C.I.Q. 10

CENTER INVESTIGATORS QUARTERLY

JANUARY, 1981

I regret to announce that this will be the last C.I.Q. I will produce for the Center's 128 field investigators. CUFOS's current financial status precludes the maintainance of salaried positions at this time. Thus, as of February 28, I will conclude nearly five years of full-time work as CUFOS's Chief Investigator.

Sighting reports should continue to be routed to my home address thru February 28. Following that date, submit all reports to the Evanston address:

CUFOS, P.O. Box 1402, Evanston, IL 60204

Future C.I.Q.'s will be arranged via Dr. Hynek and John Timmerman. It should be obvious that your voluntary efforts and input are now more important than ever. Your sighting investigations will form the foundation of the *Frontiers of Science* I.U.R. section, now edited by Dr. Hynek. You can assist Dr. Hynek in the following ways. If a check mark appears here below, our records show:

( ) you still have a sighting report to return. Half of the reports submitted to the field since last March are still pending.

( ) you have not indicated whether or not you want your name, address and phone number published in a future C.I.Q. for the benefit of adjacent investigators. So far, only twelve of you have written in about this point. Most of you are not filing quarterly reports, either. States with numerous members include California (11), Ohio (10) and even the small state Connecticut (5).

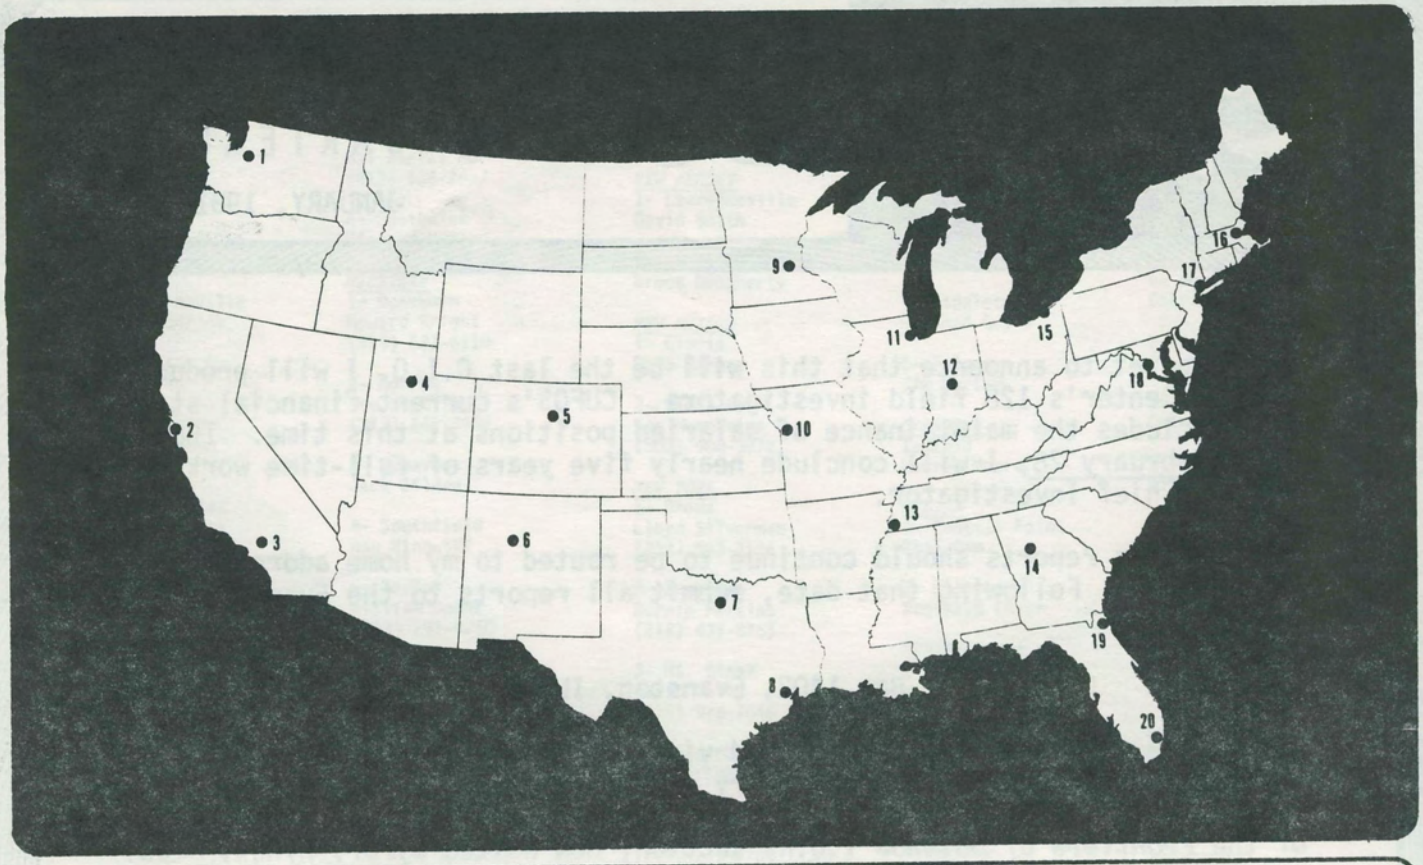
( ) your I.D. card has expired. Submit it to my address right away and I will return a new card with a two-year span through 1983.

As for me, I'll still be involved in science writing and publishing, so our paths will cross again.

Best wishes for the future,
Allan Hendry

Published in January, April, July and October of each year for the field investigators of the Center for UFO Studies.

Allan Hendry, Investigator Coordinator, 902 Hemingway Road, Stone Mountain, Georgia 30088.



AIR ROUTE TRAFFIC CONTROL CENTERS

The 20 ARTCC's control air flights outside of the local jurisdiction of individual airports. Non-transponding targets potentially corresponding to UFO sightings are also monitored (see the "Tools: Radar" chapter of the UFO HANDBOOK for details and limitations for this). Radar confirmation of sightings should be pursued through local airports first. Then call the closest ARTCC on the map and ask for the "watch supervisor". Inquiries will not likely be meaningful if they are delayed.

ADVERTISING PLANE COMPANIES

Four years ago, I had a list of over sixty advertising plane companies - complete with phone numbers - that flew illuminated signs at night. Now, that list is almost completely obsolete. I recently received a new list of current users of signs from Waugh Electronics of Nashville, Tennessee, but you will have to secure the phone numbers from the local directory. Other companies are manufacturing these signs now, so this list is not complete. You must expect to cross those companies off the list and add new ones within the year! Check the Yellow Pages under "Advertising: Aerial" for more listings, and notify the Center of changes in your quarterly reports. For more details on advertising planes, see the UFO HANDBOOK, pp. 31-35, 72-73, 79, 85, and 91-93.
