Dear, Allen Hyneck

I, really enjoyed your show Sunday night or I, should say Monday morning on radio station, W.D.A.I. radio F.M. Chicago Illinois. on the show you were discussing the many documented and undocumented cases on record of reported U.F.O. sighting's in the United States of America, I, tried to call your show but the line was busy so I, desided to write you instead, I, really don't know how to began but it brings to memory the experience I, hadin the fall of 1956 September 8 to be exact.

it was in the morning of that day about 4.00A.M. When my Uncle and a good friend of his and myself wen't fishing on a Govt. pier on the shores of lake Michigan Indiana, the pier belongs to U.S. Steel CO. and is located in the pine beach area of Gary Indiana.

there were quiet a number of people fishing that morning, we moved down to the furthist end of the pier near some slag piles, I was baiting my hook when I, noticed these 4, object's in the sky over my left shoulder at the time the weather was perfect there was hardly any wind blowing there wasen't a cloud in the sky and the star's shone brightly the objects which I shall describe as disk shaped moved in single file order from East to WEst direction they stoped abruptly and the leed vehicle tilted forward in about a fourty five degree angle as if to get a better look at a slag train that had just finished dumping it's load of slag, and was returning to the mill's.

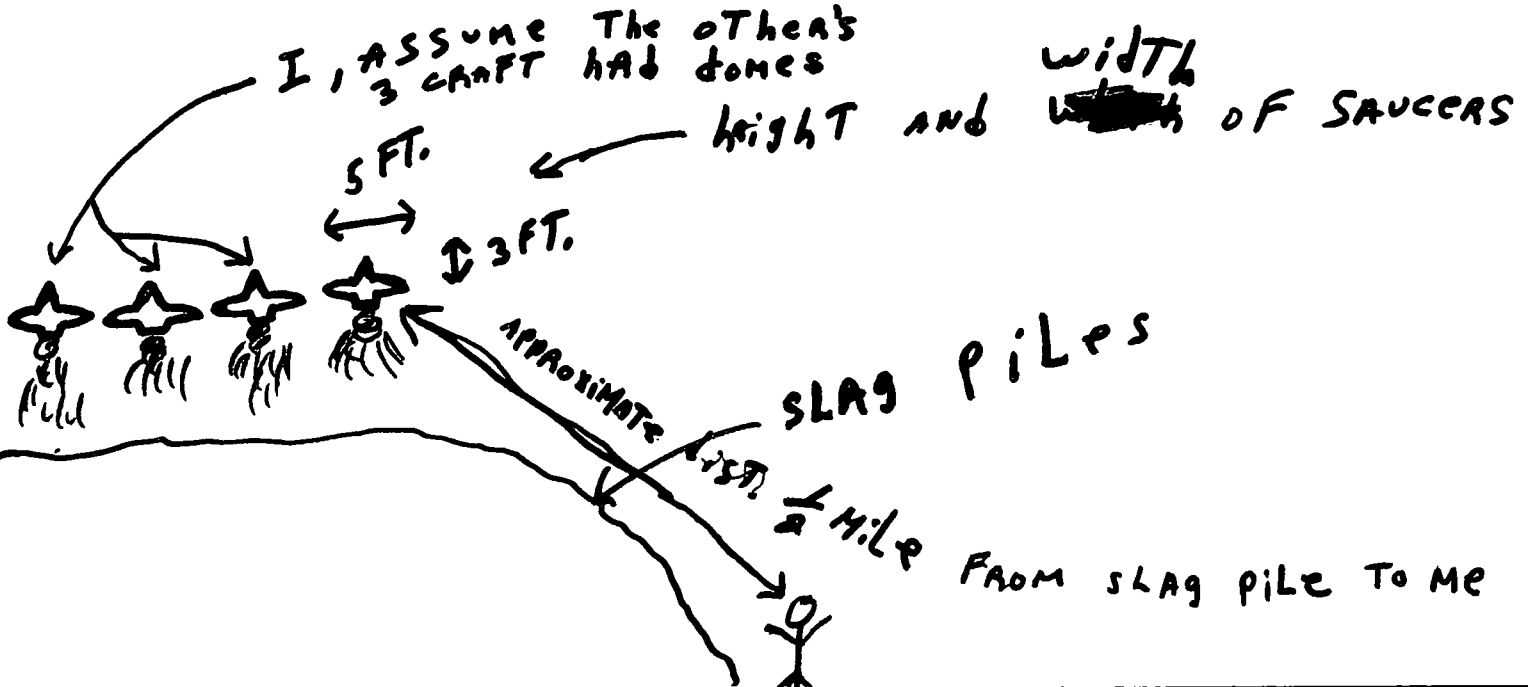

all the vehicle's appeared to be wobbling as they hovered in the air I, could see clearly the leed ship's steeple shaped dome, sillouted against the sky it looked bñackish, all the vehicles were spinning clock wise and as they spun showers of sparkes dropped from the bottoms of each vehicle the sperks looked simular to that of a pyrothecnic device called a cathrine wheel.

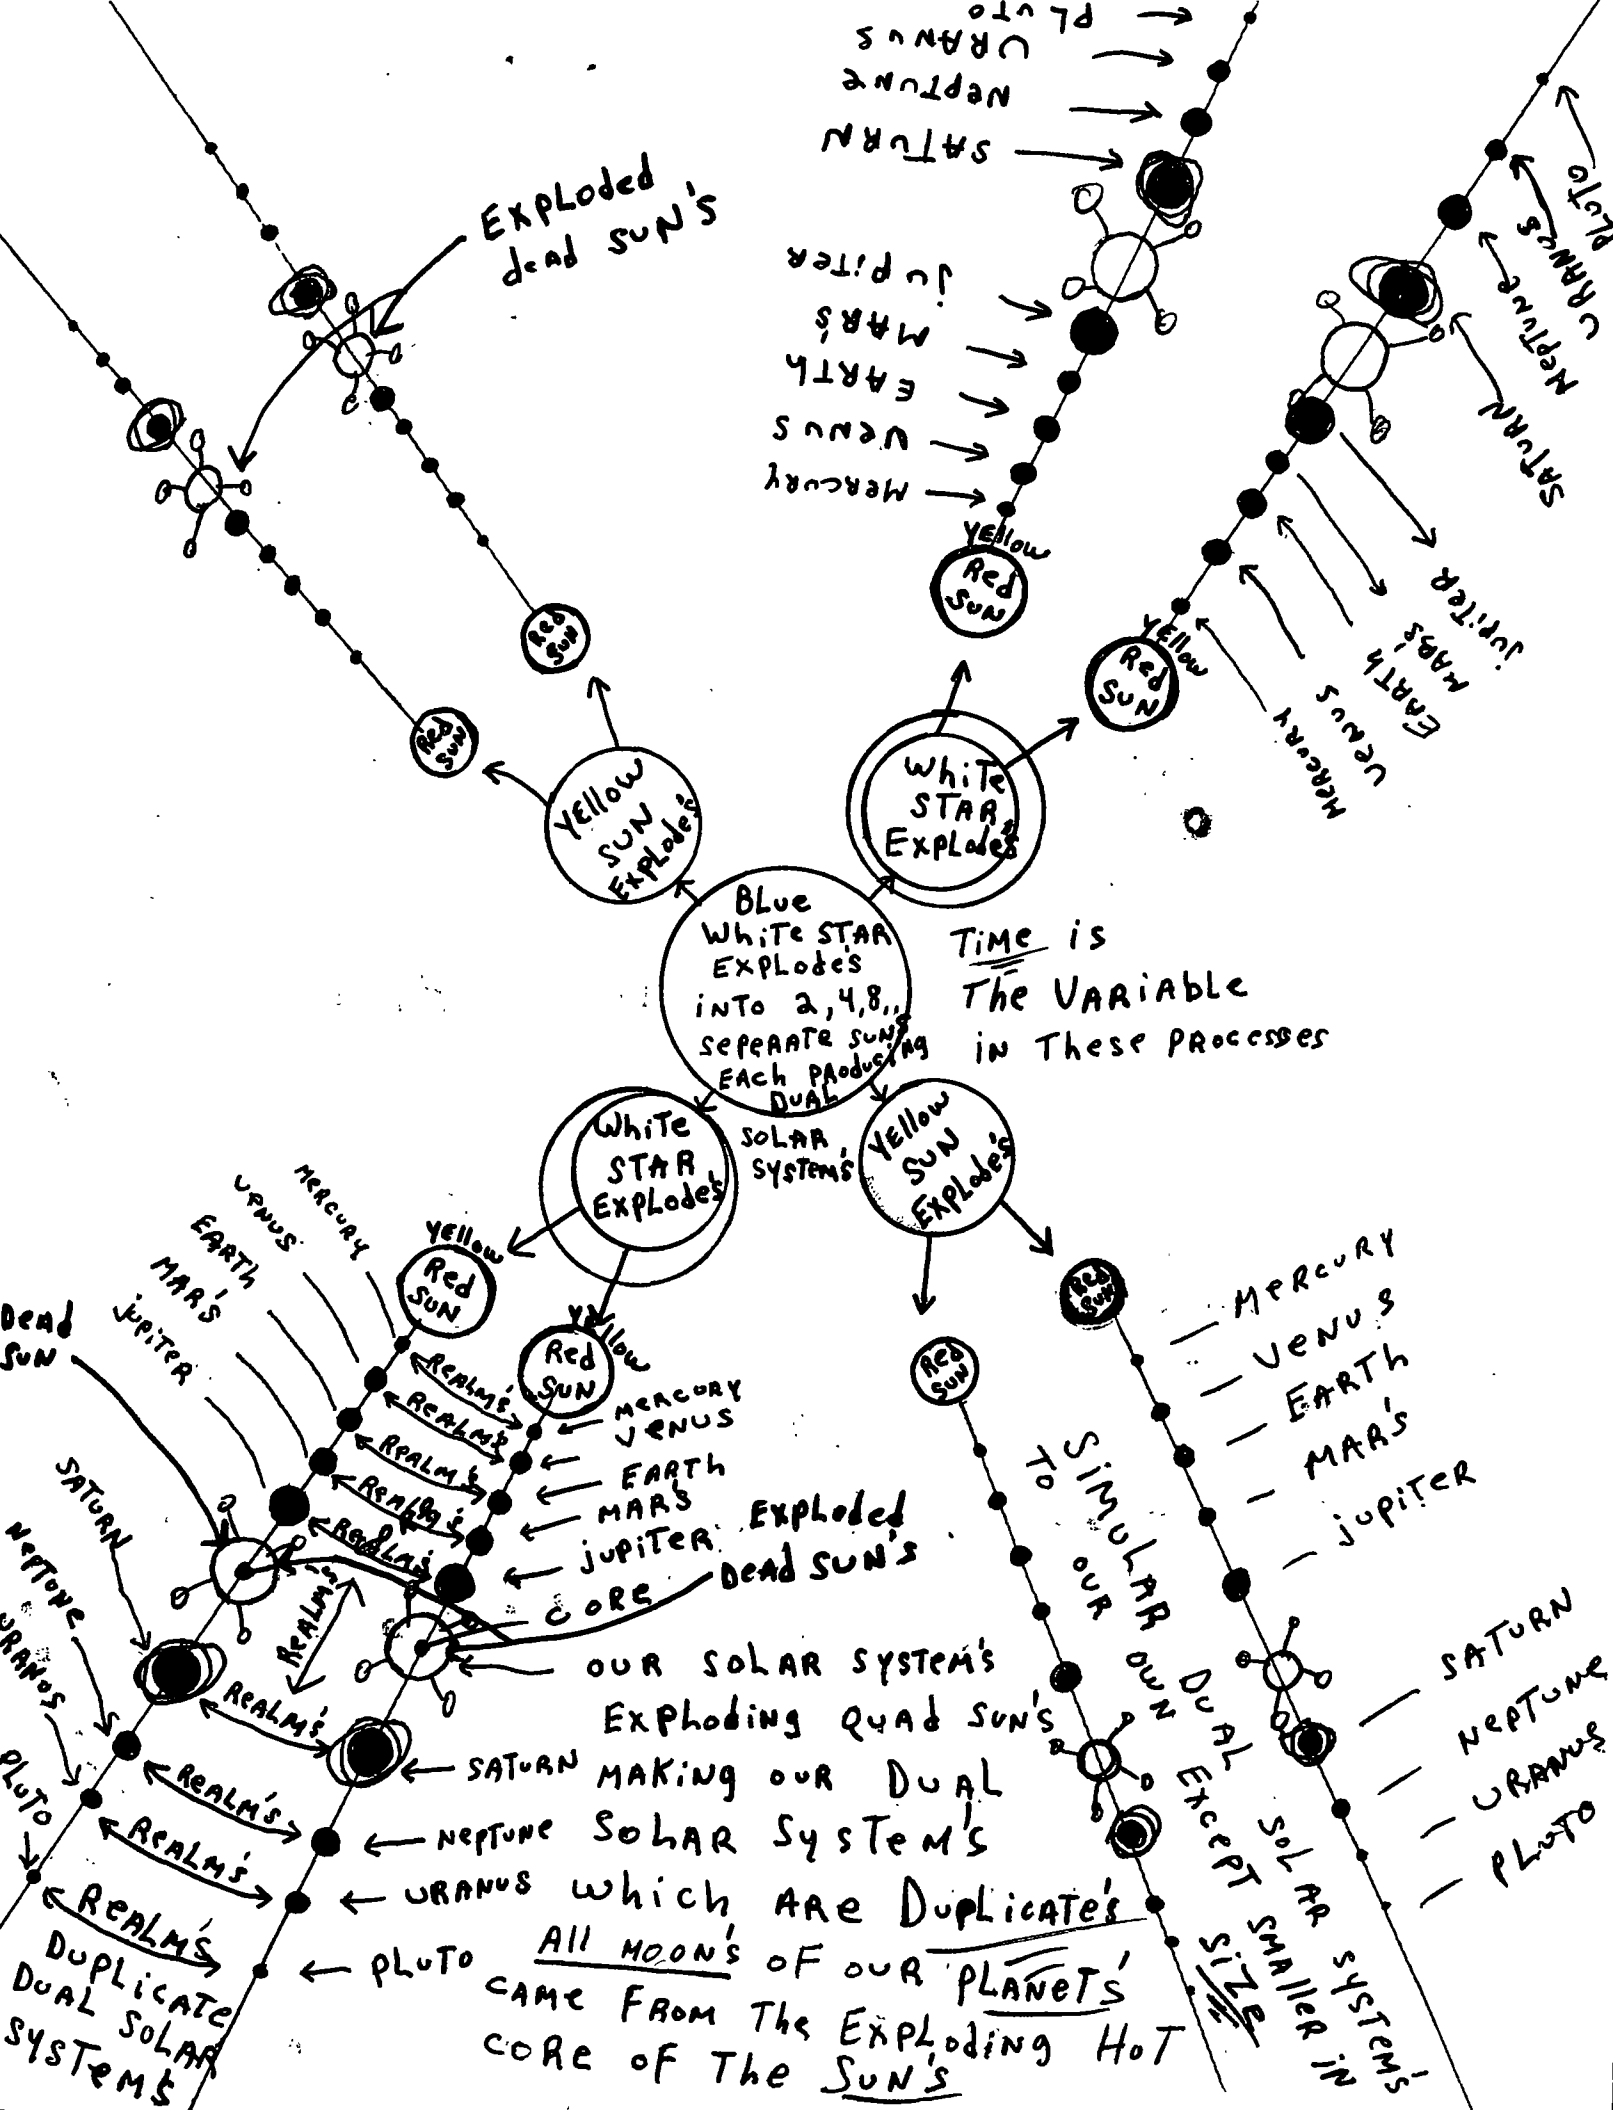

the leed vehicle tilted level again, and all 4 vehicles darted forward about 1000 ft. and stopped momentarily again, then all 4 vehicles took off suddenly again in about a 45 to 60 degree angle straight up and disàpered.

the hole insident from the time we first caught sight of these vehicles to the moment they dissàpered in the early dawn sky, was approximely 2Minutes I, may add that i have seen many planes at night both jet and propller driven and as you know the lights of these vheciles, Deminishes gradually but these four vehicles dissàpered as if a light were turned out.

P.S. I, am also enclosing a sketch of what I saw.
