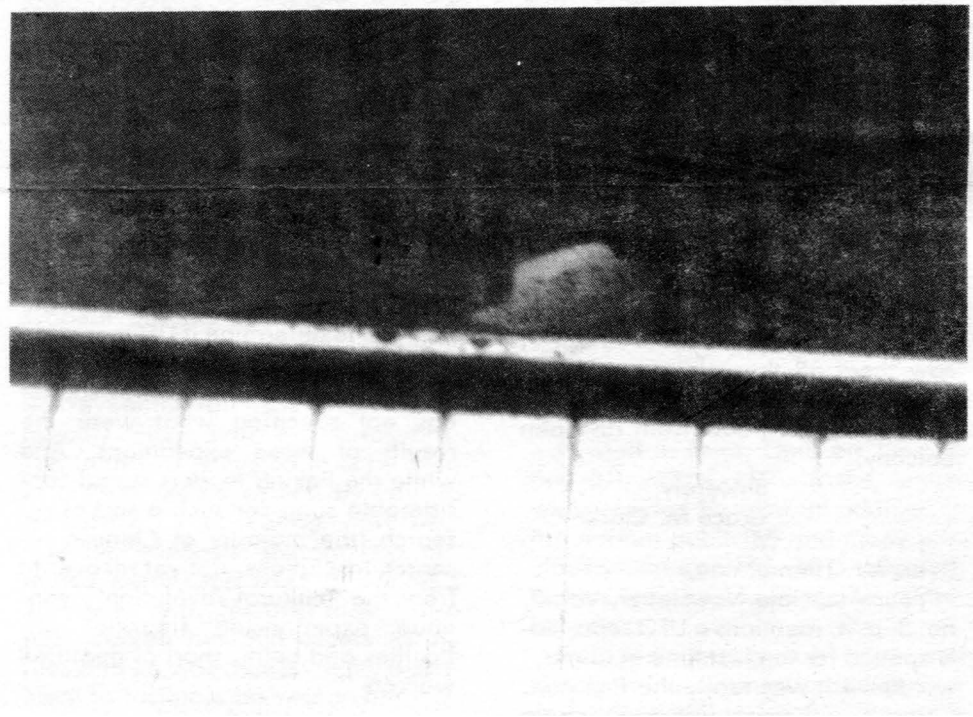
COPYRIGHT 1981 CENTER FOR UFO STUDIES JULY 1981 — VOLUME 2 NUMBER 7

Interesting Newly Discovered Photo From Iran



Northwest of Tehran and the Elburz Mountains, in the land of Azerbaijan and Kurdistan, cattle and sheep graze the higher summer ranges when the dry hot winds wither the lowland grassy areas. Here in these mostly primitive regions tobacco is a major crop, lead and copper are mined and . . . UFOs are seen . . . and, as may be the case in evidence recently received by CUFOS, photographed.

Franklin Abrahim-Youri (1300 Sherwood Dr., Turlock, CA 95380) lived there three years ago with his parents and younger brother. We withhold the name of the town in Iran at the father's request, but other information in this report will be as accurate as possible, at this time.

Franklin was graduating from a high school in the Chicago area this June. He had recently heard of Dr. Hynek's study of UFOs and had contacted Dr. Hynek telling him that he had a picture of a strange object he had seen in the sky three years ago in Iran. Dr. Hynek visited the young man's home, interviewed him and examined the photograph. An enlargement of the object appears on this page. The circumstances of the photography are as follows.

It was a bright, sunny day with deep blue sky above the one-story home. Franklin, age fifteen at the time, and his younger brother were playing soccer in the small backyard surrounded by a garage and two stone walls. Franklin had been studying UFOs since he was 8 or 9 years old, was interested in astronomy and photography, owning a Kodak fixed-focal-length camera and a small telescope, and had spent many hours examining the clear night skies above their home. He was prepared with a better-than-average background to recognize the sight of something very unusual in the sky that morning.

The boys' parents were not at home and Franklin had his camera, loaded with 126 color film, with him in the back yard. Sometime between 10:30 and 11:00 AM, Franklin was facing the back of his home when he glanced up and saw a strange, white object approaching him above the roofline of the house. It stopped, began to move away from him for a moment, then began moving to his left, still visible above the back edge of the house roof. Before it began to move rapidly to his left, Franklin grabbed his camera and was able to take the one picture. He now regrets that he didn't run through the house out into the street in front in an attempt to take another picture of it as it moved out of sight.

However, fear suddenly overcame him and his brother. When his parents returned home shortly thereafter they found the boys hiding in a room of the house. Upon questioning them, the parents learned that they had taken a picture "of a special thing they had seen in the sky . . . and they were afraid because they had a feeling that the thing they photographed would come back and take them." Both boys expressed the same fear to their parents.

The date of the photograph was October 8, 1978. An enlarged color print of the object shows three pink lights in a row, evenly-spaced and on a line which would join the upper and lower sections of the visible profile. A careful examination gives the impression of a two-dimensional image.

Franklin was facing west as he took this photograph and the object was moving from north to south. The duration of the sighting was probably a minute or less.

Interrogation of Franklin and the

(Continued on Pg. 3, Col. 3)

Correspondence

Dear CUFOS:

I received the April CUFOS NEWSLETTER and could hardly believe my eyes when I saw the picture of the 1680 French UFO Jeton! If you removed the top ring with what looks like dots underneath, and left just the bottom portion, you would have the closest description of what I saw in Hollywood, Florida on June 22, 1978, that I have seen . . .

What I saw wasn't just a light . . . since it was very difficult to describe it as "simply a brilliant wine-colored light with a golden glow coming from the center."

I would like to comment on my own UFO experiences. I did not have to go looking for them; they came right to my doorstep . . . the building in which I live. That tells me something about me and about 'them.' I saw them all through a window in front of my desk, except the first sighting which I saw from an open balcony.

Sincerely,
Grace M. Clark

Dear. Mr. Timmerman,

Your Associate Newsletter, vol. 2, no. 3, p. 4, mentions a UFO reportedly spotted for the first time in China. I wonder if it was really the first one. China has its own institute, a whole institute with 300 men on the staff, for studying UFOs, and it is functioning for at least two years, so it is reasonable to think that it has been founded not on the nonentity but has its own UFO sightings. The information about such an institute has been published here by the Soviet newspaper "Sovetskaya Rossiya" ("Soviet Russia", Dec. 9, 1980) and some other local newspapers. I think it would be of a certain interest for your readers to know this information. The report in question runs as follows:

"Who has launched saucers?

The Shanghai newspaper *Wen Hui Pao* has recently reported that the Research Institute for the Study of Unidentified Flying Objects, first in China, has been founded in May this year (1980) in Wuhan (Central China). This institute published its own magazine and has over 300 members of the staff. It has also branches in some large cities of China. Last year (1979) the Institute organized two expeditions with the purpose to determine if UFOs are "an extraordinary astronomical phenomenon." Admittedly the newspaper has not specified what were the results of these expeditions. And while the Peking leaders spend considerable sums for such a sort of research, the majority of Chinese research institutions, not yet recovered from the "cultural revolution", continue experiencing financial difficulties and being short of qualified workers."

V.I. Sanarov
P.O. Box 16
630121 Novosibirsk-121
USSR

Dear Sir:

I will write and tell you what I saw on August 21, 1973. The time was 10 to 12 o'clock PM. I had to get out of bed. Going back to my room, I looked out of my window to the southwest.

I saw a big red object raising up. I stayed to look and all of a sudden there were three round discs, right over the house tops, very big. It covered the whole sky where I was looking.

They were traveling at a high rate of speed.

The next day I drew a picture of what I saw and showed it to my nephew. He is a teacher at Michigan Tech at Houghton. He teaches astronomy. He also has his own observatory, not far from my house on a hill.

I hope you understand me. This is true and I shall draw a picture as I saw them. They were very large discs.

(name withheld)
Atlantic Mine,
Michigan

(Editor comment: The witness said later that she heard on the radio the following day of a woman in Ontonagon, 30 miles west, who had seen the same sight 5 minutes earlier.)

(This letter was sent to the Editor as an example of the interesting correspondence which has developed between a CUFOS ASSOCIATE and the foreign reader with whom she is sharing her CUFOS publications.)

Dear Miss Bankson,

Thank you very much for your kindness . . . in sending the rich material, the pamphlets and magazines about UFOs . . .

You can read . . . how this phenomenon is handled in Communist countries, so you will understand . . . these pictures of UFOs are almost the very first I have seen. I took them to my place of work, the hospital, and everybody was very interested . . .

As you know well, here the role of the press is different from the press in your country. From time to time, we may read about UFO sightings, but those happen almost always in the countries of the West . . . (written as if) "it is a hoax."

The very mentioning in the Hungarian press (of) UFOs began about six years ago, when the official youth magazine began a series of articles on the theme (of UFOs) . . . Now we can often read about sightings in the West . . . I was witness to two UFOs in past years, one which was seen by more than a thousand people, as well, but not a word was ever published in our press about these cases.

About myself and family, my wife works now as operational assistant in surgery. We have two daughters, 12 and 5 years old. We live in a flat, with two and a half rooms, which is

very large by Hungarian standards for a doctor . . .

(Since I cannot send you money) I want to send items from my country for friendship and as thanks for your help. Let me know more about yourself . . .

I thank you again for your kindness.

Yours truly,
Dr. (name withheld)
Pecs, Hungary

(Editor Comment: If additional ASSOCIATES would be willing to share and correspond with other foreign UFO-interested persons who are not able to send funds out of their country, CUFOS will attempt to establish that contact for them through our many foreign mail requests.)

Dear John:

Raymond E. Fowler's guest editorial in your June, 1981, issue recalls the valuable contributions made to the UFO Movement by the late Dr. James E. McDonald on the 10th anniversary of his tragic suicide. Although McDonald and I disagreed sharply about UFOs, I very much admired his energy and candor, if not always his modus operandi.

It is unfortunate that Fowler makes a charge against me that simply is not true — that I "falsely told columnist Jack Anderson that Jim had illegitimately used funds from a U.S. Navy grant to study UFOs." As of the date the column was published, Sept. 14, 1968, *I had never talked with or corresponded with Anderson*.

The previous December I had become suspicious that McDonald was using tax funds authorized for cloud physics studies to finance his trip to Australia and New Zealand to investigate UFOs, and to fund many of his other UFO travels. Briefly stated, my query to the Office of Naval Research resulted in confirmation of my suspicions with the assurance of an ONR spokesman that the situation would be corrected. On this basis, I decided *not* to publish an embarrassing item in my own magazine, which could have "scooped" Anderson by nine months.

I suspect that the Anderson column item was inspired by a statement that McDonald himself made to a United Press International reporter in Washington when McDonald testified at a one-day Congressional UFO Symposium, sponsored by Rep. J. Edward Roush. Following the symposium, on July 29, 1968, UPI distributed its account of the affair which discussed McDonald's views and quoted him as saying "he had spent the last two years studying UFOs under a grant from the U.S. Office of Naval Research, spending several months in Australia, New Zealand and Tasmania tracking down sightings." Surely Anderson would have known that the USAF was responsible for all UFO research and the reference to Navy-sponsored UFO research might easily attract his keen journalistic eye.

Fowler goes on to say: "A painful scandal ensued even though Navy auditors ultimately found Jim innocent." That statement is true but does not reveal the full facts which subsequently vindicated my suspicions. The truth was revealed in early 1976 in a Ph.D. thesis written by Paul E. McCarthy. The young, pro-UFO oriented graduate student had obtained permission from McDonald's widow to study his UFO files. I also had granted him full access to my files and he was a guest in my apartment to facilitate his research.

(Due to space limitations, the balance of this letter from Philip J. Klass will appear in the August issue. Ed.) □

"UFO Lands In Taiwan"

(Clipping sent to us by ASSOCIATE Johannes Koch in Hong Kong)

Taipei, June 13, 1981

A farmer and his wife claim to have seen an unidentified flying object, full of twinkling lights, land in a field in southern Taiwan yesterday, police said today.

Farmer Chen Kang (52) said he and his wife were on their way to cut weeds when they heard a strange sound overhead.

Looking up, they saw a crystal object shaped like a reversed cone gliding down. It was about one metre in diameter and full of blinking lights, Mr. Chen told the police.

The UFO slowly landed behind a tree and continued whirling like a child's top while ejecting a gossamer-like fog, he said.

It flew off after about 10 minutes without leaving any trace behind, he said, adding that it first flew north before changing its course south and disappearing very rapidly.

Two days earlier, residents in northern Taiwan reported 15 bright spots hovering in the western sky towards evening.

The Taipei Observatory and the Central Weather Bureau have not yet explained the phenomenon.

. . . Reuter.

UFO Photo Exhibit Shown In Ohio

The CUFOS UFO PHOTOGRAPHY EXHIBIT was on display at the American Mall in Lima, Ohio on June 20 and 21. ASSOCIATES in the region were notified by mail, in addition to the normal publicity, and many previously unreported UFO sighting reports were recorded by the exhibit attendant.

Included among the hour and twenty minutes of recorded reports was one possible brief CEIII and a probable CEI. Books and special publications from the Evanston office were sold, as well.

If you can arrange with a local Mall Marketing Manager to engage the CUFOS UFO PHOTOGRAPHY EXHIBIT in your area, contact CUFOS at P.O. Box 1621, Lima, OH 45802 for additional information. □

(Continued from Pg. 1, Col. 3)

father gave no indication that this is anything but a truthful account and a real photograph of an unidentified flying object.

Readers who wish to purchase a first-generation color slide of the original negative from which this enlargement was made should send $2.50 (U.S., Canada and Mexico) or $3.00 (airmail to all other countries) in U.S. dollars. Send orders to P.O. Box 1402, Evanston, Illinois 60204.

CUFOS will appreciate information regarding similarly-shaped object photography in the files of any other individual or research organization. □

Recent Sighting Report From Raymond Fowler

"Several evenings ago I received a call from the FAA indicating that they had received a report from a pilot with three passengers flying west to east. Their position was approximately 5,700 feet over Madison, Connecticut. Both the pilot and the person at his side saw the object approaching. They thought it was a weather balloon.

"It was still daylight and, as the object came closer, it appeared to be made of stainless steel. One witness described it as a flattened oval. The witness who saw it closest as it went right by his side described it as looking like a "stainless steel wheel with a stationary hub and a rim which was rotating."

"As soon as they saw it was not a weather balloon they turned the plane around the attempted to chase it. (The plane and the object were moving in opposite directions to begin the sighting.) The pilot said it diminished (into the distance) very, very fast from a large dark object, now, because the sun was no longer reflecting from its surface. The other two passengers were asleep in the back and it happened so fast that they couldn't be awakened in time to see it.

"They thought it definitely was not a weather balloon, not only because of its appearance but because they couldn't catch it. They were going a little bit over 150 miles per hour at the time trying to catch it and the object was going at least two or three times the speed of the aircraft.

"They immediately radioed the FAA to report it. The FAA then painted them on radar but, by the time the attempt was made, the object was gone. As far as I (Fowler) know, talking to the controller at air traffic control, no one saw the object on radar.

"Questionnaires have been sent to the witnesses to follow up on the telephone interviews and as soon as a report is completed a copy will be sent to CUFOS." (Date of *this* report: June 22, 1981)

Raymond E. Fowler is Director of Investigations for MUFON. □

Scientific Board Appointment

Dr. Hynek has announced that John F. Schuessler has accepted appointment to the Scientific Board of the Center for UFO Studies.

Active in the UFO field since 1965, Mr. Schuessler is employed by McDonnell Douglas Technical Services Company as Space Shuttle Project Manager for Flight Operations at the Johnson Space Center in Houston, Texas.

A member of the American Institute of Aeronautics and Astronautics, among other affiliations, his work with the UFO field includes serving as Deputy Director for Administration for MUFON, President of VISIT (the Houston organization), a founding member of the UFO Study Group of St. Louis and a Staff Member of MUFON UFO JOURNAL.

In addition to investigating, analyzing and reporting on UFO incidents, Mr. Schuessler lectures extensively on the subject. He may be reached at P.O. Box 58485, Houston, TX 77058. □

Reminder Of September CUFOS Research Conference

Some of our readers may have overlooked the announcements in previous issues regarding the CUFOS UFO RESEARCH CONFERENCE scheduled for Friday, Saturday and Sunday, September 25th through 27th at the Midland Hotel in Chicago's Loop, at 172 W. Adams St., one block from the Sears Tower.

The registration fee is $35.00, including admission to all sessions, abstracts of papers and coffee breaks. Make checks payable to CUFOS and send with name, address and telephone number to P.O. Box 1402, Evanston, IL 60204. No partial registrations will be offered. Room registration, meals and other costs are in addition to the registration fee and will not be planned by CUFOS.

Questions regarding the conference may be directed to Mark Rodeghier at the CUFOS Evanston office. □

There's More To Read

You may be reading only one of the *four* periodicals available from the CENTER FOR UFO STUDIES.

This NEWSLETTER (monthly) and the CUFOS BULLETIN (quarterly) are available only to contributing ASSOCIATES of CUFOS who donate $15.00, $30.00 or more per year.

We also publish two other very interesting items which are free to larger contributors, but may be subscribed to or purchased separately by ASSOCIATES or others.

FRONTIERS OF SCIENCE, a bimonthly magazine including INTERNATIONAL UFO REPORTER (edited by Dr. J. Allen Hynek), is published and mailed from 8 E Street, SE, Washington, DC 20003 for an annual subscription fee of $15.00. Residents of Canada add $3.00, all other foreign countries add $5 surface, $15 airmail (U.S. funds).

JOURNAL OF UFO STUDIES, a semi-annual technical publication written for the scholarly reader, is a collection of refereed papers by highly-qualified specialists with expertise in various aspects of the UFO phenomena. It is sold on a single issue basis from our Evanston office (see page 1) for $7.50 ppd (everywhere) or add $3.00 (U.S. funds) foreign airmail.

A list of all Center and other stock publications available from our Evanston office will be mailed free upon request (surface mail to foreign or send $1.00 for airmail). □

We announce with regret the death of Barbara Mathey, a member of the National Board of the Center.

Barbara became interested in UFOs while living in Prais through Aimé Michel and Jacques Vallée. When her husband, Norbert Mathey, retired from his engineering job in France, they moved to southern California where Barbara took an active part in a local UFO study group as well as in MUFON and in CUFOS.

Her interest and kindness will be very much missed. □

The UFO Phenomenon: Laugh, Laugh, Study, Study

The above heading is the title of a very interesting article by Dr. J. Allen Hynek which appears in the July issue of *TECHNOLOGY REVIEW*, edited at the Massachusetts Institute of Technology. It was written at the request of the publication's Editors and we believe it is the first time such an article has appeared in the Institute's highly respected technical monthly journal.

Because of its length, it will not be reprinted in the CUFOS ASSOCIATE NEWSLETTER or the CUFOS BULLETIN. However, those not on the mailing list of the TECHNOLOGY REVIEW may order a copy of the entire magazine for $3.00 United States delivery or $4.00 foreign from: TECHNOLOGY REVIEW, Room 10-140, Massachusetts Institute of Technology, Cambridge, Massachusetts, 02139, U.S.A.

Reprints of the Hynek article only are available for $1.50 U.S. delivery or $2.00 foreign from: CUFOS, P.O. Box 1402, Evanston, IL 60204, U.S.A. □

Correspondence cont'd

From ASSOCIATE Ted Bloecher we have received an excerpt from the July 25, 1957 CIVILIAN SAUCER INTELLIGENCE NEWSLETTER, Issue No. 8, of which Mr. Bloecher is past-editor: "Saucer" on Seventeenth-Century Coin? What is a flying saucer doing on a copper jeton of Louis XIV, struck in 1656? Rev. Albert Baller sent us a color photograph of this perplexing object. It certainly shows a large discoidal object flying in the clouds; it looks much like the underside of a mushroom, but has bosses (or portholes?) around the edge. The legend: "Opportunus Adest" (Opportunity Knocks). We strongly doubt that this is intended to commemorate a 17th century "contact," but no one has been able to guess what it does signify. (Before getting too excited about this, it should be noted that jetons of this period are known for the profussion and obscurity of their allegorical motifs: cf. Feuardent, *Jetons et Mereaux* #12529.) □

UFOCAT Offer Below ½ Price

(Second Edition)

UFOCAT is a computerized catalog of UFO reports designed and begun by David R. Saunders in 1969 and donated to the Center for UFO Studies in 1975. While no list of UFO reports can be "complete," the 62,000 reports in UFOCAT make it the largest list known to us.

The cost of producing a custom printout, typically $50 to $150, too often is beyond the reach of the individual researcher. In an effort to make UFOCAT content more readily available, we are expanding on the original offer announced in this publication (March 1981) by adding other printout subjects. Prices are postpaid in the U.S.; overseas airmail add 20%.

These are mostly second copies of chronological UFOCAT catalogs produced for various research projects. Since we have only one copy of most of these catalogs, this offer must be made on a first-come first-served basis. Some have editing marks which do not affect readibility. Others have unpublished witness' names hand-deleted. Content does not vary significantly from an equivalent run made today. Due to the delays in reporting, investigating and adding cases to the file, there are relatively few reports dated later than 1978. A copy of the UFOCAT CODEBOOK is necessary to interpret the notations about cases.

SPECIAL FEATURE CATALOGS (world-wide, all years)

Item	Description	Cases	Price
30	Photographs of discs	254	$15
31	Photographs of UFOs, traces and artifacts	1,674	$20
32	Electromagnetic effects	1,246	$20
33	Reports in Proximity to electrical equipment	342	$15
20	Animals and UFOs (UFOCAT subtype M) Close encounters with animals present	645	$20
22	CEIII working list (UFOCAT types 50, 60, 7, 8, 9). Over 2,000 CEIII reports, plus other high-strangeness cases.	3,166	$30

CATALOGS BY YEAR (worldwide)

17	1947 and 1948	1,889	$20

Recent Close Encounter With UFO In Ohio

Because of his position of responsibility in his employment, this witness requests that he not be identified. Careful examination of the witness raised no question about the truthfulness of the report.

On the morning of May 20, 1981 at about 1:30 AM, the 30-year-old supervisor was driving to his home in a small community south of Lima. As he passed a steakhouse going South on Shawnee Road, he noticed a number of lights on the left (East) side of the road about ¾ mile ahead. When he had just passed a small church, he saw the object hovering about 50 to 75 yards away and 75 to 100 feet in the air. It was not moving. He heard no sound, even after stopping his car and lowering his driver-door window.

He observed the object for a maximum of 3 minutes sitting in his car, very interested in what he was seeing and trying to make out details. He reports a glowing area (not individual lights) around the outer edge (see sketch by witness) near the bottom. The color of this light was similar to lavender and the light pulsed somewhat brighter every 5 to 7 seconds. There was a dim white light radiating from the center two-thirds of the bottom flat surface of the object. The low dome at the top was dark. He later determined that it must have been over 25 feet in diameter.

The object then began to move in a northeasterly direction toward an industrial complex south of the city, making it possible to get a better view of its shape silhouetted against the glow in the sky. As it began to move, the pulsing lights peaked somewhat brighter.

His curiosity thoroughly aroused, he turned his car around the attempted to follow the object, but it began to accelerate and he quickly decided that he could not keep up with it. The witness stopped and turned southward again in the steakhouse parking lot and proceeded homeward.

However, just beyond where he had first seen the object, he caught a glimpse of something overtaking him from the left. The object (or one just like it) had reversed direction and was moving parallel to the road at his speed and about 100 yards to his left.

His curiosity now turned to fright. Accelerating his car well beyond the posted speed limit, the witness was unable to move away from the object until, as if someone had "kicked in the super-charger," it accelerated very rapidly to the south then veered to the southwest, disappearing into the distance in seconds. □

Radio Public Service Announcement For July

"Three planets out from our local star, called the Sun, very interesting things have been reported happening in the sky and near the surface of this planet, called Earth. Besides man-made aircraft, lenticular clouds, ball lightning, bright planets and slow meteors, very credible observers have been reporting, for many years, incredible other sightings.

First the United States Air Force and now the whole world is referring to them as unidentified flying objects and many persons have begun to take these UFOs quite seriously. The not-for-profit CENTER FOR UFO STUDIES, located in Evanston, Illinois, hopes that if you have experienced such a sighting, you will have the wisdom and courage to report it for study. Scientific analysis is needed to solve this most intriguing mystery of our time. Dr. J. Allen Hynek, Scientific Director of the Center, wants you to inform yourself and carefully report all unidentified flying objects to the CENTER FOR UFO STUDIES, Box 1402, Evanston, Illinois 60204."

Tape recordings of this and other PSAs of different lengths are available and ready for broadcast by writing to: CUFOS, P.O. Box 1621, Lima, OH 45802. □
