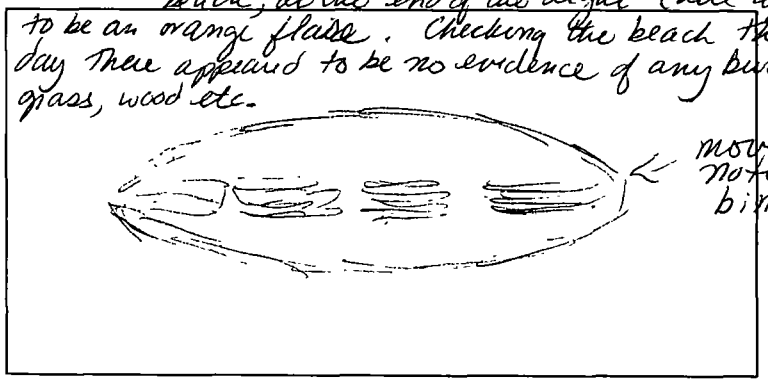
HOW TO REPORT A UFO!

HAVE YOU HAD A UFO EXPERIENCE?

Fifteen million Americans think they have, according to the Gallup Poll in 1973. Indeed, the Center for UFO Studies receives word of new sightings at the rate of three to four every day. Here is a convenient form to keep in your car's glove compartment in case you have to report a sighting.

IMPORTANT: WAS THE OBJECT SEEN WITHIN 500 FEET (CLOSE ENCOUNTER OF THE FIRST KIND)? ( ) DID IT AFFECT THE ENVIRONMENT OR LEAVE EVIDENCE OF ITS PRESENCE (SECOND KIND)? ( ) DID YOU SEE "OCCUPANTS" WITHIN, OR NEAR, THE OBJECT (THIRD KIND)? ( )

APPEARANCE My mothers house is on the beach. The sighting was over the ocean. It shot three white light beams across the beach, at the end of the light there appeared to be an orange flaise. Checking the beach the next day there appeared to be no evidence of any burned grass, wood etc.



DRAW A SKETCH: Name different features. Could you see the outline distinctly? yes

SIZE: Did it look as large as a:

( ) star? ( ) distant plane? (X) full moon? ( ) bigger?

COLOR (S): white to orange lights

SOUND: none

LIGHT: (X) Self-Luminous ( ) Reflection

BRIGHTNESS: ( ) Star ( ) Aircraft light ( ) Flare ( ) Blinding

Did it leave a trail? ( ) Yes (X) No

DETACH HERE

MOTION

The object was first seen:

DIRECTION: ( ) North ( ) South ( ) East (X) West

HEIGHT: ( ) Near horizon (X) Halfway up ( ) Overhead

The object was last seen:

DIRECTION: ( ) North ( ) South ( ) East (X) West

HEIGHT: ( ) Near Horizon (X) Halfway up ( ) Overhead

How did you lose sight of the object:

( ) Fade in distance? (X) Extinguish ~~suddenly~~? slowly

( ) Lost behind trees, buildings? ( ) Over horizon?

( ) Unwitnessed by you?

How long did you watch it? 1/2 hours, _____ minutes, _____ seconds

Describe how it moved (Stationary? Faster than aircraft? Straight path? Did it pass in front of or behind anything? Indicate direction changes, if any, and durations): Darted — appeared then reappeared ~~in the~~ somewhat higher or lower. Its light sound brightend then would get dimmer.

ENVIRONMENT

DATE: Feb 1967 TIME: Approx 11 pm

YOUR LOCATION AT THE TIME: Seaside Oregon

WEATHER: (X) Clear Sky? ( ) Broken clouds? ( ) Overcast? ( ) Windy?

( ) Raining/Snowing?

SEEN AT THE SAME TIME: ( )Airplanes ( ) Helicopter ( ) Stars ( ) Moon

( ) Other: Dont remember

WITNESS

NAME MARGO 9 PHONE _____

CITY Portland STATE Oregon ZIP 97202

HOW MANY OTHERS SAW IT: my mother, my boyfriend now my husband

YOUR AGE (WHEN UFO SEEN): 17

WAS THE UFO (X) SEEN WITH BINOCULARS? ( ) PHOTOGRAPHED?

( ) SEEN ON RADAR AT THE SAME TIME?

If you wish to report this sighting in total confidence, or wish further information on UFOs via our monthly newsletter available by subscription, write to the

Dear Dr.Hynek

I believe I have had two Encounters of the First kind. My first was in Feb.1967 on a clear Moonless night when I saw a object a little brighter than the planet Venus in the sky .It wasn't moving at the time but,a minute later it started to move and as it did it got dimmer. When I was looking straight up at it,it was around a thousand feet up it stopped moving and as if it was a light bulb connected to a dimmer switch it got dimmer & Dimmer until it was gone .

It did not come down but it looked like it went straight up. I couldn't make any shape out of the object other than at first it was bright and than once it moved the Brightness came down to the intensity of a star in Orion's belt.

My Second sighting was in 1975 while watching a meteor shower my Aunt & I saw two stars close together start to move along the Horizon.The stars were dim and no shape could be made out.

I am a Member of N.I.C.A.P. and through them have learned the different shapes of U.F.O.'s .I also have many aircraft books and know planes when I see or hear them.My Aunt &I know we saw Nothing of this Planet, My Aunt also has a friend who saw one in the early Morning hours.She said it was Silver with a blue light on top. At first it was just hanging there, than it moved away. She said it was Eggshaped or Oval .

I hope I've been helpful in discribing these sightings.

Yours Truly

Frank

From: Charles

Farmers Brand, Texas 75234

I

Dear Sir;

Yesterday morning, over coffee, I recounted an UFO experience that I had, (along with others who were present at the time), to my stepfather. I have told various members of my family the experience and have been scoffed at, laughed at, and been met with a sort of spectrum of responses, ranging to half-hearted belief. My sighting occurred in either June or May, 1967 - Almost eleven (11) years ago, and I still can't rationalize away what I saw. To this day I have no idea as to whether what I saw was man-made, extra-terrestial, or whatever. I've even thought that somehow, without my knowledge it is possible that: (1) I was the unknowing subject of a hypnotic trance; (2) or, was the victim of some kind of physiological experiment. I simply don't know. I do know that my mind has been unable, for the past eleven years, to reject what my eyes saw that night. Because of the talk I had with my father yesterday, he happened to see your book at a local motel and brought it home for me to read as he thought I might enjoy reading it because of my own experience. (The UFO experience, a scientific enquiry) As I'm writing this letter I've only read up to page (58) fifty-eight in your book, to the page where you give your address for reporting UFO's. I'll have to admit that I've a definite need to be believed; but, irregardless, I know that I saw what I did that night. So, here goes: In June or May, 1967 (I believe May) I was attending college at East Texas State University which is located between Greenville, Texas and Sulph[illegible] Texas. I was living off-campus in one of many old houses that Springs)

(over)

border the University. Several other students lived in the same house with me, and we were playing cards (poker) when one of the guys came running inside and said "Hurry up! Come outside there's a flying saucer outside", we had our doubts about the individual seemed so emphatic and sincere we all went outside, quitting our poker game in the process. The time was probably between 9 p.m. to 12 midnight though I can't remember for sure. Several of us looked up to the sky, and I wasn't alone when I saw a sphere shaped like an elongated egg (the impression was that it was more flat that round) it was quite large and I would guess it to be several hundred feet long, perhaps as long as a football field. The object made no sound and had a greenish cast to it not unlike the light on a clock dial in the dark, only not as bright as when you first turn off the lights in a room, (the dial on the clock is brightest when you turn off a light (immediately after) The sphere seemed to pulsate, the dim green light growing dimmer and then brighter, in fact it blended in with the night sky rather well. The sphere remained motionless overhead for perhaps thirty (30) full seconds, Then slowly it started moving up and away, (a second or two) rapidly accelerating very fast. As it went up and away it began glowing bright yellow we followed it until it appeared in the sky about the same size as all the other stars, but not as bright, then it stopped and remained motionless for maybe a ten (10) seconds, then it started to move across the night sky from my right to my left, I'd say this movement compared to a jetliner's speed was twice and it seemed to be traveling in a straight line parallel to the visible horizon, this horizontal direction lasted for approx. ten (10) seconds and then it appeared motionless for a few seconds looking for all the world just like another star and quite honestly if I had not been observing it from the onset I wouldn't have been able to tell the difference, then it reversed direction and at a fantastic speed went from my left to my right on the horizon, it only took 1 or 2 seconds to accomplish this, then it came back toward us in an erratic flight

at ~~an~~ great speed, and jumping up and down, back and forth in a zig-zag pattern glowing ever brighter with an orange-yellow light which turned a orange-dull red color growing to the size of a pencil eraser (in the sky), and then it blew-up! A piece of it fell burning toward earth but extinguished itself while still falling, consuming itself in flames. We just stood there, I for one not quite believing what I had just seen. Incidently, there was no sound when it exploded or if there was one I did not hear ~~it~~. My first reaction was shock and disbelief and an inclination to report it to someone. Figuring that I would hear something on radio or television about it the next day, and thinking about possible ridicule I did not report what I had seen. And as God is my witness, this is the first time that I've written what I saw that night on paper. Truthfully, this is the first time that I knew who to write too. One of the reasons that I thought that I would hear something about it the next day is the news is the fact that L T V. (Ling Temco & Vought) had an airplane modification and repair facility located just twenty (20) miles away at Majors Field near Greenville, Texas. I just felt they would have to have seen it on their radar, as it was in that direction (from Commerce) that I observed the sphere (flying saucer?) maneuvering. One interesting thing that I read in local papers shortly thereafter (maybe a few days or a week or two later) was that some students had been filling balloons with gas and setting fire to fuses or rags and the balloons would rise and explode. It struck ~~me~~ me as coincidental that such a thing was reported in the papers, there is no way no the possibility that what I saw was a gas filled balloon. Also, curious is the fact that now the L. T. V. site is a radar

tracking installation. Two other people who were there was Jon Sanchez, and Shawn Rattey, who now lives in Lubbock, Texas and with whom I'm still acquainted. I don't remember who else was there, but there were others. I hope that you can read this her scratch as I write very little. Thank you for your indulgence.

Sincerely,
Charles

Farmers Branch, Texas
75234

P.S. There is no possibility that this was a meteor, as I have seen three of these personally. I saw a meteor that turned the sky red (1st) pass overhead, or so it seemed, in either 1956, 1957, or 1958; (2nd) meteor was a fireball with three smaller fireballs trailing behind it, I was with Jackie of Mt. Vernon, Texas when we saw the fireballs in 1967 or 1968 and this can be verified, it was around 2-4 o'clock a.m. - (3rd) meteor I saw several months back (maybe November ?) while camping with friend Arthur of South Carolina. All three meteor sightings were with other people and can be verified, and all occurred in Franklin County, Texas (100 miles east of Dallas, Texas). I know the difference between a meteorite and a U.F.O. Any further questions that you have, that I might be able to help you with, will be answered if possible.

Dr. J. Allen Hynek
Center for U.F.O. Studies
924 Chicago Avenue
Evanston, Illinois 60202

Dr. Hynek:

This past Friday evening I attended the lecture you presented at Michigan State University. I found your talk highly informative and stimulating.

At that time you asked the members of the audience who felt they had experienced a U.F.O. to raise their hands, I was one of those. However rather than try to put all the information on the cards provided I decided to write a more detailed account.

The sighting took place sometime in early June of 1967 and invloved a close friend of mine, Howard Galloway his mother, his sister Katie and his younger brother Mike, as well as myself. At the time both Howard and I were seventeen years of age and were students at Owosso High School. After the sighting we considered who it should be reported to and decided to call local police rather than attempt to notify the Air Force. We remembered the notorious "Swamp Gas"incident and decided our report would not have been taken seriously if we had reported it to Air Force. After nothing was forthcoming in the local newspapers of the next few days, we filed away the personal notes we'd written and let the matter rest. It is only because of the creation of your organization which seems willing to treat U.F.O reports objectivly that I have decided to send you an account of our sighting. Regrettably our original notes have been misplaced or lost so I can write this only from memory, however I hope it will be of some value to your study.

I would also be interested in obtaining more information about the center. If you have information you can send me it would be appreciated.

Yours truly,
Michael
Michael

We were returning to Owosso, Michigan from a trip to Lansing, Michigan. While driving north on highway M-52 (about fifteen miles east of Lansing) Mrs. Galloway noticed an odd light moving from the western horizon toward the east. She pulled the car to the shoulder of the road and we all got out in time to observe the object as it passed overhead. It appeared circular in form and would have been about the size of a dime held at arms length. It was red in color and pulsated or throbbed (it was not blinking or flashing , I remember this quite clearly). The time was about nine thirty in the evening and the sky was clear. As the object passed overhead there was no sound audible that we could attribute to it. I might also add that there was hardly any passing traffic to interfere with any sound that might have been heard. As the object approached the eastern horizon it appeared to stop. At this time a smaller object looking like a bright star came up from the south and seemed to go into the larger red object and then they seemed to have disappeared. I should also say that the time it took the red object to go from horizon to horizon was relativly short, seemingly the speed of a jet or perhaps faster .

The above text is what I personally witnessed. Howard claims he later called the local police in Owosso to inquire if other reports had been made. They reputedly told him that it had been reported by several people in the surrounding counties and that Capitol City airport in Lansing had confirmed no commercial craft in the area at that time.

While I make no claim to be a professional observer I do feel that I was capable, at that time as well as now, of recognizing most aircraft. I grew up near a small airport and am familiar with what most small airplanes look like in flight both day and night. As a boy in Junior High and High School I entertained a strong interest in Astronomy.

As a consequence of that interest I have at various times observed meteors. planets. the northern lights and other astronomical phenomena. Since the time of the sighting I have spent four years in the Marine Corps and another four completing college (B.A. degrees in Psychology and Art from Michigan State University) None of my subsequent experience has in any way cleared up the mystery of what it was that my friend his family and I observed that night.

P.S.

I have recently discussed the sighting again. with both Howard and his mother in an attempt to ascertain the exact date of the event. My personal notes written at the time have been lost, however there is the possiblity that Howard may be able to relocate his original notes. If that can be done I will send in the information. This matter is complicated by the fact that Howard currently resides in California while many of his personal effects are in storage in Michigan. In any case the concensus opinion of Howard, his mother and myself is that the sighting took place early in the month of June in 1967.

I would also request that the names of the Galloways be held in strict confidence, while both Mrs. Galloway and Howard did consent to the use of their names in this letter they prefer anonymity.

Yours truly

Michael

Evanston, Illinois 60202

MAR 16 1978

Dear Dr. Hynek;

I have never been afraid to report my UFO sighting. I have simply neglected doing so because I was one of a very large number of witnesses. It is possible my story will be very old news to you. I am sorry I cannot pinpoint the date but this sighting occurred sometime between the spring of 1967 and August, 1968.

The location permitted hundreds of persons to see, or at least be aware of the sighting. However, the location may have kept the sighting from becoming one of public knowledge. At least through my amatuer research I have yet to see it mentioned in any published accounts. The location is a secretive military installation and is only seconds away from Cape Kennedy for anything moving as fast as the UFO I saw.

I witnessed this sighting while serving in the United States Navy as an Aviation Ordinanceman. I was assigned to the Weapons Division known as Yellowater at Cecil Field Naval Air Station a few miles west of Jacksonville, Florida. A relatively small number of men, possibly 400 were assigned to Yellowater.

Shortly after dark one evening as some of us were leaving the barracks on liberty, an alert was sounded. It was the type alert calling for the Marines to dawn full battle gear to protect Yellowater from whatever caused the alert. This type alert was very rare and previously had only been called as drills. However, this time the alert was announced as not being a drill and all liberty was canceled until the alert was lifted.

We went outside to watch whatever action we could see. We found that the excitement was because of a bright green light in the sky over a very important area of Yellowater. As I remember it, this 'green light' was quite high and it remained stationary until helicopters and jet aircraft arrived from the other side of the base. The object then began moving irregularly, at extreme speeds and at times making 90^{o} changes in direction at the same extreme speeds. When the object moved, its color changed instantly to a brilliant red. Upon stopping, the object's color instantly returned to green. As I recall, this situation continued for close to an hour. The sky was full of aircraft either trying to watch or chase the object. Whatever their objective, the object had no trouble out-maneuvering some

of the Navy's most sophisticated aircraft.

The encounter came to an abrupt end. The object suddenly left at an unbelievable speed disappearing in a southeasterly direction. And I mean that was the end of the matter. To my knowledge, nothing was mentioned officially, nor did the media report on the occurrence. The quiet struck many of us as being quite odd, but after a short time the matter wasn't even mentioned again.

As I said at the beginning, this may be old news to you. If so, I would like very much to know what category you have placed this matter in. This is not a crank letter. The story I have reported here is as true as I can recall it, and I would appreciate knowing any facts you may have on the matter.

I thank you for your time and will be anxiously awaiting your reply.

Respectfully yours,

Gary

DEAR Dr. Hynek

I have just finished reading Project Blue Book by Brad Steiger, and read in that report that all U.F.O. witnesses were welcome, so I thought I would add one more to your list.

The sighting occured about 10 years ago, say in 1967 while I was in bed about 2:00 O'clock in the morning. I was just laying there not able to sleep and gazing out the window of our bedroom. The night was clear and I was just looking at the stars I guse, then suddenly a blue green glowing flach crossed the window from west to east. I jumped out of bed to view the object at the other window that was just above my head. I had a instant thought that it was a meteor and it was going to hit somewhere in the city of Denver. Out the other window the object continued it downward decent paralile to the ground, however the object did not crash into the Denver Basin but leveled off and started to climb and then it disapered on the horizon. While the object was under my observation only a few seconds had passed, not more than eight seconds had passed from the first sighting out the window on the south side of house.

I have drawn several picture so that you can understand the objects position in relation to where our house was situated.

(See Drawings)

P.S. We do not live at the house where the sighting took place then. Now we live a little higher up on the hill but the other house had a better view of the Denver Basin. The address there was

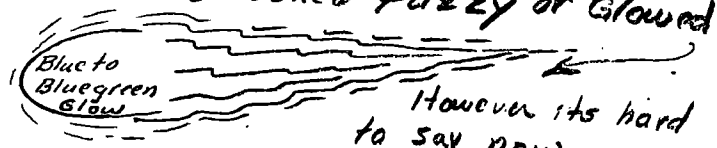
1. The Object had a appearance ___ ___ ___ ___ of a bleu green Glow, with not much of a contrail noted. The front part appeared to Glow also. And was about the size of half a dollar at arms length.



However its hard to say now.

Object was much brighter than the dawn sky.

Size about 100 yrds long, just a guss. though.

2. There appeared to be no sparks

3. The only other person who was with me at the time was my wife

4. Her reaction – getting woke out of a very sound sleep by him leaping out of bed! Then his telling me that he saw something that moved across Denver faster than any plane.

5. I shell never forget this and was puzzeled when the Object made a climb out of the Denver Basin

No. 4

I never have reported this befor and have never seen anything like it. When camping in the high Mountains one can see satelights at night, but this was nothing like that.

On the next day I did not hear anything said about it on the news. Also at that time I did not know who to contact about it so I just never said much to anybody about it.

But when I read the Blue Book Report I thought mybe I should. Now I wish that I had reported it that night so that more information may have been gained and my memorie of the object more clear in my mind. I work for the USGS as a map maker. (photogrammetry)

JULY, 1967
ADELAIDE AUS.

MAY 13, 1978

MAY 13 1978

MAY 13 1978

Via Houghton. 5131.
SOUTH AUSTRALIA.
8th May 1978.

Dear Sir/Madam,

In July 1967 I and several other people observed a UFO for which I can offer no scientific explanation from my experiences as a physicist and a private pilot.

Our family lives on a 10 acre property in the Mt. Lofty Ranges, approximately 14 miles north-east of Adelaide, South Australia. One night in July 1967, I was in the bathroom brushing my teeth when I glanced up through the window and saw a brilliant orange glow. It was the brightest, most luminous colour of light that I have ever seen. I called out to my mother who was in the lounge watching television. It was approximately 10pm, as a local variety show which started at 9.30pm and finished at 10.30pm was on TV. We both went outside to have a better look. There is a 30ft. long swimming pool outside the back of the house, and we went to the far end for a good view. The hillside drops away rapidly beyond the pool to sparsely populated foothills, so this was a very unobscured position.

As we watched, the cigar shaped light hovered up and down and turned onto it's side and then returned to it's original position. As the UFO manoeuvred different features could be seen. (see illustration). Round portholes could be seen which were different in colour to the rest of the object. It hovered in the same area and repeated the above manoeuvres several times. We stood watching it for about 20 minutes when it suddenly shot off towards the western horizon at a tremendous speed.

I have marked on the enclosed aeronautical map the position of our house, the approximate position of the UFO and the approximate position of known witnesses. The house is 1500' above sea level and the UFO was seen to be below the horizon from our position. The sighting of this UFO was reported in the newspaper (Advertiser) by a person at Para Hills (see map) and I also believe other people in our area saw the same UFO.

There were no aircraft in the area at the time and although I never contacted the radar controller at Adelaide Airport to ask if anything unusual had been seen on the radar, I have obtained a report of an aircraft crash in the same area in which a radar coverage test was conducted. This showed that in the area where the UFO was sighted no radar coverage was possible below 1500'AMSL and that above that altitude (upto the maximum altitude of the test- 3500') there was a "good deal of intermittency in the radar contacts in this area".

...../2.

Considering that the scan rate of the type of radar in use at that time was only one turn each 12 seconds it is obvious that because of the very high speed at which the UFO departed the area and the low altitude whilst in the area(below 1400') it is highly improbable that it would have been detected by the radar controller.

During 1967 in particular,there were numerous sightings of UFOs in the Adelaide area including some very close encounters(eg.UFOs hovering over houses, UFOs following cars and people).

Hoping this information will be of use,

Yours sincerely,

P.S. Do you have a UFO society which I could become a member of that gives up to date information on UFOs!

Dr. J. Allen Hynek
CENTER FOR UFO STUDIES
924 Chicago Avenue
Evanston, Illinois 60202

Dear Dr. Hynek:

Years after its occurrence, I am finally writing to pass on to you my experience in a single sighting of possible UFO's. I hope that others are less remiss in sending you information regarding their similar experiences.

The incident occurred about 10 PM (it was dark) in early summer of 1967, 1968 or 1969 (sorry!) in open country in eastern Washtenaw County, Michigan, on North Territorial Road about 6 miles due west of Plymouth and about 13-15 miles east-northeast of Ann Arbor. My husband was with me and experienced the same sighting.

As we stood in front of our house and faced the north sky, I noticed two lights, side-by-side as if mounted on jet plane wings, approaching the area slowly from the east at about 45° descending to about 40° or 35° . The lights, one red and one white, approached so low, about 1,000 or 2,000 feet up (estimate--I'm bad at judging distances), that I said, "That plane's coming in awfully low for landing at the airport!" (Willow Run, the closest major airport to our location, is probably 10-15 miles due south).

Just as I made the comment, one light suddenly shot straight up into the sky and out of sight, while the other sped toward the west-northwest along the horizon for some miles, I figure, then raised diagonally into the sky and out of sight. Both moved at very great rates of speed in leaving and I do not recall which color light moved in which direction. The whole sighting lasted about 20 seconds.

The next day I heard radio reports of UFO sightings in Livingston County (adjacent to the north). It seems to me that this happened about the same time as the lower Michigan sightings which were "explained" as "swamp gas". I may be wrong on the timing of our sighting vs. the "swamp gas" sightings and could even be a year or more off in the time comparison.

One thing I recall clearly--the lights were steady and unblinking and no sound accompanied their movement. Since then, whenever I see lights of any color in the sky I look to see if they are blinking and I listen for a sound. Of course, they are always blinking and I always hear a jet or other engine sound!

The rough drawing attached will give some idea of the movement of the lights. Please note on the map that we were not terribly far from I-94, where one or two people reported sightings to you on your call-in session with J. P. McCarthy, WJR radio in Detroit, one morning this past winter. In fact, it was your suggestion to these people to document their experiences and send them to you that has prompted this letter.

I hope that this story may be of some value to you in your research.

Sincerely,

Marion

Dear Dr. Hynek,

I have been interested in UFO's, The Bermuda Triangle and other such mysteries. I have read your books and many of your associates. I wish to relate to you an incident that happened to me when I was about 9 or 10 yrs. old. I know it may be strange that I write about something that happen 10 or 11 years ago. But since I have read your material and many others like yours, I thought maybe what I saw wasn't really what I thought it was.

As I mentioned before I was about 9 or 10 when this happened. It was in the summer (exact date forgotten) of 1967 or 1968. I was helping my father take the trash out. It was a bright night, no

clouds, the moon was out and there lots of stars. The reason I remember this so well is because I have always been interested in the heavens. And many a time I have stop to look into the sky. We were taking the trash down the driveway when I stopped to look at the stars. At that time I notice an extremely bright light streaking across the sky. The size of the object was that of a beach ball with a bright light inside it, held out arms length. It came from behind some woods that were in back of our house. It went across the sky in an arch type fashion and disappeared. It had a foggy appearance and left a trail of blue and orange mist or gas which lingered for about 10 seconds.

I had shouted at my father but by the time he had looked the object was gone and so was the mist or gas. I

observed the object for about 2 or 3 seconds. I told my father I had seen a meteorite. At At which time I thought that is what I saw. I never gave it any more thought but what I saw is still embedded in my mind.

As I stated earlier upon getting older and reading more about UFO's, I thought maybe what I saw was a meteorite. I would appreciate any insight or explanation as to what I saw if at all possible. At the time of the incident I was living at Dr., Mechanicsburg, PA.

At present I am a member of the United States Air Force and have been so for little over a year. My letter to you is in no way in connection with my present duty with the USAF and I wish this to be known.

Please continue your studies and hopefully some day we will find the truth behind this

mysteries and many others alike. I believe that everything and anything is possible until proven without a doubt otherwise.

Your consideration and understanding in this matter will be appreciated.

Sincerely,

Maurice

U.F.O. REPORT FORM

This questionnaire has been prepared so that you can give the C.I.O.U.F.O. (Civilian Investigation Of Unidentified Flying Objects) as much information as possible concerning the Unidentified Aerial Phenomenon that you have observed. Please try to answer as many questions as you can.
If additional space is needed, please use an additional sheet of paper.

NAME: Jack

ADDRESS: RR 1,

CITY: Oelwein STATE Iowa ZIP CODE 51662

PHONE NUMBER: 283-3089 OCCUPATION: Asst Chief Police

(If you have no phone, write "NO PHONE" in the above space)

1. WERE YOU WITH ANYONE WHEN YOU SAW THE OBJECT (S)? YES ✓ NO ____

IF YOU WERE, PLEASE STATE HOW MANY AND LIST THEIR NAMES AND ADDRESSES ON THE FOLLOWING LINES.

E. Kiefer Oelwein, Iowa

2. HOW MANY OBJECTS DID YOU SEE? one

3. WHEN DID YOU OBSERVE THE OBJECT (S)? 10 (DAY) October (MONTH) 1967 (YEAR)

4. TIME OF DAY: 4 (HOURS) 15 (MINUTES) (CIRCLE ONE): (A.M.) P.M.

5. TIME ZONE: Central daylight time

6. STATE EXACT LOCATION AS TO WHERE YOU WERE WHEN YOU FIRST NOTICED THE OBJECT (S): 2 miles south of Oelwein, Ia.

7. HOW LONG WAS THE OBJECT (S) IN SIGHT? H (HOURS) 20 (MINUTES) (SECONDS)

8. IS THIS AN EXACT OR AN ESTIMATE ANSWER: yes

9. STATE EXACT LOCATION AS TO WHERE YOU WERE WHEN YOU LAST SAW THE OBJECT (S): 2 miles south + 2 miles east + ½ mile north

10. WHAT WAS THE CONDITION OF THE SKY? Partly cloudy

11. IN WHAT DIRECTION WAS THE OBJECT (S) TRAVELING WHEN FIRST SIGHTED:

east

12. IN WHAT DIRECTION WAS THE OBJECT (S) TRAVELING WHEN LAST SEEN?

East a little north

13. PLEASE DESCRIBE THE MOTION AND MOVEMENT OF THE OBJECT (S) AS BEST YOU CAN:

The came from city park on highway 190th turning east when I 1st ~~first~~ spotted. Went straight east for about one mile. Then it crossed the road to the left of us. Went about ½ mile east + dropped close to earth. Was in same position for about 5 minutes. They raised + went to south east till we turned corner to the north. It turned east [illegible]

14. ... YES ___ NO ___ IF IT DID, PLEASE EXPLAIN.

When first sighted. It was to the right a few. Then it crossed the road to the left side. We followed about a mile & a half. It came down close to earth. It never moved for about five minutes.

15. PLEASE DESCRIBE THE OBJECT IN DETAIL: a very bright light. With a very large orange circular rim around the light. We could see blue flames or rays shooting out at all sides.

16. WHAT COLOR (S) WAS THE OBJECT (S): a light was very bright at times. They dim down to a yellow with a orange rim

17. DID THE OBJECT (S) CHANGE COLOR? ___ YES ✓ NO IF SO, WHAT COLORS DID IT CHANGE TO: ___

18. DID THE OBJECT (S) CHANGE SHAPE? ___ YES ✓ NO IF SO, PLEASE EXPLAIN:

19. DID THE OBJECT EMITT SMOKE OR VAPOR? ___ YES ✓ NO IF SO, PLEASE EXPLAIN:

20. WHAT ALTITUDE WAS THE OBJECT? about 1000 feet

21. DID THE OBJECT (S) APPEAR TO CHANGE ALTITUDE AT ANY TIME? ✓ YES ___ NO IF SO, PLEASE EXPLAIN: It appeared not over a 100 foot from earth at one time.

22. WHAT WAS THE SIZE OF THE OBJECT? (COMPARE WITH KNOWN OBJECT): ___ about 75 feet

23. DID THE OBJECT (S) COME TOWARD YOU AT ANY TIME OR APPEAR HOSTILE? YES ___ NO ✓ IF SO, PLEASE GIVE DETAILS: ___

24. DID THE OBJECT APPEAR TO LAND AT ANY TIME? YES ___ NO ✓ IF IT DID, PLEASE GIVE DETAILS ON ANOTHER SHEET OF PAPER:

25. PLEASE MAKE A SKETCH OF THE OBJECT (S) SHOWING MOTION AND MOVEMENT and DIRECTION ON AN ADDITIONAL SHEET OF PAPER:

26. DID YOU PHOTOGRAPH THE OBJECT? YES ___ NO ✓

(IF THERE ARE ANY DETAILS NOT COVERED BY THIS QUESTIONNAIRE, PLEASE GIVE DETAILS ON ADDITIONAL PAPER.)

27. MAY THE CIOUFO USE YOUR NAME IN CONNECTION WITH THIS REPORT?

Sighting no 1.

To whom it may Concern,

I would like to relate to you an incident that occured in December of 1967 but which I did not report due to lack of believability. The sighting began when my mother was looking towards the early morning western sky and saw what appeared to be a star moving back and forth. She called for me to come and see and after watching for a few moments I grabbed a pair of binoculars in the house. I went back to the window and focused on the star. When I did goosebumps ran all over me, for what I saw was a classical shaped saucer metallic in color which I am sure is what caused the strong reflection such as a star would.

I watched the object for approx. a minute more. The object stopped for a while and a red light appeared to come from underneath. It was too small for me to detect the true shape or form of it. The red light moved out to the left side then up and down, all the while the saucer was stationery. Finally both saucer and red object took off straight into the western sky. In a matter of 2-3 seconds both were out of sight.

I was compelled to write you after reading about saucer incidents around air force bases in recent years. My home from where this object was viewed is less than 2 miles from Carswell air force base in Ft. Worth, Texas. Nothing was ever mentioned in either newspaper or television about sightings on that day.

I cant help but believe that if I had eye contact with it, the saucer, that someone at the base in the control tower also had some contact either visual or on radar.

I am aware its been a long time to report such an incident but this is the first time for me to contact anyone about this sighting. There is no question in my mind or my mother that what we saw could have been anything but a saucer. At the time of the sighting I was a high school senior, who would believe at an airbase that they were possibly being watched by a U.F.O. if I had called.

Thankyou for your time and consideration concerning this 1 ancient incident that occured.

Sincerely
Craig
