they are not there. (Michael D. Swords, “A Trick of the Light,” IUR 31, no. 2 (June 2007): 8)

October — The CIA and USAF instruct Lockheed to study a high-speed, high-altitude drone concept. Kelly Johnson specifies speeds of Mach 3.3–3.5, an operational altitude of 87,000–95,000 feet, and a range of 3,500 miles. It would make a one-way trip, eject its camera payload at the end of the mission for recovery, then self-destruct. It has a double-delta wing similar to the A-12’s wing design. The Q-12 is to be air-launched from the back of an A-12 and uses key technology from the A-12 project, including titanium construction and radar cross-section reduction design features. Johnson wants to power the Q-12 with a ramjet engine modified to operate at high temperatures for at least 90 minutes at high altitude. (Wikipedia, “Lockheed D-21”)
October 2 — Night. A Boeing security guard at an unidentified Minuteman missile site near Moore, Montana [likely the M-01 launch site that is part of Malmstrom AFB complex], sees a tear-shaped object with a blue top and a red bottom. (“Flying Objects Reported in Separated Areas,” Helena (Mont.) Independent-Record, October 3, 1962, p. 7)

October 2 — Night. Airmen on security patrol at Larson AFB [now Grant County International Airport] near Moses Lake, Washington, see a white light hovering a few hundred feet in the air near where the ICBM storage bunkers are located. It silently shoots into the air as the guards approach it. (“Flying Objects Reported in Separated Areas,” Helena (Mont.) Independent-Record, October 3, 1962, p. 7; Nukes 145–147)

October 7 — New U-2 flights show there are now 19 Soviet SA-2 missile sites in Cuba.

October 12 — Dawn. An object like an orange or yellow meteor is observed over Forbes AFB [now Topeka Regional Airport], Topeka, Kansas. Its flight path is curved upward, with an occasional jerky motion; it moves quickly at first but slows down as it reaches the zenith. It is visible for 5 minutes before fading out. [Blue Book documents; Nukes 145)

October 14 — A U-2 (loaned to the Air Force by the CIA because the CIA U-2s have better surveillance capabilities) piloted by USAF Major Richard S. Heyser out of Laughlin AFB, Del Rio, Texas, takes 928 pictures on a path selected by DIA analysts, capturing images of what turn out to be an SS-4 MRBM construction site at San Cristóbal, Pinar del Río Province [now in Artemisa Province], in western Cuba. (Wikipedia, “Cuban Missile Crisis”; “U-2 Pilot’s Cuba Photos Made History,” Wilmington (N.C.) Star-News, October 9, 2005)

October 15 — The CIA’s National Photographic Interpretation Center reviews the U-2 photographs and identifies objects that they interpret as medium-range ballistic missiles. The CIA notifies the Department of State. National Security Advisor McGeorge Bundy chooses to wait until the next morning to tell the President. Secretary of Defense Robert McNamara is briefed at midnight. (Wikipedia, “Cuban Missile Crisis”) 

October 16 — 6:30 p.m. Kennedy gathers a select group of advisors known as the ExComm (Executive Committee of the National Security Council) to discuss a strategic response. McNamara presents him with three basic options: a political option of approaching Castro and Khrushchev; a naval blockade to stop Soviet ships carrying weapons to Cuba; and “military action directed against Cuba, starting with an air attack against the missiles.” The ExComm’s initial discussions focus on a massive US military assault on the nuclear installations and other bases in Cuba, and whether the Soviets would counterattack in Berlin or elsewhere. Kennedy rejects an attack, favoring a quarantine to buy time to negotiate a missile withdrawal. (Wikipedia, “Cuban Missile Crisis”)

October 17 — A U-2 takes the first photo of an IRBM site under construction in Cuba. (“The Cuban Missile Crisis, 1962: The Photographs,” National Security Archive)

October 22 — 7:00 p.m. President Kennedy addresses the American public for 18 minutes and announces his plan to implement a naval blockade of Cuba. US military alert is set at DEFCON 3, and Castro mobilizes all of Cuba’s military forces. US ambassador to the Soviet Union Foy D. Kohler delivers to a letter from JFK to Khrushchev, saying, “the one thing that has most concerned me has been the possibility that your government would not correctly understand the will and determination of the United States in any given situation, since I have not assumed that you or any other sane man would, in this nuclear age, deliberately plunge the world into war which it is crystal clear no country could win and which could only result in catastrophic consequences to the whole world, including the aggressor.” (Wikipedia, “Cuban Missile Crisis”; John F. Kennedy, Letter to Chairman Nikita Khrushchev, October 22, 1962)

October 23 — Khrushchev writes to Kennedy, rebuffing his demand that the Soviets remove the missiles, which the Soviet leader insists “are intended solely for defensive purposes.” Kennedy writes back, bluntly reminding Khrushchev that he started the crisis by secretly sending missiles to Cuba. As US ambassador Adlai Stevenson explains the matter to the United Nations Security Council, US ships already are moving into position in the waters around Cuba. Soviet submarines menacingly move into the Caribbean as well, positioned as if they might try to break a blockade. But Soviet freighters bearing military supplies headed for Cuba stop in their tracks. (Nikita Khrushchev, Letter to President John F. Kennedy, October 23, 1962; John F. Kennedy, Draft letter to Chairman Nikita Khrushchev, October 23, 1962)

October 24 — Khrushchev sends an indignant letter to Kennedy, accusing him of threatening the Soviet Union: “You are no longer appealing to reason, but wish to intimidate us.” (Nikita Khrushchev, Letter to President John F. Kennedy, October 24, 1962)

October 25 — The US raises the readiness level of SAC forces to DEFCON 2. For the only confirmed time in US history, B-52 bombers go on continuous airborne alert, and B-47 medium bombers are dispersed to various military and civilian airfields and made ready to take off, fully equipped, on 15 minutes notice. The Soviet arms freighters turn back toward Europe, but the oil tanker Bucharest approaches the US quarantine zone, directly headed for Cuba. Two American warships, the USS Essex and the USS Gearing, prepare to intercept it, which
could have led to war. Instead, Kennedy decides to let the Bucharest through the quarantine because it isn’t carrying any contraband. (Wikipedia, “Cuban Missile Crisis”; McGeorge Bundy, “Record of Action of the Fourth Meeting of the Executive Committee of the National Security Council,” October 25, 1962; Wikipedia, “Cuban Missile Crisis”)

October 26 — Castro sends a letter to Khrushchev, urging him to launch a nuclear first strike against the US, which the Soviet leader disregards. Instead, Khrushchev sends a letter to Kennedy, in which he offers to work with him to deescalate the conflict and ensure that they do not “doom the world to the catastrophe of thermonuclear war.” The CIA reports that the construction of Cuban missile sites is continuing and accelerating. Robert Kennedy meets secretly with Soviet Ambassador Anatoly Dobrynin and agrees after a phone call to the president that the removal of US missiles from Turkey is negotiable as part of a comprehensive settlement. (Fidel Castro, Letter to Chairman Nikita Khrushchev, October 26, 1962; Nikita Khrushchev, Department of State Telegram Transmitting Letter to President John F. Kennedy, October 26, 1962; Wikipedia, “Cuban Missile Crisis”; Daniel Ellsberg, The Doomsday Machine: Confessions of a Nuclear War Planner, Bloomsbury, 2017, chapter 12–13)

October 26 — 7:16 a.m. Bessie Rogers of Fort Collins, Colorado, spots a large, black parachute-shaped object weaving back and forth over the mountains somewhere between the south end of Horsetooth Reservoir and Masonville. It flies around for about 10 minutes, disappears, and then returns. (“Variety of Objects in Colorado,” APRO Bulletin, January 1963, p. 1)

Late October — Day. Two Air Force B-52 Stratofortress bombers are returning to Loring AFB [now the Loring Commerce Centre] near Limestone, Maine, following an Operation Chrome Dome mission. They are on final approach to landing when a huge, metallic-gray, cigar-shaped UFO descends over the flight line and hovers for a few minutes. It stretches halfway across the aircraft ramp area, which would make it half a mile wide. Jet engine mechanic Sgt. Christopher Smith is watching the scenario from the ground and notes that the UFO is silent and has no lights or visible openings. After the second B-52 lands, the UFO silently zooms away toward the east and disappears. All the ground witnesses and the flight crews do not talk about the incident afterward and act as if nothing happened. (Nukes 132–136, 138–139)

October 27 — A U-2 piloted by Maj. Rudolf Anderson is shot down over Cuba. However, Kennedy correctly concludes that Khrushchev has not himself given the order to shoot down Anderson’s plane. The incident prompts both leaders to realize the situation is spiraling dangerously out of control. Khrushchev sends another letter to Kennedy, in which he demands that the United States withdraw missiles from Turkey as part of the deal. JFK responds by offering to promise not to attack Cuba after the Russians withdraw. In the evening, Robert Kennedy tells Soviet ambassador Dobrynin, “You have drawn first blood.... The president had decided against advice ... not to respond militarily to that attack, but he [Dobrynin] should know that if another plane was shot at ... we would take out all the SAMs and antiaircraft.... And that would almost surely be followed by an invasion.” However, he also says that the US already plans to remove its missiles from Turkey but cannot say so publicly. This is the moment when both nations step back from the brink of war. (Wikipedia, “Cuban Missile Crisis”; Nikita Khrushchev, Letter to President John F. Kennedy, October 27, 1962; Anatoly Dobrynin, Cable to the Soviet Foreign Ministry, meeting with Robert Kennedy, October 27, 1962; John F. Kennedy, Letter to Chairman Nikita Khrushchev, October 27, 1962; Daniel Ellsberg, The Doomsday Machine: Confessions of a Nuclear War Planner, Bloomsbury, 2017, chapter 12–13; Christopher Klein, “How the Death of a US Air Force Pilot Prevented a Nuclear War,” History Stores, October 28, 2019)

October 28 — In a speech aired on Radio Moscow, Nikita Khrushchev announces the dismantling of Soviet missiles in Cuba and does not insist on his demands concerning the removal of US missiles from Turkey. (Wikipedia, “Cuban Missile Crisis”; Nikita Khrushchev, Letter to President John F. Kennedy, October 28, 1962)

October 28 — 7:30 p.m. Mrs. Ellen D. Sylvester is driving with her three children in Norwood, South Australia, east of Adelaide, when they see an orange glow on the ground about 2–3 miles away. It has three legs, round windows, and the boy remarks that he can see people in it. One of the “men” gets out and descends to the ground. He appears to be doing something to one of the landing legs. He seems to have some trouble in making it retract, which finally he overcomes. He is about 6 feet tall, as his head reaches the outer fringe of the craft. He wears a helmet like a gas mask. He returns to the UFO, which begins to move slowly away, then very fast, and disappears in a northerly direction. Total time of observation is 40 minutes. (Keith Basterfield, “‘This Is One of the Most Remarkable Cases of a Flying Saucer...,’ Adelaide, 1962,” Unidentified Aerial Phenomena—Scientific Research, September 22, 2014)

October 29 — Defense Department Assistant Secretary Arthur Sylvester admits that withholding evidence on UFOs from the public is necessary if the means justifies it. He cites USAF “administrative practices” Air Force Regulation
11-30, where withholding information “in the public interest” is allowed, and AFR 11-7, which states that sometimes information requested by Congress may not be furnished “even in confidence.” (Keyhoe, Aliens from Space, Signet ed., 1974, p. 86; UFOEv, p. 106)

November — Evening. A French businessman is driving along a minor road in Var department, southeastern France. It is raining heavily. Rounding a bend, he sees a group of figures in the road 260 feet ahead. He slows down to drive around them and sees that they are actually bizarre animals with the heads of birds and covered in plumage. Terrified, he speeds ahead and stops about 500 feet further ahead. Turing around, he sees the entities heading toward a luminous, dark-blue object hanging in the air over a field on the other side of the road. It resembles two plates upside down. The entities are sucked into the bottom of the object. He hears a “clack,” and the UFO takes off at “prodigious speed.” (Lyonel Trigano, “Strange Encounter in Var,” Flying Saucer Review 14, no. 6 (Nov./Dec. 1968): 18; Clark III 280)

November 15 — Stanford astronomer Carl Sagan presents a paper at the American Rocket Society annual meeting in Los Angeles, California, that explores models for the distribution of technical civilizations in the galaxy. Using Frank Drake’s equation to suggest that 0.001% of stars in the sky have a planet on them on which an advanced civilization resides, Sagan suggests the nearest such advanced civilization is several hundred light years away from earth. From there, he explores the feasibility of interstellar spaceflight as a means for traversing such distances. The paper ends in consideration of the possibility of extraterrestrial contact with Earth in the past, including the ancient Mesopotamian myth of Oannes (Akkalu), a mythical being who taught mankind wisdom. Berossus describes Oannes as having the body of a fish but underneath the figure of a man. (Clark III 584)

November 17 — 9:00 p.m. F. L. Swindale, ex-Marine captain, sees three bright, star-like lights approach, hover, and bounce at Tampa, Florida, for about 15 minutes, then fade. (UFOEv, p. 140; Sparks, p. 293)

November 23 — The Hills attend a meeting at the parsonage of their Unitarian church in Portsmouth, New Hampshire, where the invited guest speaker is USAF Capt. Ben H. Swett, who has recently published a book of his poetry. After he reads selections of his poetry, the pastor asks him to discuss his personal interest in hypnosis. After the meeting breaks up, the Hills approach Swett privately and tell him what they can remember of their strange encounter. He is particularly interested in the missing time of the Hills’ account. The Hills ask Swett if he will hypnotize them to recover their memories, but Swett says he is not qualified and cautions them against going to an amateur hypnotist, such as himself. (Clark III 584)

November 30 — Two teenage boys in Lethbridge, Alberta, see an elliptical object hovering near a school building and decide to throw rocks at it. The object is about 8 feet in diameter and glowing blue. Their stones seem to ricochet off the UFO and forcefully returned, landing on structures behind the teens. (CUFOS case file)

December — Kennedy closes the Cuban Project, the CIA’s Operation Mongoose. (Wikipedia, “Operation Mongoose”)

December 1 — Evening. A husband and wife in East Point, Georgia, are watching the first-quarter Moon through a 6-inch reflector. In the dark area, well away from the terminator, the man sees a bright-red spot light up. It gets so bright that he points it out to his wife. She notices it starting to move across the illuminated portion of the Moon, then continues passing in a straight line across the blue Georgia sky, faster and faster until it is gone. (Michael D. Swords, “Gazing at the Moons,” IUR 32, no. 4 (October 2009): 15)

December 7 — A full-scale mockup of the Q-12 drone is ready at Groom Lake, Nevada, and has already undergone preliminary tests to measure its stealth quality. However, the CIA is not enthusiastic about the Q-12, mostly because the agency is overextended at the time with U-2 missions, getting the A-12 up to speed, and covert operations in Southeast Asia. The USAF, however, is interested in the Q-12 as both a reconnaissance platform
January 11 — Oscar A. Uriondo, "Preliminary Catalogue of Type 1 Cases in Argentina," Magonia, no. 12 (December 1972): 11

December 20 — Ali R. Diaz is aboard a DC-3 tourist plane on a vacation trip to Angel Falls, Venezuela. He obtains color film of a UFO rising from the base of a mountain. The film shows a yellowish teardrop-shaped object rising across the face of Auyán-tepui plateau. The UFO seems to oscillate from side to side until it is lost in clouds. The falls and mountain provide location points throughout. ("Angel Falls UFO Film 1962," UFO History Group YouTube channel, August 30, 2014; UFOEv, p. 96)

December 21 — Five schoolgirls in Amagasaki, Hyogo Prefecture, Japan, see a brightly glowing UFO. All five students independently sketch a Saturn-shaped object. (UFOEv, p. 124)

December 22 — About 2:20 p.m. Night watchman Francesco Rizzi is reporting for work at a mill on Via Santa Valeria in Milan, Italy. In the center of the mill’s courtyard he hears a swirling sound and turns to see a domed metallic disc 12–15 feet in diameter with potholes hovering 3 feet above the ground. A door opens at the bottom and a small man just over 3 feet tall and wearing a luminous overall emerges. The man motions Rizzi to come nearer, but he is frozen with fear. Another small man comes out of the disc, but they both return, the door closes behind them, and the object takes off in a cloud of white smoke. Rizzi reports the sighting to a colleague, the police, and the press, and soon loses his job. (Pinotti 130–131)

December 23 — Night. Brothers Rosauro Antonio, Ricardo, and Victor Domingo López discover a burned area of grass in a field just over a mile from their house in Cañada de Alzogaray, near Burruyacú, Tucumán, Argentina. The burn is in the shape of two rings (each a foot wide and 10.8 feet in diameter) where the grass is burned down to its roots to a depth of 3–4 inches. They find a carbonized residue and whitish powder. Some days previously, a neighbor named Juan Gerónimo Pera, his wife, and children, had seen a luminous oval-shaped object that landed in the field. (Oscar A. Uriondo, "Preliminary Catalogue of Type 1 Cases in Argentina," Flying Saucer Review Case Histories, no. 12 (December 1972): 11)

1963

1963 — Russian astrophysicist Nikolai Kardashev examines the radio source CTA-102, the first Soviet effort in the search for extraterrestrial intelligence (SETI). He comes up with the idea that some galactic civilizations could be perhaps millions or billions of years ahead of us, and creates the Kardashev scale to rank such civilizations. Kardashev defines three levels of civilizations, based on energy consumption: Type I (planetary civilization) with “technological level close to the level presently attained on earth”; Type II (stellar civilization), “a civilization capable of harnessing the energy radiated by its own star”; and Type III (galactic civilization), “a civilization in possession of energy on the scale of its own galaxy.” Various extensions of the Kardashev scale have since been proposed, including the use of metrics rather than pure power. The idea that the CTA-102 emission is caused by a civilization is later rejected when it is identified as one of the many varieties of quasar (quasi-stellar radio source), a term coined by Hong-Yee Chiu in May 1964 to describe these objects. (Wikipedia, “Kardashev scale”)

January — The A-12 fleet at Groom Lake, Nevada, is now operating with J58 engines built by Pratt and Whitney, allowing for speeds up to Mach 3.

January — Night. Brothers Rosauro Antonio, Ricardo, and Victor Domingo López discover a burned area of grass in a field just over a mile from their house in Cañada de Alzogaray, near Burruyacú, Tucumán, Argentina. The burn is in the shape of two rings (each a foot wide and 10.8 feet in diameter) where the grass is burned down to its roots to a depth of 3–4 inches. They find a carbonized residue and whitish powder. Some days previously, a neighbor named Juan Gerónimo Pera, his wife, and children, had seen a luminous oval-shaped object that landed in the field. (Oscar A. Uriondo, “Preliminary Catalogue of Type 1 Cases in Argentina,” Flying Saucer Review Case Histories, no. 12 (December 1972): 11)

January 11 — At 11:00 p.m., at San Pietro Vernotico, Italy, farmer Antonio de Luca is awakened by restless animals and goes out to calm them. Fifteen minutes later he sees a domed disc some 132 feet long and in the village square. Dark figures are moving inside the transparent dome. He tries to approach but is paralyzed at 30 feet away. It ascends in the direction of Brindisi to the north, emitting a vertical beam of green light. (Vallée, Magonia, p. 290;
March — Austrian ufologist Luis Schoenherr offers a paranormal explanation for UFOs, saying that they either emanate from an unobservable fourth dimension or are time machines. (Luis Schoenherr, “UFOs and the Fourth Dimension,” Flying Saucer Review 9, no. 2 (March/April 1963): 10–12; Luis Schoenherr, “UFOs and the Fourth Dimension, Part 2,” Flying Saucer Review 10, no. 1 (Jan./Feb. 1964): 16–20, 23)

March 3 — The Hills are invited by their Unitarian church to discuss their UFO experience. They speak about it for the first time publicly. (Clark III 584)

April 30 — Adamski arrives in Copenhagen for another scheduled lecture tour of Europe at the invitation of Hans C. Petersen. He attends the Skandinavisk UFO Information Congress in Frederica, Denmark. (“Final Years,” The Adamski Case, June 11, 2009)

May 24 — An A-12 piloted by Kenneth S. Collins crashes near Wendover, Utah. The CIA thinks it might have been due to pilot error and contracts with a well-known Boston, Massachusetts, psychiatrist with a specialty in hypnosis (unnamed, but possibly Benjamin Simon, of Betty and Barney Hill fame later). After a lengthy investigation it is determined that a tiny, pencil-sized part called a pilot tube, a device that controls the airspeed indicator, froze when the A-12 entered a cloud, causing the aircraft to stall. (Wikipedia, “Lockheed A-12”; Jacobsen, Area 51, pp. 190–197)

May 31 — Adamski allegedly has a private audience with Pope John XXIII in Rome, Italy. The pontiff is seriously ill and dies three days later. Adamski claims that he has received a “Golden Medal of Honor” from the pope, but skeptics note that the medal is actually a common tourist souvenir made by a company in Milan, and that Adamski displays it to his friends in a cheap plastic box—which is how it is sold in tourist shops in Rome. Adamski says his meeting is at the request of the extraterrestrials he is in contact with in order to ask for a “final agreement” from the pope because of his decision not to communicate directly with them anymore and to offer John XXIII a liquid substance in order to save him from the gastric enteritis that he suffers from. (Lou Zinsstag and Timothy Good, George Adamski: The Untold Story, Ceti, 1983; Colin Bennett, Looking for Orthon, Paraview, 2001;
Summer — Allen H. Greenfield and Rick Hilberg start publishing Saucer Album in Cleveland, Ohio. It becomes UFO Magazine in mid-1964 and continues through the summer of 1970. After a few years’ hiatus, it returns as UFO Magazine News Bulletin in early 1974 and continues at least until February 1979. (Saucer Album 1, no. 1 (Summer 1963))

June 15 — 8:39 p.m. In the Indian Ocean southwest of India, 3rd Mate R. C. Chamberlin of the SS Thetis sees in the northwest a luminous disc travel at 1.5 times the angular speed of a satellite. (Sparks, p. 294)

June 26 — Around 1:00 a.m. Enrico A. Gilberti Jr. and his wife Janet are awakened at their home on 344 Commercial Street, Weymouth, Massachusetts, by a loud roar. They look out the window and see a Saturn-shaped object moving slowly above the treetops 100 feet off the ground and 300 feet away. Gilberti describes it as “two hamburger buns one on top of another with a sandwiched piece of meat protruding around.” It is about 30–40 feet across and has two brilliant lights. The UFO follows some power lines across a field and disappears to the northeast. “The roar was deafening.” Neighbors hear the noise but do not see anything. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: January–June 1963, The Author, 2005, pp. 84–85)

June 26 — Four glowing greenish objects with halos are seen by a technician and many others at Pinecrest, California. Three objects moving westerly are approached by a similar object from the west. The fourth object stops and hovers as the three approach, split formation, and continue west. Then the fourth object continues east. (UFOEv, p. 140)

June 28 — 9:30 p.m. A man is driving along the Lyndoch-Gawler Road near Sandy Creek, South Australia, when he comes across a blood-red, glowing object, 25 feet across and 12 feet high, in the road ahead. He is within 12 feet of it when he hits the brakes. The object turns a lighter reddish-yellow and rises up into the air several hundred feet. It turns on its side and speeds away. This and other UFO incidents cause Sen. Jim Cavanagh to ask the federal government to make its UFO dossier public, but Minister for Air David Fairbairn refuses, saying that the vast majority of reports are explainable. (Loren E. Gross, The Fifth Horseman of the Apocalypse: UFOs, a History: January–June 1963, The Author, 2005, pp. 86–87)

July — The CIA has synthesized many of the findings from its psychological research into what became known as the “KUBARK Counterintelligence Interrogation” handbook, which cites the MKUltra studies and other secret research programs as the scientific basis for their interrogation methods. Donald Ewen Cameron regularly travels around the US teaching military personnel about his techniques (hooding of prisoners for sensory deprivation, prolonged isolation, humiliation, etc.), and how they can be used in interrogations. Latin American paramilitary groups working for the CIA and US military personnel receive training in these psychological techniques at places such as the School of the Americas in Fort Benning, Georgia. (In the 21st century, many of these torture techniques are used at US military and CIA prisons such as Guantanamo Bay, Cuba, and Abu Ghraib, Iraq.) In the aftermath of the 1975 congressional hearings, major news media mainly focus on sensational stories related to LSD, mind-control, and brainwashing, and rarely use the word “torture.” This suggests that the CIA researchers are, as one author put it, “a bunch of bumbling sci-fi buffoons” rather than a rational group of men who have run torture laboratories and medical experiments in major US universities; they have arranged for torture, rape, and psychological abuse of adults and young children, driving many of them permanently insane. (Central Intelligence Agency, “KUBARK Counterintelligence Interrogation,” July 1963; Wikipedia, “Unethical human experimentation in the United States”)

July 16 — Farmer Roy Blanchard of Charlton, Wiltshire, England, discovers a strange crater on the ground overlapping his potato and barley fields. It is about 8 feet wide and 4 inches deep. A hole in the center is 3 feet deep and less than a foot in diameter. All vegetation inside the circle is burned, leaving only bare earth, and there are four slots in the ground around it, each about 4 feet long and a foot wide. A small piece of metal is found. Astronomer Patrick Moore states that a “shrimp-sized meteorite” has caused the crater. But a military investigation shows no

July 20 — An A-1 piloted by Louis Schalk briefly achieves a speed of Mach 3 for the first time. (Jacobsen, *Area 51*, p. 201)

August 1 — Evening. A former RAF pilot and flight instructor sees a triangular UFO that lingers for a long time over Garston, Hertfordshire, England, then climbs out of sight. Thousands of other people in the London area, including an air traffic controller four miles away and future UFO researcher Timothy Good in Beckenham, London, also see the object, which has a tetrahedral shape and glassy appearance when seen through binoculars. A USAF F-100 Super Sabre from RAF Bentwaters [now Bentwaters Parks] in Woodbridge, Suffolk, and another plane from the De Havilland Aircraft Company are sent up to investigate but cannot get anywhere near the UFO, which is at an estimated 90,000 feet. An amateur astronomer in Bushey, Hertfordshire, takes a clear photo. The official explanation is a balloon. (UFOEv, p. 141; Good Above, p. 149)

August 4 — 11:30 p.m. Ronnie Austin and Phyllis Bruce are driving east on State Highway 15 past the Mount Vernon, Illinois, airport when they notice a bright white round object about 20° above the southwest horizon. It seems to be keeping pace with them for several miles. Suddenly it moves about 600 feet in front of them and to the left. When Austin drops Phyllis off at home in Wayne City, it is hanging in the southeast. They continue watching it about 15 minutes, then Austin leaves for home. As he turns east on a gravel road, it shoots ahead of him, taking on an orange hue. At one point it comes within 100 feet of his car, swerves upward, and passes above him as the car radio makes a whining noise and the car engine almost fails. The object then moves behind him from west to east. When he arrives home, it is hovering about 900 feet to the southeast. Ronnie is so shaken, he is given a sedative. His parents, Mr. and Mrs. Orville Austin, and brother and sister also see the light, which finally becomes indistinguishable with a star by 1:10 a.m. (NICAP, “*The Wayne City Car Chase (EM RA Traces)*”; Jeffrey Liss, “The Light That Followed a Car,” *Fate* 16, no. 11 (November 1963): 26–35; Schopick, pp. 81–88)

August 5 — The Partial Nuclear Test Ban Treaty is signed by the USSR, UK, and US governments in Moscow, Russia, and other countries. The treaty formally goes into effect on October 10. The treaty prohibits all above-ground tests of nuclear weapons. (Wikipedia, “Partial Nuclear Test Ban Treaty”)

August 7 — The first flight of the USAF version of the A-12, the Lockheed YF-12 interceptor, takes place at Edwards AFB in California. (Wikipedia, “Lockheed YF-12”)

August 10 — 9:32 p.m. Several airmen of the 91st Bombardment Wing at Glasgow Air Force Base [now closed] near Glasgow, Montana, are walking in the parking lot when a bright light appears above them, bathing everyone in an orange glow. It is coming from a disc-shaped object with a dome that has some odd characters carved in it. The object moves up, then to the right, then down and left. It makes a square, then an X within the square, stopping at all points before moving again. The underside of the object is a large panel of blue light. They watch it for 3 minutes then it disappears. (“Out of the Past,” *CUFOS Associate Newsletter* 6, no. 2 (April/May 1985): 3)

August 20 — 9:30 p.m. Italian President Antonio Segni’s personal driver encounters a UFO near the entrance of the Castel Porziano Presidential Estate in Rome, Italy. When he sees a metallic domed disc with portholes moving in front of him in the driveway ahead, the driver stops the Fiat 2300 immediately. The UFO, about 65 feet diameter, passes a few feet above the car, making a hissing noise and causing the body to vibrate and the instruments to go crazy, then reverses course and passes over the car again with the same effect. It then tilts 90° and darts away to the west. It leaves behind a smell of heated metal. (1Pinotti 148–151; “Quando gli UFO arrivarona anche in Italia,” Oggi Notizie, November 26, 2011)

August 28 — After the March on Washington for Jobs and Freedom, J. Edgar Hoover singles out Rev. Martin Luther King Jr. as a major target for COINTELPRO. Soon after, the FBI is systematically bugging King’s home and his hotel rooms, as they are now aware that King is growing in stature daily as the leader among leaders of the Civil Rights Movement. (Wikipedia, “COINTELPRO”)

August 28 — 7:00 p.m. José Marcos Gomes Vidal, 7, and his friends Fernando, 12, and Ronaldo Gualberto, 7, are in the Gualbertos’ backyard in Sagrada Familia, Belo Horizonte, Brazil, to wash a coffee strainer in a cistern. Suddenly, Fernando notices a glow coming from the top of an avocado tree. When he looks up, he sees a UFO hovering above the tree’s branches. The craft, which is spherical and has a pair of antennas on top, is completely transparent. It holds four human-like passengers sitting inside, one of whom sits in front of a machine that appears
to be a control panel. The passengers are about 6 feet tall and dressed in spacesuits. They all have only one eye like a cyclops. Three of them are thin and bald, while the other looks like an overweight woman with blonde hair. The UFO shoots out two rays of yellow light. One of the cyclops appears between the lights, slowly floating down onto the ground. Once his boots touched the earth, the creature begins to walk toward José, who is completely unaware of what is happening since he is still collecting water. Fernando panics and tackles José, who falls to the ground, and Fernando gets back up and faces the cyclops. Now all three boys are aware of the visitor. The cyclops moves his head and makes hand signals. It speaks a few sounds in a strange language. The creature then turns around and stares back at the UFO. Fernando, spotting a brick on the ground, picks it up and aims it at the cyclops, who turns around and shoots Fernando’s hand with a yellow light from a triangular crest on his chest. Fernando drops the brick, and all three of the boys become calm and frozen. For a few more minutes, the cyclops speaks to them, then it points one of his fingers at the moon and begins to walk back toward the UFO. José asks if he will ever come back. The cyclops shakes his head affirmatively, plucks a plant from the ground, and then waves his hand at the UFO, which shoots out two rays of yellow light again. The cyclops slowly floats back up into the vehicle, and the UFO takes off eastward and disappears out of their sight. (Brazil 66–72; Tristan, “The Alien Cyclops of Sagrada Familia,” Bizarre and Grotesque, March 24, 2016)

September — Lt. Col. Robert J. Friend leaves Project Blue Book and is replaced by Maj. Hector Quintanilla. (Hynek UFO Report, pp. 25–27; Sparks, p. 14)

September 7 — Capt. Swett gives a formal lecture on hypnosis to a meeting at the Unitarian Church in Portsmouth, New Hampshire. After the lecture, the Hills tell him that Barney was going to a psychiatrist, Duncan Stephens, whom he likes and trusts. Swett suggests that Barney ask Stephens about the use of hypnosis in his case. At his next therapy session, Barney mentions his UFO encounter to Stephens, who recommends Dr. Benjamin Simon, a well-known psychiatrist in Boston, Massachusetts, with much experience in hypnosis.

September 12 — Patrick Lorenno and 18 other men aboard Texas Tower 2, a USAF radar station 110 miles east of Cape Cod, Massachusetts, spot an object 3 miles from their location. They report the sighting to the Coast Guard and request an investigation, but the object sinks before a boat can get there. The object has a controlled light and smoke or steam appears on its surface. The man watch it for 20 minutes. There is no record of a ship or a submarine in the area. (Lorenzen, UFOs over the Americas, Signet, 1968, p. 53)

September 14 — 3:15 p.m. US Forest Service instructor Edward A. Grant and his son see a round object over Susanville, California, that at first seems to be a balloon, but is moving erratically. The movements are very fast and the direction changes very definite. They watch it pass overhead for several minutes. Suddenly, a long cylindrical object with fins along its sides appears from the north and passes overhead toward the south. The round object moves very rapidly to intercept the long object, ejecting a yellowish-brown trail, and merges with it. (Herbert S. Taylor, “Satellite Objects: A Further Look,” IUR 29, no. 2 (Summer 2004): 4; Sparks, p. 295)

September 19 — 6:50 p.m. More than 140 residents of Wonthaggi and South Dudley, Victoria, Australia, observe a mystery object like an orange beach ball maneuver in the sky for 25 minutes. At first it hovers, then it begins moving slowly and silently, putting on sudden and intermittent bursts of speed, before disappearing in an easterly direction into the Bass Strait. During the 25 minutes that the object is visible, TV sets malfunction in South Dudley, Wonthaggi, and Inverloch. TV sets variously display white screens, gray screens, double images, or snow and lines. Still other sets go completely blank. After the UFO leaves at 7:15, all TV sets resume normal operation. (“UFO’s Upset TV Reception,” APRO Bulletin, May 1964, pp. 1, 6; Schopick, pp. 109–111)

September 19 — 8:00 p.m. Four children in Saskatoon, Saskatchewan, see a bright, oval object hover in a field and drop something. Approaching the site, they are confronted by a man about 10 feet tall dressed in a white “monk-like” suit who holds out his hands and makes unintelligible sounds. The children flee, and one girl is admitted to the hospital in shock. (Vallée, Magonia, p. 294; Mark Cashman, “Behavioral Classification System for UFO Occupants,” IUR 24, no. 1 (Spring 1999): 18)

September 27 — Blue Book releases a statement on the Hill case, claiming insufficient information, although they strongly suspect the UFO is the planet Jupiter. (Clark III 581)

October — Maj. Hector Quintanilla is appointed director of Project Blue Book. He is assisted by Sgt. David Moody, who is particularly hostile to UFOs and tends to label every report as “possible” this or that. (Sparks, p. 14; Clark III 922–923)
October — A Lisunov Li-2 airliner on the Guangdong to Wuhan, China, air route is chased by three luminous UFOs for 115 minutes. The pilots provide a minute-by-minute report by radio to the Chinese Civil Aeronautics Administration. After landing, the crew is debriefed by air traffic control, and the passengers are told not to discuss the incident with anyone. (Wendelle Stevens and Paul Dong, *UFOs over Modern China*, UFO Photo Archives, 1983, pp. 44–45)

October — 9:30 p.m. Five members of a family in Millersport, Ohio, see what seems to be an airplane on fire, but the house-sized object approaches and hovers about 300 feet away. They see a dark disc with a dome and antenna on top and three ball-shaped protrusions on the bottom. Around the rim are evenly spaced openings that emit fiery beams. In the dome, several large windows are visible in which a figure can be seen, at least by the mother. The dome rotates as the object hovers, and it makes a low humming noise. It finally rises slowly and makes a small circle in the air before speeding away. (Michael Swords, “Close Encounters of the First Kind: Do We Really Care? Part Two,” The Big Study, February 15, 2012)

October 4 — 1:00 p.m. Connecticut State Representative Luther B. Martin sees a delta-shaped, silvery object leaving a flare-like trail at Hartland, Connecticut. A row of black markings is visible along the blunt forward edge as the object passes from south to north. He estimates its speed at 2,000 mph. (“UFO Sightings Centered in Western U.S.,” *UFO Investigator* 2, no. 10 (Dec. 1963/Jan. 1964): 3)

October 12 — 3:30 a.m. Driving in a blinding rainstorm on the road between Monte Maíz and Isla Verde, Córdoba, Argentina, Eugenio Douglas feels heat and a prickly sensation all over his body. He sees a brilliant light in front of him. Temporarily blinded, he loses control of his truck and ends up in the ditch. Shaken but not injured, he gets out of the vehicle and looks up at the road, which he finds is blocked by an oval-shaped object at least 30 feet high. A door opens on the side and three huge “robots in human form” emerge. They wear helmets with short antennas and are 12–15 feet tall. Douglas takes a few shots at them with his revolver and runs away. The robots return to the UFO, which chases him down the road and eventually flies away. The next day, police find large footprints near the abandoned truck. (Gordon Creighton, “Argentina, 1963–64,” *Flying Saucer Review* 11, no. 6 (Nov./Dec. 1965): 16–17; Clark III 280; Loren E. Gross, *The Fifth Horseman of the Apocalypse: UFOs, a History: July–December 1963*, The Author, 2005, pp. 64–65; Roberto Banchs, “Monte Maíz, Cordoba: La Vision Fantasmagorica de E. Douglas (11 Oct 1963),” Visión OVNI, November 10, 2008)

October 23 — 11:00 p.m. Driving south of South River, New Jersey, on State Route 18, a man glimpses something like a flashlight off to his left, and three figures, 3–4 feet tall, cross the road in front of him. They are dressed in “tight-fitting silver-gray one-piece suits” that “seem to glow once they hit the headlights.” Their heads are found, but the witness can see no other features. They begin quickly “fluttering” across the road, faster than the “fastest sprinter.” (Center for UFO Studies, [case documents]; Clark III 278)

October 31 — Eight-year-old Rute de Souza hears a strange roar and watches a silvery object coming towards her house near Iguape, São Paulo, Brazil. It soars above her, hits a palm tree, gyrates a bit in the air, then falls into the Rio Peropava near the opposite shore. She runs to get her mother and uncle, who also hear the sound. They see the river boiling up in the spot, followed by an eruption of muddy water and mud. Fishermen, including Tetsuo Ioshigawa, also view the event. The UFO is estimated to be 25 feet in diameter. Divers, both equipped and unequipped, fail to find any wreckage in the river, which is only 12 feet deep. (“Disc Submerged in Brazilian River,” *APRO Bulletin*, January 1964, pp. 1–2; Harry E. Rieseberg, “A Submerged UFO?” *Exploring the Unknown* 6, no. 2 (December 1965): 64–67; Brazil 517)
November — 5:00 p.m. A man and his daughter are driving just north of Andover, New Jersey, when they see three strange lights in the sky. They are perfect ovals possibly a quarter mile high. The lights take off at a great speed in “perfect unison” toward the north. (Center for UFO Studies, [case documents])

November 1 — A member of the CIA-trained 35th Black Cat Squadron, Republic of China pilot Yeh Changti is flying an American U-2 reconnaissance aircraft to spy on China’s nuclear program when he is shot down by an SA-2 missile over Shangrao, Jiangxi, and held in mainland China until 1982. Yeh is incarcerated for four years and undergoes numerous interrogations. Although some claim he was tortured, Yeh later says he was treated humanely. After the outbreak of the Cultural Revolution, he is released and sent to work on a farm, before being transferred to work at Hanyang Arsenal in Wuhan. (Wikipedia, “Yeh Changti”; Jacobsen, *Area 51*, pp. 216–218)

November 3 — The *Hills* give a presentation at the Two State UFO Study Group in Quincy Center, Massachusetts. One of the attendees tape-recorders the session. Another speaker at the session is Capt. Ben Swett of Pease AFB, himself a practicing hypnotist, who tells them he thinks hypnotic regression is a good idea. (Clark III 584)

November 12 — The crew of the Argentine Navy auxiliary transport, *ARA Punto Médanos*, sees a large UFO off its stern [in the Atlantic Ocean?]. It is moving at high speed; when it appears, the needles of the ship’s magnetic compass suddenly and simultaneously swing off course, pointing towards the UFO, which is about 6,000 feet away. The compasses return to normal after the object leaves. (“Argentine Navy Discloses Important E-M Case,” *UFO Investigator* 3, no. 4 (Aug./Sept. 1965): 6; Schopick, pp. 3–4)

November 17 — Jacques Vallée meets J. Allen Hynek for the first time at his residence in Evanston, Illinois. He begins actively assisting Hynek in his UFO work and helping him analyze Project Blue Book data. (Clark III 1213)

Winter — A series of at least three incidents at Walker AFB [now closed] at Roswell, New Mexico, involve unidentified aerial craft maneuvering silently above an Atlas missile silo designated Site 9, northeast of Sunset, New Mexico. Three former missile personnel at the base—Jerry C. Nelson, Bob Caplan, and Gene Lamb—relay their experiences to *Florida Today* reporter Billy Cox in June 2001. (Nukes 147–152)

December 14 — The *Hills* have an initial meeting with Benjamin Simon, a well-known hypnotist in Boston, Massachusetts, recommended to them by Dr. Stephens. It is clear to Simon that the Hills believe they have seen a UFO, but which may have been an experimental aircraft. This has set in motion an anxiety-provoking psychological experience whose sources it might be possible to uncover through hypnosis. (Clark III 584)
December 27 — At Bank’s Stables in Epping, Essex, England, trainee riding instructor Pauline Abbott sees a shiny white UFO on the ground. It is about 8 feet long, 3 feet high at the center, and has what looks like a window on one side that is brighter than the rest of the object. It takes off, flies horizontally for 100 feet, and disappears. Grass is found flattened over a circular area. Marks “like three large fingerprints pushed together into mud” are found, forming a square with 8-foot sides within an 11-foot circular depression that contains a 3-foot central circle. (G. G. Doel, “The Epping Sightings,” BUFORA Journal and Bulletin 1, no. 1 (Summer 1964): 5–6; J. Cleary-Baker, “Evaluation by BUFORA Evaluating Officer,” BUFORA Journal and Bulletin 1, no. 1 (Summer 1964): 6–7)

1964

1964 — MKSEARCH is the name given to the continuation of the MKUltra program. The MKSEARCH program is divided into two projects dubbed MKOFTEN / CHICKWIT. Funding for MKSEARCH commences in 1965 and ends in 1971. The project is a joint project between the US Army Chemical Corps and the CIA Office of Research and Development to find new offensive-use agents with a focus on incapacitating agents. The purpose of the project is to develop, test, and evaluate capabilities in the covert use of biological, chemical, and radioactive material systems and techniques for producing predictable human behavioral and/or physiological changes in support of highly sensitive operational requirements. (Wikipedia, “Project MKUltra”)

1964 — Ray Stanford founds Project Starlight International to document the existence of UFOs. He establishes a Laboratory for Instrumented Research on a 400-acre site northwest of Austin, Texas, that includes two buildings. Equipment eventually includes radar, a laser system, magnetometers, a gravimeter, microcomputer, microphones, video equipment, and still cameras. In the event of UFO activity, the Operation ARGUS (Automated Ring-up on Geolocated UFO Sightings) computer kicks in and automatically telephones all volunteers within the computed visibility radius of the UFO. Volunteers attempt to locate and photograph the UFO visually. On June 8, 1977, the FCC licenses its Raytheon Model 1700 radar system with the call sign K12XBJ. (Margaret Sachs, The UFO Encyclopedia, Putnam, 1980, pp. 259–260; Ray Stanford, “A Technological Approach to UFOs: A Status Report on Project Starlight International, June 30, 1977,” IUR 2, no. 8 (August 1977): 5–7)

1964 — British writer W. Raymond Drake writes Gods or Spacemen?, the first of a series of books espousing his view that the world’s folklore, mythology, and religion are replete with references to space beings who came to Earth in several ways: the Uranids hundreds of thousands of years ago; the Saturnians centuries later; and the Jupiterians who landed near Crete. (W. Raymond Drake, Gods or Spacemen? Amherst, 1964; Wikipedia, “W. Raymond Drake”; Clark III 108; Jerome Clark, “Vimanas Have Landed: Ancient Astronautics in Ufology,” IUR 22, no. 3 (Fall 1997): 27–28)

January — Lionel Beer begins publishing Spacelink, a newsletter of the Isle of Wight UFO Investigation Society. It folds in April 1971. (Spacelink 1, no. 1 (Jan./Feb. 1964))

January 1 — Many witnesses in Shanghai, China, see a huge cigar-shaped UFO flying toward the southwest. MiG fighters are scrambled in pursuit but fail to intercept it. The official explanation is that it is a US missile. (Wendelle Stevens and Paul Dong, UFOs over Modern China, UFO Photo Archives, 1983, p. 45)

January 4 — Barney Hill has his first hypnosis session with Benjamin Simon. The sessions will continue until June 6. The Hills undergo sessions separately, and for the most part are instructed not to remember their experiences afterwards. Barney’s sessions are particularly intense. However, by the end of the sessions, although they disagree with Simon on the nature of the experience, both the Hills and Simon agree that the therapy is successful. The stress and anxiety are gone. Simon submits a statement to the Hills’ insurance company, which initially declines to pay, until Simon explains that he was treating them for what will later be called PTSD. (Clark III 584–585)

January 23 — The landing craft Loellen M. is in the Gulf of Carpentaria between Cape Grey and Groote Eylandt, Northern Territory, Australia, when a crew member notices the compass is malfunctioning (“haywire”) and the vessel is off course. He notices an odd phosphorescence in the water on the starboard side about 6 feet away from the ship. It is a ghostly, pulsating white light that is rotating in a clockwise direction. It seems to be “miles across.” As the light wheel moves to the ship’s port side, another rotating light approaches the ship’s starboard side. This undoubtedly involves some unusual bioluminescence, but it is significant that it is the first “unknown” in the RAAF’s UFO files. (Swords 390)

January 25 — The London UFO Research Organisation merges with the British UFO Association (a consolidation of several UFO groups in the UK) to form the British UFO Research Association. It begins publishing a new magazine, BUFORA Journal, in the summer. (“Editorial: The Problems Facing Us,” BUFORA Journal and Bulletin 1, no. 1 (Summer 1964): 2)
February 3 — 2:00 a.m. Doris Player wakes up to see her bedroom illuminated near Gum Creek, Kangaroo Island, South Australia. Suddenly a 5-foot 3-inch being wearing blue-green coveralls, a brown balaclava, and an open brown jacket appears. He wears elbow-length, black gloves with a cord going from his helmet to his left shoulder. He has a red face and a big nose and holds a black box that buzzes and clicks as he points it. The witness goes back to sleep. (Mark Cashman, “Behavioral Classification System for UFO Occupants,” *IUR* 24, no. 1 (Spring 1999): 19–20; Thomas Brisson, “UBO’s (Unidentified Box-like Objects), Part 2,” *Vomanomalous*, July 15, 2014; “Documentary on UFO’s, Adelaide, Australia, Part 1,” MaS7eRjEd3ye YouTube channel, February 5, 2009, at 6:05)

February 10 — “The Bellero Shield” episode of *Outer Limits* airs on ABC-TV. It features an alien with wraparound eyes. UFO skeptic Martin S. Kottmeyer alleges that this episode influenced Barney Hill’s hypnotic recounting of events, although Betty Hill says they had never watched it. (Clark III 589; Internet Movie Database, “The Bellero Shield”; Martin Kottmeyer, “Entirely Unpredisposed: The Cultural Background of UFO Reports,” *Magonia* 35 (January 1990))

February 29 — President Lyndon B. Johnson holds a press conference to announce that the US has repeatedly broken the Soviet’s world record for air speed by a secret aircraft called the A-11—a fictitious name for the Air Force’s YF-12, a twin-seat version of the Lockheed A-12 built as an interceptor. He says the A-11 can fly more than 2,000 mph at an altitude of 70,000 feet. The YF-12A is announced in part to continue hiding the A-12, its still-secret ancestor; any sightings of CIA/Air Force A-12s based at Area 51 in Nevada can be attributed to the well-publicized Air Force YF-12As based at Edwards Air Force Base in California. (Jacobsen, *Area 51*, pp. 232–233)

March — Allen H. Greenfield, Rick Hilberg, and Dale Rettig begin publishing the *American UFO Committee Review* in preparation for their first Congress of Scientific Ufologists meeting in Cleveland, Ohio. Greenfield publishes the journal in Atlanta, Georgia, for seven issues, until fall 1966. (*American UFO Committee Review* 1, no. 1 (March 1964))

March 7 — Betty Hill has her first hypnosis session with Benjamin Simon. Betty’s account closely matches her dreams from 2 years earlier, and her account is consistent with Barney’s. Many abduction elements come to light: telepathic commands, semen extraction, a rectal probe, skin scrapings, a pregnancy test with a needle, the Star Map. The aliens are 5 feet tall with gray skin, oddly shaped heads, and broad foreheads. Simon discounts the possibility of an alien abduction and prefers to think that Betty’s dream influenced Barney’s memories. The Hills do not agree. (Wikipedia, “Barney and Betty Hill”)

April 1 — The UK Air Ministry, Admiralty, and War Office are consolidated into a new Ministry of Defence. The Air Ministry becomes the Air Force Department, within which is a secretariat called S4 (Air) that deals with, among other things, UFO reports from the public. Another office, Defense Secretariat 8, is created under the authority of the Secretary of State and also has authority over UFO reporting. (Wikipedia, “Ministry of Defence (United Kingdom)”; Good Above, pp. 58–59)

April 3 — 9:00 p.m. R. Wold, a graduate student in anthropology, and two others see four huge red lights in a rectangular formation, with a white light above, near the ground about one mile west of Monticello, Wisconsin. It tilts and flies away. (Sparks, p. 296)

April 11 — 6:30 p.m. Physiotherapist William B. Ochsner and his wife and two children are having a picnic on a hill about 10 miles northwest of Homer, New York. They see an unusually wide vapor trail in the sky stretching from northeast to southwest. At the far end of the white trail is a smoky, spiral portion about one mile long. The vapor trail drifts off. After 10 minutes, Ochsner notices that the spiral portion is still visible, having moved a bit to the west. With binoculars, he sees wisps of smoke streaming out of it. It changes from a horizontal to a vertical position with greater smoke activity. It stops and hangs there for 2–3 minutes before sinking into the clouds. After another 3 minutes, they see a horizontal pencil-shaped object moving from left to right on the horizon. A flash of white light erupts from its end and shoots forward a short distance then stops. It becomes thick in the middle, a cloud of smoke emanates from it, and it shoots backward rapidly. Again it hovers and changes to a saucer shape. It then divides into two parts, one above the other. The top object slowly recedes into the distance, while the bottom objects heads downward at a 45° angle, divides in two again, with the top part fading away and the bottom part assuming a vertical pencil shape, which fades away. The whole display takes 45 minutes. (J. Allen Hynek, *The UFO Experience*, Ballantine ed., 1974, pp. 60–61; Herbert S. Taylor, “Satellite Objects and Cloud Cigars,” *IUR* 29, no. 1 (Spring 2004): 7–9; Sparks, p. 297)

April 20 — Early morning, During Operation Deep Freeze VII, six members of a US Coast Guard aircraft sight a V-formation of 9 glowing-white objects speeding at an estimated 35,000 feet altitude. They are flying a in a C-130 turbo-prop
transport from McMurdo Station, Antarctica, with supplies. The right-side observer first sees the objects approaching at about 460 mph from above and to their right side. When they come abreast of the airplane, they slow to its speed. After a short time, they fly above the airplane and take up position above and to its left side. The pilot attempts to radio the ground but the radio is dead, and their radar also stops working. When the pilot tries to switch to auxiliary power, it too is not functioning. At one point the airplane’s engines stop (the oil begins to congeal in the cold air). Instead of losing altitude, it maintains “a steady altitude and course.” The airplane allegedly continues flying in complete silence, then it enters a “strange haze” (like a white-out) with the air filled with static electricity. There is electrical arcing from one observer’s body to metal inside the fuselage. The haze vanishes after about 20 minutes. The power suddenly returns, and the crew can restart the engines in sequence. The airplane has covered a distance of 305 miles during the 45–50 minutes at indicated airspeed of 184–218 knots. ([NICAP, “C-130 Crew Encounters UFO / EME to Radio and Radar”]

**April 22 — 9:00 p.m.** Marie Morrow, Ruth Ovelette, and Morrow’s son are driving west about 10–15 miles east of Lordsburg, New Mexico, when a brilliantly luminous object sweeps about 10 feet above their car from behind, illuminating the interior and emitting a whirring, whining sound. The UFO then rises but maintains its course along the highway before veering toward the north and vanishes. ([“Huge Light Buzzed Car in New Mexico,” APRO Bulletin, May 1964, p. 10; Clark III 1091–1092]

**April 24 — 10:00 a.m.** Dairy farmer Gary Wilcox of Newark Valley, New York, is driving a tractor on his property when he sees a shiny object on the inside edge of a nearby patch of woods. He gets off the tractor and approaches the object, which is egg-shaped, 20 feet long, 16 feet wide, and four feet high. It is hovering two feet above the ground and making a sound like a car idling. He touches it and feels a hard metal. Two figures suddenly appear from under the object. They are 4 feet tall and 2 feet wide, dressed in seamless silvery garments. Each carries a tray filled with alfalfa, roots, soil, leaves, and brush. Wilcox hears a voice say, “Do not be alarmed. We have talked to people before.” They ask him what he is doing, and Wilcox says he is spreading manure. One humanoid asks if he can have some and converses some more about space exploration. They claim they are from Mars. After a while, the UFO takes off in a horizontal direction. Wilcox notices some small depressions where the figures were standing, as well as a thin, red, jellylike substance. (Olga M. Hotchkiss, “New York UFO and Its ‘Little People,’” *Fate* 17, no. 9 (September 1964): 38–42; Berthold E. Schwarz, “Gary Wilcox and the Ufonauts,” in Charles Bowen, ed., *UFO Percepients*, special issue no. 3 of *FSR*, September 1969, pp. 20–27; Clark III 795–799; Marcus Lowth, “The Gary Wilcox Occupant Encounter: The Fertilizer Case,” UFO Insight, December 27, 2018; Story, pp. 246–249)

**April 24 — Around 5:50 p.m.** Socorro, New Mexico, police officer Lonnie Zamora, while chasing a speeder, hears a continuous roaring sound and sees a brilliant blue “cone of flame” in the sky to the south-southwest. The bottom of the flame is out of sight behind a hill. Thinking there has been an explosion, he tries to pursue it, turning off to the right on a rough gravel road, but loses sight of it while trying to get the car up a steep hill. By the time he reaches the top, the sound stops and the flame is no longer visible. He then notices a metallic object in a ravine about 450 feet away. At first, he thinks it is an overturned car, but then he sees “two figures in what resembled white coveralls, pretty close to the object on the northwest side, as if inspecting it.” One seems to turn in a startled way as if he hears Zamora’s car approaching. The figures are small, and the object is oval-shaped and positioned so its long axis is horizontal. Zamora loses sight of object as he drives through a dip in the road. He radios headquarters that he is investigating a possible car accident. He stops a second time and gets out, hearing 2–3 loud thumping noises like a door shutting hard. He walks three steps to the front of the car to possibly 50 feet away from the object when he hears a very loud roar increasing in volume and sees a smokeless blue-orange flame coming from beneath. He notes a red insignia or lettering on the side of the object. Zamora thinks it is going to explode and runs away, putting the car between him and the object and dropping to the ground. He feels some slight heat from the flame. The roaring noise stops, and Zamora looks up to see the UFO flying away to the southwest at a level height, just clearing an 8-foot dynamite shack. He runs back to the patrol car and radios headquarters, just as the object climbs slowly and goes past Box Canyon or Six Mile Canyon Mountain (about 6 miles away). The entire incident takes place in less than 2 minutes. Police Sgt. M. S. Chavez arrives, and they find burning brush (including a badly damaged creosote bush) where the UFO has been, as well as four asymmetrically placed, trapezoidal imprints 12–16 inches long, 6–8 inches wide, and 4–6 inches deep. An FBI agent, D. Arthur Byrnes Jr., who has heard about it on the police radio, speaks with Zamora in the evening. He notifies army intelligence at White Sands Missile Range, who sends Capt. Richard T. Holder. Military police arrive and collect samples, working by flashlight. The next morning, Holder gets a call from a colonel at the war room of the Joint Chiefs of Staff, asking for a report. T/Sgt. David Moody from ATIC and Maj. William Conner from Kirtland AFB check the area for radioactivity on April 26. Hynek arrives on April 28 and interviews Zamora and Chavez. Richard H. Hall and Ray Stanford arrive for NICAP and obtain some metal traces on a rock in the landing area; they take the sample to NASA’s Goddard Space Flight Center, where metallurgist Henry E. Frankel

April 25 — Morning. J. D. Hatch is driving on US Hwy 70 between Mescalero and Tularosa, New Mexico, when a bright oval object descends and seemingly lands on the other side of Round Mountain east of Tularosa. (Clark III 1092)

April 25 — Evening. Two motorists driving on US Hwy 84 between Abiquiu and Espanola, New Mexico, see a strange object that is definitely not an airplane fly straight toward their car before shooting away. All they can see is a blue-flamed exhaust. (Clark III 1092)

April 25? — Night. Two Spanish-speaking people 9 miles away from Golden, New Mexico, watch a light come down from the sky and leave three “smelted” circles some 2 feet in diameter and separated from each other by 20 feet. They mention this story to James Scartacinni, 15, and his grandfather visit the site the next day and find the circles, which they estimate must have been subjected to a temperature of 2,300° F. They return to town and call the state police, who notify the military. Almost immediately, men in uniform cordon off the area, dig up the burned areas to a depth of one foot, and carry the material away. (“Hunting Old and New UFOs in New Mexico,” IUR 7, no. 2 (March 1982):12)

April 26 — Around 1:00 a.m. Orlando Gallegos steps outside his father’s ranch at La Madera, New Mexico, to chase away some horses in the yard. He sees a peculiar structure in the Rio Vallecitos creek bed some 900 feet away. It looks like a butane tank “as long as a telephone pole” about 14 feet in diameter, metallic, and shooting blue flames out of holes in the sides. As he watches over the next minute, the flames subside. He goes inside, where no one else believes him. It is gone the next morning, but state police notify the military. Almost immediately, men in uniform cordon off the area, dig up the burned areas to a depth of one foot, and carry the material away. (“Hunting Old and New UFOs in New Mexico,” IUR 7, no. 2 (March 1982):12–13; Clark III 1092; Sparks, p. 298)

April 28 — Early evening. A round, whitish object hovers then darts away over Anthony, New Mexico. State policeman Raül Arteche sees it moving west over the Port of Entry near El Paso, Texas. He says it looks like the object Lonnie Zamora saw. (“Other Recent Sightings,” UFO Investigator 2, no. 11 (July/Aug. 1964): 7)

April 28 — Early morning. Don Adams is driving in Edgewood, New Mexico, when his car stalls. He sees a glowing, greenish object 100 feet overhead and fires six rounds from a .32 pistol at it with no effect. He can hear the bullets bouncing off. It silently moves away to the north. (“Other Recent Sightings,” UFO Investigator 2, no. 11 (July/Aug. 1964): 7; “Green Object at Edgewood,” APRO Bulletin, September 1964, p. 3)
April 30 — A B-57 pilot at Holloman AFB, Alamogordo, New Mexico, radios to the control tower that he is watching an egg-shaped, white UFO with markings that match the Socorro object. He continues to watch it as it lands at the base. Coral and Jim Lorenzen insist they heard the story from a reliable source. In addition, a ham radio operator claims to have heard the exchange between the pilot and control tower. Holloman AFB denies the incident occurred. Shortly afterward, an airman walks into a clothing store in Alamogordo and spins an incredible story of a UFO parked in a hangar under heavy guard at Holloman. A couple days later, he returns to the store and denies everything. (Coral Lorenzen, “UFO Landing at Air Force Base,” APRO Bulletin, July 1964, pp. 1, 3–4; Coral Lorenzen, “UFO Lands at Air Force Base,” Fate 17, no. 10 (October 1964): 45–52; Clark III 332)

April 30 — 10:30 p.m. Several children living in Canyon Ferry, Montana, see a lighted, egg-shaped object the size of an automobile land about 150 feet away, then take off. The witnesses are Linda Davis, 11, and children of the Harold Rust family. It leaves four 10 inch rectangular indentations in the ground, 4–8 inches deep, about 13 feet apart, and a burned area. (“Kids Called Hoaxers by U.S.A.F,” APRO Bulletin, July 1964, pp. 1, 5; Lorenzen, FSHoax, pp. 223–224; Sparks, p. 298)

May — NICAP publishes its special 184-page report, The UFO Evidence, but due to a printing delay, copies are not actually available until late June. Copies are sent to the media and to every member of Congress on July 1. Edited by Richard H. Hall, it consists of a summary of hundreds of unexplained reports studied by NICAP investigators through 1963. Sightings are systematically broken down by witness category and special types of evidence. Individual chapters are devoted to sightings by military personnel, pilots and aviation experts, and scientists and engineers. Another chapter is devoted to evidence of intelligent control and another to physical evidence or interactions, such as electromagnetic effects, radar tracking, photographs, sound, physiological effects. Another section examines observed patterns, such as descriptions of shape, color, maneuvers, flight behavior, and concentrations of sightings. House Majority Leader John W. McCormack (D-Mass.) requests two copies, one for his Capitol Hill office and another for his state home office. (Richard H. Hall, ed., The UFO Evidence, NICAP, 1964; Wikipedia, “National Investigations Committee on Aerial Phenomena”; Richard Hall, “NICAP and Lessons from the Past,” IUR 17, no. 3 (May/June 1992): 17, 24)

May 5 — 8:30 a.m. Alfred Ernst, a farmer near Comstock, Minnesota, sees a luminous UFO like a child’s top from about 1,500 feet away. It rises straight up and disappears into the overcast sky after a few seconds. Ernst and his brother find a crater-like depression, about 3 feet in diameter and 6 inches deep at the center, at the spot where the object was sitting. A series of smaller holes form an X around the larger depression. The earth seems burned on the perimeter of the hole and a whitish substance is found. (“Physical Evidence: Landing Reports,” UFO Investigator 2, no. 11 (July/Aug. 1964): 5; Donald E. Keyhoe and Gordon I. R. Lore Jr., Strange Effects from UFOs, NICAP, 1969, pp. 56–58)

May 13 — 10:15 p.m. Mrs. M. Walter McKarley and her children see a large round object that appears in their headlights after they pull into a driveway at Rio Vista, California. It seems to be resting on the ground about a quarter of a mile away. Higher in the sky is a small star-like object (probably Venus). As they drive away, the large object seems to pace their car for a short time. It then moves swiftly to the left and disappears behind a water tank. (“Physical Evidence: Landing Reports,” UFO Investigator 2, no. 11 (July/Aug. 1964): 6)

May 15 — Between 11:30 a.m. and 12:15 p.m. Two targets are simultaneously tracked on surveillance and FPS-16 radars at Stallion Site, the most northerly range of the Army-controlled Holloman–White Sands complex a few miles east of San Antonio, New Mexico. The targets are north of the radar site, performing “perfect, precise flight maneuvers” in tandem, involving separations and rejoins and “up-and-down ‘pogo’ maneuvers.” One radar operator obtains a visual sighting of two brown-colored, football-shaped objects that are flying at very low altitude and are lost from view behind buildings at the site. The two targets are displayed as skin paints. However, IFF transponder codes are also received on two different frequencies alternately. (NICAP, “UFO Auto-Tracks, Sends Phony IFF”)

May 19 — 7:00 a.m. Mike Bizon, 10, sees a square or spindle-shaped, bright-silver UFO on the ground in Hubbard, Oregon, while he is leading a cow out to pasture. The cow, normally eager to be let out, acts very reluctant and nervous. The object is resting on four legs in an adjacent wheat field. It rises slowly off the ground to the height of a telephone pole, then zooms straight up emitting a soft beeping sound. Bizon smells an odor like gas fumes. Three imprints in the shape of an equilateral triangle are found in an area of flattened wheat about 4 feet wide. (Donald E. Keyhoe and Gordon I. R. Lore Jr., Strange Effects from UFOs, NICAP, 1969, pp. 53–54)

May 21 — 4:30 a.m. At Altus AFB, Oklahoma, Missile Site 7, southeast of Ranchland, Texas, a large bright light is seen directly over the facility below 10,000 feet. The light is bright enough to light up the silo cap. Its apparent size is as large as a basketball held at arm’s length. The object is first noticed hovering over the south fence of Site 7 for 8–10 minutes. (NICAP, “Light Hovers over Missile Silo”; Nukes 159–160)
May 24 — **James P. Templeton**, using a Pentax camera with Kodacolor X stock, takes a photo of his 5-year-old daughter Elizabeth when his family is picnicking on the marshes at Burgh by Sands, Cumbria, England. When the film is developed, a man, encased in a white spacesuit and helmet, is clearly visible behind Elizabeth’s head. Templeton and his family claim they had seen no one when the photo was taken. He tells the Carlisle police, who are puzzled. Kodak is intrigued enough to conduct an inquiry. They rule out a double exposure. However, one possibility is that the image is an overexposed view of the back of Templeton’s wife. After the photo receives some local publicity, Templeton gets a call from someone describing himself as an investigator. Templeton agrees to meet with him and an associate and visit the marsh. Two men dressed in dark business suits show up and drive him to the site. They refuse to give Templeton their names, referring to themselves only as “9” and “11.” They are mostly interested in finding out if any nearby animals had been agitated. Then they insist that the figure was just a passerby, get angry, and drive away, leaving Templeton stranded and having to walk home 5 miles away. (Gordon W. Creighton, “**The Mysterious Templeton Photograph,**” *Flying Saucer Review* 10, no. 6 (Nov./Dec. 1964): 11–12; Jenny Randles, “The Riddle of the Templeton Photograph,” *IUR* 20, no. 4 (July/Aug. 1995): 12–15; “**The Templeton Photograph**” [in color], *Flying Saucer Review* 46, no. 2 (Summer 2001): inside cover; Jenny Randles, “Casebook: The Solway Spaceman,” *Fortean Times* 196 (May 2005): 29; Andy Roberts and David Clarke, “Farewell to the Solway Spaceman?” *Fortean Times* 286 (April 2012): 28–29; Jenny Randles, “Moderations, Part One: Lost and Found Files,” *Fortean Times* 292 (September 2012): 29; Clark III 1126–1127; Patrick Gross, “**The Solway Firth Photograph, 1964**”)

May 26 — 7:43 p.m. Paul Wańkowicz, RAF pilot and ex-Smithsonian satellite tracker, sees a thin, white ellipsoid, estimated at 15–20 feet in length at 1,000 feet altitude, at Cambridge, Massachusetts. It flies straight and level from nearly overhead to the east-northeast, where it disappears behind the roof of a Sears Roebuck store as viewed from his car in the parking lot to the south. He briefly loses sight of it as it passes behind cumulus cloud cover. No noise or trail. The tops of cumulus clouds are at least 3,500 feet altitude, thus the UFO’s speed is at least 700 mph and length 50–70 feet. (NICAP, [Blue Book documents]; *Sparks*, p. 299)

May 26 — 10:00 p.m. Mr. and Mrs. *Terry Balliet*, their family, and two neighbors see two UFOs in the northwest sky near Palmerton, Pennsylvania. One is a large, stationary, dome-like object emitting hazy whitish light from the underside. A smaller disc-like object is intermittently visible maneuvering around the larger one. It finally merges with the large object, which moves away to the east. The large object is seen twice more in the evening, moving back and forth from east to west. (“**Other Recent Sightings,**” *UFO Investigator* 2, no. 11 (July/Aug. 1964): 7)

May 26 — 11:00 p.m. Rev. H. C. Shaw sees a yellow-orange light shaped like the bottom of a ball in a field at Pleasant View, Pennsylvania, and chases it down the road for two miles. (*Sparks*, p. 299)

Summer — 10:00 p.m. A meteorologist at Westford, Massachusetts, sees a bright lightning flash 5 miles to the south. At the same time, his car headlights and the headlights of an approaching car go out, as well as his radio. No thunderclap is heard. He notes that the sky is clear and there are no thunderstorms in the entire Boston area. (“Astronomers and UFO’s: A Survey, Part 2, Sightings,” *IUR* 2, no. 4 (April 1977): 4)

June — 2:00 a.m. A young couple is driving home from a dance at a small place north of Santa Barbara, California, when a circular, glowing object silently appears above their car. They stop to watch. It is about 100 feet high and 40 feet in diameter and seemingly emits some heat. It hovers for 2 minutes then speeds off ahead of them, lighting up the valley as it goes and apparently traveling about 1,800–2,400 mph. (“Correspondence,” *CUFOS Associate Newsletter* 3, no. 4 (Aug./Sept. 1982): 3)

June — 6:30 p.m. Bert Gammie, his mother, and his daughter Lynn are driving along the northern shore of Green Lake, British Columbia, when they see a light above a mountain across the lake to the south. Soon they notice it is moving and is now almost directly overhead. He stops the car and gets out for a closer look. The object is circular, dull metallic, and has a series of vents in the tail trailing white, blue, red, and orange exhaust. They watch it for 3 minutes moving slowly to the north at about 50 mph and making a whistling noise. It makes a sharp right-angle turn, proceeds west, and disappears from sight. Gammie reports the sighting to the RCAF in Vancouver, and a senior air force officer visits him later and shows him a bulky portfolio of glossy UFO photos, many of them showing detailed features. Gammie tells him that the UFO he had seen did not exactly resemble any of the photos, and the officer tells him that the RCAF would not admit to interviewing him if the case receives any publicity. (“**That Awful Looking Shooting Star,**” *Canadian UFO Report* 3, no. 5 (1975): 14)

June — *BUFOI* magazine (Belgian UFO Information) is launched by a George Adamski group in Anvers, Belgium, and edited by May and Patrick Morlet. It runs until 1979. (*BUFOI Magazine*, no. 1 (June 1964))

June 2 — 4:00 p.m. Charles Keith Davis is outside his grandmother’s home in Hobbs, New Mexico, when a small, tan, top-shaped object with a soot-like trail appears and hovers above the boy’s head, enveloping him in a cloud. He starts crying and screaming, and the object shoots straight up and disappears. His hair is singed and his face and
ears are swollen and burned, although he does not feel any pain. They take him to the hospital, where doctors notice the soot embedded in his flesh. The burns respond well to treatment and he stays 5 nights in the hospital. (Lorenzen, UFOs: The Whole Story, Signet, 1969, pp. 191–192)

June 14 — 8:35 p.m. Charles Englebrecht, 18, is watching TV at home in Dale, Indiana, when the house lights and TV suddenly go out. He notices that a small, bright orange-colored, basketball-sized object has landed in his backyard. As he goes out the side door and tries to approach it, he feels a tingling sensation and has difficulty moving. After a few seconds the sphere takes off and goes over the nearby barn. Several items in the backyard have been moved (lawn mower, chicken feeder). He smells sulfur or burning rubber and find three imprints in a triangle with the dimensions of 2 feet by 4.5 feet by 4.5 feet. (NICAP, “The Dale Landing Case”)

June 30 — 1:00 a.m. Beauford E. Parham is driving near Lavonia, Georgia, on his way back from a business trip when he notices a brilliant light in the sky. It is moving towards his car at a 45° angle. In an instant it appears right in front of his headlights, no more than 5 feet away and a foot above the ground. Shaped like a giant top, it emits a “hissing sound like a million snakes.” The amber-colored UFO has a sharp, steeple-like cone rising from its top midsection. It moves above his car leaving a strong odor of embalming fluid and a gaseous vapor that leaves an oily substance over his car, even after repeated washings. After several passes over his car, it starts spinning and takes off vertically. Parham now notices his arms are beginning to burn. He immediately reports his sighting to the mayor of Lavonia, then personnel at the Anderson Regional Airport in South Carolina, where he meets local FAA officials who check his car for radiation. They get readings from the oily stains, as well as both his arms from the shoulder down. (“Man Claims Car Buzzed by an Unknown Object,” Greenwood (S.C.) Index-Journal, July 3, 1964, p. 5; NICAP, “Lavonia / Talluhah Case (Radiation)”; Schopick, pp. 71–72; Donald E. Keyhoe and Gordon I. R. Lore Jr., Strange Effects from UFOs, NICAP, 1969, pp. 5–7; Clark III 678–680)

July 7 — Around 9:00 p.m. Three members of the Henry Ivestar family in Turnerville, Georgia, are watching TV when sudden interference prevents them from further viewing. They go out on the front porch and see an object moving silently above the trees 300 feet away. It stops to hover a few feet above a neighbor’s garden across the highway. Its bottom side is fully visible: on the dark upper side are three lights: red, clear, red. The red lights are blinking. As the object ascends, the lights go out. A brilliant green light then shines from the bottom, illuminating the trees. A foul odor “like embalming fluid or brake fluid” hangs in the air after the object leaves. (“UFOs Hovering in Sky?” Atlanta (Ga.) Constitution, July 17, 1964, p. 23; Schopick, pp. 72–73; Clark III 679; “An Interesting UFO Story from Georgia,” The Paranormal Effect, October 3, 2010)

July 12 — Assistant Professor Vyacheslav Zaitsev is aboard a Tupolev Tu-104 airliner above Bologoye, Tver Oblast, Russia, when he sees a huge disc with a domed cabin suddenly appear below the aircraft, fly a parallel course for a while, then swerve abruptly and speed away. (Felix Ziegel, “Unidentified Flying Objects,” Soviet Life, no. 137 (February 1968): 28; “Russian Scientist Confirms Important Cases,” UFO Investigator 4, no. 5 (March 1968): 6; Good Above, p. 220)

July 14 — After 11:00 p.m. Atlanta Constitution reporter Tom Winfield sees a top-shaped, misty-orange object circling above the southeast section of Gainesville, Georgia, at about 500 feet. It stops and hovers a few moments then shoots up out of sight. He takes a photo, but nothing registers on the film. (“UFOs Hovering in Sky?” Atlanta (Ga.) Constitution, July 17, 1964, p. 23)

July 15 — MP Arthur Henderson in the UK House of Commons asks the former Secretary of State for Air Hugh Fraser about cooperation between the RAF and USAF in UFO investigations. Fraser says he is aware of the US Project Blue Book, and that 10% of the cases are insufficient evidence. (Good Above, p. 60)

July 16 — Shortly after noon. Five boys (Edmund Travis, Randy Travis, Floyd Moore, Billy Dunlap, and Gary Dunlap) are playing around an apple tree at Conklin, New York, when they notice a shiny, dome-shaped object in a field along the roadside. Looking for the source of a whistling sound, the boys spot a 3-foot-tall humanoid figure crouching in a tree about 150 feet away. It is dressed in a shiny black uniform, short-sleeved shirt, and black helmet. The whistling appears to emanate from his stomach. The boys throw stones and apples at it, but the figure is too far away. After about 15 minutes, the figure, moving stiffly, falls backwards out of the tree and floats slowly into the bushes. They can see it crawling through the weeds back to the UFO. A round, flattened area is found in the field where the grass is crushed and bushes are broken. In the middle is dried, yellow moss that...
apparently has been subjected to great heat. Three depressions are where the UFO legs apparently were. (Clark III 296–297; Patrick Gross, URECAT, July 10, 2007)

Late July — 4:30 p.m. Richard H. VanPelt and his teenage son are driving on Beeler Road south of Shawnee High School in Lima, Ohio, when they see a Saturn-shaped metallic object hovering above Breese Road 600 feet away. It is about 1,200–1,500 feet in the air and has a revolving ring around its center. It suddenly starts to move to the southwest, then tips on end and with tremendous speed goes straight up and out of sight. (Richard H. VanPelt, “Letter,” CUFOS Associate Newsletter 5, no. 3 (June/July 1984): 2)

August — 7:00 p.m. Raimo Blomqvist is visiting with his parents at their summer cottage at Kallavesi lake, Finland, when he suddenly notices a strange, colorful ball of light coming from the sky. The light approaches and turns out to be an oval glowing object. While it is hovering above the shallow water of an island he sees something fall from the object and hears a sound resembling hot metal touching cold water. The object shoots straight upward. Blomqvist recovers a 2–2.5-inch piece of stone. In 1975, Blomqvist contacts UFO investigators and gives them the stone. The fragment is x-ray analyzed at Åbo Akademi University in Turku, which states that it appears to be volcanic. Analysts at the University of Turku look at it with a mass spectrometer and conclude it is mostly iron, not a piece of ore, not volcanic, not a meteorite, and not machined, although it has been subjected to a temperature of around 650°C. (“Fragment Fell from UFO,” APRO Bulletin 26, no. 6 (December 1977): 1, 3; “Foreign Forum,” IUR 3, no. 3 (Mar. 1978): 2)

August — Midnight. Air Policeman Arthur McEnaney and other guards see a round UFO hovering above a four-silo Atlas complex near Francis E. Warren AFB, Cheyenne, Wyoming. (Nukes 159)

August 9 — 9:00 p.m. Baltazar Flores, Francisco Perez, Ruben Lozaya, and Elpidio Salas are camping near the Cerro Viejo, Sonora, Mexico, where they plan to explore for minerals. Suddenly a “dark, cloud-like object” approaches at high speed. As it passes by, the trees shake and they hear an explosion. They return the next day and less than 2 miles from their campsite they find a compact, gelatinous mass of green color with the 31st Air Transport Squadron, 1607th Air Transport Wing, 200 miles east of Dover AFB in Delaware at 9,000 feet over the North Atlantic. A blurred reddish-white glare appears ahead and 500 feet below them on a collision course. Thompson takes evasive action, and the light makes a right turn and disappears. Air traffic control shows nothing on their radar in that location. (NICAP, “Object on Collision Course with C-124”; J. Allen Hynek, The UFO Experience, Ballantine ed., 1974, pp. 50–51; Sparks, p. 300)

August 11 — 5:30 p.m. John Dodson, 15, and Frankie Jimenez, 14, are walking near the railroad tracks south of State Highway 281 east of Defiance, Ohio, not too far from the General Motors foundry. They see a slowly rotating whitish disc apparently hovering above a GM water tank. The object has a lighted flange-like base, a dome on top, and is making a whirring or hissing noise. It begins to move horizontally at a moderate speed, then shoots up vertically and disappears. (“Maney Reports Boys’ Sighting,” APRO Bulletin, November 1964, p. 1; Clark III 1102)

August 18 — 12:35 a.m. USAF Major D. W. Thompson and First Pilot 1st Lt. J. F. Jonke are flying a C-124 transport with the 31st Air Transport Squadron, 1607th Air Transport Wing, 200 miles east of Dover AFB in Delaware at 9,000 feet over the North Atlantic. A blurred reddish-white glare appears ahead and 500 feet below them on a collision course. Thompson takes evasive action, and the light makes a right turn and disappears. Air traffic control shows nothing on their radar in that location. (NICAP, “Object on Collision Course with C-124”; J. Allen Hynek, The UFO Experience, Ballantine ed., 1974, pp. 50–51; Sparks, p. 300)

August 22 — 9:35 p.m. Robert D. Briele, an engineer for WFBR-AM radio, and a friend watch a lighted triangular object pass directly overhead in Baltimore, Maryland. Through binoculars he can see a steady white light at each corner. A small green light is also on one corner and a red light in the center. The object moves slowly and silently from northeast to southwest, disappearing in 10 minutes. (“UFO Sighting Wave Persists,” UFO Investigator 2, no. 12 (Sept./Oct. 1964): 5)

August 30 — Night. Clifford Runyon and Connie Thies are driving from Tipton to Bennett, Iowa, when they see a cigar-shaped object with two bright lights hovering 500 feet up in the eastern sky. The UFO climbs as they drive toward it, and their radio goes out and the car engine sputters. (“UFO Sighting Wave Persists,” UFO Investigator 2, no. 12 (Sept./Oct. 1964): 5)

September 4 — Declassified documents show that from 1962 through 1964, the CIA has spent a total of $2.6 million to finance the campaign of Eduardo Frei Montalva for the presidency of Chile and spent $3 million in anti–Salvador Allende propaganda “to scare voters away from Allende’s FRAP coalition.” Richard Helms coordinates the action. The CIA considers its role in the victory of Frei a great success. They argue that “the financial and organizational assistance given to Frei, the effort to keep Juliol Durán in the race, the propaganda campaign to denigrate Allende—were ‘indispensable ingredients of Frei’s success,’” and they think that his chances of
winning and the good progress of his campaign would have been doubtful without the covert support of the US. Thus, in 1964 Allende loses once more as the FRAP candidate for president. (Wikipedia, “Salvador Allende”)

September 5 — 10:00 p.m. Donald Schrum and his friends are bow-and-arrow hunting in an isolated area of Placer County, California, near the Loch Leven Lakes in the vicinity of Cisco Grove. Schrum becomes separated from his companions. At sunset he decides to sleep in a tree for the night. Later he sees a white light zigzagging at low altitude and, thinking it is a helicopter, jumps out of the tree and lights fires to attract its attention. The light turns toward him and stops about 50–60 yards away. The object’s strange appearance frightens Schrum, so he climbs back up in the tree. After a while two humanoid beings and a robot-like creature approach the tree. From then on, Schrum is in a state of siege as the beings try to dislodge him from the tree. At one point a white vapor emanates from the robot’s mouth and Schrum blacks out, but wakes up again, nauseous, and begins lighting matches and throwing them down to frighten the beings away; they back away. Finally, he shoots an arrow at the robot; when it hits, there is an arc flash and the robot is knocked backwards. This is repeated two more times, and the humanoids scatter each time. A second robot appears and a vapor renders Schrum unconscious. When he awakes, he discovers that the two humanoids are climbing up the tree toward him, so he shakes the tree and throws things down at them to ward them off. The same actions are repeated all night. Near dawn, more beings approach and “large volumes of smoke” drift up and he blacks out. He awakes hanging from his belt, and the creatures are gone. Later, when reunited with his companions, Schrum finds that one of the other hunters, who also have gotten lost and separated from their camp, saw the UFO. (NICAP, “Cisco Grove / Alien Encounter”; Donald E. Keyhoe and Gordon I. R. Lore Jr., Strange Effects from UFOs, NICAP, 1969, pp. 17–23; Hynek UFO Report, pp. 210–212; Sparks, p. 301; Clark III 236–240; Ted Bloecher and Paul Cerny, “The Cisco Grove Bow and Arrow Case of 1964,” IUR 20, no. 5 (Winter 1995): 16–22, 32)

September 14 — 10:55 p.m. Astronomers Luis Ferro and Renato Matteassi at the San Miguel Observatory, Buenos Aires, Argentina, watch an object with the apparent size twice that of the Moon passing across the constellation Lyra. The central portion is white and green, while the rear looks like half-rings of blue. Its speed is estimated as three times the speed of sound. They watch it for 3 minutes moving toward Jupiter. (Gordon Creighton, “Argentina 1963/1964: Part IV,” Flying Saucer Review 12, no. 3 (May/June 1966): 28)

September 15 — 8:27 a.m. USAF Lt. Robert Jacobs is officer-in-charge of photo-optical instrumentation for the 1369th Photographic Squadron at Vandenberg AFB [now Vandenberg Space Force Base] near Lompoc, California. His crew films an SM-65F Atlas missile launch where a UFO allegedly causes the ICBM’s warhead to malfunction over Big Sur, California. At the time of the filming, apparently no one knows anything about a UFO sighting. But the next morning, Jacobs is ordered to report to the office of Maj. Florenz J. Mansmann, First Strategic Aerospace Division, his commanding officer, where he is shown the film and told to forget it ever happened. Kingston George, the project engineer for the experiments and who probably never saw the film, “identified” the object as “nothing to do with UFOs” in an article in the Skeptical Inquirer. Before Mansmann’s death, and 40 years after the actual event, the major confirms the UFO incident in writing. The controversy centers on the opinions of some researchers who suggest that the telescope imaging system is not adequate enough to produce the results described by Jacobs and Mannsmann. However, several other researchers have shown that, with the viewing conditions at the height of the equipment used, and the imaging systems operating at that shoot, the incident could have occurred as described. (NICAP, “The Big Sur Filming / UFO Disables Dummy Warhead?”; Robert Jacobs, “How a UFO Destroyed an American Rocket,” Flying Saucer Review 29, no. 1 (October 1983): 23–24; Kingston A. George, “The Big Sur ‘UFO’ An Identified Flying Object,” Skeptical Inquirer 17 (Winter 1993): 180–187; Robert Hastings, “A Shot across the Bow: Another Look at the Big Sur Incident,” IUR 31, no. 1 (January 2007): 3–11, 20–24; Mark Rodeghier, “Image Resolution of the Optical System at Big Sur,” IUR 31, no. 1 (January 2007): 20; Robert Hastings, “Answers on Big Sur,” IUR 31, no. 4 (Mar. 2008): 18; Robert L. Hastings, “UFOs Are Stalking and Intercepting Dummy Nuclear Warheads during Test Flights,” UFOs & Nukes, August 23, 2011; Nukes 187–217)

September 16 — 6:55 p.m. Several teenagers at Little Hulton, Greater Manchester, England, watch a noiseless, pearly white triangular object traveling with its base forward toward the north. (“Manchester Disbeliever’s Testimony,” Flying Saucer Review 10, no. 6 (Nov./Dec. 1964): 25)

September 18–24 — Numerous high-speed UFOs are reported and tracked on radar in an area between Surabaya, Malang, and Bangkalan, Java, Indonesia. Antiaircraft batteries and Air Force pilots reportedly open fire on them, even though officials suspect they could be British aircraft from the HMS Victorious protecting Malaysia. (Good Above, p. 429; Rahadian Rundjan, “Mencari UFO di Langit Indonesia,” Historia, June 19, 2017)

Late 1964 — Deputy Missile Combat Crew Commander 1Lt. Philip E. Moore is on duty in Site 7 (east of Hagerman, New Mexico), one of the 579th Strategic Missile Squadron’s underground Atlas missile launch facilities at Walker
AFB [now closed] in Roswell, New Mexico. He gets a call from an adjacent missile silo around 10–15 miles away, saying that a UFO is hovering and maneuvering over their site. Maj. Dan Gilbert sends three enlisted crew members—T/Sgt. Jack Nevins, Airman 1C Bob Garner, and Airman 1C Mike Rundag—above ground to see what is going on. They see a silent light that moves very quickly (instant stop and instant go) back and forth between Site 6 and Site 8. Gilbert goes up and sees the same activity. (Nukes 152–157)

October — An engineer and three technicians at the Wallops Flight Facility on Wallops Island, Virginia, see a triangular-shaped object speed in from the north, make a 90° turn, and disappear in under a minute. They all agree that it moved faster than a jet. (Harold H. Deneault Jr., “UFOs Return to Washington,” Fate 18, no. 7 (July 1965): 48–49)

October 7 — 11:10 p.m. R. Shannon and his wife see a blood-red triangle in the sky above Dulwich, London, England. They watch it for 10 minutes before it begins revolving swiftly, almost to a blur, then explodes silently and disappears. (R. Shannon, “Dulwich De-Materialisation?” Flying Saucer Review 11, no. 1 (Jan./Feb. 1965): 28)

October 29 — 12:00 midnight–3:00 a.m. Irene Page watches a sparkling ball of light that maneuvers around her yard, illuminating her property in Brimfield, Massachusetts. When she first sees it, the TV set fades, and lights in the room blink on and off several times. (“Flashing UFO Seen Three Hours,” APRO Bulletin, July/Aug. 1965, p. 7)

November 3 — 8:15 p.m. A barking dog alerts the caretaker of the Butano Creek Girl Scout Camp near Pescadero, California. He goes outside and sees a bright light maneuvering erratically in the northeast. He flashes an SOS signal at it with a flashlight, and the light silently moves toward him. He flashes more SOS signals and it moves even closer, hovering above some trees a half mile away and moving back and forth. It lights up the sky like a full moon. The caretaker and another employee run into a cabin to get their wives. The four watch for a while longer, then flash another SOS. The light approaches again, then retreats, dims, and takes off. (Lorenzen, UFOs: The Whole Story, Signet, 1969, p. 242)

November 5 — J. Allen Hynek writes to a citizen interested in the Socorro, New Mexico, case and affirms his opinion that Lonnie Zamora’s story was “told by a man who obviously was frightened badly by what he did see.” He says he cannot dismiss it as a hoax or hallucination. (Bill Murphy, “The Swamp Gas Aftermath: Some Notes from the Gerald Ford Files,” IUR 33, no. 2 (July 2010): 12–13)

November 9 — 8:00 p.m. Trevor Foss responds to his son’s call to watch a light in the northern sky over Kailoa Station, Gisborne, New Zealand. Through night binoculars he sees a ball of light traveling south toward him. It takes 5 minutes to reach the southern horizon and has rotating light beams that project downward and to the rear, as well as 6 jet-like blue flames. (“Farmer Observes Sphere,” APRO Bulletin, January 1965, p. 8)

November 14 — Midnight. Astronomers at the San Miguel Observatory, Buenos Aires, Argentina, see an elongated, flat, reddish-orange object crossing the sky from east to west and then back again at a speed 4.5 times that of a satellite. (“Mystery Object over Argentina,” APRO Bulletin, January 1965, p. 2; Gordon Creighton, “Argentina 1963/1964: Part IV,” Flying Saucer Review 12, no. 3 (May/June 1966): 28)

November 19 — 9:00 p.m. The USS Gyatt destroyer is stationed in the Atlantic Ocean about 220 miles northwest of Puerto Rico when its radar detects a bogey approaching the island from the northeast at speeds exceeding Mach 1. The ship relays a message to Roosevelt Roads Naval Station [now José Aponte de la Torre Airport] in Ceiba, Puerto Rico, which then contacts Lt. Cmdr. K. H. Woodbury, pilot of an F-8C aircraft of Utility Squadron Eight that is already flying in the neighborhood at an altitude of 30,000 feet. The aircraft reports a stranger closing in very fast. The pilot describes the object as delta-shaped and about the size of a fighter. Its color is black or gray and it has no contrail or lights except for a light source emitting from the tail during periods of acceleration. The pilot pursues the object but cannot intercept. The target accelerates out of sight in a wide starboard turn climbing through 50,000 feet at about an 18°–20° angle in excess of Mach 1. Woodbury says: “Its speed, acceleration, ceiling and ability to decelerate exceed any aircraft I have ever seen or heard of. There is no reasonable explanation for this target.” During the encounter the SPS-49 radar is jammed for a short period of time. Other radar encounters take place in the Caribbean November 16–18 and 24. (NICAP, “U.S.S. Gyatt Tackles Bogey”; Sparks, p. 302)

November 21 — The FBI sends Martin Luther King Jr. a “suicide package” note that contains audio recordings of his sexual indiscretions and a letter telling him, “There is only one way out for you.” The FBI’s COINTELPRO program is also targeting Malcolm X. (Wikipedia, “COINTELPRO”)

November 22 — 10:45 p.m. Private pilot George Henry Lissauer is driving near Georgetown, South Carolina, when he sees two large, silvery, oval-shaped UFOs, each accompanied by 6–8 smaller objects. The formations are moving
slowly at about 3,000 feet altitude. After 2–3 minutes, the smaller objects go into the larger objects and disappear. Lissauer goes directly to Myrtle AFB [now Myrtle Beach International Airport] and reports them. ("Increased Landings Hint New UFO Phase," *UFO Investigator* 3, no. 3 (June/July 1965): 2; Herbert S. Taylor, “Satellite Objects: A Further Look,” *IUR* 29, no. 2 (Summer 2004): 3)

November 25 — 12:45 a.m. A 29-year-old woman sees two lighted objects land on a hilltop near New Berlin, New York. Through binoculars she can see some 9–11 humanoid beings apparently engaged in repair work on a round object with landing struts for four hours. Some of them are holding boxes filled with unusual gadgets. The next day, she and her husband and father-in-law find two equatorial triangular imprints on the site, as well as a cable with some thin aluminum strips and insulation. Around 4:55 a.m., one UFO shoots straight up and abruptly disappears, while the other rises straight up a minute later and follows the other one. (Berthold E. Schwarz, “New Berlin UFO Landing and Repair by Crew,” *Flying Saucer Review* 21, no. 3–4 (November 1975): 22–28)

November 26 — 11:00 p.m. A family of five in Adams, Wisconsin, is returning home from Thanksgiving dinner when an extremely bright light appears over their car, completely shutting off its headlights and radio. The father jumps out of the car and looks straight up into the light, shading his eyes with his hands, but he is persuaded to come back. Suddenly the light disappears and the electrical systems return. No one talks about the incident for 16 years, when the father says the light was “motionless like a floodlight of gigantic proportion.” (“Recently Reported,” *CUFOS Associate Newsletter* 2, no. 10 (October 1981): 5; “Out of the Not-Too-Distant Past.” *IUR/Frontiers of Science* 3, no. 6 (Jan./Feb. 1982): 13–14)

December 19 — 3:50 p.m. Naval Air Station Patuxent River in Maryland tracks two large targets on radar moving at 6,900 mph. (Harold H. Deneault Jr., “UFOs Return to Washington,” *Fate* 18, no. 7 (July 1965): 46–47; Keyhoe, *Aliens from Space*, Signet ed., 1974, p. 87; *Sparks*, p. 303)

December 21 — 4:50 p.m. Kenneth Norton Jr., 14, is looking out his bedroom window in Staunton, Virginia, when he sees a “fast-moving object without wings or tail structure.” He describes it as cigar-shaped and about 125 feet in diameter, in view for 5 seconds. (*Richmond (Va.) Times-Dispatch*, January 15, 1965; “‘Saucer’ Reports Are Flying,” *Staunton (Va.) Daily News Leader*, January 15, 1965, p. 2; Clark III 493)

December 21 — 5:00 p.m. Driving east on US Highway 250, Horace Burns is approaching Fishersville, Virginia, when an enormous object appears from the north and descends slowly in a gradual slant. Just before it crosses the highway 200 feet in front of him, the UFO narrowly misses power lines. It is so huge that when it passes nearly in front of him, it fills his entire windshield. The UFO comes down gently and lands in a field to Burns’s right. Meanwhile, Burns’s car engine has shut off. The object appears to be at least 125 feet in diameter and 80–90 feet high. After 60–90 seconds, it rises up several hundred feet, makes a sound like rushing air, and shoots off to the northeast, vanishing from sight. A high level of radioactivity is detected at the site December 30 by investigators German professor Ernest G. Gehman and engineer Harry M. Cook. They obtain a Geiger counter reading of 16–18 milliR/hr. Two Blue Book investigators—T/Sgt. David N. Moody and S/Sgt. Harold T. Jones—visit the site with Gehman on January 12 and take further readings (1.5 milliR/hr on Burns’s left rear car door). They dispute Gehman’s earlier results, but a possible 11x–12x drop in radiation level in 13 days possibly indicates a radionuclide with a 3–4 day half-life. (“‘Saucer’ Reports Are Flying,” *Staunton (Va.) Daily News Leader*, January 15, 1965, pp. 1–2; NICAP, “Car Engine Fails after Object Lands”; “Opposition Flap 1965,” *Flying Saucer Review* 11, no. 3 (May/June 1965): 3–4; Clark III 491–494, 950; *Sparks*, p. 303)

December 22 — A D-21 drone (renamed from Q-12 in its transition to Project Tagboard) mounted on an M-21 begins captive flight-testing at Area 51 in Nevada. (Wikipedia, “Lockheed D-21”)

December 22 — The first flight of an SR-71 Blackbird takes place at Air Force Plant 42 in Palmdale, California, piloted by Robert J. Gilliland. The SR-71 reaches a top speed of Mach 3.4 (~2,588 mph) during flight testing. (Wikipedia, “Lockheed SR-71 Blackbird”)

1965

1965? — A-12 pilot Ken Collins continues to test A-12s at Groom Lake, Nevada. One night (in 1964 or 1965 maybe), he is awakened by base commander Col. Hugh “Slip” Slater and asked to take an A-12 up to find a Russian reconnaissance balloon that is floating in American airspace in a westerly direction with the prevailing winds. Collins is tasked with finding the balloon visually and using radar. In the air, he realizes it is a wild goose chase because, flying at 2,200 mph, even if he sees the balloon briefly it would be behind him in a second. He identifies an object on radar 350 miles away. He circles it as closely as he can, which is a circle with a radius of 400 miles.
1965 — USAF Gen. Curtis LeMay writes in his autobiography that some UFOs are not explained very easily: “There is no question about it. These were things which we could not tie in with any natural phenomena known to our investigators.” He expresses his dislike of NICAP’s position that USAF is trying to muzzle the media. “There were some cases we could not explain,” he writes. “Never could.” (Curtis E. LeMay, *Mission with LeMay*, Doubleday, 1965, pp. 541–543)

1965 — Less than 20% of the public believes in UFOs, according to polls and private Air Force and NICAP estimates. This soon rises to 33% by July. (Keyhoe, *Aliens from Space*, Signet ed., 1974, p. 94)

1965 — Ross Liverton reports a ring of bare earth, 8 feet wide, in the ground on Waiheke Island, New Zealand, where a UFO is seen. It remains visible for 4 years. The site contains some unidentified whitish material that resolves into fibers during a soil immersion test. Vallée says the material is “vegetal in nature.” (Vallée, *Invisible College*, pp. 36–37; Ted Phillips, “*Landing Report from Delphos,*” *Flying Saucer Review Case Histories*, no. 9 (February 1972): 10)

1965 — A couple is driving on a country road in Buenos Aires province, Argentina, when their car engine begins to fail, so they pull over in front of a tree. They notice an object behind the tree that emits a luminous ray toward them that bends at three places, vertically and horizontally, to avoid the tree. The woman’s cheek feels as if something is probing her. (Jean Bastide, *La Mémoire des OVNI*, Mercure de France, 1978; “*Beam of Light with Three Corners,*” *CUFOS Associate Newsletter* 4, no. 6 (Dec, 1983/Jan. 1984): 4)

1965 — A short color film of a “huge, windowed, hovering craft” with three smaller objects attached to it “as a kind of tail” is taken by a converted RAAF aircraft during a photo-mapping flight over central Australia. A door on the large object opens—two vertical panels and two horizontally aligned panels slide apart—and the three smaller objects fly inside. A US Air Force sergeant with a top-secret clearance is shown this clip at a CIA screening in Texas in 1967. He says the filmed image of the UFO is extraordinarily clear, filling the entire screen. (Budd Hopkins, *Missing Time*, R. Marek, 1981, p. 253)

January 5 — 5:56 p.m. NASA engineer Dempsey Bruton, head of the Wallops Flight Facility on Wallops Island, Virginia, observes a round, bright-yellow light rising from the horizon. The apparent size of the object is that of a nickel held at arm’s length. As the object reaches an overhead position, it disappears. The length of observation is approximately 8–9 seconds. The witness claims that his wife and brother-in-law also see the object. (NICAP, “*Bright Yellow Light Flies Ahead*”)

January 11 — Mrs. Paul Zimmerman Gearhart and her two sons see a triangular UFO that flies slowly out of the southeast and then “suddenly plunged into the sea some miles offshore” at Tillamook Head, Oregon. It leaves behind two trails of fire. (Sanderson, *InvRes*, p. 50)

January 11 — 4:20 p.m. At least 12 persons, including six Army Signal Corps communications system specialists, at the Munitions Building at Nineteenth Street and Constitution Avenue, N.W., Washington, D.C., observe 12–15 white oval objects maneuvering erratically at 12,000–15,000 feet altitude above the US Capitol Building. Two delta-wing jets, apparently from Andrews AFB in Maryland, are seen in pursuit, but the objects easily outmaneuver them. Among the witnesses are Paul M. Dickey Jr., Edward Shad, Sam Webb, Jack McBride, and Sam Marrone. The objects are also tracked on radar. The Defense Department denies the incident, but the witnesses publicly maintain their story. The Pentagon forces a TV crew about to interview the witnesses to shut down that evening. (NICAP, “*Over a Dozen Ovals Chased by AF Jets*”; Harold H. Deneault Jr., “UFOs Return to Washington,” *Fate* 18, no. 7 (July 1965): 47–48; Frank Edwards, *FS Serious Business*, Bantam ed., 1966, pp. 67–68)

He never makes visual contact and returns to Area 51. Jacobsen says that this Soviet violation of US airspace has “never been declassified.” (Jacobsen, *Area 51*, pp. 195–196)
January 12 — 1:00 a.m. Department of Justice Inspector Robert E. Kerringer [or is it Donald E. Flickinger, an agent of the US Bureau of Alcohol, Tobacco, and Firearms?] is driving near Lynden, Washington, when he sees a low-flying object, 30 feet in diameter, that avoids collision with his car at the last moment. He gets out and sees it hovering for one minute, then it flies off at high speed with a sound of rushing air. He learns that nearby Blaine Air Force Station [now closed] is tracking the UFO. (NICAP, “Driver Avoids Collision with 30’ Object”; Sparks, p. 303; “New Sightings Put AF on Spot,” UFO Investigator 3, no. 1 (March/April 1965): 4; Frank Edwards, FS Serious Business, Bantam ed., 1966, pp. 54–55)

January 12 — 10:58 a.m. The Kiwi Transient Nuclear Test is conducted at Area 25 of the Nevada Test Site as part of Project NERVA. The nuclear rocket engine code-named Kiwi is allowed to overheat until it bursts, sending fuel hurtling skyward. Deadly radioactive fuel chunks as large as 148 pounds shoot up into the sky and last as far away as a quarter mile. A radioactive cloud rises up to 2,600 feet, then drifts out over Los Angeles, California, and out to sea. The AEC calls it a “safety test,” but the USSR says it violates the test ban. (Jacobsen, Area 51, pp. 309–310; Wikipedia, “NERVA”)

January 12 — 6:30 p.m. A NASA public relations employee named Milliner and her husband are walking toward their house when they see a bright yellow object moving swiftly over the Wallops Flight Facility at Wallops Island, Virginia. They watch it for 2 minutes. (Harold H. Deneault Jr., “UFOs Return to Washington,” Fate 18, no. 7 (July 1965): 48)

January 12 — 8:20 p.m. A Mrs. Jubert in Custer, Washington, sees through her window what seems to be the landing lights of an airplane apparently coming into her yard. She herds her three teenage girls outside in the opposite direction. The four lights merge into one intense white light, which moves in a straight line toward the house, lifts several hundred feet and clears a clump of evergreens, then dips down on the far side and touches the ground. A border patrol officer also sees the object after he is alerted by radio. He is buzzed by the UFO, which is low enough that he stops his car, gets out, and watches it move out of sight. Where the object lands in 16 inches of snow, they find a large circular imprint about 10–12 feet in diameter. The ground beneath the melted snow ring shows evidence of having been scorched. Oval-shaped tracks 8 inches long and 8 inches apart, in a single file, are found leading from the landing site to the evergreens, where they disappear. One month later, the circular area still shows traces. (“New Sightings Put AF on Spot,” UFO Investigator 3, no. 1 (March/April 1965): 4; J. Allen Hynek, The UFO Experience, Ballantine ed., 1974, pp. 152–153; Ted Phillips, Physical Traces Associated with UFO Sightings, CFOS, 1975, p. 34)

January 14 — Around 12:00 midnight. Old Dominion college student James Myers sees a diamond-shaped object rise from the ground to 1,500–2,000 feet near Norfolk, Virginia. He loses sight of it behind a church and when it reappears it looks round, bright, and silvery. (Harold H. Deneault Jr., “UFOs Return to Washington,” Fate 18, no. 7 (July 1965): 49)

January 15 — 9:45 p.m. Mathew Rybczyk is watching TV at his home in Manchester, New Hampshire, when the set goes blank. Going outside to see if the antenna is damaged, he sees a flashing light moving across the tree line to the east and making a humming noise. When the light disappears, the TV set comes on again. (Manchester (N.H.) Sunday News, January 17, 1965; Schopick, p. 148)

January 15 — 10:00 p.m. Charles Knee Jr., a former newsman, is driving on State Highway 4A between Wilmot and Enfield, New Hampshire, when the radio suddenly stops, the lights on the car go out, and the engine quits. He loses control of the car and pulls to the side of the road and then hears a loud humming sound like a high-frequency electrical whine. He opens the car door, steps out, and sees a bright light below the cloud cover at around 2,000–5,000 feet altitude. It seems to hover for a moment and then takes off to the south. As the light leaves and the whine dies away, the headlights and radio come on and the motor starts by itself. The whole thing lasts about 15–20 seconds. (Manchester (N.H.) Sunday News, January 16, 1965; Schopick, pp. 148–150)

January 19 — NICAP Acting Director Richard H. Hall meets with a CIA agent and passes on some UFO case information and other materials to OSI for preparation of a paper on UFOs. Hall is given a direct phone number for the agent’s office. He uses the phone line only once to “report some high-quality UFO sightings to the CIA.” He is also given a CIA security clearance without his consent or knowledge. A January 25 CIA memo confirming the meeting shows an inordinate amount of interest in NICAP, given the CIA’s mandate for acquiring foreign intelligence. (ClearIntent, pp. 231–234; Richard H. Hall, Uninvited Guests, Aurora, 1988, pp. 11, 354–358; Good Above, pp. 349–350)

January 19 — Hall also meets for 90 minutes with retired Navy Capt. John Lawrence Counihan who is on the staff of Sen. Thomas J. Dodd (D-Conn.). Counihan says that the Committee on Astronautics and Space Science would be considered “nutty” if it took up hearings, but it might be willing to consider an informal briefing by NICAP. (Swords 306)
January 19 — 6:15 p.m. William Blackburn, a draftsman at a General Electric plant, is chopping wood at an archery range east of Staunton, Virginia, in an area known locally as Brands Flats. He sees two saucer-like shapes in the sky at 2,000–4,000 feet altitude. The larger one seems to be about 80 feet across. The smaller one, 20 feet across, descends quickly and silently and lands 45–55 feet away from Blackburn. A door opens, making a slight noise and revealing an interior light. Three figures, each 3 feet tall and wearing tight-fitting metallic-looking suits, emerge. They have reddish-orange skin and piercing eyes. One has an extra-long finger on its left hand. They speak in an unintelligible language, then return to the UFO. The door closes so perfectly that an outline cannot be seen, and the object takes off. The entire episode lasts only 5 minutes. Blackburn sees no traces in the snow, but thinks the object and humanoids are hovering. (NICAP, “Two Humanoids Approach Witness”; Clark III 196)

January 23 — 8:40 a.m. Two separate cars driving in different direction stall out near the intersection of US Hwy 60 and State Route 614 in Lightfoot, Virginia. One of the drivers, Thomas F. Mains, sees a light bulb-or mushroom-shaped object 75–80 feet tall and 10–25 feet wide, hovering over nearby field about 4 feet off the ground. It is metallic gray, with red-orange and blue lights and is making a vacuum cleaner noise. It suddenly accelerates horizontally to the west against the wind and disappears. (NICAP, “UFO Hovering over Field Stalls Cars”; Sparks, p. 304)

January 25 — Night. Policeman Woody Darnall, his family, and several neighbors see a glowing object hovering on a mountainside near Marion, Virginia. It seems to explode and take off in a shower of sparks. A group of Marion residents and state forest officials climb to the area and find several treetops bent over and one green tree on fire where the UFO was seen. (Harold H. Deneault Jr., “UFOs Return to Washington,” Fate 18, no. 7 (July 1965): 52)

January 25 — Night. Nine persons near Fredericksburg, Virginia, see a UFO that resembles a “Christmas sparkler.” One witness says it looks like a spinning top spitting sparks out of the bottom as it moves up the Rappahannock Valley at treetop level. (Harold H. Deneault Jr., “UFOs Return to Washington,” Fate 18, no. 7 (July 1965): 52)

January 26 — Evening. Rev. H. Preston Robinson and others in Marion, Virginia, watch an object hovering 600 feet above the city. The object makes a steady buzzing sound and has several lights on its round bottom. Spinning clockwise, it shoots out of sight at fantastic speed. It emits a ball of fire as it disappears. (Harold H. Deneault Jr., “UFOs Return to Washington,” Fate 18, no. 7 (July 1965): 52)

January 26 — Evening. Steven Houffer, 16, and six friends are driving on US Highway 250 near Brands Flats, Virginia, when they see a small man walking toward the road from a field. He sits down and peers intently at passing cars. Houffer stops the car and he and his friends get out. When they approach, the being runs up a hill. Two other entities appear and run in the same direction. They are all about 3.5 feet tall, wear silvery one-piece garments, and leave no footprints. Police officers conduct a search with local photographer Charles Weaver, but find nothing. Some time later, Houffer and Weaver see a “glowing aluminum barn,” which they go down to investigate. Weaver is walking around inside when something hits him on the head. The two turn to run after Weaver snaps a photo. In the light of the flashbulb, they see a little man standing by the barn. The photo is allegedly confiscated by government agents. A local man, Donald Cash, 6 feet tall, confesses to dressing up in overalls to pose as an alien, although his story does not completely match the details of the account. (“UFO Posses Hit,” Staunton (Va.) Daily News Leader, January 28, 1965, pp. 1–2; Jerome Clark, “Two New Contact Claims,” Flying Saucer Review 11, no. 3 (May/June 1965): 20–21; “Fed Up with Play: Green Man Confesses,” Staunton (Va.) Daily News Leader, January 31, 1965, p. 1)

January 27 — 6:00 p.m. NASA research engineer A. G. Crimmins Jr. observes an object at Plum Tree Island Wildlife Refuge, near Poquoson, Virginia, that is approximately 75 feet across and 10–15 feet in height. The object has 3–7 lights colored red and orange and appears to rotate. It moves approximately a quarter mile west of its original position on a zigzag course and then appears to land on the ocean shore. It remains still for about 5 minutes, then takes off to the north and turns right to depart to the east at a high rate of speed. Crimmins watches it through 20x binoculars. The same object is apparently seen by retired USAF Maj. John R. Nayadley, another NASA research engineer, who observes a V-shaped object with blinking red-orange lights over Hampton, Virginia. (NICAP, “Zig-Zagging Object Lands / Takes Off”; “New Sightings Put AF on Spot,” UFO Investigator 3, no. 1 (March/April 1965): 4; UFOEv II 156)

January 27 — 11:15 p.m. Donald Keyhoe and NICAP board member Joseph Bryan III appear on the Les Crane Show and are questioned skeptically by Crane. (Donald E. Keyhoe, “The Crane Show Fiasco,” UFO Investigator 3, no. 1 (March/April 1965): 6)

January 29 — In Monterey, California, Mayor George Clemens and his family see a bright light performing acrobatics in the northern sky. It hovers, then shoots straight up about 500 feet, fades, drops down, and hovers again. Then it drops toward the water and disappears. The Coast Guard finds nothing. (Sanderson, InvRes, p. 50)

January 30 — 2:00 a.m. TV repairman Sid Padrick is walking along Manresa Beach near his home in Watsonville, California. He hears a jet-like noise and sees a huge UFO moving slowly towards him. He hears a voice saying,
“We are not hostile,” and inviting him aboard. He enters the craft and sees a human in a flying suit who calls himself “Xeno” and gives Padrick a tour of the ship and other crew members that culminates in a deeply spiritual experience. Padrick reports his experience to Hamilton AFB [now closed] on February 4 and receives a 3-hour visit from Maj. Damon B. Reeder on February 8, and perhaps other officers after that. (Jerome Clark, “Two New Contact Claims,” Flying Saucer Review 11, no. 3 (May/June 1965): 20–21; Clark III 869–871; Good Above, pp. 293–298; Good Need, pp. 247–251; Lorenzen, Encounters with UFO Occupants, Berkley Medallion, 1976; “Contactee Loses Court Case,” UFO Investigator, April 1971, p. 1; Patrick Gross, URECAT, August 19, 2008; Marcus Lowth, “Sidney Padrick’s California Beach Encounter with Xeno,” UFO Insight, October 12, 2017; Curt Collins, “1965: UFO Contact in California,” The Saucers That Time Forgot, December 30, 2021)

February — George Langlea, ex-secret service officer and author of the short story “The Fly,” gives a lecture at Mourenx, Pyrénées-Atlantiques, France, and declares that the Russian and US secret services have collaborated on the UFO problem and concluded that the objects are extraterrestrial. (Good Above, p. 133)

February 3 — 8:45 p.m. A man sees a light on the beach near Penguin Street, South New Brighton, New Zealand, and gets out of his car to observe it. He hears a modulated whistling sound and sees an object, 22 feet wide, rise from the beach to an altitude of 60 feet. He returns with other witnesses and a dog that gets restless at a spot where grass is flattened. Another witness sees the UFO as it is rising above the suburb. (Vallée, Magonia, p. 305)

February 11 (or 15) — Night. A Flying Tiger Line cargo aircraft (Flight F-169) en route from Anchorage, Alaska, to Tachikawa Airfield, Tokyo, Japan, encounters three gigantic, glowing, red UFOs, at least 200 feet in diameter, about 4 hours out of Anchorage. The aircraft radar also picks them up about 5 miles off the wing. They pace the plane for 30 minutes, then speed away at 1,380 mph. (NICAP, “Radar/Visual over Pacific Ocean”; Richard H. Hall, Uninvited Guests, Aurora, 1988, pp. 249–250; Keyhoe, Aliens from Space, Signet ed., 1974, pp. 128–129)

February 16–18 — Astronauts Neil Armstrong, Richard F. Gordon Jr., Buzz Aldrin, David Scott, and Rusty Schweikart visit Sedan Crater and Buckboard Mesa at the Nevada Test Site to practice carrying out geological observations in preparation for a moon landing. (Nevada National Security Site, “Apollo Astronauts Train at the Nevada Test Site,” July 2019)

February 27 — The first conference of Australian UFO organizations takes place in Ballarat, Victoria, Australia. It is arranged by W. Howard Sloane of the Ballarat Astronomical Society to share information and remove some of the stigma of UFO research. The conference is held at the Ballarat Municipal Observatory in Mount Pleasant. Representatives of the Perth UFO Research Group, the Victorian Flying Saucer Research Society, the UFO Investigation Centre NSW, and the Flying Saucer Research Society of South Australia are in attendance. Witnesses include Rev. William Gill and Charles Brew. Former Air Marshal George Jones attends, and the RAAF is represented by B. G. Roberts, senior research scientist at the Operational Research Office, Department of Air. Roberts says that the RAAF has determined that 90% of reports are explainable, but that only those that might be a threat to national security are worth investigating and “there are no documents, files, or dossiers held by the Department which prove the existence of ‘flying saucers.’” The researchers quiz him on the 1953 Drury photographic case, but Roberts is unaware of that one. Jones insists on keeping an open mind about reports like those by Gill and Brew. (Swords 391–392; “First Australian Convention of UFO Groups,” Australian Flying Saucer Review (UFOIC), no. 8 (June 1965): 13–15)

March 2 — 1:55 p.m. John F. Reeves, 65, retired, while walking in the woods east of Weeki Wachee Springs, Florida, sees a bluish-green and reddish-purple object 20–30 feet in diameter, 6 feet thick, saucer-shaped, and with an outer rim and a stairway, two 2-foot windows on top, landed on the ground on four 4-foot legs about 2,000 feet away. He approaches to 100 feet. After watching the object for 10 minutes, he sees a robot-like being about 200–300 feet away, about 5 feet tall, wearing a gray-silver uniform, glass dome headgear, wide-spaced eyes, and pointed chin. It walks to 15 feet away from Reeves, stares at him for 1.5 minutes, points a box or 6–7-inch black object at Reeves that emits a flash 3 times, then walks back to the landed vehicle and climbs in. The object has
Venetian blind–like blades on the rim that open and close; the rim starts rotating counterclockwise, the landing gear retract, then it takes off with a whooshing-rumbling sound and disappears vertically in less than 10 seconds, dropping two sheets of paper with indecipherable writing, and leaving indentations and footprints in the ground. The case is investigated by MacDill AFB in Tampa. Richard Hall supervises the investigation for NICAP and concludes it is a hoax. (NICAP, “Landed Object and Entity Case / Hoax”; “The Florida ‘Landing’ Incident,” APRO Bulletin, March/April 1965, pp. 1, 3; Joan Whittenour, “UFO Lands?” Interplanetary Intelligence Report 1, no. 1 (May 1965): 4; “Project Blue Book,” Interplanetary Intelligence Report 1, no. 2 (July 1965): 8; Clark III 209–218; Jerome Clark, “Passport to Moniheya,” IUR 20, no. 3 (May/June 1995): 10–19; Sparks, p. 304)

March 5 — Two Air Force radar technicians are repairing the height-finder antenna at Benton Air Force Station [now Ground Equipment Facility QRC] in Ricketts Glen State Park near Red Rock, Pennsylvania, when they see a small, saucer-shaped object land nearby. As they approach it, a beam of light comes out and strikes both of them. That is the last thing they remember, and they fail to report to the command post. Their equipment is left behind at the antenna, but air police cannot locate the men. Pennsylvania State Police assist in a search of the area. About 16 hours later, a state trooper locates the two men walking along State Route 487 south of Lopez, about 10 miles away. They seem dazed, so they are taken to a hospital in Williamsport, where they are found to be dehydrated and confused. No alcohol or drugs are found. They are then taken to an Air Force hospital at Stewart AFB [now Stewart Air National Guard Base] in Orange County, New York. Trace amounts of alpha radiation are found on their clothing and strange marks are on their necks. AFOSI special agents interview them, but the men cannot remember anything. After 2 weeks in the hospital, they are released back to their unit. (“Pennsylvania Abduction from Air Force Base,” Filer’s Files, September 9, 1999; Good Need, pp. 251–252)

March 8 — 7:40 p.m. J. H. Martin, an instrument maker for the National Bureau of Standards, and his two sons observe in Mount Airy, Maryland, six lights he estimates to be 1,000 feet away and moving at a speed of 20 mph with no sound. They appear as three pair of lights, all with the same intensity. They are comparable to a traffic signal. The lights pass between the barn and the house at an estimated altitude of 100–500 feet, flying in a straight line toward the hills two miles away. They are in view for approximately 3 minutes. (NICAP, “Six Lights Just Miss House”; Sparks, p. 304)

March 15 — Around 1:00 a.m. James W. Flynn is deep in the Everglades in his swamp buggy, somewhere east of Immokalee, Florida, with his four hunting dogs. He sees a hovering object like an upside-down cone about 200 feet above some cypress trees slightly over a mile away. It moves back and forth from its original position. Through binoculars it looks 25 feet high and 50 feet in diameter, with square windows emitting a yellowish glow. Around its base an orange-red glow extends downwards and illuminates the ground some 75 feet around the rim. Some 40 minutes into the sighting, Flynn decides to approach it in his buggy. A high-pitched ringing sound bothers one of his dogs. He stops 600 feet away and walks, waving his arms, toward the UFO, which is hovering 4 feet off the ground. A blast of wind from the object nearly knocks him off his feet. He continues, and at 75 feet from the UFO he waves his arms again. The object beams a light like a “welder’s torch” that hits his forehead. He blacks out twice. When he wakes up he is temporarily blinded. In the morning he finds a symmetrical circle of burned ground. The tops of trees are burned. Flynn makes his way to the home of Henry Osceola (or Henry Billy) later in the day and arrives at his own home in East Fort Myers on March 17 and spends 5 days in the hospital with damage to his right eye, bruises, burns, deep muscle tissue damage, and loss of hearing. His eye damage is permanent. The landing marks and burned trees are verified by the Lee County sheriff’s office. (NICAP, “Everglades / James Flynn Case”; Donald E. Keyhoe and Gordon I. R. Lore Jr., Strange Effects from UFOs, NICAP, 1969, pp. 12–16; Lorenzen, UFOs: The Whole Story, Signet, 1969, pp. 192–195; Clark III 438–440; Patrick Gross, “UFO in the Everglades, USA 1965”)

March 17 — 10:00 p.m. Walter Jacobs, steward on the freighter Iron Duke, sees a bright orange object with a dent on top and a knot on the bottom off Newcastle, New South Wales. He takes a photograph but it is not published. (“UAO Photographed Clearly in Australia,” APRO Bulletin, March/April 1965, p. 1)
