C.I.Q. 9

CENTER INVESTIGATORS QUARTERLY

OCTOBER, 1980

A WORD ON FRONTIERS OF SCIENCE

As most of you will know by now, the INTERNATIONAL UFO REPORTER will not be a part of PROBE magazine any longer. PROBE went out of business before ever returning a signed contract to the Center for UFO Studies. Neither did they send any copies of the first issue of two to contain an IUR section to IUR's subscribers.

We do have a signed agreement with the well-respected SECOND LOOK magazine (now known as FRONTIERS OF SCIENCE) to incorporate IUR with at least eight pages per bimonthly magazine. The first issue contains a recap of information published in that first PROBE that no one got to read (unless you bought a copy off the newsstand.

The PROBE deal was an attractive proposition, not the least of the reasons being the newsstand exposure of responsible UFO information to a projected 150,000 circulation. At this point, we'll be satisfied to see a publication distributed on time within a respectable context.

CALL FOR SIGHTING REPORTS

To date, only 25% of the sighting reports submitted to investigators in the field have been completely investigated and returned.

For that matter, only a minority of CUFOS's 120 investigators submitted quarterly reports! Use the arrival of the CIQ's as your cue for submitting even a brief report of activity in your area.

REFERENCE MAPS

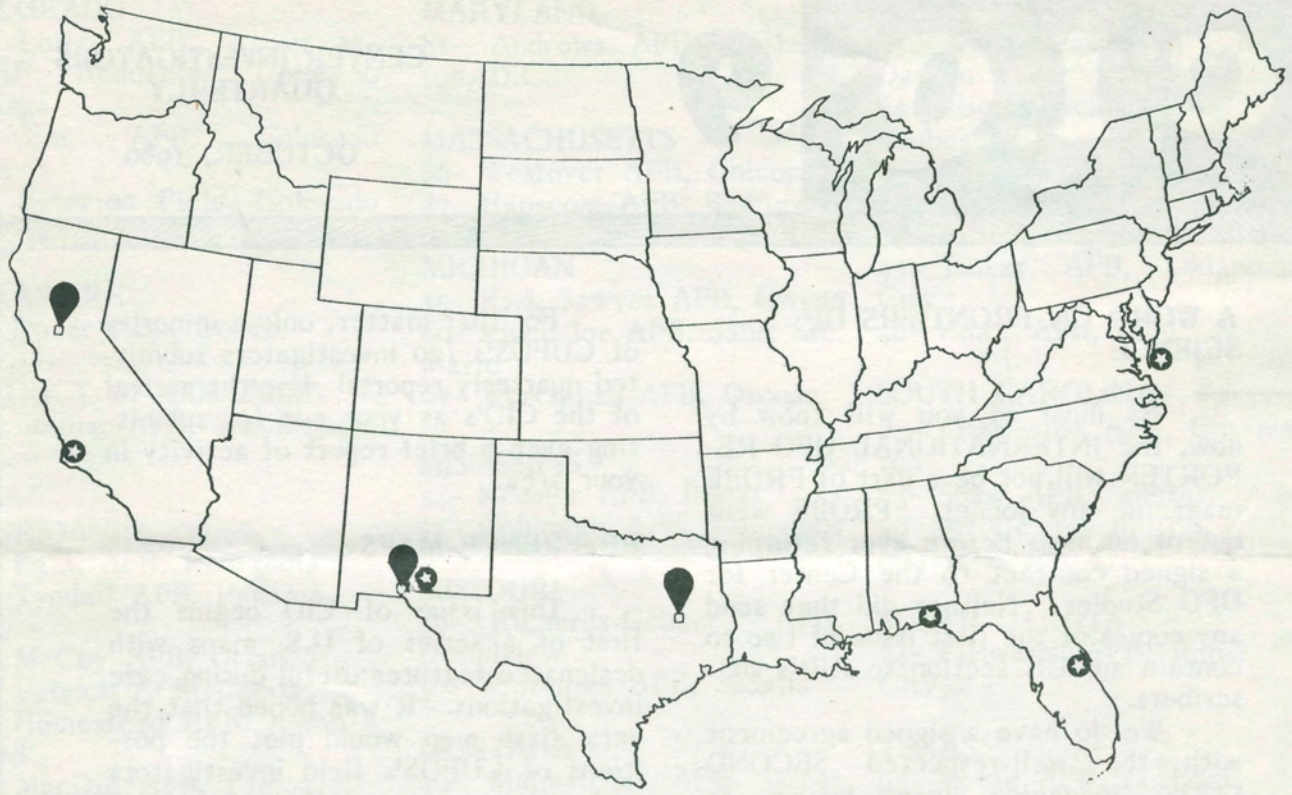
This issue of CIQ begins the first of a series of U.S. maps with designated features useful during case investigations. It was hoped that the very first map would plot the positions of CUFOS's field investigators with their home phone numbers; some cities contain more than one investigator, and it could be useful to know who else is working on UFO reports in your immediate vicinity. Unfortunately, such a map can't be produced until everyone acknowledges whether or not they want to be included. The CIQ is confined, of course, to CUFOS investigators.

Instead, you will find two maps depicting the locations of major balloon and missile launch sites as well as U.S. Air Force bases. Refer to the UFO HANDBOOK for a detailed discussion of balloon, missile and barium cloud IFOs.

Future issues will present maps showing advertising plane companies, volunteer hypnotists and physicians, Air Route Traffic Control Centers with phone numbers... even CUFOS investigators, someday.

Published in January, April, July and October of each year for the field investigators of the Center for UFO Studies.

Allan Hendry, Investigator Coordinator, 902 Hemingway Road, Stone Mountain, Georgia 30088.



BALLOON & MISSILE LAUNCH SITES

✪ MISSILE LAUNCHES

According to Vandenburg AFB, their high-altitude launches can be seen as far as Kansas (!) under the right conditions. CUFOS has had direct experience with a Virginia launch seen in Ohio!

NASA/Wallops Island also launches glowing barium clouds into the atmosphere. These large diffuse forms get reported as UFOs from all over the eastern U.S.

If you are calling the Kennedy Space Center about a possible launch, you may also have to call the Patrick AFB number. Only they are generally aware of military launches from the Cape.

CALIFORNIA
Vandenburg AFB, Lompoc
(805) 866-5814

NEW MEXICO
White Sands Proving Ground
(505) 678-1134

FLORIDA
Eglin AFB, Pensacola
(904) 881-3931
ask for "public information office"

Kennedy Space Center
Cape Canaveral
(305) 867-7111
- also -
Patrick AFB, Cocoa
(305) 494-7731

VIRGINIA
NASA/Wallops Island
(804) 824-3411 ext: 579

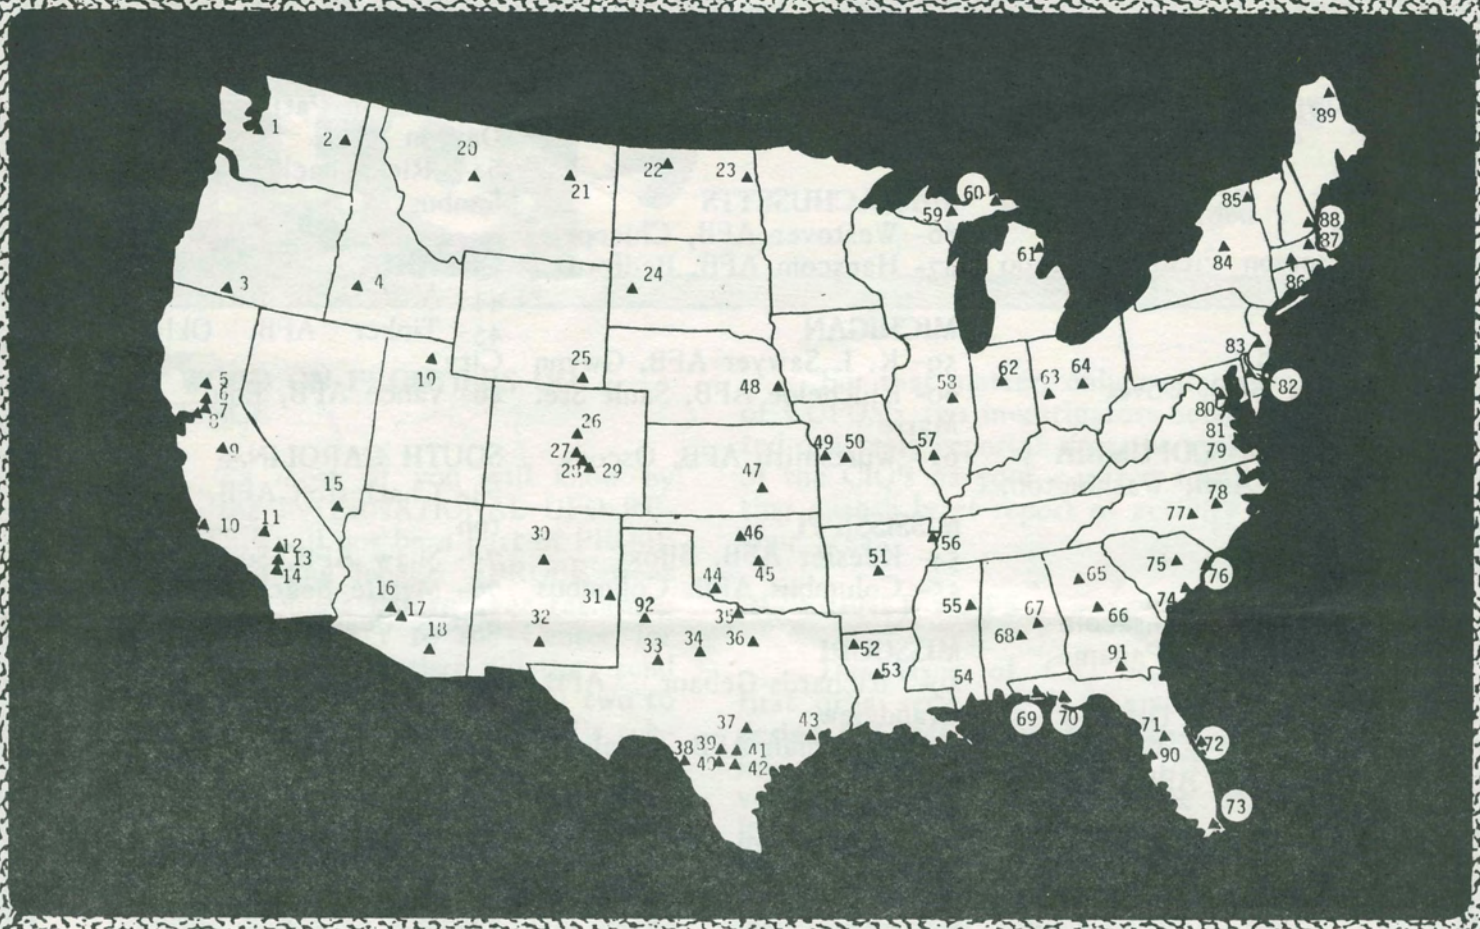
RESEARCH BALLOONS

The National Council on Atmospheric Research (NCAR) used Pierre, South Dakota for the first time in 8 years... so beware! Remember, high-altitude balloons are generally propelled east to west in the summer months, west to east in the winter. A Palestine balloon can make it as far west as the Arizona-California border or as far east as West Virginia.

CALIFORNIA
AFGL - Chico
call Holloman AFB (below)
infrequently used

NEW MEXICO
AFGL - Holloman AFB, New Mexico
(505) 479-6511 ext: 4421

TEXAS
NCAR - Palestine
(214) 729-0271
ask for "public information office"



MAJOR U.S. AIR FORCE BASES

92 U.S.A.F. FACILITIES

Inquiries to the following Air Force bases for information about unusual aircraft in a given area - or even a possible radar confirmation - should be made to their public information offices. The cities listed below must generally be known when calling the directory service for their phone listings.

NORTH AMERICAN AIR DEFENSE COMMAND

The NORAD facility in Colorado Springs is the last word in determining whether a sighting could be a satellite re-entry. Call them at:

(303) 635-8911 ext: 3523
